DEAR SHAREHOLDERS:

OUR BEST YEAR EVER

This has been our best year ever. By now you have read about our record fourth quarter and annual results and have understood that 2007 was the best year in the history of our Company. Our focused strategy to be the innovative leader in our field continues to drive our success. This strategy, along with our experienced senior management team and all of our talented employees, enabled us to achieve record results. The capital and human effort we have dedicated to researching and developing new technologies is yielding more convenient dispensing systems than ever and we are well positioned to continue to do so in the future.

In 2007, net sales grew 18% to nearly \$1.9 billion and we completed our 42nd year of consecutive top line growth. When excluding changes in exchange rates and the impact of acquisitions, our organic sales grew 10% on strong demand for our unique dispensing systems sold to the fragrance / cosmetic, personal care, pharmaceutical and food / beverage markets. Our established geographic presence in 19 different countries allowed us to benefit as regions such as South America, Asia and Eastern Europe experienced significant growth. We also finished the year with record earnings as our EPS from continuing operations jumped 36% to \$1.95 on a fully diluted basis, compared to \$1.43 a year ago. These record results were achieved through volume increases, better capacity utilization and cost containment efforts during a period of rising raw material costs, particularly plastic and metal materials.

Source: Standard & Poor's

There continues to be two key drivers to our business that transcend across each of our business segments (Beauty & Home, Closures and Pharma). One of the drivers is the consumer's desire for more products that are convenient. At the same time, marketers are striving to differentiate their products more than ever before in order to stand apart from the competition and win the consumer's interest. These have been at the heart of what we do best – creating the world's most innovative dispensing systems and touching the lives of more and more people every day. These trends, in conjunction with our broad and innovative product offering, resulted in increased sales and profits across all of our business segments in 2007.

BEAUTY & HOME

Our Beauty & Home segment, which is primarily comprised of sales of pumps and aerosol valves to all markets other than the pharmaceutical market, continues to be our largest segment and represented 53% of our total sales in 2007. For the first time ever, our Beauty & Home segment sales exceeded \$1 billion, increasing 20% over the prior year. Organic sales increased 12%, mainly due to strong demand from the fragrance / cosmetic and personal care markets. Exchange rates contributed 7% and acquired companies represented 1% of the sales increase. The sales growth, in conjunction with our focus on cost efficiencies, helped boost the Beauty & Home segment's income to \$99.6 million, an increase of 38% over the prior year.

Demand for our products by the fragrance / cosmetic market was particularly strong in 2007. This demand was driven by several factors including new fragrance launches, growth in cosmetic products, increases in the number of men's grooming products, strength of demand from the emerging markets as well as Eastern Europe and Russia, and further penetration of the fragrance sample market by our miniature sampling systems. We are excited about the opportunities in the sampling category and we have further penetrated this market with our miniature spray pumps for vials of fragrances as well as our patented thin sampling system known as *Imagin*. We also developed a thin, innovative sample system for cosmetic lotions and creams that we will be introducing to the market in 2008.

Increased demand for our bag-on-valve systems and aerosol valve accessories contributed to the increase in sales to the personal care market. A growing number of consumer products began hitting the shelves in 2007 utilizing our bag-on-valve technology, including facial care products, sun screens, and for the first time, a dental cleaning gel which was introduced in Europe. Our broad line of accessories, such as our locking actuator for aerosol valves which eliminates the need for a traditional overcap, has helped us create additional value for our customers.

CLOSURES

Our Closures segment, which represented 26% of our 2007 sales, reported a 12% increase in sales to \$493 million. Organic sales increased 5%, mainly driven by demand from the food and household markets. Exchange rates contributed 5% and acquired companies represented 2% of the sales increase. This segment faced weakness in demand from personal care customers in the U.S. during the second half of the year. Strong growth in both Europe and Latin America made up for the weakness in U.S. sales. The year 2007 was another challenging year for our Closures segment as the increased cost of plastic resin, particularly in the U.S., again required diligent attention to the historically accepted practice of increasing our selling prices in order to mitigate the adverse cost effects. This segment's income increased 14% over the prior year reaching \$50.0 million for the first time.

Our patented no-drip *SimpliSqueeze*® system that incorporates a silicone valve continues to gain acceptance for a variety of applications, especially for inverted no-drip packages in the food / beverage market. During the year, we introduced a conical-shaped silicone-tipped system that allows for pinpoint dispensing of small amounts of product. The first product on the market with this new design was an acne medication in Europe. We expect that interest in this system will grow in the future, especially for cosmetic products where minute amounts of viscous products need to be carefully dispensed. We are also excited about several of our recent innovations which are quickly gaining acceptance in the market, including our new beverage closure, lightweight pour spout, and one-handed easy-open flip-top closure.

DIVIDENDS DECLARED

SALES (\$ IN MILLIONS)

PRESENT IN 19
DIFFERENT COUNTRIES

PHARMA

Our Pharma segment, which represented 21% of our 2007 sales, reported a solid 22% increase in sales to \$394 million. Organic sales increased 14% while exchange rate changes contributed 8%. Our Pharma segment's income increased 31% to \$106.2 million. This was the first year that this segment's income crossed the \$100 million mark.

Demand increased for our metered dose valves as well as for our nasal spray pumps. Several recent product introductions by our pharmaceutical customers, including two new treatments for asthma that use our metered dose valves and a new allergy medication that uses one of our nasal spray pumps, helped drive the strong demand. During the year, we started a facility expansion project to increase the size of one of our pharmaceutical plants in France. This construction is expected to be completed around the middle of 2008 and will provide additional capacity for some of our existing products as well as space for future production of new products, such as our dose-indicating inhaler for asthma treatments. This capital expansion is a sign of our commitment to this important market and part of our strategy to remain the leading manufacturer of metered dose inhaler valves and nasal dispensing devices for the pharmaceutical industry.

SHAREHOLDER RETURNS

If you are a long-term shareholder of AptarGroup, you know that we manage our business in order to create value for all stakeholders and that our Board of Directors actively seeks ways to return value to you. In April 2007, your Board approved a 2-for-1 stock split and increased the annual dividend by 18% to \$.52 per share on a post-split basis. In total for the year, we paid approximately \$34.4 million in dividends to shareholders. We also completed our fourth consecutive year of repurchasing annually over 2 million shares of our outstanding common stock. We spent approximately \$76.4 million on share repurchases in 2007.

STRONG BALANCE SHEET

Our balance sheet remains in terrific shape and allows our Board the opportunity to continue to return value in the way of dividends and share repurchases. In addition, we are well positioned to take advantage of strategic acquisitions going forward. The fruits of our labor to diligently manage our borrowings and consistently generate positive cash flow over the years have enabled us to focus on our business even amidst occasional turbulence in the credit markets. We generated over \$135 million in free cash flow (cash flow from operations less capital expenditures) in 2007 compared to approximately \$90 million in the prior year and finished with a net debt to net capital ratio of 4%. Total cash and equivalents at the end of the year were \$314 million and total stockholders' equity was \$1.1 billion.

LEGACY OF LEADERSHIP

I cannot complete a discussion about our performance in 2007 without recognizing the person who not only led us to such new heights this year, but also helped us maintain our leading position for over a decade. Carl Siebel announced, after over 40 years with AptarGroup, that he would retire at the end of 2007 to spend more time with his family and to pursue personal interests. We are fortunate to have Carl remain a director of our Company so that we might continue to benefit from his guidance. Carl was an exceptional values-based leader who not only understood that the core advantage of AptarGroup was the creative power and dedication of our culturally diverse employees, but even more importantly, he knew how to bring us all together with one vision and one purpose – grow the business with integrity, hard work, and with an eye always on innovation. I am happy to say that I've worked closely with Carl Siebel and Steve Hagge and our executive officer team for the past 15 years. I have seen firsthand how Carl has cultivated our leadership team and made preparations for a smooth transition. On behalf of our employees, customers, Board of Directors and shareholders, I express our deepest gratitude to Carl for his legacy of leadership.

LOOKING FORWARD

We are committed to being the innovative leader in our industry and we are confident that our pipeline of new products will allow us to expand the use of our systems to new niches as they develop and contribute to our growth across all of our segments. Our diverse geographic presence allows us to take advantage of the rapidly growing developing markets, while insulating us from softness in any one region. Also, the diversity of our customer base and end markets – fragrance / cosmetic, personal care, pharmaceutical, food / beverage and household, allows a balanced platform that is not dependent on any one customer or market category.

At the time I am writing this letter to you, there is some uncertainty regarding the economic outlook in the U.S. I would like to assure you that we have faced similar challenges before and that we could not be in any better shape going into 2008 than we are right now. You can expect AptarGroup to continue to grow as we manage our business with the consistency and dedication we have shown our investors since we became a public company in 1993.

PETER PFEIFFER
President and Chief Executive Officer

PART I

ITEM 1. BUSINESS

BUSINESS OF APTARGROUP

Our business was started in the late 1940's, manufacturing and selling aerosol valves in the United States, and has grown primarily through the acquisition of relatively small companies and internal expansion. We were incorporated in Delaware in 1992. In this report, we may refer to AptarGroup, Inc. and its subsidiaries as "AptarGroup" or the "Company".

We are a leading global supplier of a broad range of innovative dispensing systems for the personal care, fragrance/cosmetic, pharmaceutical, household and food/beverage markets. We focus on providing value-added dispensing systems (pumps, closures and aerosol valves) to global consumer product marketers to allow them to differentiate their products and meet consumers' need for convenience.

We have manufacturing facilities located throughout the world including North America, Europe, Asia and South America. We have over 5,000 customers with no single customer accounting for greater than 7% of our 2007 net sales.

Sales of our dispensing systems have traditionally grown at a faster rate than the overall packaging industry as consumers' preference for convenience has increased and product differentiation through packaging design has become more important to our customers. Consumer product marketers have converted many of their products to packages with dispensers that offer the benefit of enhanced shelf appeal, convenience, cleanliness or accuracy of dosage. We expect this trend to continue.

Pumps are finger-actuated dispensing systems that dispense a spray or lotion from non-pressurized containers. The style of pump used depends largely on the nature of the product being dispensed, from small, fine mist pumps used with perfume and pharmaceutical products to lotion pumps for more viscous formulas.

Closures for us are primarily dispensing closures but to a lesser degree can include non-dispensing closures. Dispensing closures are plastic caps, primarily for plastic containers such as bottles and tubes, which allow a product to be dispensed without removing the cap.

Aerosol valves dispense product from pressurized containers. The majority of the aerosol valves that we sell are continuous spray valves, with the balance being metered dose inhaler valves.

AVAILABLE INFORMATION

Our periodic and current reports are available, free of charge, through a link on the Investor Relations page of our website (www.aptagroup.com), as soon as reasonably practicable after the material is electronically filed with, or furnished to, the SEC. The Company has filed the required certificate with the New York Stock Exchange ("NYSE") confirming the Company's compliance with the corporate governance listing standards set out in Section 303A of the NYSE Listed Company Manual. The Company has included as Exhibit 31 to this Annual Report on Form 10-K, certificates of the Chief Executive Officer and Chief Financial Officer of the Company certifying the quality of the Company's public disclosure.

DESCRIPTION OF APTARGROUP'S REPORTING SEGMENTS

FINANCIAL INFORMATION ABOUT SEGMENTS

The Company operates in the packaging components industry, which includes the development, manufacture and sale of consumer product dispensing systems. We are organized into three reportable business segments. Operations that sell spray and lotion dispensing systems and accessories primarily to the personal care, fragrance/cosmetic and household markets form the Beauty & Home segment. Operations that sell dispensing systems to the pharmaceutical market form the Pharma segment. Operations that sell closures to each market served by AptarGroup form the Closures segment. Each of these three business segments is described more fully below. A summary of revenue, by segment, from external customers, profitability and total assets for each of the last three years is shown in Note 18 to the Consolidated Financial Statements in Item 8 (which is incorporated by reference herein).

BEAUTY & HOME

The Beauty & Home segment is our largest segment in terms of revenue and total assets representing 53% and 52% of AptarGroup's Net Sales and Total Assets, respectively. The Beauty & Home segment primarily sells pumps and aerosol valves and accessories to the personal care, household and food/beverage markets and pumps and decorative components to the fragrance/cosmetic market. We believe we are the leading supplier of fragrance/cosmetic and personal care fine mist spray pumps worldwide and the second largest supplier of personal care lotion pumps worldwide. We believe we are also one of the largest continuous spray aerosol valve suppliers worldwide.

Fragrance/Cosmetic. Sales to the fragrance/cosmetic market for Beauty & Home accounted for approximately 60% of the segment's total net sales in 2007. The fragrance/cosmetic market requires a broad range of pump dispensing systems to meet functional as well as aesthetic requirements. A considerable amount of research, time and coordination with the customers' development staff is required to qualify a pump for use with their products. Within the market, we expect the use of pumps to continue to increase, particularly in the cosmetics and sampling sectors of this market. In the cosmetic sector, packaging for certain products such as anti-aging lotions is undergoing a conversion from non-dispensing to pump systems, which continues

to provide us with growth opportunities. We have developed a range of airless dispensing pumps which helps maintain the integrity of the product formula by not exposing it to oxygen. Recently, we launched a successful miniaturized spray sampling system for fragrances and we expect demand for this product to continue to increase and we also launched an innovative patented thin, flat sampling system for fragrance that can be distributed in a variety of ways such as in magazines, catalogues, direct mail or at promotional events. We are working on developing similar sampling systems for the cosmetic market.

Personal Care. Sales to the personal care market for Beauty & Home accounted for approximately 32% of the segment's total net sales in 2007. Personal care products include fine mist spray pumps, lotion pumps and continuous spray aerosol valves. Typical personal care spray pump applications include hair care, sun care and deodorant products. Typical lotion pump applications include skin moisturizers and soap. Typical personal care continuous aerosol valve applications include hair care products, deodorants, shaving cream and most recently sun care lotions. We have seen increased growth rates in sales of our continuous aerosol valves reflecting the success of our valves using bag-on-valve technology. This technology physically separates the propellant from the product to be dispensed. It offers improved integrity of the product content, prevents expulsion of the propellant into the atmosphere and allows spraying of the product in any position. Sun care, tooth gel and nasal saline applications are examples of product applications using this technology.

Household. Sales to the household market for Beauty & Home accounted for approximately 5% of the segment's total net sales in 2007. Household products primarily include either continuous or metered dose spray aerosol valves and to a lesser degree spray pumps. Applications for continuous spray valves include disinfectants, spray paints, insecticides and automotive products. Metered dose valves are used for air fresheners. Spray pump applications primarily include household and industrial cleaners.

Food/Beverage. Sales to the food/beverage market are not a significant part of Beauty & Home sales (approximately 1% of segment net sales in 2007), but are mentioned here as an example of how markets convert from non-dispensing packaging to dispensing packaging using our products. We traditionally sell aerosol valves to this market for cooking sprays and oils and spray pumps for butter substitutes. A major marketer of salad dressings successfully converted from a non-dispensing package to a spray pump application of salad dressings using our products, promoting the spray application as a way to offer portion control and monitor the amount of calories. Recently two additional marketers also decided to convert some of their salad dressings from a non-dispensing package to spray pump applications.

CLOSURES

The Closures segment is our second largest segment in terms of revenue and total assets representing 26% and 18% of AptarGroup's Net Sales and Total Assets, respectively. We believe that we are the largest supplier of dispensing closures in the United States, and the second largest supplier in Europe. We primarily manufacture dispensing closures and, to a lesser degree, non-dispensing closures.

Sales of dispensing closures have grown as consumers worldwide have demonstrated a preference for a package utilizing the convenience of a dispensing closure. At the same time, consumer marketers are trying to differentiate their products by incorporating performance enhancing features such as no-drip dispensing, inverted packaging and directional flow to make packages simpler to use, cleaner and more appealing to consumers. Closures are primarily sold to the personal care, food/beverage and household markets.

Personal Care. Historically, the majority of our dispensing closure sales have been to the personal care market. Sales to the personal care market for Closures accounted for approximately 60% of the segment's total net sales in 2007. Products with dispensing closures include shampoos, shower gels, skin care lotions and toothpaste. While many personal care products in the U.S. and Europe have already converted from non-dispensing to dispensing closures, we expect to benefit from similar conversions in other geographic areas such as Eastern Europe (including Russia), Latin American and Asia. Recent product innovations serving this market include large, wide mouth, easy open jar closures with hinged lids for various products.

Food/Beverage. Sales to the food/beverage market for Closures accounted for approximately 27% of the segment's total net sales in 2007. Sales of dispensing closures to the food/beverage market have increased significantly over the last several years as we continue to see an increase of interest from food/beverage marketers using dispensing closures for their products. Examples of food/beverage products currently utilizing dispensing closures include condiments, salad dressings, syrups, honey, water and dairy creamers. We believe there are good growth opportunities in the food/beverage market reflecting the continued and growing acceptance in this market of our silicone valve dispensing technology, and additional conversion from traditional packages to packages using dispensing closure systems, in particular for the single serve non-carbonated beverage industry.

Household. Sales to the household market for Closures accounted for approximately 10% of the segment's total net sales in 2007. While we have had success worldwide in selling dispensing closures to this market, it has not represented a significant amount of total dispensing closure sales. Products utilizing dispensing closures include dishwashing detergents, laundry care products and household cleaners.

Fragrance/Cosmetic. Sales to the fragrance/cosmetic market are not a significant part of Closures sales (approximately 1% of segment net sales in 2007), but are mentioned here as an example of potential growth areas for the Closures segment. We

are optimistic that we will increase sales to this market with our recent introduction of our Pinpoint dispensing closure with a conical shaped silicone valve tip targeted at cosmetic applications, in particular for eye liner and other applications requiring specific targeted application areas.

PHARMA

While the Pharma segment is our third largest segment in terms of revenue and total assets, accounting for 21% and 15% of AptarGroup's Net Sales and Total Assets, respectively, it is our most profitable segment. We believe we are the leading supplier of pumps and metered dose inhaler valves ("MDI's") to the pharmaceutical market worldwide. Characteristics of this market include (i) governmental regulation of our pharmaceutical customers, (ii) contaminant-controlled manufacturing environments, and (iii) a significant amount of time and research from initially working with pharmaceutical companies at the molecular development stage of a medication through the eventual distribution to the market. We have clean-room manufacturing facilities in China, France, Germany, Switzerland and the United States. We believe that the conversion from traditional medication forms such as pills and syringes to the use of our products for the dispensing of medication will continue to increase.

Pumps sold to the pharmaceutical market deliver medications nasally, orally or topically. Currently the majority of our pumps sold are for allergy, cold or flu treatments. Potential opportunities for conversion from pills and syringes to pump dispensing systems include treatment for vaccines, additional cold and flu treatments, hormone replacement therapies and sexual dysfunction.

MDI's are used for dispensing precise amounts of medication. This aerosol technology allows medication to be broken up into very fine particles, which enables the drug to be delivered typically via the pulmonary system. We work with pharmaceutical companies as they work to phase out the use of chlorofluorocarbon ("CFC") propellants. We continue to increase our market share of MDI's to this market as pharmaceutical companies replace CFC's with alternative propellants and we expect our market share to continue to grow. Currently the majority of our MDI's sold are used for respiratory ailments.

We continue to work on new dispensing systems in this segment such as a dry powder dispensing device and including a dose indicator feature on our MDI's to let the patient know exactly how many doses are left in the container. While we expect that these new products will come to market in the future, it is difficult to estimate when as the rigors of pharmaceutical regulations affects the timing of product introductions by our pharmaceutical customers which use our dispensing systems.

GENERAL BUSINESS INFORMATION

GROWTH STRATEGY

We seek to enhance our position as a leading global supplier of innovative dispensing systems by (i) expanding geographically, (ii) converting non-dispensing applications to dispensing systems, (iii) replacing current dispensing applications with our dispensing products and (iv) developing or acquiring new dispensing technologies.

We are committed to expanding geographically to serve multinational customers in existing and emerging areas. Targeted areas include Eastern Europe (including Russia), Asia and South America. In 2006, we opened a new larger facility in Sao Paulo, Brazil and acquired another company in Brazil that is involved in injection molding and decoration (including serigraphy and hot stamping) of plastic accessories primarily for the fragrance/cosmetics market. We also purchased the remaining 65% of a company in Argentina that produces dispensing closures. In 2005, we opened a new manufacturing facility in India to produce spray pumps for this market and expanded the manufacturing of bag-on-valve systems from Europe to the United States. We also opened in late 2007 a manufacturing facility in Thailand.

We believe significant opportunities exist to introduce our dispensing systems to replace non-dispensing applications. Examples of these opportunities include potential conversion in the food/beverage market for single serve non-carbonated beverages, condiments, cooking oils and salad dressing. In the fragrance/cosmetic market, potential conversion includes creams and lotions currently packaged in jars or tubes using removable non-dispensing closures, converting to lotion pumps or dispensing closures. In the personal care market, in certain developing countries, small sachets still dominate the market. We believe with some of our innovative miniature packaging alternatives this sachet market can eventually be converted to dispensing technology. We have developed and patented a thin dispensing system that can be inserted into magazines to replace the traditional scent strips. We believe this new innovative system will offer growth opportunities, particularly for fragrance samples. We are in the process of developing a similar miniature flat sample for viscous creams as well as a small pump for use on vials for cosmetic lotions.

In addition to introducing new dispensing applications, we believe there are significant growth opportunities in converting existing pharmaceutical delivery systems (syringes or pills) to our more convenient dispensing pump or metered dose aerosol valve systems. An example of a product for which we continue to find new applications is the metered dose aerosol valve. MDI's are used to dispense precise amounts of product in very fine particles from pressurized containers. Traditionally, MDI's were used to deliver medication via the pulmonary route. Additional examples of opportunities in the pharmaceutical market include nasal pumps to dispense treatments for sexual dysfunction, vaccines, cold and flu treatments, and hormone replacement therapies.

We are committed to developing or acquiring new dispensing technologies. Several years ago, we acquired intellectual property (patents, licenses and know how) and equipment relating to certain dry powder dispensing systems. We continue to develop this new technology and hope to have a product to market in the future. Dry powder dispensing technology is an important part of our long-term growth strategy for the pharmaceutical market. In 2005, we acquired a company that

manufactures aerosol valves with bag-on-valve technology. In 2007 we acquired a second company that manufactures bag-on-valve products. This technology physically separates the propellant from the product to be dispensed. It offers improved integrity of the product content, prevents expulsion of the propellant into the atmosphere and allows spraying of the product in any position. We also acquired two companies that manufacture decorative packaging components primarily for the high end of the fragrance/cosmetic market. This technology includes advanced molding capabilities as well as decoration (vacuum metallization and varnishing) of plastic components. We have entered into several exclusive licensing arrangements with third party innovators allowing us to continue to develop new dispensing systems using their technologies which are in various stages of development.

RESEARCH AND DEVELOPMENT

One of our competitive strengths is our commitment to innovation and providing innovative dispensing solutions for our customers. This commitment to innovation is the result of our emphasis on research and development. Our research and development activities are directed toward developing innovative dispensing systems, adapting existing products for new markets or customer requirements, and reducing costs. We have research and development organizations located in the United States, France, Germany and Italy. In certain cases, our customers share in the research and development expenses of customer initiated projects. Occasionally, we acquire or license from third parties technologies or products that are in various stages of development. Expenditures for research and development activities were \$55.9 million, \$48.2 million and \$45.8 million in 2007, 2006 and 2005, respectively.

PATENTS AND TRADEMARKS

We sell a majority of our products under the names used by our business units. The names used by our business units have been trademarked. We customarily seek patent and trademark protection for our products and currently own and have numerous applications pending for United States and foreign patents and trademarks. In addition, certain of our products are produced under patent licenses granted by third parties. We believe that we possess certain technical capabilities in making our products that make it difficult for a competitor to duplicate them.

TECHNOLOGY

Pumps and aerosol valves require the assembly of up to 15 different plastic, metal and rubber components using high-speed equipment. When molding dispensing closures, or plastic components to be used in pump or aerosol valve products, we use advanced plastic injection molding technology, including large cavitation plastic injection molds. We are able to mold within tolerances as small as one one-thousandth of an inch and we manufacture products in a high-speed, cost-effective manner. We have experience in liquid silicone rubber molding that we utilize in our dispensing closure operations and certain of our pump products. We also have technology to decorate plastic components using vacuum metallization and varnishing for the fragrance/cosmetic and personal care markets.

MANUFACTURING AND SOURCING

More than half of our worldwide production is located outside of the United States. In order to augment capacity and to maximize internal capacity utilization (particularly for plastic injection molding), we use subcontractors to supply certain plastic, metal and rubber components. Certain suppliers of these components have unique technical abilities that make us dependent on them, particularly for aerosol valve and pump production. The principal raw materials used in our production are plastic resins and certain metal products. We believe an adequate supply of such raw materials is available from existing and alternative sources. We attempt to offset cost increases through improving productivity and increasing selling prices over time, as allowed by market conditions. Our pharmaceutical products often use specifically approved plastic resin for our customers. Significant delays in receiving components from these suppliers or discontinuance of an approved plastic resin would require us to seek alternative sources, which could result in higher costs as well as impact our ability to supply products in the short term.

SALES AND DISTRIBUTION

Sales of products are primarily through our own sales force. To a limited extent, we also use the services of independent representatives and distributors who sell our products as independent contractors to certain smaller customers and export markets.

BACKLOG

Our sales are primarily made pursuant to standard purchase orders for delivery of products. While most orders placed with us are ready for delivery within 120 days, we continue to experience a trend towards shorter lead times requested by our customers. Some customers place blanket orders, which extend beyond this delivery period. However, deliveries against purchase orders are subject to change, and only a small portion of the order backlog is noncancelable. The dollar amount associated with the noncancelable portion is not material. Therefore, we do not believe that backlog as of any particular date is an accurate indicator of future results.

CUSTOMERS

The demand for our products is influenced by the demand for our customers' products. Demand for our customers' products may be affected by general economic conditions, government regulations, tariffs and other trade barriers. Our customers include many of the largest personal care, fragrance/cosmetic, pharmaceutical, household products and food/beverage marketers in the world. We have over 5,000 customers with no single customer accounting for greater than 7% of

2007 net sales. Over the past few years, a consolidation of our customer base has occurred. This trend is expected to continue. A concentration of customers may result in pricing pressures or a loss of volume. However, this situation also presents opportunities for increasing sales due to the breadth of our product line, our international presence and our long-term relationships with certain customers.

INTERNATIONAL BUSINESS

A significant number of our operations are located outside the United States. Sales in Europe for the years ended December 31, 2007, 2006 and 2005 were approximately 63%, 61% and 60%, respectively, of net sales. We manufacture the majority of units sold in Europe at facilities in the Czech Republic, England, France, Germany, Ireland, Italy, Russia, Spain and Switzerland. Other countries in which we operate include Argentina, Brazil, Canada, China, India, Indonesia, Japan, Mexico and Thailand which when aggregated represented approximately 11%, 10% and 10% of our consolidated sales for the years ended December 31, 2007, 2006 and 2005, respectively. Export sales from the United States were \$95.3 million, \$82.1 million and \$70.9 million in 2007, 2006 and 2005, respectively. For additional financial information about geographic areas, please refer to Note 18 in the Notes to the Consolidated Financial Statements in Item 8 (which is incorporated by reference herein).

FOREIGN CURRENCY

A significant number of our operations are located outside of the United States. Because of this, movements in exchange rates may have a significant impact on the translation of the financial statements of our foreign entities. Our primary foreign exchange exposure is to the Euro, but we have foreign exchange exposure to South American and Asian currencies, among others. We manage our exposures to foreign exchange principally with forward exchange contracts to hedge certain transactions and firm purchase and sales commitments denominated in foreign currencies. A weakening U.S. dollar relative to foreign currencies has an additive translation effect on our financial statements. Conversely, a strengthening U.S. dollar has a dilutive effect. In some cases, we sell products denominated in a currency different from the currency in which the related costs are incurred. Changes in exchange rates on such inter-country sales could materially impact our results of operations.

WORKING CAPITAL PRACTICES

Collection and payment periods tend to be longer for our operations located outside the United States due to local business practices. Historically, we have not needed to keep significant amounts of finished goods inventory to meet customer requirements.

EMPLOYEE AND LABOR RELATIONS

AptarGroup has approximately 8,400 full-time employees. Of the full-time employees, approximately 1,800 are located in North America, 5,200 are located in Europe and the remaining 1,400 are located in Asia and South America. Approximately 100 of the North American employees are covered by a collective bargaining agreement, while the majority of our European employees are covered by collective bargaining arrangements made at either the local or national level in their respective countries. Termination of employees at certain of our international operations could be costly due to local regulations regarding severance benefits. There were no material work stoppages in 2007 and management considers our employee relations to be satisfactory.

COMPETITION

All of the markets in which we operate are highly competitive and we continue to experience price competition in all product lines and markets. Competitors include privately and publicly held entities. Our competitors range from regional to international companies. We expect the market for our products to remain competitive. We believe our competitive advantages are consistent high levels of innovation, quality and service, geographic diversity and breadth of products. Our manufacturing strength lies in the ability to mold complex plastic components in a cost-effective manner and to assemble products at high speeds. Our business is capital intensive and it is becoming more important to our customers to have global manufacturing capabilities. Both of these act as barriers to entry for new competitors wanting to enter our business.

We continue to see competition from low cost Asian suppliers particularly in the low-end fragrance/cosmetic and personal care market. We experience a direct impact on our business by having to compete against imported low cost products from Asia. Indirectly, some fragrance marketers are sourcing their manufacturing requirements including filling of their product in Asia and importing the finished product back into the United States. However, some customers who had bought dispensing packaging products from low cost Asian suppliers in the past have reverted to purchasing our dispensing products again, citing the higher quality offered by our products and the logistical advantage of being closer to the customer.

ENVIRONMENT

Our manufacturing operations primarily involve plastic injection molding and automated assembly processes and, to a limited degree, metal anodization and vacuum metallization of plastic components. Historically, the environmental impact of these processes has been minimal, and we believe we meet current environmental standards in all material respects. To date, our manufacturing operations have not been significantly affected by environmental laws and regulations relating to the environment.

Recently there is increased interest and awareness from the public and our customers in "sustainability" or producing "sustainable products" and measuring "carbon footprints." Several organizations including the World Business Council for Sustainable Development in conjunction with scientists from the United Nations International Government Panel on Climate Change, have developed protocols to identify and calculate the amount of greenhouse gases manufacturing facilities generate.

We are currently evaluating opportunities to cut our energy costs while reducing greenhouse gas emissions and reducing our carbon footprint.

GOVERNMENT REGULATION

Certain of our products are indirectly affected by government regulation. Growth of packaging using aerosol valves has been restrained by concerns relating to the release of certain chemicals into the atmosphere. Both aerosol and pump packaging are affected by government regulations regarding the release of volatile organic compounds ("VOC's") into the atmosphere. Certain states within the United States have regulations that required the reduction in the amount of VOC's that can be released into the atmosphere and the potential exists for this type of regulation to expand worldwide. These regulations required our customers to reformulate certain aerosol and pump products, which may have affected the demand for such products. We own patents and have developed systems to function with alternative propellant and product formulations.

Future government regulations could include medical cost containment policies. For example, reviews by various governments to determine the number of drugs, or prices thereof, that will be paid by their insurance systems could affect future sales to the pharmaceutical industry. Such regulation could adversely affect prices of and demand for our pharmaceutical products. We believe that the focus on the cost effectiveness of the use of medications as compared to surgery and hospitalization provides us with an opportunity to expand sales to the pharmaceutical market. In general, government regulation of our customers' products could impact our sales to them of our dispensing systems.

EXECUTIVE OFFICERS

Our executive officers as of February 28, 2008 were as follows:

Name	Age	Position with the Company
Peter Pfeiffer	59	President and Chief Executive Officer, AptarGroup, Inc.
Mr. Peter Pfeiffer has been President and Chief Executive Officer since January 1, 2008 and was Vice Chairman of the Board since 1993.		
Stephen Hagge	56	Executive Vice President, Chief Operating Officer, and Chief Financial Officer, AptarGroup, Inc.
Mr. Stephen Hagge has been Chief Operating Officer since January 1, 2008 and Executive Vice President and Chief Financial Officer of AptarGroup since 1993.		
Jacques Blanié	61	Executive Vice President, SeaquistPerfect Dispensing Group
Mr. Jacques Blanié has been Executive Vice President of SeaquistPerfect Dispensing Group since 1996.		
François Boutan	65	Vice President Finance, AptarGroup S.A.S.
Mr. François Boutan has served in the capacity of Vice President Finance of AptarGroup S.A.S. since 1998.		
Patrick Doherty	52	President, SeaquistPerfect Dispensing Group
Mr. Patrick Doherty has served as President of SeaquistPerfect Dispensing Group since 2000.		
Olivier Fourment	50	President Aptar Pharma,
Mr. Olivier Fourment has been President of Aptar Pharma since January 1, 2008 and was Co-President of Valois Group since 2000.		
Lothar Graf	58	President, Pfeiffer Group
Mr. Lothar Graf has been President of the Pfeiffer Group since July 1, 2004 and prior to this was Senior Vice President of the Pfeiffer Group, Head of Pharmaceutical Division since 2000.		
Lawrence Lowrimore	63	Vice President-Human Resources, AptarGroup, Inc.
Mr. Lawrence Lowrimore has been Vice President-Human Resources of AptarGroup since 1993.		
Francesco Mascitelli	57	President, Emsar Group
Mr. Francesco Mascitelli has been President of Emsar Group since 2002 and prior to this was Direttore Generale of Emsar S.p.A., an Italian subsidiary, since 1991.		
Emil Meshberg	60	Vice President, AptarGroup, Inc.
Mr. Emil Meshberg has been Vice President of AptarGroup since 1999.		
Olivier de Pous	63	President Aptar Beauty and Home
Mr. Olivier de Pous has been President of Aptar Beauty and Home since January 1, 2008 and was Co-President of Valois Group since 2000.		
Eric Ruskoski	60	President Aptar Closures
Mr. Eric Ruskoski has been President Aptar Closures since January 1, 2008 and was President of Seaquist Closures Group since 1987.		

There were no arrangements or understandings between any of the executive officers and any other person(s) pursuant to which such officers were elected.

ITEM 1A. RISK FACTORS

You should carefully consider the following factors in addition to other information contained in this report on Form 10-K before purchasing any shares of our common stock.

FACTORS AFFECTING APTARGROUP STOCK

Ownership by Certain Significant Shareholders. Neuberger Berman Inc. and State Farm Mutual Automobile Insurance Company each own approximately 12% and 9%, respectively, of our outstanding common stock. If one of these significant shareholders decides to sell significant volumes of our stock, this could put downward pressure on the price of the stock.

Certain Anti-takeover Factors. Certain provisions of our Certificate of Incorporation and Bylaws may inhibit changes in control of AptarGroup not approved by the Board of Directors. These provisions include (i) special voting requirements for business combinations, (ii) a classified board of directors, (iii) a prohibition on stockholder action through written consents, (iv) a requirement that special meetings of stockholders be called only by the board of directors, (v) advance notice requirements for stockholder proposals and nominations, (vi) limitations on the ability of stockholders to amend, alter or repeal our bylaws and (vii) provisions that require the vote of 70% of the whole Board of Directors in order to take certain actions.

FACTORS AFFECTING OPERATIONS OR OPERATING RESULTS

We face strong global competition and our market share could decline. All of the markets in which we operate are highly competitive and we continue to experience price competition in all product lines and segments. Competitors include privately and publicly held entities. Our competitors range from regional to international companies.

We continue to see competition from low cost Asian suppliers in some of our markets, particularly in the low-end fragrance/cosmetic and personal care market. We experience a direct impact on our business by having to compete against imported low cost products from Asia. Indirectly, some fragrance marketers are sourcing their manufacturing requirements including filling of their product in Asia and importing the finished product back into the United States. If we are unable to compete successfully, our market share may decline, which could materially adversely affect our results of operations and financial condition.

We have foreign currency translation and transaction risks that may materially adversely affect our operating results.

A significant number of our operations are located outside of the United States. Because of this, movements in exchange rates may have a significant impact on the translation of the financial statements of our foreign entities. Our primary foreign exchange exposure is to the Euro, but we have foreign exchange exposure to South American and Asian currencies, among others. We manage our exposures to foreign exchange principally with forward exchange contracts to hedge certain transactions and firm purchase and sales commitments denominated in foreign currencies. A weakening U.S. dollar relative to foreign currencies has an additive translation effect on our financial statements. Conversely, a strengthening U.S. dollar has a dilutive effect. In some cases, we sell products denominated in a currency different from the currency in which the related costs are incurred. The volatility of currency exchange rates may materially affect our operating results.

If our unionized employees were to engage in a strike or other work stoppage, our business and operating results could be materially adversely affected.

Approximately 100 of our North American employees are covered by a collective bargaining agreement, while the majority of our European employees are covered by collective bargaining arrangements made either at the local or national level in their respective countries. Although we believe that our relations with our employees are satisfactory, no assurance can be given that this will continue. If disputes with our unions arise, or if our unionized workers engage in a strike or other work stoppage, we could incur higher labor costs or experience a significant disruption of operations, which could have a material adverse effect on our business, financial position and results of operations.

If we were to incur a significant product liability claim above our current insurance coverage, our operating results could be materially adversely affected.

Approximately 21% of our net sales are made to customers in the pharmaceutical industry. If our devices fail to operate as intended, medication prescribed for patients may be under administered, or may be over administered. The failure of our devices to operate as intended may result in a product liability claim against us. We believe we maintain adequate levels of product liability insurance coverage. A product liability claim or claims in our Pharma segment or our other segments in excess of our insurance coverage may materially adversely affect our business, financial position and results of operations.

The success or failure of our customers' products particularly in the pharmaceutical market may materially affect our operating results and financial condition.

In the pharmaceutical market, the proprietary nature of our customers' products and the success or failure of their products in the market using our dispensing systems may have a material impact on our operating results and financial condition. We may potentially work for years on modifying our dispensing device to work in conjunction with a customer's drug formulation. If the customer's product is not successful on the market, the time and money spent may not be recovered. On the contrary, a successful product launch from one of our pharmaceutical customers may have a material positive impact on our operating results and financial condition.

Higher raw material costs and an inability to increase our selling prices may materially adversely affect our operating results and financial condition.

Raw material costs increased significantly over the past few years and we have generally been able to increase selling prices to cover increased costs. In the future, market conditions may prevent us from passing

these increased costs on to our customers through timely price increases. In addition, we may not be able to improve productivity or realize our ongoing cost reduction programs sufficiently to help offset the impact of these increased raw material costs. As a result, higher raw material costs could result in declining margins and operating results.

We have approximately \$223 million in recorded goodwill and changes in future business conditions could cause this asset to become impaired, requiring write-downs that would reduce our operating income. We evaluate the recoverability of goodwill amounts annually, or when evidence of potential impairment exists. The annual impairment test is based on several factors requiring judgment. A decrease in expected reporting unit cash flows or changes in market conditions may indicate potential impairment of recorded goodwill and, as a result, our operating results could be materially adversely affected. See “Critical Accounting Policies and Estimates” in Part II, Item 7 (which is incorporated by reference herein).

ITEM 1B. UNRESOLVED STAFF COMMENTS

The Company has no unresolved comments from the SEC.

ITEM 2. PROPERTIES

We lease or own our principal offices and manufacturing facilities. None of the owned principal properties is subject to a lien or other encumbrance material to our operations. We believe that existing operating leases will be renegotiated as they expire, will be acquired through purchase options or that suitable alternative properties will be leased on acceptable terms. We consider the condition and extent of utilization of our manufacturing facilities and other properties to be generally good, and the capacity of our plants to be adequate for the needs of our business. The locations of our principal manufacturing facilities, by country, are set forth below:

ARGENTINA

Buenos Aires (1 & 3)

BRAZIL

Sao Paulo (1 & 3)
Maringá Paraná (1)

CHINA

Suzhou (1,2 & 3)

CZECH REPUBLIC

Ckyne (3)

FRANCE

Annecy (1 & 2)
Charleval (1)
Le Neubourg (1)
Le Vaudreuil (2)
Oyonnax (1 & 3)
Poincy (3)
Verneuil Sur Avre (1)

GERMANY

Böhringen (1)
Dortmund (1)
Eigeltingen (2)
Freyung (3)
Menden (1)

INDIA

Himachal Pradesh (1)

IRELAND

Ballinasloe, County Galway (1)
Tourmakeady, County Mayo (1)

ITALY

Manoppello (1)
Milan (1)
San Giovanni Teatino (Chieti) (1)

MEXICO

Queretaro (1 & 3)

RUSSIA

Vladimir (3)

SWITZERLAND

Messovico (2)
Neuchâtel (1)

UNITED KINGDOM

Leeds, England (3)

UNITED STATES

Cary, Illinois (1)
Congers, New York (1 & 2)
Libertyville, Illinois (3)
McHenry, Illinois (1)
Midland, Michigan (3)
Mukwonago, Wisconsin (3)
Stratford, Connecticut (1)
Torrington, Connecticut (1)

(1) Locations of facilities manufacturing for the Beauty & Home segment.

(2) Locations of facilities manufacturing for the Pharma segment.

(3) Locations of facilities manufacturing for the Closures segment.

In addition to the above countries, we have sales offices or other manufacturing facilities in Canada, Indonesia, Japan, Spain and Thailand. Our corporate office is located in Crystal Lake, Illinois.

ITEM 3. LEGAL PROCEEDINGS

Legal proceedings we are involved in generally relate to product liability and patent infringement issues. In our opinion, the outcome of pending claims and litigation is not likely to have a material adverse effect on our financial position, results of our operations or our cash flow. The costs to protect these patents are not expected to have a significant impact on the results of operations in the future.

Historically, amounts paid for product liability claims related to our products have not been significant. However, the increase in pump and aerosol valve applications for pharmaceutical products may increase the risk associated with product related claims.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, ISSUER PURCHASES OF EQUITY SECURITIES AND SHARE PERFORMANCE

MARKET FOR REGISTRANT'S COMMON EQUITY

Information regarding market prices of our Common Stock and dividends declared may be found in Note 20 to the Consolidated Financial Statements in Item 8 (which is incorporated by reference herein). Our Common Stock is traded on the New York Stock Exchange under the symbol ATR. As of February 15, 2008, there were approximately 400 registered holders of record.

RECENT SALES OF UNREGISTERED SECURITIES

During the quarter ended December 31, 2007, the FCP Aptar Savings Plan (the "Plan") purchased 1,604 shares of our common stock on behalf of the participants at an average price of \$42.33 per share, for an aggregate amount of \$67.9 thousand and sold 950 shares of our Common Stock on behalf of the participants at an average price of \$42.83 per share, for an aggregate amount of \$40.7 thousand. At December 31, 2007, the Plan owns 15,194 shares of our Common Stock. The employees of AptarGroup S.A.S. and Valois S.A.S., our subsidiaries, are eligible to participate in the Plan. All eligible participants are located outside of the United States. An independent agent purchases shares of Common Stock available under the Plan for cash on the open market and we do not issue shares. We do not receive any proceeds from the purchase of Common Stock under the Plan. The agent under the Plan is Banque Nationale de Paris Paribas Asset Management. No underwriters are used under the Plan. All shares are sold in reliance upon the exemption from registration under the Securities Act of 1933 provided by Regulation S promulgated under that Act.

ISSUER PURCHASES OF EQUITY SECURITIES

The following table summarizes the Company's purchases of its securities for the quarter ended December 31, 2007:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
10/1 - 10/31/07	—	\$ —	—	2,466,000
11/1 - 11/30/07	178,200	41.43	178,200	2,287,800
<u>12/1 - 12/31/07</u>	<u>295,000</u>	<u>41.32</u>	<u>295,000</u>	<u>1,992,800</u>
Total	473,200	\$ 41.36	473,200	1,992,800

The Company announced the existing repurchase program on July 19, 2006. There is no expiration date for this repurchase program.

SHARE PERFORMANCE

The following graph shows a five year comparison of the cumulative total stockholder return on AptarGroup's common stock as compared to the cumulative total return of two other indexes: the Value Line Packaging & Container Industry Group ("Peer Group") and the Standard & Poor's 500 Composite Stock Price Index. The companies included in the Peer Group are: American Greetings Corporation, Inc., AptarGroup, Inc., Ball Corporation, Bemis Company, Inc., Caraustar Industries, Inc., Chesapeake Corporation, CLARCOR Inc., Crown Holdings, Inc., Mead Westvaco, Owen's-Illinois, Inc., Packaging Corporation of America, Pactiv Corporation, Rock-Tenn Company, Sealed Air Corporation, Silgan Holdings, Inc., Smurfit-Stone Container Corporation and Sonoco Products Company. Changes in the Peer Group from year to year result from companies being added to or deleted from the Value Line Packaging & Container Industry Group. These comparisons assume an initial investment of \$100 and the reinvestment of dividends.

Comparison of 5 Year Cumulative Stockholder Returns

	12/31/2002	12/31/2003	12/31/2004	12/31/2005	12/31/2006	12/31/2007
ATR	100	126	172	173	198	278
S&P 500	100	129	143	150	173	183
Peer Group	100	120	144	137	156	169

The graph and other information furnished in the section titled "Share Performance" under this Part II, Item 5 of this Form 10-K shall not be deemed to be "soliciting" material or to be "filed" with the Securities and Exchange Commission or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Securities Exchange Act of 1934, as amended.

ITEM 6. SELECTED CONSOLIDATED FINANCIAL DATA

FIVE YEAR SUMMARY OF SELECTED FINANCIAL DATA

In millions of dollars, except per share data

Years Ended December 31,	2007	2006	2005	2004	2003
Statement of Income Data:					
Net Sales	\$ 1,892.2	\$ 1,601.4	\$ 1,380.0	\$ 1,296.6	\$ 1,114.7
Cost of Sales (exclusive of depreciation shown below) (1)	1,283.8	1,086.3	927.6	866.9	732.0
% of Net Sales	67.9%	67.8%	67.2%	66.8%	65.7%
Selling, Research & Development and Administrative (2)	274.2	238.9	203.4	194.4	172.9
% of Net Sales	14.5%	14.9%	14.7%	15.0%	15.5%
Depreciation and Amortization	123.5	114.6	99.2	94.5	85.9
% of Net Sales	6.5%	7.2%	7.2%	7.3%	7.7%
Operating Income	210.7	161.6	149.8	140.9	123.9
% of Net Sales	11.1%	10.1%	10.9%	10.9%	11.1%
Income from Continuing Operations (3)	139.5	102.9	100.0	3.3	79.7
% of Net Sales	7.4%	6.4%	7.3%	7.2%	7.1%
Income from Discontinued Operations Net of Tax	2.2	—	—	—	—
% of Net Sales	0.1%	—	—	—	—
Net Income (3)	141.7	102.9	100.0	93.3	79.7
% of Net Sales	7.5%	6.4%	7.3%	7.2%	7.1%
Net Income per Common Share (Basic):					
Continuing Operations (4)	\$ 2.03	\$ 1.48	\$ 1.42	\$ 1.29	\$ 1.11
Discontinued Operations (4)	.03	—	—	—	—
Net Income per Common Stock (Basic)	2.06	1.48	1.42	1.29	1.11
Net Income per Common Stock (Diluted):					
Continuing Operations (4)	1.95	1.44	1.39	1.26	1.08
Discontinued Operations (4)	.03	—	—	—	—
Net Income per Common Share (Diluted)	1.98	1.44	1.39	1.26	1.08
Cash Dividends Declared per Common Share	.50	.42	.35	.22	.13
Balance Sheet and Other Data:					
Capital Expenditures	\$ 137.9	\$ 107.7	\$ 104.4	\$ 119.7	\$ 77.3
Total Assets	1,911.9	1,592.0	1,357.3	1,374.0	1,264.3
Long-Term Obligations	146.7	168.9	144.5	142.6	125.2
Net Debt (5)	49.1	125.7	129.0	35.5	56.9
Stockholders' Equity	1,119.0	946.4	809.4	873.2	783.1
Capital Expenditures% of Net Sales	7.3%	6.7%	7.6%	9.2%	6.9%
Interest Bearing Debt to Total Capitalization (6)	24.5%	23.8%	23.4%	19.1%	22.1%
Net Debt to Net Capitalization (7)	4.2%	11.7%	13.7%	3.9%	6.8%

- (1) Cost of Sales includes a charge for the expensing of stock options of \$1.0 million in 2007, a charge for the expensing of stock options of \$0.9 million in 2006, and Redeployment Program costs of \$1.6, \$2.1 and \$3.7 million in 2007, 2006 and 2005, respectively.
- (2) Selling, Research & Development and Administrative includes a charge of \$13.0 million for the expensing of stock options in 2007, a charge of \$12.4 million for the expensing of stock options in 2006, and a charge of \$1.3 million for acquired research and development ("R&D") in 2003.
- (3) Net Income includes a charge for the expensing of stock options of \$10.5 million in 2007, a charge for the expensing of stock options of \$8.7 million in 2006, Redeployment Program costs of \$1.1, \$1.4 and \$2.5 million in 2007, 2006 and 2005, respectively, and a charge for acquired R&D of \$0.8 million in 2003.
- (4) Net Income per basic and diluted common share includes the negative effects of \$0.15 and \$0.12 for the expensing of stock options in 2007 and 2006, respectively, \$0.02, \$0.03 and \$0.04 for Redeployment Program costs in 2007, 2006 and 2005, respectively, and \$0.01 for an acquired R&D charge in 2003.
- (5) Net Debt is interest bearing debt less cash and cash equivalents.
- (6) Total Capitalization is Stockholders' Equity plus interest bearing debt.
- (7) Net Capitalization is Stockholders' Equity plus Net Debt.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF CONSOLIDATED RESULTS OF OPERATIONS AND FINANCIAL CONDITION

(In thousands, except per share amounts or otherwise indicated)

The objective of the following Management's Discussion and Analysis of Consolidated Results of Operations and Financial Condition ("MD&A") is to help the reader understand the financial performance of AptarGroup, Inc. MD&A is presented in eight sections: Overview, Results of Operations, Off-Balance Sheet Arrangements, Overview of Contractual Obligations, Adoption of Accounting Standards, Critical Accounting Policies and Estimates, Operations Outlook and Forward-Looking Statements. MD&A is provided as a supplement to, and should be read in conjunction with, our consolidated financial statements and accompanying Notes to Consolidated Financial Statements contained elsewhere in this Report on Form 10-K.

In MD&A, "we," "our," "us," "AptarGroup," "AptarGroup, Inc." and "the Company" refer to AptarGroup, Inc. and its subsidiaries.

OVERVIEW

GENERAL

We are a leading global supplier of a broad range of innovative dispensing systems for the personal care, fragrance/cosmetic, pharmaceutical, household and food/beverage markets. We focus on providing value-added dispensing systems (pumps, closures and aerosol valves) to global consumer product marketers to allow them to differentiate their products and meet consumers' need for convenience.

2007 HIGHLIGHTS

- The year 2007 marked our 42nd consecutive year of increased revenue as sales grew 18% and nearly reached \$1.9 billion.
- The sales growth was led in large part by the continued strength of the fragrance/cosmetics and personal care industries as well as increased sales of our products to the pharmaceutical market.
- We reported record diluted earnings per share from continuing operations of \$1.95 or 36% more than the previous year record of \$1.43 per share.
- We repurchased more than 2 million shares of our common stock for approximately \$76.4 million for the fourth consecutive year and increased our cash dividend paid to stockholders to \$34.4 million from \$29.3 million in 2006.
- Cash flow from operations improved to \$273 million in 2007 compared to \$197 million in 2006.
- Our debt to capital is approximately 25% at the end of 2007 and our net debt (interest bearing debt less cash) to net capital (stockholder's equity plus net debt), is approximately 4%.

RESULTS OF OPERATIONS

The following table sets forth the consolidated statements of income and the related percentages of net sales for the periods indicated:

Years Ended December 31,	2007		2006		2005	
	Amount in \$ Thousands	% of Net Sales	Amount in \$ Thousands	% of Net Sales	Amount in \$ Thousands	% of Net Sales
Net sales	\$ 1,892,167	100.0%	\$ 1,601,385	100.0%	\$ 1,380,009	100.0%
Cost of sales (exclusive of depreciation shown below)	1,283,773	67.9	1,086,269	67.8	927,585	67.2
Selling, research & development and administrative	274,196	14.5	238,907	14.9	203,389	14.7
Depreciation and amortization	123,466	6.5	114,606	7.2	99,242	7.2
Operating income	210,732	11.1	161,603	10.1	149,793	10.9
Other expense	(10,737)	(0.5)	(13,297)	(0.8)	(7,840)	(0.6)
Income from continuing operations before income taxes	199,995	10.6%	148,306	9.3%	141,953	10.3%
Income from continuing operations	139,507	7.4%	102,896	6.4%	100,034	7.3%
Effective tax rate		30.2%		30.6%		29.5%
Income from discontinued operations net of tax	2,232	0.1%	—	—	—	—

NET SALES

Net sales increased 18% in 2007 to nearly \$1.9 billion compared to \$1.6 billion recorded in 2006. The U.S. dollar weakened against several currencies including the Euro (our primary foreign currency exposure) in 2007 compared to 2006, and as a result, changes in exchange rates positively impacted sales and accounted for approximately 7% of the 18% sales growth. Approximately \$13.4 million of the \$291 million increase in net sales (approximately 1% of the 18% increase) related to acquisitions completed during 2006. The remaining 10% of sales growth was due primarily to increased demand of our innovative dispensing systems particularly in the Pharma and Beauty & Home segments. Sales prices increased primarily to help defray raw material cost increases.

In 2006, net sales increased 16% to more than \$1.6 billion compared to \$1.4 billion recorded in 2005. The U.S. dollar weakened slightly against several currencies in 2006 compared to 2005, and as a result, changes in exchange rates positively impacted sales and accounted for approximately 1% of the 16% sales growth. Approximately \$92 million of the \$221 million increase in net sales (approximately 7% of the 16% increase) related to acquisitions completed during 2006 and 2005. The remaining 8% of sales growth was due primarily to increased demand of our innovative dispensing systems. Sales prices increased primarily to offset raw material cost increases.

For further discussion on net sales by reporting segment, please refer to the segment analysis of net sales and operating income on the following pages.

The following table sets forth, for the periods indicated, net sales by geographic location:

Years Ended December 31,	2007	% of Total	2006	% of Total	2005	% of Total
Domestic	\$ 498,231	26%	\$ 470,405	29%	\$ 419,178	30%
Europe	1,180,443	63%	974,967	61%	829,863	60%
Other Foreign	213,493	11%	156,013	10%	130,968	10%

COST OF SALES (EXCLUSIVE OF DEPRECIATION SHOWN BELOW)

Our cost of sales as a percentage of net sales increased slightly in 2007 to 67.9% compared to 67.8% in 2006.

The following factors negatively impacted our cost of sales percentage in 2007:

Rising Raw Material Costs. Raw material costs, in particular plastic resin costs in the U.S. and metal (including nickel) prices worldwide, increased in 2007 compared to 2006. While the majority of the plastic resin raw material price increase has been passed on to customers through price increases, the net effect is a reduction in the margin percentage.

Last in First Out ("LIFO") Inventory Valuation. Some of our U.S. operations use LIFO as their inventory valuation method. Due to the rising raw material costs, the increase to the LIFO reserve in 2007 was approximately \$2.3 million, thus negatively impacting our cost of sales percentage in 2007.

Weakening of the U.S. Dollar. We are a net importer from Europe into the U.S. and other countries of products produced in Europe with costs denominated in Euros. As a result, when the U.S. dollar or other currencies weaken against the Euro, products produced in Europe (with costs denominated in Euros) and sold in currencies that are weaker compared to the Euro, have a negative impact on cost of sales as a percentage of net sales.

The following factor positively impacted our cost of sales percentage in 2007:

Leveraging of Fixed Manufacturing Costs. The increase in sales volumes across all three business segments allowed us to better leverage our fixed overhead manufacturing expenses as a percentage of sales.

Favorable Product Mix. Increased sales of our products to the pharmaceutical market which traditionally generate higher margins helped positively impact our cost of sales percentage in 2007.

Lower Compliance Costs For The Pharma Industry. In 2006, we incurred additional costs in our Pharma segment due to more stringent quality standards on certain of our products. These costs included, among others, higher personnel related costs to assure the level of quality demanded by this market and higher scrap associated with the destruction of non-usable components. Although the higher quality standards remained, a majority of these costs did not reoccur in 2007 and as a result had a positive impact on our cost of sales percentage in 2007.

In 2006, our cost of sales as a percentage of net sales increased to 67.8% compared to 67.2% in 2005.

The following factors negatively impacted our cost of sales percentage in 2006:

Increased Sales of Custom Tooling. We had a \$21.5 million increase in sales of custom tooling in 2006 compared to 2005. Traditionally, sales of custom tooling generate lower margins than our regular product sales and, thus, any increased sales of custom tooling negatively impacts cost of sales as a percentage of sales.

Operational Difficulties at French Closures Operations. Production efficiency problems and excessive maintenance expense on production equipment at a French Closures operation negatively impacted the cost of sales percentage.

Rising Raw Material Costs. Raw material costs, in particular plastic resin costs in the U.S. and metal prices worldwide, increased in 2006 compared to 2005. While the majority of the plastic resin raw material price increase has been passed on to customers in the form of selling price increases, the net effect was a reduction in the margin percentage.

Higher Compliance Costs For The Pharma Industry. We incurred additional costs in our Pharma segment due to more stringent quality standards on certain of our products. These costs include, among others, higher personnel-related costs to assure the level of quality demanded by this market and higher scrap associated with the destruction of non-usable components.

Stock Option Expenses. Stock option expense of approximately \$900 thousand related to manufacturing employees was recorded in 2006 due to the adoption of Statement of Financial Accounting Standards ("SFAS") 123R "Share-Based Payment."

The following factors positively impacted our cost of sales percentage in 2006:

Lower Redeployment Charges. We announced in the third quarter of 2005 a plan to reduce and redeploy certain personnel in our French fragrance/cosmetic operations. The objective of this plan was to better align our production equipment and personnel between several sites in France to ultimately reduce costs and maintain our competitiveness. We implemented this plan in phases over a two-year period and completed the plan in December 2007. Redeployment charges net of savings was approximately \$500 thousand in 2006 compared to approximately \$3.7 million in charges recorded in 2005.

SELLING, RESEARCH & DEVELOPMENT AND ADMINISTRATIVE

Our Selling, Research & Development and Administrative expenses ("SG&A") increased approximately 15% or \$35.3 million in 2007. Changes in currency rates accounted for approximately \$13.8 million of the increase or 6% of the 15% increase. Acquisitions completed during 2006 accounted for \$2.3 million or 1% of the 15% increase. The remainder of the increase is primarily due to inflationary cost increases as well as increased research and development costs associated with our innovative products currently under development. Nevertheless, SG&A as a percentage of sales decreased to 14.5% in 2007 compared to 14.9% in 2006.

In 2006, our SG&A increased approximately 17.5% or \$35.5 million. Approximately \$12.4 million of the increase related to the expensing of stock options due to the adoption of SFAS 123R. Acquisitions accounted for more than \$9.9 million of the increase. In spite of the \$12.4 million for expensing of stock options (or 0.8% of sales), SG&A as a percentage of sales only increased to 14.9% in 2006 compared to 14.7% in 2005.

DEPRECIATION AND AMORTIZATION

Depreciation and amortization expense increased 8% or \$8.9 million in 2007. Changes in currency rates accounted for approximately \$7.2 million of the increase and acquisitions accounted for \$0.9 million of the increase. An accelerated depreciation of software retired in 2007 accounted for the remainder of the increase. Depreciation and amortization expense decreased to 6.5% of net sales in 2007 compared to 7.2% in 2006.

In 2006, depreciation and amortization expense increased 15.5% or \$15.4 million. Acquisitions in 2006 accounted for \$7.2 million of the increase and a goodwill impairment charge added another \$1.6 million. The remaining increase related to increased capital expenditures to support the growth of our business. Depreciation and amortization expense remained constant at 7.2% of net sales in 2006 and 2005.

OPERATING INCOME

Operating Income increased approximately \$49.1 million or 30% to \$210.7 million. The increase in operating income is primarily due to the increase in sales volumes as well as the other reasons mentioned above. The higher sales volumes allowed us to leverage some of our fixed costs such as SG&A as well as Depreciation and Amortization, thus contributing to the increase in operating income. Operating income as a percentage of sales increased to 11.1% in 2007 compared to 10.1% in 2006.

In 2006, operating income increased approximately \$11.8 million or 7.9% to \$161.6 million. Negatively impacting operating income were charges relating to the expensing of stock options of \$13.3 million in 2006 as well as operating difficulties at a French Closures facility. This was more than offset by increased operating income of \$8.4 million from acquisitions, strong demand for our products from the fragrance/cosmetic market and lower redeployment charges net of savings achieved. Operating income as a percentage of sales decreased to 10.1% in 2006 primarily due to the \$13.3 million of stock option expense recorded in 2006.

NET OTHER EXPENSES

Net other expenses in 2007 decreased to \$10.7 million compared to \$13.3 million in 2006 principally reflecting the higher interest income of \$4.7 million due to higher average cash balances in 2007 compared to 2006, offset partially by higher interest expense of \$2.5 million due to higher average short term borrowings and slightly higher average interest rates.

In 2006, net other expenses increased to \$13.3 million compared to \$7.8 million in 2005 principally reflecting increased interest expense of \$4.8 million. The increase in interest expense related to an increase in our average borrowings as well as an increase in average interest rates. Additionally, equity in results of affiliates decreased nearly \$1.1 million in 2006 compared to 2005 as a result of acquiring the remaining 50% of an operation late in 2005 that was previously accounted for under the equity method.

EFFECTIVE TAX RATE ON INCOME FROM CONTINUING OPERATIONS

The reported effective tax rate on income from continuing operations for 2007 decreased to 30.2% compared to 30.6% in 2006, primarily due to a tax law change in Germany in 2007 reducing the statutory rate from 38% to 30% effective in 2008. This tax law change required us to reduce certain previously recorded net deferred tax liabilities by approximately \$2.3 million in 2007.

In 2006, the reported effective tax rate for 2006 increased to 30.6% compared to 29.5% in 2005, primarily due to U.S. research and development credits of approximately \$1.2 million realized in the second quarter of 2005. In addition, due to a special one-time Italian tax law policy relating to taxation of previously issued government grants, we were able to reduce certain previously recorded deferred tax liabilities by approximately \$2 million also in the second quarter of 2005. The tax provision for 2006 included a benefit of \$1.6 million from a change in German tax law recorded in the fourth quarter.

INCOME FROM CONTINUING OPERATIONS

We reported income from continuing operations of \$139.5 million in 2007 compared to \$102.9 million reported in 2006 and \$100.0 million reported in 2005.

INCOME FROM DISCONTINUED OPERATIONS

In the fourth quarter of 2007, we sold our Australian operation for approximately \$6.7 million in cash and generated a gain on the sale of approximately \$3.9 million before tax or \$2.2 million after tax. Due to the immateriality of the results of the Australian operation, only the net gain of \$2.2 million is reported in the Consolidated Statements of Income in the line Income From Discontinued Operations Net of Tax.

NET INCOME

We reported net income of \$141.7 million in 2007 compared to \$102.9 million reported in 2006 and \$100.0 million reported in 2005.

BEAUTY & HOME SEGMENT

Years Ended December 31,	2007	2006	2005	% Change 2007 vs. 2006	% Change 2006 vs. 2005
Net Sales	\$ 1,005,218	\$ 837,093	\$ 698,366	20.1%	19.9%
Segment Income (1)	99,553	72,396	54,009	37.5	34.0
Segment Income as a percentage of Net Sales	<u>9.9%</u>	<u>8.6%</u>	<u>7.7%</u>		

(1) Segment Income is defined as earnings before net interest, corporate expenses and income taxes. The Company evaluates performance of its business units and allocates resources based upon Segment Income. For a reconciliation of Segment Income to income before income taxes, see Note 18 to the Consolidated Financial Statements in Item 8.

Net sales increased approximately 20% in 2007 to \$1.0 billion compared to \$837.1 million in 2006. The weakening U.S. dollar compared to the Euro positively impacted the sales increase and represented approximately 7% of the increase while acquisitions accounted for approximately 1% of the 20% increase in sales. The remaining 12% of the increase in sales was led by strong demand for our products from the fragrance/cosmetic and personal care markets. Sales excluding changes in exchange rates of our products to the fragrance/cosmetic market increased approximately 15% in 2007 reflecting a combination of strong general market demand both in the high and low end of the market especially in developing markets such as Latin America and Southeast Asia. Sales to Eastern Europe and Russia also increased significantly. The continued success of our innovative fragrance sampling products also contributed to strong sales growth. Sales excluding changes in exchange rates of our products to the personal care market increased 10% in 2007, reflecting increased demand for our aerosol valve products in Europe as well as our new and innovative bag-on-valve and accessory products in North America. Sales excluding changes in exchange rates to the household market increased approximately 6% due primarily to an increase in insecticide sprays.

In 2006, net sales increased nearly 20% in 2006 to \$837.1 million compared to \$698.4 million in 2005. Acquisitions accounted for approximately 11% of the 20% increase in sales. The remainder of the increase in sales was led by strong demand for our products from the fragrance/cosmetic and personal care markets. Sales excluding changes in exchange rates of our products to the fragrance/cosmetic market increased approximately 26% in 2006. Approximately 15% of the sales growth was related to acquisitions. The remaining 11% growth in sales was due to a combination of general market growth and the success of our new sampling products to the fragrance market. Sales excluding changes in exchange rates of our products to the personal care market increased 16% in 2006. Approximately 6% of the sales growth was related to acquisitions. The remaining 10% growth in sales was due primarily to the strength of the European personal care market as well as the worldwide success of our new accessories such as turning/locking actuators. Sales excluding changes in exchange rates to the household market decreased approximately 18% due primarily to a sluggish paint and automotive sector combined with a planned reduction of sales to lower margin accounts.

Segment income increased approximately 38% to \$99.6 million in 2007 compared to \$72.4 million reported in 2006. Acquisitions accounted for approximately \$2.4 million or 3% of the 38% increase in segment income. The remainder of the increase in segment income of \$24.7 million is due primarily to the increase in sales volumes mentioned above and the

leveraging of fixed overhead costs worldwide. In addition, an increase in sales of our higher margin value added products helped contribute to the increase in profitability in 2007.

In 2006, segment income increased 34% to \$72.4 million in 2006 compared to \$54.0 million reported in 2005. Acquisitions accounted for approximately \$6.2 million or 12% of the 34% increase in segment income. A net reduction in Redeployment Program costs net of savings realized accounted for approximately \$3.2 million of the increase in segment income. The remainder of the increase in segment income of \$9.0 million was due primarily to the strong demand coming from the fragrance/cosmetic market and the improved profitability related to this increase in demand.

CLOSURES SEGMENT

Years Ended December 31,	2007	2006	2005	% Change 2007 vs. 2006	% Change 2006 vs. 2005
Net Sales	\$ 493,000	\$ 441,203	\$ 385,161	11.7%	14.6%
Segment Income	50,036	44,031	42,392	13.6	3.9
Segment Income as a percentage of Net Sales	10.1%	10.0%	11.0%		

Net sales to the Closures segment increased nearly 12% in 2007 to \$493.0 million compared to \$441.2 million in 2006. The weakening U.S. dollar compared to the Euro positively impacted the sales increase and represented approximately 5% of the increase while acquisitions accounted for approximately 2% of the 12% increase in sales. Sales excluding changes in exchange rates of our products to the personal care market increased 7% in 2007 while acquisitions accounted for nearly half of the growth. Sales excluding changes in exchange rates of our products to the household and food/beverage markets increased 8% and 10%, respectively in 2007. Sales to the North American market decreased approximately 3% in 2007 reflecting a general slowdown in the closure personal care market. This decrease was more than offset by strong growth in both the European and Latin American markets.

In 2006, net sales to the Closures segment increased nearly 15% compared to 2005. Acquisitions accounted for approximately 4% of the 15% increase in sales. Price increases, primarily related to resin price pass throughs and the success of our SimpliSqueeze product, were the primary reasons for the remainder of the sales growth. Sales excluding changes in exchange rates of our products to the personal care market increased 13% in 2006 while acquisitions accounted for more than half of the growth. Sales excluding changes in exchange rates of our products to the household and food/beverage markets increased 9% and 13%, respectively in 2006.

Segment income increased 14% to \$50.0 million in 2007 compared to \$44.0 million in 2006. Segment income from acquisitions was immaterial in 2007. A decrease in segment income in North America was primarily due to the lower sales volumes mentioned above as well as the normal delay of passing on the rising cost of resin to our customers. This decrease was more than offset by increases in segment income in both Europe and Latin America due to the increase in sales in those regions.

In 2006, segment income increased 4% to \$44.0 million in 2006 compared to \$42.4 million in 2005. Acquisitions accounted for \$0.3 million of the increase in segment income. Weak product sales and operational difficulties in France along with a general mix of products sold with lower margins caused segment income in Europe to decrease approximately \$1.7 million compared to the prior year. This was more than offset by improved segment income from North America due primarily to sales volume increases and production efficiency improvements.

PHARMA SEGMENT

Years Ended December 31,	2007	2006	2005	% Change 2007 vs. 2006	% Change 2006 vs. 2005
Net Sales	\$ 393,868	\$ 322,603	\$ 296,109	22.1%	8.9%
Segment Income	106,161	80,841	76,004	31.3	6.4
Segment Income as a percentage of Net Sales	27.0%	25.1%	25.7%		

Net sales to the Pharma segment increased more than 22% in 2007 to \$393.9 million compared to \$322.6 million in 2006. The weakening U.S. dollar compared to the Euro positively impacted the sales increase and represented approximately 8% of the 22% increase in sales. The remainder of the increase was due to increased sales of our nasal spray pumps and increased sales of our metered dose inhaler valves "MDI's" relating primarily to new customer launches.

In 2006, net sales to the Pharma segment increased nearly 9% in 2006 as strong sales of our MDI's helped offset a general softness in sales of nasal spray pumps.

Segment income increased 31% to \$106.2 million in 2007 compared to \$80.8 million reported in 2006. The increase in segment income is primarily due to the higher sales volumes mentioned above as well as a reduction in quality-related and compliance costs compared to the prior year.

In 2006, segment income increased 6% to \$80.8 million in 2006 compared to \$76.0 million reported in 2005. Increased segment income from higher sales and increased selling prices was offset slightly by higher quality-related and compliance-related costs as well as the mix of products sold in 2006.

LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity are cash flow provided by our operations and our revolving credit facility. Cash and equivalents increased to \$313.7 million at the end of 2007 from \$170.6 million at the end of 2006. Total short and long-term interest bearing debt increased to \$362.9 million at the end of 2007 from \$296.3 million at the end of 2006. The ratio of our Net Debt (interest bearing debt less cash and cash equivalents) to Net Capital (Stockholders' Equity plus Net Debt) decreased to 4% compared to 12% as of December 31, 2006.

In 2007, our operations provided \$273.5 million in cash flow. This compares with \$197.5 million in 2006 and \$194.1 million in 2005. We anticipate that cash flow from operations in 2008 will be at or above 2007 levels. In each of the past three years, we primarily derived cash flow from operations from earnings before depreciation and amortization. The increase in cash generated from operating activities in 2007 reflects strong growth in earnings before depreciation and amortization as well as a lower amount of cash used for working capital compared to 2006. The increase in cash generated from operating activities in 2006 compared to 2005 reflects strong growth in earnings before depreciation and amortization offset partially by increased use of cash in 2006 for working capital needs. During 2007, we utilized the majority of the operating cash flows to finance capital expenditures, repurchase Company stock, and pay higher dividends to shareholders.

We used \$131.2 million in cash for investing activities during 2007, compared to \$141.8 million during 2006 and \$193.6 million in 2005. This decrease in cash used for investing activities in 2007 is primarily due to \$31.6 million less cash spent for acquisitions of businesses in 2007 compared to 2006 and \$6.7 million in cash received from the sale of our Australian affiliate in 2007, which were partially offset by an additional \$30.3 million in capital expenditures in 2007 compared to 2006. Capital expenditures totaled \$137.9 million in 2007, \$107.7 million in 2006 and \$104.4 million in 2005. The increase in capital expenditures in 2007 relative to depreciation and amortization is due in part to the construction of a new manufacturing unit in France for our Pharma segment, the spending of additional capital on capacity increases primarily for our fragrance/cosmetics pumps to keep up with the increased demands of our customers and information technology spending. Each year we invest in property, plant and equipment primarily for new products, capacity increases, product line extensions and maintenance of business. We estimate that we will spend approximately \$170 million (assuming current exchange rates) on capital expenditures in 2008.

We used \$22.9 million in cash for financing activities during 2007 compared to \$17.3 million in 2006 and \$34.6 million in 2005. The primary reason for the increase in cash used for financing activities in 2007 was an increase of \$16.8 million in repayments of long-term obligations, an increase of \$18.7 million related to share repurchases due to the higher average stock price in 2007 as well as an increase of \$5.2 million in dividends paid to shareholders. This was funded by a net increase in short and long term borrowings of \$33.3 million. In 2006, the primary reason for the decrease in cash used for financing activities was that \$50 million in proceeds of private placement debt issued in 2006 was used to help fund the buy back of stock and fund an increase in shareholder dividends.

In 2006, we negotiated an amendment to our revolving credit facility (including a \$50 million increase in the amount of the facility to \$200 million). Under this credit agreement, interest on borrowings is payable at a rate equal to LIBOR plus an amount based on our financial condition. At December 31, 2007, the amount unused and available under this agreement was \$50 million. We are required to pay a nominal fee for this commitment based on our financial condition. The Company exercised its option to extend the maturity of this agreement during 2007. The agreement expires on July 31, 2012, but the Company has an option to extend the maturity by one additional year. The Company can also request a \$100 million increase in the total amount of the facility. In 2006, we refinanced \$50 million of existing borrowings with ten year private placement debt at a fixed interest rate of 6.0%.

Our revolving credit facility and certain long-term obligations require us to satisfy certain financial and other covenants including:

	Requirement	Level at December 31, 2007
Debt to total capital ratio	55%	24%

Based upon the above debt to total capital ratio covenant we would have the ability to borrow approximately an additional \$1 billion before the 55% requirement was exceeded.

Our foreign operations have historically met cash requirements with the use of internally generated cash or borrowings. These foreign subsidiaries have financing arrangements with several foreign banks to fund operations located outside the U.S., but all these lines are uncommitted. Cash generated by foreign operations has generally been reinvested locally. The majority of our \$314 million in cash and equivalents is located outside of the U.S. In 2007, we decided we would repatriate, in 2008, a portion (approximately \$12 million) of non-U.S. subsidiary current year earnings. We have provided for additional taxes of approximately \$2.2 million in 2007 for this repatriation.

We believe we are in a strong financial position and have the financial resources to meet business requirements in the foreseeable future. We have historically used cash flow from operations as our primary source of liquidity. In the event that customer demand would decrease significantly for a prolonged period of time and negatively impact cash flow from operations,

we would have the ability to restrict and significantly reduce capital expenditure levels, which historically have been the most significant use of cash for us. A prolonged and significant reduction in capital expenditure levels could increase future repairs and maintenance costs as well as have a negative impact on operating margins if we were unable to invest in new innovative products.

OFF-BALANCE SHEET ARRANGEMENTS

We lease certain warehouse, plant and office facilities as well as certain equipment under noncancelable operating leases expiring at various dates through the year 2055. Most of the operating leases contain renewal options and certain equipment leases include options to purchase during or at the end of the lease term. We have an option on one building lease to purchase the building during or at the end of the term of the lease at approximately the amount expended by the lessor for the purchase of the building and improvements, which was the fair value of the facility at the inception of the lease. This lease has been accounted for as an operating lease. The Company intends to exercise its option to purchase this building in the third quarter of 2008 and will account for this transaction as a capital expenditure. The expected cost of the building is approximately \$9.5 million. Other than operating lease obligations, we do not have any off-balance sheet arrangements. See the following section "Overview of Contractual Obligations" for future payments relating to operating leases.

OVERVIEW OF CONTRACTUAL OBLIGATIONS

Below is a table of our outstanding contractual obligations and future payments as of December 31, 2007:

Payment Due by Period	Total	2008	2009-2010	2011-2012	2013 and After
Long-term debt (1)	\$ 167,752	\$ 23,610	\$ 45,312	\$ 47,217	\$ 51,613
Capital lease obligations (1)	4,941	2,373	1,539	1,029	—
Operating leases	41,011	14,431	17,112	7,382	2,086
Building lease obligation (2)	9,500	9,500	—	—	—
Interest obligations (3)	46,498	18,013	10,905	6,734	10,846
Other long-term liabilities reflected on the balance sheet under GAAP (4)	700	700	—	—	—
Total Contractual Obligations	<u>\$ 270,402</u>	<u>\$ 68,627</u>	<u>\$ 74,868</u>	<u>\$ 62,362</u>	<u>\$ 64,545</u>

- (1) The future payments listed above for capital lease obligations and long-term debt repayments reflect only principal payments.
- (2) The building lease payment indicated in the table assumes that the Company exercises its option to purchase the building at the end of the lease in 2008 for approximately \$9.5 million, which represents the estimated residual value of the building at the end of the lease date.
- (3) Approximately 58% of our total interest bearing debt has variable interest rates. Using our variable rate debt outstanding as of December 31, 2007 of approximately \$212 million at an average rate of approximately 5%, we included approximately \$10.9 million of variable interest rate obligations in 2008. No variable interest rate obligations were included in subsequent years.
- (4) Amount included represents the current portion of the liability for uncertain tax positions under FIN 48. Aside from deferred income taxes and minority interest, we have approximately \$51.9 million of other deferred long-term liabilities on the balance sheet, which consist primarily of retirement and deferred compensation plans as described in Note 9 to the Consolidated Financial Statements and a FIN 48 long-term liability for uncertain tax positions described in Note 6 to the Consolidated Financial Statements. The Company does not have a significant required minimum pension contribution obligation for its U.S. plans in 2008 and Company contributions to its foreign pension plans are expected to be largely discretionary in 2008 and future years. Therefore amounts related to these plans are not included in the preceding table. The Company is not able to reasonably estimate the timing of the long-term payments or the amount by which the FIN 48 liability will increase or decrease over time. Therefore, the long-term portion of the liability is excluded from the preceding table.

ADOPTION OF RECENT ACCOUNTING PRONOUNCEMENTS

In September 2006, the FASB issued Statement of Accounting Standard ("SFAS") No. 157 "Fair Value Measurements." This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. This Statement applies to other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, this Statement does not require any new fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning

after November 15, 2007, and interim periods within those fiscal years. The Company does not expect the adoption of SFAS No. 157 to have a material impact on the financial results or existing covenants of the Company.

In February 2007, the FASB issued SFAS No. 159 "The Fair Value Option for Financial Assets and Financial Liabilities." This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. SFAS No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company does not expect the adoption of SFAS No. 159 to have a material impact on the financial results of the Company.

In December 2007, the FASB issued SFAS No. 141(R), "Business Combinations." SFAS No. 141(R) establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree and recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase. SFAS No. 141(R) also sets forth the disclosures required to be made in the financial statements to evaluate the nature and financial effects of the business combination. SFAS No. 141(R) applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Accordingly, SFAS No. 141(R) will be applied by the Company to business combinations occurring on or after January 1, 2009.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51." SFAS No. 160 establishes accounting and reporting standards that require that the ownership interests in subsidiaries held by parties other than the parent be clearly identified, labeled, and presented in the consolidated statement of financial position within equity, but separate from the parent's equity; the amount of consolidated net income attributable to the parent and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income; and changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary be accounted for consistently. SFAS No. 160 also requires that any retained noncontrolling equity investment in the former subsidiary be initially measured at fair value when a subsidiary is deconsolidated. SFAS No. 160 also sets forth the disclosure requirements to identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS No. 160 applies to all entities that prepare consolidated financial statements, except not-for-profit organizations, but will affect only those entities that have an outstanding noncontrolling interest in one or more subsidiaries or that deconsolidate a subsidiary. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Earlier adoption is prohibited. SFAS No. 160 must be applied prospectively as of the beginning of the fiscal year in which it is initially applied, except for the presentation and disclosure requirements. The presentation and disclosure requirements are applied retrospectively for all periods presented. The Company currently has an immaterial noncontrolling interest in a subsidiary. The Company does not believe that the adoption of SFAS No. 160 will materially impact the presentation of the financial results of the Company.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of the financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We continually evaluate our estimates, including those related to bad debts, inventories, intangible assets, income taxes, pensions and contingencies. We base our estimates on historical experience and on a variety of other assumptions believed to be reasonable in order to make judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our more significant judgments and estimates used in preparation of our Consolidated Financial Statements. Management has discussed the development and selection of these critical accounting estimates with the audit committee of our Board of Directors and the audit committee has reviewed our disclosure relating to it in this Management's Discussion and Analysis of Consolidated Results of Operations and Financial Condition ("MD&A").

IMPAIRMENT OF GOODWILL

In accordance with SFAS No. 142, we evaluate our goodwill for impairment on an annual basis or whenever indicators of impairment exist. SFAS No. 142 requires that if the carrying value of a reporting unit for which goodwill exists exceeds its fair value, an impairment loss is recognized to the extent that the carrying value of the reporting unit goodwill exceeds the "implied fair value" of reporting unit goodwill.

As discussed in Note 4 to the Consolidated Financial Statements, we have evaluated our goodwill for impairment and have determined that the fair value of our reporting units exceeds their carrying value, so we did not recognize an impairment of goodwill. Goodwill of approximately \$222.7 million is shown on our balance sheet as of December 31, 2007.

We believe that the accounting estimate related to determining the fair value of our reporting units is a critical accounting estimate because: (1) it is highly susceptible to change from period to period because it requires company management to make assumptions about the future cash flows for each reporting unit over several years in the future, and (2) the impact that recognizing an impairment would have on the assets reported on our balance sheet as well as our results of operations could be material. Management's assumptions about future cash flows for the reporting units require significant judgment and actual cash flows in the future may differ significantly from those forecasted today. The estimate for future cash flows and its impact on the impairment testing of goodwill is a critical accounting estimate for all the segments of our business.

In estimating future cash flows, we use internally generated budgets developed from our reporting units and reviewed by management. We develop our budgets based upon recent sales trends for the reporting units, discussions with our customers, planned timing of new product launches, forecasted capital expenditure needs, working capital needs, costing factors and many other variables. From these internally generated budgets, a projection of cash flows is made based upon expected sales growth rates and fixed asset and working capital requirements based upon historical needs. A discounted cash flow model is used to discount the future cash flows back to the present using a weighted-average cost of capital. This fair value for the reporting unit is then corroborated by comparing it with a market multiple analysis of the reporting unit. The market multiple analysis is calculated by using AptarGroup's overall EBITDA (earnings before interest, taxes and depreciation) multiple and applying it to the reporting unit EBITDA for the current year.

The \$222.7 million of goodwill is reported in three reporting units. Two of the three reporting units have fair values, which significantly exceed their carrying values. The third reporting unit contains approximately \$38.7 million of the total \$222.7 million in goodwill and has the smallest excess of fair value over carrying value of the three reporting units.

We believe our assumptions used in discounting future cash flows are appropriately conservative. Any increase in estimated cash flows would have no impact on the reported carrying amount of goodwill. However, if our current estimates of cash flow for this one reporting unit had been 61% lower, the fair value of the reporting unit would have been lower than the carrying value thus requiring us to perform an impairment test to determine the "implied value" of goodwill. The excess of the approximately \$38.7 million in carrying value of goodwill over the "implied value" of goodwill would need to be written down for impairment. Without performing the second step of the goodwill impairment test, it would be difficult to determine the actual amount of impairment to be recorded, but theoretically, the full \$38.7 million of goodwill would be at risk for impairment. A full \$38.7 million impairment loss would have reduced Total Assets as of December 31, 2007 by approximately 2% and would have reduced Income From Continuing Operations Before Income Taxes in 2007 by nearly 19%.

If we had been required to recognize an impairment loss of the full \$38.7 million, it would likely not have affected our liquidity and capital resources because, in spite of the impairment loss, we would have been within the terms of our debt covenants.

ALLOWANCE FOR DOUBTFUL ACCOUNTS

We record an allowance for doubtful accounts as an estimate of the inability of our customers to make their required payments. We determine the amount of our allowance for doubtful accounts by looking at a variety of factors. First, we examine an aging of the accounts receivable in each entity within the Company. The aging lists past due amounts according to invoice terms. In addition, we consider the current economic environment, the credit rating of the customers and general overall market conditions. In some countries we maintain credit insurance, which can be used in certain cases of non-payment.

We believe that the accounting estimate related to the allowance for doubtful accounts is a critical accounting estimate because: (1) it requires management to make assumptions about the ability to collect amounts owed from customers in the future, and (2) changes to these assumptions or estimates could have a material impact on our results of operations. The estimate for the allowance for doubtful accounts is a critical accounting estimate for all of our segments.

When we determine that a customer is unlikely to pay, we record a charge to bad debt expense in the income statement and an increase to the allowance for doubtful accounts. When it becomes certain the customer cannot pay (typically driven by the customer filing for bankruptcy) we write off the receivable by removing the accounts receivable amount and reducing the allowance for doubtful accounts accordingly. In 2007, we added approximately \$2.0 million to the allowance for doubtful accounts while we wrote off or reduced the allowance for doubtful accounts by \$1.8 million. Please refer to Schedule II – Valuation and Qualifying Accounts for activity in the allowance for doubtful accounts over the past three years.

We had approximately \$360.7 million in net accounts receivable at December 31, 2007. At December 31, 2007, we had approximately \$11.1 million recorded in the allowance for doubtful accounts to cover all potential future customer non-payments net of any credit insurance reimbursement we would potentially recover. We believe our allowance for doubtful accounts is adequate to cover any future non-payments of our customers. However, if economic conditions deteriorate significantly or one of our large customers was to declare bankruptcy, a larger allowance for doubtful accounts might be necessary. It is extremely difficult to estimate how much of an additional reserve would be necessary, but we expect the largest potential customer balance at any one time would not exceed \$15.0 million. An additional loss of \$15 million would reduce our Total Assets as of December 31, 2007 by approximately 1% and would have reduced Income From Continuing Operations Before Income Taxes by approximately 8%.

If we had been required to recognize an additional \$15 million in bad debt expense, it would likely not have affected our liquidity and capital resources because, in spite of the additional expense, we would have been within the terms of our debt covenants.

VALUATION OF PENSION BENEFITS

The benefit obligations and net periodic pension cost associated with our domestic and foreign noncontributory pension plans are determined using actuarial assumptions. Such assumptions include discount rates to reflect the time value of money, rate of employee compensation increases, demographic assumptions to determine the probability and timing of benefit payments, and the long-term rate of return on plan assets. The actuarial assumptions are based upon management's best estimates, after consulting with outside investment advisors and actuaries. Because assumptions and estimates are used, actual results could differ from expected results.

The discount rate is utilized principally in calculating our pension obligations, which are represented by the Accumulated Benefit Obligation (ABO) and the Projected Benefit Obligation (PBO), and in calculating net periodic benefit cost. In establishing the discount rate for our foreign plans, we review a number of relevant interest rates including government security yields and Aa corporate bond yields. In establishing the discount rate for our domestic plans, we match the hypothetical duration of our plans, using a weighted average duration that is based upon projected cash payments, to a simulated bond portfolio such as the Citigroup Pension Index Curve. At December 31, 2007, the discount rates for our domestic and foreign plans were 6.40% and 5.25%, respectively.

We believe that the accounting estimates related to determining the valuation of pension benefits are critical accounting estimates because: (1) changes in them can materially affect net income, and (2) we are required to establish the discount rate and the expected return on fund assets, which are highly uncertain and require judgment. The estimates for the valuation of pension benefits are critical accounting estimates for all of our segments.

To the extent the discount rates increase (or decrease), our PBO and net periodic benefit cost will decrease (or increase) accordingly. The estimated effect of a 1% decrease in each discount rate would be a \$15.5 million increase in the PBO (\$10.9 million for the domestic plans and \$4.6 million for the foreign plans) and a \$2.7 million increase in net periodic benefit cost (\$2.0 million for the domestic plans and \$0.7 million for the foreign plans). To the extent the PBO increases, the after-tax effect of such increase could reduce Other Comprehensive Income and Stockholders' Equity. The estimated effect of a 1% increase in each discount rate would be a \$13.8 million decrease in the PBO (\$8.6 million for the domestic plans and \$5.2 million for the foreign plans) and a \$2.1 million decrease in net periodic benefit cost (\$1.6 million for the domestic plans and \$0.5 million for the foreign plans). A decrease of this magnitude in the PBO would eliminate a substantial portion of the related reduction in Other Comprehensive Income and Stockholders' Equity.

The assumed expected long-term rate of return on assets is the average rate of earnings expected on the funds invested to provide for the benefits included in the PBO. Of domestic plan assets, approximately 65% was invested in equities, 21% was invested in fixed income securities, 11% was invested in infrastructure and 3% was invested in a money market fund at December 31, 2007. Of foreign plan assets, approximately 39% was invested in equities, 54% was invested in fixed income securities and 7% was invested in real estate at December 31, 2007.

The expected long-term rate of return assumptions are determined based on our investment policy combined with expected risk premiums of equities and fixed income securities over the underlying risk-free rate. This rate is utilized principally in calculating the expected return on the plan assets component of the net periodic benefit cost. To the extent the actual rate of return on assets realized over the course of a year is greater or less than the assumed rate, that year's net periodic benefit cost is not affected. Rather, this gain (or loss) reduces (or increases) future net periodic benefit cost over a period of approximately 15 to 20 years. To the extent the expected long-term rate of return on assets increases (or decreases), our net periodic benefit cost will decrease (or increase) accordingly. The estimated effect of a 1% decrease (or increase) in each expected long-term rate of return on assets would be a \$0.5 million increase (or decrease) in net periodic benefit cost.

The average rate of compensation increase is utilized principally in calculating the PBO and the net periodic benefit cost. The estimated effect of a 0.5% decrease in each rate of expected compensation increase would be a \$5.4 million decrease in the PBO (\$0.7 million for the domestic plans and \$4.7 million for the foreign plans) and a \$0.4 million decrease to the net periodic benefit cost. The estimated effect of a 0.5% increase in each rate of expected compensation increase would be a \$6.5 million increase in the PBO (\$0.7 million for the domestic plans and \$5.8 million for the foreign plans) and a \$0.5 million increase to the net periodic benefit cost.

Our primary pension related assumptions as of December 31, 2007 and 2006 were as follows:

Actuarial Assumptions as of December 31,	2007	2006
Discount rate:		
Domestic plans	6.40%	5.80%
Foreign plans	5.25%	4.40%
Expected long-term rate of return on plan assets:		
Domestic plans	7.00%	7.00%
Foreign plans	6.00%	6.00%
Rate of compensation increase:		
Domestic plans	4.50%	4.50%
Foreign plans	3.00%	3.00%

In order to determine the 2008 net periodic benefit cost, the Company expects to use the December 31, 2007 discount rates, rates of compensation increase assumptions and expected long-term returns on domestic and foreign plan assets. The estimated impact of the changes to the assumptions as noted in the table above on our 2008 net periodic benefit cost is not expected to be significant.

SHARE-BASED COMPENSATION

In 2006, the Company adopted the modified prospective method of applying SFAS 123R, which requires the recognition of compensation expense on a prospective basis. Accordingly, the 2005 financial statements have not been restated. Among its provisions, SFAS 123R requires the Company to recognize compensation expense for equity awards over the service period based on their grant-date fair value. The compensation expense is recognized only for share-based payments expected to vest and we estimate forfeitures at the date of grant based on the Company's historical experience and future expectations.

The Company uses the Black-Scholes option-valuation model to value stock options, which requires the input of subjective assumptions. These assumptions include the length of time employees will retain their vested stock options before exercising them ("expected term"), the estimated volatility of the Company's stock price, risk-free interest rate, the expected dividend yield and stock price. The expected term of the options is based on historical experience of similar awards, giving consideration to the contractual terms, vesting schedules and expectations of future employee behavior. The expected term determines the period for which the risk-free interest rate and volatility must be applied. The risk-free interest rate is based on the expected U.S. Treasury rate over the expected term. Expected stock price volatility is based on historical volatility of the Company's stock price. Dividend yield is management's long-term estimate of annual dividends to be paid as a percentage of share price.

For 2007, share-based compensation reduced our operating income by \$14.0 million and our diluted earnings per share by approximately \$0.15. Future changes in the subjective assumptions used in the Black-Scholes option-valuation model or estimates associated with forfeitures could impact our share-based compensation expense. For example, a 1 year reduction in the expected term of the options would decrease the Black-Scholes valuation and reduce share-based compensation by approximately \$0.7 million. On the contrary, a 1 year increase in the expected term of the option would increase the Black-Scholes valuation and increase share-based compensation by approximately \$0.3 million.

OPERATIONS OUTLOOK

There is great deal of uncertainty regarding the economic outlook in the U.S. heading into 2008. While we have experienced some softness in the U.S. in our Closures segment in the second half of 2007, we are cautiously optimistic about the first quarter. The breadth of our product offerings and the geographical diversification of our business should allow us to withstand any slowness in one particular region or segment of our business. The consumption of products using our dispensing systems in developing markets is expected to continue to increase in 2008 and we are well positioned to take advantage of this growth. In general, the majority of the products we sell are used on products that tend to be inflation resistant. As a result, we are anticipating that sales in each of our segments will increase in 2008.

Due to the fixed cost nature of our businesses, particularly in Europe, it is difficult to reduce costs fast enough to offset a decline in business. As such, sudden significant decreases in business may have a significant impact on our results of operations.

In 2007, the cost of raw materials, in particular resin and metal components, increased significantly. We are not expecting these costs to decrease in 2008 and they may continue to increase. Our ability to pass on any additional increases in raw material prices to our customers depends on competitive forces in the marketplace. Delays or difficulties encountered with passing on price increases to our customers could have a negative impact on our 2008 anticipated results.

We are anticipating gains in productivity and cost savings to partially offset certain price declines and cost increases. Should we be unable to attain these productivity gains and cost savings, our results could be negatively impacted.

The U.S. dollar has weakened steadily compared to the Euro in 2007 and has remained near an all time low compared to the Euro during the first quarter of 2008. Since a majority of our sales are denominated in Euros, a strengthening Euro will have a positive impact on the translation of our Euro denominated financial statements into U.S. dollars. However, as we have mentioned before, we are a net importer of products produced in European countries with Euro based costs, into the U.S. and sold in U.S. dollars. A weakening U.S. dollar compared to the Euro makes imported European produced products more expensive, thereby reducing operating margins. The net impact of the weakening U.S. dollar is difficult to predict or estimate, but it is likely that any positive impact achieved from translating Euro denominated financial statements into U.S. dollars may be partially offset by the higher cost of imported products.

We expect the annual effective tax rate for 2008 to be in the range of 30% to 31% compared to a rate of 30.2% for 2007.

We are anticipating diluted earnings per share for the first quarter of 2008 to be in the range of \$.46 to \$.49 per share compared to \$.41 per share recorded in the prior year first quarter.

FORWARD-LOOKING STATEMENTS

This Management's Discussion and Analysis and certain other sections of this Form 10-K contain forward-looking statements that involve a number of risks and uncertainties. Words such as "expects," "anticipates," "believes," "estimates," and other similar expressions or future or conditional verbs such as "will," "should," "would" and "could" are intended to identify such forward-looking statements. Forward-looking statements are made pursuant to the safe harbor provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are based on our beliefs as well as assumptions made by and information currently available to us. Accordingly, our actual results may differ materially from those expressed or implied in such forward-looking statements due to known or unknown risks and uncertainties that exist in our operations and business environment, including but not limited to:

- difficulties in product development and uncertainties related to the timing or outcome of product development;
- the cost of materials (particularly resin and nickel based components);
- the availability of raw materials and components (particularly from sole sourced suppliers);
- our ability to increase prices;
- our ability to contain costs and improve productivity;
- our ability to meet future cash flow estimates to support our goodwill impairment testing;
- direct or indirect consequences of acts of war or terrorism;
- difficulties in complying with government regulation;
- competition and technological change;
- our ability to protect and defend our intellectual property rights;
- the timing and magnitude of capital expenditures;
- our ability to identify potential new acquisitions and to successfully acquire and integrate such operations or products;
- significant fluctuations in currency exchange rates;
- economic and market conditions worldwide;
- changes in customer and or consumer spending levels;
- work stoppages due to labor disputes;
- the demand for existing and new products;
- our ability to manage worldwide customer launches of complex technical products, in particular in developing markets;
- the success of our customers' products, particularly in the pharmaceutical industry;
- significant product liability claims;
- our successful implementation of a new worldwide ERP system starting in 2009 without disruption to our operations and
- other risks associated with our operations.

Although we believe that our forward-looking statements are based on reasonable assumptions, there can be no assurance that actual results, performance or achievements will not differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Readers are cautioned not to place undue reliance on forward-looking statements. We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. Please refer to Item 1A ("Risk Factors") of Part I included in the Company's Annual Report on Form 10-K for additional risk factors affecting the Company.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

MARKET RISKS

A significant number of our operations are located outside of the United States. Because of this, movements in exchange rates may have a significant impact on the translation of the financial condition and results of operations of our entities. Our primary foreign exchange exposure is to the Euro, but we also have foreign exchange exposure to South American and Asian currencies, among others. A weakening U.S. dollar relative to foreign currencies has an additive translation effect on our financial condition and results of operations. Conversely, a strengthening U.S. dollar has a dilutive effect.

Additionally, in some cases, we sell products denominated in a currency different from the currency in which the related costs are incurred. Any changes in exchange rates on such inter-country sales may impact our results of operations.

We manage our exposures to foreign exchange principally with forward exchange contracts to hedge certain firm purchase and sales commitments and intercompany cash transactions denominated in foreign currencies.

The table below provides information, as of December 31, 2007, about our forward currency exchange contracts. The majority of the contracts expire before the end of the fourth quarter of 2008 with the exception of a few contracts on intercompany loans that expire in the third quarter of 2013.

In thousands

Year Ended December 31, 2007		
Buy/Sell	Contract Amount	Average Contractual Exchange Rate
Euro/U.S. Dollar	\$ 33,404	1.4380
Swiss Francs/Euro	27,582	0.6080
Canadian Dollar/Euro	12,730	0.6960
Euro/Brazilian Real	9,695	4.1660
Euro/British Pound	5,136	0.7190
Czech Koruna/Euro	3,474	0.0370
U.S. Dollar/Euro	3,269	0.6950
U.S. Dollar/Colombian Peso	2,368	2,104.0000
Euro/Swiss Franc	1,688	1.6390
U.S. Dollar/Argentinean Peso	1,000	3.3650
Other	3,071	
Total	<u>\$103,417</u>	

As of December 31, 2007, we have recorded the fair value of foreign currency forward exchange contracts of \$135 thousand in prepaid expenses and other current assets, \$146 thousand in accounts payable and accrued liabilities and \$2 million in deferred and other non-current liabilities in the balance sheet.

At December 31, 2007, we had a fixed-to-variable interest rate swap agreement with a notional principal value of \$20 million, which requires us to pay a variable interest rate (which was 4.8% at December 31, 2007) and receive a fixed rate of 6.6%. The variable rate is adjusted semiannually based on London Interbank Offered Rates ("LIBOR"). Variations in market interest rates would produce changes in our net income. If interest rates increase by 100 basis points, net income related to the interest rate swap agreement would decrease by less than \$0.2 million, assuming a tax rate of 31.5%. As of December 31, 2007, we recorded the fair value of the fixed-to-variable interest rate swap agreement of \$1.0 million in miscellaneous other assets with an offsetting adjustment to debt. No gain or loss was recorded in the income statement in 2007 as any hedge ineffectiveness for the period is minimal.

As of December 31, 2007, the Company had one foreign currency cash flow hedge. A French entity of AptarGroup, AptarGroup Holding SAS, has hedged the risk of variability in Euro equivalent associated with the cash flows of an intercompany loan granted in Brazilian Real. The forward contracts utilized were designated as a hedge of the changes in the cash flows relating to the changes in foreign currency rates relating to the loan and related forecasted interest. The notional amount of the foreign currency forward contracts utilized to hedge cash flow exposure was 6.7 million Brazilian Real (\$3.8 million) as of December 31, 2007. The notional amount of the foreign currency forward contracts utilized to hedge cash flow exposure was 6.7 million Brazilian Real (\$3.2 million) as of December 31, 2006. During the year ended December 31, 2007, the Company did not recognize any net gain (loss) as any hedge ineffectiveness for the period was immaterial, and the Company did not recognize any net gain (loss) related to the portion of the hedging instrument excluded from the assessment of hedge effectiveness. The Company's foreign currency forward contracts hedge forecasted transactions for approximately four years (March 2012).

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

AptarGroup, Inc. CONSOLIDATED STATEMENTS OF INCOME

AptarGroup, Inc.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands unless otherwise indicated)

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

NATURE OF BUSINESS

AptarGroup, Inc. is an international company that designs, manufactures and sells consumer product dispensing systems. The Company focuses on providing value-added components to a variety of global consumer product marketers in the personal care, fragrance/cosmetic, pharmaceutical, household and food/beverage industries. The Company has manufacturing facilities located throughout the world including North America, Europe, Asia and South America.

BASIS OF PRESENTATION

The accompanying consolidated financial statements include the accounts of AptarGroup, Inc. and its subsidiaries. The terms "AptarGroup" or "Company" as used herein refer to AptarGroup, Inc. and its subsidiaries. All significant intercompany accounts and transactions have been eliminated. Certain previously reported amounts have been reclassified to conform to the current period presentation.

STOCK SPLIT

In May 2007, the Company effected a two-for-one stock split. Previously reported information has been restated to reflect the stock split.

ACCOUNTING ESTIMATES

The financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). This process requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

CASH MANAGEMENT

The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents.

INVENTORIES

Inventories are stated at cost, which is lower than market. Costs included in inventories are raw materials, direct labor and manufacturing overhead. The costs of certain domestic and foreign inventories are determined by using the last-in, first-out ("LIFO") method, while the remaining inventories are valued using the first-in, first-out (FIFO) method.

INVESTMENTS IN AFFILIATED COMPANIES

The Company accounts for its investments in 20% to 50% owned affiliated companies using the equity method. These investments are in companies that manufacture and distribute products similar to the Company's products. The Company received dividends from affiliated companies of \$182 and \$148 in 2007 and 2005, respectively. The Company received no dividends from affiliated companies in 2006. The Company has approximately \$644,476 included in its December 31, 2007 consolidated retained earnings, which represent undistributed earnings of affiliated companies accounted for by the equity method.

PROPERTY AND DEPRECIATION

Properties are stated at cost. Depreciation is determined on a straight-line basis over the estimated useful lives for financial reporting purposes and accelerated methods for income tax reporting. Generally, the estimated useful lives are 25 to 40 years for buildings and improvements and 3 to 10 years for machinery and equipment.

FINITE-LIVED INTANGIBLE ASSETS

Finite-lived intangibles, consisting of patents, non-compete agreements and license agreements acquired in purchase transactions, are capitalized and amortized over their useful lives which range from 3 to 20 years.

GOODWILL AND INDEFINITE-LIVED INTANGIBLE ASSETS

Management believes the excess purchase price over the fair value of the net assets acquired ("Goodwill") in purchase transactions has continuing value. Goodwill and indefinite-lived intangible assets must be tested annually, or as circumstances dictate, for impairment. Management has performed an analysis of the fair values of its reporting units at December 31, 2007. The fair values of the reporting units exceeded the carrying values in 2007 and 2005 and, therefore, no impairment of goodwill was recorded in 2007 and 2005. In 2006, a goodwill impairment loss for one reporting unit of \$1,615 was recognized for a research and development company that works on electronic dispensing systems due to a decrease in active customer projects and lack of new potential applications.

IMPAIRMENT OF LONG-LIVED ASSETS

Long-lived assets, such as property, plant and equipment and finite-lived intangibles, are evaluated for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. An impairment loss is

recognized when estimated undiscounted future cash flows expected to result from the use of the asset plus net proceeds expected from disposition of the asset (if any) are less than the carrying value of the asset. When impairment is identified, the carrying amount of the asset is reduced to its fair value.

DERIVATIVES INSTRUMENTS AND HEDGING ACTIVITIES

Derivative financial instruments are recorded in the consolidated balance sheets at fair value as either assets or liabilities. Changes in the fair value of derivatives are recorded in each period in earnings or accumulated other comprehensive income, depending on whether a derivative is designated and effective as part of a hedge transaction.

RESEARCH & DEVELOPMENT EXPENSES

Research and development costs are expensed as incurred. These costs amounted to \$55,861, \$48,178 and \$45,757 in 2007, 2006 and 2005, respectively.

INCOME TAXES

The Company computes taxes on income in accordance with the tax rules and regulations of the many taxing authorities where the income is earned. The income tax rates imposed by these taxing authorities may vary substantially. Taxable income may differ from pretax income for financial accounting purposes. To the extent that these differences create differences between the tax basis of an asset or liability and its reported amount in the financial statements, an appropriate provision for deferred income taxes is made.

Except as noted below, the Company has the expressed intention to reinvest the undistributed earnings of its non-U.S. subsidiaries, which meets the indefinite reversal criteria of Accounting Principles Board Opinion Number 23, "Accounting or Income Taxes-Special Areas" ("APB 23"). A provision has not been made for U.S. or additional foreign taxes on \$644,476 of undistributed earnings of non-U.S. subsidiaries, which has been designated as permanently reinvested as of December 31, 2007. These earnings will continue to be reinvested indefinitely and could become subject to additional tax if they were remitted as dividends or lent to a U.S. affiliate, or if the Company should sell its stock in the subsidiaries. It is not practicable to estimate the amount of additional tax that might be payable on these undistributed non-U.S. earnings. The Company will continue to evaluate annually if it will repatriate non-U.S. subsidiary current year earnings or a portion thereof. In 2005, 2006 and 2007, the Company decided to repatriate a portion of non-U.S. subsidiary current year earnings in 2006, 2007 and 2008, respectively, and deferred taxes related to the repatriations were provided for in the year the decision was made. See Note 6 for more information.

TRANSLATION OF FOREIGN CURRENCIES

The functional currencies of all the Company's foreign operations are the local currencies. Assets and liabilities are translated into U.S. dollars at the rates of exchange on the balance sheet date. Sales and expenses are translated at the average rates of exchange prevailing during the year. The related translation adjustments are accumulated in a separate section of Stockholders' Equity. Realized and unrealized foreign currency transaction gains and losses are reflected in income, as a component of miscellaneous income and expense, and represented a loss of \$1,636, \$1,698 and \$1,269 in 2007, 2006 and 2005, respectively.

STOCK BASED COMPENSATION

Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards ("SFAS") 123R, "Share-Based Payment". SFAS 123R requires that all share-based compensation be recognized as an expense in the financial statements and that such cost be measured at the fair value of the award. Also under the standard, excess tax benefits related to issuance of equity instruments under share-based payment arrangements are considered financing instead of operating cash flow activities. The Company adopted, in 2006, the modified prospective method of applying SFAS 123R, which requires the recognition of compensation expense on a prospective basis. Accordingly, 2005 financial statements have not been restated.

Prior to the adoption of SFAS 123R, the Company applied APB 25 to account for stock-based awards. Under APB 25, the Company only recorded stock-based compensation expense for restricted stock unit grants, which amounted to \$0.4 million in 2005. Under APB 25, the Company was not required to recognize compensation expense for stock options. The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS 123 to stock option based compensation in 2005.

Years Ended December 31,	2005
Net income, as reported	\$ 100,034
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(5,852)
Pro forma net income	<u>\$ 94,182</u>
Earnings per share:	
Basic – as reported	<u>\$ 2.84</u>
Basic – pro forma	<u>\$ 2.68</u>
Diluted – as reported	<u>\$ 2.77</u>
Diluted – pro forma	<u>\$ 2.60</u>

SFAS 123R upon adoption required the application of the non-substantive vesting approach which means that an award is fully vested when the employee's retention of the award is no longer contingent on providing subsequent service. Under this approach, compensation costs are recognized over the requisite service period of the award instead of ratably over the vesting period stated in the grant. As such, costs are recognized immediately, if the employee is retirement eligible on the date of grant or over the period from the date of grant until retirement eligibility if retirement eligibility is reached before the end of the vesting period stated in the grant. For awards granted prior to adoption, the Company recognizes compensation costs ratably over the vesting period with accelerated recognition of the unvested portion upon actual retirement. Had the Company been previously using the non-substantive approach, stock option expense net of related tax effects would have been higher by \$0.8 million (\$.01 per share) for the year ended December 31, 2005. See Note 15 for more information.

REVENUE RECOGNITION

Product Sales. In accordance with Staff Accounting Bulletin Number 104: "Revenue Recognition", the Company's policy is to recognize revenue from product sales when the title and risk of loss has transferred to the customer, when the Company has no remaining obligations regarding the transaction and when collection is reasonably assured. The majority of the Company's products shipped from the U.S. transfers title and risk of loss when the goods leave the Company's shipping location. The majority of the Company's products shipped from Europe transfers title and risk of loss when the goods reach their destination.

Services and Other. The Company occasionally invoices customers for certain services. The Company also receives revenue from other sources such as license or royalty agreements. Revenue is recognized when services are rendered or rights to use assets can be reliably measured and when collection is reasonably assured. Service and other revenue is not material to the Company's results of operations for any of the years presented.

NOTE 2 DISCONTINUED OPERATIONS

In the fourth quarter of 2007, the Company sold its Australian operation for approximately \$6.7 million in cash. The Australian operation was primarily a sales and distribution facility with light final assembly of some products as well as some molding of dispensing closures. In the future, the Company will continue to sell its products into Australia using the buyer of this company as an agent and distributor. The Company recorded a gain after taxes on this sale of approximately \$2.2 million or approximately \$.03 per diluted share. This net gain has been reported in the consolidated statements of income as discontinued operations. The Company elected only to report the net gain as discontinued operations rather than including the full operating results as discontinued operations for all periods presented due to the immateriality of the amounts (less than 1% of net sales and income before income taxes). The Australian entity was previously reported in the Beauty and Home segment.

NOTE 3 INVENTORIES

At December 31, 2007 and 2006, approximately 23% and 21%, respectively, of the total inventories are accounted for by the LIFO method. Inventories, by component, consisted of:

	2007	2006
Raw materials	\$ 101,993	\$ 84,470
Work-in-process	59,894	49,377
Finished goods	115,774	95,403
Total	277,661	229,250
Less LIFO reserve	(5,105)	(2,795)
Total	<u>\$ 272,556</u>	<u>\$ 226,455</u>

NOTE 4 GOODWILL AND OTHER INTANGIBLE ASSETS

The Company completed its annual analysis of the fair value of its reporting units as of December 31, 2007 using both a discounted cash flow analysis and market multiple approach.

The changes in the carrying amount of goodwill for the year ended December 31, 2007, are as follows by reporting segment:

	Pharma	Beauty & Home	Closures	Total
Balance as of December 31, 2006	\$ 23,158	\$ 147,997	\$ 36,727	\$ 207,882
Acquisitions (See Note 19)	—	3,472	—	3,472
Foreign currency exchange effects	2,255	7,068	1,991	11,314
Balance as of December 31, 2007	<u>\$ 25,413</u>	<u>\$ 158,537</u>	<u>\$ 38,718</u>	<u>\$ 222,668</u>

The table below shows a summary of intangible assets for the years ended December 31, 2007 and 2006.

	Weighted Average Amortization Period (Years)	2007			2006		
		Gross Carrying Amount	Accumulated Amortization	Net Value	Gross Carrying Amount	Accumulated Amortization	Net Value
Amortization intangible assets:							
Patents	14	\$ 19,194	\$ (12,230)	\$ 6,964	\$ 17,267	\$ (9,750)	\$ 7,517
License agreements and other	7	23,557	(12,707)	10,850	21,196	(8,893)	12,303
Total intangible assets	10	<u>\$ 42,751</u>	<u>\$ (24,937)</u>	<u>\$ 17,814</u>	<u>\$ 38,463</u>	<u>\$ (18,643)</u>	<u>\$ 19,820</u>

Aggregate amortization expense for the intangible assets above for the years ended December 31, 2007, 2006 and 2005 was \$4,520, \$3,954, and \$2,549, respectively.

Estimated amortization expense for the years ending December 31 is as follows:

2008	\$ 4,737
2009	\$ 4,002
2010	\$ 3,490
2011	\$ 2,077
2012	\$ 1,072

Future amortization expense may fluctuate depending on changes in foreign currency rates. The estimates for amortization expense noted above are based upon foreign exchange rates as of December 31, 2007.

NOTE 5 ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

At December 31, 2007 and 2006, accounts payable and accrued liabilities consisted of the following:

	2007	2006
Accounts payable, principally trade	\$ 156,376	\$ 135,985
Accrued employee compensation costs	83,231	62,093
Unearned income	24,029	19,472
Other accrued liabilities	85,394	55,211
Total	\$ 349,030	\$ 272,761

NOTE 6 INCOME TAXES

Income from continuing operations before income taxes consists of:

Years Ended December 31,	2007	2006	2005
United States	\$ 16,505	\$ 21,846	\$ 31,627
International	183,490	126,460	110,326
Total	\$ 199,995	\$ 148,306	\$ 141,953

The provision for income taxes from continuing operations is comprised of:

Years Ended December 31,	2007	2006	2005
Current:			
U.S. Federal	\$ 12,737	\$ 16,612	\$ 10,925
State/Local	459	1,618	832
International	59,075	37,322	36,406
	\$ 72,271	\$ 55,552	\$ 48,163
Deferred:			
U.S. Federal/State	\$ (5,110)	\$ (9,870)	\$ (2,249)
International	(6,673)	(272)	(3,995)
	\$ (11,783)	\$ (10,142)	\$ (6,244)
Total	\$ 60,488	\$ 45,410	\$ 41,919

The gain on the sale of the discontinued operations resulted in additional tax expense of \$1,714.

The difference between the actual income tax provision and the tax provision computed by applying the statutory federal income tax rate of 35.0% in 2007, 2006 and 2005 to income before income taxes is as follows:

Years Ended December 31,	2007	2006	2005
Income tax at statutory rate	\$ 69,998	\$ 51,907	\$ 49,683
State income taxes, net of federal benefit	189	947	179
Research & development credits	(3,193)	(2,837)	(3,078)
Provision for distribution of foreign earnings	3,524	1,551	657
German tax rate reduction	(2,250)	—	—
German unremitted earnings tax credit	—	(1,584)	—
Italian government special election	(1,025)	—	(1,955)
Rate differential on earnings of foreign operations	(6,046)	(3,718)	(3,269)
Other items, net	(709)	(856)	(298)
Actual income tax provision	\$ 60,488	\$ 45,410	\$ 41,919
Effective income tax rate	30.2%	30.6%	29.5%

The tax provision for 2007 included a benefit of \$2.3 million from a reduction in the corporate tax rates in Germany. Since the new tax rates are effective for 2008, the benefits reflected are attributable to the revaluation of the deferred tax assets and liabilities using the new rates as of December 31, 2007. The \$1.0 million reduction from Italy was due to a special election in

connection with the enactment of lower corporate tax rates, effective in 2008. The affect of the special election increased current taxes by \$0.6 million, which was offset by a reduction of previously recorded deferred tax liabilities by \$1.6 million.

The tax provision for 2006 included a benefit of \$1.6 million from a change in German tax law as to the manner in which corporations receive refunds that exist from the corporate tax system that was in force in Germany until 2001. This refund is payable over a 10 year period beginning in 2008 and is shown at the appropriate discounted amount. The tax provision for 2005 included a special one-time Italian tax law policy change relating to taxation of previously issued government grants, that enabled us to reduce certain previously recorded deferred tax liabilities by approximately \$2.0 million.

Significant deferred tax assets and liabilities as of December 31, 2007 and 2006 are comprised of the following temporary differences:

	2007	2006
Deferred Tax Assets:		
Inventory	\$ 6,487	\$ 5,449
Pension liabilities	6,218	6,483
Stock options	4,033	982
Vacation	3,505	3,040
Net operating loss carryforwards	3,468	2,335
Workers compensation	2,984	1,742
Foreign tax credit carryforwards	2,360	2,248
Allowance for doubtful accounts	2,024	1,772
Accruals	1,590	896
Other	574	356
Total gross deferred tax assets	33,243	25,303
Less valuation allowance	(4,396)	(3,282)
Net deferred tax assets	28,847	22,021
Deferred Tax Liabilities:		
Depreciation and amortization	32,490	38,292
Leases	8,443	7,271
Undistributed earnings of foreign subsidiaries	2,200	500
Other	769	1,615
Total gross deferred tax liabilities	43,902	47,678
Net deferred tax liabilities	\$ 15,055	\$ 25,657

Gross deferred tax assets for tax loss carryforwards increased from \$2.3 million at December 31, 2006 to \$3.4 million at December 31, 2007. Most of the increase reflects the recording of a deferred tax asset for US state losses. These losses expire in 2015 through 2022. The remaining loss carryforwards are in multiple non-US jurisdictions. Approximately \$1.1 million of the deferred tax asset for the non-US losses are in a jurisdiction in which the losses expire in 2008 through 2014. Management believes the deferred tax assets related to this non-US jurisdiction and the US state losses will not be realized and a valuation reserve has been established.

US foreign tax credit carryforwards increased from \$2.2 million at December 31, 2006 to \$2.4 million at December 31, 2007. These credits begin to expire in 2013. Management believes the Company will not be able to realize the benefits of these deferred tax assets.

The Company has established a valuation allowance for the deferred tax assets related to the tax loss and US foreign tax credit carryforwards not expected to be realized. The valuation allowance increased from \$3.3 million at December 31, 2006 to \$4.4 million at December 31, 2007, primarily due to the recording of an allowance for the US state losses.

No provision for taxes on the cumulative earnings of non-US subsidiaries that have been permanently reinvested has been made. These earnings relate to ongoing operations and, at December 31, 2007, were approximately \$644.5 million. Deferred taxes are provided for earnings of non-US subsidiaries when we plan to remit those earnings to the US.

The Company has not provided for taxes on certain tax-deferred income of a foreign operation. The income arose predominately from government grants. Taxes of approximately \$2.6 million would become payable in the event the income was distributed.

INCOME TAX UNCERTAINTIES

The company adopted the provisions of FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" ("Fin 48") on January 1, 2007. As a result of the implementation of FIN 48, the Company recognized a \$1.6 million increase in the liability for income tax uncertainties. This increase was accounted for as a reduction to the January 1, 2007 balance of retained earnings, as required by FIN 48. A reconciliation of the beginning and ending amount of income tax uncertainties is as follows:

Balance at January 1, 2007	\$ 7,000
Increases based on tax positions for the current year	\$ 1,115
Increases based on tax positions for prior years	533
Decreases based on tax positions for prior years	(182)
Settlements	(682)
Lapse of statute of limitations	<u>\$ (1,292)</u>
Balance at December 31, 2007	<u>\$ 6,492</u>

The amount of income tax uncertainties that, if recognized, would impact the effective tax rate is \$6.0 million. For the next twelve months, the Company anticipates its liability for income tax uncertainties will decrease by \$0.7 million due to the lapse of statute of limitations in various jurisdictions and by \$0.3 million due to settlements.

The Company recognizes interest and penalties related to unrecognized tax benefits as a component of income taxes. During 2007, the Company recognized \$0.2 million in interest and penalties. The Company had approximately \$1.2 million and \$0.6 million accrued for the payment of interest and penalties as of December 31, 2007 and 2006, respectively.

The Company or its subsidiaries file income tax returns in the U.S. Federal jurisdiction and various state and foreign jurisdictions. The major tax jurisdictions the Company files in, with the years still subject to income tax examinations, are listed below:

<u>Major Tax Jurisdiction</u>	<u>Tax Years Subject to Examination</u>
United States – Federal	2004 – 2007
United States – States	2003 – 2007
France	2005 – 2007
Germany	2002 – 2007
Italy	2003 – 2007
Switzerland	1998 – 2007

NOTE 7 DEBT

Average borrowings under unsecured lines of credit were \$145.0 million and \$102.0 million for 2007 and 2006, respectively, and the average annual interest rate on short-term notes payable, which is included in the notes payable caption under current liabilities of the balance sheet was approximately 5.5% for both 2007 and 2006. There are no compensating balance requirements associated with short-term borrowings. In July of 2006, the Company entered into an amended five-year \$200 million revolving credit facility. Under this credit agreement, interest on borrowings is payable at a rate equal to London Interbank Offered Rates ("LIBOR") plus an amount based on the financial condition of the Company. The Company is required to pay a fee for this commitment. Commitment or facility fee payments in 2007, 2006 and 2005 were not significant. The amounts borrowed under this agreement were \$150.0 million and \$75.0 million at December 31, 2007 and 2006, respectively.

The revolving credit and the senior unsecured debt agreements contain covenants, with which the Company is in compliance, that include certain financial tests, including minimum interest coverage, net worth and maximum borrowings.

At December 31, the Company's long-term obligations consisted of the following:

	2007	2006
Notes payable 0.5% – 13.1%, due in monthly and annual installments through 2015	\$ 6,035	\$ 5,396
Senior unsecured notes 6.6%, due in installments through 2011	86,596	107,897
Senior unsecured notes 5.1%, due in 2011	25,000	25,000
Senior unsecured notes 6.0% due in 2016	50,000	50,000
Mortgage payable at 2.1%, due in monthly and annual installments through 2008	122	327
Capital lease obligations	4,941	7,098
	172,694	195,718
Current maturities of long-term obligations	(25,983)	(26,841)
Total long-term obligations	<u>\$ 146,711</u>	<u>\$ 168,877</u>

Based on the borrowing rates currently available to the Company for long-term obligations with similar terms and average maturities, the fair value of the Company's long-term obligations approximates its book value.

Aggregate long-term maturities, excluding capital lease obligations, which is discussed in Note 8, due annually for the five years and thereafter beginning in 2008 are \$23,610, \$22,103, \$23,209, \$21,856, \$25,361 and \$51,613 thereafter.

NOTE 8 LEASE COMMITMENTS

The Company leases certain warehouse, plant, and office facilities as well as certain equipment under noncancelable operating and capital leases expiring at various dates through the year 2055. Most of the operating leases contain renewal options and certain leases include options to purchase during or at the end of the lease term. The Company has decided to exercise its option to purchase one building, under a lease expiring in 2008, for \$9.5 million. This amount is approximately the amount expended by the lessor for the purchase of the building and improvements, which was the fair value of the facility at the inception of the lease. The Company will account for the purchase transaction as a capital expenditure in 2008.

Amortization expense related to capital leases is included in depreciation expense. Rent expense under operating leases (including taxes, insurance and maintenance when included in the rent) amounted to \$22,595, \$19,889 and \$16,831 in 2007, 2006 and 2005, respectively.

Assets recorded under capital leases consist of:

	2007	2006
Buildings	\$ 17,880	\$ 16,169
Machinery and equipment	<u>13,049</u>	<u>12,209</u>
	30,929	28,378
Accumulated depreciation	<u>(17,147)</u>	<u>(13,585)</u>
	<u>\$ 13,782</u>	<u>\$ 14,793</u>

Future minimum payments, by year and in the aggregate, under the capital leases and noncancelable operating leases with initial or remaining terms of one year or more consisted of the following at December 31, 2007:

	Capital Leases	Operating Leases
2008	\$ 2,525	\$ 14,431
2009	997	10,206
2010	794	6,906
2011	796	4,670
2012	350	2,712
Subsequent to 2012	0	<u>2,086</u>
Total minimum lease payments	5,462	<u>\$ 41,011</u>
Amounts representing interest	(521)	
Present value of future minimum lease payments	4,941	
Lease amount due in one year	<u>(2,373)</u>	
Total	<u>\$ 2,568</u>	

NOTE 9 RETIREMENT AND DEFERRED COMPENSATION PLANS

The Company has various noncontributory retirement plans covering certain of its domestic and foreign employees. Benefits under the Company's retirement plans are based on participants' years of service and annual compensation as defined by each plan. Annual cash contributions to fund pension costs accrued under the Company's domestic plans are generally at least equal to the minimum funding amounts required by the Employee Retirement Income Security Act of 1974, as amended (ERISA). Certain pension commitments under its foreign plans are also funded according to local requirements or at the Company's discretion.

In accordance with SFAS No. 158 "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132R" ("SFAS 158"), which became effective in the fourth quarter of 2006, AptarGroup is required to recognize the over funded or unfunded status of our defined benefit pension plans as an asset or liability on our balance sheet as of December 31, 2007 and 2006.

The following table presents the changes in the benefit obligations and plan assets for the most recent two years for the Company's domestic and foreign plans.

	<u>Domestic Plans</u>		<u>Foreign Plans</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Change in benefit obligation:				
Benefit obligation at beginning of year	\$ 51,405	\$ 49,603	\$ 36,107	\$ 31,848
Service cost	3,879	3,949	1,584	1,373
Interest cost	2,985	2,642	1,681	1,367
Actuarial (gain)/loss	(2,167)	(3,721)	(707)	(818)
Benefits paid	(1,085)	(1,068)	(1,169)	(877)
Foreign currency translation adjustment	—	—	3,239	3,214
Benefit obligation at end of year	<u>\$ 55,017</u>	<u>\$ 51,405</u>	<u>\$ 40,735</u>	<u>\$ 36,107</u>
Change in plan assets:				
Fair value of plan assets at beginning of year	\$ 42,553	\$ 36,599	\$ 11,819	\$ 9,043
Actual return on plan assets	2,648	4,522	532	553
Employer contribution	2,000	2,500	1,975	1,976
Benefits paid	(1,085)	(1,068)	(1,169)	(877)
Foreign currency translation adjustment	—	—	1,338	1,124
Fair value of plan assets at end of year	<u>\$ 46,116</u>	<u>\$ 42,553</u>	<u>\$ 14,495</u>	<u>\$ 11,819</u>
Funded status at end of year	\$ (8,901)	\$ (8,852)	\$ (26,240)	\$ (24,288)

The following table presents the funded status amounts recognized in the Company's Consolidated Balance Sheet as of December 31, 2007 and 2006.

	<u>Domestic Plans</u>		<u>Foreign Plans</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Non-current assets	\$ —	\$ —	\$ 510	\$ 217
Current liabilities	(90)	—	(581)	(498)
Non-current liabilities	(8,811)	(8,852)	(26,169)	(24,007)
	<u>\$ (8,901)</u>	<u>\$ (8,852)</u>	<u>\$ (26,240)</u>	<u>\$ (24,288)</u>

The following table presents the amounts not recognized as components of periodic benefit cost that are recognized in accumulated other comprehensive loss as of December 31, 2007 and 2006.

	<u>Domestic Plans</u>		<u>Foreign Plans</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Net actuarial loss	\$ 772	\$ 3,078	\$ 8,125	\$ 8,524
Net prior service cost	26	30	759	757
Tax effects	(299)	(1,243)	(2,646)	(3,395)
	<u>\$ 499</u>	<u>\$ 1,865</u>	<u>\$ 6,238</u>	<u>\$ 5,886</u>

Changes in benefit obligations and plan assets recognized in other comprehensive income in 2007 are as follows:

	<u>Domestic Plans</u>	<u>Foreign Plans</u>
Current year actuarial (gain)/loss	\$ (2,088)	\$ 190
Amortization of (gain)/loss	(218)	(513)
Amortization of prior service cost	(4)	(74)
	<u>\$ (2,310)</u>	<u>\$ (397)</u>

The following table presents the amounts in accumulated other comprehensive loss as of December 31, 2007 expected to be recognized as components of periodic benefit cost in 2008.

	<u>Domestic Plans</u>	<u>Foreign Plans</u>
Amortization of net loss	\$ 22	\$ 745
Amortization of prior service cost	4	78
	<u>\$ 26</u>	<u>\$ 823</u>

Components of net periodic benefit cost:

	<u>Domestic Plans</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Service cost	\$ 3,879	\$ 3,949	\$ 3,724
Interest cost	2,985	2,642	2,353
Expected return on plan assets	(2,726)	(2,416)	(2,317)
Amortization of net loss	218	605	468
Amortization of prior service cost	4	4	4
Net periodic benefit cost	<u>\$ 4,360</u>	<u>\$ 4,784</u>	<u>\$ 4,232</u>

	<u>Foreign Plans</u>		
	<u>2007</u>	<u>2006</u>	<u>2005</u>
Service cost	\$ 1,584	\$ 1,373	\$ 1,008
Interest cost	1,681	1,367	1,327
Expected return on plan assets	(727)	(581)	(457)
Amortization of net loss	513	601	275
Amortization of prior service cost	74	77	100
Net periodic benefit cost	<u>\$ 3,125</u>	<u>\$ 2,837</u>	<u>\$ 2,253</u>

The accumulated benefit obligation (ABO) for the Company's domestic defined benefit pension plans was \$47.4 million and \$43.5 million at December 31, 2007 and 2006, respectively. The accumulated benefit obligation for the Company's foreign defined benefit pension plans was \$34.5 million and \$30.4 million at December 31, 2007 and 2006, respectively. Although the proceeds of certain insurance contracts related to the Company's foreign plans could be used to partially offset pension commitments, the values of these contracts are not included in the Company's plan asset totals.

The following table provides the projected benefit obligation (PBO), ABO, and fair value of plan assets for all pension plans with an ABO in excess of plan assets as of December 31, 2007 and 2006.

	<u>Domestic Plans</u>		<u>Foreign Plans</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Projected benefit obligation	\$ 2,452	\$ 1,982	\$ 29,172	\$ 27,734
Accumulated benefit obligation	1,792	1,408	26,478	24,721
Fair value of plan assets	—	—	5,451	5,417

The following table provides the PBO, ABO, and fair value of plan assets for all pension plans with a PBO in excess of plan assets as of December 31, 2007 and 2006.

	<u>Domestic Plans</u>		<u>Foreign Plans</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Projected benefit obligation	\$ 55,017	\$ 51,405	\$ 39,853	\$ 35,319
Accumulated benefit obligation	47,377	43,465	33,782	29,693
Fair value of plan assets	46,116	42,553	13,103	10,812

Assumptions:

	<u>Domestic Plans</u>		<u>Foreign Plans</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Weighted-average assumptions used to determine benefit obligations at December 31:				
Discount rate	6.40%	5.80%	5.25%	4.40%
Rate of compensation increase	4.50%	4.50%	3.00%	3.00%
Weighted-average assumptions used to determine net periodic benefit cost for years ended December 31:				
Discount rate	5.80%	5.40%	4.40%	4.00%
Expected long-term return in plan assets	7.00%	7.00%	6.00%	6.00%
Rate of compensation increase	4.50%	4.50%	3.00%	3.00%

The Company develops the expected long-term rate of return assumptions based on historical experience and by evaluating input from the plans' asset managers, including the managers' review of asset class return expectations and benchmarks, economic indicators and long-term inflation assumptions.

In order to determine the 2008 net periodic benefit cost, the Company expects to use the December 31, 2007 discount rate, rate of compensation increase assumptions and the expected long-term return on domestic and foreign plan assets. The estimated effect of using these assumptions will not be significant to the Company's total net periodic benefit cost.

The Company's domestic and foreign pension plan weighted-average asset allocations at December 31, 2007 and 2006 by asset category are as follows:

Plan Assets:

	<u>Domestic Plans Assets at December 31,</u>		<u>Foreign Plans Assets at December 31,</u>	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Equity securities	65%	64%	39%	33%
Fixed income securities	21%	18%	54%	57%
Infrastructure	11%	—	—	—
Money market	3%	18%	—	—
Real estate	—	—	7%	10%
Total	100%	100%	100%	100%

The Company's investment strategy for its domestic and foreign pension plans is to maximize the long-term rate of return on plan assets within an acceptable level of risk. The investment policy strives to have assets sufficiently diversified so that adverse or unexpected results from one security type will not have an unduly detrimental impact on the entire portfolio and accordingly, establishes a target allocation for each asset category within the portfolio. The domestic plan asset allocation is reviewed on a quarterly basis and the foreign plan asset allocation is reviewed annually. Rebalancing occurs as needed to comply with the investment strategy. The domestic plan target allocation for 2008 is 60% equity securities and 40% fixed income securities and infrastructure. The foreign plan target allocation for 2008 is 33% equity securities, 57% fixed income securities and 10% real estate.

CONTRIBUTIONS

Annual cash contributions to fund pension costs accrued under the Company's domestic plans are generally at least equal to the minimum funding amounts required by ERISA. The Company contributed \$2.0 million to its domestic defined benefit plans in 2007 and expects to contribute approximately the same amount in 2008. Contributions to fund pension costs accrued under the Company's foreign plans are made in accordance with local laws or at the Company's discretion. The Company contributed approximately \$2.0 million to its foreign defined benefit plan in 2007 and expects to contribute approximately the same amount in 2008.

ESTIMATED FUTURE BENEFIT PAYMENTS

As of December 31, 2007, the Company expects the plans to make the following estimated benefit payments relating to its defined benefit plans over the next ten years:

	Domestic Plans	Foreign Plans
2008	\$ 2,029	\$ 2,455
2009	3,254	1,143
2010	3,581	2,647
2011	3,665	3,547
2012	4,685	1,980
2013 – 2017	28,209	13,849

OTHER PLANS

The Company has a non-qualified supplemental pension plan for domestic employees which provides for pension amounts that would have been payable from the Company's principal domestic pension plan if it were not for limitations imposed by income tax regulations. The liability for this plan, which is not funded, was \$2.5 million and \$2.0 million at December 31, 2007 and 2006, respectively. This amount is included in the liability for domestic plans shown above.

The Company has a defined contribution 401(k) employee savings plan available to substantially all domestic employees. Company matching contributions are made in cash up to a maximum of 3% of the participating employee's salary subject to income tax regulations. For each of the years ended December 31, 2007, 2006, and 2005, total contributions made by the Company for these plans were approximately \$1.9 million, \$1.6 million and \$1.5 million, respectively.

The Company has several foreign defined contribution plans, which require the Company to contribute a percentage of the participating employee's salary according to local regulations. For each of the years ended December 31, 2007, 2006, and 2005, total contributions made by the Company for these plans were approximately \$2.4 million, \$1.3 million and \$0.7 million, respectively.

The Company has no additional postretirement or postemployment benefit plans.

NOTE 10 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company maintains a foreign exchange risk management policy designed to establish a framework to protect the value of the Company's non-functional denominated transactions from adverse changes in exchange rates. Sales of the Company's products can be denominated in a currency different from the currency in which the related costs to produce the product are denominated. Changes in exchange rates on such inter-country sales impact the Company's results of operations. The Company's policy is not to engage in speculative foreign currency hedging activities, but to minimize its net foreign currency transaction exposure defined as firm commitments and transactions recorded and denominated in currencies other than the functional currency. The Company may use foreign currency forward exchange contracts, options and cross currency swaps to hedge these risks.

The Company maintains an interest rate risk management strategy to minimize significant, unanticipated earnings fluctuations that may arise from volatility in interest rates.

For derivative instruments designated as hedges, the Company formally documents the nature and relationships between the hedging instruments and the hedged items, as well as the risk management objectives, strategies for undertaking the various hedge transactions, and the method of assessing hedge effectiveness. Additionally, in order to designate any derivative instrument as a hedge of an anticipated transaction, the significant characteristics and expected terms of any anticipated transaction must be specifically identified, and it must be probable that the anticipated transaction will occur.

FAIR VALUE HEDGES

The Company has an interest rate swap to convert a portion of its fixed-rate debt into variable-rate debt. Under the interest rate swap contract, the Company exchanges, at specified intervals, the difference between fixed-rate and floating-rate amounts, which are calculated based on an agreed upon notional amount.

As of December 31, 2007, the Company has recorded the fair value of derivative instruments of \$995.7 thousand in miscellaneous other assets with an offsetting adjustment to debt related to a fixed-to-variable interest rate swap agreement with a notional principal value of \$20 million. No gain or loss was recorded in the income statement in 2007, 2006 or 2005 as any hedge ineffectiveness for the periods was immaterial.

CASH FLOW HEDGES

As of December 31, 2007, the Company had one foreign currency cash flow hedge. A French entity of AptarGroup, AptarGroup Holding SAS, has hedged the risk of variability in Euro equivalent associated with the cash flows of an intercompany loan granted in Brazilian Real. The forward contracts utilized were designated as a hedge of the changes in the cash flows relating to the changes in foreign currency rates relating to the loan and related forecasted interest. The notional amount of the foreign currency forward contracts utilized to hedge cash flow exposure was 6.7 million Brazilian Real (\$3.8 million) as of December 31, 2007. The notional amount of the foreign currency forward contracts utilized to hedge cash flow exposure was 6.7 million Brazilian Real (\$3.2 million) as of December 31, 2006.

During the year ended December 31, 2007, the Company did not recognize any net gain (loss) as any hedge ineffectiveness for the period was immaterial, and the Company did not recognize any net gain (loss) related to the portion of the hedging instrument excluded from the assessment of hedge effectiveness. The Company's foreign currency forward contracts hedge forecasted transactions for approximately four years (March 2012).

HEDGE OF NET INVESTMENTS IN FOREIGN OPERATIONS

A significant number of the Company's operations are located outside of the United States. Because of this, movements in exchange rates may have a significant impact on the translation of the financial condition and results of operations of the Company's foreign entities. A weakening U.S. dollar relative to foreign currencies has an additive translation effect on the Company's financial condition and results of operations. Conversely, a strengthening U.S. dollar has a dilutive effect. The Company in some cases maintains debt in these subsidiaries to offset the net asset exposure. The Company does not otherwise actively manage this risk using derivative financial instruments. In the event the Company plans on a full or partial liquidation of any of its foreign subsidiaries where the Company's net investment is likely to be monetized, the Company will consider hedging the currency exposure associated with such a transaction.

OTHER

As of December 31, 2007, the Company has recorded the fair value of foreign currency forward exchange contracts of \$135 thousand in prepaid expenses and other current assets, \$146 thousand in accounts payable and accrued liabilities and \$2.0 million in deferred and other non-current liabilities in the balance sheet. All forward exchange contracts outstanding as of December 31, 2007 had an aggregate contract amount of \$103.4 million.

NOTE 11 COMMITMENTS AND CONTINGENCIES

The Company intends to purchase in the third quarter of 2008 a building which had been previously recorded as an operating lease. The estimated purchase price of this building is expected to be approximately \$9.5 million and will be initially financed primarily using short term debt.

The Company, in the normal course of business, is subject to a number of lawsuits and claims both actual and potential in nature. Management believes the resolution of these claims and lawsuits will not have a material adverse or positive effect on the Company's financial position, results of operations or cash flows.

Under its Certificate of Incorporation, the Company has agreed to indemnify its officers and directors for certain events or occurrences while the officer or director is, or was serving, at its request in such capacity. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited; however, the Company has a directors and officers liability insurance policy that covers a portion of its exposure. As a result of its insurance policy coverage, the Company believes the estimated fair value of these indemnification agreements is minimal. The Company has no liabilities recorded for these agreements as of December 31, 2007.

NOTE 12 PREFERRED STOCK PURCHASE RIGHTS

The Company has a preferred stock purchase rights plan (the "Rights Plan") and each share of common stock has one-half of a preferred share purchase right (a "Right"). Under the terms of the Rights Plan, if a person or group acquires 15% or more of the outstanding common stock, each Right will entitle its holder (other than such person or members of such group) to purchase, at the Right's then current exercise price, a number of shares of the Company's common stock having a market value of twice such price. In addition, under certain circumstances if the Company is acquired in a merger or other business combination transaction, each Right will entitle its holder to purchase, at the Right's then current exercise price, a number of the acquiring company's common shares having a market value of twice such price.

Each Right entitles the holder under certain circumstances to buy one one-thousandth of a share of Series B junior participating preferred stock, par value \$.01 per share, at an exercise price of \$150. Each share of Series B junior participating preferred stock will entitle its holder to 2,000 votes and will have a minimum preferential quarterly dividend payment equal to the greater of \$1 per share or 2,000 times the amount paid to holders of common stock. Currently, 99,000 shares of Series B junior participating preferred stock have been reserved. The Rights will expire on April 7, 2013, unless previously exercised or redeemed at the option of the Board of Directors for \$.01 per Right.

NOTE 13 STOCK REPURCHASE PROGRAM

The Company repurchased 2.1 million and 2.2 million shares of its outstanding common stock in 2007 and 2006, respectively, at a total cost of \$76.4 million and \$57.7 million in 2007 and 2006, respectively. The Company has a remaining authorization at December 31, 2007 to repurchase 2.0 million additional shares. The timing of and total amount expended for the share repurchase program will depend upon market conditions.

NOTE 14 ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Accumulated other comprehensive income consists of foreign currency translation adjustments, net gain (loss) on derivatives and minimum pension liability adjustments. The following table summarized our accumulated other comprehensive income activity for the years ended December 31, 2007, 2006 and 2005:

	Foreign Currency Translation Adjustments (1)	Net Gain/ (Loss) on Derivatives (2)	Other Adjustments (3)	Accumulated Other Comprehensive Income
Balance – December 31, 2004	\$ 123,259	\$ —	\$ (2,936)	\$ 120,323
Period change	(94,653)	—	(1,381)	(96,034)
Balance – December 31, 2005	28,606	\$ —	(4,317)	24,289
Period change	88,678	(28)	(3,434)	85,216
Balance – December 31, 2006	117,284	(28)	(7,751)	109,505
Period change	103,757	18	1,014	104,789
Balance – December 31, 2007	\$ 221,041	\$ (10)	\$ (6,737)	\$ 214,294

- (1) Income taxes are generally not provided for foreign currency translation adjustments.
(2) Amount includes a reduction of deferred income tax assets by \$6 for the net gain on derivatives at December 31, 2007 and an increase in deferred income tax assets by \$9 related to the net loss on derivatives at December 31, 2006.
(3) Amounts include the effects of deferred income tax assets provided for minimum pension liability adjustments at December 31, 2007, 2006 and 2005 of \$2,945, \$4,638 and \$3,138, respectively, including the impact of adopting SFAS 158 in 2006.

NOTE 15 STOCK-BASED COMPENSATION

The Company issues stock options and restricted stock units to employees under Stock Awards Plans approved by shareholders. Stock options are issued to non-employee directors for their services as directors under Director Stock Option Plans approved by shareholders. Options are awarded with the exercise price equal to the market price on the date of grant and generally become exercisable over three years and expire 10 years after grant. Restricted stock units generally vest over three years.

Compensation expense recorded attributable to stock options for the year ended December 31, 2007 was approximately \$14.0 million (\$10.5 million after tax), or \$.15 per share basic and diluted. The income tax benefit related to this compensation expense was approximately \$3.5 million. Approximately \$13.1 million of the compensation expense was recorded in selling, research & development and administrative expenses and the balance was recorded in cost of sales. Compensation expense recorded attributable to stock options for the year ended December 31, 2006 was approximately \$13.3 million (\$8.7 million after tax), or \$.12 per share basic and diluted. The income tax benefit related to this compensation expense was approximately \$4.6 million. Approximately \$12.4 million of the compensation expense was recorded in selling, research & development and administrative expenses and the balance was recorded in cost of sales.

The Company uses historical data to estimate expected life and volatility. The weighted-average fair value of stock options granted under the Stock Awards Plans was \$9.32, \$8.05 and \$7.74 per share in 2007, 2006 and 2005, respectively. These values were estimated on the respective dates of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

Stock Awards Plans: Years ended December 31,	2007	2006	2005
Dividend Yield	1.4%	1.6%	1.4%
Expected Stock Price Volatility	24.6%	24.8%	27.2%
Risk-free Interest Rate	4.8%	4.3%	4.0%
Expected Life of Option (years)	7.0	7.0	7.0

There have been no grants under the Director Stock Option Plan during 2007. The fair value of stock options granted under the Director Stock Option Plans in 2006 and 2005 was \$8.63 and \$8.30 per share, respectively. These values were estimated on the respective date of the grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

Director Stock Option Plans: Years ended December 31,	2007	2006	2005
Dividend Yield	—	1.5%	1.2%
Expected Stock Price Volatility	—	24.8%	26.9%
Risk-free Interest Rate	—	5.1%	4.1%
Expected Life of Option (years)	—	7.0	7.0

A summary of option activity under the Company's stock option plans as of December 31, 2007, and changes during the period then ended is presented below:

	Stock Awards Plans		Director Stock Option Plans	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding, January 1, 2007	7,327,874	\$ 18.70	220,000	\$ 20.68
Granted	1,249,500	30.49	—	—
Exercised	(1,141,639)	14.28	(67,000)	16.08
Forfeited or expired	(30,397)	26.00	—	—
Outstanding at December 31, 2007	7,405,338	\$ 21.34	153,000	\$ 22.70
Exercisable at December 31, 2007	4,976,724	\$ 17.92	125,000	\$ 21.99
Available for future grants	1,609,629		44,000	

Weighted-Average Remaining Contractual Term (Years):

Outstanding at December 31, 2007	6.2	6.1
Exercisable at December 31, 2007	5.1	5.8

Aggregate Intrinsic Value (\$000):

Outstanding at December 31, 2007	\$ 144,926	\$ 2,786
Exercisable at December 31, 2007	\$ 114,406	\$ 2,365

Intrinsic Value of Options Exercised (\$000) During the Years Ended:

December 31, 2007	\$ 26,028	\$ 1,262
December 31, 2006	\$ 18,972	\$ 54
December 31, 2005	\$ 14,114	\$ 158

The fair value of shares vested during the years ended December 31, 2007, 2006 and 2005 was \$9.5 million, \$8.3 million and \$7.3 million, respectively. Cash received from option exercises was approximately \$19.1 million and the tax deduction from option exercises was approximately \$6.8 million in the year ended December 31, 2007. As of December 31, 2007, the remaining valuation of stock option awards to be expensed in future periods was \$5.0 million and the related weighted-average period over which it is expected to be recognized is 1.4 years.

The fair value of restricted stock grants is the market price of the underlying shares on the grant date. A summary of restricted stock unit activity as of December 31, 2007, and changes during the period then ended is presented below:

	Shares	Weighted-Average Grant-Date Fair Value
Nonvested at January 1, 2007	15,700	\$ 24.66
Granted	14,512	30.63
Vested	(9,114)	23.27
Nonvested at December 31, 2007	21,098	\$ 29.36

Compensation expense recorded attributable to restricted stock unit grants for the years ended December 31, 2007 and 2006 was approximately \$449 thousand and \$388 thousand, respectively. The fair value of units vested during the years ended December 31, 2007, 2006 and 2005 was \$212 thousand, \$421 thousand and \$494 thousand, respectively. The intrinsic value of

units vested during the years ended December 31, 2007, 2006 and 2005 was \$290 thousand, \$384 thousand and \$404 thousand, respectively. As of December 31, 2007, there was \$73 thousand of total unrecognized compensation cost relating to restricted stock unit awards which is expected to be recognized over a weighted average period of 1.5 years.

NOTE 16 REDEPLOYMENT PROGRAM

The Company announced in the third quarter of 2005 a plan to reduce and redeploy certain personnel in its Beauty & Home fragrance/cosmetic operations in France. The objective of this plan was to better align production equipment and personnel between several sites in France to ultimately reduce costs and maintain competitiveness. This plan was implemented in phases over a two year period and is complete as of December 31, 2007. The remaining reserve amount of \$953 thousand is expected to be paid out in 2008. The plan accomplished a headcount reduction of approximately 70 people. Total costs associated with the Redeployment Program were approximately \$7.4 million before taxes over the two year period and primarily related to employee severance costs. Approximately \$1.6 million of such charges before tax and \$1.1 million after-tax or approximately \$.02 per diluted share were recorded in 2007. Approximately \$2.1 million of such charges before tax and \$1.4 million after-tax or approximately \$.04 per diluted share were recorded in 2006. The following tables below highlight the pre-tax charges and changes in the reserves for 2007 and 2006. All charges related to the Redeployment Program are included in Cost of Sales in the income statement.

	Beginning Reserve At 01/01/07	Charges For The Year Ended 12/31/07	Cash Paid	FX Impact	Ending Reserve At 12/31/07

NOTE 18 SEGMENT INFORMATION

Beginning with the first quarter of 2006, the Company has been reporting three new business segments that reflect AptarGroup's realigned internal financial reporting structure. 2005 information has been conformed to the current presentation.

The Company operates in the packaging components industry, which includes the development, manufacture and sale of consumer product dispensing systems. Operations that sell spray and lotion dispensing systems primarily to the personal care, fragrance/cosmetic and household markets form the Beauty & Home segment. Operations that sell dispensing systems to the pharmaceutical market form the Pharma segment. Operations that sell closures to each market served by AptarGroup form the Closures segment.

The accounting policies of the segments are the same as those described in Note 1, Summary of Significant Accounting Policies. The Company evaluates performance of its business segments and allocates resources based upon earnings before interest expense in excess of interest income, stock option and corporate expenses and income taxes (collectively referred to as "Segment Income"). These measures should not be considered in isolation or as a substitute for net income, net cash provided by operating activities or other income statement or cash flow statement data prepared in accordance with GAAP or as measures of profitability or liquidity. In addition, these measures, as we determine them, may not be comparable to related or similarly titled measures reported by other companies. The Company accounts for intersegment sales and transfers as if the sales or transfers were to third parties.

Financial information regarding the Company's reportable segments is shown below:

Years Ended December 31,	2007	2006	2005
Total Sales:			
Beauty & Home	\$ 1,015,694	\$ 849,736	\$ 705,749

(2) Sales are attributed to countries based upon where the sales invoice to unaffiliated customers is generated.

No single customer represents 10% or more of the Company's net sales in 2007, 2006 or 2005.

NOTE 19 ACQUISITIONS

During the first quarter of 2007, the Company acquired Moderne Verpackungssysteme GmbH ("MVS") for approximately \$5.2 million in cash. No debt was assumed in the transaction. MVS, located in Germany, is a supplier of bag-on-valve assembled products. The excess of the purchase price over the fair value of assets acquired and liabilities assumed was allocated to Goodwill. Goodwill of approximately \$3.5 million was recorded on the acquisition. The condensed consolidated statement of income includes MVS' results of operations from February 15, 2007, the date of the acquisition and the acquisition is included in the Beauty and Home reporting segment.

During the first quarter of 2006, the Company acquired the net assets of CCL Dispensing Systems, LLC ("CCLDS") for approximately \$21.3 million in cash. No debt was assumed in the transaction. CCLDS is located in Libertyville, Illinois and produces primarily dispensing closures. The excess of the purchase price over the fair value of assets acquired and liabilities assumed was allocated to Goodwill. Goodwill of approximately \$9.5 million was recorded on the acquisition and is deductible for tax purposes. CCLDS' annual revenues are approximately \$18 million. The consolidated statements of income includes CCLDS' results of operations from February 6, 2006, the date of the acquisition.

During the third quarter of 2006, the Company acquired the net assets of Augros do Brasil Ltda. ("Augros") for approximately \$5.3 million in cash. Approximately \$1.8 million of debt was assumed in the transaction. Augros is located in Brazil and is involved in injection molding and decorating (including serigraphy and hot stamping) of plastic components primarily for the fragrance and cosmetics market. The excess of the purchase price over the fair value of assets acquired and liabilities assumed was allocated to Goodwill. Goodwill of approximately \$2.4 million was recorded on the acquisition. Augros annual revenues were approximately \$11 million. The condensed consolidated statements of income include Augros' results of operations from July 28, 2006, the date of the acquisition.

During the third quarter of 2006, the Company also acquired the remaining 65% that it did not already own of Seaquist Engelmann S.A.I.C.F. e I. ("Engelmann") for \$7.5 million in cash. No debt was assumed in the transaction. Engelmann is located in Argentina and produces primarily dispensing closures. The excess of the purchase price over the fair value of assets acquired and liabilities assumed was allocated to Goodwill. Goodwill of approximately \$3.3 million was recorded on the acquisition. Engelmann annual revenues were approximately \$8 million. The consolidated statements of income includes Engelmann's results of operations from August 30, 2006, the date of the acquisition.

During the fourth quarter of 2006, the Company acquired the remaining 40% of a consolidated subsidiary, Graphocolor SA ("Graphocolor"), it did not previously own for approximately \$4.5 million. Graphocolor is located in France and performs stamping and anodizing of metal components used in some dispensing pumps for the fragrance/cosmetic and pharmaceutical markets. No goodwill was recorded in the transaction as the purchase price was less than the fair value of assets acquired and liabilities assumed.

NOTE 20 QUARTERLY DATA (UNAUDITED)

Quarterly results of operations and per share information for the years ended December 31, 2007 and 2006 are as follows:

	Quarter				Total for Year
	First	Second	Third	Fourth	
Year Ended December 31, 2007:					
Net sales	\$ 449,841	\$ 472,876	\$ 485,692	\$ 483,758	\$ 1,892,167
Gross profit (1)	121,418	124,451	124,339	119,240	489,448

(1) Gross profit is defined as net sales less cost of sales and depreciation.

(2) The stock price high and low amounts are based upon intra-day New York Stock Exchange composite price history.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of AptarGroup, Inc.:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of AptarGroup, Inc. and its subsidiaries at December 31, 2007 and December 31, 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in "Management's Report on Internal Control over Financial Reporting", under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 15, Note 9 and Note 6, to the consolidated financial statements, the Company changed the manner in which it accounts for stock-based compensation and defined benefit pension plans in 2006 and the manner which it accounts for income taxes in 2007, respectively.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

DISCLOSURE CONTROLS AND PROCEDURES

The Company's management has evaluated, with the participation of the chief executive officer and chief financial officer of the Company, the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of December 31, 2007. Based on that evaluation, the chief executive officer and chief financial officer have concluded that these controls and procedures were effective as of such date.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. The Company's management has evaluated, with the participation of the chief executive officer and chief financial officer of the Company, the effectiveness of our internal control over financial reporting as of December 31, 2007 based on the framework in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation under the framework in *Internal Control – Integrated Framework*, management has concluded that our internal control over financial reporting was effective as of December 31, 2007.

PricewaterhouseCoopers LLP, independent registered public accounting firm, has issued an attestation report on the effectiveness of our internal control over financial reporting. This report appears on page 50.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

No change in the Company's internal control over financial reporting (as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the Company's fiscal quarter ended December 31, 2007 that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

Certain information required to be furnished in this part of the Form 10-K has been omitted because the Company will file with the Securities and Exchange Commission a definitive proxy statement pursuant to Regulation 14A under the Securities Exchange Act of 1934 no later than April 30, 2008.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information with respect to directors may be found under the caption "Proposal 1 Election of Directors" in the Company's Proxy Statement for the Annual Meeting of Stockholders to be held on April 30, 2008 (the "2008 Proxy Statement") and is incorporated herein by reference.

Information with respect to executive officers may be found under the caption "Executive Officers" in Part I of this report and is incorporated herein by reference.

Information with respect to audit committee members and audit committee financial experts may be found under the caption "Corporate Governance – Audit Committee" in the 2008 Proxy Statement and is incorporated herein by reference.

Information with respect to the Company's Code of Business Conduct and Ethics may be found under the caption "Corporate Governance – Code of Business Conduct and Ethics" in the 2008 Proxy Statement and is incorporated herein by reference. Our Code of Business Conduct and Ethics is available through a link on the Investor Relations page of our website (www.aptargroup.com).

The information set forth under the heading "Section 16(a) Beneficial Ownership Reporting Compliance" in the 2008 Proxy Statement is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information set forth under the headings “Board Compensation”, “Executive Officer Compensation” and “Compensation Committee Report” in the 2008 Proxy Statement is incorporated herein by reference. The information included under the heading “Compensation Committee Report” in the 2008 Proxy Statement shall not be deemed to be “soliciting” material or to be “filed” with the Securities and Exchange Commission or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Securities Exchange Act of 1934 as amended.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information set forth under the heading “Security Ownership of Certain Beneficial Owners, Directors and Management” and “Equity Compensation Plan Information” in the 2008 Proxy Statement is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information set forth under the heading “Transactions with Related Persons” and “Corporate Governance-Independence of Directors” in the 2008 Proxy Statement is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Information with respect to the independent registered public accounting firm fees and services may be found under the caption “Proposal 6 – Ratification of Independent Registered Public Accounting Firm Fees” in the 2008 Proxy Statement. Such information is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) The following documents are filed as a part of this report:

Description	
1) <i>All Financial Statements</i>	
The financial statements are set forth under Item 8 of this report on Form 10-K	
Consolidated Statements of Income	25
Consolidated Balance Sheets	26
Consolidated Statements of Cash Flows	28
