

ALLIANCE One

2018 ANNUAL REPORT

TO OUR FELLOW INVESTORS:

2018 was a pivotal year for Alliance One amidst a rapidly evolving industry landscape. Led by a united purpose, we further enhanced our focus on becoming a trusted provider of responsibly-produced, independently-verified, sustainable and traceable agricultural products, ingredients and services to businesses and consumers. We also announced our “One Tomorrow” transformation initiative in February 2018, which is driven by investment into new, business lines with a higher margin and growth potential than our leaf business; acquisition of new skill sets; heightened focus on our leaf business; and an unwavering commitment to further uniting our businesses behind a unified purpose.

In fiscal 2018, Alliance One:

- Grew total sales and other operating revenues by 7.7% to \$1,846.0 million
- Increased gross profit 13.5% to \$246.2 million and gross profit as a percentage of sales to 13.3% from 12.7%
- Delivered net income of \$52.4 million
- Launched the “One Tomorrow” transformation initiative
- Purchased and canceled \$28.6 million of existing 9.875% senior secured second lien notes due in 2021

Our performance this year was stronger – both in terms of financial performance as well as progress on “One Tomorrow.” Led by our leaf business, we saw improvement in net sales, gross profit, and net income in fiscal 2018. We actively developed new business lines that build upon the strength of our core operations and invested in long-term growth opportunities in e-liquids, industrial hemp and legal cannabis. We also made multiple strategic hires that are allowing us to rapidly drive progress in our new business lines. At each step of the way, we were, and will continue to be, driven by our shared purpose: to transform people’s lives so that together we can grow a better world.

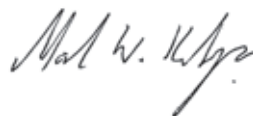

We are proud to be an agricultural company, where the farmer is at the heart of everything we do. Our agronomy and leaf teams worldwide are in the fields every day, working with farmers and rural communities to help them become more sustainable. Today, many of these farmers produce a significant volume of non-tobacco crops as a result of the partnership with our company, allowing them to be more food secure and sell surplus crops in the marketplace. We are actively working to provide viable markets for non-tobacco crops and our next step is to build the value-added processes locally that allow farmers to expand and further diversify their income.

When combined with our strong track-and-trace capabilities, our agricultural core business is central to our value proposition with customers and suppliers. The ability to identify the farmers and inputs that went into the finished product is one of the many capabilities available through our robust data analytics platform. We know that this information is crucial for our customers and that they take comfort in knowing their brands are protected by this level of track-and-trace technology.

We are focused on growth far beyond maintaining and improving our leaf market share. As part of “One Tomorrow,” we successfully acquired majority stakes in three new joint ventures and partnered with two other industry-leading companies, expanding our reach into e-liquids, industrial hemp and legal medicinal cannabis. The investments we made are complementary to our tobacco business and offer products with higher margin potential that fit cohesively into our value-added business model.

These operating improvements and transformation initiatives we began in fiscal 2018 are the foundation of our business moving forward. Over the next three to four years, we intend to broaden our business portfolio by focusing on value-added consumer-driven agricultural products. Our goal is to generate a significantly increasing portion of revenue and profit from the new, higher-margin businesses by 2020.

We expect fiscal 2019 to be another year of growth with contributions from both the tobacco business as well as our new business lines. With a strong team of talented individuals driving forward with a united purpose, we plan on continuing to deliver on our financial commitments and make solid progress executing our “One Tomorrow” transformation strategy. Alliance One is growing stronger every day, and we are excited about maximizing future opportunities to further enhance shareholder value.

Mark W. Kehaya

PART I

ITEM 1. BUSINESS

Alliance One International, Inc. (“we,” “Alliance One” or the “Company”) is a Virginia corporation with revenues of approximately \$1.8 billion and operating income of approximately \$110.6 million for the year ended March 31, 2018. Our common stock has been traded on the New York Stock Exchange since 1995.

Additional Information

We are required to file annual, quarterly and current reports, proxy statements and other information with the U.S. Securities and Exchange Commission (“SEC”). The public may read and copy any materials that we file with the SEC at the SEC’s Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. Information on the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an internet site that contains reports, proxy and information statements, and other information regarding issuers that file with the SEC at <http://www.sec.gov>.

Our website address is <http://www.aointl.com>. We make available, free of charge through our website, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. The information contained on our website shall not be deemed part of this annual report on Form 10-K for any reason.

COMPANY OVERVIEW

At Alliance One, we believe everything we do is to transform people’s lives so that together we can grow a better world. A 145-year-old agricultural company, Alliance One provides responsibly-produced, independently verified, sustainable and traceable agricultural products, ingredients and services to businesses and customers. Headquartered in the Research Triangle Park region of North Carolina, we contract with growers across five continents to help them produce sustainable, compliant crops.

We are committed to responsible crop production which supports economic viability for the grower, provides a safe working atmosphere for those involved in crop production and minimizes negative environmental impact. Our agronomists maintain frequent contact with growers prior to and during the growing and curing seasons to provide technical assistance to improve the quality and yield of the crop. Throughout the entire production process, from seed through processing and final shipment, our traceability systems provide clear visibility into how products are produced at every step of the supply chain, supporting product integrity.

Historically, Alliance One’s core business has been as a tobacco leaf merchant, purchasing, processing, packing, storing and shipping tobacco to manufacturers of cigarettes and other consumer tobacco products throughout the world. Through our predecessor companies, we have a long operating history in the leaf tobacco industry with some customer relationships beginning in the early 1900s. In an increasing number of markets, we also provide agronomy expertise for growing leaf tobacco. Our contracted tobacco grower base often produces a significant volume of non-tobacco crop utilizing the agronomic assistance that our team provides. Alliance One is working to find markets for these crops as part of our ongoing efforts to improve farmer livelihoods and the communities in which they live.

As we announced in February 2018, we began a transformation process that would allow the Company to diversify its products and services by leveraging its core strengths in agronomy and traceability. In addition to our existing 50% interest in Purilum, LLC, a U.S. company that develops, produces, and sells consumable e-liquids to manufacturers and distributors of e-vapor products, on August 21, 2017, the Company completed a purchase of a 40% interest in Nicotine River, LLC, a manufacturer, retailer and wholesale supplier of compounds used for e-liquid production. On April 2, 2018, we purchased a 51% interest in Humble Juice, LLC, a manufacturer and distributor of e-liquids. On December 18, 2017, a subsidiary of the Company completed a purchase of a 40% interest in Criticality LLC (“Criticality”), a North Carolina-based industrial hemp company to engage in cannabidiol (“CBD”) extraction and other applications for industrial hemp in accordance with a pilot program authorized under the federal Agriculture Act of 2014 and applicable North Carolina law. On January 25, 2018, a Canadian subsidiary of the Company acquired a 75% equity position in Canada’s Island Garden Inc. (“CIG”). CIG is fully licensed to produce and sell medicinal cannabis in the Canadian province of Prince Edward Island. CIG sells its products in Canada directly to patients and through distributors. In January, 2018, CIG signed a Memorandum of Understanding with the province of Prince Edward Island to be one of three suppliers under the provincial Cannabis Board. On January 29, 2018, the same Canadian subsidiary of the Company acquired an 80% equity position in Goldleaf Pharm Inc. (“Goldleaf”), a late-stage applicant to produce and sell medicinal cannabis located in the Canadian province of Ontario. In general, our diversification focuses on products that are value-added, require some degree of processing and play well to our strengths as well as offering higher margin potential than our core tobacco leaf business.

To support these business lines, we have broad geographic processing capabilities, a diversified product offering, an established customer base for our core business and a growing customer base for our new business lines. We intend to

continue broadening our business portfolio over the next three to four years by focusing on consumer-driven agricultural products. Because certain of these diversification investments are accounted for under the equity method and others were made only recently and involve early-stage businesses, our core leaf tobacco operations continued to account for almost all of our revenues for the fiscal year ended March 31, 2018. It is our plan that, as these new businesses further develop and we pursue other diversification opportunities, these business lines will begin to meaningfully contribute to future years' revenues with a more significant impact toward profitability.

Leaf Tobacco Operations. Our tobacco revenues are primarily comprised of sales of processed tobacco and fees charged for processing and related services to these manufacturers of tobacco products. Processing and other revenues are less than 5% of our total revenues. We deal primarily in flue-cured, burley, and oriental tobaccos that are used in international brand cigarettes.

Tobacco is purchased in more than 35 countries and shipped to approximately 90 countries. Tobacco is primarily purchased directly from suppliers with small quantities still purchased at auction. In non-auction markets, we purchase tobacco directly from suppliers and we assume the risk of matching the quantities and grades required by our customers to the entire crop we must purchase under contract. In other non-auction markets, such as China, we buy tobacco from local entities that have purchased tobacco from suppliers and supervise the processing of that tobacco by those local entities. Principal auction markets include India, Malawi and Zimbabwe and our network of tobacco operations and buyers allows us to cover the major auctions of flue-cured and burley tobacco throughout the world. In the United States and other locations, a number of our customers purchase tobacco directly from the suppliers in addition to the leaf merchants. Although our facilities process the tobacco purchased directly from suppliers by these customers, we do not take ownership of that tobacco and do not record sales revenues associated with its resale. Our arrangements with suppliers vary from locale to locale depending on our predictions of future supply and demand, local historical practice and availability of capital. In certain jurisdictions, we purchase seeds, fertilizer, pesticides and other products related to growing tobacco and advance them to suppliers, which represents prepaid inventory. The suppliers then utilize these inputs to grow tobacco, which we are contractually obligated to purchase. The advances of inputs for the current crop generally include the original cost of the inputs plus a mark-up and interest as it is earned. Where contractually permitted, we charge interest to the suppliers during the period the current crop advance is outstanding. We generally advance inputs at a price greater than our cost, which results in a mark-up on the inputs. We account for our advances to tobacco suppliers using a cost accumulation model, which results in us reporting our advances at the lower of cost or recoverable amounts excluding the mark-up and interest. The mark-up and interest on our advances are recognized when the tobacco is delivered as a decrease in our cost of the current crop. Upon delivery of tobacco, part of the purchase price paid to the supplier is paid in cash and part through a reduction of the advance balance. The advances applied to the delivery are reclassified out of advances and into unprocessed inventory. We advance inputs only to suppliers with whom we have purchase contracts. For example, in Brazil, we generally contract to purchase a supplier's entire tobacco crop at the market price per grade at the time of harvest based on the quality of the tobacco delivered. Pursuant to these purchase contracts, we provide suppliers with fertilizer and other materials necessary to grow tobacco and may guarantee Brazilian rural credit loans to suppliers to finance the crop. Under longer-term arrangements with suppliers, we may advance or guarantee financing on suppliers' capital assets, which are also recovered through the delivery of tobacco to us by our suppliers.

In these jurisdictions, our agronomists maintain frequent contact with suppliers prior to and during the growing and curing seasons to provide technical assistance to improve the quality and yield of the crop. As a result of various factors including weather, not all suppliers are able to settle the entire amount of advances through delivery of tobacco in a given crop year. Throughout the crop cycle, we monitor events that may impact the suppliers' ability to deliver tobacco. If we determine we will not be able to recover the original cost of the advances with deliveries of the current crop, or future crop deliveries, the unit cost of tobacco actually received is increased when unrecoverable costs are within a normal range which is based on our historical results or expensed immediately when they are above a normal range based on our historical results. We account for the unrecoverable costs in this manner to ensure only costs within a normal range are capitalized in inventory and costs that are above a normal range are expensed immediately as current period charges.

Alliance One has developed an extensive international network through which we purchase, process and sell tobacco and we hold a leading position in most tobacco growing regions in the world. We purchase tobacco in more than 35 countries. During the three years ended March 31, 2018, 2017, and 2016, approximately 25%, 24%, and 24%, respectively, of our purchases of tobacco were from the North America operating segment and approximately 75%, 76%, and 76%, respectively, were from the Other Regions operating segment. Within the Other Regions operating segment, approximately 61%, 60%, and 61% of our total purchases for the three years ended March 31, 2018, 2017, and 2016, respectively, were from China, Brazil, Turkey, and the Africa Region.

We process tobacco to meet each customer's specifications as to quality, yield, chemistry, particle size, moisture content and other characteristics. Unprocessed tobacco is a semi-perishable commodity that generally must be processed within a relatively short period of time to prevent fermentation or deterioration in quality. The processing of leaf tobacco facilitates shipping and prevents spoilage and is an essential service to our customers because the quality of processed leaf tobacco substantially affects the quality of the manufacturer's end product. Accordingly, we have located our production facilities in proximity to our principal sources of tobacco.

We process tobacco in more than 34 owned and third-party facilities around the world including Argentina, Brazil, China, Zimbabwe, Jordan, Guatemala, India, Tanzania, the United States, Malawi, Thailand, Germany, Indonesia, Macedonia, Bulgaria and Turkey. These facilities encompass all leading export locations of flue-cured, burley and oriental tobaccos. In addition, we have entered into contracts, joint ventures and other arrangements for the purchase of tobacco grown in substantially all other countries that produce export-quality flue-cured and burley tobacco.

Upon arrival at our processing plants, flue-cured and burley tobacco is first reclassified according to grade. Most of that tobacco is then blended to meet customer specifications regarding color, body and chemistry, threshed to remove the stem from the leaf and further processed to produce strips of tobacco and sieve out small scrap. We also sell a small amount of processed but unthreshed flue-cured and burley tobacco in loose-leaf and bundle form to certain customers. Oriental tobaccos are handled and processed in a similar manner other than that the tobaccos are not threshed to remove stems.

Leaf Tobacco Operations (continued). Processed flue-cured, burley and oriental tobacco is redried to remove excess moisture so that it can be held in storage by customers or us for long periods of time. After redrying, whole leaves, bundles, strips or stems and scrap where applicable are separately packed in cases, bales, cartons or hogsheads for storage and shipment. Packed flue-cured, burley and oriental tobacco generally is transported in the country of origin by truck or rail, and exports are moved by ship. Prior to and during processing, steps are taken to ensure consistent quality of the tobacco, including the regrading and removal of undesirable leaves, dirt and other non-tobacco related material. Customer representatives are frequently present at our facilities to monitor the processing of their particular orders. Throughout the processing, our technicians use quality control laboratory test equipment to ensure that the product meets all customer specifications.

Key Customers. In our leaf tobacco business, our primary customers are major tobacco product manufacturers. The consumer tobacco business is dominated by a relatively small number of large multinational cigarette manufacturers and by government controlled entities. Including their respective affiliates, accounting for more than 10% of our revenues were each of Philip Morris International, Inc. (“PMI”), China Tobacco International, Inc. and Imperial Brands, PLC for the year ended March 31, 2018 and PMI and China Tobacco International, Inc. for the years ended March 31, 2017 and 2016.

In the 2018 fiscal year, Alliance One delivered approximately 39% of its tobacco sales to customers in Europe and approximately 16% to customers in the United States. One customer directs shipments to its Belgium storage and distribution center before shipment to its manufacturing facilities in Europe and Asia. In the 2018 fiscal year, these Belgium sales accounted for 7% of total sales. The remaining sales of leaf tobacco are to customers located in Asia, Africa and other geographic regions of the world.

Competition. Alliance One is one of only two global, publicly held leaf tobacco merchants, each with similar global market shares. We hold a leading position in most major tobacco growing regions in the world, including the principal export markets for flue-cured, burley and oriental tobacco and, as a result of our scale, global reach, and financial resources, we believe we are well-suited to serve the needs of all manufacturers of cigarettes and other consumer tobacco products. The leaf tobacco industry is highly competitive and competition is based primarily on the price charged for products and services as well as the merchant’s ability to meet customer specifications in the buying, processing, residue compliance and financing of tobacco. In addition to the primary global independent leaf tobacco merchants, there are a number of other independent global, regional or national competitors. Local independent leaf merchants with low fixed costs and overhead also supply cigarette manufacturers. Recent vertical integration initiatives and other changes in customer buying patterns have resulted in a more dynamic and competitive operating environment. There is also competition in all countries to buy the available leaf tobacco and, in many areas, total leaf tobacco processing capacity exceeds demand.

Competition in our new business lines continues to evolve, but is generally based on product innovation, product quality, price, brand recognition and loyalty, effectiveness of marketing, promotional activity, and the ability to identify and satisfy consumer and customer preferences.

Seasonality. The purchasing and processing activities of our agricultural business are seasonal. With regards to tobacco, purchases vary by market and tobacco variety. Flue-cured tobacco grown in the United States is purchased, processed and marketed generally during the five-month period beginning in July and ending in November. U.S. grown burley tobacco is purchased, processed and marketed usually from late November through January or February. Tobacco grown in Brazil is usually purchased, processed and marketed from January through July and in Africa from April through September.

Other tobacco markets around the world have similar purchasing periods, although at different times of the year. During the purchasing, processing and marketing seasons, inventories of unprocessed tobacco, inventories of redried tobacco and trade accounts receivable normally reach peak levels in succession. Current liabilities, particularly advances from customers and short-term notes payable to banks, normally reach their peak in this period as a means of financing the seasonal expansion of current assets. At March 31, the end of our fiscal year, the seasonal components of our working capital reflect primarily the operations related to foreign-grown tobacco.

Reportable Segments. For our leaf tobacco business, the purchasing, processing, selling and storing of tobacco is similar throughout our business. However, we maintain regional operating and financial management in North America, South America, Europe, Africa and Asia to monitor our various operations in these areas. In reviewing these operations, we have concluded that the economic characteristics of North America are dissimilar from the other operating regions. Based on this fact, we disclose North America separately and aggregate the remaining four operating segments, Africa, Asia, Europe and South America into one reportable segment “Other Regions.” Our financial performance is reviewed at this level and these regions represent our operating segments. The investments in new business lines as part of our transformation process (other than our investments in entities accounted for under the equity method) are being reported in the Other Regions reportable segment. See Note 14 “Segment Information” to the “Notes to Consolidated Financial Statements” for financial information attributable to our reportable segments.

OTHER

Research and Development. We routinely cooperate with both our customers and the manufacturers of the equipment used in our processing facilities to improve processing technologies. However, no material amounts are expended for research and development, and we hold no material patents, licenses, franchises, or concessions.

Alliance One Employees. Alliance One’s consolidated entities employed approximately 3,450 persons, excluding seasonal employees, in our worldwide operations at March 31, 2018. In the Other Regions operating segment, Alliance One’s consolidated entities employed approximately 2,854 employees at March 31, 2018, excluding approximately 5,377 seasonal employees. Most seasonal employees are covered by collective bargaining agreements. In the North America operating segment, Alliance One’s consolidated entities employed approximately 596 employees at March 31, 2018, excluding approximately 171 seasonal employees. Most seasonal employees, as well as approximately 222 full-time factory personnel in the United States, are covered by collective bargaining agreements. We consider Alliance One’s employee relations to be satisfactory.

Government Regulation and Environmental Compliance.

See Item 1A. “Risk Factors” for a discussion of government regulation. Currently, there are no material estimated capital expenditures related to environmental control facilities. In addition, there is no material effect on capital expenditures, results of operations or competitive position anticipated as a result of compliance with current or pending federal or state laws and regulations relating to protection of the environment.

EXECUTIVE OFFICERS OF ALLIANCE ONE INTERNATIONAL, INC.

The following information is furnished with respect to the Company’s executive officers as of April 1, 2018, and the capacities in which they serve. These officers serve at the pleasure of the Board of Directors and are elected at each annual organizational meeting of the Board.

<u>NAME</u>	<u>AGE</u>	<u>TITLE</u>
J. Pieter Sikkel	54	President and Chief Executive Officer
Graham J. Kayes	53	Executive Vice President—Business Relationship Management and Leaf
Jose Maria Costa Garcia	52	Executive Vice President—Global Operations and Supply Chain
Bryan T. Mazur	51	Executive Vice President—Global Specialty Products
Joel L. Thomas	51	Executive Vice President—Chief Financial Officer
William L. O’Quinn, Jr.	49	Senior Vice President—Chief Legal Officer and Secretary

The business experience summaries provided below for the Company’s executive officers describe positions held by the named individuals during the last five years.

J. Pieter Sikkel has served as President and Chief Executive Officer of Alliance One International, Inc., since March 2013, having previously served as President from December 14, 2010 through February 2013, Executive Vice President—Business Strategy and Relationship Management from May 2007 through December 13, 2010, and as Regional Director of Asia from May 2005 through April 2007.

Graham J. Kayes has served as Executive Vice President—Business Relationship Management and Leaf since July 2014, having previously served as Regional Director—Africa from February 2011 through June 2014, and as Managing Director of the Company’s Tanzanian subsidiary from June 2007 through January 2011.

Jose Maria Costa Garcia has served as Executive Vice President—Global Operations and Supply Chain since August 2012, having previously served as Regional Director—Europe from September 2008 through July 2012, and as Regional Financial Director—Europe from April 2005 through August 2008.

Bryan T. Mazur has served as Executive Vice President—Global Specialty Products since January 2018, having joined Alliance One International from Dr. Pepper Snapple Group, having served as its Vice President of Club since September 2010, Vice President of Marketing and General Manager (Snapple Tea and Functionals) from October 2006 to September 2010, and in other marketing and brand manager roles with that company since December 1998.

Joel L. Thomas has served as Executive Vice President—Chief Financial Officer since January 2014, having previously served as Vice President—Treasurer from December 2005 through December 2013.

William L. O'Quinn, Jr. has served as Senior Vice President—Chief Legal Officer and Secretary since April 2011, having previously served as Senior Vice President—Assistant General Counsel and Secretary from January 2011 through March 2011, and as Assistant General Counsel and Assistant Secretary from August 2005 through December 2010.

ITEM 1A. RISK FACTORS

The following risk factors should be read carefully in connection with evaluating our business and the forward-looking statements contained in this Annual Report on Form 10-K. Any of the following risks could materially adversely affect our business, our operating results, our financial condition and the actual outcome of matters as to which forward-looking statements are made in this Annual Report.

We may from time to time make written or oral forward-looking statements, including statements contained in filings with the SEC, in reports to stockholders and in press releases and investor calls and webcasts. You can identify these forward-looking statements by use of words such as “strategy,” “expects,” “continues,” “plans,” “anticipates,” “believes,” “will,” “estimates,” “intends,” “projects,” “goals,” “targets” and other words of similar meaning. You can also identify them by the fact that they do not relate strictly to historical or current facts.

We cannot guarantee that any forward-looking statement will be realized, although we believe we have been prudent in our plans and assumptions. Achievement of future results is subject to risks, uncertainties and inaccurate assumptions. Should known or unknown risks or uncertainties materialize, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected. Investors should bear this in mind as they consider forward-looking statements and whether to invest in or remain invested in Alliance One International, Inc. securities. In connection with the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, we are identifying important risk factors that, individually or in the aggregate, could cause actual results and outcomes to differ materially from those contained in any forward-looking statements made by us; any such statement is qualified by reference to the following cautionary statements. We elaborate on these and other risks we face throughout this document. You should understand that it is not possible to predict or identify all risk factors. Consequently, you should not consider the following to be a complete discussion of all potential risks or uncertainties. We do not undertake to update any forward-looking statement that we may make from time to time.

Risks Relating to Our Tobacco Operations

Our reliance on a small number of significant customers may adversely affect our financial statements.

The customers of our leaf tobacco business are manufacturers of cigarette and other tobacco products. Several of these customers individually account for a significant portion of our sales in a normal year.

For the year ended March 31, 2018, each of Philip Morris International, Inc., China Tobacco International Inc. and Imperial Brands, PLC, including their respective affiliates, accounted for more than 10% of our revenues from continuing operations. In addition, tobacco product manufacturers have experienced consolidation and further consolidation among our customers could decrease such customers’ demand for our leaf tobacco or processing services. The loss of any one or more of our significant customers could have a material adverse effect on our financial statements.

Continued vertical integration by our customers could materially adversely affect our financial statements.

Demand for our leaf tobacco or processing services could be materially reduced if cigarette manufacturers continue to significantly vertically integrate their operations, either through acquisition of our competitors, establishing new operations or contracting directly with suppliers. During fiscal 2014, we completed the formation of a joint venture in Brazil with China Tobacco International Inc. The joint venture entity had previously operated as one of our subsidiaries since its formation in 2012. Japan Tobacco, Inc. has vertically integrated operations in Malawi, Brazil and the United States. In addition, Philip Morris International, Inc. acquired supplier contracts and related assets in Brazil in order to procure leaf directly. In general, our results of operations have been adversely affected by vertical integration initiatives. Although recently, some customers began reversing certain aspects of their previous vertical integration of operations, further vertical integration by our customers could have a material adverse effect on our financial statements.

Global shifts in sourcing customer requirements may negatively impact our organizational structure and asset base.

The global leaf tobacco industry has experienced shifts in the sourcing of customer requirements for tobacco. For example, significant tobacco production volume decreases have occurred in the United States and Western Europe from historical levels. At the same time, production volumes in other sourcing origins, such as Brazil and Africa, have stabilized. Additional shifts in sourcing may occur as a result of currency fluctuations, including changes in currency exchange rates against the U.S. dollar. A shift in sourcing origins in Europe has been influenced by modifications to the tobacco price support system in the European Union (EU). Customer requirements have changed due to these variations in production, which could influence our ability to plan effectively for the longer term in Europe.

We may not be able to timely or efficiently adjust to shifts in sourcing origins, and adjusting to shifts may require changes in our production facilities in certain origins and changes in our fixed asset base. We have incurred, and may

Risks Relating to Our Tobacco Operations *(continued)*

Global shifts in sourcing customer requirements may negatively impact our organizational structure and asset base. *(continued)*

continue to incur, restructuring charges as we continue to adjust to shifts in sourcing. Adjusting our capacity and adjusting to shifts in sourcing may have an adverse impact on our ability to manage our costs, and could have an adverse effect on our financial performance.

Our financial results will vary according to growing conditions, customer indications and other factors, which reduces your ability to gauge our quarterly and annual financial performance.

Our financial results, particularly the quarterly financial results, may be significantly affected by fluctuations in tobacco growing seasons and crop sizes which affect the supply of tobacco. Crop sizes may be affected by, among other things, crop infestation and disease, the volume of annual tobacco plantings and yields realized by supplier and suppliers' elections to grow crops other than tobacco. The cultivation period for tobacco is dependent upon a number of factors, including the weather and other natural events, such as hurricanes or tropical storms, and our processing schedule and results of operations for any quarterly period can be significantly altered by these factors.

The cost of acquiring tobacco can fluctuate greatly due to crop sizes and increased competition in certain markets in which we purchase tobacco. For example, short crops in periods of high demand translate into higher average green prices, higher throughput costs and less volume to sell. Furthermore, large crops translate into lower average green prices, lower throughput costs and excess volume to sell.

Further, the timing and unpredictability of customer indications, orders and shipments cause us to keep tobacco in inventory, increase our risk and result in variations in quarterly and annual financial results. The timing of shipments can be materially impacted by shortages of containers and vessels for shipping as well as infrastructure and accessibility issues in ports we use for shipment. We may, from time to time in the ordinary course of business, keep a significant amount of processed tobacco in inventory for our customers to accommodate their inventory management and other needs. Sales recognition by us and our subsidiaries is based on the passage of ownership, usually with shipment of product. Because individual shipments may represent significant amounts of revenue, our quarterly and annual financial results may vary significantly depending on our customers' needs and shipping instructions. These fluctuations result in varying volumes and sales in given periods, which also reduces your ability to compare our financial results in different periods or in the same periods in different years.

Suppliers who have historically grown tobacco and from whom we have purchased tobacco may elect to grow other crops instead of tobacco, which affects the world supply of tobacco and may impact our quarterly and annual financial performance.

Increases in the prices for other crops have led and may in the future lead suppliers who have historically grown tobacco, and from whom we have purchased tobacco, to elect to grow these other, more profitable, items instead of tobacco. A decrease in the volume of tobacco available for purchase may increase the purchase price of such tobacco. As a result, we could experience an increase in tobacco crop acquisition costs which may impact our quarterly and annual financial performance.

Our advancement of inputs to tobacco suppliers could expose us to losses.

We advance seeds, fertilizer, pesticides and other products related to growing tobacco to our suppliers, which represent prepaid inventory, in many countries to allow the suppliers to grow tobacco, which we are contractually obligated to purchase. The advances to tobacco suppliers are settled as part of the consideration paid upon the suppliers delivering us unprocessed tobacco at market prices. Two primary factors determine the market value of the tobacco suppliers deliver to us: the quantity of tobacco delivered and the quality of the tobacco delivered. Unsatisfactory quantities or quality of the tobacco delivered could result in losses with respect to advances to our tobacco suppliers or the deferral of those advances.

When we purchase tobacco directly from suppliers, we bear the risk that the tobacco will not meet our customers' quality and quantity requirements.

In countries where we contract directly with tobacco suppliers, including Argentina, Brazil, the United States and certain African countries, we bear the risk that the tobacco delivered will not meet quality and quantity requirements of our customers. If the tobacco does not meet such market requirements, we may not be able to sell the tobacco we agreed to buy and may not be able to meet all of our customers' orders, which would have an adverse effect on our profitability and results of operations.

Risks Relating to Our Tobacco Operations *(continued)*

Weather and other conditions can affect the marketability of our inventory.

Like other agricultural products, the quality of tobacco is affected by weather and the environment, which can change the quality or size of the crop. If a weather event is particularly severe, such as a major drought or hurricane, the affected crop could be destroyed or damaged to an extent that it would be less desirable to our customers, which would result in a reduction in revenues. If such an event is also widespread, it could affect our ability to acquire the quantity of products required by customers. In addition, other items can affect the marketability of tobacco, including, among other things, the presence of:

- non-tobacco related material;
- genetically modified organisms; and
- excess residues of pesticides, fungicides and herbicides.

A significant event impacting the condition or quality of a large amount of any of the tobacco crops we buy could make it difficult for us to sell such tobacco or to fill our customers' orders. In addition, in the event of climate change, adverse weather patterns could develop in the growing regions in which we purchase tobacco. Such adverse weather patterns could result in more permanent disruptions in the quality and size of the available crop, which could adversely affect our business.

We face increased risks of doing business due to the extent of our international operations.

We do business in more than 35 countries, some of which do not have stable economies or governments. Our international operations are subject to international business risks, including unsettled political conditions, uncertainty in the enforcement of legal obligations, including the collection of accounts receivable, fraud risks, expropriation, import and export restrictions, exchange controls, inflationary economies, currency risks and risks related to the restrictions on repatriation of earnings or proceeds from liquidated assets of foreign subsidiaries. These risks are exacerbated in countries where we have advanced substantial sums or guaranteed local loans or lines of credit for the purchase of tobacco from suppliers. For example, in 2006 as a result of the political environment, economic instability, foreign currency controls and governmental regulations in Zimbabwe, we deconsolidated our Zimbabwe subsidiary, Mashonaland Tobacco Company LTD ("MTC"). Subsequently, we determined that the significant doubt about our ability to control MTC was eliminated and we have reconsolidated MTC as of March 31, 2016.

Our international operations are in areas where the demand is for the export of lower priced tobacco. We have significant investments in our purchasing, processing and exporting operations in Argentina, Brazil, Malawi, Tanzania and Turkey.

In recent years, economic problems in certain African countries have received wide publicity related to devaluation and appreciation of the local currency and inflation, including the classification of Malawi's economy as highly inflationary. Devaluation and appreciation can affect our purchase costs of tobacco and our processing costs. In addition, we conduct business with suppliers and customers in countries that have relatively recently had or may be subject to dramatic political regime change. In the event of such dramatic changes in the government of such countries, we may be unable to continue to operate our business, or adequately enforce legal obligations, after the change in a manner consistent with prior practice.

We are subject to the Foreign Corrupt Practices Act (the "FCPA") and we operate in jurisdictions that pose a high risk of potential FCPA violations.

We are subject to the FCPA, which generally prohibits companies and their intermediaries from making improper payments to foreign officials for the purpose of obtaining or keeping business and/or other benefits. We operate in a number of jurisdictions that pose a high risk of potential FCPA violations. Although our corporate policy prohibits foreign bribery and we have adopted procedures to promote compliance, there is no assurance that our policy or procedures will work effectively all of the time or protect us against liability under the FCPA for actions taken by our agents, employees and intermediaries with respect to our business or any businesses that we acquire. Failure to comply with the FCPA, other anti-corruption laws and other laws governing the conduct of business with government entities (including local laws) could lead to criminal and civil penalties and other remedial measures (including further changes or enhancements to our procedures, policies, and controls, the imposition of a compliance monitor at our expense and potential personnel changes and/or disciplinary actions), any of which could have an adverse impact on our business, financial condition, results of operations and liquidity. Any investigation of any potential violations of the FCPA or other anti-corruption laws by U.S. or foreign authorities also could have an adverse impact on our business, financial condition and results of operations.

In 2010, we entered into settlements with the SEC and the U.S. Department of Justice to resolve their investigations regarding potential criminal and civil violations of the FCPA. The settlements resulted in the disgorgement in profits and fines totaling \$19.45 million, which have been paid. Both settlements also required us to retain an independent compliance monitor for a three year term that was completed September 30, 2013.

Risks Relating to Our Tobacco Operations *(continued)*

Our exposure to foreign tax regimes, and changes in U.S. or foreign tax regimes, could adversely impact our business.

We do business in countries that have tax regimes in which the rules are not clear, are not consistently applied and are subject to sudden change. This is especially true with regard to international transfer pricing. Our earnings could be reduced by the uncertain and changing nature of these tax regimes. Certain of our subsidiaries are and may in the future be involved in tax matters in foreign countries. While the outcome of any of these existing matters cannot be predicted with certainty, we are vigorously defending them and do not currently expect that any of them will have a material adverse effect on our business or financial position. However, should one or more of these matters be resolved in a manner adverse to our current expectation, the effect on our results of operations for a particular fiscal reporting period could be material.

We seek to optimize our tax footprint across all operations in U.S. and non-U.S. jurisdictions alike. These benefits are contingent upon existing tax laws and regulations in the U.S. and in the countries in which our international operations are located. Future changes in domestic or international tax laws and regulations could adversely affect our ability to continue to realize these tax benefits. On December 22, 2017, the President signed the Tax Cuts and Jobs Act of 2017 (“Tax Act”) which changed corporate tax rates, the taxation of foreign earnings and the deductibility of expenses, among other things. We estimate that the Tax Act could have a material impact on the recoverability of our deferred tax assets, could result in significant one-time changes in the period in which tax reform is enacted and as further regulations may be enacted, and could result in a material increase or decrease in the company’s effective tax rate. The final impact of the Tax Act may differ from these estimates, possibly materially, due to, among other things, changes in interpretations and assumptions made, additional guidance that may be issued, unexpected negative changes in business and market conditions that could reduce certain tax benefits, and actions taken by us as a result of the Tax Act.

Fluctuations in foreign currency exchange and interest rates could adversely affect our results of operations.

We conduct our business in many countries around the world. Our business is generally conducted in U.S. dollars, as is the business of the leaf tobacco industry as a whole. However, we generally must purchase tobacco in non-U.S. countries using local currency. As a result, local country operating costs, including the purchasing and processing costs for tobaccos, are subject to the effects of exchange fluctuations of the local currency against the U.S. dollar. When the U.S. dollar weakens against foreign currencies, our costs for purchasing and processing tobacco in such currencies increases. We attempt to minimize such currency risks by matching the timing of our working capital borrowing needs against the tobacco purchasing and processing funds requirements in the currency of the country where the tobacco is grown. Fluctuations in the value of foreign currencies can significantly affect our operating results.

In addition, the devaluation of foreign currencies has resulted and may in the future result in reduced purchasing power from customers whose capital resources are denominated in those currencies. We may incur a loss of business as a result of the devaluation of these currencies now or in the future.

Competition could erode our earnings.

The leaf tobacco industry is highly competitive. We are one of two global publicly held competitors in the leaf tobacco industry, each with similar global market shares. Competition is based primarily on the prices charged for products and services as well as the merchant’s ability to meet customer specifications in the buying, processing and financing of tobacco. In addition, there is competition in all countries to buy the available tobacco. The loss or substantial reduction of any large or significant customer could reduce our earnings.

In addition to the two primary global independent publicly held leaf tobacco merchants, the cigarette manufacturers increasingly buy tobacco directly from suppliers. We also face increasing competition from new local and regional independent leaf merchants with low fixed costs and overhead and good customer connections at the local level, particularly Brazil and parts of Africa, where the new entrants have been able to capitalize in the global transition to those markets. Any of these sources of new competition may result in less tobacco available for us to purchase and process in the applicable markets.

Risks Related to Our Recent Investments in New Business Lines

Our recent investments as part of our expanded business strategy have been in companies with limited histories that are operating in newly developing markets and are subject to numerous risks and uncertainties.

Our minority investment in December 2017 in the Criticality joint venture and our indirect Canadian subsidiary’s investments to acquire majority interests in Goldleaf Pharm Inc. (“Goldleaf”) and Canada’s Island Garden Inc. (“CIG”) in January 2018, and the operation of these businesses, involve a high degree of risk. These investments are in businesses with limited operating histories-Criticality commenced operations in June 2017, CIG commenced operations in August 2013, and Goldleaf proposes to commence operations upon receipt of requisite licenses and approvals. We cannot assure you that as

Risks Related to Our Recent Investments in New Business Lines *(continued)*

Our recent investments as part of our expanded business strategy have been in companies with limited histories that are operating in newly developing markets and are subject to numerous risks and uncertainties. *(continued)*

these operations further develop they will be profitable or otherwise sustainable. While these businesses involve the cultivation and/or processing of agricultural products similar in certain ways to leaf tobacco, and accordingly share commonality with our agronomy, traceability and agricultural product processing expertise, they are subject to commercial and regulatory challenges different from our existing businesses and with respect to which we do not have the same level of experience. In addition, these businesses are subject to numerous additional risks and uncertainties, including the following:

- *Developing regulatory framework.* In Canada, the cultivation and sale of cannabis (also known as marijuana) has been legal for medical use since 2001, subject to certain restrictions and compliance with applicable regulations. CIG currently cultivates and sells cannabis in Canada for this limited purpose pursuant to licenses and permits issued by applicable regulatory authorities, and Goldleaf proposes to do the same upon receipt of requisite licenses and permits. The Canadian federal government has announced an intention to enact legislation to legalize and regulate the cultivation, sale and use of cannabis for recreational use and a bill to that effect was passed by the federal House of Commons in November 2017. That bill has not yet been passed by the federal Senate. The bill provides that each Canadian province will have the power to determine the method of distribution and sale, taxation and other matters pertaining to cannabis. While certain provinces, including Ontario and British Columbia, have taken actions in anticipation of enactment of the federal bill, additional required provincial regulations have yet to be adopted. In the event that federal and applicable provincial legislation and regulation are not enacted or adopted or are materially delayed, the growth opportunities of Goldleaf and CIG will be curtailed from levels anticipated in expectation of such legalization of cannabis for recreational use. In addition, in the event that such legislation and regulations are enacted and adopted, it is uncertain whether Goldleaf and CIG will be able to obtain all licenses, permits and other regulatory approvals required to allow them to cultivate and supply cannabis in Canada for recreational use.

The Criticality joint venture was formed to procure industrial hemp under the North Carolina Industrial Hemp Commission's Pilot Program (the "Pilot Program") and to extract cannabidiol (known as "CBD"), a non-psychoactive oil, for sale to consumers. In general, while hemp is classified as a controlled substance under U.S. federal law, pursuant to the Agricultural Act of 2014 (the "Farm Bill") to the extent that industrial hemp is cultivated and processed as part of a state-supervised agricultural pilot program, it is exempt from regulation as a controlled substance. Local, state and federal laws and regulations applicable to the cultivation and processing of industrial hemp are broad in scope and subject to evolving interpretations, which could require Criticality to incur substantial costs associated with compliance or alter its business plan. In addition, violations of these laws (including provisions applicable to participation in the Pilot Program), or allegations of such violations, could disrupt its business and result in a material adverse effect on its operations. Moreover, the provisions of the Farm Bill that provide for the exemption of industrial hemp as a controlled substance expire in 2019. If such provisions are not renewed or otherwise extended, Criticality may no longer be permitted to pursue its business after the expiration of these provisions.

It is possible that regulations may be enacted in the future that will be directly applicable to these businesses with respect to the nature of the products produced by these businesses. We cannot predict the nature of any such future laws, regulations, interpretations or applications, nor can we determine what effect additional governmental regulations or administrative policies and procedures, when and if promulgated, could have on these businesses.

- *Necessity of rigorous compliance measures.* The failure of one of these businesses to comply with regulatory requirements, including the implementation and effectiveness of rigorous controls over inventory, could result in fines, penalties, and the loss of necessary licenses and permits which could have a material adverse effect of the continued viability of such business and our investment in such business.
- *Success may attract better funded competitors.* Even if the businesses in which we have invested are initially successful, such success, or the general maturing of the industry, may attract additional competition from larger competitors with greater capital resources which could adversely affect these businesses and our investment in these businesses.
- *Illicit competition.* To the extent that an illicit market continues with respect to the products produced by these businesses, the costs incurred by these businesses to comply with regulatory requirements, as well as applicable excise and sales taxes, may make it difficult to compete with the illicit market or may dampen growth opportunities.

Risks Related to Our Recent Investments in New Business Lines *(continued)*

Violations of applicable law by Goldleaf or CIG, including an unlawful transfer of cannabis inventory to jurisdictions, including the United States, in which the sale of such product is unlawful or within Canada other than for permitted use, may subject our company to potential criminal sanctions.

Although we believe the investments in Goldleaf and CIG are not prohibited under United States federal and state laws so long as Goldleaf and CIG's operations remain in compliance with applicable Canadian and U.S. laws, under current U.S. law, it is unlawful to operate a business from the U.S. that engages in the possession, manufacture, distribution, and/or sale of a controlled substance, including cannabis, in a foreign country where such activities are illegal. Although we anticipate that operational decisions of Goldleaf and CIG will be made by personnel not located in the United States and funding of Goldleaf and CIG, to the extent any additional funding is required, would be made by subsidiaries not located in the United States, there is a risk that if Goldleaf or CIG were to violate Canadian federal, provincial or local law with respect to the manufacture, distribution, and/or sale of cannabis, including an unlawful transfer of cannabis inventory to jurisdictions, including the United States, in which the sale of such product is unlawful or within Canada other than for permitted use, that may subject our company to potential criminal sanctions and civil forfeitures in the United States.

Further, under current U.S. law, it is unlawful to import controlled substances, including cannabis, into the United States, or to transport controlled substances through U.S. territorial waters, on U.S. flagged vessels and U.S. registered aircraft, or accompanied by U.S. citizens or resident aliens. Although we anticipate that Goldleaf and CIG will take precautions to ensure that their operations remain in compliance with all U.S. laws that might apply to the foreign exportation or transport of cannabis, there is a risk that if Goldleaf or CIG were to violate U.S. federal or state law with respect to the manufacture, distribution, sale and/or transport of cannabis, even outside the United States, that may subject our company to potential criminal sanctions and civil forfeitures in the United States.

In addition, United States federal and state laws applicable to the investment in these Canadian subsidiaries is subject to evolving interpretations. Although we do not believe that such activities of Goldleaf and CIG effected in compliance with applicable laws in Canada would result in a violation of United States federal or state laws by Alliance One International, Inc. or our United States-based subsidiaries, we cannot assure you that United States federal or state law enforcement agencies may not adopt different interpretations of applicable law or that our view of prevailing applicable law will be upheld if so challenged.

We may be unable to transmit any funds generated by Goldleaf and CIG to any United States entity and such funds may not be used to fund the payment of obligations of our U.S. based operations, including Alliance One.

An indirect Canadian subsidiary, itself owned by a foreign-based subsidiary of AOI, made its investment in Goldleaf and CIG with funds generated by operations of our foreign subsidiaries. We do not currently intend to repatriate any funds generated by Goldleaf or CIG into the United States and certain United States federal laws may restrict us from doing so. Accordingly, funds generated by these subsidiaries, or by the potential future sale of either or both of these subsidiaries, may not be available to fund the payment of obligations of our U.S. based operations, including AOI.

We may be adversely affected by customer, investor, lender, and regulatory reactions to our investments in Goldleaf and CIG.

It is uncertain whether the activities of Goldleaf and CIG may adversely influence decisions of United States federal or state regulatory authorities with respect to Alliance One International, Inc. and its domestic subsidiaries, even if such Canadian subsidiaries are engaged in cannabis production and supply in compliance with the laws and authorization of the jurisdiction where the activity takes place. In addition, it is uncertain whether our tobacco customers, lenders and investors may react adversely to our investment in these businesses, although we do not presently believe that to be the case. Any such material adverse reaction may materially adversely affect our business, ability to renew or obtain additional necessary financing and/or the trading price of our common stock and publicly traded debt securities.

Our expansion into the sale and supply of e-liquid products to consumers subjects us to a number of risks.

The expansion of our business to include the sale by subsidiaries of e-liquid products to consumers, directly through the internet and through distributors and other channels, subjects us to additional risks and uncertainties. For example, such subsidiary may be held liable if any of its products is found to be the cause of, or a contributing factor in the cause of, personal injury of any type. Although we insure against such potential risks, such insurance may not fully cover potential liabilities and the cost of maintaining insurance is subject to change. Additionally, as more products are brought to market, we may need to increase such insurance coverage, which may adversely affect the profitability of this business. Similar potential product liability risks apply with respect to sale of other products to consumers, including by CIG and Goldleaf.

Risks Relating to Other Aspects of Our Operations

Low investment performance by our defined benefit pension plan assets may increase our pension expense, and may require us to fund a larger portion of our pension obligations, thus, diverting funds from other potential uses.

We sponsor defined benefit pension plans that cover certain eligible employees. Our pension expense and required contributions to our pension plans are directly affected by the value of plan assets, the projected rate of return on plan assets, the actual rate of return on plan assets, and the actuarial assumptions we use to measure the defined benefit pension plan obligations.

If plan assets perform below the assumed rate of return used to determine pension expense, future pension expense will increase. Further, as a result of the global economic instability or other economic market events, our pension plan investment portfolio may experience significant volatility.

The proportion of pension assets to liabilities, which is called the funded status, determines the level of contribution to the plan that is required by law. In recent years, we have funded the plan in amounts as required, but changes in the plan's funded status related to the value of assets or liabilities could increase the amount required to be funded. We cannot predict whether changing market or economic conditions, regulatory changes or other factors will further increase our pension funding obligations, diverting funds that would otherwise be available for other uses.

We rely on internal and externally hosted information technology systems and disruption, failure or security breaches of these systems could adversely affect our business.

We rely on information technology (IT) systems, including systems hosted by service providers. The enterprise resource planning system (SAP) we have implemented throughout the Company, for example, is hosted by Capgemini and our domestic employee payroll system is hosted by Ceridian. Although we have disaster recovery plans and several intrusion preventive mitigating tools and services in place, which are active inline services or are tested routinely, our portfolio of hardware and software products, solutions and services and our enterprise IT systems, including those hosted by service providers, may be vulnerable to damage or disruption caused by circumstances beyond our control, such as catastrophic events, power outages, natural disasters, computer system or network failures, computer viruses or other malicious software programs and cyber-attacks, including system hacking and other cyber-security breaches. The failure or disruption of our IT systems to perform as anticipated for any reason could disrupt our business and result in decreased performance, significant remediation costs, transaction errors, loss of data, processing inefficiencies, downtime, litigation, and the loss of suppliers or customers. A significant disruption or failure could have a material adverse effect on our business operations, financial performance and financial condition.

We have identified material weaknesses related to our internal controls and there can be no assurance that material weaknesses will not be identified in the future.

In the course of downsizing and terminating certain operations of our subsidiary, Alliance One Tobacco (Kenya) Limited ("AOTK"), and preparing our financial statements for the quarter ended September 30, 2015, we identified errors in accounts receivable, inventory, sales and cost of goods sold in AOTK. Specifically, the value of inventory was overstated due to improper accounting for shrinkage, deferred crop costs, lower of cost or market valuations and inventory counts. Further, sales and other operating revenues, and trade and other receivables, net were incorrectly stated due to improper revenue recognition for external sales. As a result of these errors, we restated our consolidated financial statements for the years ended March 31, 2015, 2014 and 2013, and the selected quarterly financial data for each of the quarters in the fiscal years then ended, our condensed consolidated financial statements for the period ended June 30, 2015 and selected consolidated statement of operations data for the fiscal year ended March 31, 2012 and selected consolidated balance sheet data at March 31, 2012 and 2011.

Our Chief Executive Officer and Chief Financial Officer concluded that, as of March 31, 2016, several material weaknesses in internal control over financial reporting existed at AOTK and at the regional and corporate levels.

We remediated those material weaknesses in internal control over financial reporting, and we believe that our internal control over financial reporting was effective at March 31, 2018 as reported elsewhere in this Annual Report. Although we intend to continue to aggressively monitor and improve our internal controls, we cannot assure you that other material weaknesses will not occur in the future. Any failure to implement required new or improved controls, or difficulties encountered in their implementation, could cause us to fail to meet our reporting obligations or result in misstatements in our financial statements in amounts that could be material. Ineffective internal controls could cause investors to lose confidence in our reported financial information, which could have a negative effect on the value of our common stock and could also require additional restatements of our prior reported financial information.

Risks Relating to Our Capital Structure

We may not continue to have access to the capital markets to obtain long-term and short-term financing on acceptable terms and conditions.

We access the short-term capital markets and, from time to time, the long-term markets to obtain financing. Our access to, and the availability of acceptable terms and conditions of, such financing are impacted by many factors, including: (i) our credit ratings; (ii) the liquidity and volatility of the overall capital markets; and (iii) the current state of the economy, including the tobacco industry. There can be no assurances that we will continue to have access to the capital markets on terms acceptable to us.

We may not have access to available capital to finance our local operations in non-U.S. jurisdictions.

We have typically financed our non-U.S. local operations with uncommitted short-term operating credit lines at the local level. These operating lines are typically seasonal in nature, normally extending for a term of 180 to 270 days corresponding to the tobacco crop cycle in that location. These facilities are typically uncommitted in that the lenders have the right to cease making loans or demand payment of outstanding loans at any time. In addition, each of these operating lines must be renewed with each tobacco crop season in that jurisdiction. Although our foreign subsidiaries are the borrowers under these lines, many of them are guaranteed by us.

As of March 31, 2018, we had approximately \$427.3 million drawn and outstanding on short-term seasonal lines with maximum capacity totaling \$740.0 million subject to limitations under our asset-based revolving credit facility (the “ABL Facility”). Additionally against these lines there was \$12.3 million available in unused letter of credit capacity with \$4.8 million issued but unfunded.

Because the lenders under these operating lines typically have the right to cancel the loan at any time and each line must be renewed with each crop season, there can be no assurance that this capital will be available to our subsidiaries. If a number of these lenders cease lending to our subsidiaries or dramatically decrease such lending, it could have a material adverse effect on our liquidity.

Failure of foreign banks in which our subsidiaries deposit funds or the failure to transfer funds or honor withdrawals may affect our results of operations.

Funds held by our foreign subsidiaries are often deposited in their local banks. Banks in certain foreign jurisdictions may be subject to a higher rate of failure or may not honor withdrawals of deposited funds. In addition, the countries in which these local banks operate may lack sufficient regulatory oversight or suffer from structural weaknesses in the local banking system. Due to uncertainties and risks relating to the political stability of certain foreign governments, these local banks also may be subject to exchange controls and therefore unable to perform transfers of certain currencies. If our ability to gain access to these funds was impaired, it could have a material adverse effect on our results of operations.

We may not be able to satisfy the covenants included in our financing arrangements, which could result in the default of our outstanding debt obligations.

The agreement governing the ABL Facility includes certain restrictive covenants and a springing covenant requiring that our fixed charge coverage ratio be no less than 1.00 to 1.00 during any period commencing at any time that the excess borrowing availability under the ABL Facility is less than a specified amount and ending on the first date after excess borrowing availability has been equal to or greater than such specified amount for a period of 30 consecutive days. The agreements governing our other indebtedness and the indentures governing our 8.500% senior secured first lien notes due 2021 (the “senior secured first lien notes”) and our 9.875% senior secured second lien notes due 2021 (the “senior secured second lien notes,” and, together with the senior secured first lien notes, the “senior notes”) also include restrictive covenants. Prior to the establishment of the ABL Facility, we sought and obtained waivers and amendments under our existing financing arrangements to avoid future non-compliance with financial covenants and cure past defaults under restrictive covenants. We also paid significant fees to obtain these waivers and consents. You should consider this in evaluating our ability to comply with financial and restrictive covenants in our debt instruments and the financial costs of our ability to do so. Any future defaults for which we do not obtain waivers or amendments could result in the acceleration of a substantial portion of our indebtedness, much of which is cross-defaulted to other indebtedness.

We have substantial debt which may adversely affect us by limiting future sources of financing, interfering with our ability to pay interest and principal on the senior notes and subjecting us to additional risks.

We have a significant amount of indebtedness and debt service obligations. As of March 31, 2018, we had approximately \$1,347.6 million of indebtedness. If we incur additional indebtedness to our current indebtedness levels, including borrowings under the ABL Facility or other short or long-term credit facilities, the related risks that we now face could increase.

Risks Relating to Our Capital Structure *(continued)*

We have substantial debt which may adversely affect us by limiting future sources of financing, interfering with our ability to pay interest and principal on the senior notes and subjecting us to additional risks. *(continued)*

Our substantial debt could have important consequences, including:

- making it more difficult for us to satisfy our obligations with respect to the senior notes and our other obligations;
- limiting our ability to obtain additional financing on satisfactory terms and to otherwise fund working capital, capital expenditures, debt refinancing, acquisitions and other general corporate requirements;
- a significant portion of our cash flow from operations must be dedicated to paying interest on and the repayment of the principal of our indebtedness. This reduces the amount of cash we have available for making principal and interest payments under the senior notes and for other purposes and makes us more vulnerable to a decrease in demand for leaf tobacco, increases in our operating costs or general economic or industry conditions;
- our ability to adjust to changing market conditions and to compete with other global leaf tobacco merchants may be hampered by the amount of debt we owe;
- increasing our vulnerability to general adverse economic and industry conditions;
- placing us at a competitive disadvantage compared to our competitors that have less debt or are less leveraged;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate; and
- restricting us from making strategic acquisitions or exploiting business opportunities.

In addition, the agreement governing the ABL Facility and the indentures governing the senior notes each contain financial and other restrictive covenants that limit our ability to engage in activities that may be in our long-term best interests. Our failure to comply with certain covenants within the ABL Facility could result in an event of default which, if not cured or waived, could result in the acceleration of all of our debt. Also, a substantial portion of our debt, including any borrowings under the ABL Facility, bears interest at variable rates. If market interest rates increase, variable-rate debt will create higher debt service requirements, which would adversely affect our cash flow. While we may enter into agreements limiting our exposure to higher debt service requirements, any such agreements may not offer complete protection from this risk.

Despite current indebtedness levels, we may still be able to incur substantially more debt. This could exacerbate further the risks associated with our significant leverage.

We may be able to incur substantial additional indebtedness in the future under the terms of the indentures governing the senior notes and the agreement governing the ABL Facility. The ABL Facility provides for a revolving credit line of up to \$60.0 million subject to a borrowing base of eligible inventory and accounts receivable, and under certain conditions, we may solicit the lenders under the ABL Facility or other prospective lenders to provide additional revolving loan commitments under the ABL Facility in an aggregate amount not to exceed \$15.0 million (less the aggregate principal amount of any additional notes issued under the indenture governing the senior secured first lien notes). As of March 31, 2018, we had no outstanding borrowings under the ABL Facility and \$60.0 million, subject to limitations under the ABL Facility, was available for borrowing under the ABL Facility and an additional \$307.9 million was available for borrowing under other short and long-term credit facilities, including \$7.5 million with respect to issued but unfunded letters of credit. If new debt is added to our current debt levels, the risks discussed above could intensify.

Our debt agreements will contain restrictions that limit our flexibility in operating our business.

The agreement governing the ABL Facility and the indentures governing the senior notes contain a number of significant covenants. These covenants limit our ability to, among other things:

- incur additional indebtedness or issue disqualified stock or preferred stock;
- make investments;
- pay dividends and make other restricted payments;
- sell certain assets;
- create liens;
- enter into sale and leaseback transactions;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our assets;

Risks Relating to Our Capital Structure *(continued)*

Our debt agreements will contain restrictions that limit our flexibility in operating our business. *(continued)*

- enter into transactions with our affiliates; and
- designate our subsidiaries as unrestricted subsidiaries.

In addition, the ABL Facility requires us to periodically satisfy a fixed charge coverage ratio during any period commencing at any time that excess borrowing availability is less than a specified amount and ending on the first date after excess borrowing availability has been equal to or greater than such specified amount for a period of 30 consecutive days. Complying with these covenants and tests may cause us to take actions that we otherwise would not take or not take actions that we otherwise would take. The failure to comply with these covenants and tests would cause a default under the ABL Facility and under the indentures governing the senior notes and would prevent us from taking certain actions, such as incurring additional debt, paying dividends or redeeming the senior secured first lien notes, the senior secured second lien notes or any subordinated debt. A default, if not waived, could result in the debt under the ABL Facility and the indentures governing the senior notes becoming immediately due and payable and could result in a default or acceleration of our other indebtedness with cross-default provisions. If this occurs, we may not be able to pay our debt or borrow sufficient funds to refinance it. Even if new financing is available, it may not be on terms that are acceptable to us.

We will require a significant amount of cash to service our indebtedness. Our ability to generate cash depends on many factors beyond our control.

Our ability to make payments on and to refinance our indebtedness, including the senior notes, and to fund planned capital expenditures will depend on our ability to generate cash in the future. This is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. We cannot assure you that our business will generate sufficient cash flow from operations or that future borrowings will be available to us under the ABL Facility or otherwise in an amount sufficient to enable us to pay our indebtedness, including the senior notes, or to fund our other liquidity needs.

We may not be able to refinance or renew our indebtedness, including the senior notes and the ABL Facility, or be able to borrow under the ABL Facility or other future credit facilities, which may have a material adverse effect on our financial condition.

Loans under the ABL Facility will mature on January 14, 2021. We may not be able to renew or refinance the ABL Facility or other indebtedness, including the senior secured notes, on substantially similar terms, or at all. We may have to pay additional fees and expenses that we might not have to pay under normal circumstances, and we may have to agree to terms that could increase the cost of our debt structure. If we are unable to renew or refinance the ABL Facility, the senior notes or our other indebtedness on terms which are not materially less favorable than the terms currently available to us or obtain alternative or additional financing arrangements, we may not be able to repay the ABL Facility, the senior notes or certain of our other indebtedness, which may result in a default under other indebtedness.

We may need to refinance all or a portion of our indebtedness, including the ABL Facility, the senior secured first lien notes and the senior secured second lien notes, on or before maturity. Additionally, to the extent permitted under the agreement governing the ABL Facility and indentures governing the senior secured first lien notes and the senior secured second lien notes, we may repurchase, repay or tender for our bank debt, senior secured first lien notes and the senior secured second lien notes or other debt, which may place pressure on future cash requirements to the extent that the debt repurchased, repaid or tendered cannot be redrawn.

Risks Related to Global Financial and Credit Markets

Volatility and disruption of global financial and credit markets may negatively impact our ability to access financing and expose us to unexpected risks.

Global financial and credit markets expose us to a variety of risks as we fund our business with a combination of cash from operations, short-term seasonal credit lines, the ABL Facility, long-term debt securities and customer advances. We have financed our non-U.S. operations with uncommitted unsecured short-term seasonal lines of credit at the local level. These local operating lines typically extend for a term of up to one year and are typically uncommitted in that the lenders have the right to cease making loans and demand repayment of loans at any time. As of March 31, 2018, we had approximately \$427.3 million drawn and outstanding on short-term foreign seasonal lines and a maximum borrowing capacity under these lines and the ABL Facility totaling \$800.0 million subject to limitations under the ABL Facility. Changes in the global financial and credit markets could create uncertainty as to whether local seasonal lines will continue to be available to finance our non-U.S. operations to the extent or on terms similar to what has been available in the past and whether repayment of existing loans under these lines will be demanded prior to maturity. To the extent that local seasonal lines cease

Risks Related to Global Financial and Credit Markets *(continued)*

Volatility and disruption of global financial and credit markets may negatively impact our ability to access financing and expose us to unexpected risks. *(continued)*

to be available at levels necessary to finance our non-U.S. operations or we are required to repay loans under the lines prior to maturity, we may be required to seek alternative financing sources beyond our existing committed sources of funding. Based on the current financial and credit markets, we cannot assure you that such alternative funding will be available to us on terms and conditions acceptable to us, or at all. In the event that we may be required to support our non-U.S. operations by borrowing U.S. dollars under the ABL Facility, we may be exposed to additional currency exchange risk that we may be unable to successfully hedge. Further, there is additional risk that certain banks that are lenders under seasonal lines could be unable to meet contractually obligated borrowing requests in the future if their financial condition were to deteriorate. In addition, we maintain deposit accounts with numerous financial institutions around the world in amounts that exceed applicable governmental deposit insurance levels. While we actively monitor our deposit relationships, we are subject to risk of loss in the event of the unanticipated failure of a financial institution in which we maintain deposits, which loss could be material to our results of operations and financial condition.

Derivative transactions may expose us to potential losses and counterparty risk.

We may, from time to time, enter into certain derivative transactions, including interest rate swaps and foreign exchange contracts. Changes in the fair value of these derivative financial instruments that are not accounted for as cash flow hedges are reported as income, and accordingly could materially affect our reported income in any period. In addition, the counterparties to these derivative transactions may be financial institutions or affiliates of financial institutions, and we would be subject to risks that these counterparties default under these transactions. In some of these transactions, our exposure to counterparty credit risk may not be secured by any collateral. Global economic conditions over the last few years have resulted in the actual or perceived failure or financial difficulties of many financial institutions, including bankruptcy. If one or more of the counterparties to one or more of our derivative transactions not secured by any collateral becomes subject to insolvency proceedings, we would become an unsecured creditor in those proceedings with a claim equal to our exposure at the time under those transactions. We can provide no assurances as to the financial stability or viability of any of our counterparties.

Risks Relating to the Tobacco Industry

Reductions in demand for consumer tobacco products could adversely affect our results of operations.

The tobacco industry, both in the United States and abroad, continues to face a number of issues that may reduce the consumption of cigarettes and adversely affect our business, sales volume, results of operations, cash flows and financial condition.

These issues, some of which are more fully discussed below, include:

- governmental actions seeking to ascribe to tobacco product manufacturers liability for adverse health effects associated with smoking and exposure to environmental tobacco smoke;
- smoking and health litigation against tobacco product manufacturers;
- increased consumer acceptance of electronic cigarettes;
- tax increases on consumer tobacco products;
- current and potential actions by state attorneys general to enforce the terms of the Master Settlement Agreement, or MSA, between state governments in the United States and tobacco product manufacturers;
- governmental and private bans and restrictions on smoking;
- actual and proposed price controls and restrictions on imports in certain jurisdictions outside the United States;
- restrictions on tobacco product manufacturing, marketing, advertising and sales;
- the diminishing social acceptance of smoking;
- increased pressure from anti-smoking groups;
- other tobacco product legislation that may be considered by Congress, the states, municipalities and other countries; and
- the impact of consolidation among multinational cigarette manufacturers.

Tobacco product manufacturer litigation may reduce demand for our products and services.

Our primary customers, the leading cigarette manufacturers, have faced thousands of lawsuits brought throughout the United States and, to a lesser extent, the rest of the world. These lawsuits have been brought by different types of plaintiffs,

Risks Relating to the Tobacco Industry *(continued)*

Tobacco product manufacturer litigation may reduce demand for our products and services. *(continued)*

including: (1) individuals and classes of individuals alleging personal injury and/or misleading advertising; (2) governments (including governmental and quasi-governmental entities in the United States and abroad) seeking recovery of health care costs allegedly caused by cigarette smoking; and (3) other groups seeking recovery of health care expenditures allegedly caused by cigarette smoking, including third-party health care payors, such as unions and health maintenance organizations. Damages claimed in some of the smoking and health cases have ranged into the billions of dollars. There have been many jury verdicts for plaintiffs in tobacco product litigation over the past several years. Additional plaintiffs continue to file lawsuits. The effects of the previous and current lawsuits on our customers could reduce their demand for tobacco from us.

Legislation and regulatory and other governmental initiatives could impose burdensome restrictions on the tobacco industry and reduce consumption of consumer tobacco products and demand for our services.

The Family Smoking Prevention and Tobacco Control Act, which amended the Food, Drug, and Cosmetic Act, extends the authority of the Food and Drug Administration (“FDA”) to regulate tobacco products. This act authorizes the FDA to adopt product standards for tobacco products, including the level of nicotine yield and the reduction or elimination of other constituents of the products, along with provisions for the testing of products against these standards. The act imposes further restrictions on advertising of tobacco products, authorizes the FDA to limit the sales of tobacco products to face-to-face transactions permitting the verification of the age of the purchaser, authorizes a study to determine whether the minimum age for the purchase of tobacco products should be increased and requires submission of reports from manufacturers of tobacco products to the FDA regarding product ingredients and other matters, including reports on health, toxicological, behavioral, or physiologic effects of tobacco products and their constituents. The act also mandates warning labels and requires packaging to indicate the percentage of domestically grown tobacco and foreign grown tobacco included in the product. The FDA has adopted regulations under the act establishing requirements for the sale, distribution and marketing of cigarettes, as well as package warnings and advertising limitations.

In addition, the act directs the FDA to promulgate regulations requiring that the methods used in, and the facilities and controls used for, the manufacture, preproduction design validation, packing, and storage of a tobacco product conform to current good manufacturing practice. Regulations under the act do not apply to tobacco leaf that is not in the possession of a manufacturer of tobacco products, or to the producers of tobacco leaf, including tobacco suppliers, tobacco warehouses, and tobacco supplier cooperatives unless those entities are controlled by a tobacco product manufacturer, but do apply to our U.S. cut rag processing facility with respect to covered tobacco products.

In May 2016, the FDA finalized regulations, which became effective in August 2016, that extend its regulatory authority under the act to tobacco products not previously covered by its regulations, including vaporizers, vape pens, hookah pens, electronic cigarettes (or, e-cigarettes), e-pipes, and other types of electronic nicotine delivery systems, including e-liquids used in these devices, as well as pipe tobacco and cigars (including little cigars and cigarillos), and future novel tobacco products. These regulations require manufacturers of these additional tobacco products to, among other things submit an application and obtain FDA authorization to market a new tobacco product; register establishment(s) and submit product listing to FDA; submit listing of ingredients; submit information on harmful and potentially harmful constituents; submit tobacco health documents; not introduce into interstate commerce modified-risk tobacco products (e.g., products with label, labeling, or advertising representing that they reduce risk or are less harmful compared to other tobacco products on the market) without an FDA order; and include the required warning statement on packaging and advertisements. These regulations will extend to certain of our operations that had not previously been subject to the act, including the processing of pipe tobacco and tobacco for little cigars and cigarillos at our U.S. cut rag processing facility, and to joint ventures and subsidiaries that develop, produce and sell consumable e-liquids. In addition, the May 2016 regulations make these additional tobacco products subject to certain existing restrictions on the sale of cigarettes, including restrictions prohibiting sale to individuals under 18 years of age. In addition, in finalizing the May 2016 regulations, the FDA announced that it intends in the future to issue a proposed product standard that would, if finalized, eliminate characterizing flavors in all cigars, including cigarillos and little cigars.

The full impact of the act, including the May 2016 regulations and any future regulatory action to implement the act, is uncertain. However, if the effect of the act and FDA regulations under the act is a significant reduction in consumption of tobacco products, it could materially adversely affect our business, volume, results of operations, cash flows and financial condition.

Reports with respect to the harmful physical effects of cigarette smoking have been publicized for many years, and the sale, promotion and use of cigarettes continue to be subject to increasing governmental regulation. Since 1964, the Surgeon General of the United States and the Secretary of Health and Human Services have released a number of reports linking cigarette smoking with a broad range of health hazards, including various types of cancer, coronary heart disease and chronic lung disease, and recommending various governmental measures to reduce the incidence of smoking. More recent reports focus upon the addictive nature of cigarettes, the effects of smoking cessation, the decrease in smoking in the United States,

Risks Relating to the Tobacco Industry *(continued)*

Legislation and regulatory and other governmental initiatives could impose burdensome restrictions on the tobacco industry and reduce consumption of consumer tobacco products and demand for our services. *(continued)*

the economic and regulatory aspects of smoking in the Western Hemisphere, and cigarette smoking by adolescents, particularly the addictive nature of cigarette smoking in adolescence. Numerous state and municipal governments have taken and others may take actions to diminish the social acceptance of smoking of tobacco products, including banning smoking in certain public and private locations.

A number of foreign nations also have taken steps to restrict or prohibit cigarette advertising and promotion, to increase taxes on cigarettes and to discourage cigarette smoking. In some cases, such restrictions are more onerous than those in the United States. For example, advertising and promotion of cigarettes has been banned or severely restricted for a number of years in Australia, Canada, Finland, France, Italy, Singapore and other countries. Further, in February 2005, the World Health Organization (“WHO”) treaty, the Framework Convention for Tobacco Control (“FCTC”), entered into force. This treaty, which is binding on 181 nations as of March 31, 2018, requires signatory nations to enact legislation that would require, among other things, specific actions to prevent youth smoking; restrict or prohibit tobacco product marketing; inform the public about the health consequences of smoking and the benefits of quitting; regulate the content of tobacco products; impose new package warning requirements including the use of pictorial or graphic images; eliminate cigarette smuggling and counterfeit cigarettes; restrict smoking in public places; increase and harmonize cigarette excise taxes; abolish duty-free tobacco sales; and permit and encourage litigation against tobacco product manufacturers.

Due to the present regulatory and legislative environment, a substantial risk exists that past growth trends in tobacco product sales may not continue and that existing sales may decline. A significant decrease in worldwide tobacco consumption brought about by existing or future governmental laws and regulations would reduce demand for tobacco products and services and could have a material adverse effect on our results of operations.

Government actions can have a significant effect on the sourcing of tobacco. If some of the current efforts are successful, we could have difficulty obtaining sufficient tobacco to meet our customers’ requirements, which could have an adverse effect on our performance and results of operations.

The WHO, through the FCTC, created a formal study group to identify and assess crop diversification initiatives and alternatives to leaf tobacco growing in countries whose economies depend upon tobacco production. The study group began its work in February 2007. In its initial report published later that year, the study group indicated that the FCTC did not aim to phase out tobacco growing, but the study group’s focus on alternatives to tobacco crops was in preparation for its anticipated eventual decrease in demand resulting from the FCTC’s other tobacco control initiatives.

If the objective of the FCTC study group were to change to seek to eliminate or significantly reduce leaf tobacco production and certain countries were to partner with the study group in pursuing this objective, we could encounter difficulty in sourcing leaf tobacco to fill customer requirements, which could have an adverse effect on our results of operations.

In addition, continued government and public emphasis on environmental issues, including climate change, conservation, and natural resource management, could result in new or more stringent forms of regulatory oversight of industry activities, which may lead to increased levels of expenditures for environmental controls, land use restrictions affecting us or our suppliers, and other conditions that could have a material adverse effect on our business, financial condition, and results of operations. For example, certain aspects of our business generate carbon emissions. Regulatory restrictions on greenhouse gas emissions have been proposed in certain countries in which we operate. These may include limitations on such emissions, taxes or emission allowance fees on such emissions, various restrictions on industrial operations, and other measures that could affect land-use decisions, the cost of agricultural production, and the cost and means of processing and transporting our products. These actions could adversely affect our business, financial condition, and results of operations.

We have been, and continue to be, subject to governmental investigations into, and litigation concerning, leaf tobacco industry buying and other payment practices.

The leaf tobacco industry, from time to time, has been the subject of government investigations regarding trade practices. For example, we were the subject of an investigation by the Antitrust Division of the United States Department of Justice into certain buying practices alleged to have occurred in the industry, we were named defendants in an antitrust class action litigation alleging a conspiracy to rig bids in the tobacco auction markets, and we were the subject of an administrative investigation into certain tobacco buying and selling practices alleged to have occurred within the leaf tobacco industry in some countries within the European Union, including Spain, Italy, Greece and potentially other countries.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Following is a description of Alliance One's material properties as of March 31, 2018.

Corporate

Our corporate headquarters are located in Morrisville, North Carolina and are leased under an agreement that expires in May 2021.

Facilities

We own a total of 13 production facilities in 9 countries. We operate each of our tobacco processing plants for seven to nine months during the year to correspond with the applicable harvesting season. While we believe our production facilities have been efficiently utilized, we continually compare our production capacity and organization with the transitions occurring in global sourcing of tobacco and other specialty products. We also believe our domestic production facilities and certain foreign production facilities have the capacity to process additional volumes of tobacco and other specialty products if required by customer demand.

The following is a listing of the various material properties used in operations all of which are owned by Alliance One:

ITEM 3. LEGAL PROCEEDINGS

Mindo, S.r.l. ("Mindo"), the purchaser in 2004 of the Company's Italian subsidiary Dimon Italia, S.r.l., asserted claims against a subsidiary of the Company arising out of that sale transaction in an action filed before the Court of Rome on April 12, 2007. The claim involved a guaranty letter issued by a consolidated subsidiary of the Company in connection with the sale transaction, and sought the recovery of €7.4 million plus interest and costs. On November 11, 2013, the court issued its judgment in favor of the Company's subsidiary, rejecting the claims asserted by Mindo. On December 23, 2014, Mindo appealed the judgment of the Court of Rome to the Court of Appeal of Rome. Subsequent to March 31, 2018, the parties agreed to and consummated a settlement of Mindo's claims, which settlement included the payment by the Company's subsidiary of an immaterial amount.

The Company received a subpoena from the SEC, dated November 28, 2016, for documents relating to the restatement of its financial statements for the years ended March 31, 2013, 2014 and 2015 and the three months ended June 30, 2015, which restatements were filed with the SEC on May 25, 2016. The Company is cooperating fully with the SEC and providing the requested materials.

ITEM 3. LEGAL PROCEEDINGS *(continued)*

In addition to the above-mentioned matters, certain of the Company's subsidiaries are involved in other litigation or legal matters incidental to their business activities, including tax matters. While the outcome of these matters cannot be predicted with certainty, the Company is vigorously defending them and does not currently expect that any of them will have a material adverse effect on its business or financial position. However, should one or more of these matters be resolved in a manner adverse to its current expectation, the effect on the Company's results of operations for a particular fiscal reporting period could be material.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Alliance One's common stock is traded on the New York Stock Exchange, under the ticker symbol "AOI."

The following table sets forth, for the periods indicated, the high and low reported sales prices of our common stock as reported by the NYSE and the amount of dividends declared per share for the periods indicated.

	<u>High</u>	<u>Low</u>	<u>Dividends Declared</u>
<u>Year Ended March 31, 2018</u>			
Fourth Quarter	\$30.70	\$12.00	\$—
Third Quarter	14.60	9.85	—
Second Quarter	17.00	10.35	—
First Quarter	14.20	9.95	—
<u>Year Ended March 31, 2017</u>			
Fourth Quarter	\$19.50	\$12.30	\$—
Third Quarter	19.81	13.75	—
Second Quarter	22.69	15.35	—
First Quarter	27.23	14.40	—

As of March 31, 2018, there were 5,355 shareholders, including 4,764 non-objecting beneficial holders of our common stock.

The payment of dividends by Alliance One is subject to the discretion of our board of directors and will depend on business conditions, compliance with debt agreements, achievement of anticipated cost savings, financial condition and earnings, regulatory considerations and other factors. The agreement governing the ABL Facility and the indentures governing our senior secured first lien notes and our senior secured second lien notes restrict our ability to pay dividends. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources –Dividends."

Balance Sheet Data

Working capital	\$ 711,546	\$ 797,326	\$ 815,532	\$ 641,275	\$ 803,038
Total assets ⁽⁶⁾	1,966,631	1,971,872	1,968,198	1,622,460	1,744,460
Long-term debt ⁽⁶⁾	920,143	942,959	910,214	727,197	886,475
Stockholders' equity attributable to Alliance One International, Inc.	271,866	203,518	271,126	190,790	243,830

Other Data

Ratio of earnings to fixed charges	—	—	1.75	—	—
Coverage deficiency	13,304	35,335	n/a	8,939	60,852
Common shares outstanding at year end ⁽⁴⁾	9,023	8,963	8,900	8,858	8,816
Number of stockholders at year end ⁽⁵⁾	5,355	4,187	4,465	4,995	5,346

- (1) As of March 31, 2016, the Company determined that the significant doubt about our ability to control MTC was eliminated and recorded a gain of \$106,203 upon reconsolidation.
- (2) For the year ended March 31, 2014, the Company refinanced its credit facility and long-term debt which resulted in recognition of significant costs to retire existing debt and accelerated recognition of related deferred financing costs and original issue discounts.
- (3) For the years ended March 31, 2017, 2015 and 2014, all outstanding restricted shares and shares applicable to stock options and restricted stock units are excluded because their inclusion would have an antidilutive effect on the loss per share. For the years ended March 31, 2015 and 2014, assumed conversion of then-outstanding convertible notes at the beginning of the period has an antidilutive effect on the loss per share.
- (4) Excluding 785 shares owned by a wholly owned subsidiary.
- (5) Includes the number of stockholders of record and non-objecting beneficial owners.
- (6) On April 1, 2016, new accounting guidance that changed the presentation of debt issuance costs in financial statements was adopted on a retrospective basis. Therefore the March 31, 2016, 2015, and 2014 balances have been adjusted in accordance with the adoption of this guidance.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussions should be read in conjunction with the other sections of this report, including the consolidated financial statements and related notes contained in Item 8 of this Form 10-K:

Executive Overview

The following executive overview is intended to provide significant highlights of the discussion and analysis that follows.

Financial Results

Our strong financial performance in fiscal 2018 highlights our proactive efforts to meet the needs of our leaf business. The significant year-over-year growth in fiscal year 2018 show a positive trend and were largely in-line with our expectations, with improvement in net sales by 7.7%, gross profit by 13.5%, and operating income by 30.7% that are all indicative of the strength of our customer relationships and our continued focus on our leaf business. Overall volumes only increased by 0.5% with the larger South America crop size and the timing of shipments from Asia largely offset by the limited carryover of shipments from fiscal 2017 and the short weather-related crops in Africa, primarily in Malawi. SG&A increases were primarily the result of higher professional fees associated with our business development initiatives and the non-recurrence of a reversal of reserves for customer receivables in the prior year that were substantially offset by sales of intrastate trade tax credits in South America included in Other Income.

Liquidity

Our liquidity requirements are affected by various factors including crop seasonality, foreign currency and interest rates, green tobacco prices, customer mix, crop size and quality. During fiscal 2018, we utilized surplus cash to reduce long-term debt with the purchase and cancellation of \$28.6 million of our Senior Secured Second Lien Notes and an additional \$10.9 million of these same notes in April 2018, leaving \$652.1 million outstanding after the purchases in April. We remain confident in our targets to purchase \$25.0-\$50.0 million per year of our more expensive debt with surplus cash. Our year-end cash position was \$264.7 million with \$427.3 million in notes payable to banks. Our liquidity position is in line with internal expectations at \$565.1 million as of March 31, 2018, comprised of cash and \$300.4 million of available credit lines, excluding letters of credit. We will continue to monitor and adjust funding sources as needed to enhance and drive various business opportunities that maintain flexibility and meet cost expectations.

Outlook

Fiscal 2018 was a year of significant transformation at Alliance One. We made great progress in implementing our new 'One Tomorrow' transformation initiative designed to meet the critical business challenges of today while positioning the Company for continued long-term profitable growth. We are pursuing a larger purpose-driven brand vision with the goal of transforming people's lives so that together we can grow a better world. As an agricultural company, the grower is at the heart of everything we do. Our contracted grower base often produces a significant volume of non-tobacco crops as a result of the inputs and agronomic expertise that our team provides. We have helped them feed their families and their livestock, and we are actively working to find markets for these crops as part of our continuing efforts to improve grower livelihoods and develop new markets for value-added agricultural products. When combined with our strong track and trace capabilities, our agricultural core business is central to our value proposition with customers and suppliers.

We are focused on growth far beyond improving our leaf market share, as indicated by the investments made in e-liquids, industrial hemp and legal cannabis. Over the next three to four years, we intend to broaden our business portfolio by focusing on value-added consumer-driven agricultural products. We are actively investing in human capital, and bringing in new skillsets such as branding, marketing and advertising, that will allow us to successfully grow and develop our new business lines. Our goal is to generate a significantly increasing portion of our revenue and profit from new, higher-margin businesses by 2020. We are on a strategic, long-term path designed to improve shareholder value, and we are confident in our ability to deliver best-in-class products and services to our customers.

Comparison of the Year Ended March 31, 2018 to the Year Ended March 31, 2017

Summary

Total sales and other operating revenues increased \$131.3 million to \$1,846.0 million primarily attributable to a 7.5% increase in average sales price due to product mix mainly in South America and North America and the impact of higher green costs in Malawi due to the smaller weather-related crop. Current year sales included a higher ratio of lamina to byproducts than in the prior year. Volumes increased slightly by 0.5% from the South America crop size returning to normal levels, the timing of shipments from Asia and the limited carryover of shipments from North America into fiscal 2019 that were substantially offset by short weather-related crops in Africa this year, mainly in Malawi. Tobacco costs per kilo increased 7.2% from product mix, higher green costs from the short crop in Malawi and the related impact on conversion costs and the impact of European currency movement, partially offset by lower conversion costs from the current South America crop size normalizing after the smaller weather-related crop size last year. While processing and other revenues remained consistent with the prior year, the larger South America crop size this year was the main driver of processing costs decreasing 11.6% from lower conversion costs. As a result, current year revenues increased by 7.7% with total costs of goods and services sold increasing by 6.8% which improved gross profit by 13.5% to \$246.2 million and gross profit as a percentage of sales from 12.7% in the prior year to 13.3% in the current year. SG&A increases of 10.0% were driven by the non-recurrence of a reversal of reserves for customer receivables in the prior year and higher professional fees and travel costs associated with our business development initiatives. Current year other income is mainly from sales of intrastate trade

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS *(continued)*

Results of Operations *(continued)*

Comparison of the Year Ended March 31, 2018 to the Year Ended March 31, 2017 *(continued)*

Summary (continued)

tax credits in South America and the receipt of South American funds previously held in escrow that are now covered by bond. Other income in the prior year is primarily due to the net insurance recovery for tobacco that had been lost by fire in Zimbabwe. Improved profitability increased operating income by 30.7% to \$110.6 million when compared to the prior year.

During the current year, we purchased \$28.6 million of our existing 9.875% senior secured second lien notes due 2021 at a discount, resulting in debt retirement income of \$3.0 million. During the prior year, we refinanced our existing senior secured revolving credit facility with the issuance of \$275.0 million of 8.5% senior secured first lien notes due 2021 and a \$60.0 million ABL credit agreement. As a result, one-time debt retirement costs of \$2.3 million were recorded for the accelerated amortization of debt issuance costs. In addition, we purchased \$28.4 million of our senior secured second lien notes on the open market. As a result, one-time related discounts of \$3.4 million offset by \$0.7 million for the accelerated amortization of debt issuance costs and original issue discount were recorded. Our interest costs increased slightly from the prior year primarily due to higher average rates offset by lower average balances on our seasonal lines of credit.

Our effective tax rate was 364.3% this year compared to (59.2)% last year. On December 22, 2017, the U.S. Tax Cuts and Jobs Act ("Tax Act") was signed by President Trump. The Tax Act significantly revised the U.S. corporate income tax regime by, among other things, lowering the U.S. corporate tax rate from 35% to 21%, effective January 1, 2018, implementing a territorial tax system and imposing a repatriation tax on deemed repatriated earnings of foreign subsidiaries. As a result of the Tax Act, a provisional net tax benefit of \$78.3 million due to a remeasurement of deferred tax assets and liabilities, release of the valuation allowance, and a transition tax on deemed repatriation of deferred foreign income. Additionally, we are required to evaluate, on a recurring basis, if whether enough positive evidence exists to determine whether it is more likely than not that the deferred tax asset will be available to offset or reduce future taxes. As such, we reassessed the need for a valuation allowance against our U.S. deferred tax assets due to the Tax Act and concluded that a full valuation allowance on the U.S. deferred tax assets is not necessary. The reversal of the U.S. federal valuation allowance was due to anticipated refunds of AMT credits and anticipated future limitation of our interest expense deductions in the U.S. which we believe will allow us to be able to realize the deferred tax asset within the period that our net operating losses may be carried forward. In reaching this conclusion, we reviewed countervailing evidence, including our recent history of U.S. losses, but determined the positive evidence outweighed the negative evidence. However, we believe that our foreign tax credits and state net operating losses will expire unutilized and have maintained a valuation allowance against those deferred tax assets. The tax benefit, including the release of the valuation allowance, and the tax charge represent provisional amounts and are our current best estimates. The provisional amounts incorporate assumptions made based upon our current interpretation of the Tax Act and may change as we receive additional regulatory guidance. Any additional impacts from the enactment of the Tax Act will be recorded as they are identified during the measurement period as provided for in Staff Accounting Bulletin 118. Other factors impacting the variance in the effective tax rate include, but are not limited to, differences in forecasted income for the respective years, differences in year-to-date income for the periods, certain losses for which no tax benefit is recorded, and differences between items recognized for the periods that include changes in valuation allowances, net exchanges losses on income tax accounts, and net exchange gains related to liabilities for unrecognized tax benefits.

Restructuring and asset impairment charges	—	(0.5)	(100.0)	0.5
Operating income	\$ 22.4	\$ 7.1	46.4	\$ 15.3

Total sales and other operating revenues increased 13.9% driven by a 4.9% increase in volumes and a 10.1% increase in average sales prices. The increase in average sales prices and the 9.7% increase in average tobacco costs per kilo are mainly from product mix. The current year sales included a higher ratio of lamina to byproducts than in the prior year. Volume increases are attributable to timing of shipments from limited carryover of shipments into fiscal 2019 compared to shipments from fiscal 2017 carried over into fiscal 2018. Primarily due to product mix, gross margin increased 18.3% to \$48.4 million this year and gross margin as a percentage of sales improved from 10.3% to 10.7%. SG&A was consistent with the prior year. Improved gross margin this year was the primary factor behind increasing operating income by 46.4% to \$22.4 million compared to the prior year.

Restructuring and asset impairment charges	0.4	(0.5)	(55.6)	0.9
Operating income	\$ 88.2	\$18.9	27.3	\$ 69.3

Total sales and other operating revenues increases of 5.8% to \$1,394.6 million are attributable to a 6.4 % increase in average sales prices per kilo primarily driven by product mix in South America and the impact of higher green costs in Malawi due to the short crop this year. Volumes decreased slightly by (0.4%) as a result of short weather-related crops in Africa this year, mainly in Malawi, that were substantially offset by the South America crop size returning to normal levels and the timing of shipments from Asia. Average tobacco costs per kilo increased 5.9% from product mix, higher green costs from the short crop in Malawi and the related impact on conversion costs and the impact of European currency movement partially offset by lower conversion costs from the current South America crop size normalizing after the smaller weather-related crop size last year. The larger South America crop size this year was the primary driver of processing and other revenues increasing by 2.5%, with processing costs decreasing by 18.4% from lower conversion costs. As a result, gross margin improved by 12.3% to \$197.8 million and gross margin as a percentage of sales increased from 13.4% to 14.2%. SG&A increased 12.3% driven by higher professional fees related to our business development initiatives and the non-recurrence of a reversal of reserves for customer receivables in the prior year. Other income increases of \$10.4 million were attributable to sales of intrastate trade tax credits in South America and the receipt of South American funds previously held in escrow that are now covered by bond. Improved profitability drove operating income increases of 27.3% to \$88.2 million when compared to the prior year.

Comparison of the Year Ended March 31, 2017 to the Year Ended March 31, 2016

Summary

Total sales and other operating revenues decreased by 10.0% to \$1,714.7 million and total costs of goods and services sold decreased 10.8% to \$1,497.7 million primarily due to lower average sales prices and tobacco costs per kilo attributable to smaller crops in the U.S., Brazil and Tanzania related to weather conditions, lower prices paid to tobacco suppliers across most regions and changes in product mix with an increased percentage of byproduct sales versus lamina. The positive impact of currency movements primarily in Europe on average tobacco costs per kilo were partially offset by \$4.8 million of lower of cost or market adjustments. Volumes were down slightly as volume increases from expanded cut rag services in the Africa Region, sales of prior crop in most regions and the timing of shipments in Africa were offset by the weather-related smaller crop sizes and the timing of shipments in other regions. Processing and other revenues and processing costs increases were primarily related to the reconsolidation of our Zimbabwe subsidiary. As a result of lower average sales price and costs per kilo, gross profit decreased 3.9% to \$217.0 million while gross profit as a percentage of sales increased from 11.9% to

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

Results of Operations (continued)

Comparison of the Year Ended March 31, 2017 to the Year Ended March 31, 2016 (continued)

Summary (continued)

12.7%. SG&A increased 10.1% primarily from increased legal and professional fees, incentive compensation costs and the inclusion of costs from our reconstituted Zimbabwe subsidiary beginning in fiscal 2017 partially offset by the non-recurrence of reserves for customer receivables in the prior year. Increases in SG&A were partially offset by the net insurance recovery related to tobacco lost by fire in Zimbabwe in the prior year, the non-recurrence of one-time expenses in Africa and the sale of trade tax credits in South America. During the prior year, we determined that the significant doubt about our ability to control MTC was eliminated and we reconstituted it as of March 31, 2016. As a result, we recorded a gain of \$106.2 million in other operating income. Restructuring and asset impairment charges in fiscal 2017 are mainly related to our former U.S. cut rag facility. Restructuring and asset impairment charges in the prior year were primarily attributable to impairment of advances to tobacco suppliers and real property in Africa. During third quarter of fiscal 2017, we refinanced our existing senior secured revolving credit facility with the issuance of \$275.0 million of 8.5% senior secured first lien notes due 2021 and a \$60.0 million ABL credit agreement. As a result, one-time debt retirement costs of \$2.3 million were recorded for the accelerated amortization of debt issuance costs. During the fourth quarter of fiscal 2017, we purchased \$28.4 million of our senior secured second lien notes on the open market. As a result, one-time related discounts of \$3.4 million offset by \$0.7 million for the accelerated amortization of debt issuance costs and original issue discount were recorded. Our interest costs increased from the prior year primarily due to higher average borrowings and higher average rates on our seasonal lines of credit as well as increased amortization of debt issuance costs and the inclusion of interest costs from our reconstituted Zimbabwe subsidiary in fiscal 2017. Our effective tax rate was (59.2)% in fiscal 2017 compared to 35.1% in the prior year. The variance in the effective tax rate year to year is the result of many factors that include but are not limited to differences in forecasted income for the respective years; differences in year-to-date income for the quarters; certain losses for which no tax benefit is recorded; and, differences between discrete items recognized for the periods that include changes in valuation allowances, net exchanges losses on income tax accounts and net exchange gains related to liabilities for unrecognized tax benefit.

Operating income	\$ 15.3	\$ (9.9)	(39.3)	\$ 25.2

Total sales and other operating revenues decreased 15.4% to \$396.2 million and total costs of goods and services sold decreased 14.8% to \$355.3 million due to a 9.4% decrease in average sales prices per kilo and a 9.5% decrease in average tobacco costs per kilo primarily attributable to the impact of adverse weather conditions during the U.S. growing season that resulted in a smaller crop in fiscal 2017. Also decreasing average sales prices and costs per kilo was product mix with an increased percentage of byproduct sales versus lamina. Volume decreases resulted from the negative impact of smaller U.S.

North America Region *(continued)*

crops and the timing of shipments. The smaller U.S. crops also negatively impacted customer requirements for processing and other services which decreased processing and other revenues and costs of services when compared with the prior year. As a result, gross profit decreased 19.8% to \$40.9 million in fiscal 2017 and gross profit as a percentage of sales decreased slightly from 10.9% to 10.3%. Decreases in SG&A were related to allocations for general corporate services. Restructuring and asset impairment charges during fiscal 2017 were from our former U.S. cut rag facility. Primarily due to the decrease in gross profit, operating income declined \$9.9 million from the prior year.

Total cost of goods and services sold	1,142.4	(119.3)	(9.5)	1,261.7
Gross profit	176.2	1.4	0.8	174.8
Selling, general and administrative expenses	111.0	13.4	13.7	97.6
Other income	5.0	(100.3)	(95.3)	105.3
Restructuring and asset impairment charges	0.9	(5.0)	(84.7)	5.9
Operating income	\$ 69.3	\$(107.3)	(60.8)	\$ 176.6

Total sales and other operating revenues decreased 8.2% to \$1,318.6 million and total costs of goods and services sold decreased 9.5% to \$1,142.4 million. Volumes increased 1.1% primarily due to expansion of our cut rag services in the Africa Region, the timing of shipments and sales of prior crop in fiscal 2017 in most regions that were partially offset by the short crops in Brazil and Tanzania. Although volumes increased, the product mix of sales in fiscal 2017 changed with an increased percentage of byproduct sales versus lamina. The change in product mix and lower prices paid to tobacco suppliers in Africa and South America lowered average sales prices by 10.6% and average tobacco costs per kilo by 11.8%. The positive impact of currency movements primarily in Europe on average tobacco costs per kilo were partially offset by \$4.2 million of lower of cost or market adjustments, and higher conversion costs per kilo in Tanzania due to the smaller crop size. Processing and other revenues and processing costs increases were related to the reconsolidation of our Zimbabwe subsidiary. As a result, gross profit increased slightly by 0.8% to \$176.2 million and gross profit as a percentage of sales increased from 12.2% to 13.4%. Increases in SG&A are associated with increased Kenya-related legal and professional fees, incentive compensation costs, additional audit related fees and the inclusion of costs from our reconsolidated Zimbabwe subsidiary partially offset by the non-recurrence of reserves for customer receivables in the prior year. Increases in SG&A were partially offset by the net insurance recovery related to tobacco lost by fire in Zimbabwe in the prior year, the non-recurrence of one-time expenses in Africa and the sale of trade tax credits in South America as well as reduced restructuring and asset impairment charges from the prior year related to impairment of advances to tobacco suppliers and real property in Africa. During the prior year, we determined that the significant doubt about our ability to control MTC was eliminated and we reconsolidated it as of March 31, 2016. As a result, we recorded a gain of \$106.2 million in other operating income in fiscal 2016. Primarily the result of the gain on reconsolidation of MTC in the prior year and increased SG&A, operating income declined 60.8% to \$69.3 million in fiscal 2017.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

Liquidity and Capital Resources

Overview

Historically we have needed capital in excess of cash flow from operations to finance accounts receivable, inventory and advances to suppliers for tobacco crops in certain foreign countries. Purchasing, processing and selling activities of our business are seasonal and our need for capital fluctuates with corresponding peaks where outstanding indebtedness may be greater or less as a result. Our long-term borrowings consist of senior secured first lien notes, senior secured second lien notes and an ABL facility. We also have a combination of short-term and long-term seasonal lines of credit available with a number of banks throughout the world that finances seasonal working capital and corresponds to regional peak requirements.

At March 31, 2018, we had \$264.7 million in cash on our balance sheet, \$60.0 million available under the ABL facility (subject to limitations on borrowing if, after consideration of the application of the net proceeds of the borrowing, unrestricted cash and cash equivalents would exceed \$180.0 million), \$427.3 million outstanding under short-term foreign lines with an additional \$300.4 million available under those lines and \$0.9 million outstanding of other debt for a total of \$565.1 million of debt availability (without regard to the ABL Facility limitation noted above) and cash on hand around the world, excluding \$4.8 million in issued but unfunded letters of credit with \$7.5 million available. Included in sources of liquidity as of March 31, 2018 was \$193.7 million funded under our accounts receivable sale programs. Additionally, customer advances were \$24.1 million at March 31, 2018 compared to \$30.9 million at March 31, 2017. To the extent that these customers do not provide this advance funding, we must provide financing for their inventories. Should customers pre-finance less in the future for committed inventories, this action could impact our short-term liquidity. Effective March 31, 2018, we did not meet the fixed charge coverage ratio of 2.0 to 1.0 required under the indentures governing our senior secured first lien notes and our senior secured second lien notes to permit us to access the restricted payments basket for the purchase of common stock and other actions under that basket. From time to time, we may not satisfy the required ratio and failure to meet this fixed charge coverage ratio does not constitute an event of default. See Note 7 "Short-term Borrowing Arrangements" and Note 17 "Sale of Receivables" to the "Notes to Consolidated Financial Statements" for further information.

Alliance One affirms our belief that the sources of capital we have access to are sufficient to fund our anticipated needs for fiscal year 2019. Our access to capital meets our current expectations and outlook that is anticipated to provide sufficient liquidity to fulfill our future funding requirements. General deterioration of our business, and the cash flow that it generates, or failure to renew foreign lines could impact our ability to meet our future liquidity requirements.

Seasonal liquidity beyond cash flow from operations is provided by our seasonal working capital lines throughout the world, advances from customers and sale of accounts receivable. For the years ended March 31, 2018 and 2017, our average short-term borrowings, aggregated peak short-term borrowings outstanding and weighted-average interest rate on short-term borrowings were as follows:

<i>(dollars in millions)</i>	2018	2017
Average short-term borrowings	\$510.0	\$528.2
Aggregated peak short-term borrowings outstanding	\$658.4	\$688.7
Weighted-average interest rate on short-term borrowings	6.10%	5.89%

Aggregated peak borrowings for fiscal 2018 were during the first quarter of fiscal 2018 compared to during the second quarter for fiscal 2017. The peak borrowings occurred in the first quarter of fiscal 2018 due to the timing of purchases of tobacco and repayments in the South America and Africa regions as compared to fiscal 2017. Peak borrowings for fiscal 2018 and fiscal 2017 were repaid with cash provided by operating activities.

As of March 31, 2018, we are in our working capital build. In South America, we are in the process of purchasing and processing the most recent crop, while the peak tobacco sales season for South America is at its beginning stages. Africa is also in the middle of its buying, processing and selling season and is utilizing working capital funding as well. North America and Europe are still selling and planning for the next crop that is now being grown.

Working Capital

Our working capital decreased to \$711.5 million at March 31, 2018 from \$797.3 million at March 31, 2017. Our current ratio was 2.1 to 1 at March 31, 2018 and March 31, 2017. The decrease in working capital is primarily attributable to lower cash balances due to the timing of collections of receivables partially offset by lower seasonal notes payable and accounts payable due to the timing of purchases and processing of tobacco in South America and Africa and other costs.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS *(continued)*

Liquidity and Capital Resources *(continued)*

Working Capital *(continued)*

The following table is a summary of items from the Consolidated Balance Sheets and Consolidated Statements of Cash Flows. Approximately \$70.3 million of our outstanding cash balance at March 31, 2018 was held in foreign jurisdictions. If these funds in foreign jurisdictions were repatriated, due to the valuation allowance on foreign tax credit carryovers, the cost of repatriation would not have a material financial impact.

<i>(in millions except for current ratio)</i>	As of March 31,						
	2018	Change		2017	Change		2016
		\$	%		\$	%	
Cash and cash equivalents	\$ 264.7	(208.4)	(44.0)	\$ 473.1	273.4	136.9	\$ 199.7
Net trade and other receivables	304.4	50.2	19.7	254.2	(146.8)	(36.6)	401.0
Inventories and advances to tobacco suppliers	728.6	(4.4)	(0.6)	733.0	(100.2)	(12.0)	833.2
Total current assets	1,349.6	(160.5)	(10.6)	1,510.1	19.7	1.3	1,490.4
Notes payable to banks	427.3	(48.6)	(10.2)	475.9	(0.1)	—	476.0 ⁽¹⁾
Accounts payable	76.5	(12.9)	(14.4)	89.4	7.8	9.6	81.6
Advances from customers	24.1	(6.8)	(22.0)	30.9	21.0	212.1	9.9
Total current liabilities	638.1	(74.7)	(10.5)	712.8	38.0	5.6	674.8
Current ratio	2.1 to 1			2.1 to 1			2.2 to 1
Working capital	711.5	(85.8)	(10.8)	797.3	(18.2)	(2.2)	815.5
Total long term debt	920.1	(22.9)	(2.4)	943.0	32.8	3.6	910.2
Stockholders' equity attributable to Alliance One International, Inc.	271.9	68.4	33.6	203.5	(67.6)	(24.9)	271.1
Net cash provided (used) by:							
Operating activities	\$ (43.5)	\$(290.7)	(117.6)	\$ 247.2	\$ 382.5	282.7	\$ (135.3)
Investing activities	(63.7)	(52.2)	(453.9)	(11.5)	2.0	14.8	(13.5)
Financing activities	(103.1)	(141.3)	(369.9)	38.2	(155.4)	(80.3)	193.6

(1) Includes \$130.6 million of debt owed by MTC under a short-term credit facility in which one of our other subsidiaries had a participation interest in the lender's rights and obligations under the facility. At March 31, 2016, \$84.3 million of that amount was attributed to outstanding borrowings by MTC funded under that facility by such other subsidiary pursuant to that participation interest. Because such other subsidiary's funding is pursuant to a participation interest through a third-party lender and not a direct intercompany loan between such other subsidiary and MTC, the total amount of debt under the facility is required to be reflected as consolidated debt upon the reconsolidation of MTC. At March 31, 2018 and 2017, our subsidiary's participation interest no longer remained.

Operating Cash Flows

Net cash used by operating activities increased \$290.7 million compared to net cash provided by operating activities in fiscal 2017 which increased \$382.5 million compared to fiscal 2016. The increase in cash used in fiscal 2018 compared to fiscal 2017 is primarily due to lower collections of accounts receivable in accordance with terms and the timing of shipments in the fourth quarter and less reductions in inventory as crop sizes in South America normalized this year. The increase in cash provided in fiscal 2017 compared to fiscal 2016 is primarily due to increased collections of accounts receivable in accordance with terms and the timing of shipments in the fourth quarter. Cash provided also increased due to lower inventory balances from the timing of shipments in the fourth quarter as well as smaller crop sizes resulting in lower balances of inventory carried over to fiscal 2017.

Investing Cash Flows

Net cash used by investing activities increased \$52.2 million in fiscal 2018 compared to fiscal 2017 which decreased \$2.0 million compared to fiscal 2016. The increase in fiscal 2018 is primarily due to the acquisition of consolidated affiliates and equity method investments. The decrease in cash used in fiscal 2017 is primarily due to lower purchases of property and equipment.

Financing Cash Flows

Net cash used by financing activities increased \$141.3 million compared to net cash provided by financing activities in fiscal 2017 which decreased \$155.4 million compared to fiscal 2016. The increase in cash used in fiscal 2018 is primarily related

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

Liquidity and Capital Resources (continued)

Financing Cash Flows (continued)

to increased net repayments of seasonal financing from the timing of purchases and processing of tobacco as well as the repurchase of \$28.6 million of second lien notes. The decrease in cash provided in fiscal 2017 is primarily due to repayments and cancellation of our former senior revolving credit facility during the year and our repurchase of \$28.4 million of second lien notes partially offset by proceeds from the issuance of \$275.0 million first lien notes.

Certain debt agreements contain certain cross-default or cross-acceleration provisions. The following table summarizes our debt financing as of March 31, 2018:

	Outstanding		March 31, 2018		Long Term Debt Repayment Schedule by Fiscal Year					
	March 31, 2017	March 31, 2018	Lines and Letters Available	Interest Rate	2019	2020	2021	2022	2023	Later

- (1) As of March 31, 2018 the full amount of the ABL Facility was available. Borrowing is permitted under the ABL Facility only to the extent that, after consideration of the application of the proceeds of the borrowing, our unrestricted cash and cash equivalents would not exceed \$180,000. At March 31, 2018, our unrestricted cash and cash equivalents significantly exceeded \$180,000.
- (2) Weighted average rate for the twelve months ended March 31, 2018.
- (3) Repayment of \$268,943 is net of original issue discount of \$1,806 and unamortized debt issuance of \$4,251. Total repayment will be \$275,000.
- (4) Repayment of \$650,495 is net of original issue discount of \$6,802 and unamortized debt issuance of \$5,649. Total repayment will be \$662,946.
- (5) Primarily foreign seasonal lines of credit.

First Lien Notes

On October 14, 2016, the Company issued \$275.0 million in aggregate principal amount of 8.5% senior secured first lien notes due 2021 (the "First Lien Notes"), at an issue price of 99.085% of the face amount thereof. The First Lien Notes, which bear interest at a rate of 8.500% per year, are payable semi-annually in arrears in cash on April 15 and October 15 of each year, beginning April 15, 2017, to holders of record at the close of business on the preceding April 1 and October 1, respectively. The First Lien Notes mature on April 15, 2021. The First Lien Notes are initially guaranteed on a senior secured basis by Alliance One's subsidiary, Alliance One Specialty Products, LLC (the "Initial Guarantor"), and each of its future material domestic subsidiaries are required to guarantee the First Lien Notes on a senior secured basis. The Initial Guarantor is not a material domestic subsidiary, and Alliance One currently has no material domestic subsidiaries. The Initial Guarantor and any future guarantors of the First Lien Notes are referred to as the "guarantors."

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS *(continued)*

Liquidity and Capital Resources *(continued)*

First Lien Notes *(continued)*

Alliance One's and the guarantors' obligations under the First Lien Notes and any guarantee of the First Lien Notes (and certain related obligations) and under the ABL Facility and any guarantee of the ABL Facility (and certain related obligations and obligations in respect of certain hedging arrangements) are secured by first-priority liens on substantially all of Alliance One's and the guarantors' tangible and intangible assets, subject to certain exceptions and permitted liens (the "Collateral"). Alliance One's and the guarantors' obligations under the First Lien Notes and any guarantee of the First Lien Notes (and certain related obligations) have first-priority in the waterfall set forth in a senior lien intercreditor agreement entered into in connection with the issuance of the First Lien Notes and the establishment of the ABL Facility (the "Senior Lien Intercreditor Agreement") in respect of the liens on the Collateral that is not ABL Priority Collateral (as defined below), including owned material real property in the United States, capital stock of subsidiaries owned directly by Alliance One or a guarantor (except that, in the case of foreign subsidiaries, only capital stock of only direct foreign subsidiaries that are material are to be pledged and only 65% of the voting capital stock and 100% of the non-voting capital stock are to be pledged), existing and after acquired intellectual property rights, equipment, related general intangibles and instruments and certain other related assets of the foregoing and proceeds of the foregoing (collectively, the "Notes Priority Collateral"). Alliance One's and the guarantors' obligations under the ABL Facility and any guarantee of the ABL Facility (and certain related obligations and obligations in respect of certain hedging arrangements) have second-priority in the waterfall set forth in the Senior Lien Intercreditor Agreement in respect of the liens on the Notes Priority Collateral. Alliance One's and the guarantors' obligations under the First Lien Notes and any guarantee of the First Lien Notes (and certain related obligations) have second-priority in the waterfall set forth in the Senior Lien Intercreditor Agreement in respect of the liens on the Collateral consisting of accounts receivable, inventories, cash (other than identifiable cash proceeds of the Notes Priority Collateral), deposit accounts, related general intangibles and instruments, certain other related assets of the foregoing and proceeds of the foregoing (collectively, the "ABL Priority Collateral"). Alliance One's and the guarantors' obligations under the ABL Facility and any guarantee of the ABL Facility (and certain related obligations and obligations in respect of certain hedging arrangements) have first-priority in the waterfall set forth in the Senior Lien Intercreditor Agreement in respect of the liens on the ABL Priority Collateral.

If a change of control (as defined in the indenture governing the First Lien Notes) occurs at any time, holders of the First Lien Notes will have the right, at their option, to require the Company to repurchase all or a portion of the First Lien Notes for cash at a price equal to 101% of the principal amount of First Lien Notes being repurchased, plus accrued and unpaid interest, to, but excluding, the date of repurchase. The indenture governing the First Lien Notes restricts (subject to exceptions and qualifications) the Company's ability and the ability of its restricted subsidiaries to, among other things, incur additional indebtedness or issue disqualified stock or preferred stock, pay dividends and make other restricted payments (including restricted investments), sell assets, create liens, consolidate, merge, sell or otherwise dispose of all or substantially all of its assets, enter into transactions with its affiliates, enter into certain sale and leaseback transactions, create certain dividend and payment restrictions on its restricted subsidiaries, and designate its subsidiaries as unrestricted subsidiaries.

ABL Facility

On October 14, 2016, the Company entered into an ABL credit agreement (the "ABL Credit Agreement") with certain bank lenders establishing a senior secured revolving asset-based lending facility (the "ABL Facility") of \$60.0 million subject to a borrowing base composed of its eligible accounts receivable and inventory. The ABL Facility may be used for revolving credit loans, swingline loans and letters of credit from time to time up to an initial maximum principal amount of \$60.0 million, subject to the limitations described below in this paragraph. Under certain conditions, Alliance One may solicit the ABL Facility lenders or other prospective lenders to provide additional revolving loan commitments under the ABL Facility in an aggregate amount not to exceed \$15.0 million (less the aggregate principal amount of any notes exceeding \$275.0 million issued under the First Lien Notes Indenture). The maximum amount available under the revolving credit facility is limited by a borrowing base consisting of eligible accounts receivable and inventory as follows:

- 85% of eligible accounts receivable, plus
- the lesser of (i) 85% of the appraised net-orderly-liquidation value of eligible inventory or (ii) 65% of eligible inventory valued at the lower of cost (based on a first-in first-out basis) and market value thereof (net of intercompany profits).

The borrowing base is subject to a \$25.0 million deduction and customary reserves, which are to be established by the agent for the ABL Facility lenders in its permitted discretion from time to time. At March 31, 2018, no borrowings were outstanding under the ABL Facility and \$60.0 million was available for borrowing. Borrowing is permitted under the ABL Credit Facility only to the extent that, after consideration of the application of the proceeds of the borrowing, the Company's unrestricted cash and cash equivalents would not exceed \$180.0 million. At March 31, 2018, the Company's unrestricted cash and cash equivalents significantly exceeded \$180.0 million.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

Liquidity and Capital Resources (continued)

ABL Facility (continued)

In addition, loans under the ABL Facility shall not be made if after incurrence of such loans there will be more than \$180.0 million of unrestricted cash and cash equivalents in the aggregate on the consolidated balance sheet of the Company and its subsidiaries.

The ABL Facility permits both base rate borrowings and LIBOR borrowings. Borrowings under the ABL Facility bear interest at an annual rate equal to LIBOR plus 250 basis points or 150 basis points above base rate, as applicable, with a fee on unused borrowings initially at an annual rate of 50 basis points until March 31, 2017 and thereafter at annual rates of either 37.5 or 50 basis points based on average quarterly historical utilization under the ABL Facility. The ABL Facility matures on January 14, 2021.

In addition, customary mandatory prepayments of the loans under the ABL Facility are required upon the occurrence of certain events including, without limitation, certain dispositions of assets outside of the ordinary course of business in respect of certain collateral securing the ABL Facility, unrestricted cash and cash equivalents on the Company's consolidated balance sheet exceeding \$180.0 million for a period of seven consecutive business days, and certain casualty and condemnation events.

The Company's obligations under the ABL Facility (and certain related obligations and obligations in respect of certain hedging arrangements) are (a) guaranteed by the Initial Guarantor and are required to be guaranteed by each material domestic subsidiary of Alliance One (currently there are no material domestic subsidiaries of Alliance One) (collectively with the Company, the "Credit Parties") and (b) secured by the Collateral.

The liens and other security interests granted by the Credit Parties on the Collateral for the benefit of the ABL Lenders (and certain related secured parties) are, subject to certain permitted liens, secured by first-priority security interests on a *pari passu* basis with the security interests securing the First Lien Notes, with respective priorities in a waterfall with respect to portions of the Collateral as set forth in the Senior Lien Intercreditor Agreement described above.

Under the terms of the ABL Facility, if (i) an event of default has occurred and is continuing or (ii) excess borrowing availability under the ABL Facility (based on the lesser of the commitments thereunder and the borrowing base) (the "Excess Availability") falls below the greater of (x) \$12,500 and (y) 25% of the lesser of (A) the commitments under the ABL Facility at such time and (B) the borrowing base at such time (such greater amount being the "Cash Dominion Threshold") for more than three consecutive business days, the Credit Parties will become subject to cash dominion, which will require daily prepayment of loans under the ABL Facility with the cash deposited in certain deposit accounts of the Credit Parties, including concentration accounts, and will restrict the Credit Parties' ability to transfer cash from their concentration accounts to their disbursement accounts. Such cash dominion period shall end when (i) if arising as a result of a continuing event of default, such event of default ceases to exist, or (ii) if arising as a result of non-compliance with the Excess Availability threshold, Excess Availability shall be equal to or greater than the Cash Dominion Threshold for a period of 30 consecutive days.

The ABL Credit Agreement governing the ABL Facility contains a springing covenant requiring that the Company's fixed charge coverage ratio be no less than 1.00 to 1.00 during any period commencing when our Excess Availability is less than the greater of (x) \$10,000 and (y) 20% of the lesser of (A) the commitments under the ABL Facility at such time and (B) the borrowing base at such time (such greater amount being the "Financial Covenant Threshold") until such time as our Excess Availability has been equal to or greater than the Financial Covenant Threshold for a period of 30 consecutive days.

The ABL Credit Agreement governing the ABL Facility contains customary representations and warranties, affirmative and negative covenants (subject, in each case, to exceptions and qualifications) and events of defaults, including covenants that limit the Company's ability to, among other things incur certain guarantees, merge, consolidate or dispose of substantially all of its assets, grant liens on assets, pay dividends, redeem stock or make other distributions or restricted payments, create certain dividend and payment restrictions on subsidiaries, repurchase or redeem capital stock or prepay subordinated or certain other material debt (including the First Lien Notes and the Company's senior secured second lien notes due 2021), make certain investments, agree to restrictions on the payment of dividends to Alliance One by its subsidiaries, sell or otherwise dispose of assets, including equity interests of subsidiaries, enter into transactions with affiliates, enter into certain sale and leaseback transactions.

The ABL credit agreement restricts the Company from paying any dividends during the term of this facility subject to the satisfaction of specified financial ratios. In addition, the indentures governing the Company's First Lien Notes and its senior secured second lien notes due 2021 contain similar restrictions and also prohibits the payment of dividends and other

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS *(continued)*

Liquidity and Capital Resources *(continued)*

ABL Facility *(continued)*

distributions if the Company fails to satisfy a ratio of consolidated EBITDA to fixed charges of at least 2.0 to 1.0. At March 31, 2018, the Company did not satisfy this fixed charge coverage ratio. The Company may from time to time not satisfy this ratio.

Senior Secured Second Lien Notes

On August 1, 2013, the Company issued \$735.0 million in aggregate principal amount of its 9.875% senior secured second lien notes due 2021 (the "Second Lien Notes"). The Second Lien Notes were sold at 98% of the face value, for gross proceeds of approximately \$720.3 million. The Second Lien Notes bear interest at a rate of 9.875% per year, payable semi-annually in arrears in cash on January 15 and July 15 of each year, beginning January 15, 2014, to holders of record at the close of business on the preceding January 1 and July 1, respectively. The Second Lien Notes will mature on July 15, 2021. The Second Lien Notes are secured by a second priority lien on specified property of Alliance One International, Inc. for which the senior secured credit facility is secured by a first priority lien. The indenture governing the Second Lien Notes restricts (subject to exceptions and qualifications) the Company's ability and the ability of its restricted subsidiaries to, among other things, incur additional indebtedness or issue disqualified stock or preferred stock, pay dividends and make other restricted payments (including restricted investments), sell assets, create liens, consolidate, merge, sell or otherwise dispose of all or substantially all of its assets, enter into transactions with its affiliates, enter into certain sale and leaseback transactions, create certain dividend and payment restrictions on its restricted subsidiaries, and designate its subsidiaries as unrestricted subsidiaries.

The indenture governing the Second Lien Notes requires the Company's existing and future material domestic subsidiaries to guarantee the Second Lien Notes. The Company has no material domestic subsidiaries, and the Second Lien Notes are not presently guaranteed by any subsidiary. If a change of control (as defined in the indenture governing the Second Lien Notes) occurs at any time, holders of the Second Lien Notes will have the right, at their option, to require the Company to repurchase all or a portion of the Second Lien Notes for cash at a price equal to 101% of the principal amount of Second Lien Notes being repurchased, plus accrued and unpaid interest and special interest, if any, to, but excluding, the date of repurchase.

During the year ended March 31, 2018, the Company purchased \$28.6 million of its senior notes on the open market. All purchased securities were canceled leaving \$662.9 million of the 9.875% senior notes outstanding at March 31, 2018. Associated costs paid were \$0.1 million and related discounts were \$(3.7) million resulting in net cash repayment of \$25.6 million and recorded in Repayment of Long-Term Borrowings in the Consolidated Statements of Cash Flows. Deferred financing costs and amortization of original issue discount of \$0.7 million were accelerated. In April 2018, the Company purchased \$10.9 million of the Second Lien Notes notes on the open market. See Note 20 "Subsequent Events" to the Notes to Consolidated Financial Statements.

Foreign Seasonal Lines of Credit

The Company has typically financed its non-U.S. operations with uncommitted unsecured short-term seasonal lines of credit at the local level. These operating lines are seasonal in nature, normally extending for a term of 180 to 270 days corresponding to the tobacco crop cycle in that location. These facilities are typically uncommitted in that the lenders have the right to cease making loans and certain lenders can demand repayment of loans at any time. These loans are typically renewed at the outset of each tobacco season. As of March 31, 2018, the Company had approximately \$427.3 million drawn and outstanding on foreign seasonal lines with maximum capacity totaling \$740.0 million subject to limitations as provided for in the Credit Agreement. Additionally, against these lines there was \$12.3 million available in unused letter of credit capacity with \$4.8 million issued but unfunded.

Other Long-Term Obligations**	46.1	7.2	8.8	8.6	21.5
Operating Lease Obligations	43.6	18.1	19.1	4.0	2.4
Tobacco and Other Purchase Obligations	568.4	568.4	—	—	—
Beneficial Interest in Receivables Sold	48.7	48.7	—	—	—
Amounts Guaranteed for Tobacco Suppliers	150.9	150.9	—	—	—
Total Contractual Obligations and Other Commercial Commitments . . .	\$2,108.5	\$888.4	\$218.9	\$977.1	\$24.1

* Long-Term Debt Obligations include projected interest for both fixed and variable rate debt. We assume that there will be no additional drawings after March 31, 2018 on the ABL Facility until the maturity of January 14, 2021, in these calculations. The variable rate used in the projections is the rate that was being charged on our variable rate debt as of March 31, 2018. These calculations also assume that there is no refinancing of debt during any period. These calculations are on Long-Term Debt Obligations only.

** Other long-term obligations consist of accrued pension and postretirement costs. Contributions for funded pension plans are based on the Pension Protection Act and tax deductibility and are not reasonably estimable beyond one year. Contributions for unfunded pension plans and postretirement plans captioned under "After 2023" include obligations during the next five years only. These obligations are not reasonably estimable beyond ten years. In addition, the following long-term liabilities included on the consolidated balance sheet are excluded from the table above: accrued postemployment costs, income taxes and tax contingencies, and other accruals. We are unable to estimate the timing of payments for these items.

We do not have any other off-balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, results of operations, liquidity, capital expenditures or capital resources, as defined under the rules of SEC Release No. FRR-67, *Disclosure in Management's Discussion and Analysis about Off-Balance Sheet Arrangements and Aggregate Contractual Obligations*.

Lease Obligations

We have operating leases for land, buildings, automobiles and other equipment. In accordance with accounting principles generally accepted in the United States, operating leases are not reflected in the accompanying Consolidated Balance Sheet. Operating assets that are of long-term and continuing benefit are generally purchased.

Tobacco and Other Purchase Obligations

Tobacco purchase obligations result from contracts with suppliers, primarily in the United States, Brazil, Malawi and Turkey, to buy either specified quantities of tobacco or the supplier's total tobacco production. Amounts shown as tobacco purchase obligations are estimates based on projected purchase prices of the future crop tobacco. Payment of these obligations is net of our advances to these suppliers. Our tobacco purchase obligations do not exceed our projected requirements over the related terms and are in the normal course of business. Other purchase obligations consist primarily of purchase commitments of agricultural material.

Beneficial Interest in Receivables Sold

We sell accounts receivable under two revolving trade accounts receivable securitization programs. Under the agreements, we receive either 80% or 90% of the face value of the receivable sold, less contractual dilutions which limit the amount that may be outstanding from any one particular customer and insurance reserves that also have the effect of limiting the risk attributable to any one customer. Our beneficial interest is subordinate to the purchaser of the receivables. See Note 17 "Sale of Receivables" to the "Notes to Consolidated Financial Statements" for further information.

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS *(continued)*

Liquidity and Capital Resources *(continued)*

Aggregate Contractual Obligations and Off-Balance Sheet Arrangements *(continued)*

Amounts Guaranteed for Tobacco Suppliers

In South America and Africa, we provide guarantees to ensure financing is available to our tobacco suppliers. In the event these suppliers should default, we would be responsible for repayment of the funds provided to these suppliers. We also provide guarantees for financing by certain unconsolidated subsidiaries in Asia and Brazil. See Note 1 “Significant Accounting Policies – Advances to Tobacco Suppliers” to the “Notes to Consolidated Financial Statements” for further information.

Planned Capital Expenditures

We have projected a total of \$31.3 million in capital investments for our 2019 fiscal year. We forecast our capital expenditure needs for routine replacement of equipment as well as investment in assets that will add value to the customer or increase efficiency.

Tax and Repatriation Matters

We are subject to income tax laws in each of the countries in which we do business through wholly owned subsidiaries and through affiliates. We make a comprehensive review of the income tax requirements of each of our operations, file appropriate returns and make appropriate income tax planning analyses directed toward the minimization of our income tax obligations in these countries. Appropriate income tax provisions are determined on an individual subsidiary level and at the corporate level on both an interim and annual basis. These processes are followed using an appropriate combination of internal staff at both the subsidiary and corporate levels as well as independent outside advisors in review of the various tax laws and in compliance reporting for the various operations.

We regularly review the status of the accumulated unremitted earnings of each of our foreign subsidiaries. We would provide deferred income taxes, net of any foreign tax credits, if applicable, on any earnings that are determined to no longer be indefinitely invested. See Note 12 “Income Taxes” to the “Notes to Consolidated Financial Statements” for further information.

Critical Accounting Estimates

The preparation of financial statements in accordance with generally accepted accounting principles in the United States (“GAAP”) requires the use of estimates and assumptions that have an impact on the assets, liabilities, revenue, and expense amounts reported. These estimates can also affect supplemental disclosures including information about contingencies, risk and financial condition.

Critical accounting estimates are defined as those that are reflective of significant judgments and uncertainties and potentially yield materially different results under different assumptions or conditions. Given current facts and circumstances, we believe that our estimates and assumptions are reasonable, adhere to GAAP, and are consistently applied. Our selection and disclosure of our critical accounting policies and estimates has been reviewed with the Audit Committee of our Board of Directors. Following is a review of the more significant assumptions and estimates and the accounting policies and methods used in the preparation of our consolidated financial statements. For all of these estimates, we caution that future events rarely develop exactly as forecast, and the best estimates routinely require adjustment. See Note 1 “Significant Accounting Policies” to the “Notes to Consolidated Financial Statements” which discusses the significant accounting policies that we have adopted.

Inventories

Costs included in inventory include processed tobacco inventory, unprocessed tobacco inventory, and other inventory costs. Inventories are valued at the lower of cost and net realizable value (“LCM”), which requires us to make significant estimates in assessing our inventory balances for potential LCM adjustments. We evaluate our inventories for LCM adjustments by country and type of inventory. Therefore, processed tobacco and unprocessed tobacco are evaluated separately for LCM purposes. We compare the cost of our processed tobacco to market values based on recent sales of similar grades when evaluating those balances for LCM adjustments. We consider whether our processed tobacco is committed to a customer, whereby the expected sales price would be utilized in determining the market value for committed tobacco. We review data on market conditions in performing our LCM evaluation for our unprocessed tobacco. See Note 1 “Significant Accounting Policies—Inventories” and Note 2 “Inventories” to the “Notes to Consolidated Financial Statements” for further information.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (continued)

Liquidity and Capital Resources (continued)

Income Taxes

Our annual effective income tax rate is based on our jurisdictional mix of pretax income, statutory tax rates, exchange rates, and tax planning opportunities available to us in the various jurisdictions in which we operate. Tax laws are complex, subject to change, and subject to different interpretations by the taxpayer and respective governmental taxing authorities. Significant judgment is required in determining our tax expense and in evaluating our tax positions including evaluating uncertainties under ASC 740. We review our tax positions quarterly and adjust the balances as new information becomes available.

Deferred income tax assets represent amounts available to reduce income taxes payable on taxable income in future years. Such assets arise because of temporary differences between the financial reporting and tax bases of assets and liabilities, as well as from net operating loss and tax credit carryforwards. We evaluate the recoverability of these future tax deductions by assessing the impact from changes in or issuance of new tax law, the adequacy of future expected taxable income from all sources, including reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies. These sources of income inherently rely on estimates. To provide insight, we use our historical experience and our short and long-range business forecasts. As a result of the enactment of the Tax Act, we believe it is more likely than not that the majority of our deferred income tax assets in connections with our U.S. operations will be fully recoverable within the applicable statutory expiration periods. We continue to maintain a valuation allowance on certain U.S. federal, state and foreign deferred income tax assets, including U.S. foreign tax credit carryforwards which may only be utilized against future taxes otherwise due on certain foreign sources of taxable income, which we believe are not more likely than not to be realized. As a result, the Company has recorded a valuation allowance against this portion of its deferred tax assets. However, deferred tax assets could be reduced in the near term if our estimates of taxable income are significantly reduced. As a result, we believe it is more likely than not that these foreign tax credits will expire unutilized due to an insufficient amount of estimable future income from the appropriate source and therefore, we continue to maintain a valuation allowance against them.

Advances to Tobacco Suppliers

We purchase seeds, fertilizer, pesticides, and other products related to growing tobacco and advance them to suppliers to assist in crop production. These advances are short term, represent prepaid inventory, and are recorded as advances to tobacco suppliers. Upon delivery of tobacco, part of the purchase price to the supplier is paid in cash and part through a reduction of the advance balance. The advances applied to the delivery are reclassified out of advances and into unprocessed inventory.

We also have noncurrent advances, which generally represent the cost of advances to suppliers for infrastructure, such as curing barns, that are also recovered through the delivery of tobacco to us by the suppliers. Not all suppliers are able to settle the entire amount of advances that are due in any given year. In these situations, we may allow the suppliers to deliver tobacco over future crop years to recover its advances. Noncurrent advances to tobacco suppliers are recorded in Other Noncurrent Assets in the Consolidated Balance Sheets.

We account for our advances to tobacco suppliers using a cost accumulation model, which results in reporting our advances to tobacco suppliers at the lower of cost or recoverable amounts exclusive of the mark-up and interest. The mark-up and interest on our advances to tobacco suppliers are recognized upon delivery of tobacco as a decrease in our cost of the current crop.

The following table illustrates the amounts of favorable and unfavorable variances on current crop advances to tobacco suppliers (prepaid inventory) that will be capitalized into inventory when the crop has been purchased as of March 31, 2018, 2017 and 2016. The current crop is primarily sold in the next fiscal year when the net favorable / (unfavorable) variance is recognized through cost of sales. See Note 1 "Significant Accounting Policies –Advances to Tobacco Suppliers" for further information on the various components noted below. Variances on advances serve to state the tobacco inventory at cost by accumulating actual total cash expended and allocating it to the tobacco received during the crop cycle.

(in millions)	Years Ended March 31,		
	2018	2017	2016
Favorable variances (including mark-up)	\$15.5	\$16.9	\$14.2
Unfavorable variances (including unrecoverable advances)	(8.2)	(9.1)	(8.5)
Net favorable variance in crop cost in inventory	\$ 7.3	\$ 7.8	\$ 5.7

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS *(continued)*

Advances to Tobacco Suppliers *(continued)*

Other Regions

The price and resulting mark-up of the inputs we advance to tobacco suppliers is determined at the beginning of each season and depends on various market considerations. The interest rate charged on advances to tobacco suppliers depends on market conditions as well. We purchase and advance the inputs based on an expected crop production. These advances to tobacco suppliers are in the currency of the local market. We base our estimate of the unrecoverable advances to tobacco suppliers on numerous factors including, but not limited to, our expectations of the quantity and quality of tobacco our suppliers will deliver to us.

Within the Other Regions, Brazil and Africa are the primary areas where we advance some inputs to suppliers for the coming crop based on expected crop production. Advances to tobacco suppliers in most other areas are primarily cash advances to third party commercial suppliers.

For fiscal 2018, favorable and unfavorable variances were comparable with the prior year but were partially offset by the devaluation of the U.S. dollar against South American currencies. For fiscal 2017, favorable variances increased primarily due to more normalized crop sizes but were partially offset by the devaluation of the U.S. dollar against South American and African currencies. Unfavorable variances are comparable with the prior year due to increases from larger crop sizes offset by currency impact and improved recoverability in certain locations.

We believe the favorable variances relating to the fiscal 2018, 2017, and 2016 crops are representative of average favorable variance percentages based on market conditions and currency rates in each year. The Company did not incur any other changes in net variances within the Other Regions operating segments for fiscal 2018, 2017, and 2016 that were absorbed into inventory.

North America Region

In Guatemala, we advance some inputs to suppliers for the coming crop based on expected crop production. For 2018, 2017, and 2016, advances in North America have a minor impact to the consolidated favorable and unfavorable variances.

Asset Impairment

Long-lived assets, including recoverable intrastate trade tax credits, are reviewed for impairment whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. Additionally, goodwill is reviewed for impairment on an annual basis. Determining whether an impairment has occurred typically requires various estimates and assumptions, including determining which undiscounted cash flows are directly related to the potentially impaired asset, the useful life over which cash flows will occur, their amount, and the asset's residual value, if any. In turn, measurement of an impairment loss requires a determination of fair value, which is based on the best information available. We derive the required undiscounted cash flow estimates from our historical experience and our internal business plans. To determine fair value, we use our internal cash flow estimates discounted at an appropriate interest rate, quoted market prices when available, and independent appraisals, as appropriate. Accordingly, the fair value of an asset could be different using different estimates and assumptions in these valuation techniques which would increase or decrease the impairment charge.

Other Intangible Assets

We test identified intangible assets whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. We perform this test by initially comparing the carrying amount to the sum of undiscounted cash flows expected to be generated by the asset. If the carrying amount of an intangible asset exceeds its estimated future undiscounted cash flows, then an impairment loss would be indicated. The amount of the impairment loss to be recorded would be based on the excess of the carrying amount of the intangible asset over its discounted future cash flows. We use judgment in assessing whether the carrying amount of our intangible assets is not expected to be recoverable over their estimated remaining useful lives. See Note 5 "Goodwill and Other Intangibles" to the "Notes to Consolidated Financial Statements" for further information.

Business Combinations

The reconsolidation of MTC and the acquired interest in CIG have been treated as business combinations which require recording the assets and liabilities at their estimated fair values. The Company employed discounted cash flow models to estimate the fair values of the assets and liabilities. The models used assumptions and estimates including projections of

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS *(continued)*

Advances to Tobacco Suppliers *(continued)*

Business Combinations *(continued)*

financial information; forecasted capital expenditure requirements and related tax depreciation; cash-free, debt-free long-term growth rate; and discount rate. Management’s estimates were based on historical performance, current market conditions and industry trends, long-term customer relationships and strategic plans for future business growth and opportunities. Liquidity assumptions were based on the historical and current economic environments in capital markets.

Pensions and Postretirement Health Care and Life Insurance Benefits

The valuation of our pension and other postretirement health care and life insurance plans requires the use of assumptions and estimates that are used to develop actuarial valuations of expenses, assets and liabilities. These assumptions include discount rates, investment returns, projected salary increases and benefits and mortality rates. The significant assumptions used in the calculation of pension and postretirement obligations are:

- **Discount rate:** The discount rate is based on investment yields available at the measurement date on high-quality fixed income obligations, such as those included in the Moody’s Aa bond index.
- **Salary increase assumption:** The salary increase assumption reflects our expectations with respect to long-term salary increases of our workforce. Historical pay increases, expectations for the future, and anticipated inflation and promotion rates are considered in developing this assumption.
- **Cash Balance Crediting Rate:** Interest is credited on cash balance accounts based on the yield on one-year Treasury Constant Maturities plus 1%. The assumed crediting rate thus considers the discount rate, current treasury rates, current inflation rates, and expectations for the future.
- **Mortality Rates:** Mortality rates are based on gender-distinct group annuity mortality (“GAM”) tables.
- **Expected return on plan assets:** The expected return reflects asset allocations, investment strategy and our historical actual returns.
- **Termination and Retirement Rates:** Termination and retirement rates are based on standard tables reflecting past experience and anticipated future experience under the plan. No early retirement rates are used since benefits provided are actuarially equivalent and there are not early retirement subsidies in the plan.

Management periodically reviews actual demographic experience as it compares to the actuarial assumptions. Changes in assumptions are made if there are significant deviations or if future expectations change significantly. Based upon anticipated changes in assumptions, pension and postretirement expense is expected to decrease by \$18 thousand in the fiscal year ended March 31, 2019 as compared to March 31, 2018. The cash contribution to our employee benefit plans in fiscal 2018 was \$6.2 million and is expected to be \$7.2 million in fiscal 2019.

The effect of actual results differing from our assumptions are accumulated and amortized over future periods. Changes in other assumptions and future investment returns could potentially have a material impact on our pension and postretirement expenses and related funding requirements. The effect of a change in certain assumptions is shown below:

	Estimated Change in Projected Benefit Obligation Increase (Decrease) (in 000’s)	Estimated Change in Annual Expense Increase (Decrease) (in 000’s)
Change in Assumption (Pension and Postretirement Plans)		
1% increase in discount rate	\$(16,302)	\$ 58
1% decrease in discount rate	\$ 19,117	\$ 131
1% increase in salary increase assumption	\$ 204	\$ 49
1% decrease in salary increase assumption	\$ (190)	\$ (52)
1% increase in cash balance crediting rate	\$ 1,238	\$ 96
1% decrease in cash balance crediting rate	\$ (1,072)	\$ (83)
1% increase in rate of return on assets		\$(976)
1% decrease in rate of return on assets		\$ 976

Changes in assumptions for other post retirement benefits are no longer applicable as the benefit is capped and no longer subject to inflation. See Note 13 “Employee Benefits” to the “Notes to Consolidated Financial Statements” for further information.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Derivatives policies: Hedging foreign exchange exposure using forward contracts are specifically contemplated to manage risk in accordance with management's policies and reduce the risks inherent in currency fluctuations. We do not utilize derivatives for speculative purposes or enter into market risk sensitive instruments for trading purposes. Derivatives are transaction specific so that a specific contract or invoice determines the amount, maturity, and other specifics of the hedge.

Foreign exchange rates: Our business is generally conducted in U.S. dollars, as is the business of the tobacco industry as a whole. However, local country operating costs, including the purchasing and processing costs for tobaccos, are subject to the effects of exchange fluctuations of the local currency against the U.S. dollar. We attempt to minimize such currency risks by matching the timing of our working capital borrowing needs against the tobacco purchasing and processing funds requirements in the currency of the country where the tobacco is grown. Also, in some cases, our sales pricing arrangements with our customers allow adjustments for the effect of currency exchange fluctuations on local purchasing and processing costs. Fluctuations in the value of foreign currencies can significantly affect our operating results. In our Cost of Goods and Services Sold, we have recognized exchange gains (losses) of \$(4.1) million, \$8.7 million, and \$(0.9) million for the fiscal years ended March 31, 2018, 2017, and 2016, respectively. We recognized exchange gains (losses) of \$(1.3) million, \$3.1 million, and \$(5.6) million related to tax balances in our tax expense for the fiscal years ended March 31, 2018, 2017, and 2016, respectively. In addition, foreign currency fluctuations in the Euro and (U.K.) Sterling can significantly impact the currency translation adjustment component of accumulated other comprehensive income. We recognized gains (losses) of \$9.6 million, \$(8.2) million, and \$0.1 million for the fiscal years ended March 31, 2018, 2017, and 2016, respectively, as a result of fluctuations in these currencies.

Our consolidated SG&A expenses denominated in foreign currencies are subject to translation risks from currency exchange fluctuations. These foreign denominated expenses accounted for approximately 25.2% or \$37.8 million of our total SG&A expenses for the twelve months ended March 31, 2018. A 10% change in the value of the U.S. dollar relative to those currencies would have caused the reported value of those expenses to increase or decrease by approximately \$3.8 million.

Interest rates: We manage our exposure to interest rate risk through the proportion of fixed rate and variable rate debt in our total debt portfolio. A 1% change in variable interest rates would increase or decrease our reported interest cost by approximately \$5.2 million. A substantial portion of our borrowings are denominated in U.S. dollars and bear interest at commonly quoted rates.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA *(continued)*

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 1 – Significant Accounting Policies

Description of Business

The Company is principally engaged in purchasing, processing, storing, and selling leaf tobacco. The Company purchases tobacco primarily in the United States, Africa, Europe, South America and Asia for sale to customers primarily in the United States, Europe and Asia. In fiscal 2018, the Company expanded operations into other product offerings.

Basis of Presentation

The accounts of the Company and its consolidated subsidiaries are included in the consolidated financial statements after elimination of intercompany accounts and transactions. The Company uses the cost or equity method of accounting for its investments in affiliates that are owned 50% or less and are not variable interest entities where the Company is the primary beneficiary.

In fiscal 2006, the Company deconsolidated its Zimbabwe subsidiary, Mashonaland Tobacco Company LTD (“MTC”) in accordance with accounting requirements that apply to foreign subsidiaries that are subject to foreign exchange controls and other government restrictions that casted significant doubt on the parent’s ability to control the subsidiary. As of March 31, 2016, the Company determined that significant doubt about its ability to control MTC were eliminated due to changes in the political landscape and the recent issuance of clarifications to the indigenization laws within Zimbabwe. The recent issuance of clarifications to the indigenization law within Zimbabwe resulted in the Company’s development and filing with the Zimbabwean government of a plan of compliance with the indigenization law on March 31, 2016, the date of reconsolidation of MTC. The reconsolidation was treated as a purchase business combination for accounting purposes, with the Company designated as the acquirer. As such, the Consolidated Balance Sheet includes 100% of the fair value of the assets and liabilities of MTC as of March 31, 2016. See Note 21 “Reconsolidation of MTC” to the “Notes to Consolidated Financial Statements” for further information.

Beginning April 1, 2016, the financial results of MTC are included in the Statements of Consolidated Operations, Consolidated Balance Sheets and Statements of Consolidated Cash Flows.

Prior to March 31, 2016, the Company accounted for its investment in MTC using the cost method and had been reporting it in Investments in Unconsolidated Affiliates in the Consolidated Balance Sheets since March 31, 2006 and had written its investment in MTC down to zero in fiscal 2007.

Investments in Unconsolidated Affiliates

The Company’s equity method investments and its cost method investments are non-marketable securities. The Company reviews such investments for impairment whenever events or changes in circumstances indicate that the carrying amount of an investment may not be recovered. For example, the Company would test such an investment for impairment if the investee were to lose a significant customer, suffer a large reduction in sales margins, experience a major change in its business environment, or undergo other significant changes in its normal business. In assessing the recoverability of equity or cost method investments, the Company uses discounted cash flow models. If the fair value of an equity investee is determined to be lower than its carrying value, an impairment loss is recognized. The preparation of discounted future cash flow analysis requires significant management judgment with respect to future operating earnings growth rates and the selection of an appropriate discount rate. The use of different assumptions could increase or decrease estimated future operating cash flows, and the discounted value of those cash flows, and therefore could increase or decrease any impairment charge.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities. They also affect the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates, and changes in these estimates are recorded when known. Estimates are used in accounting for, among other things, pension and postretirement health care benefits, inventory market values, allowances for doubtful accounts and advances, bank loan guarantees to suppliers and unconsolidated subsidiaries, useful lives for depreciation and amortization, future cash flows associated with impairment testing for long-lived assets, deferred tax assets and uncertain income tax positions, intrastate tax credits in Brazil and fair value determinations of financial assets and liabilities including derivatives,

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 1 – Significant Accounting Policies (continued)

Use of Estimates (continued)

securitized beneficial interests and counterparty risk. Changes in market and economic conditions, local tax laws, and other related factors are considered each reporting period, and adjustments to the accounts are made based on the Company's best judgment.

Revenue Recognition

The Company recognizes revenue from the sale of tobacco when persuasive evidence of an arrangement exists, the price to the customer is fixed or determinable, collectibility is reasonably assured, and title and risk of ownership is passed to the customer upon shipment or delivery. The Company requires that all customer-specific acceptance provisions be met at the time title and risk of ownership passes to the customer. Furthermore, the Company's sales history indicates customer returns and rejections are not significant.

The Company also processes tobacco owned by its customers and revenue is recognized based on contractual terms as the service is provided. The revenue and cost associated with processing is recorded gross in the Statements of Consolidated Operations. The Company's history indicates customer requirements for processed tobacco are met upon completion of processing. In addition, advances from customers are deferred and recognized as revenue upon shipment or delivery.

Taxes Collected from Customers

Certain subsidiaries are subject to value-added taxes on local sales. These amounts have been included in Sales and Cost of Goods and Services Sold and were \$26,033, \$25,631 and \$23,451 for the years ended March 31, 2018, 2017 and 2016, respectively.

Shipping and Handling

Shipping and handling costs are included in Cost of Goods and Services Sold in the Statements of Consolidated Operations.

Other Income

At March 31, 2016, the Company reconsolidated MTC. As a result, the Company recorded a gain of \$106,203 to record the fair value of MTC of which \$10,277 was cash and the remaining \$95,926 was non-cash.

Other Income also includes gains on sales of property, plant and equipment (of which \$1,839 was non-cash), and other assets, and the receipt of South American funds previously held in escrow that are now covered by bond. This caption also includes expenses related to the Company's sale of receivables and Brazilian intrastate trade tax credits. See Note 16 "Contingencies and other Information" and Note 17 "Sale of Receivables" to the "Notes to Consolidated Financial Statements" for further information.

The following table summarizes the significant components of Other Income.

	Years Ending March 31,		
	2018	2017	2016
Gain on reconsolidation of subsidiary	\$ —	\$ —	\$106,203
Other sales of assets and expenses	3,379	303	(306)
Sales of Brazilian intrastate trade tax credits	11,835	9,356	4,309
Receipt of funds held in escrow	3,235	—	—
Gain on sales of fixed assets	3,612	1,691	901
Losses on sale of receivables	(7,679)	(6,454)	(5,680)
Total	\$14,382	\$ 4,896	\$105,427

Cash and Cash Equivalents

Cash equivalents are defined as temporary investments of cash with original maturities of less than 90 days. At March 31, 2018 and 2017, respectively, cash and cash equivalents included \$236 and \$153 of customer funding that was restricted for social responsibility programs maintained by the Company. At March 31, 2018 and 2017, respectively, \$1,261 and \$1,767 of

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 1 – Significant Accounting Policies *(continued)*

Cash and Cash Equivalents *(continued)*

cash was held on deposit as a compensating balance for short-term borrowings. At March 31, 2018, \$1,487 of cash was restricted for capital investment. At March 31, 2017, no cash was restricted for capital investment. Restricted cash is included in Other Current Assets.

As of March 31, 2018, the Company held \$6,043 in the Zimbabwe Real Time Gross Settlement (“RTGS”) System. RTGS is a local currency equivalent that is exchanged 1:1 with the U.S. Dollar (“USD”). In order to convert these units to USD, the Company must obtain foreign currency resources from the Reserve Bank of Zimbabwe subject to the monetary and exchange control policy in Zimbabwe.

Trade Receivables, Net

Trade receivables are amounts owed to the Company from its customers. Trade receivables are recorded at invoiced amounts and primarily have net 30-day terms. The Company extends credit to its customers based on an evaluation of a company’s financial condition and collateral is generally not required.

The Company maintains an allowance for doubtful accounts for estimated uncollectible accounts receivable. The allowance is based on the Company’s assessment of known delinquent accounts, other currently available evidence of collectability, and the aging of accounts receivable. The Company’s allowance for doubtful accounts was \$7,048 and \$6,990 at March 31, 2018 and 2017, respectively. The provision for doubtful accounts is reported in Selling, General and Administrative Expenses in the Statements of Consolidated Operations.

Other Receivables

Other receivables consist primarily of value-added tax receivables of \$16,025 and \$12,449 at March 31, 2018 and 2017, respectively.

Other Deferred Charges

Other deferred charges are primarily deferred financing costs that are amortized over the life of long-term debt.

Sale of Accounts Receivable

The Company is currently engaged in two revolving trade accounts receivable securitization arrangements to sell receivables. The Company records the transaction as a sale of receivables, removes such receivables from its Consolidated Balance Sheet and records a receivable for the beneficial interest in such receivables. The losses on the sale of receivables are recognized in Other Income. As of March 31, 2018 and 2017, respectively, accounts receivable sold and outstanding were \$228,621 and \$200,084. See Note 17 “Sale of Receivables” and Note 18 “Fair Value Measurements” to the “Notes to Consolidated Financial Statements” for further information.

Inventories

Costs in inventory include processed tobacco inventory, unprocessed tobacco inventory, and other inventory. Costs of unprocessed tobacco inventories are determined by the average cost method, which include the cost of green tobacco. Costs of processed tobacco inventories are determined by the average cost method, which include both the cost of unprocessed tobacco, as well as direct and indirect costs that are related to the processing of the product. Costs of other non-tobacco inventory are determined by the first-in, first-out method, which include costs of packing materials, non-tobacco agricultural products and agricultural supplies including seed, fertilizer, herbicides and pesticides.

Inventories are carried at the lower of cost or net realizable value (“LCM”). The Company evaluates its inventories for LCM adjustments by country and type of inventory. Processed tobacco and unprocessed tobacco are evaluated separately for LCM purposes. The Company compares the cost of its processed tobacco to market values based on recent sales of similar grades when evaluating those balances for LCM adjustments. The Company also considers whether its processed tobacco is

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 1 – Significant Accounting Policies (continued)

Inventories (continued)

committed to a customer, whereby the expected sales price would be utilized in determining the market value for committed tobacco. The Company also reviews data on market conditions in performing its LCM evaluation for unprocessed tobacco.

See Note 2 “Inventories” to the “Notes to Consolidated Financial Statements” for further information.

Advances to Tobacco Suppliers

The Company purchases seeds, fertilizer, pesticides, and other products related to growing tobacco and advances them to suppliers to assist in crop production. These advances are short term, represent prepaid inventory, and are recorded as advances to tobacco suppliers. Upon delivery of tobacco, part of the purchase price to the supplier is paid in cash and part through a reduction of the advance balance. The advances applied to the delivery are reclassified out of advances and into unprocessed inventory.

The Company also has noncurrent advances, which generally represent the cost of advances to suppliers for infrastructure, such as curing barns, that are also recovered through the delivery of tobacco to the Company by the suppliers. Not all suppliers are able to settle the entire amount of advances that are due in any given year. In these situations, the Company may allow the suppliers to deliver tobacco over future crop years to recover its advances. Noncurrent advances to tobacco suppliers are recorded in Other Noncurrent Assets in the Consolidated Balance Sheets.

The Company accounts for its advances to tobacco suppliers using a cost accumulation model, which results in the reporting of its advances at the lower of cost or recoverable amounts exclusive of the mark-up and interest. The mark-up and interest on its advances are recognized upon delivery of tobacco as a decrease in the cost of the current crop. The mark-up and interest capitalized or to be capitalized into inventory for the current crop were \$15,483 and \$16,919 as of March 31, 2018 and 2017, respectively. Unrecoverable advances and other costs capitalized or to be capitalized into the current crop was \$8,239 and \$9,125 at March 31, 2018 and 2017, respectively.

The following table reflects the classification of advances to tobacco suppliers:

	<u>March 31, 2018</u>	<u>March 31, 2017</u>
Current	\$30,482	\$54,713
Noncurrent	5,294	5,855
Total	<u>\$35,776</u>	<u>\$60,568</u>

There were no unrecovered amounts expensed directly to Cost of Goods and Services Sold in the Statements of Consolidated Operations for abnormal yield adjustments or unrecovered amounts from prior crops for the years ended March 31, 2018 and 2017. Normal yield adjustments are capitalized into the cost of the current crop and are expensed as Cost of Goods and Services Sold as that crop is sold.

Guarantees

The Company, and certain of its foreign subsidiaries, guarantee bank loans to suppliers for crop financing. Under longer-term arrangements, the Company may also guarantee financing on suppliers’ construction of curing barns or other tobacco production assets. Guaranteed loans are generally repaid concurrent with the delivery of tobacco to the Company. The Company is obligated to repay any guaranteed loan should the supplier default. If default occurs, the Company has recourse against the supplier. The Company also guarantees bank loans of certain unconsolidated subsidiaries in Asia and Brazil. The following table summarizes amounts guaranteed and the fair value of those guarantees:

	<u>March 31, 2018</u>	<u>March 31, 2017</u>
Amounts guaranteed (not to exceed)	\$150,900	\$194,656
Amounts outstanding under guarantee	126,835	106,465
Fair value of guarantees	5,864	7,126

Of the guarantees outstanding at March 31, 2018, all expire within one year. The fair value of guarantees is recorded in Accrued Expenses and Other Current Liabilities in the Consolidated Balance Sheets and included in crop costs except for the joint venture in Brazil which are included in Accounts Receivable, Related Parties. See Note 18 “Fair Value Measurements” to the “Notes to Consolidated Financial Statements” for further information.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 1 – Significant Accounting Policies (continued)

Guarantees (continued)

In Brazil, some suppliers obtain government subsidized rural credit financing from local banks that is guaranteed by the Company. The Company withholds amounts owed to suppliers related to the rural credit financing of the supplier upon delivery of tobacco to the Company. The Company remits payments to the local banks on behalf of the guaranteed suppliers. Terms of rural credit financing are such that repayment is due to local banks based on contractual due dates. As of March 31, 2018 and 2017, respectively, the Company had balances of \$14,807 and \$20,860 that were due to local banks on behalf of suppliers. These amounts are included in Accounts Payable in the Consolidated Balance Sheets.

Goodwill and Other Intangibles

Goodwill represents the excess of purchase price over fair value of net assets acquired and is allocated to the appropriate reporting unit when acquired. Reporting units may be operating segments as a whole or an operation one level below an operating segment, referred to as a component. The components within the Company's operating segments were aggregated into three reporting units (North America, Africa and Other Regions) due to their similar economic characteristics. Goodwill is not subject to amortization. Goodwill is tested for impairment annually or whenever events and circumstances indicate that impairment may have occurred. Goodwill is evaluated for impairment by determining the fair value of the related reporting unit. Fair value is measured based on a discounted cash flow method or relative market-based approach. If the carrying amount of goodwill exceeds its fair value, an impairment charge is recorded.

The Company has intangible assets with indefinite useful lives and intangible assets with definite useful lives. These intangible assets are tested for impairment whenever factors indicate that the carrying amount may not be recoverable. Supply contracts are amortized based on the expected realization of the benefit over the term of the contracts ranging from three to five years. Production contracts and the customer relationship and license intangibles are all amortized on a straight-line basis ranging from five to ten years and twenty years, respectively. The amortization period is the term of the contract or, if no term is specified in the contract, management's best estimate of the useful life based on past experience. Internally developed software is amortized on a straight-line basis over five years once the software testing is complete. Events and changes in circumstance may either result in a revision in the estimated useful life or impairment of an intangible. See Note 5 "Goodwill and Other Intangibles" to the "Notes to Consolidated Financial Statements" for further information.

Other Noncurrent Assets

For the year ended March 31, 2018, other noncurrent assets consist primarily of long-term value-added tax (VAT) and intrastate tax receivables of \$5,431, long-term advances to suppliers of \$5,294, long-term escrow deposits of \$22,182, long-term retirement benefit assets of \$10,417, and cash surrender value of life insurance of \$5,456. For the year ended March 31, 2017, other noncurrent assets consist primarily of long-term VAT and intrastate tax receivables of \$4,170, long-term advances to suppliers of \$5,855, long-term escrow deposits of \$12,745, long-term retirement benefit assets of \$7,555, and cash surrender value of life insurance of \$5,502.

Property, Plant and Equipment

Property, plant and equipment at March 31, 2018 and 2017, are summarized as follows:

	2018	2017
Land	\$ 26,474	\$ 27,705
Buildings	216,947	207,833
Machinery and equipment	185,679	178,182
Total	429,100	413,720
Less accumulated depreciation	(174,819)	(157,209)
Total property, plant and equipment, net	\$ 254,281	\$ 256,511

Property, plant and equipment is stated at cost less accumulated depreciation. Provisions for depreciation are computed on a straight-line basis at annual rates calculated to amortize the cost of depreciable properties over their estimated useful lives. Buildings and machinery and equipment are depreciated over ranges of 20 to 30 years and three to ten years, respectively. The consolidated financial statements do not include fully depreciated assets. Depreciation expense recorded in

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(continued)*

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 1 – Significant Accounting Policies *(continued)*

Property, Plant and Equipment *(continued)*

Cost of Goods and Services Sold for the years ended March 31, 2018, 2017 and 2016 was \$26,967, \$27,730 and \$23,132, respectively. Depreciation expense recorded in Selling, General, and Administrative Expenses for the years ended March 31, 2018, 2017 and 2016 was \$2,382, \$2,662 and \$2,699, respectively. Total property and equipment purchases, including internally developed software intangibles, were \$23,298 for the year ended March 31, 2018 of which \$697 was unpaid at March 31, 2018 and included in Accounts Payable; \$12,737 for the year ended March 31, 2017 of which \$413 was unpaid at March 31, 2017 and included in Accounts Payable; and \$17,786 for the year ended March 31, 2016 of which \$1,359 was unpaid at March 31, 2016 and included in Accounts Payable. Estimated useful lives are periodically reviewed and changes are made to the estimated useful lives when necessary. Long-lived assets are reviewed for indicators of impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The evaluation is performed at the lowest level of identifiable cash flows at which the asset could be bought or sold in a current transaction between willing parties and may be estimated using a number of techniques, including quoted market prices or valuations, present value techniques based on estimates of cash flows, or multiples of earnings or revenue performance measures.

Derivative Financial Instruments

The Company uses forward or option currency contracts to protect against volatility associated with certain non-U.S. dollar denominated forecasted transactions. These contracts are for green tobacco purchases, processing costs, and selling, general and administrative costs. Derivative financial instruments are recognized on the balance sheet as assets and liabilities and are measured at fair value. Changes in the fair value of derivative instruments designated as hedging instruments are recorded each period according to the determination of the derivative's effectiveness. The effective portion of changes in the fair value of derivatives designated as cash flow hedges is recorded in Accumulated Other Comprehensive Loss and subsequently reclassified into earnings in the period during which the hedged transaction is recognized in earnings. The ineffective portion of the change in fair value of the derivatives is recognized in Cost of Goods and Services Sold immediately as incurred.

As of March 31, 2018, there were no designated cash flow hedges remaining in Other Comprehensive Loss. The Company recorded losses of \$1,818, \$1,161 and \$2,001 in its Cost of Goods and Services Sold for the years ended March 31, 2018, 2017, and 2016, respectively. There was no current derivative asset as of March 31, 2018. The Company recorded a current derivative asset of \$943 as of March 31, 2017.

The Company has elected not to offset fair value amounts recognized for derivative instruments with the same counterparty under a master netting agreement. See Note 18 "Fair Value Measurements" to the "Notes to Consolidated Financial Statements" for further information of fair value methodology.

Income Taxes

The Company uses the asset and liability method to account for income taxes. The objective of the asset and liability method is to establish deferred tax assets and liabilities for the temporary differences between the financial reporting basis and the income tax basis of the Company's assets and liabilities at enacted tax rates expected to be in effect when such amounts are realized or settled.

The Company's annual tax rate is based on its income, statutory tax rates, and tax planning opportunities available in the various jurisdictions in which it operates. Tax laws are complex and subject to different interpretations by the taxpayer and respective governmental taxing authorities. Significant judgment is required in determining tax expense and in evaluating tax positions, including evaluating uncertainties. The Company reviews its tax positions quarterly and adjusts the balances as new information becomes available.

Deferred income tax assets represent amounts available to reduce income taxes payable on taxable income in future years. Such assets arise because of temporary differences between the financial reporting and tax bases of assets and liabilities, as well as from net operating loss and tax credit carryforwards. The Company evaluates the recoverability of these future tax deductions by assessing the adequacy of future expected taxable income from all sources, including reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies. These sources of income inherently rely on estimates. The Company uses historical experience and short and long-range business forecasts to provide insight. The Company believes it is more likely than not that a portion of the deferred income tax assets may expire as unused and has established a valuation allowance against them. During the year ended March 31, 2018, the valuation

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA *(continued)*

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(continued)*

Alliance One International, Inc. and Subsidiaries
(in thousands)

Note 1 – Significant Accounting Policies *(continued)*

Income Taxes *(continued)*

allowance against the Company's net deferred tax assets in the U.S. were released after management determined that it is more likely than not that the net deferred tax assets will be realized in this tax jurisdiction. Although realization is not assured for the remaining deferred income tax assets, the Company believes it is more likely than not the deferred tax assets will be fully recoverable within the applicable statutory expiration periods. However, deferred tax assets could be reduced in the near term if estimates of taxable income are significantly reduced or available tax planning strategies are no longer viable.

The Tax Cuts and Jobs Act (the "Tax Act") was enacted on December 22, 2017. The Tax Act is complex, materially revises the U.S. Federal corporate income tax law by, among other things, reducing the rate from 35% to 21% starting after January 1, 2018, implementing a modified territorial tax system that includes a one-time transition tax on deemed repatriated earnings of foreign subsidiaries, and includes various changes which will impact the Company. As of March 31, 2018, the Company has not completed the accounting related to the enactment of the Tax Act but has determined that a reasonable estimate of the provisions of the Tax Act can be made. These estimates include the impact to the deferred tax balances due to the tax rate change, effects of the transition tax, and the change in the U.S. valuation allowance. See Note 12 "Income Taxes" to the "Notes to Consolidated Financial Statements" for further information.

Stock-Based Compensation

The Company expenses the fair value of grants of various stock-based compensation programs at fair value over the vesting period of the awards. The fair value of stock options is estimated at the date of grant using the Black-Scholes-Merton option valuation model which was developed for use in estimating the fair value of exchange traded options that have no vesting restrictions and are fully transferable. Option valuation methods require the input of highly subjective assumptions, including the expected stock price volatility. See Note 11 "Stock-Based Compensation" to the "Notes to Consolidated Financial Statements" for further information.

New Accounting Standards

Recently Adopted Accounting Pronouncements

In July 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Update ("ASU") No. 2015-11, *Inventory*. ASU 2015-11 simplifies the measurement of inventory. Under the previous accounting guidance, an entity measured inventory at the lower of cost or market with market defined as one of three different measures. The primary objective of this accounting guidance is to require a single measurement of inventory at the lower of cost and net realizable value. The Company adopted this guidance on April 1, 2017. There was no impact on the consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU No. 2016-09, *Compensation—Stock Compensation (Topic 718)*. ASU 2016-09 provides simplification for the accounting for employee stock-based payment transactions, including the related income tax consequences, the classification of awards as either equity or liabilities, and the classification of transactions in the statement of cash flows. The Company adopted this guidance on April 1, 2017 using the modified retrospective transition method. The adoption of this guidance did not have a material impact on the consolidated financial statements and related disclosures.

Recent Accounting Pronouncements Not Yet Adopted

In May 2014, the FASB issued ASU No. 2014-09, *Revenue Recognition (Topic 606), Revenue from Contracts with Customers*. ASU 2014-09 outlines a comprehensive new revenue recognition model that requires a company to recognize revenue to depict the transfer of goods or services to a customer at an amount that reflects the consideration it expects to receive in exchange for those goods or services. The guidance also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts. This guidance is effective for the Company on April 1, 2018. Companies are allowed to select between two transition methods: (1) a full retrospective transition method with the application of the new guidance to each prior reporting period presented, or (2) a modified retrospective transition method that recognizes the cumulative effect on prior periods at the date of adoption together with additional footnote disclosures. This guidance was adopted using the modified retrospective transition method as of April 1, 2018. The implementation group for this ASU has evaluated the impact of this guidance on the consolidated financial statements and related disclosures, business processes, systems, and controls and the adoption of this guidance does not have a material impact on the consolidated financial statements. However, the Company does expect the adoption of this guidance to result in additional disclosures.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(continued)*

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 1 – Significant Accounting Policies *(continued)*

New Accounting Standards *(continued)*

Recent Accounting Pronouncements Not Yet Adopted *(continued)*

In January 2016, the FASB issued ASU No. 2016-01, *Financial Instruments—Recognition and Measurement of Financial Assets and Liabilities*. ASU 2016-01 requires equity investments (excluding equity method investments) to be measured at fair value with changes in fair value recognized in net income. This guidance is effective for the Company on April 1, 2018. This guidance will be adopted using the modified retrospective transition method. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)*. ASU 2016-02 requires lessees to recognize right of use assets and liabilities arising from leases on the balance sheet. In addition, leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. This guidance also requires disclosures about the amount, timing, and uncertainty of cash flows arising from leases. This guidance is effective for the Company on April 1, 2019. This guidance will be adopted using the modified retrospective transition method. The Company has formed a project team to evaluate and implement this guidance. The Company has elected to adopt an accounting policy, for all asset classes, to include both the lease and non-lease components as a single component and account for it as a lease. The Company has elected to utilize the transition practical expedients, as prescribed in ASC 842-10-65-1(f). The adoption of this guidance is expected to materially increase assets and liabilities on the consolidated balance sheets. The Company does not expect the adoption of this guidance to have a material impact on its existing debt covenants.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*. ASU 2016-13 provides financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. This guidance is effective for the Company on April 1, 2020. This guidance will be adopted using the modified retrospective transition method. The Company is evaluating the effect that adoption of this guidance will have on its consolidated financial statements and related disclosures.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*. ASU 2016-15 clarifies the classification of certain cash receipts and cash payments to reduce the diversity in practice on how these activities are presented on the statement of cash flows. This guidance is effective for the Company on April 1, 2018. This guidance will be adopted using the full retrospective transition method. The adoption of this guidance is expected to result in a material reclassification from cash flows from operating activities to cash flows from investing activities in the consolidated statement of cash flows and the disclosure of beneficial interests obtained as consideration for transferring trade receivables in securitization transactions.

In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash*. ASU 2016-18 clarifies the presentation of restricted cash on the statement of cash flows to reduce diversity in practice on how restricted cash is presented on the statement of cash flows. This guidance is effective for the Company on April 1, 2018. This guidance will be adopted using the full retrospective transition method. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements and related disclosures.

In January 2017, the FASB issued ASU No. 2017-04, *Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment*. ASU 2017-04 eliminates the requirement to determine implied goodwill in measuring an impairment loss. Upon adoption, goodwill impairment will be measured as the excess of the reporting unit's carrying value over fair value, limited to the amount of goodwill. This guidance is effective for the Company on April 1, 2020. Early adoption is permitted. This guidance will be adopted prospectively. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements and related disclosures.

In March 2017, the FASB issued ASU No. 2017-07, *Compensation—Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost*. ASU 2017-07 was issued to increase the consistency, transparency, and usefulness of financial information of retirement benefits by disaggregating the service cost component from the other components of net benefit cost. This guidance is effective for the Company on April 1, 2019. Early adoption is permitted. This guidance will be adopted using the full retrospective transition method. The Company is evaluating the effect that adoption of this guidance will have on its consolidated financial statements and related disclosures.

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 1 – Significant Accounting Policies (continued)**New Accounting Standards** (continued)**Recent Accounting Pronouncements Not Yet Adopted** (continued)

In August 2017, the FASB issued ASU No. 2017-12, *Derivative and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities*. ASU 2017-12 was issued to better align risk and management activities to financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. The amendments to cash flow and net investment hedge relationships that exist on the date of adoption are applied using a modified retrospective method. The presentation and disclosure requirements apply prospectively. This guidance is effective for the Company on April 1, 2019. Early adoption is permitted. The Company does not expect the adoption of this guidance to have a material impact on its consolidated financial statements and related disclosures.

In February 2018, the FASB issued ASU No. 2018-02, *Income Statement—Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*. ASU 2018-02 allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the Tax Cuts and Jobs Act. The guidance is effective for the Company on April 1, 2019. Early adoption is permitted. Amendments in the update should be applied either in the period of adoption or retrospectively to each period in which the effect of the change in U.S. federal corporate income tax rate in the Tax Cuts and Jobs Act is recognized. The Company is evaluating the effect that adoption of this guidance will have on its consolidated financial statements and related disclosures.

Computation of Earnings (Loss) Per Common Share

	Years Ended March 31,		
	2018	2017	2016
<i>(in thousands, except per share data)</i>			
BASIC EARNINGS (LOSS)			
Net income (loss) attributable to Alliance One International, Inc.	\$52,436	\$(62,928)	\$65,532
SHARES			
Weighted Average Number of Shares Outstanding	8,989	8,930	8,882
BASIC EARNINGS (LOSS) PER SHARE	\$ 5.83	\$ (7.05)	\$ 7.38
DILUTED EARNINGS (LOSS)			
Net income (loss) attributable to Alliance One International, Inc.	\$52,436	\$(62,928)	\$65,532
SHARES			
Weighted average number of shares outstanding	8,989	8,930	8,882
Plus: Restricted shares issued and shares applicable to stock options and restricted stock units, net of shares assumed to be purchased from proceeds at average market price	33	— *	1
Adjusted weighted average number of shares outstanding	9,022	8,930	8,883
DILUTED EARNINGS (LOSS) PER SHARE	\$ 5.81	\$ (7.05)	\$ 7.38

* All outstanding restricted shares and shares applicable to stock options and restricted stock units are excluded because their inclusion would have an antidilutive effect on the loss per share.

The weighted average number of common shares outstanding is reported as the weighted average of the total shares of common stock outstanding net of shares of common stock held by a wholly owned subsidiary. Shares of common stock owned by the subsidiary were 785 at March 31, 2018 and 2017. This subsidiary waives its right to receive dividends and it does not have the right to vote.

Certain potentially dilutive options were not included in the computation of earnings per diluted share because their exercise prices were greater than the average market price of the shares of common stock during the period and their effect would be antidilutive. These shares totaled 458 at a weighted average exercise price of \$61.00 per share at March 31, 2017.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current year presentation in the Company’s U.S. statutory federal income tax rate disclosure.

Other Comprehensive Income (Loss)

The following tables set forth the changes in each component of accumulated other comprehensive income (loss), net of tax, attributable to the Company:

	Currency Translation Adjustment	Pensions, Net of Tax	Derivatives, Net of Tax	Accumulated Other Comprehensive Loss
Balances at March 31, 2015	\$(14,154)	\$(52,232)	\$ —	\$(66,386)
Other comprehensive income before reclassifications	108	7,811	—	7,919
Amounts reclassified to net income, net of tax	—	4,619	—	4,619
Other comprehensive income, net of tax	108	12,430	—	12,538
Balances at March 31, 2016	(14,046)	(39,802)	—	(53,848)
Other comprehensive losses before reclassifications	(8,247)	(573)	(1,100)	(9,920)
Amounts reclassified to net loss, net of tax	—	3,721	—	3,721
Other comprehensive income (loss), net of tax	(8,247)	3,148	(1,100)	(6,199)
Balances at March 31, 2017	(22,293)	(36,654)	(1,100)	(60,047)
Other comprehensive losses before reclassifications	9,611	(2,121)	1,100	8,590
Amounts reclassified to net income, net of tax	—	6,195	—	6,195
Other comprehensive income, net of tax	9,611	4,074	1,100	14,785
Balances at March 31, 2018	\$(12,682)	\$(32,580)	\$ —	\$(45,262)

The following table sets forth amounts by component, reclassified from accumulated other comprehensive income (loss) to net income (loss) for the years ended March 31, 2018, 2017, and 2016:

	Years Ending March 31,		
	2018	2017	2016
Pension and postretirement plans*:			
Actuarial loss	\$2,513	\$3,911	\$3,629
Amortization of prior service cost (credit)	(667)	(670)	840
Deferred income tax benefit	4,349	480	150
Amounts reclassified from accumulated other comprehensive income (loss) to net income (loss)	\$6,195	\$3,721	\$4,619

* Amounts are included in net periodic benefit costs for pension and postretirement plans.

Concentration of Credit Risk

The Company may potentially be subject to a concentration of credit risks due to tobacco supplier advances and trade receivables relating to customers in the tobacco industry as well as cash which is deposited with high-credit-quality financial institutions. See Note 14 “Segment Information” to the “Notes to Consolidated Financial Statements” for further information of particular concentrations.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 1 – Significant Accounting Policies (continued)

Preferred Stock

The Board of Directors is authorized to issue shares of Preferred Stock in series with variations as to the number of shares in any series. The Board of Directors is also authorized to establish the rights and privileges of such shares issued, including dividend and voting rights. At March 31, 2018, 10,000 shares of preferred stock were authorized and no shares had been issued.

Note 2 – Inventories

	March 31, 2018	March 31, 2017
Processed tobacco	\$468,208	\$424,984
Unprocessed tobacco	204,149	220,625
Other	25,730	32,716
Total	<u>\$698,087</u>	<u>\$678,325</u>

See Note 1 “Significant Accounting Policies – Inventories” to the “Notes to Consolidated Financial Statements” for further information on the costs that comprise the inventory balances and the LCM testing methodologies.

The Company recorded LCM adjustments of \$2,189, \$4,833 and \$5,996 for the years ended March 31, 2018, 2017 and 2016, respectively.

Note 3 – Variable Interest Entities

The Company holds variable interests in multiple variable interest entities that primarily procure or process inventory on behalf of the Company and the other parties. These variable interests relate to equity investments, advances, and guarantees made by the Company. The Company is not the primary beneficiary, as it does not have the power to direct the activities that most significantly impact the economic performance of the entities as a result of the entities’ management and board of directors structure. Therefore they are not consolidated. At March 31, 2018 and 2017, the Company’s investment in variable interest entities was \$64,208 and \$51,443, respectively, and is classified as Investments in Unconsolidated Affiliates in the Consolidated Balance Sheets. The Company’s advances to variable interest entities as of March 31, 2018 and 2017 were \$5,895 and \$8,133, respectively, and are classified as Accounts Receivable, Related Parties in the Consolidated Balance Sheets. The Company guaranteed an amount to two variable interest entities not to exceed \$65,487 and \$96,378 at March 31, 2018 and 2017, respectively. The investments, advances, and guarantees in these variable interest entities represent the Company’s maximum exposure to loss.

Note 4 – Restructuring and Asset Impairment Charges

During the quarter ended March 31, 2015, the Company announced a global restructuring plan focusing on efficiency and cost improvements. The Company reviewed origin and corporate operations and initiatives were implemented to increase operational efficiency and effectiveness. These initiatives continue to occur as the Company restructures certain operations not meeting strategic business objectives and performance metrics in future periods. As of March 31, 2018, the costs of any future initiatives are not estimable. During the fiscal year ended March 31, 2018, the asset impairment charges were incurred due to restructuring of certain operations in Africa. During the fiscal year ended March 31, 2017, the asset impairment charges were incurred due to certain operations in Africa and the Company’s former U.S. cut rag facility. During the fiscal year ended March 31, 2016, the asset impairment charges were incurred due to restructuring of certain operations in Africa, Bulgaria, and Brazil as well as the curtailment of certain U.S. pension plans.

Note 4 – Restructuring and Asset Impairment Charges (continued)

The following table summarizes the restructuring actions as of March 31, 2018, 2017, and 2016:

	Years Ended March 31,		
	2018	2017	2016
Employee separation and other cash charges:			
Beginning balance	\$189	\$ 398	\$ 8,087
Period Charges:			
Employee separation charges (recoveries)	(22)	517	(498)
Other cash charges	—	120	662
Total employee separation and other cash charges (recoveries)	(22)	637	164
Payments	(60)	(846)	(7,853)
Ending balance March 31	\$107	\$ 189	\$ 398
Asset impairment and other non-cash charges	404	738	5,724
Total restructuring and asset impairment charges	\$382	\$1,375	\$ 5,888

The following table summarizes the employee separation and other cash charges recorded in the Company's North America and Other Regions segments as of March 31, 2018, 2017, and 2016:

	Years Ended March 31,					
	2018		2017		2016	
	North America	Other Regions	North America	Other Regions	North America	Other Regions
Beginning balance	\$ 60	\$129	\$ —	\$ 398	\$—	\$ 8,087
Period charges (recoveries)	—	(22)	180	457	—	164
Payments	(60)	—	(120)	(726)	—	(7,853)
Ending balance March 31	\$—	\$107	\$ 60	\$ 129	\$—	\$ 398

The following table summarizes non-cash charges for the Company's North America and Other Regions segments for fiscal years ended March 31, 2018, 2017, and 2016:

Years ended March 31,	North America	Other Regions
2018	—	404
2017	495	243
2016	712	5,012

Note 5 – Goodwill and Other Intangibles

The Company tests the carrying amount of goodwill annually as of the first day of the last quarter of the fiscal year and whenever events or circumstances indicate that impairment may have occurred. The Company evaluated its goodwill for impairment during fiscal 2018, 2017, and 2016 and determined that the fair value of each reporting unit is substantially in excess of its carrying value including goodwill.

The carrying value of other intangible assets as of March 31, 2018 represents customer relationship, production and supply contracts, licenses, and internally developed software. These intangible assets were determined by management to meet the criterion for recognition apart from goodwill. The Company uses judgment in assessing whether the carrying amount of its intangible assets is not expected to be recoverable. Amortization expense associated with finite-lived intangible assets was \$5,982, \$4,514, and \$3,356 for the years ended March 31, 2018, 2017 and 2016, respectively, and is recorded in Selling, General and Administrative Expenses except for production and supply contracts which is recorded against the associated revenues.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 5 – Goodwill and Other Intangibles (continued)

The following table summarizes the changes in the Company's goodwill and other intangibles for the years ended March 31, 2018, 2017 and 2016.

	Goodwill (1)	Amortizable Intangibles			License Intangibles	Total
		Customer Relationship Intangible	Production and Supply Contract Intangibles	Internally Developed Software Intangible		
Weighted average remaining useful life in years as of March 31, 2018		10.85	3.82	2.82	19.84	
March 31, 2016 balance:						
Gross carrying amount	\$16,463	\$ 58,530	\$14,893	\$ 18,502	\$ —	\$108,388
Accumulated amortization	—	(18,324)	(6,611)	(16,419)	—	(41,354)
Net March 31, 2016 balance	16,463	40,206	8,282	2,083	—	67,034
Additions	—	—	—	79	—	79
Amortization expense	—	(3,340)	(432)	(742)	—	(4,514)
Net March 31, 2017 balance	16,463	36,866	7,850	1,420	—	62,599
Additions (2)	11,083	—	—	231	30,339	41,653
Amortization expense	—	(3,341)	(1,731)	(667)	(243)	(5,982)
Net March 31, 2018 balance	\$27,546	\$ 33,525	\$ 6,119	\$ 984	\$30,096	\$ 98,270

(1) Goodwill of \$2,795 relates to the North America segment and \$24,751 relates to the Other Regions segment.

(2) Additions to Goodwill and Licenses relate to acquisition of Canada's Island Garden Inc. and Goldleaf Pharm Inc.

The following table summarizes the estimated intangible asset amortization expense for the next five years and beyond:

For Fiscal Years Ended	Customer Relationship Intangible	Production and Supply Contract Intangibles	Internally Developed Software Intangible*	Licenses	Total
2019	\$ 3,340	\$1,738	\$473	\$ 1,517	\$ 7,068
2020	3,340	1,741	294	1,517	6,892
2021	3,340	1,397	132	1,517	6,386
2022	3,340	1,243	60	1,517	6,160
2023	3,340	—	25	1,517	4,882
Later	16,825	—	—	22,511	39,336
	\$33,525	\$6,119	\$984	\$30,096	\$70,724

* Estimated amortization expense for the internally developed software is based on costs accumulated as of March 31, 2018. These estimates will change as new costs are incurred and until the software is placed into service in all locations.

Note 6 – Related Party Transactions

The Company's operating subsidiaries engage in transactions with related parties in the normal course of business. The following is a summary of balances and transactions with related parties of the Company:

	March 31, 2018	March 31, 2017	
Balances:			
Accounts receivable	\$ 8,188	\$8,133	
Accounts payable	\$14,835	\$9,773	
	Year Ended March 31,		
	2018	2017	2016
Transactions:			
Sales	\$ 25,257	\$47,726	\$ 18,827
Purchases	\$101,096	\$62,350	\$264,707

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA *(continued)*

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(continued)*

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 6 – Related Party Transactions *(continued)*

The Company's operating subsidiaries have entered into transactions with affiliates of the Company for the purpose of procuring inventory.

The Company's balances due to and from related parties and transactions relate to the Company's equity basis investments in companies located in Asia, South America, North America and Europe which grow, purchase, process and sell tobacco or produce consumable e-liquids.

Note 7 – Short-Term Borrowing Arrangements

Excluding all long-term credit agreements, the Company has lines of credit arrangements with a number of banks under which the Company may borrow up to a total of \$739,994 and \$808,695 at March 31, 2018 and 2017, respectively. The weighted average variable interest rate for the years ending March 31, 2018 and 2017 was 6.1% and 5.9%, respectively. At March 31, 2018 and 2017, amounts outstanding under the lines were \$427,277 and \$475,863, respectively. Unused lines of credit at March 31, 2018 amounted to \$300,445, net of \$12,272 of letters of credit and \$319,844 at March 31, 2017, net of \$12,989 of letters of credit. Certain non-U.S. borrowings of approximately \$134,743 and \$144,881 have inventories of \$101,051 and \$56,040 as collateral at March 31, 2018 and 2017, respectively. At March 31, 2018 and 2017, respectively, \$1,261 and \$1,767 were held on deposit as a compensating balance.

Note 8 – Long-Term Debt

The terms of the First Lien Notes and the ABL Facility, and certain effects of these refinancing transactions, are summarized below:

First Lien Notes

On October 14, 2016, the Company issued \$275,000 in aggregate principal amount of 8.5% senior secured first lien notes due 2021 (the "First Lien Notes"), at an issue price of 99.085% of the face amount thereof. The First Lien Notes, which bear interest at a rate of 8.500% per year, are payable semi-annually in arrears in cash on April 15 and October 15 of each year, beginning April 15, 2017, to holders of record at the close of business on the preceding April 1 and October 1, respectively. The First Lien Notes mature on April 15, 2021. The First Lien Notes are initially guaranteed on a senior secured basis by Alliance One's subsidiary, Alliance One Specialty Products, LLC (the "Initial Guarantor"), and each of its future material domestic subsidiaries are required to guarantee the First Lien Notes on a senior secured basis. The Initial Guarantor is not a material domestic subsidiary, and Alliance One currently has no material domestic subsidiaries. The Initial Guarantor and any future guarantors of the First Lien Notes are referred to as the "guarantors."

Alliance One's and the guarantors' obligations under the First Lien Notes and any guarantee of the First Lien Notes (and certain related obligations) and under the ABL Facility (as defined below) and any guarantee of the ABL Facility (and certain related obligations and obligations in respect of certain hedging arrangements) are secured by first-priority liens on substantially all of Alliance One's and the guarantors' tangible and intangible assets, subject to certain exceptions and permitted liens (the "Collateral"). Alliance One's and the guarantors' obligations under the First Lien Notes and any guarantee of the First Lien Notes (and certain related obligations) have first-priority in the waterfall set forth in a senior lien intercreditor agreement entered into in connection with the issuance of the First Lien Notes and the establishment of the ABL Facility (the "Senior Lien Intercreditor Agreement") in respect of the liens on the Collateral that is not ABL Priority Collateral (as defined below), including owned material real property in the United States, capital stock of subsidiaries owned directly by Alliance One or a guarantor (except that, in the case of foreign subsidiaries, only capital stock of only direct foreign subsidiaries that are material are to be pledged and only 65% of the voting capital stock and 100% of the non-voting capital stock are to be pledged), existing and after acquired intellectual property rights, equipment, related general intangibles and instruments and certain other related assets of the foregoing and proceeds of the foregoing (collectively, the "Notes Priority Collateral"). Alliance One's and the guarantors' obligations under the ABL Facility and any guarantee of the ABL Facility (and certain related obligations and obligations in respect of certain hedging arrangements) have second-priority in the waterfall set forth in the Senior Lien Intercreditor Agreement in respect of the liens on the Notes Priority Collateral. Alliance One's and the guarantors' obligations under the First Lien Notes and any guarantee of the First Lien Notes (and certain related obligations) have second-priority in the waterfall set forth in the Senior Lien Intercreditor Agreement in respect of the liens on the Collateral consisting of accounts receivable, inventories, cash (other than identifiable cash proceeds of the Notes Priority Collateral), deposit accounts, related general intangibles and instruments, certain other related assets of the foregoing and proceeds of the foregoing (collectively, the "ABL Priority Collateral"). Alliance One's and the guarantors' obligations under the ABL Facility and any guarantee of the ABL Facility (and certain related obligations and obligations in respect of certain hedging arrangements) have first-priority in the waterfall set forth in the Senior Lien Intercreditor Agreement in respect of the liens on the ABL Priority Collateral.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA *(continued)*

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(continued)*

Alliance One International, Inc. and Subsidiaries
(in thousands)

Note 8 – Long-Term Debt *(continued)*

First Lien Notes *(continued)*

If a change of control (as defined in the indenture governing the First Lien Notes) occurs at any time, holders of the First Lien Notes will have the right, at their option, to require the Company to repurchase all or a portion of the First Lien Notes for cash at a price equal to 101% of the principal amount of First Lien Notes being repurchased, plus accrued and unpaid interest, to, but excluding, the date of repurchase. The indenture governing the First Lien Notes restricts (subject to exceptions and qualifications) the Company's ability and the ability of its restricted subsidiaries to, among other things, incur additional indebtedness or issue disqualified stock or preferred stock, pay dividends and make other restricted payments (including restricted investments), sell assets, create liens, consolidate, merge, sell or otherwise dispose of all or substantially all of its assets, enter into transactions with its affiliates, enter into certain sale and leaseback transactions, create certain dividend and payment restrictions on its restricted subsidiaries, and designate its subsidiaries as unrestricted subsidiaries.

ABL Facility

On October 14, 2016, the Company entered into an ABL credit agreement (the "ABL Credit Agreement") with certain bank lenders establishing a senior secured revolving asset-based lending facility (the "ABL Facility") of \$60,000 subject to a borrowing base composed of its eligible accounts receivable and inventory. The ABL Facility may be used for revolving credit loans, swingline loans and letters of credit from time to time up to an initial maximum principal amount of \$60,000, subject to the limitations described below in this paragraph. Under certain conditions, Alliance One may solicit the ABL Facility lenders or other prospective lenders to provide additional revolving loan commitments under the ABL Facility in an aggregate amount not to exceed \$15,000 (less the aggregate principal amount of any notes exceeding \$275,000 issued under the First Lien Notes Indenture). The maximum amount available under the revolving credit facility is limited by a borrowing base consisting of eligible accounts receivable and inventory as follows:

- 85% of eligible accounts receivable, plus
- the lesser of (i) 85% of the appraised net-orderly-liquidation value of eligible inventory or (ii) 65% of eligible inventory valued at the lower of cost (based on a first-in first-out basis) and market value thereof (net of intercompany profits).

The borrowing base is subject to a \$25,000 deduction and customary reserves, which are to be established by the agent for the ABL Facility lenders in its permitted discretion from time to time. At March 31, 2018, no borrowings were outstanding under the ABL Facility and \$60,000 was available for borrowing. Borrowing is permitted under the ABL Credit Facility only to the extent that, after consideration of the application of the proceeds of the borrowing, the Company's unrestricted cash and cash equivalents would not exceed \$180,000. At March 31, 2018, the Company's unrestricted cash and cash equivalents significantly exceeded \$180,000.

In addition, loans under the ABL Facility shall not be made if after incurrence of such loans there will be more than \$180,000 of unrestricted cash and cash equivalents in the aggregate on the consolidated balance sheet of the Company and its subsidiaries. The ABL Facility permits both base rate borrowings and LIBOR borrowings. Borrowings under the ABL Facility bear interest at an annual rate equal to LIBOR plus 250 basis points or 150 basis points above base rate, as applicable, with a fee on unused borrowings initially at an annual rate of 50 basis points until March 31, 2017 and thereafter at annual rates of either 37.5 or 50 basis points based on average quarterly historical utilization under the ABL Facility. The ABL Facility matures on January 14, 2021.

In addition, customary mandatory prepayments of the loans under the ABL Facility are required upon the occurrence of certain events including, without limitation, certain dispositions of assets outside of the ordinary course of business in respect of certain collateral securing the ABL Facility, unrestricted cash and cash equivalents on the Company's consolidated balance sheet exceeding \$180,000 for a period of seven consecutive business days, and certain casualty and condemnation events.

The Company's obligations under the ABL Facility (and certain related obligations and obligations in respect of certain hedging arrangements) are (a) guaranteed by the Initial Guarantor and are required to be guaranteed by each material domestic subsidiary of Alliance One (currently there are no material domestic subsidiaries of Alliance One) (collectively with the Company, the "Credit Parties") and (b) secured by the Collateral.

The liens and other security interests granted by the Credit Parties on the Collateral for the benefit of the ABL Lenders (and certain related secured parties) are, subject to certain permitted liens, secured by first-priority security interests on a *pari passu* basis with the security interests securing the First Lien Notes, with respective priorities in a waterfall with respect to portions of the Collateral as set forth in the Senior Lien Intercreditor Agreement described above.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA *(continued)*

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(continued)*

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 8 – Long-Term Debt *(continued)*

ABL Facility *(continued)*

Under the terms of the ABL Facility, if (i) an event of default has occurred and is continuing or (ii) excess borrowing availability under the ABL Facility (based on the lesser of the commitments thereunder and the borrowing base) (the “Excess Availability”) falls below the greater of (x) \$12,500 and (y) 25% of the lesser of (A) the commitments under the ABL Facility at such time and (B) the borrowing base at such time (such greater amount being the “Cash Dominion Threshold”) for more than three consecutive business days, the Credit Parties will become subject to cash dominion, which will require daily prepayment of loans under the ABL Facility with the cash deposited in certain deposit accounts of the Credit Parties, including concentration accounts, and will restrict the Credit Parties’ ability to transfer cash from their concentration accounts to their disbursement accounts. Such cash dominion period shall end when (i) if arising as a result of a continuing event of default, such event of default ceases to exist, or (ii) if arising as a result of non-compliance with the Excess Availability threshold, Excess Availability shall be equal to or greater than the Cash Dominion Threshold for a period of 30 consecutive days.

The ABL Credit Agreement governing the ABL Facility contains a springing covenant requiring that the Company’s fixed charge coverage ratio be no less than 1.00 to 1.00 during any period commencing when Excess Availability is less than the greater of (x) \$10,000 and (y) 20% of the lesser of (A) the commitments under the ABL Facility at such time and (B) the borrowing base at such time (such greater amount being the “Financial Covenant Threshold”) until such time as Excess Availability has been equal to or greater than the Financial Covenant Threshold for a period of 30 consecutive days.

The ABL Credit Agreement governing the ABL Facility contains customary representations and warranties, affirmative and negative covenants (subject, in each case, to exceptions and qualifications) and events of defaults, including covenants that limit the Company’s ability to, among other things incur certain guarantees, merge, consolidate or dispose of substantially all of its assets, grant liens on assets, pay dividends, redeem stock or make other distributions or restricted payments, create certain dividend and payment restrictions on subsidiaries, repurchase or redeem capital stock or prepay subordinated or certain other material debt (including the First Lien Notes and the Company’s senior secured second lien notes due 2021), make certain investments, agree to restrictions on the payment of dividends to Alliance One by its subsidiaries, sell or otherwise dispose of assets, including equity interests of subsidiaries, enter into transactions with affiliates, enter into certain sale and leaseback transactions.

The ABL credit agreement restricts the Company from paying any dividends during the term of this facility subject to the satisfaction of specified financial ratios. In addition, the indentures governing the Company’s First Lien Notes and its senior secured second lien notes due 2021 contain similar restrictions and also prohibits the payment of dividends and other distributions if the Company fails to satisfy a ratio of consolidated EBITDA to fixed charges of at least 2.0 to 1.0. At March 31, 2018, the Company did not satisfy this fixed charge coverage ratio. The Company may from time to time not satisfy this ratio.

Termination of Existing Senior Secured Revolving Credit Facility

On October 14, 2016, the Company terminated its then existing senior secured revolving credit facility and repaid in full all outstanding indebtedness plus accrued and unpaid interest and other costs, of which \$73 was charged to debt retirement expense. As a result, the Company accelerated \$2,266 of deferred financing costs during the three months ended December 31, 2016, which was charged to debt retirement expense.

Senior Secured Second Lien Notes

On August 1, 2013, the Company issued \$735,000 in aggregate principal amount of its 9.875% senior secured second lien notes due 2021 (the “Second Lien Notes”). The Second Lien Notes were sold at 98% of the face value, for gross proceeds of approximately \$720,300. The Second Lien Notes bear interest at a rate of 9.875% per year, payable semi-annually in arrears in cash on January 15 and July 15 of each year, beginning January 15, 2014, to holders of record at the close of business on the preceding January 1 and July 1, respectively. The Second Lien Notes will mature on July 15, 2021. The Second Lien Notes are secured by a second priority lien on specified property of Alliance One International, Inc. for which the amended and restated senior secured credit facility is secured by a first priority lien. The indenture governing the Second Lien Notes restricts (subject to exceptions and qualifications) the Company’s ability and the ability of its restricted subsidiaries to, among other things, incur additional indebtedness or issue disqualified stock or preferred stock, pay dividends and make

Senior Secured Second Lien Notes *(continued)*

other restricted payments (including restricted investments), sell assets, create liens, consolidate, merge, sell or otherwise dispose of all or substantially all of its assets, enter into transactions with its affiliates, enter into certain sale and leaseback transactions, create certain dividend and payment restrictions on its restricted subsidiaries, and designate its subsidiaries as unrestricted subsidiaries.

The indenture governing the Second Lien Notes requires the Company's existing and future material domestic subsidiaries to guarantee the Second Lien Notes. The Company has no material domestic subsidiaries, and the Second Lien Notes are not presently guaranteed by any subsidiary. If a change of control (as defined in the indenture governing the Second Lien Notes) occurs at any time, holders of the Second Lien Notes will have the right, at their option, to require the Company to repurchase all or a portion of the Second Lien Notes for cash at a price equal to 101% of the principal amount of Second Lien Notes being repurchased, plus accrued and unpaid interest and special interest, if any, to, but excluding, the date of repurchase. In connection with the issuance of the Second Lien Notes, the Company entered into a registration rights agreement that requires the Company to pay additional special interest on the Second Lien Notes, at increasing annual rates up to a maximum of 1.0% per year, if the Company fails to timely comply with its registration obligations thereunder. Pursuant to the registration rights agreement, on December 20, 2013, the Company completed a registered exchange offer in which it offered to exchange for the outstanding Second Lien Notes an equal amount of new Second Lien Notes having identical terms in all material respects. During the year ended March 31, 2018, the Company purchased \$28,645 of the Second Lien Notes on the open market. All purchased securities were canceled leaving \$662,946 of the Second Lien Notes outstanding at March 31, 2018. Associated costs paid were \$72 and related discounts were \$(3,730) resulting in net cash repayment of \$25,644 and recorded in Repayment of Long-Term Borrowings in the Consolidated Statements of Cash Flows. Deferred financing costs and amortization of original issue discount of \$684 were accelerated. During the year ended March 31, 2017, the Company purchased \$28,409 of the Second Lien Notes on the open market. All purchased securities were canceled leaving \$691,591 of the Second Lien Notes outstanding at March 31, 2017. Associated costs paid were \$71 and related discounts were \$(3,409) resulting in net cash repayment of \$25,606 and recorded in Repayment of Long-Term Borrowings in the Consolidated Statements of Cash Flows. Deferred financing costs and amortization of original issue discount of \$678 were accelerated. In April 2018, the Company purchased \$10,868 of its Second Lien Notes on the open market. See Note 22 "Subsequent Events" to the Notes to Consolidated Financial Statements.

Covenants Limiting Dividends

The ABL Credit Agreement restricts the Company from paying any dividends during the term of the ABL Facility subject to the satisfaction of specified financial ratios. In addition, the indentures governing the First Lien Notes and the Second Lien Notes contain similar restrictions and also prohibit the payment of dividends and other distributions if the Company fails to satisfy a ratio of consolidated EBITDA to fixed charges of at least 2.0 to 1.0. At March 31, 2018, the Company did not satisfy this fixed charge coverage ratio. The Company may from time to time not satisfy this ratio and failure to meet this fixed charge coverage ratio does not constitute an event of default.

Foreign Seasonal Lines of Credit

The Company has typically financed its non-U.S. operations with uncommitted unsecured short-term seasonal lines of credit at the local level. These operating lines are seasonal in nature, normally extending for a term of 180 to 270 days corresponding to the tobacco crop cycle in that location. These facilities are typically uncommitted in that the lenders have the right to cease making loans and demand repayment of loans at any time. These loans are typically renewed at the outset of each tobacco season. As of March 31, 2018, the Company had approximately \$427,277 drawn and outstanding on foreign seasonal lines with maximum capacity totaling \$739,994 subject to limitations as provided for in the Credit Agreement. Additionally, against these lines there was \$12,272 available in unused letter of credit capacity with \$4,809 issued but unfunded.

Note 8 – Long-Term Debt (continued)

Summary of Debt

Certain debt agreements contain cross-default or cross-acceleration provisions. The Company has considered its short-term liquidity needs, the adequacy of estimated cash flows from operating activities, and other financing sources to meet these needs. The Company expects that its cash and cash equivalents, available borrowings from foreign lines of credit and accounts receivable securitization programs, and cash flows from operating activities are sufficient to meet anticipated cash flow needs for operations, capital expenditures, debt service obligations, and other fees payable under other contractual obligations for the foreseeable future. The following table summarizes the Company's debt financing as of March 31, 2018:

	Outstanding		March 31, 2018		Long Term Debt Repayment Schedule by Fiscal Year					
	March 31, 2017	March 31, 2018	Lines and Letters Available	Interest Rate	2019	2020	2021	2022	2023	Later
	Senior secured credit facility:

Note 9—Long-Term Leases

The Company has operating leases for land, buildings, automobiles and other equipment. Rent expense for all operating leases was \$21,829, \$21,689 and \$22,989 for the years ended March 31, 2018, 2017 and 2016, respectively. Minimum future obligations are as follows:

	Operating Leases
2019	\$18,084
2020	11,728
2021	7,366
2022	3,039
2023	978
Remaining	<u>2,421</u>
Total	<u>\$43,616</u>

Note 10 – Equity in Net Assets of Investee Companies

The Company has equity method investments in companies located in Asia that purchase and process tobacco. The Asia investees and ownership percentages are as follows: Alliance One Industries India Private Ltd. (India) 49%, Siam Tobacco Export Company (Thailand) 49%, and Adams International Ltd. (Thailand) 49%. The Company owns a 50% equity-based interest in Oryantal Tutun Paketleme which processes tobacco in Turkey. The Company also has a 50% interest in Purilum, LLC, a U.S. company that develops, produces, and sells consumable e-liquids to manufacturers and distributors of e-vapor products.

On August 21, 2017, the Company completed a purchase of a 40% interest in Nicotine River, LLC, an e-liquid company. The difference between the book basis of the Company's 40% interest and the fair value of the investment recorded was \$2,481. For the year ended March 31, 2018, the Company's earnings from the equity method investment were reduced by amortization expense of \$145 related to this basis difference. As of March 31, 2018, the basis difference was \$2,336.

On December 18, 2017, the Company completed a purchase of a 40% interest in Criticality LLC ("Criticality"), a North Carolina-based industrial hemp company that is engaged in cannabidiol ("CBD") extraction and other applications for industrial hemp in accordance with a pilot program authorized under the federal Agriculture Act of 2014 and applicable North Carolina law.

On March 26, 2014, the Company completed the formation of a new joint venture in Brazil with the disposition of 51% interest in China Brasil Tabacos Exportadora SA ("CBT"). The Company retained a 49% equity-based interest in CBT which purchases and processes tobacco. Upon the disposition of 51% interest in CBT, the difference between the book basis of the Company's 49% interest and the fair value of the investment recorded created a basis difference of \$15,990. The Company evaluated the contributed assets and identified basis differences in certain accounts, including inventory, intangible assets, and deferred taxes. The basis differences are being amortized over the respective estimated lives of these assets and liabilities, which range from one to ten years. For the year ended March 31, 2018, the Company's earnings from the equity method investment were reduced by amortization expense of \$1,518 related to these basis differences. As of March 31, 2018, the basis difference was \$8,586.

Note 10 – Equity in Net Assets of Investee Companies (continued)

Summarized combined financial information for these investees for fiscal years ended March 31, 2018, 2017, and 2016 follows:

	Years Ended March 31,		
	2018	2017	2016
Operations Statement Information			
Sales	\$317,183	\$232,145	\$274,183
Gross profit	53,161	23,739	42,143
Net income	23,954	3,072	15,254
Company's dividends received	2,826	4,307	1,887
	March 31,		
	2018	2017	
Balance Sheet Information			
Current assets	\$162,893	\$139,146	
Property, plant and equipment and other assets	53,941	54,674	
Current liabilities	103,687	102,550	
Long-term obligations and other liabilities	5,067	7,432	

Of the amounts presented above, the summarized financial information for CBT for the fiscal years ended March 31, 2018, 2017, and 2016 was as follows: Sales were \$200,609, \$146,070, and \$172,140 for the years ended March 31, 2018, 2017, and 2016, respectively. Gross profit was \$32,989, \$13,704, and \$30,567 for the years ended March 31, 2018, 2017, and 2016, respectively. Net income was \$16,575, \$3,464, and \$14,369 for the years ended March 31, 2018, 2017, and 2016, respectively. The Company's dividends received were \$1,812, \$4,307, and \$1,887 for the years ended March 31, 2018, 2017, and 2016, respectively. Current assets were \$108,050 and \$82,953 as of March 31, 2018 and 2017, respectively. Property, plant and equipment and other assets were \$6,208 and \$4,903 as of March 31, 2018 and 2017, respectively. Current liabilities were \$78,587 and \$64,848 as of March 31, 2018 and 2017, respectively. Long-term obligations and other liabilities were \$176 and \$391 as of March 31, 2018 and 2017, respectively.

Note 11 – Stock-Based Compensation

The Company expenses the fair value of grants of various stock-based compensation programs over the vesting period of the awards. Awards granted are recognized as compensation expense based on the grant date fair value estimated in accordance with generally accepted accounting principles.

The table below summarizes certain data for the Company's stock-based compensation plans:

	Year Ended March 31,		
	2018	2017	2016
Compensation expense for all stock based compensation plans	\$1,189	\$1,712	\$2,874
Tax (expense) benefits for stock-based compensation	\$ —	\$ —	\$ —
Fair value of stock options vested	\$ 275	\$ 315	\$2,043

The Company's shareholders approved the 2016 Incentive Plan (the "2016 Plan") at its Annual Meeting of Shareholders on August 12, 2016, which is the successor to the 2007 Incentive Plan (the "2007 Plan") as amended on August 11, 2011 and August 6, 2009. The 2016 Plan is an omnibus plan that provides the flexibility to grant a variety of equity awards including stock options, stock appreciation rights, stock awards, stock units, performance awards and incentive awards to officers, directors and employees of the Company.

As of March 31, 2018, a maximum of 1,109 shares may be issued under the 2016 Plan, inclusive of 900 original to the 2016 Plan and 209 carried forward from the 2007 Plan. The 2016 Plan requires that the shares available for grant be reduced by twice the number of shares issued for any awards other than options or stock appreciation rights. This has resulted in decreasing the shares available to grant by 140. As of March 31, 2018, 115 equity awards have been granted, 1 equity award has been cancelled, and 21 vested under the 2016 Plan, leaving 576 shares available for future awards under the 2016 Plan, inclusive of 620 original to the 2016 Plan and 209 carried forward from the 2007 Plan.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 11 – Stock-Based Compensation (continued)

Total equity awards outstanding are 685, inclusive of 474 awards granted and outstanding under the previous 2007 plan and 211 awards granted under the 2016 Plan. Shares issued are new shares which have been authorized and designated for award under the plans. Individual types of awards are discussed in greater detail below.

Stock Option Awards

Stock options allow for the purchase of common stock at a price determined at the time the option is granted. Stock options generally vest ratably over five years and generally expire after ten years. The fair value of these options is determined at grant date using the Black-Scholes-Merton valuation model and includes estimates of forfeiture based on historical experience. The fair value is then recognized as compensation expense ratably over the vesting term of the options. No stock options were granted during the years ended March 31, 2018, 2017, and 2016.

A summary of option activity for stock options follows:

Options	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at March 31, 2015	661	\$60.37		
Forfeited	(9)	66.21		
Expired	(182)	59.23		
Outstanding at March 31, 2016	470	60.70		
Forfeited	(4)	66.73		
Expired	(8)	39.40		
Outstanding at March 31, 2017	458	61.00		
Expired	(31)	74.80		
Outstanding at March 31, 2018	427	60.00	—	\$—
Vested and expected to vest at March 31, 2018	427	60.00	—	\$—
Exercisable at March 31, 2018	427	60.00	—	\$—

The intrinsic values in the table above represent the total pre-tax intrinsic value which is the difference between the Company's closing stock price and the exercise price multiplied by the number of options. The expense related to stock option awards for the years ended March 31, 2018, 2017, and 2016 was \$13, \$277, and \$1,097, respectively. There were no options exercised in the years ended March 31, 2018, 2017, and 2016.

The table below shows the movement in unvested options from March 31, 2017 to March 31, 2018.

	Shares	Weighted Average Grant Date Fair Value	Aggregate Grant Date Fair Value
Unvested at March 31, 2017	17	\$15.80	\$ 275
Vested	(17)	15.80	(275)
Unvested at March 31, 2018	—	\$ —	\$ —

As of March 31, 2018, there are no stock option awards remaining.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 11 – Stock-Based Compensation (continued)

Restricted Stock

Restricted stock is common stock that is both nontransferable and forfeitable unless and until certain conditions are satisfied. The fair value of restricted shares is determined on grant date and is amortized over the vesting period.

Restricted Stock	Shares	Weighted Average Grant Date Fair Value
Restricted at March 31, 2015	—	\$ —
Granted	23	18.42
Vested	(23)	18.42
Restricted at March 31, 2016	—	—
Granted	28	16.74
Vested	(28)	16.74
Restricted at March 31, 2017	—	—
Granted	28	26.05
Vested	(28)	26.05
Restricted at March 31, 2018	—	—

As of March 31, 2018, there was no restricted stock awards remaining. Expense recognized due to the vesting of restricted stock awards was \$441, \$469 and \$417 for the years ended March 31, 2018, 2017, and 2016, respectively.

Restricted Stock Units

Restricted stock units differ from restricted stock in that zero shares are issued until restrictions lapse. Certain restricted stock units vest ratably over a three-year period and others vest 50% in the first year and 25% in each of the second and third years. The fair value of the restricted stock units is determined on the grant date and is amortized over the vesting period.

Restricted Stock Units	Shares	Weighted Average Grant Date Fair Value
Outstanding at March 31, 2015	58	\$34.18
Granted	58	14.73
Vested	(25)	35.16
Forfeited	(2)	38.50
Outstanding at March 31, 2016	89	21.28
Granted	64	17.19
Vested	(48)	25.43
Forfeited	(1)	22.41
Outstanding at March 31, 2017	104	16.84
Granted	58	11.75
Vested	(45)	17.61
Forfeited	(1)	17.99
Outstanding at March 31, 2018	116	14.01

As of March 31, 2018, there was \$1,095 of remaining unamortized deferred compensation associated with these restricted stock units that will be expensed over the remaining service period through August 15, 2019. Expense recognized due to the vesting of these awards was \$682, \$805 and \$1,113 during the years ended March 31, 2018, 2017, and 2016 respectively.

On August 13, 2015, the Company's shareholders approved an exchange offer that would allow certain employees to surrender options and receive restricted stock units in exchange for these options. The offer was made on September 14, 2015 and applied only to grants made during years 2012 and 2013 that had an exercise price of \$60.00 following the reverse stock split on June 26, 2015. The exchange offer was consummated as of October 13, 2015 with no changes in the timing or material amount of expense recognized for stock based compensation.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 11 – Stock-Based Compensation (continued)**Performance-Based Restricted Stock Units**

Performance-based restricted stock units may vest at the end of either a two- or three-year performance period but the level of the awards to be earned at the end of the performance period is contingent upon attainment of specific business performance goals. If certain minimum performance levels are not attained, no compensation will be earned. The awards are variable in that compensation could range from zero to 200% of the plan's target contingent on the performance level attained. The table below includes the maximum number of restricted stock units that may be earned under the plan.

Performance-Based Restricted Stock Units	Shares	Weighted Average Grant Date Fair Value
Outstanding as of March 31, 2015	83	\$35.52
Granted	30	10.11
Forfeited	(61)	38.50
Outstanding as of March 31, 2016	52	17.33
Granted	56	17.76
Forfeited	(23)	26.81
Outstanding as of March 31, 2017	85	15.06
Granted	57	11.75
Forfeited	—	—
Outstanding as of March 31, 2018	142	13.71

As of March 31, 2018, the Company anticipates that no performance-based restricted stock units will vest resulting in no expense over the remaining service life through August 15, 2019. Expense recognized due to the expected vesting of these awards was \$(202) during the year ended March 31, 2016. There was no expense recognized for the years ending March 31, 2018 and 2017.

Cash-Settled Awards

Cash-settled awards differ from the Company's other awards in that no shares will be issued and the cumulative compensation expense is recognized as a liability rather than equity. Under both of the current cash-settled awards, the fair value of the award is equal to the period-end closing price of one share. The liability recognized will be the product of the fair value multiplied ratably by the expired vesting term. The expense related to these awards is derived by appropriately adjusting the value of the liability. As a result, the expense will be variable as the value of the liability will increase or decrease subject to the period-end closing price.

Cash-Settled Restricted Stock Units

Cash-settled restricted stock units vest ratably over the first, second and third anniversaries of the date of award.

Cash-Settled Restricted Stock Units	Shares	Weighted Average Grant Date Fair Value
Outstanding as of March 31, 2016	29	\$26.85
Vested	(14)	26.84
Forfeited	(2)	25.82
Outstanding as of March 31, 2017	13	27.01
Vested	(13)	27.05
Forfeited	—	—
Outstanding as of March 31, 2018	—	—

As of March 31, 2018, there was no remaining unamortized deferred compensation associated with these restricted stock units that will be expensed over the remaining service period through August 13, 2017. Expense recognized due to the vesting of these awards was \$54, \$161 and \$488 during the years ended March 31, 2018, 2017, and 2016, respectively.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 11 – Stock-Based Compensation (continued)**Cash-Settled Performance-Based Restricted Stock Units**

Cash-settled performance-based restricted stock units vest at the end of a three-year performance period but the level of the award to vest is subject to similar performance criteria as the performance-based restricted stock units described above. The awards are also variable in that they range from zero to 200% of the plan's target contingent on the performance level attained.

The table below includes the maximum number of restricted stock units that may be earned under the plan.

Cash-Settled Performance-Based Restricted Stock Units	Shares	Weighted Average Grant Date Fair Value
Outstanding as of March 31, 2016	42	\$27.10
Forfeited	(42)	27.10
Outstanding as of March 31, 2017	—	—
Forfeited	—	—
Outstanding as of March 31, 2018	—	—

As of March 31, 2018, there are no performance-based restricted stock units outstanding. Expense recognized due to the expected vesting of these awards was \$(39) during the year ended March 31, 2017. There was no expense recognized for the year ending March 31, 2017.

Note 12 – Income Taxes**Accounting for Uncertainty in Income Taxes**

As of March 31, 2018, 2017, and 2016, the Company's unrecognized tax benefits totaled \$8,342, \$15,196, and \$16,675, respectively, of which \$8,038 would impact the Company's March 31, 2018 effective tax rate if recognized. The following table presents the changes to unrecognized tax benefits during the years ended March 31, 2018, 2017, and 2016:

	2018	2017	2016
Balance at April 1	\$15,196	\$16,675	\$17,752
Increase for current year tax positions	482	275	24
Reduction for prior year tax positions	(7,296)	(1,764)	(223)
Impact of changes in exchange rates	(40)	10	(878)
Balance at March 31	\$ 8,342	\$15,196	\$16,675

The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense. During the years ended March 31, 2018 and 2017, the Company accrued (reduced) interest, penalties and related exchange losses pertaining to unrecognized tax benefits of \$791 and \$255, respectively. As of March 31, 2018, accrued interest and penalties totaled \$1,936 and \$1,218, respectively. During the year ending March 31, 2018, the Company reduced its accrued interest and penalties by \$148 related to the expiration of statute of limitations. As of March 31, 2017, accrued interest and penalties totaled \$1,545 and \$818, respectively.

During the fiscal year ending March 31, 2018, the Company's total liability for unrecognized tax benefits, including the related interest and penalties, and associated exchange losses, decreased from \$17,558 to \$11,496. The change in the liability for unrecognized tax benefits relates to expiration of statute of limitations of approximately \$258 and decreases related to prior period positions of approximately \$5,804.

The Company expects to continue accruing interest expenses related to the remaining unrecognized tax benefits. Additionally, the Company may be subject to fluctuations in the unrecognized tax liability due to currency exchange rate movements.

It is reasonably possible that the Company will settle positions currently accrued for \$2,692 in the next twelve months. In addition, it is reasonably possible that the Company's unrecognized tax benefits may decrease in the next twelve months by \$271 due to the expiration of the statute of limitations, but the Company must acknowledge circumstances can change due to unexpected developments in the law. In certain jurisdictions, tax authorities have challenged positions that the Company

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 12 – Income Taxes (continued)**Accounting for Uncertainty in Income Taxes** (continued)

has taken that resulted in recognizing benefits that are material to its financial statements. The Company believes it is more likely than not that it will prevail in these situations and accordingly have not recorded liabilities for these positions. The Company expects the challenged positions to be settled at a time greater than twelve months from its balance sheet date.

The Company and its subsidiaries file a U.S. federal consolidated income tax return as well as returns in several U.S. states and a number of foreign jurisdictions. As of March 31, 2018, the Company's earliest open tax year for U.S. federal income tax purposes was its fiscal year ended March 31, 2015; however, the Company's net operating loss carryovers from prior periods remain subject to adjustment. Open tax years in state and foreign jurisdictions generally range from three to six years.

Income Tax Provision

The components of income (loss) before income taxes, equity in net income of investee companies, and minority interests consisted of the following:

	Years Ended March 31,		
	2018	2017	2016
U.S.	\$(86,087)	\$(87,963)	\$(55,073)
Non-U.S.	69,958	48,321	146,747
Total	<u>\$(16,129)</u>	<u>\$(39,642)</u>	<u>\$ 91,674</u>

The details of the amount shown for income taxes in the Statements of Consolidated Operations and Comprehensive Income (Loss) follow:

	Years Ended March 31,		
	2018	2017	2016
Current			
Federal	\$ 8,247	\$ (926)	\$ —
State	—	—	—
Non-U.S.	22,972	23,974	26,476
	<u>\$ 31,219</u>	<u>\$23,048</u>	<u>\$26,476</u>
Deferred			
Federal	\$(98,785)	\$ —	\$ —
State	—	—	—

(in thousands)

Note 12 – Income Taxes (continued)

Income Tax Provision (continued)

The reasons for the difference between income tax expense based on income before income taxes, equity in net income of investee companies and minority interests and the amount computed by applying the U.S. statutory federal income tax rate to such income are as follows:

	Years Ended March 31,		
	2018	2017	2016
Tax expense (benefit) at U.S. statutory rate	\$ (5,098)	\$(13,875)	\$ 32,086
Effect of non-U.S. income taxes	(2,137)	(6,410)	(15,131)
Tax on future remittances	(22,735)	3,736	23,734
Foreign tax credits expiration	1,328	—	47,552
Change in valuation allowance	(106,804)	13,748	(47,135)
Increase (decrease) in reserves for uncertain tax positions	(5,871)	264	(1,203)
Change in tax rates	66,935	(308)	2,480
Exchange effects and currency translation	8,282	6,046	15,492
Permanent items	31	4,322	(1,161)
Write-down of state tax loss carryovers	—	6,430	—
Nontaxable gain—Zimbabwe subsidiary reconsolidation	—	—	(26,551)
Write-down of withholding tax recoverable	—	8,990	—
Deductible dividends	(3,338)	(968)	(3,064)
Withholding tax expense	1,868	1,572	4,417
Benefit of other tax credits	(3,176)	(1,152)	(113)
Nondeductible interest	1,052	1,085	812
Transition tax after foreign tax credits	10,899	—	—
Actual tax expense (benefit)	<u>\$ (58,764)</u>	<u>\$ 23,480</u>	<u>\$ 32,215</u>

The deferred tax liabilities (assets) are comprised of the following:

	March 31, 2018	March 31, 2017
Deferred tax assets:		
Reserves and accruals	\$ (8,320)	\$ (24,308)
Tax credits	(5,146)	(7,286)
Tax loss carryforwards	(101,884)	(125,601)
Derivative transactions	(1,038)	(669)
Postretirement and other benefits	(15,766)	(28,512)
Unrealized exchange loss	(4,923)	(4,046)
Other	(3,895)	(8,471)
Gross deferred tax assets	(140,972)	(198,893)
Valuation allowance	19,742	131,774
Total deferred tax assets	<u>\$(121,230)</u>	<u>\$ (67,119)</u>
Deferred tax liabilities:		
Unremitted earnings of foreign subsidiaries	\$ 5,854	\$ 30,581
Intangible assets	5,801	8,397
Fixed assets	7,992	7,242
Total deferred tax liabilities	<u>\$ 19,647</u>	<u>\$ 46,220</u>
Net deferred tax asset	<u>\$(101,583)</u>	<u>\$ (20,899)</u>

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 12 – Income Taxes (continued)

Income Tax Provision (continued)

The following table presents the breakdown between deferred tax (assets) liabilities:

	<u>March 31, 2018</u>	<u>March 31, 2017</u>
Noncurrent asset	\$(130,520)	\$(38,507)
Noncurrent liability	28,937	17,608
Net deferred tax asset	<u>\$(101,583)</u>	<u>\$(20,899)</u>

During the year ended March 31, 2018, the net deferred tax asset balance decreased by \$9,300 for certain adjustments not included in the deferred tax expense (benefit), primarily for deferred tax (assets) liabilities of \$9,346 established through purchase accounting and other items not included in the deferred tax expense (benefit).

For the year ended March 31, 2018, the valuation allowance decreased by \$112,032 which is inclusive of \$(274) related to adjustments booked to other comprehensive income and \$286 due to currency translation adjustments. The valuation allowance decreased primarily due to the release of the U.S. valuation allowance for tax reform, which totaled \$98,605. The valuation allowance is based on the Company's assessment that it is more likely than not that certain deferred tax assets, primarily foreign tax credits and net operating loss carryovers, will not be realized in the foreseeable future. This is principally due to the impact of U.S. tax reform, which is described in further detail below.

At March 31, 2018, the Company has U.S. federal tax loss carryovers of \$396,493, non-U.S. tax loss carryovers of \$72,236, and U.S. state tax loss carryovers of \$652,760. The U.S. federal tax loss carryovers will expire in 2030 and thereafter. Of the non-U.S. tax loss carryovers, \$32,491 will expire within the next five years, \$31,721 will expire in later years, and \$8,024 can be carried forward indefinitely. Of the U.S. state tax loss carryovers, \$2,022 will expire within the next five years and \$650,738 will expire thereafter. The Company is recognizing a tax benefit related to tax losses generated in the current year of \$15,420 and \$1,899 to be utilized in U.S. and foreign jurisdictions, respectively, not subject to a valuation allowance. At March 31, 2018, the Company has foreign tax credit carryovers in the U.S. of \$4,459, of which \$2,663 will expire within the next five years. As of March 31, 2018, the Company had Canadian investment tax credit carryforwards of approximately \$387 that will expire beyond five years.

The Company's estimate of the \$66,310 deferred tax benefit due to the remeasurement of the U.S. deferred tax assets and liabilities is a provisional amount under the SEC staff's guidance, which is described in further detail below. Many of the year-end deferred tax balances include estimated timing differences and estimates of events that have not yet occurred such as payments expected to be made during fiscal year 2019 that are deductible on 2018 tax returns. These deferred tax assets and liabilities are likely to change over the measurement period as the Company finalizes the effect of the tax rate change. Changes in tax regulations in non-U.S. jurisdictions resulted in a tax benefit of \$88, largely related to a deferred tax benefit from remeasuring the Company's Turkey and Argentina deferred tax liabilities due to a corporate rate reduction.

Enactment of Tax Cuts and Jobs Act ("Tax Act")

On December 22, 2017, the Tax Cuts and Jobs Act (the "Tax Act") was enacted into law. The Tax Act resulted in significant revisions to the U.S. Federal corporate income tax law by, among other things, reducing the corporate income tax rate beginning after January 1, 2018 to 21%, implementing a modified territorial tax system that includes a one-time transition tax on deemed repatriated earnings of foreign subsidiaries and limiting the tax deductions for interest expense. In response, the SEC staff issued Staff Accounting Bulletin No. 118 which allows issuers to recognize provisional estimates of the impact of the Tax Act in their financial statements, or, in circumstances where estimates cannot be made, to disclose and recognize at a later date. The reasonable estimate is subject to adjustment during a "measurement period", not to exceed one year from date of enactment, until the accounting is complete.

As of March 31, 2018, the Company has not completed its accounting related to the enactment of the Tax Act. Initial analysis was prepared as of December 31, 2017 and the preliminary effects, a net tax benefit of \$59,431, were recorded in the Company's quarterly financial statements. This net benefit is primarily driven by the release of the valuation allowance on the U.S. federal net deferred tax asset and other effects of tax reform totaling a net tax benefit of \$92,606, partially offset by the transition tax expense net of foreign tax credits of \$33,175. The reversal of the U.S. federal valuation allowance was due to anticipated future limitation of interest expense deductions in the U.S. which the Company believes will allow it to be able to realize the deferred tax asset within the period that net operating losses may be carried forward. This number has been revised at March 31, 2018 to be a net benefit of \$78,333. The change in estimate is primarily driven by updating the analysis

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA *(continued)*

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(continued)*

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 12 – Income Taxes *(continued)*

Enactment of Tax Cuts and Jobs Act (“Tax Act”) *(continued)*

of the transition tax due to additional instructional guidance to the Tax Act issued by the regulatory bodies in the U.S. and specifically the impact of the availability of foreign tax credits to offset the transition tax. In total, the net transition tax liability reduced from \$33,175 to \$10,899.

The Company remeasured its U.S. deferred tax assets and liabilities based on the rates at which they are expected to reverse in the future with no tax impact due to an equal reduction in valuation allowance. As such, the deferred tax assets decreased approximately \$66,310. Since these deferred tax assets and liabilities were offset with a full valuation allowance at the time of the remeasurement, the decrease in deferred tax assets from the tax rate change was fully offset by a corresponding decrease in valuation allowance

In reaching these estimates, the Company utilized all available guidance and notices issued by the regulatory bodies in the U.S., including the U.S. Department of the Treasury prior to May 30, 2018. However, these estimates are not capable of finalization given the lack of guidance available in interpreting these new laws, as well as the complexity in acquiring the data required to calculate the impact on the Company’s tax accounts. The Company will revise and conclude its accounting as and when additional information is obtained, which in many cases is contingent on the timing of issuance of regulatory guidance.

For these reasons, the Company notes that the ultimate impact may differ from these provisional amounts due to, among other things, additional analysis, changes in interpretations and assumptions the Company has made, and changes based on additional regulatory guidance that may be issued. Acknowledging this uncertainty, accounting for the impacts of the Tax Act is expected to be completed within the provided measurement period. Any future adjustments made to the provisional effects will be reported as a component of income tax expense from continuing operations in the reporting period in which any such adjustments are determined.

Finally, the Company continues to analyze the impact of provisions which will be effective in future years. Relevant to the current financial statements, the Company’s selection of an accounting policy with respect to the new Global Intangible Low-Taxed Income (“GILTI”) tax rules will depend, in part, analyzing its foreign income to determine whether it expects the impact of GILTI will be at the local entity level, and how deferred tax accounting for this impact would impact its tax provision. The Company is currently in the process of analyzing its structure in light of the Tax Act and, as a result, has not yet not made a policy election regarding whether to record deferred taxes in accordance with the GILTI provisions.

The Company is also considering other impacts of the 2017 enactment of the Tax Act including, but not limited to effects on the Company’s indefinite reinvestment assertion. Accordingly, the Company continues to evaluate its assertion with respect to accumulated foreign earnings subject to the deemed repatriation tax and the Company also continues to evaluate the amount of earnings that are indefinitely reinvested. A provisional non-cash deferred income tax expense of \$6,654 has been made for U.S. and foreign taxes that may result from future remittances of foreign earnings of \$95,741. While the Company was able to make a reasonable estimate of these impacts, it may be affected by other analyses related to the Tax Act. For the earnings of foreign subsidiaries expected to be indefinitely reinvested overseas, no accruals were recorded for U.S. or foreign taxes that may result from future remittances of approximately \$389,568 at March 31, 2018 and \$353,032 at March 31, 2017. Determination of the amount of any unrecognized deferred income tax liability on these reinvested earnings is not practicable.

Note 13 – Employee Benefits

Retirement Benefits

The Company has multiple benefit plans at several locations. The Company has a defined benefit plan that provides retirement benefits for substantially all U.S. salaried personnel based on years of service rendered, age, and compensation. The Company also maintains various other Excess Benefit and Supplemental Plans that provide additional benefits to (1) certain individuals whose compensation and the resulting benefits that would have actually been paid are limited by regulations imposed by the Internal Revenue Code and (2) certain individuals in key positions. In addition, a Supplemental Retirement Account Plan (“SRAP”), a defined contribution program, is maintained.

The Company’s policy is to contribute amounts to the plans sufficient to meet or exceed funding requirements of local governmental rules and regulations.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 13 – Employee Benefits (continued)

Retirement Benefits (continued)

Additional non-U.S. plans sponsored by certain subsidiaries cover substantially all of the full-time employees located in Germany, Turkey and the United Kingdom.

During the year ended March 31, 2017, the Company’s activity of cash payments triggered settlement accounting. The settlement accounting resulted in a settlement loss of \$1,454 recorded in Selling, General, and Administrative Expenses (“SGA”) and a reduction in Accumulated Other Comprehensive Loss as of March 31, 2017. In addition, as a result of payments made to employees due to involuntary dismissal in a foreign subsidiary, special termination benefits of \$14 were recorded in SGA and the benefit obligation.

During the nine months ended December 31, 2015, the Company announced that the U.S. Pension Plan would be frozen effective January 1, 2016. This change is accounted for as a curtailment and resulted in a curtailment loss of \$1,062 and a reduction in the benefit obligation and accumulated other comprehensive income of \$2,534 as of December 31, 2015. The curtailment loss is recorded in restructuring and asset impairment charges.

A reconciliation of benefit obligations, plan assets and funded status of the plans at March 31, 2018 and 2017, the measurement dates, is as follows:

	U.S. Plans		Non-U.S. Plans	
	March 31, 2018	March 31, 2017	March 31, 2018	March 31, 2017

Note 13 – Employee Benefits (continued)

Retirement Benefits (continued)

In order to project the long-term investment return for the total portfolio, estimates are prepared for the total return of each major asset class over the subsequent 10-year period, or longer. Those estimates are based on a combination of factors including the current market interest rates and valuation levels, consensus earnings expectations and historical long-term risk premiums. To determine the aggregate return for the pension trust, the projected return of each individual asset class is then weighted according to the allocation to that investment area in the trust’s long-term asset allocation policy.

A March 31 measurement date is used for the pension, postretirement, other postemployment, and employee savings plans. The expected long-term rate of return on assets was determined based upon historical investment performance, current asset allocation, and estimates of future investment performance by asset class.

The following assumptions were used to determine the benefit obligations disclosed for the pension plans at March 31, 2018 and 2017:

	U.S. Plans		Non-U.S. Plans	
	March 31,		March 31,	
	2018	2017	2018	2017
Discount rate	3.91%	3.90%	2.75%	2.59%
Rate of increase in future compensation	Not applicable	Not applicable	6.04%	5.91%

Net gain (loss) and prior service credits (costs) for the combined U.S. and non-U.S. pension plans expected to be amortized from accumulated comprehensive income into net periodic benefit cost during fiscal 2019 is \$(971) and \$(760), respectively.

Plan Assets

The Company’s asset allocations and the percentage of the fair value of plan assets at March 31, 2018 and 2017 by asset category are as follows:

(percentages)	Target Allocations	U.S. Plans		Non-U.S. Plans	
	March 31, 2018	March 31, 2018	March 31, 2017	March 31, 2018	March 31, 2017
Asset category:					
Cash and cash equivalents	— %	4.6%	3.7%	1.3%	34.5%
Equity securities	36.0%	33.9%	34.3%	36.4%	19.6%
Debt securities	24.0%	22.5%	22.4%	24.8%	10.6%
Real estate and other investments	40.0%	39.0%	39.6%	37.5%	35.3%
Total	100.0%	100.0%	100.0%	100.0%	100.0%

The Company’s investment objectives are to generate consistent total investment return to pay anticipated plan benefits, while minimizing long-term costs and portfolio volatility. Financial objectives underlying this policy include maintaining plan contributions at a reasonable level relative to benefits provided and assuring that unfunded obligations do not grow to a level that would adversely affect the Company’s financial health. Manager and composite portfolio performance is measured against investment objectives and objective benchmarks, including but not limited to: Citibank 90 Day Treasury Bill, Bloomberg Barclays Intermediate Govt/Credit, Bloomberg Barclays Aggregate, Russell 1000 Value, Russell 1000 Growth, Russell 2500 Value, Russell 2500 Growth, MSCI EAFE, HFR Absolute Return, HFR Equity Hedge, and others. The Portfolio Objective is to exceed the actuarial return on assets assumption. Management and the Plan’s Consultant regularly review portfolio allocations and periodically rebalance the portfolio to the targeted allocations according to the guidelines set forth in the Company’s investment policy. Equity securities do not include the Company’s common stock. The Company’s diversification and risk control processes serve to minimize the concentration and experience of risk. There are no significant concentrations of risk, in terms of sector, industry, geography or individual company or companies.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA *(continued)***NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** *(continued)*

Alliance One International, Inc. and Subsidiaries

*(in thousands)***Note 13 – Employee Benefits** *(continued)***Plan Assets** *(continued)*

- (1) In accordance with new guidance retrospectively adopted in the prior year, certain investments that are measured at fair value using the net asset value have not been classified in the fair value hierarchy.

The following table summarizes the plan assets recognized and measured at fair value using the net asset value and the inputs used to determine the fair value:

	March 31, 2018				March 31, 2017			
	Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Notice Period	Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Notice Period
Diversified funds	8	None	Self-Liquidating	None	33	None	Self-Liquidating	None
Real estate and other . . .	5,700	None	Quarterly	60 Days	4,124	None	Quarterly	60 Days

The fair value hierarchy is described in Note 18 “Fair Value Measurements” to the “Notes to Consolidated Financial Statements.” For all periods presented, the Company had no Non-U.S. pension plan assets measured at fair value using the net asset value. Plan assets are recognized and measured at fair value in accordance with the accounting standards regarding fair value measurements. The following are general descriptions of asset categories, as well as the valuation methodologies and inputs used to determine the fair value of each major category of plan assets.

Cash and cash equivalents include short-term investment funds, primarily in diversified portfolios of investment grade money market instruments and are valued using quoted market prices or other valuation methods, and thus classified within Level 1 or Level 2 of the fair value hierarchy.

Equity securities are investments in common stock of domestic and international corporations in a variety of industry sectors, and are valued primarily using quoted market prices and generally classified within Level 1 in the fair value hierarchy.

Fixed income securities include U.S. Treasuries and agencies, debt obligations of foreign governments and debt obligations in corporations of domestic and foreign issuers. The fair value of fixed income securities are based on observable prices for identical or comparable assets, adjusted using benchmark curves, sector grouping, matrix pricing, broker/dealer quotes and issuer spreads, and are generally classified within Level 1 or Level 2 in the fair value hierarchy.

Investments in equity and fixed income mutual funds are publicly traded and valued primarily using quoted market prices and generally classified within Level 1 in the fair value hierarchy. Investments in commingled funds used in certain non-U.S. pension plans are not publicly traded, but the underlying assets held in these funds are traded in active markets and the prices for these assets are readily observable. Holdings in these commingled funds are generally classified as Level 2 investments.

Real estate investments include those in private limited partnerships that invest in various commercial and residential real estate projects both domestically and internationally as well as publicly traded REIT securities. The fair values of private real estate assets are typically determined by using income and/or cost approaches or comparable sales approach, taking into consideration discount and capitalization rates, financial conditions, local market conditions and the status of the capital markets, and thus are generally classified within Level 3 in the fair value hierarchy. Publicly traded REIT securities are valued primarily using quoted market prices and are generally classified within Level 1 in the fair value hierarchy.

Diversified investments include those in limited partnerships that invest in companies that are not publicly traded on a stock exchange and mutual funds with an absolute return strategy. Limited partnership investment strategies in non-publicly traded companies include leveraged buyouts, venture capital, distressed investments and investments in natural resources. These investments are valued using inputs such as trading multiples of comparable public securities, merger and acquisition activity and pricing data from the most recent equity financing taking into consideration illiquidity, and thus are classified within Level 3 in the fair value hierarchy. Mutual fund investments with absolute return strategies are publicly traded and valued using quoted market prices and are generally classified within Level 1 in the fair value hierarchy.

Cash Flows*Contributions*

The Company expects to contribute \$3,586 to its U.S. benefits plans and \$3,144 to its non-U.S. benefit plans in fiscal 2019.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 13 – Employee Benefits (continued)

Cash Flows (continued)

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

	Pension Benefits		Other Benefits	
	U.S. Plans	Non-U.S. Plans	U.S. Plans	Non-U.S. Plans
	March 31, 2018	March 31, 2018	March 31, 2018	March 31, 2018
2019	\$ 9,203	\$ 3,625	\$ 337	\$139
2020	7,281	2,669	316	148
2021	6,779	3,083	317	148
2022	6,910	2,824	273	148
2023	6,617	3,058	273	148
Years 2024-2028	30,401	16,795	1,329	739

The Company sponsors 401(k) savings plans for most of its salaried employees located in the United States. The Supplemental Executive Retirement Plan and the Pension Equity Plan were replaced by the SRAP during 2008. The Company also maintains defined contribution plans at various foreign locations. The Company's contributions to the defined contribution plans were \$4,627, \$4,843, and \$3,978 the years ended March 31, 2018, 2017, and 2016.

Postretirement Health and Life Insurance Benefits

The Company provides certain health and life insurance benefits to retired U.S. employees (and their eligible dependents) who meet specified age and service requirements. The plan excludes new employees after September 2005 and caps the Company's annual cost commitment to postretirement benefits for retirees. The Company retains the right, subject to existing agreements, to modify or eliminate these postretirement health and life insurance benefits in the future.

The Company provides certain health and life insurance benefits to retired Brazilian directors and certain retirees located in Europe including their eligible dependents who meet specified requirements.

During the three months ended September 30, 2015, the Company announced that certain U.S. postretirement medical benefits would no longer be provided effective January 1, 2016. This change is accounted for as a negative plan amendment and resulted in a reduction of \$4,461 in the benefit obligation and in accumulated other comprehensive income as of September 30, 2015. The Company retains the right, subject to existing agreements, to modify or eliminate the postretirement medical benefits.

The following assumptions were used to determine non-U.S. Plan postretirement benefit obligations at March 31:

	2018	2017
Discount rate	8.66%	9.74%
Health care cost trend rate assumed for next year	8.00%	8.00%
Ultimate trend rate	8.00%	8.00%

A one-percentage-point change in assumed health care cost trend rates would not have a significant effect on the amounts reported for health care plans.

For the years ended March 31, 2018 and 2017, the annual rate of increase in the per capita cost of covered health care benefits is not applicable as the Company's annual cost commitment to the benefits is capped and not adjusted for future medical inflation.

Additional retiree medical benefits are provided to certain U.S. individuals in accordance with their employment contracts. For the year ended March 31, 2018 the additional cost related to these contracts was \$12.

Prior service credits of \$710 and unrecognized net actuarial losses of \$438 are expected to be amortized from accumulated comprehensive income into postretirement healthcare benefits net periodic benefit cost for the combined U.S. and non-U.S. postretirement benefits during fiscal 2019.

Benefit obligation, ending	\$ 4,372	\$ 4,361	\$ 2,112	\$ 2,085
Change in plan assets				
Fair value of plan assets, beginning	\$ —	\$ —	\$ —	\$ —
Employer contributions	356	347	126	102
Benefits paid	(356)	(347)	(126)	(102)
Fair value of plan assets, ending	\$ —	\$ —	\$ —	\$ —
Net amount recognized	<u>\$(4,372)</u>	<u>\$(4,361)</u>	<u>\$(2,112)</u>	<u>\$(2,085)</u>

Amounts recognized in the Consolidated Balance Sheet consist of:

	U.S. Plans	U.S. Plans	Non-U.S. Plans	Non-U.S. Plans
	March 31, 2018	March 31, 2017	March 31, 2018	March 31, 2017
Accrued current benefit liability recorded in Accrued Expenses and Other Current Liabilities	\$ (377)	\$ (339)	\$ (139)	\$ (142)
Accrued non-current benefit liability recorded in Pension, Postretirement and Other Long-Term Liabilities	<u>(3,995)</u>	<u>(4,022)</u>	<u>(1,973)</u>	<u>(1,943)</u>
Net amount recognized	<u>\$(4,372)</u>	<u>\$(4,361)</u>	<u>\$(2,112)</u>	<u>\$(2,085)</u>

There are no plan assets for 2018 or 2017. Net periodic benefit costs included the following components:

	U.S. Plans			Non-U.S. Plans		
	2018	March 31, 2017	2016	2018	March 31, 2017	2016
Service cost	\$ 7	\$ 8	\$ 23	\$ 7	\$ 4	\$ 3
Interest cost	141	132	247	190	148	113
Prior service credit	(698)	(698)	(349)	(11)	(11)	(10)
Actuarial losses (gains)	418	413	432	40	3	(2)
Net periodic benefit costs (income)	<u>\$(132)</u>	<u>\$(145)</u>	<u>\$ 353</u>	<u>\$226</u>	<u>\$144</u>	<u>\$104</u>

The Company continues to evaluate ways to better manage these benefits and control their costs. Any changes in the plan or revisions to assumptions that affect the amount of expected future benefits may have a significant effect on the amount of the reported obligation and annual expense. The Company expects to contribute \$516 to its combined U.S. and non-U.S. postretirement benefit plans in fiscal 2019.

Employees in operations located in certain other foreign operations are covered by various postretirement benefit arrangements. For these foreign plans, the cost of benefits charged to income was not material in the years ended March 31, 2018, 2017, and 2016.

Note 14 – Segment Information

The Company purchases, processes, sells, and stores leaf tobacco and other specialty products. Tobacco is purchased in more than 35 countries and shipped to approximately 90 countries. The sales, logistics, and billing functions of the Company are primarily concentrated in service centers outside of the producing areas to facilitate access to major customers. Within

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 14 – Segment Information (continued)

certain quality and grade constraints, tobacco is fungible and, subject to these constraints, customers may choose to fulfill their needs from any of the areas where the Company purchases tobacco.

Management evaluates performance using information included in management reports. The Company has five geographic operating segments: Africa, Asia, Europe, North America, and South America. In reviewing these operations, the Company concluded that the economic characteristics of North America were dissimilar from the other operating segments. Based on this fact, the Company is disclosing North America separately and has aggregated the remaining four operating segments, Africa, Asia, Europe, and South America into one reportable segment “Other Regions.” The Company concluded that these operating segments have similar long term financial performance and similar economic characteristics in each of the following areas:

- the nature of the products and services;
- the nature of the production processes;
- the type or class of customer for their products and services;
- the methods used to distribute their products or provide their services; and
- the nature of the regulatory environment.

The investment in new business lines are part of the Company’s transformation process and are being developed. For the year ended March 31, 2018, these new business lines are being reported in the Other Regions reportable segment.

Selling, logistics, billing, and administrative overhead, including depreciation, which originates primarily from the Company’s corporate and sales offices, are allocated to the segments based upon segment operating income. The Company reviews performance data from purchase through sale based on the source of the product and all intercompany transactions are allocated to the region that either purchases or processes the tobacco.

Note 15 – Foreign Currency Translation

The financial statements of foreign entities included in the consolidated financial statements have been translated to U.S. dollars in accordance with generally accepted accounting principles.

The financial statements of foreign subsidiaries, for which the local currency is the functional currency, are translated into U.S. dollars using exchange rates in effect at period end for assets and liabilities and average exchange rates during each reporting period for results of operations. Adjustments resulting from translation of financial statements are reflected as a separate component of other comprehensive income.

The financial statements of foreign subsidiaries, for which the U.S. dollar is the functional currency and which have certain transactions denominated in a local currency, are remeasured into U.S. dollars. The remeasurement of local currencies into U.S. dollars creates remeasurement adjustments that are included in net income. Exchange (gains) losses in the years ended March 31, 2018, 2017, and 2016 were \$5,396, \$(11,816), and \$6,498, respectively, and are included in the respective statements of income in cost of sales and income taxes.

Note 16 – Contingencies and Other Information**Non-Income Tax**

The government in the Brazilian State of Parana (“Parana”) issued a tax assessment on October 26, 2007 with respect to local intrastate trade tax credits that result primarily from tobacco transferred between states within Brazil. The assessment for intrastate trade tax credits taken is \$3,963 and the total assessment including penalties and interest at March 31, 2018 is \$13,392. The Company believes it has properly complied with Brazilian law and will contest any assessment through the judicial process. Should the Company lose in the judicial process, the loss of the intrastate trade tax credits would have a material impact on the financial statements of the Company.

The Company also has local intrastate trade tax credits in the Brazil State of Rio Grande do Sul and the State of Santa Catarina. These jurisdictions permit the sale or transfer of excess credits to third parties, however approval must be obtained from the tax authorities. The Company has agreements with the state governments regarding the amounts and timing of credits that can be sold. The tax credits have a carrying value of \$1,298. The intrastate trade tax credits are monitored for impairment in future periods based on market conditions and the Company’s ability to use or sell the tax credits.

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 16 – Contingencies and Other Information *(continued)*

Non-Income Tax *(continued)*

In 1969, the Brazilian government created a tax credit program that allowed companies to earn IPI tax credits (“IPI credits”) based on the value of their exports. The government began to phase out this program in 1979, which resulted in numerous lawsuits between taxpayers and the Brazilian government. The Company has a long legal history with respect to credits it earned while the IPI credit program was in effect. In 2001, the Company won a claim related to certain IPI credits it earned between 1983 and 1990. The Brazilian government appealed this decision and numerous rulings and appeals were rendered on behalf of both the government and the Company from 2001 through 2013. Because of this favorable ruling, the Company began to use these earned IPI credits to offset federal taxes in 2004 and 2005, until it received a Judicial Order to suspend the IPI offsetting in 2005. The value of the federal taxes offset in 2004 and 2005 was \$24,142 and the Company established a reserve on these credits at the time of offsetting as they were not yet realizable due to the legal uncertainty that existed. Specifically, the Company extinguished other federal tax liabilities using IPI credits and recorded a liability in Pension, Postretirement and Other Long-Term Liabilities to reflect that the credits were not realizable at that time due to the prevalent legal uncertainty. On March 7, 2013, the Brazilian Supreme Court rendered a final decision in favor of the Company that recognized the validity of the IPI credits and secured the Company’s right to benefit from the IPI credits earned from March 1983 to October 1990. This final decision expressly stated the Company has the right to the IPI credits. The Company estimates the total amount of the IPI credits to be approximately \$94,316 at March 31, 2013. Since the March 2013 ruling definitively (without the government’s ability to appeal) granted the Company the ownership of the IPI credits generated between 1983 and 1990, the Company believes the amount of IPI credits that were used to offset other federal taxes in 2004 and 2005 are realizable beyond a reasonable doubt. Accordingly, at March 31, 2013, the Company recorded the \$24,142 IPI credits it realized in the Statements of Consolidated Operations in Other Income. No further benefit has been recognized pending the outcome of the judicial procedure to ascertain the final amount as those amounts have not yet been realized.

Other

Mindo, S.r.l. (“Mindo”), the purchaser in 2004 of the Company’s Italian subsidiary Dimon Italia, S.r.l., asserted claims against a subsidiary of the Company arising out of that sale transaction in an action filed before the Court of Rome on April 12, 2007. The claim involved a guaranty letter issued by a consolidated subsidiary of the Company in connection with the sale transaction, and sought the recovery of €7.4 million plus interest and costs. On November 11, 2013, the court issued its judgment in favor of the Company’s subsidiary, rejecting the claims asserted by Mindo. On December 23, 2014, Mindo appealed the judgment of the Court of Rome to the Court of Appeal of Rome. Subsequent to March 31, 2018, the parties agreed to and consummated a settlement of Mindo’s claims, which settlement included the payment by the Company’s subsidiary of an immaterial amount.

In addition to the above-mentioned matter, certain of the Company’s subsidiaries are involved in other litigation or legal matters incidental to their business activities, including tax matters. While the outcome of these matters cannot be predicted with certainty, the Company is vigorously defending them and does not currently expect that any of them will have a material adverse effect on its business or financial position. However, should one or more of these matters be resolved in a manner adverse to its current expectation, the effect on the Company’s results of operations for a particular fiscal reporting period could be material.

In accordance with generally accepted accounting principles, the Company records all known asset retirement obligations (“ARO”) for which the liability can be reasonably estimated. Currently, it has identified an ARO associated with one of its facilities that requires it to restore the land to its initial condition upon vacating the facility. The Company has not recognized a liability under generally accepted accounting principles for this ARO because the fair value of restoring the land at this site cannot be reasonably estimated since the settlement date is unknown at this time. The settlement date is unknown because the land restoration is not required until title is returned to the government, and the Company has no current or future plans to return the title. The Company will recognize a liability in the period in which sufficient information is available to reasonably estimate its fair value.

Note 17 – Sale of Receivables

During the year ended March 31, 2018, the Company sold trade receivables to unaffiliated financial institutions under two accounts receivable securitization programs. Under the first program, the Company continuously sells a designated pool of trade receivables to a special purpose entity, which in turn sells 100% of the receivables to an unaffiliated financial

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 17 – Sale of Receivables (continued)

institution. This program allows the Company to receive a cash payment and a deferred purchase price receivable for sold receivables. Following the sale and transfer of the receivables to the special purpose entity, the receivables are isolated from the Company and its affiliates, and upon the sale and transfer of the receivables from the special purpose entity to the unaffiliated financial institutions, effective control of the receivables is passed to the unaffiliated financial institution, which has all rights, including the right to pledge or sell the receivables. During the year ended March 31, 2018, the investment limit of this program was adjusted from up to \$100,000 to up to \$155,000 trade receivables.

The Company incurred program costs of \$1,130 and \$1,468 during the years ended March 31, 2018 and 2017 which were included in Other Income in the Statements of Consolidated Operations. The program requires a minimum level of deferred purchase price to be retained by the Company in connection with the sales. The Company continues to service, administer and collect the receivables on behalf of the special purpose entity and receives a servicing fee of 0.5% of serviced receivables per annum. As the Company estimates the fee it receives in return for its obligation to service these receivables is at fair value, no servicing assets or liabilities are recognized. Servicing fees recognized were not material and are recorded as a reduction of Selling, General and Administrative Expenses within the Statements of Consolidated Operations.

The agreement for the second securitization program allows the Company to receive a cash payment and a deferred purchase price receivable for sold receivables. This is an uncommitted program, whereby the Company offers receivables for sale to the respective unaffiliated financial institution which are then subject to acceptance by the unaffiliated financial institution. Following the sale and transfer of the receivables to the unaffiliated financial institution, the receivables are isolated from the Company and its affiliates, and effective control of the receivables is passed to the unaffiliated financial institution, which has all rights, including the right to pledge or sell the receivables. The Company receives no servicing fee from the unaffiliated financial institution and as a result, has established a servicing liability based upon unobservable inputs, primarily discounted cash flow. During February 2018, the investment limit under the second program was adjusted from up to \$110,000 trade receivables to up to \$125,000 trade receivables.

Under the programs, all of the receivables sold for cash are removed from the Consolidated Balance Sheets and the net cash proceeds received by the Company are included as cash provided by operating activities in the Statements of Consolidated Cash Flows. A portion of the purchase price for the receivables is paid by the unaffiliated financial institutions in cash and the balance is a deferred purchase price receivable, which is paid as payments on the receivables are collected from account debtors. The deferred purchase price receivable represents a continuing involvement and a beneficial interest in the transferred financial assets and is recognized at fair value as part of the sale transaction. The deferred purchase price receivables are included in Trade and Other Receivables, Net in the Consolidated Balance Sheets and are valued using unobservable inputs (i.e., level three inputs), primarily discounted cash flow. As servicer of these facilities, the Company may receive funds that are due to the unaffiliated financial institutions which are net settled on the next settlement date. As of March 31, 2018 and 2017, Trade and Other Receivables, Net in the Consolidated Balance Sheets has been reduced by \$10,858 and \$11,985 as a result of the net settlement. See Note 18 “Fair Value Measurements” to the “Notes to Consolidated Financial Statements” for further information.

The difference between the carrying amount of the receivables sold under these programs and the sum of the cash and fair value of the other assets received at the time of transfer is recognized as a loss on sale of the related receivables and recorded in Other Income in the Statements of Consolidated Operations.

The following table summarizes the Company’s accounts receivable securitization information as of March 31:

	2018	2017
Receivables outstanding in facility as of March 31:	\$228,621	\$200,084
Beneficial interest as of March 31	\$ 48,715	\$ 38,206
Servicing liability as of March 31	\$ 81	\$ 101
Cash proceeds for the twelve months ended March 31:		
Cash purchase price	\$694,517	\$648,730
Deferred purchase price	263,670	231,658
Service fees	473	492
Total	<u>\$958,660</u>	<u>\$880,880</u>

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 18 – Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. A three-level valuation hierarchy based upon observable and non-observable inputs is utilized. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. Preference is given to observable inputs. These two types of inputs create the following fair value hierarchy:

- Level 1 - Quoted prices for identical assets or liabilities in active markets.
- Level 2 - Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable.
- Level 3 - Significant inputs to the valuation model are unobservable.

The Company's financial assets and liabilities measured at fair value include derivative instruments, securitized beneficial interests and guarantees. The application of the fair value guidance to non-financial assets and liabilities primarily includes assessments of investments in subsidiaries, goodwill and other intangible assets and long-lived assets for potential impairment.

The following tables present the Company's assets and liabilities measured at fair value on a recurring basis:

	March 31, 2018			March 31, 2017		
	Level 2	Level 3	Total Assets / Liabilities, at Fair Value	Level 2	Level 3	Total Assets / Liabilities, at Fair Value
Assets						
Derivative financial instruments	\$ —	\$ —	\$ —	\$ 943	\$ —	\$ 943
Securitized beneficial interests	—	48,715	48,715	—	38,206	38,206
Total assets	\$ —	\$48,715	\$ 48,715	\$ 943	\$38,206	\$ 39,149
Liabilities						
Long-term debt	\$911,264	\$ 895	\$912,159	\$867,825	\$ —	\$867,825
Guarantees	—	5,864	5,864	—	7,126	7,126
Total liabilities	\$911,264	\$ 6,759	\$918,023	\$867,825	\$ 7,126	\$874,951

Following are descriptions of the valuation methodologies the Company uses to measure different assets or liabilities at fair value.

Level 2 measurements

- Debt: The fair value of debt is based on the market price for similar financial instruments or model-derived valuations whose inputs are observable. The primary inputs to the valuation include market expectations, the Company's credit risk, and the contractual terms of the debt instrument.
- Derivatives: The fair value of derivatives is based on the discounted cash flow analysis of the expected future cash flows. The primary inputs to the valuation include forward yield curves, implied volatilities, LIBOR rates, and credit valuation adjustments.

Level 3 measurements

- Guarantees: The fair value of guarantees is based on the discounted cash flow analysis of the expected future cash flows or historical loss rates. Should the loss rate change 10% or 20%, the fair value of the guarantee at March 31, 2018 would change by \$762 or \$1,514, respectively.
- Securitized beneficial interests: The fair value of securitized beneficial interests is based on the present value of future expected cash flows.

Note 18 – Fair Value Measurements (continued)

Reconciliation of Change in Recurring Level 3 Balances

The following tables present the changes in Level 3 instruments measured on a recurring basis.

	Securitized Beneficial Interests	Guarantees
Beginning balance March 31, 2016	\$ 40,368	\$ 7,350
Sales of receivables/issuance of guarantees	229,580	7,478
Settlements	(227,495)	(5,921)
Losses recognized in earnings	(4,247)	(1,781)
Ending balance at March 31, 2017	38,206	7,126
Sales of receivables/issuance of guarantees	281,601	6,178
Settlements	(265,363)	(6,979)
Losses recognized in earnings	(5,729)	(461)
Ending balance at March 31, 2018	\$ 48,715	\$ 5,864

The amount of total losses included in earnings for the years ended March 31, 2018 and 2017 attributable to the change in unrealized losses relating to assets still held at the respective dates was \$2,531 and \$1,722 on securitized beneficial interests.

Gains and losses included in earnings are reported in Other Income.

Information About Fair Value Measurements Using Significant Unobservable Inputs

The following table summarizes significant unobservable inputs and the valuation techniques thereof for the periods ended March 31, 2018 and 2017:

	Fair value at March 31, 2018	Valuation Technique	Unobservable Input	Range (Weighted Average)
Securitized Beneficial Interests	\$48,715	Discounted Cash Flow	Discount Rate	4.4% to 5.0%
			Payment Speed	76 days to 111 days
	4,441	Historical Loss	Historical Loss	2.6% to 10.0%
Tobacco Supplier Guarantees	1,423	Discounted Cash Flow	Market Interest Rate	15.0% to 35.0%
	Fair value at March 31, 2017	Valuation Technique	Unobservable Input	Range (Weighted Average)
Securitized Beneficial Interests	\$38,206	Discounted Cash Flow	Discount Rate	2.9% to 4.4%
			Payment Speed	46 days to 101 days
	2,850	Historical Loss	Historical Loss	10.0% to 16.0%
Tobacco Supplier Guarantees	4,276	Discounted Cash Flow	Market Interest Rate	16.5% to 38.0%

- Low	14.40	15.35	13.75	12.30	12.30

(1) Does not add due to quarterly change in average shares outstanding.

Third Quarter 2018 - On December 22, 2017, the U.S. Tax Cuts and Jobs Act was enacted. A tax benefit of \$59,431 was recorded as a reasonable estimate for the impact of this act related to a valuation allowance release on remeasured net deferred tax assets in the U.S. and other effects of tax reform partially offset by estimated transition taxes net of foreign tax credits.

Note 20 – Reconsolidation of MTC

On March 31, 2016, the Company regained control over its wholly owned Zimbabwe subsidiary, Mashonaland Tobacco Company, LTD (“MTC”). The change in control was a result of the change in the political landscape in Zimbabwe and the recent issuance of clarifications to the indigenization laws within Zimbabwe that resulted in the elimination of significant doubt about the Company’s ability to control MTC. The reconsolidation of MTC has been treated as a purchase business combination and as such, the assets and liabilities have been recorded at fair value.

Since the Company already owned 100% of the equity interest, no consideration was transferred as part of the reconsolidation. The Company estimated the fair value of its equity interest in MTC at March 31, 2016 to be \$94,395 based on a discounted cash flow model. The amount was then allocated to the fair value of the acquired assets and liabilities, which were recorded on the Consolidated Balance Sheet at March 31, 2016. The fair value of the recognized assets included a

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA (continued)**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (continued)

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 20 – Reconsolidation of MTC (continued)

customer relationship intangible asset of \$24,830 and goodwill of \$13,669. The goodwill and intangible asset balance of \$38,499 is within the “Other Regions” segment and is non-deductible for tax purposes. Included within this balance is goodwill attributable in part to the workforce of the acquired business and a finite-lived customer relationship intangible of \$24,830, which is being amortized over a useful life of fifteen years. The effect of the reconsolidation under the purchase business combination guidance resulted in a gain of \$106,203 which has been recorded and shown in “Other Income (Expense)” on the Statement of Consolidated Operations for the year ended March 31, 2016. The gain is the result of the fair value of the equity interest of \$94,395 and the reversal of a deferred liability of \$11,808.

The unaudited pro forma information in the table below summarizes the combined results of the Company and MTC for the year ended March 31, 2016 as if the companies were combined as of April 1, 2014. The pro forma information is presented for informational purposes only and is not indicative of the results of operations that would have been achieved had the reconsolidation taken place at the beginning of each period or results of future periods. The following information has been adjusted for intercompany eliminations as required for consolidation accounting.

<i>thousands</i>	Unaudited Proforma Twelve Months Ended March 31, <u>2016</u>
Revenues	\$1,912,324
Operating income	114,615
Net loss	(31,409)

Note 21 – Acquisitions**Acquisition of Canada’s Island Garden**

On January 25, 2018, a Canadian subsidiary of the Company, acquired 75% of the equity in CIG. CIG is fully licensed to produce and sell medicinal cannabis in the Canadian Province of Prince Edward Island. CIG sells its products directly to patients and through distributors. The Company acquired its interest in CIG in exchange for consideration consisting of approximately \$32,468 cash, subject to certain post-closing adjustments. The consolidation of CIG has been treated as a purchase business combination and as such, the fair value of the assets and liabilities has been recorded at their fair value. The fair value of the non-controlling interest was \$8,117.

For the year ended March 31, 2018, the Company incurred \$499 of acquisition-related expenses, primarily consisting of consulting fees, which were accounted for separately from the business combination and expensed as incurred within Selling, General, and Administrative Expenses in the Consolidated Statements of Operations.

Following the acquisition, the Company recorded certain post-closing purchase price adjustments which had no impact on the purchase price. The acquisition allowed the Company to expand its product portfolio into the medical cannabis industry in Canada. The following table summarizes the fair values of the assets acquired and liabilities assumed as of January 25, 2018 (in thousands, except per share data):

Cash and cash equivalents	\$ 436
Other receivables	442

The amounts of revenue, operating loss, and net loss of CIG in the consolidated statements of income from and including January 25, 2018 to March 31, 2018 were \$235, \$(412), and \$(288), respectively. As a result, the impact to basic and diluted earnings per share was \$(0.03) and \$(0.03), respectively.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA *(continued)*

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(continued)*

Alliance One International, Inc. and Subsidiaries

(in thousands)

Note 21 – Acquisitions *(continued)*

Acquisition of Canada’s Island Garden *(continued)*

Unaudited pro forma information summarizes the combined results of the Company and CIG for the years ended March 31, 2018 as if the companies were combined as of April 1, 2016. The pro forma information is presented for informational purposes only and is not indicative of the results of operations that would have been achieved had the reconsolidation taken place at the beginning of each period or results of future periods. The following information has been adjusted for intercompany eliminations as required for consolidation accounting: unaudited pro forma revenue, operating loss, and net loss for the twelve months ended March 31, 2018 were \$2,008, \$(466), and \$(181), respectively. Unaudited pro forma basic and diluted earnings per share were \$(0.02) and \$(0.02), respectively.

Note 22 - Subsequent Events

Debt Repurchase

In April 2018, the Company purchased \$10,868 of its Second Lien Notes on the open market. All purchased securities were canceled leaving \$652,078 of the Second Lien Notes outstanding. Associated costs paid were \$27 and related discounts were \$(312) resulting in net cash repayment of \$10,556.

Acquisitions

On April 2, 2018, the Company acquired a 51% equity position in Humble Juice Co., LLC (“Humble”), a manufacturer and distributor of e-liquids.

Accounts Receivable Securitization Programs

On May 31, 2018, the Company decided to amend one of its accounts receivable securitization programs. This amendment decreased the facility amount from \$155,000 to \$125,000.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and the Board of Directors of Alliance One International, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Alliance One International, Inc. and subsidiaries (the “Company”) as of March 31, 2018, and 2017, the related consolidated statements of operations, comprehensive income (loss), stockholders’ equity, and cash flows, for each of the three years in the period ended March 31, 2018, and the related notes and the schedule listed in the Index at Item 15 (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2018, and 2017, and the results of its operations and its cash flows for each of the three years in the period ended March 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company’s internal control over financial reporting as of March 31, 2018, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 6, 2018, expressed an unqualified opinion on the Company’s internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Deloitte & Touche LLP

Raleigh, North Carolina
June 6, 2018

We have served as the Company’s auditor since its fiscal 2006.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Annual Report. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this Annual Report, our disclosure controls and procedures are effective in that they provide reasonable assurances that the information we are required to disclose in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods required by the SEC's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Our internal control system was designed to provide reasonable assurance to our management and Board of Directors regarding the preparation and fair presentation of published financial statements.

Our internal control over financial reporting includes those policies and procedures that:

- i. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
- ii. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- iii. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

In making the assessment of internal control over financial reporting, our management used the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework (2013 framework). We excluded CIG and Goldleaf from the assessment of internal control over financial reporting as of March 31, 2018 as these entities were acquired in fiscal 2018 and were not significant to the consolidated financial statements. Collectively, CIG and Goldleaf represented 2.7% of total assets, less than 0.1% of revenue, and less than 0.5% net income as of March 31, 2018. Based on that assessment and those criteria, management has concluded that our internal control over financial reporting was effective as of March 31, 2018.

The effectiveness of our internal control over financial reporting as of March 31, 2018 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report in Item 8 of this Annual Report.

Changes in Internal Control over Financial Reporting

There have been no changes to our internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during the fourth quarter of fiscal 2018 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

In the course of our ongoing preparations for making management's report on internal control over financial reporting as required by Section 404 of the Sarbanes-Oxley Act of 2002, from time to time we have identified areas in need of improvement and have taken remedial actions to strengthen the affected controls as appropriate. We make these and other changes to enhance the effectiveness of our internal controls over financial reporting, which do not have a material effect on our overall internal control.

We will continue to evaluate the effectiveness of our disclosure controls and procedures and internal control over financial reporting on an ongoing basis and will take action as appropriate.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and the Board of Directors of Alliance One International, Inc.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Alliance One International, Inc. and subsidiaries (the “Company”) as of March 31, 2018, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2018, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the financial statements as of and for the year ended March 31, 2018 of the Company, and our report dated June 6, 2018, expressed an unqualified opinion on those financial statements.

Explanatory Paragraph

As described in *Management’s Report on Internal Control Over Financial Reporting*, management excluded from its assessment the internal control over financial reporting at Canada’s Island Garden (CIG) and Goldleaf Pharm, Inc., which were acquired on January 25, 2018 and January 29, 2018, respectively, and whose collective financial statements constitute 2.7% of total assets, less than 0.1% of revenue, and less than 0.5% of net income of the consolidated financial statement amounts as of and for the year ended March 31, 2018. Accordingly, our audit did not include the internal control over financial reporting at CIG and Goldleaf Pharm, Inc.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management’s Report on Internal Control Over Financial Reporting*. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

FORWARD-LOOKING STATEMENTS

Alliance One International's 2018 Annual Report may include certain "forward-looking" statements. These forward-looking statements generally are identified by words such as "expects" or "anticipates" and words of similar effect and include statements regarding the Company's financial and operating goals. Actual results may differ materially from those expressed in any forward-looking statements due to a variety of factors, including those discussed in "Risk Factors" and elsewhere in the Annual Report and in our filings with the Securities and Exchange Commission.
