Dear Shareholder,

The year 2015 marked the 160th anniversary of Crane Co.'s founding, and I am honored to be one of the 11,200 associates of this great company. Over this time, the company has seen many strong and challenging market cycles, and 2015 was certainly more challenging than we anticipated as the year began.

We entered last year facing pressure from a stronger U.S. dollar, along with Fluid Handling end markets that were beginning to soften from the collapse of oil and gas prices. The entire industry suffered as these trends deteriorated over the course of 2015, exacerbated by incremental regional weakness, most notably in China. Our financial results reflect the market reality that we—and our peers—faced last year. However, we reacted to changing market conditions quickly, and took necessary and prudent cost measures while continuing to make the equally necessary and appropriate growth investments; together, these actions position us for future profitable growth.

In total, we initiated three rounds of repositioning actions in Fluid Handling over the last 18 months, including three facility consolidations and the related associate resource reductions. These were difficult decisions, but necessary to preserve our competitive position and protect margins in the face of such pronounced market weakness. Combined with our MEI integration activities, these actions are expected to deliver more than \$25 million of cost savings in 2016, mitigating the headwinds we expect to encounter including continued soft Fluid Handling end markets and further unfavorable foreign exchange. At this point, we believe that we have struck an appropriate balance between cost measures and continued investments for growth, and ensuring we are positioned to capitalize on an eventual market recovery.

Given the difficult market conditions, we are proud of our financial performance. Excluding Special Items, we deleveraged at 19% compared to the prior year, with adjusted operating profit down 8% on a 6% decline in total sales. Further, while Fluid Handling received a disproportionate amount of attention in 2015 given the volatility in its end markets, our other three business segments improved their adjusted margins by 170 basis points compared to 2014.

OUR LONG-TERM STRATEGY IS UNCHANGED

For decades, Crane has been a diversified manufacturer of highly engineered industrial products. We choose to compete in markets where we have competitive differentiation and scale. We will continue to leverage our resources as an integrated operating company, and to reinvest in our three global growth platforms, both organically and through strategic acquisitions. Over time, we believe that this strategy will enable us to deliver 10% average annual EPS growth.

We will continue to execute this strategy while remaining committed to the values of our founder, R.T. Crane, which are at the heart of our culture: to conduct business “in the strictest honesty and fairness; to avoid all deception and trickery; to deal fairly with both customers and competitors; to be liberal and just toward employees; and to put my whole mind upon the business.”

WE EXPECT ANOTHER DIFFICULT YEAR IN 2016

While we remain very optimistic about our long-term prospects, many of the challenges we faced last year are expected to continue into 2016, including unfavorable foreign exchange, low oil prices, reduced capital spending across the petrochemical and related sectors, and overcapacity in the global power markets. We also face a transition year in Aerospace & Electronics, with continued investment spending required to prepare for the new programs we have won supporting our customers' new platform launches. Given these headwinds, we expect EPS in 2016 of \$3.85–\$4.15, approximately flat to down 7% compared to 2015 adjusted EPS of \$4.13. While adjusted earnings are expected to decline, we are forecasting 2016 free cash flow of \$190–\$220 million, flat to up 16% compared to 2015.

CONTINUED INVESTMENT FOR PROFITABLE GROWTH

At Fluid Handling, Crane remains customer focused, and our investment in future growth has not slowed. Fluid Handling continues to expand its product portfolio, with recent new product additions across the Nuclear, Chemical, Municipal, and Oil & Gas markets. For example, our new SH-32 Frame pump increases our served market for municipal pumps by 33%, and our 2015 introduction of our low-pressure gate, globe and check valve platform expanded our process valve served market by \$500 million. We have also continued to invest in our global footprint, including an investment in Ningjin, China for localization of our Xomox lined products that will drive 30% variable cost reduction. New product plans for 2016 include a line of triple-offset butterfly valves to improve our product portfolio for the Power markets. In addition, our Canadian commercial valve distribution business delivered positive organic growth in 2015 despite end market declines in the high single-digit range, and our instrumentation business expanded its market share with important wins in the heavy-duty truck space.

In Aerospace & Electronics, we recently broke ground on our first greenfield facility in many years to add testing capabilities for the next generation of fuel flow transmitters. This investment is necessary to support the higher pressure and temperature conditions in newer, more fuel-efficient aircraft engines. Winning the fuel flow transmitter content across all major new narrowbody, widebody and regional jet platforms demonstrates the strength of our engineering and product development capabilities.

Payment & Merchandising Technologies has a robust new product pipeline, and our engineering capability in this business is second to none. At Crane Payment Innovations, we launched the SCR Bill Recycler product last year. SCR offers improved reliability, better security, lower cost of operations, and two-note recycling, improving our already strong value proposition for both the Financial Services and Gaming vertical markets. We are pursuing many new opportunities, and we are particularly excited about growth potential in the Financial Services sector including bill payment and self-service payment kiosks across emerging markets, along with bank branch transformation initiatives in Europe and North America.

Crane Merchandising Systems continues to transform the vending industry with products and solutions that improve our customers' productivity and profitability, including wireless machine monitoring and diagnostics, dynamic scheduling and route management software and digital advertising and promotions. In addition, our ergonomic interfaces and intuitive touch screen capabilities simplify the customer experience for easy, seamless transactions.

And in our Engineered Materials business, we launched Crane Gold in 2015, a higher gloss fiberglass reinforced plastic solution for the Recreational Vehicle market at an attractive price point.

These are just a few examples of the many new product introductions and business opportunities we have pursued over the last year. Combined with our continued focus on operational excellence, customer service, channel management, and regional expansion, we have never been more excited about the growth opportunities we have ahead of us.

WELL POSITIONED FOR 2017 AND BEYOND

Crane maintains a strong, investment grade balance sheet. Our businesses generate significant free cash flow and we use this cash to invest in our existing business and to make acquisitions, to pay down debt, and to repurchase shares. We also pay an attractive dividend that we've consistently grown along with earnings.

Near-term challenges remain, but we are focused on the opportunities in 2017 and beyond. The Aerospace & Electronics markets are expected to remain strong for years to come with record backlogs at the major aircraft manufacturers. Payment & Merchandising will build off of its solid growth in 2015, benefiting from secular trends including urbanization, a growing global middle class, and our customers' needs for productivity and cost saving solutions. Fluid Handling has the most challenging environment today, but with some of the oldest and strongest brands in the industry, and an enviable reputation for quality and reliability, the business is well prepared to benefit as end markets recover.

These opportunities, along with the dedication of Crane's associates, keep me excited and encouraged about our future. I am very proud of the thousands of Crane associates who work diligently every day to create value for our customers and shareholders. This team executed well in 2015, rising to the challenge of an unexpectedly difficult environment. I also wish to thank our customers, suppliers and shareholders for their continued confidence in us, as well as the Board of Directors for their guidance and encouragement.

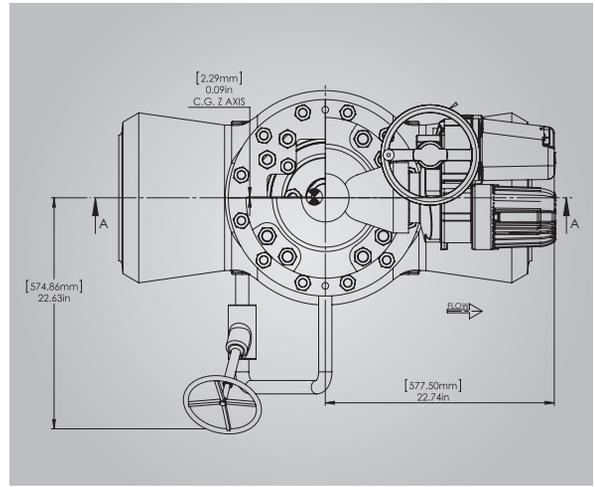

Sincerely,

Max H. Mitchell

President and Chief Executive Officer

FLUID HANDLING

Crane's Fluid Handling segment is a global leader in providing industrial fluid control products, including valves, pumps, lined pipe and instrumentation. Crane Fluid Handling excels in critical performance and severe service applications that require the highest reliability. The business primarily serves Chemical, Power, Oil & Gas, Non-Residential Construction, and General Industrial end markets.

STRONG BUSINESS IN CHALLENGING MARKETS

Fluid Handling is Crane Co.'s largest segment, contributing 40% of the Company's total revenues. The business offers technology-differentiated products that allow us to receive a premium for the value we bring to our customer: meeting/exceeding their application requirements, providing superior quality and reliability, and best-in-class lead times and delivery. In addition, a relentless pursuit of productivity initiatives that improve our cost position and permit greater customer responsiveness is embedded throughout our culture.

Despite our strong market position, 2015 was very challenging, particularly for our process valve business serving the Chemical, Oil & Gas, Power, and General Industrial end markets. In these markets, weak commodity prices and concerns about global industrial demand have caused customers to defer both new projects and maintenance activities. These factors, along with significant unfavorable foreign exchange, contributed to a 14% decline in 2015 sales.

ANOTHER CHALLENGING YEAR IN 2016, BUT EXCITED ABOUT THE LONG-TERM

We expect revenue to decline further in 2016, reflecting continued uncertainty in industrial end markets. In response to the challenging end market environment, we completed three separate rounds of repositioning activities over the last 18 months, bringing our cost structure in line with current market conditions. These actions, combined with our ongoing pursuit of productivity, position the business well for profitable growth as end market conditions improve.

The long-term demand outlook for Fluid Handling is encouraging. As one of the few global players within our served market, we will benefit from global infrastructure development, increasingly stringent environmental protection requirements, urbanization, and a growing middle class in emerging economies. We believe that Fluid Handling can achieve above-market growth rates by our continued investment in product innovation, channel development, geographic expansion in emerging regions, and global project management.

PAYMENT & MERCHANDISING TECHNOLOGIES

Crane Payment & Merchandising Technologies is comprised of Crane Payment Innovations (CPI) and Crane Merchandising Systems. The business is one of the world's largest manufacturers of coin, bill, and cashless payment solutions, vending equipment, and related software and wireless communications technology.

TECHNOLOGY AND INNOVATION DRIVING GROWTH

CPI is a global leader in currency validation and cash management systems, delivering innovative solutions that enhance our customers' profitability. Importantly, CPI also improves the consumer experience—from facilitating the purchase of train tickets in China, to enabling mobile payments at a vending machine, to the convenience of self-checkout at a local grocery store. Cash remains the world's dominant method of payment, and CPI is the global leader in coin and bill acceptance.

CPI's payment solutions provide significant value to our customers by lowering their cost of operations through improved productivity, enhanced security, and greater customer satisfaction. In addition, when our customers buy our products, they depend on us not only for best-in-class reliability and durability, but also for critical support throughout the product's life. These requirements for highly engineered technologies and ongoing field support breed business partnerships that foster continued long-term profitable growth.

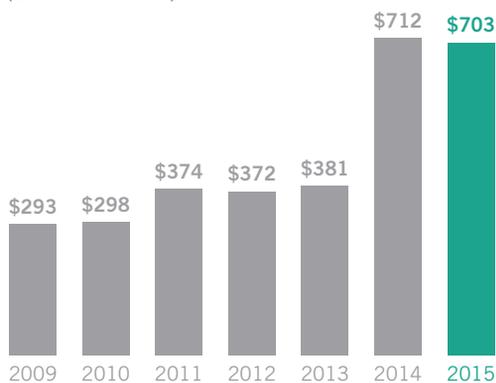

Consistent innovation in our Crane Merchandising Systems business is also improving our customers' productivity and

profitability by increasing operator same-store sales with technologies such as wireless machine monitoring and diagnostics, dynamic scheduling and vending operator route management software. In addition, our ergonomic interfaces and intuitive touch screen capabilities simplify the consumer engagement experience, enabling easy, seamless transactions while at the same time providing digital advertising and promotions.

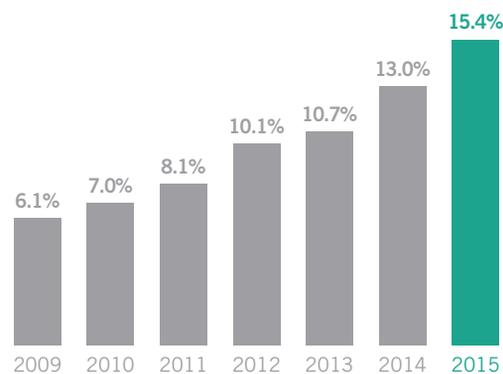

STRONG 2015, WITH POSITIVE OUTLOOK FOR 2016 AND BEYOND

Payment & Merchandising Technologies organic sales increased 6% in 2015, driven by strength across most of the segment's vertical markets and geographies. Operating profit and margins also significantly improved, reflecting stronger sales, productivity, and acquisition synergies related to the MEI transaction. We expect another strong year in 2016, with continued revenue growth and margin expansion. Longer term, we believe there is additional opportunity for even further margin improvement, as we continue to drive productivity and operational efficiencies throughout the business while at the same time generating attractive, above-GDP top line growth.

Crane's Aerospace & Electronics segment delivers proven, reliable systems, components, and power solutions that excel in tough environments, from engines and landing gear to avionics and satellites. The business primarily serves the commercial and military aerospace industries. Virtually all commercial and military aircraft fly with products manufactured by Crane Aerospace & Electronics.

EXCITING MULTI-YEAR OUTLOOK DRIVEN BY OUR POSITION ON CRITICAL PLATFORMS

The multi-year growth outlook for Aerospace & Electronics remains very strong, with over 13,000 aircraft in backlog at the major commercial aircraft manufacturers today. These manufacturers are forecast to deliver well over 30,000 new aircraft to commercial airlines over the next 20 years. Approximately 70% of those expected deliveries are for high volume, next-generation single-aisle aircraft where our Aerospace & Electronics segment has already won substantial content—and we continue to pursue new opportunities on these platforms. We expect many years of profitable revenue growth, both from Crane products on new aircraft, and from products on in-service aircraft where we enjoy substantial aftermarket sales that provide a stable, high margin revenue stream from a large and growing installed base.

SALES GROWTH WILL ACCELERATE IN 2016 AND BEYOND

Sales were generally flat in 2015, with fairly stable commercial markets, and weaker defense original equipment markets offset by stronger defense aftermarket sales. We expect sales to improve in 2016 with substantial Power and Microwave sales related to a large defense contract, as well as from improved demand from commercial customers. We expect

notably stronger commercial demand starting in late 2016 and accelerating in 2017 and beyond, as the major aircraft manufacturers introduce new models and increase production rates.

Investment spending in this business will remain at elevated levels through 2016 as we complete solutions for the next generation of aircraft. However, our continued focus on productivity and cost reduction, including completing recent repositioning actions, allows Crane Aerospace & Electronics to fund our growth investments while maintaining margins well above the industry average. In addition, we believe that the 2015 internal merger of our Aerospace and Electronics business units will help drive further customer intimacy and improve coordination of product development activities as we begin to work with our customers as a single, integrated business.

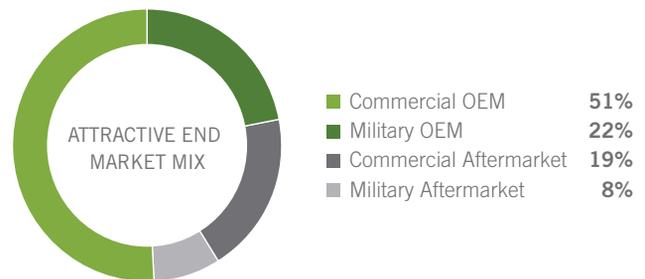

SUSTAINABLE COMPETITIVE ADVANTAGE THROUGH INNOVATION AND CUSTOMER FOCUS

We remain committed to investing in technology and delivering innovative, high reliability products that operate in extreme conditions. These characteristics, together with our continued investments in application engineering capability and a strong reputation for unparalleled customer support, have enabled us to execute successfully on our strategy to drive long-term, profitable growth.

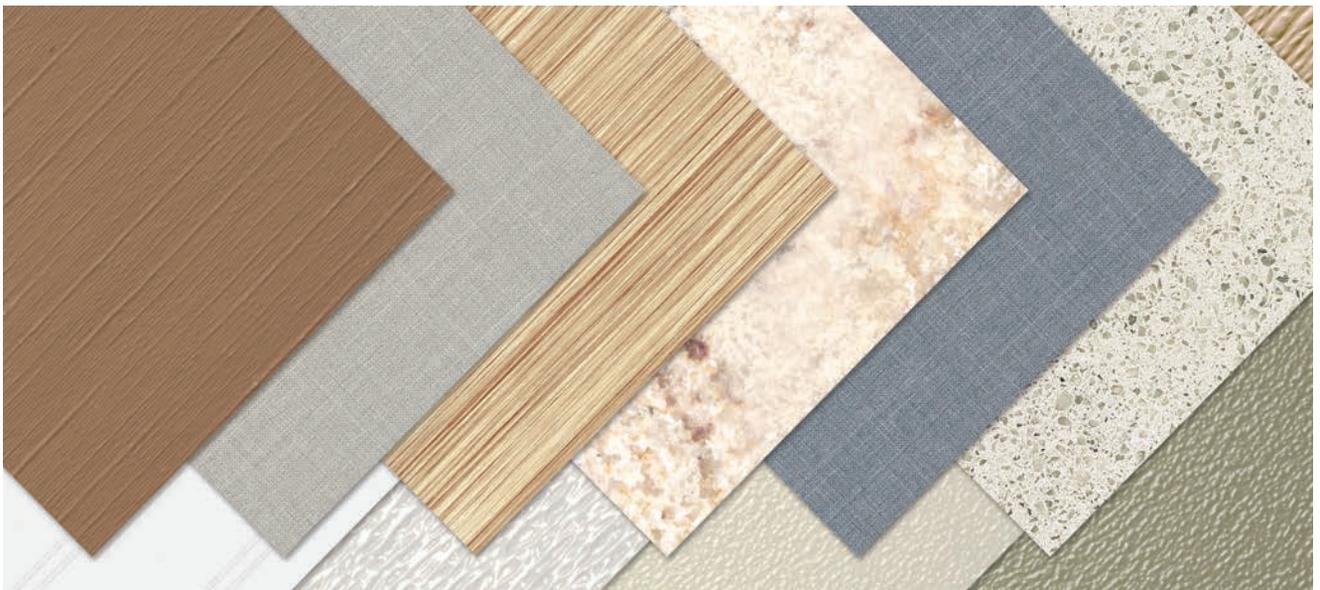

NUMBER OF AIRCRAFT IN BACKLOG

~9 years in backlog at current production rates

ENGINEERED MATERIALS

Crane's Engineered Materials segment is a leading manufacturer of fiberglass reinforced plastic (FRP) composite materials, providing solutions for recreational vehicle, truck trailer and construction markets. Crane's FRP products provide superior performance characteristics, replacing traditional metals and woods in a variety of applications.

FRP IS THE SOLUTION OF CHOICE IN KEY TARGET MARKETS

Crane's FRP products have clear advantages compared to alternative materials, including high strength and durability; low maintenance and easy installation; a wide range of colors, finishes, and textures; and resistance to chemicals, stains, mold and mildew. These differentiators make our composite materials a preferred choice for a variety of uses, from recreational vehicles (RVs) where high gloss finishes, durability, and low weight are critical, to construction applications where ease of installation and moisture resistance are important advantages.

CONTINUED PROFITABLE GROWTH

In 2015, the Engineered Materials segment delivered its highest margins of the past decade, reaching 19%, driven by productivity, lower input costs, and continued end market strength. We expect RV industry volumes to remain at historically high levels in 2016, supported by strong consumer confidence, low fuel prices, and low interest rates. In addition, in 2015, we completed a major product launch of Crane Gold—a higher gloss, coilable sidewall panel for the RV industry, offered at an attractive and competitive price point. Initial customer response

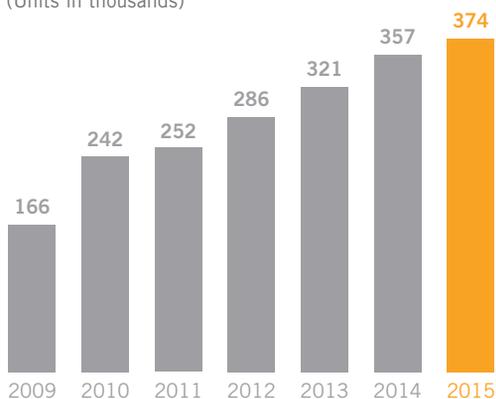

has been very positive, and our continued innovative new product development initiatives, along with an intense focus on customer service, secure Crane's strong position in the RV market.

Longer term, the RV industry should benefit from demographic trends with a wave of Americans nearing retirement, existing RV owners reaching upgrade stages, as well as a growing American preference for domestic travel.

The Building Products business is well positioned to benefit from a gradual recovery in the U.S. non-residential construction markets where we supply durable wall solutions to the hospitality, retail, education and healthcare end markets. The Transportation business has benefited from a strong trailer market and steady truck body demand, where we supply lightweight durable solutions used in the construction of vehicles. In both Building Products and Transportation, we continue to identify and pursue new niche growth opportunities, such as wall solutions for clean rooms, exterior cladding for insulated tank containers, and composite floors and truck bodies. In addition, we expect the continued displacement of wood, metal and other traditional materials to provide incremental growth.

NON-GAAP FINANCIAL DATA

RECONCILIATION OF NON-GAAP FINANCIAL MEASURES

The Company reports its financial results in accordance with U.S. generally accepted accounting principles (GAAP). Certain non-GAAP measures, however, have been provided to facilitate comparison with the prior year. Management believes that non-GAAP financial measures, which exclude certain non-recurring items, present additional useful comparisons between current results and results in prior operating periods, providing investors with a clearer view of the underlying trends of the business. Management also uses these non-GAAP financial measures in making financial, operating, planning and compensation decisions and in evaluating the Company's performance.

In addition, Free Cash Flow provides supplemental information to assist management and investors in analyzing the Company's ability to generate liquidity from its operating activities. The measure of Free Cash Flow does not take into consideration certain other non-discretionary cash requirements such as, for example, mandatory principal payments on the Company's long-term debt. Non-GAAP financial measures, which may be inconsistent with similarly captioned measures presented by other companies, should be viewed in addition to, and not as a substitute for, the Company's reported results prepared in accordance with GAAP.

COMMITTEES

The Board of Directors has four standing committees, namely the Executive Committee, Audit Committee, Management Organization and Compensation Committee, and Nominating and Governance Committee.

Other than the Executive Committee, each committee is composed entirely of independent directors as defined by the NYSE.

EXECUTIVE COMMITTEE

This committee, which meets when a quorum of the full Board of Directors cannot be readily obtained, may exercise any of the powers of the Board of Directors, except for: (i) approving an amendment of the Company's Certificate of Incorporation or By-Laws; (ii) adopting an agreement of merger or sale of substantially all of the Company's assets or dissolution of the Company; (iii) filling vacancies on the Board or any committee thereof; or (iv) electing or removing officers of the Company.

AUDIT COMMITTEE

This committee is the Board's principal agent in fulfilling legal and fiduciary obligations with respect to matters involving the accounting, auditing, financial reporting, internal control, legal compliance and risk management functions of the Company. This includes oversight of the integrity of financial statements, authority for retention and compensation of the Company's independent auditors, evaluation of qualifications, independence and performance of the Company's independent auditors, review of staffing and performance of the internal audit function and oversight of the Company's compliance with legal and regulatory requirements.

MANAGEMENT ORGANIZATION AND COMPENSATION COMMITTEE

This committee's responsibilities include recommending to the Board of Directors all actions regarding compensation of the Chief Executive Officer, review of the compensation of other officers and business unit presidents, annual review of director compensation, administration of the Annual Incentive Plan and Stock Incentive Plan, and review and approval of significant changes or additions to the compensation policies and practices of the Company. This committee will provide the Chief Executive Officer with an annual performance review. It is also responsible for determining that a satisfactory system is in effect for development and orderly succession of senior and mid-level managers throughout the Company.

NOMINATING AND GOVERNANCE COMMITTEE

This committee is responsible for identifying, screening and recommending to the Board candidates for Board membership. It is responsible for sponsoring an annual self-assessment of the Board's performance as well as the performance of each committee of the Board. It is also responsible for recommendations with respect to the assignment of Board members to various committees and appointment of committee chairs.

FORWARD-LOOKING INFORMATION

This Annual Report on Form 10-K contains information about us, some of which includes “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements other than historical information or statements about our current condition. You can identify forward-looking statements by the use of terms such as “believes”, “contemplates”, “expects”, “may”, “will”, “could”, “should”, “would”, or “anticipates”, other similar phrases, or the negatives of these terms.

We have based the forward-looking statements relating to our operations on our current expectations, estimates and projections about us and the markets we serve. We caution you that these statements are not guarantees of future performance and involve risks and uncertainties. These statements should be considered in conjunction with the discussion in Part I, the information set forth under Item 1A, “Risk Factors” and with the discussion of the business included in Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” We have based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Accordingly, our actual outcomes and results may differ materially from what we have expressed or forecast in the forward-looking statements. Any differences could result from a variety of factors, including the following:

- The effect of changes in economic conditions in the markets in which we operate, including financial market conditions, end markets for our products, fluctuations in raw material prices and the financial condition of our customers and suppliers;
- Economic, social and political instability, currency fluctuation and other risks of doing business outside of the United States;
- Competitive pressures, including the need for technology improvement, successful new product development and introduction and any inability to pass increased costs of raw materials to customers;
- Our ability to successfully integrate acquisitions and to realize synergies and opportunities for growth and innovation;
- Our ability to successfully value acquisition candidates;
- Our ongoing need to attract and retain highly qualified personnel and key management;
- A reduction in congressional appropriations that affect defense spending;
- The ability of the U.S. government to terminate our government contracts;
- The outcomes of legal proceedings, claims and contract disputes;
- Adverse effects on our business and results of operations, as a whole, as a result of increases in asbestos claims or the cost of defending and settling such claims;
- The outcome of restructuring and other cost savings initiatives;
- Adverse effects as a result of further increases in environmental remediation activities, costs and related claims;
- Investment performance of our pension plan assets and fluctuations in interest rates, which may affect the amount and timing of future pension plan contributions; and
- Adverse effects of changes in tax, environmental and other laws and regulations in the United States and other countries in which we operate.

Part I

Reference herein to “Crane”, “we”, “us”, and “our” refer to Crane Co. and its subsidiaries unless the context specifically states or implies otherwise. Amounts in the following discussion are presented in millions, except employee, share and per share data, or unless otherwise stated.

Item 1. Business

General

We are a diversified manufacturer of highly engineered industrial products comprised of four segments: Fluid Handling, Payment & Merchandising Technologies, Aerospace & Electronics and Engineered Materials. Our primary markets are chemicals, power, oil & gas, aerospace & defense, along with a wide range of general industrial and consumer related end markets.

We have been committed to the highest standards of business conduct since 1855 when our founder, R.T. Crane, resolved “to conduct my business in the strictest honesty and fairness; to avoid all deception and trickery; to deal fairly with both customers and competitors; to be liberal and just toward employees; and to put my whole mind upon the business.”

Our strategy is to grow earnings and cash flow by focusing on manufacture of highly engineered industrial products for specific markets where our scale is a relative advantage, and where we can compete based on our proprietary and differentiated technology, our deep vertical expertise, and our responsiveness to unique and diverse customer needs. We continuously evaluate our portfolio, pursue acquisitions that complement our existing businesses and that are accretive to our growth profile, selectively divest businesses where appropriate, and pursue internal mergers to improve efficiency. We strive to foster a performance-based culture focused on productivity and continuous improvement, to attract and retain a committed management team whose interests are directly aligned with those of our shareholders, and to maintain a focused, efficient corporate structure.

We use a comprehensive set of business processes and operational excellence tools that we call the Crane Business System (“CBS”) to drive continuous improvement throughout our businesses. Beginning with a core value of integrity, the Crane Business System incorporates “Voice of the Customer” teachings (specific processes designed to capture our customers’ requirements) and a broad range of operational excellence tools into a disciplined strategy deployment process that drives profitable growth by focusing on continuously improving safety, quality, delivery and cost.

Revenues from outside the United States were approximately 38% and 41% in 2015 and 2014, respectively. For more information regarding our sales and assets by geographical region, see Part II, Item 8 under Note 13, “Segment Information,” to the Consolidated Financial Statements.

Reportable Segments

For additional information on recent business developments and other information about us and our business, you should refer to the information set forth under the captions, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” in Part II, Item 7 of this report, as well as in Part II, Item 8 under Note 13, “Segment Information,” to the Consolidated Financial Statements for sales, operating profit and assets employed by each segment.

Fluid Handling

The Fluid Handling segment is a provider of highly engineered fluid handling equipment for critical performance applications that require high reliability. The segment is comprised of Process Valves and Related Products, Commercial Valves, and Other Products.

Process Valves and Related Products includes on/off valves and related products for critical and demanding applications in the chemical, oil & gas, power, and general industrial end markets globally. Products are sold under the trade names Crane, Saunders, Jenkins, Pacific, Xomox, Krombach, DEPA, ELRO, REVO, Flowseal, Centerline, Resistoflex, Duocheck, Barksdale, and WTA. Manufacturing locations, along with sales and service centers, are located across the Americas, Europe, the Middle East, Asia, and Australia.

Commercial Valves is engaged primarily in the manufacturing and distribution of valves and related products for the non-residential construction, general industrial, and to a lesser extent, municipal markets. The primary geographies served include Canada, the United Kingdom, the Middle East, and continental Europe. Brands include Stockham, Wask, Viking Johnson, IAT, Hattersley, NABIC, Sperryn, Wade, Rhodes and Brownall. Manufacturing locations are located in the United Kingdom and China, with additional sales offices in continental Europe and the Middle East; distribution facilities are located throughout Canada.

Other Products includes pumps and related products for water and wastewater applications in the industrial, municipal, commercial and military markets, primarily in the United States. Products are sold under the trade names Deming, Weinman, Burks, and Barnes. Facilities are located in the United States, Canada, and China.

Payment & Merchandising Technologies

The Payment & Merchandising Technologies segment is comprised of Crane Payment Innovations ("CPI") and Merchandising Systems.

CPI provides high technology payment acceptance products that improve our customers' productivity in numerous global markets including retail self-checkout, vending, casino gaming, government lotteries, parking, transit fare collection, payment kiosks, and banking. Products for these markets include coin acceptors and dispensers, coin hoppers, coin recyclers, bill validators, bill recyclers, and cashless systems. CPI facilities are located in the United States, Mexico, Japan, Canada, Switzerland, Germany, and the Ukraine, with additional sales offices across the world.

Merchandising Systems is primarily engaged in the design and manufacture of vending equipment and related solutions. Merchandising Systems' innovative products and solutions create value by improving the consumer experience, and driving higher same store, or vendor machine, profitability. Products include a full line of vending equipment that dispenses food, snack, and hot and cold beverages. Other solutions include vending management software, cashless payment products, and wireless connectivity to enable our customers to operate their businesses more profitably. Primary customers include vending operators, and food and beverage companies, primarily in the United States and Europe. Facilities are located in the United States and the United Kingdom.

Aerospace & Electronics

The Aerospace & Electronics segment supplies critical components and systems, including original equipment and aftermarket parts, primarily for the commercial aerospace and military aerospace and defense markets. The commercial market and military market accounted for 70% and 30%, respectively, of total segment sales in 2015. Sales to original equipment manufacturers ("OEM") and aftermarket customers were 73% and 27%, respectively, in 2015.

Crane Aerospace & Electronics has strong brands which have been supplying products to these end markets for several decades. Brands include Hydro-Aire, ELDEC, Lear Romec, P.L. Porter, Keltec, Interpoint, Signal Technology, Merrimac Industries, and Polyflon.

Products include a wide range of custom designed, highly engineered products used in landing systems, sensing and utility systems, fluid management, seat actuation, power and microelectronic applications, and microwave systems.

Our products are sold directly to aircraft manufacturers, commercial Tier 1 integrators (companies which make products specifically for an aircraft manufacturer), defense and space prime contractors, airlines, government agencies including the U.S. Department of Defense, foreign allied defense organizations, aircraft seat manufacturers, and aircraft maintenance, repair and overhaul ("MRO") organizations.

Facilities are located in the United States, Taiwan, and France.

Engineered Materials

The Engineered Materials segment manufactures fiberglass-reinforced plastic ("FRP") panels and coils, primarily for use in the manufacturing of recreational vehicles ("RV"s), truck bodies, truck trailers, with additional applications in commercial and industrial buildings. Engineered Materials sells the majority of its products directly to RV, trailer, and truck manufacturers, and it uses distributors and retailers to serve the commercial and industrial construction markets. Manufacturing facilities are located in the United States.

Acquisitions

We have completed two acquisitions in the past five years.

In December 2013, we completed the acquisition of MEI Conlux Holdings (U.S.), Inc. and its affiliate MEI Conlux Holdings (Japan), Inc. (together, "MEI"), a leading provider of payment solutions for unattended transaction systems, which serves customers in the transportation, gaming, retail, service payment and vending markets, for a purchase price of \$804 million for all of the outstanding equity interests of MEI. MEI had sales of \$399 million in 2012 and was integrated into our CPI business within our Payment & Merchandising Technologies segment. Goodwill for this acquisition amounted to \$438 million. The amount allocated to goodwill reflects the benefits we expect to realize from the acquisition, specifically, that it will strengthen and broaden our product offering and allow us to improve our global position in all sectors of the market.

In July 2011, we completed the acquisition of W. T. Armatur GmbH & Co. KG (“WTA”), a manufacturer of bellows sealed globe valves, as well as certain types of specialty valves, for chemical, fertilizer and thermal oil applications, for a purchase price of \$37 million in cash and \$1 million of assumed debt. WTA’s 2010 sales were approximately \$21 million; WTA has been integrated into our Fluid Handling segment. Goodwill for this acquisition amounted to \$12 million.

Divestitures

We have completed four divestitures in the past five years.

In 2014, we sold Crane Water, which was formerly part of our Fluid Handling segment, for \$2.1 million and recorded a \$1.1 million net loss. The business had sales of approximately \$15 million in 2013.

In December 2013, as part of the execution of regulatory remedies associated with the MEI acquisition, we sold a product line, which was formerly part of our Payment & Merchandising Technologies segment, to Suzo-Happ Group for \$6.8 million and recorded a \$2 million gain. Sales of this product line were \$15.1 million in 2013.

In June 2012, we sold certain assets and operations of the Company’s valve service center in Houston, Texas, which was formerly part of the Fluid Handling segment, to Furmanite Corporation for \$9.3 million. The service center had sales of \$14 million in 2011 and was reported as discontinued operations on our Consolidated Statement of Operations.

In June 2012, we also sold Azonix Corporation (“Azonix”), which was part of our former Controls segment, to Cooper Industries for \$44.8 million. Azonix had sales of \$32 million in 2011 and was reported as discontinued operations on our Consolidated Statement of Operations.

Other Matters Relating to Our Business as a Whole

Competitive Conditions

Our businesses participate in markets that are highly competitive. Because of the diversity of products manufactured and sold, our businesses typically have a different set of competitors in each geographic area and end market in which they participate. Accordingly, it is not possible to estimate the number of competitors, or precise market share; however, we believe that we are a principal competitor in most of our markets. Our primary basis of competition is providing high quality products, with technological differentiation, at competitive prices, with superior customer service and timely delivery.

Our products are sold into markets, including chemical, power, oil & gas, aerospace & defense, along with a wide range of general industrial and consumer related end markets. As such, our revenues depend on numerous unpredictable factors, including changes in market demand, general economic conditions, customer capital spending, and credit availability. Because our products are sold in such a wide variety of markets, we do not believe that we can reliably quantify or predict the potential effects of changes in any of the aforementioned factors.

Our engineering and product development activities are focused on improving existing products, customizing existing products for particular customer requirements, as well as the development of new products. We own numerous patents, trademarks, copyrights, trade secrets and licenses to intellectual property, no one of which is of such importance that termination would materially affect our business. From time to time, however, we do engage in litigation to protect our intellectual property.

Research and Development

Research and development costs are expensed when incurred. These costs were \$62.8 million, \$68.0 million and \$52.7 million in 2015, 2014 and 2013, respectively, and were incurred primarily by the Aerospace & Electronics and Payment & Merchandising Technologies segments.

Our Customers

No customer accounted for more than 10% of our consolidated revenues in 2015, 2014 or 2013.

Backlog

The following sets forth the unfulfilled orders attributable to each of our segments as of the indicated dates:

(in millions)	December 31, 2015	December 31, 2014
Fluid Handling	\$ 267	\$ 311
Payment & Merchandising Technologies	63	68
Aerospace & Electronics	436	422
Engineered Materials	15	17
Total Backlog	\$ 782	\$ 818

Our Employees

We employ approximately 11,200 people in the Americas, Europe, the Middle East, Asia and Australia. For a discussion of risks related to employee relations, please refer to “Item 1A. Risk Factors.”

Raw Materials

Our manufacturing operations employ a wide variety of raw materials, including steel, copper, cast iron, electronic components, aluminum, plastics and various petroleum-based products. We purchase raw materials from a large number of independent sources around the world. Although market forces have at times caused increases in the costs of steel, copper and petroleum-based products, there have been no raw materials shortages that have had a material adverse impact on our business, and we believe that we will generally be able to obtain adequate supplies of major raw material requirements or reasonable substitutes at acceptable costs.

Seasonal Nature of Business

Our business does not experience significant seasonality.

Government Contracts

We have agreements relating to the sale of products to government entities, primarily involving products in our Aerospace & Electronics segment and, to a lesser extent, our Fluid Handling segment. As a result, we are subject to various statutes and regulations that apply to companies doing business with the government. The laws and regulations governing government contracts differ from those governing private contracts. For example, some government contracts require disclosure of cost and pricing data and impose certain sourcing conditions that are not applicable to private contracts. Our failure to comply with these laws could result in suspension of these contracts, criminal or civil sanctions, administrative penalties and fines or suspension or debarment from government contracting or subcontracting for a period of time. For a further discussion of risks related to compliance with government contracting requirements; please refer to “Item 1A. Risk Factors.”

Available Information

We file annual, quarterly and current reports and amendments to these reports, proxy statements and other information with the United States Securities and Exchange Commission (“SEC”). You may read and copy any materials we file with the SEC at the SEC’s Public Reference Room at 100 F Street, NE, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site that contains reports, proxy and information statements and other information regarding issuers, like us, that file electronically with the SEC. The address of the SEC’s website is www.sec.gov.

We also make our filings available free of charge through our Internet website, as soon as reasonably practicable after filing such material electronically with, or furnishing such material, to the SEC. Also posted on our website are our Corporate Governance Guidelines, Standards for Director Independence, Crane Co. Code of Ethics and the charters and a brief description of each of the Audit Committee, the Management Organization and Compensation Committee and the Nominating and Governance Committee. These items are available in the “Investors – Corporate Governance” section of our website at www.craneco.com. The content of our website is not part of this report.

Executive Officers of the Registrant

Name	Position	Business Experience During Past Five Years	Age	Executive Officer Since
Max H. Mitchell	President and Chief Executive Officer	Chief Executive Officer since January 2014. President since January 2013. Chief Operating Officer from May 2011 through January 2013. Group President, Fluid Handling from 2005 to October 2012.	52	2004
Curtis A. Baron, Jr.	Vice President, Controller	Vice President, Controller since December 2011. Assistant Controller from 2007 to December 2011.	46	2011
Thomas J. Craney	Group President, Engineered Materials	Group President, Engineered Materials since 2007.	60	2007
Brendan J. Curran	President, Aerospace & Electronics	President, Aerospace & Electronics since February 2015. Group President, Aerospace from May 2013 through February 2015. Pratt Whitney: United Technologies Corporation (diversified manufacturing) Vice President, Business Development, Strategy & Partnerships, Commercial Engines from July 2012 through June 2013 and Vice President, Commercial Engines & Global Services from April 2011 through June 2012. Hamilton Sundstrand, United Technologies Corporation: VP and General Manager, Repair & Supply Chain from 2009 through March 2011.	53	2013
Augustus I. duPont	Vice President, General Counsel and Secretary	Vice President, General Counsel and Secretary since 1996.	64	1996
Bradley L. Ellis	Senior Vice President	Senior Vice President since December 2014. Group President, Merchandising Systems from 2003 through December 2014. Vice President, Crane Business System from 2009 to December 2011.	47	1997 - 2003 2007 - present
James A. Lavish	Vice President, CBS, People & Performance	Vice President, CBS, People & Performance since January 2016. Vice President, Crane Business System from March 2013 through January 2016. President, Crane Pumps & Systems from 2008 to 2013.	49	2016
Richard A. Maue	Vice President - Finance and Chief Financial Officer	Vice President - Finance and Chief Financial Officer since January 2013. Principal Accounting Officer since 2007 and Vice President, Controller from 2007 to December 2011.	45	2007
Anthony D. Pantaleoni	Vice President, Environment, Health and Safety	Vice President, Environment, Health and Safety since 1989.	61	1989
Louis V. Pinkham	Senior Vice President	Senior Vice President since December 2014. Group President, Fluid Handling from October 2012 through December 2014. Senior Vice President, General Manager at Eaton Corp. (diversified power management company) from June 2011 to October 2012. Vice President, General Manager at Eaton Corp. from 2008 to 2011.	44	2012
Tazewell S. Rowe	Vice President, Treasurer	Vice President, Treasurer since August 2013. Assistant Treasurer, ITT Corporation (diversified manufacturing) from 2010 through August 2013. Managing Director, Corporate Strategy, Ally Financial from 2006 through 2010.	44	2013
Kristian R. Salovaara	Vice President of Business Development and Strategy	Vice President of Business Development and Strategy since March 2014. Vice President, Business Development from May 2011 to March 2014. Managing Director at FBR Capital Markets & Co. from 2009 to May 2011.	55	2011
Edward S. Switter	Vice President, Tax	Vice President, Tax since 2011. Director Global Tax from 2010 to 2011. Director of Tax from 2006 to 2010.	41	2011

Item 1A. Risk Factors

The following is a description of what we consider the key challenges and risks confronting our business. This discussion should be considered in conjunction with the discussion under the caption “Forward-Looking Information” preceding Part I, the information set forth under Item 1, “Business” and with the discussion of the business included in Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” These risks comprise the material risks of which we are aware. If any of the events or developments described below or elsewhere in this Annual Report on Form 10-K, or in any documents that we subsequently file publicly were to occur, it could have a material adverse effect on our business, financial condition or results of operations.

Risks Relating to Our Business

We are subject to numerous lawsuits for asbestos-related personal injury, and costs associated with these lawsuits may adversely affect our results of operations, cash flow and financial position.

We are subject to numerous lawsuits for asbestos-related personal injury. Estimation of our ultimate exposure for asbestos-related claims is subject to significant uncertainties, as there are multiple variables that can affect the timing, severity and quantity of claims. Our estimate of the future expense of these claims is derived from assumptions with respect to future claims, settlement and defense costs which are based on experience during the last few years and which may not prove reliable as predictors. A significant upward or downward trend in the number of claims filed, depending on the nature of the alleged injury, the jurisdiction where filed and the quality of the product identification, or a significant upward or downward trend in the costs of defending claims, could change the estimated liability, as would substantial adverse verdicts at trial or on appeal. A legislative solution or a structured settlement transaction could also change the estimated liability. These uncertainties may result in our incurring future charges or increases to income to adjust the carrying value of recorded liabilities and assets, particularly if the number of claims and settlements and defense costs escalates or if legislation or another alternative solution is implemented; however, we are currently unable to predict such future events. The resolution of these claims may take many years, and the effect on results of operations, cash flow and financial position in any given period from a revision to these estimates could be material.

As of December 31, 2015, we were one of a number of defendants in cases involving 41,090 pending claims filed in various state and federal courts that allege injury or death as a result of exposure to asbestos. See Note 10, “Commitments and Contingencies” of the Notes to Consolidated Financial Statements for additional information on:

- Our pending claims;
- Our historical settlement and defense costs for asbestos claims;
- The liability we have recorded in our financial statements for pending and reasonably anticipated asbestos claims through 2021;
- The asset we have recorded in our financial statements related to our estimated insurance coverage for asbestos claims; and
- Uncertainties related to our net asbestos liability.

We have recorded a liability for pending and reasonably anticipated asbestos claims through 2021, and while it is probable that this amount will change and that we may incur additional liabilities for asbestos claims after 2021, which additional liabilities may be significant, we cannot reasonably estimate the amount of such additional liabilities at this time. The liability was \$546 million as of December 31, 2015.

Macroeconomic fluctuations may harm our business, results of operations and stock price.

Our business, financial condition, operating results and cash flows may be adversely affected by changes in global economic conditions and geopolitical risks, including credit market conditions, levels of consumer and business confidence, commodity prices, exchange rates, levels of government spending and deficits, political conditions and other challenges that could affect the global economy. These economic conditions could affect businesses such as ours in a number of ways. Such conditions could have an adverse impact on our flexibility to react to changing economic and business conditions and on our ability to fund our operations or refinance maturing debt balances at attractive interest rates. In addition, restrictions on credit availability could adversely affect the ability of our customers to obtain financing for significant purchases and could result in decreases in or cancellation of orders for our products and services as well as impact the ability of our customers to make payments. Similarly, credit restrictions may adversely affect our supplier base and increase the potential for one or more of our suppliers to experience financial distress or bankruptcy. See “Specific Risks Related to Our Business Segments”.

Demand for our products is variable and subject to factors beyond our control, which could result in unanticipated events significantly impacting our results of operations.

A substantial portion of our sales is concentrated in industries that are cyclical in nature or subject to market conditions which may cause customer demand for our products to be volatile. These industries often are subject to fluctuations in domestic and international economies as well as to currency fluctuations and inflationary pressures. Reductions in demand by these industries would reduce the sales and profitability of the affected business segments. In our Fluid Handling segment, a slower recovery of the global economy or increased uncertainty in major industrial markets and/or the continued weakness in oil prices could reduce sales and profits, particularly if projects for which our businesses are suppliers or bidders are canceled or delayed. Results at our Payment & Merchandising Technologies segment could be affected by sustained weakness in certain end markets such as China and Russia, low employment levels, office occupancy rates and factors affecting vending operator profitability such as higher fuel, food and equipment financing costs; results could also be impacted by unforeseen advances in payment processing technologies. In our Aerospace & Electronics segment, a significant decline in demand for air travel, or a decline in airline profitability generally, could result in reduced orders for aircraft and could also cause airlines to reduce their purchases of repair parts from our businesses. In addition, our Aerospace & Electronics segment could also be impacted to the extent that major aircraft manufacturers encountered production problems, or if pricing pressure from aircraft customers caused the manufacturers to press their suppliers to lower prices; in addition, demand for military and defense products is dependent upon government spending, which remains uncertain. In our Engineered Materials segment, sales and profits could be affected by declines in demand for truck trailers, RVs, or building products; results could also be impacted by unforeseen capacity constraints related to certain raw materials, in particular, resin.

Our operations expose us to the risk of environmental liabilities, costs, litigation and violations that could adversely affect our financial condition, results of operations, cash flow and reputation.

Our operations are subject to environmental laws and regulations in the jurisdictions in which they operate, which impose limitations on the discharge of pollutants into the ground, air and water and establish standards for the generation, treatment, use, storage and disposal of solid and hazardous wastes. We must also comply with various health and safety regulations in the United States and abroad in connection with our operations. Failure to comply with any of these laws could result in civil and criminal, monetary and non-monetary penalties and damage to our reputation. In addition, we cannot provide assurance that our costs related to remedial efforts or alleged environmental damage associated with past or current waste disposal practices or other hazardous materials handling practices will not exceed our estimates or adversely affect our financial condition, results of operations and cash flow. For example, in 2014, the U.S. Environmental Protection Agency issued a Record of Decision amendment requiring, among other things, additional source area remediation resulting in us recording a charge of \$49.0 million pertaining to the Phoenix-Goodyear Airport North Superfund Site (the "Goodyear Site"), extending the accrued costs through 2022. In addition, also in 2014, we recorded a \$6.8 million charge for expected remediation costs associated with an environmental site in Roseland, New Jersey (the "Roseland Site").

We may be unable to identify or to complete acquisitions, or to successfully integrate the businesses we acquire.

We have evaluated, and expect to continue to evaluate, a wide array of potential acquisition transactions. Our acquisition program attempts to address the potential risks inherent in assessing the value, strengths, weaknesses, contingent or other liabilities, systems of internal control and potential profitability of acquisition candidates, as well as other challenges such as retaining the employees and integrating the operations of the businesses we acquire. There can be no assurance that suitable acquisition opportunities will be available in the future, that we will continue to acquire businesses or that any business acquired will be integrated successfully or prove profitable, which could adversely impact our growth rate. Our ability to achieve our growth goals depends in part upon our ability to identify and successfully acquire and integrate companies and businesses at appropriate prices and realize anticipated cost savings.

Our businesses are subject to extensive governmental regulation; failure to comply with those regulations could adversely affect our financial condition, results of operations, cash flow and reputation.

We are required to comply with various import and export control laws, which may affect our transactions with certain customers, particularly in our Aerospace & Electronics, Fluid Handling and Payment & Merchandising Technology segments, as discussed more fully under "Specific Risks Relating to Our Business Segments". In certain circumstances, export control and economic sanctions regulations may prohibit the export of certain products, services and technologies, and in other circumstances we may be required to obtain an export license before exporting the controlled item. A failure to comply with these requirements might result in suspension of these contracts and suspension or debarment from government contracting or subcontracting. In addition, we are subject to the Foreign Corrupt Practices Act, which generally prohibits U.S. companies and their intermediaries from making improper payments to foreign officials for the purpose of obtaining or retaining business, or securing any improper advantage and the anti-bribery laws of other jurisdictions. Failure to comply with any of these

regulations could result in civil and criminal, monetary and non-monetary penalties, fines, disruptions to our business, limitations on our ability to export products and services, and damage to our reputation.

Additional tax expense or exposures could affect our financial condition, results of operations and cash flow.

We are subject to income taxes in the United States and various international jurisdictions. Our future results of operations could be adversely affected by changes in our effective tax rate as a result of a change in the mix of earnings in countries with differing statutory tax rates, changes in tax laws, regulations and judicial rulings, changes in generally accepted accounting principles, changes in the valuation of deferred tax assets and liabilities, changes in the amount of earnings permanently reinvested offshore and the results of audits and examinations of previously filed tax returns.

The prices of our raw materials could fluctuate dramatically, which may adversely affect our profitability.

The costs of certain raw materials that are critical to our profitability are volatile. This volatility can have a significant impact on our profitability. The costs in our Engineered Materials segment are affected by fluctuations in the price of resin. The costs in our Fluid Handling, Payment & Merchandising Technologies and Aerospace & Electronics segments are affected by fluctuations in the price of metals such as steel and copper. While we have taken actions aimed at securing an adequate supply of raw materials at prices which are favorable to us, if the prices of critical raw materials increase, our operating costs could be negatively affected.

Our ability to source parts and raw materials from our suppliers is uncertain, and any disruptions or delays in our supply chain could negatively affect our results of operations.

Our operations require significant amounts of important parts and raw materials. We are engaged in a continuous, company-wide effort to source our parts and raw materials from fewer suppliers, and to obtain parts from suppliers in low-cost countries where possible. If we are unable to source these parts or raw materials, our operations may be disrupted, or we could experience a delay or halt in certain of our manufacturing operations. We believe that our supply management and production practices are based on an appropriate balancing of the foreseeable risks and the costs of alternative practices. Nonetheless, supplier capacity constraints, supplier production disruptions, supplier financial condition, price volatility or the unavailability of some raw materials could have an adverse effect on our operating results and financial condition.

We could face potential product liability or warranty claims, we may not accurately estimate costs related to such claims, and we may not have sufficient insurance coverage available to cover such claims.

Our products are used in a wide variety of commercial applications and certain residential applications. We face an inherent business risk of exposure to product liability or other claims in the event our products are alleged to be defective or that the use of our products is alleged to have resulted in harm to others or to property. We may in the future incur liability if product liability lawsuits against us are successful. Moreover, any such lawsuits, whether or not successful, could result in adverse publicity to us, which could cause our sales to decline.

In addition, consistent with industry practice, we provide warranties on many of our products and we may experience costs of warranty or breach of contract claims if our products have defects in manufacture or design or they do not meet contractual specifications. We estimate our future warranty costs based on historical trends and product sales, but we may fail to accurately estimate those costs and thereby fail to establish adequate warranty reserves for them.

We maintain insurance coverage to protect us against product liability claims, but that coverage may not be adequate to cover all claims that may arise or we may not be able to maintain adequate insurance coverage in the future at an acceptable cost. Any liability not covered by insurance or that exceeds our established reserves could materially and adversely impact our financial condition and results of operations.

We may be unable to improve productivity, reduce costs and align manufacturing capacity with customer demand.

We are committed to continuous productivity improvement and continue to evaluate opportunities to reduce costs, simplify or improve global processes, and increase the reliability of order fulfillment and satisfaction of customer needs. In order to operate more efficiently and control costs, from time to time we execute restructuring activities, which include workforce reductions and facility consolidations. For example, we recorded pre-tax restructuring and related charges of \$11.6 million in 2015 and \$22.7 million in 2014 associated with repositioning actions intended to improve profitability in our Fluid Handling and Aerospace & Electronics segments. In addition, the Company recorded restructuring and acquisition integration charges of \$6.6 million in 2015 and \$20.1 million in 2014 associated with the restructuring and integration of MEI in our Payment & Merchandising Technologies segment. However, our failure to respond to potential declines in global demand for our products

and services and properly align our cost base would have an adverse effect on our financial condition, results of operations and cash flow.

We may be unable to successfully develop and introduce new products, which would limit our ability to grow and maintain our competitive position and adversely affect our financial condition, results of operations and cash flow.

Our growth depends, in part, on continued sales of existing products, as well as the successful development and introduction of new products, which face the uncertainty of customer acceptance and reaction from competitors. Any delay in the development or launch of a new product could result in our not being the first to market, which could compromise our competitive position. Further, the development and introduction of new products may require us to make investments in specialized personnel and capital equipment, increase marketing efforts and reallocate resources away from other uses. We also may need to modify our systems and strategy in light of new products that we develop. If we are unable to develop and introduce new products in a cost-effective manner or otherwise manage effectively the operations related to new products, our results of operations and financial condition could be adversely impacted.

Pension expense and pension contributions associated with the Company's retirement benefit plans may fluctuate significantly depending upon changes in actuarial assumptions and future market performance of plan assets.

A significant portion of our current and retired employee population is covered by pension plans, the costs of which are dependent upon various assumptions, including estimates of rates of return on benefit related assets, discount rates for future payment obligations, rates of future cost growth and trends for future costs. In addition, funding requirements for benefit obligations of our pension plans are subject to legislative and other government regulatory actions. Variances from these estimates could have an impact on our consolidated financial position, results of operations and cash flow.

We face significant competition which may adversely impact our results of operations and financial position in the future.

While we are a principal competitor in most of our markets, all of our markets are highly competitive. The competitors in many of our business segments can be expected in the future to improve technologies, reduce costs and develop and introduce new products, and the ability of our business segments to achieve similar advances will be important to our competitive positions. Competitive pressures, including those discussed above, could cause one or more of our business segments to lose market share or could result in significant price erosion, either of which could have an adverse effect on our results of operations.

We conduct a substantial portion of our business outside the United States and face risks inherent in non-domestic operations.

Net sales and assets related to our operations outside the United States were 38% and 49% of our consolidated amounts, respectively. These operations and transactions are subject to the risks associated with conducting business internationally, including the risks of currency fluctuations, slower payment of invoices, adverse trade regulations and possible social, economic and political instability in the countries and regions in which we operate. In addition, we expect that non-U.S. sales will continue to account for a significant portion of our revenues for the foreseeable future. Accordingly, fluctuations in foreign currency exchange rates, primarily the euro, the British pound, the Canadian dollar and the Japanese yen, could adversely affect our reported results, primarily in our Fluid Handling and Payment & Merchandising Technologies segments, as amounts earned in other countries are translated into U.S. dollars for reporting purposes.

We are dependent on key personnel, and we may not be able to retain our key personnel or hire and retain additional personnel needed for us to sustain and grow our business as planned.

Certain of our business segments and corporate offices are dependent upon highly qualified personnel, and we generally are dependent upon the continued efforts of key management employees. We may have difficulty retaining such personnel or locating and hiring additional qualified personnel. The loss of the services of any of our key personnel or our failure to attract and retain other qualified and experienced personnel on acceptable terms could impair our ability to successfully sustain and grow our business, which could impact our results of operations in a materially adverse manner.

If our internal controls are found to be ineffective, our financial results or our stock price may be adversely affected.

We believe that we currently have adequate internal control procedures in place for future periods, including processes related to newly acquired businesses; however, increased risk of internal control breakdowns generally exists in a business environment that is decentralized. In addition, if our internal control over financial reporting is found to be ineffective, investors may lose confidence in the reliability of our financial statements, which may adversely affect our stock price.

Failure to maintain the security of our information systems and technology networks, including personally identifiable and other information, non-compliance with our contractual or other legal obligations regarding such information, or a violation of the Company's privacy and security policies with respect to such information, could adversely affect us.

We are dependent on information technology networks and systems, including the Internet, to process, transmit and store electronic information, and, in the normal course of our business, we collect and retain certain types of personally identifiable and other information pertaining to our customers, stockholders and employees. The legal, regulatory and contractual environment surrounding information security and privacy is constantly evolving and companies that collect and retain such information are under increasing attack by cyber-criminals around the world. A theft, loss, fraudulent use or misuse of customer, stockholder, employee or our proprietary data by cybercrime or otherwise, non-compliance with our contractual or other legal obligations regarding such data or a violation of our privacy and security policies with respect to such data could adversely impact our reputation and could result in costs, fines, litigation or regulatory action against us. Security breaches can create system disruptions and shutdowns that could result in disruptions to our operations. We cannot be certain that advances in criminal capabilities, new vulnerabilities or other developments will not compromise or breach the security solutions protecting the systems that access our products and services.

Specific Risks Relating to Our Reportable Segments

Fluid Handling

Our Fluid Handling segment competes in markets that are fragmented and highly competitive. The business competes against large, well established global companies, as well as smaller regional and local companies. We compete based on our products' quality, reliability and safety, our brand reputation, value-added technical expertise and customer support, and consistent on-time delivery. However, pricing can be highly competitive, particularly in regions and end markets with weakening levels of demand, or in markets where our value proposition - quality, reliability, and safety - is not valued as highly.

Demand for our Fluid Handling products is heavily dependent on our customers' level of new capital investment and planned maintenance expenditures. Customer spending typically depends on general economic conditions, availability of credit, and expectations of future demand. Slowing global economic growth, volatility in commodity prices, including continued weakness in oil prices could all contribute to lower levels of customer spending, and project delays or cancellations.

A portion of this segment's business is subject to government rules and regulations. Failure to comply with these requirements could result in suspension or debarment from government contracting or subcontracting. Failure to comply with any of these regulations could result in civil and criminal, monetary and non-monetary penalties, disruptions to our business, limitations on our ability to export products and services, and damage to our reputation. At our foreign operations, results could also be adversely impacted by a weakening of local currencies against the U.S. dollar; our Fluid Handling business has the greatest exposure to the euro, British pound, and Canadian dollar, although there is lesser exposure to several other currencies.

Payment & Merchandising Technologies

Our Payment & Merchandising Technologies segment sales are dependent on capital spending in a variety of vertical end markets, across numerous geographies. The level of capital expenditures by our customers depends on general economic conditions, availability of credit, and expectations of future demand.

This business regularly develops and markets new products. Delays in the product development process, or the inability of new products to meet targeted performance measures, could hurt future sales. The business is also directly and indirectly exposed to changes in government regulations; for example, changes in gaming regulations could influence the spending patterns of our casino operator customers, or changes in anti-money laundering regulations could result in additional technical requirements for our products.

At our foreign operations, results could also be adversely impacted by a weakening of local currencies against the U.S. dollar; the business has the greatest exposure to the euro, British pound, the Japanese yen, the Mexican peso, and the Canadian dollar, although there is lesser exposure to several other currencies. In addition, our facility in Mexico operates under the Mexican Maquiladora program. This program provides for reduced tariffs and eased import regulations? we could be adversely affected by changes in such program, or by our failure to comply with its requirements.

We also may not be able to successfully realize the expected synergy benefits of our 2013 acquisition of MEI.

Aerospace & Electronics

Our Aerospace & Electronics segment sales are primarily affected by conditions in the commercial aerospace industry which is cyclical in nature, and by defense spending by the U.S. government.

Commercial aircraft are procured primarily by airlines, and airline capital spending can be affected by a number of factors including credit availability, current and expected fuel prices, and current and forecast air traffic demand levels. Air traffic levels are affected by a different array of factors including general economic conditions and global corporate travel spending, although other non-economic events can also adversely impact airline traffic, including terrorism or pandemic health concerns. Our commercial business is also affected by the market for business jets where demand is typically tied to corporate profitability levels, and the freight markets which are most heavily influenced by general economic conditions. Demand for our commercial aftermarket business is closely tied to total aircraft flight hours. Any decrease in demand for new aircraft or equipment, or use of existing aircraft and equipment, would likely result in decreased sales of our products and services.

The defense portion of the segment's business is dependent primarily on U.S. government spending, and to a lesser extent, foreign government spending, on the specific military platforms and programs where our business participates. Any reduction in appropriations for these platforms or programs could impact the performance of our business. Our sales to defense customers are also affected by the level of activity in military flight operations.

We are required to comply with various export control laws, which may affect our transactions with certain customers. In certain circumstances, export control and economic sanctions regulations may prohibit the export of certain products, services and technologies, and in other circumstances we may be required to obtain an export license before exporting the controlled item. We are also subject to investigation and audit for compliance with the requirements governing government contracts, including requirements related to procurement integrity, manufacturing practices and quality procedures, export control, employment practices, the accuracy of records and the recording of costs. A failure to comply with these requirements could result in suspension of these contracts, and suspension or debarment from government contracting or subcontracting. Failure to comply with any of these regulations could result in civil and criminal, monetary and non-monetary penalties, fines, disruptions to our business, limitations on our ability to export products and services, and damage to our reputation.

Due to the lengthy research and development cycle involved in bringing commercial and military products to market, we cannot accurately predict the demand levels that will exist once a given new product is ready for market. In addition, if we are unable to develop and introduce new products in a cost-effective manner or otherwise effectively manage the introduction of new products and/or programs, our results of operations and financial condition could be adversely impacted.

Engineered Materials

Our Engineered Materials segment manufactures and sells fiberglass-reinforced plastic panels and coils, primarily for use in the manufacturing of RVs, trucks, and trailers, with additional applications in commercial and industrial building construction. Demand in these end markets is dependent on general economic conditions, credit availability, and consumer and corporate spending levels. A decline in demand in any of these end markets, a loss of market share, or customer pricing pressure, would result in lower sales and profits for this business. Profitability could also be adversely affected by an increase in the price of resin or fiberglass if we are unable to pass the incremental costs on to our customers. Additional risks include the loss of a principal supplier, and potential loss of market share to competing materials, such as wood or aluminum.

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Crane Co. common stock is traded on the New York Stock Exchange ("NYSE") under the symbol CR. The following are the high and low sale prices as reported on the NYSE Composite Tape and the quarterly dividends declared per share for each quarter of 2015 and 2014.

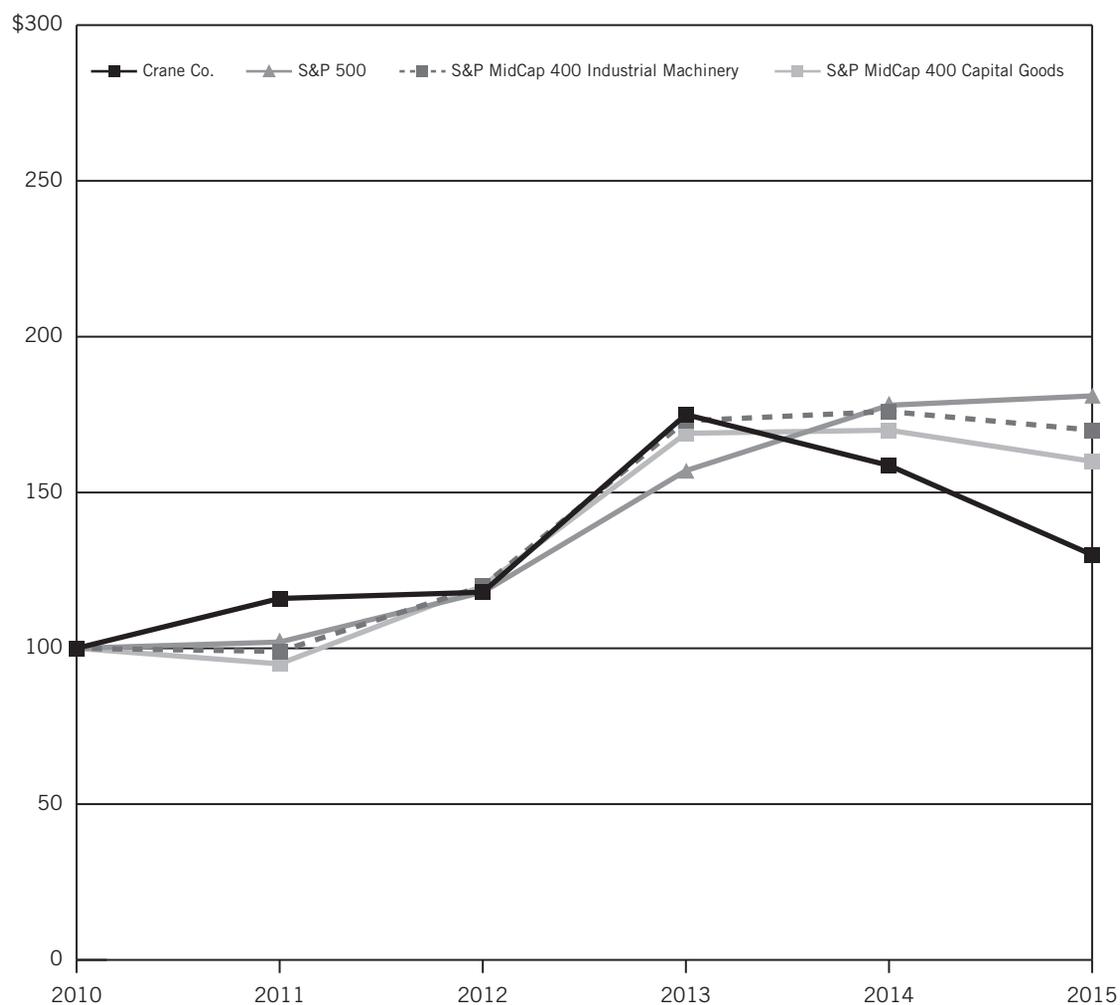

MARKET AND DIVIDEND INFORMATION — CRANE CO. COMMON SHARES

Quarter	New York Stock Exchange Composite Price per Share				Dividends per Share	
	2015 High	2015 Low	2014 High	2014 Low	2015	2014
First	\$ 70.47	\$ 53.12	\$ 73.08	\$ 60.14	\$ 0.33	\$ 0.30
Second	\$ 64.71	\$ 58.24	\$ 76.33	\$ 68.43	0.33	0.30
Third	\$ 59.43	\$ 45.37	\$ 74.72	\$ 63.21	0.33	0.33
Fourth	\$ 54.66	\$ 44.86	\$ 63.11	\$ 53.63	0.33	0.33
					\$ 1.32	\$ 1.26

On December 31, 2015, there were approximately 2,319 holders of record of Crane Co. common stock.

We did not make any open-market share repurchases of our common stock during the three months ended December 31, 2015. We routinely receive shares of our common stock as payment for stock option exercises and the withholding taxes due on stock option exercises and the vesting of restricted stock awards from stock-based compensation program participants.

Net income attributable to common shareholders	\$ 3.89	\$ 3.23	\$ 3.73	\$ 3.72	\$ 0.44
Cash dividends per common share	\$ 1.32	\$ 1.26	\$ 1.16	\$ 1.08	\$ 0.98
Total assets	\$ 3,341.6	\$ 3,450.8	\$ 3,559.6	\$ 2,889.9	\$ 2,843.5
Long-term debt	\$ 749.3	\$ 749.2	\$ 749.2	\$ 399.1	\$ 398.9
Accrued pension and postretirement benefits	\$ 235.4	\$ 278.3	\$ 151.1	\$ 233.6	\$ 178.4
Long-term asbestos liability	\$ 470.5	\$ 534.5	\$ 610.5	\$ 704.2	\$ 792.7
Long-term insurance receivable — asbestos	\$ 108.7	\$ 126.8	\$ 148.2	\$ 171.8	\$ 209.0

- (a) Includes i) environmental liability provisions of \$55.8 and \$30.3 in 2014 and 2011, respectively; ii) a lawsuit settlement of \$6.5 in 2014; and iii) an asbestos provision, net of insurance recoveries, of \$241.6 in 2011.
- (b) Includes the tax effect of items cited in note (a) as well as i) loss on divestiture of a small business of \$1.1 in 2014; ii) gain on divestiture of real estate of \$4.2 in 2014; iii) withholding taxes related to acquisition funding of \$2.9 in 2013; and iv) gain on the sale of a product line of \$2.0 in 2013.
- (c) Includes gain on divestiture of \$19.2, net of tax, in 2012.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read together with our consolidated financial statements and related notes included under Item 8 of this Annual Report on Form 10-K.

We are a diversified manufacturer of highly engineered industrial products. Our business consists of four segments: Fluid Handling, Payment & Merchandising Technologies, Aerospace & Electronics and Engineered Materials. Our primary markets are chemical, power, oil & gas, aerospace & defense, along with a wide range of general industrial and consumer related end markets.

Our strategy is to grow earnings and cash flow by focusing on manufacture of highly engineered industrial products for specific markets where our scale is a relative advantage, and where we can compete based on our proprietary and differentiated technology, our deep vertical expertise, and our responsiveness to unique and diverse customer needs. We continuously evaluate our portfolio, pursue acquisitions that complement our existing businesses and that are accretive to our growth profile, selectively divest businesses where appropriate, and pursue internal mergers to improve efficiency. We strive to foster a performance-based culture focused on productivity and continuous improvement, to attract and retain a committed management team whose interests are directly aligned with those of our shareholders, and to maintain a focused, efficient corporate structure.

Results of Operations — For the Years Ended December 31, 2015, 2014 and 2013

(in millions, except %)	For the year ended December 31,			2015 vs 2014 Favorable / (Unfavorable) Change		2014 vs 2013 Favorable / (Unfavorable) Change

Items Affecting Comparability of Reported Results

The comparability of our operating results from operations for the years ended December 31, 2015, 2014 and 2013 is affected by the following significant items:

Acquisition-Related Costs

During 2015, we recorded pre-tax integration costs of \$7.2 million. During 2014, we recorded the following costs associated with the acquisition of MEI: 1) pre-tax integration costs of \$9.8 million and 2) pre-tax acquisition related inventory and backlog amortization of \$4.8 million. During 2013, we recorded the following costs associated with the acquisition of MEI: 1) pre-tax transaction costs of \$22.8 million, 2) pre-tax inventory step-up and backlog amortization of \$4.7 million, and 3) withholding taxes of \$2.9 million related to cash marshaling activities supporting payment for the acquisition.

Restructuring and Related Costs

In 2015, we recorded pre-tax restructuring charges and related costs of \$11 million, substantially all of which was related to the repositioning activities in our Fluid Handling and Aerospace & Electronics segments. In 2014, we recorded pre-tax restructuring charges and related costs of \$33.0 million, of which \$22.7 million was related to the repositioning activities in our Fluid Handling and Aerospace & Electronics segments and \$10.3 million was related to the acquisition of MEI.

Divestiture of Crane Water

In 2014, we sold Crane Water which was formerly part of our Fluid Handling segment for \$2.1 million. The business had sales of approximately \$5 million in 2014 and \$15 million in 2013.

Lawsuit Settlement

In 2014, we recorded a pre-tax lawsuit settlement of \$6.5 million related to the Roseland Site. Please refer to Note 10, "Commitments and Contingencies" for further discussion of the Roseland Site.

Environmental Charge

In 2014, we recorded a pre-tax charge of \$49 million to extend accrued costs to 2022 at the Goodyear Site and a \$6.8 million charge for expected remediation costs associated with the Roseland Site which are expected to be completed by 2017. Please refer to Note 10, "Commitments and Contingencies" for further discussion of the Goodyear Site and Roseland Site.

Divestiture of a Product Line

In 2013, as part of the execution of regulatory remedies associated with the MEI acquisition, we sold a product line, which was formerly part of our Payment & Merchandising Technologies segment, to Suzo-Happ Group for \$6.8 million. Sales of this product line were \$15.1 million in 2013.

2015 compared with 2014

Sales decreased by \$185 million, or 6%, to \$2,741 million in 2015. Net sales related to operations outside the United States for the year ended December 31, 2015 and 2014 were 38% and 41% of total net sales, respectively. The year-over-year change in sales included:

- a decline in core sales of \$35 million, or 1%;
- unfavorable foreign currency translation of \$134 million, or 5%;
- the impact of the divestiture of Crane Water and the completion of a previously disclosed transition services agreement of \$15 million, or 0.5%.

Operating profit increased by \$57 million, or 18%, to \$373 million in 2015. The increase in operating profit reflected the absence of environmental charges and a lawsuit settlement recorded in 2014, coupled with higher operating profit in our Payment & Merchandising Technologies, Engineered Materials and Aerospace & Electronics segments, partially offset by lower operating profit in our Fluid Handling segment.

2014 compared with 2013

Sales increased \$330 million, or 13%, to \$2.925 billion in 2014. Net sales related to operations outside the United States for the year ended December 31, 2014 and 2013 were 41% of total net sales. The year-over-year change in sales included:

- an increase in core sales of \$9 million, or 0.3%;
- unfavorable foreign exchange of \$11 million, or 0.4%;
- an increase in revenue from acquisitions, net of dispositions, of \$332 million, or 13%.

Operating profit decreased \$32 million, or 9%, to \$316 million in 2014. The decrease in operating profit was driven by environmental charges and a lawsuit settlement recorded in 2014, coupled with lower operating profit in our Aerospace & Electronics and Fluid Handling segments, partially offset by higher operating profit in our Payment & Merchandising Technologies and Engineered Materials segments.

(in millions)	For the year ended December 31,		
	2015	2014	2013
Net income before allocation to noncontrolling interests	\$ 230.0	\$ 193.6	\$ 221.0
Other comprehensive income (loss), net of tax			
Currency translation adjustment	(70.1)	(114.0)	2.9
Changes in pension and postretirement plan assets and benefit obligation, net of tax benefit	(8.4)	(136.5)	76.5
Other comprehensive (loss) income	(78.5)	(250.5)	79.3
Comprehensive income before allocation to noncontrolling interests	151.5	(56.9)	300.3
Less: Noncontrolling interests in comprehensive income	1.1	0.9	1.4
Comprehensive income (loss) attributable to common shareholders	\$ 150.4	\$ (57.8)	\$ 298.8

2015 compared with 2014

For the year ended December 31, 2015, comprehensive income before allocations to noncontrolling interests was \$151.5 million. The comprehensive income before allocations to noncontrolling interests was a result of net income before allocations to noncontrolling interests of \$230.0 million, partially offset by foreign currency translation adjustments of \$70.1 million and unamortized losses on pension plans of \$8.4 million. The unrealized loss on foreign currency translation adjustments of the balance sheets of foreign subsidiaries from local currencies to U.S. dollars was primarily due to the weakening of the euro, British pound, Canadian dollar and Japanese yen against the U.S. dollar. The unamortized losses on pension plans were primarily due to a decrease in assumed discount rates, lower than expected return on pension plan assets, and the adoption of revised actuarial mortality tables in 2014.

2014 compared with 2013

For the year ended December 31, 2014, comprehensive loss before allocations to noncontrolling interests was \$56.9 million. The comprehensive loss before allocations to noncontrolling interests was a result of unamortized losses on pension plans of \$136.5 million and the unrealized loss on foreign currency translation adjustments of \$114.0 million, substantially offset by net income before allocations to noncontrolling interests of \$193.6 million. The unamortized losses on pension plans were primarily due to a decrease in assumed discount rates, lower than expected return on pension plan assets, and the adoption of revised actuarial mortality tables in 2014. The unrealized loss on foreign currency translation adjustments of the balance sheets of foreign subsidiaries from local currencies to U.S. dollars was primarily due to the weakening of the euro, British pound, Canadian dollar and Japanese yen against the U.S. dollar.

FLUID HANDLING

(in millions, except %)	2015	2014	2013
Net sales by product line:			
Process Valves and Related Products	\$ 681	\$ 805	\$ 821
Commercial Valves	316	362	365
Other Products	94	96	102
Total net sales	1,091	1,264	1,289
Operating profit	125	182	195
Restructuring and related charges*	10	15	—
Assets	888	963	996
Operating margin	11.5%	14.4%	15.1%

* The restructuring and related charges are included in operating profit and operating margin.

2015 compared with 2014

Fluid Handling sales decreased by \$172 million, or 14%, to \$1,091 million, driven by unfavorable foreign currency translation of \$89 million, or 7%, a core sales decline of \$78 million, or 6%, and the impact of the divestiture of Crane Water of \$5 million, or 0.4%.

- Sales of Process Valves and Related Products decreased by \$124 million, or 15%, to \$681 million in 2015, including a core sales decline of \$75 million, or 9%, and unfavorable foreign currency translation of \$49 million, or 6%, as both the British pound and euro weakened against the U.S. dollar. The decrease in core sales reflected lower sales in chemical, oil and gas, power, and general industrial end markets. The lower sales were driven by a significant decline in global oil prices and weaker economic conditions in Europe and Asia.
- Sales of Commercial Valves decreased by \$46 million, or 13%, to \$316 million in 2015, reflecting unfavorable foreign currency translation of \$39 million, or 11%, as the British pound and Canadian dollar weakened against the U.S. dollar. Core sales decreased \$7 million, or 2%, reflecting lower sales in non-residential construction in the United Kingdom and municipal end markets in continental Europe.

Fluid Handling operating profit decreased by \$56 million, or 31%, to \$125 million in 2015. The decrease was driven by a \$40 million impact from the lower sales, unfavorable product mix, price and to a lesser extent, unfavorable foreign exchange, partially offset by a decrease in restructuring and related charges.

2014 compared with 2013

Fluid Handling sales decreased by \$25 million, or 2% to \$1,264 million, driven by a core sales decline of \$10 million, or 0.8%, unfavorable foreign currency translation of \$7 million, or 0.5%, and the impact of the divestiture of Crane Water of \$8 million, or 0.6%.

- Sales of Process Valves and Related Products decreased by \$16 million, or 2%, to \$805 million in 2014, including a core sales decline of \$14 million, or 2%, and unfavorable foreign currency translation of \$2 million, or 0.2%. The decrease in core sales reflected lower sales in chemical and oil and gas end markets, partially offset by higher sales in the general industrial end market. The lower sales in chemical and oil & gas end markets were primarily driven by project delays and lower investments in chemical and refining applications for our severe service valves.
- Sales of Commercial Valves decreased by \$3 million, or 1%, to \$362 million in 2014, including unfavorable foreign currency translation of \$4 million, or 1%, as the Canadian dollar weakened against the U.S. dollar, partially offset by a core sales increase of \$2 million, or 0.4%. The increase in core sales was primarily driven higher sales to the commercial building construction end market in the United Kingdom.
- Sales of Other Products decreased by \$6 million, or 6%, in 2014 to \$96 million, primarily driven by the impact of the divestiture of Crane Water.

Fluid Handling operating profit decreased by \$13 million, or 7%, to \$182 million in 2014 driven by an unfavorable product mix, the restructuring charge of \$15 million recorded in 2014 and a \$2 million impact from the lower sales, partially offset by productivity gains and lower pension expense.

PAYMENT & MERCHANDISING TECHNOLOGIES

(in millions, except %)	2015	2014	2013
Net sales by product line:			
Payment Acceptance and Dispensing Products	\$ 496	\$ 513	\$ 201
Merchandising Equipment	207	199	180
Total net sales	703	712	381
Operating profit	101	69	35
Acquisition, integration and restructuring related charges*	7	24	6
Assets	1,178	1,210	1,383
Operating margin	14.4%	9.7%	9.1%

* The acquisition, integration and restructuring related charges are included in operating profit and operating margin.

2015 compared with 2014

Payment & Merchandising Technologies sales decreased by \$9 million, or 1%, to \$703 million in 2015, reflecting unfavorable foreign currency translation of \$42 million, or 6%, and the impact of a transition services agreement related to a divested product line of \$10 million, or 1%, partially offset by a core sales increase of \$43 million, or 6%.

- Sales of Payment Acceptance and Dispensing Products decreased \$16 million, or 3%, to \$496 million in 2015, reflecting unfavorable foreign currency translation of \$38 million, or 7%, as the British pound, Japanese yen, Canadian dollar, and euro weakened against the U.S. dollar and the aforementioned impact of a transition services agreement related to a divested product line which reduced sales by \$10 million, or 2%. These decreases were partially offset by a core sales increase of \$31 million, or 6%, reflecting higher sales in retail, gaming, vending, and transportation end markets, partially offset by lower sales to the financial services markets.
- Sales of Merchandising Equipment increased \$8 million, or 4%, to \$207 million in 2015, reflecting a core sales increase of \$11 million, or 6%, partially offset by unfavorable foreign currency translation of \$4 million, or 2%, as the British pound weakened against the U.S. dollar. The increase in core sales reflected higher sales to certain large bottler customers as well as full line operators in 2015.

Payment & Merchandising Technologies operating profit increased by \$32 million, or 47%, to \$101 million in 2015. The increase was primarily driven by the impact from higher core sales, a decrease in acquisition, integration and restructuring related charges of \$17 million and synergy savings of \$14 million, partially offset by unfavorable product mix and unfavorable foreign exchange.

2014 compared with 2013

Payment & Merchandising Technologies sales increased by \$331 million, or 87%, to \$712 million in 2014, reflecting sales related to the acquisition of MEI of \$340 million, or 89%, partially offset by a core sales decline of \$4 million, or 1%, and unfavorable foreign currency translation of \$4 million, or 1%.

- Sales of Payment Acceptance and Dispensing Products increased \$312 million, or 155%, to \$513 million in 2014, reflecting the aforementioned impact related to the acquisition of MEI of \$340 million, or 169%, partially offset by a core sales decline of \$22 million, or 11%, and unfavorable foreign currency translation of \$6 million, or 3%, as the Canadian dollar and Japanese yen weakened against the U.S. dollar. The decrease in core sales was driven by lower demand in the retail and gaming end markets, partially offset by strength in the financial services market.
- Sales of Merchandising Equipment increased \$20 million, or 11%, to 199 million, reflecting a core sales increase of \$18 million, or 10%, and favorable currency translation of \$2 million, or 1%. The increase in core sales reflected a return in capital spending by certain large bottler customers to 2012 levels.

Payment & Merchandising Technologies operating profit increased by \$34 million, or 98%, to \$69 million in 2014, primarily driven by the impact of the MEI acquisition, partially offset by an \$18 million increase in acquisition, integration and restructuring-related charges in 2014.

AEROSPACE & ELECTRONICS

(in millions, except %)	2015	2014	2013
Net sales by product line:			
Commercial Original Equipment	\$ 349	\$ 351	\$ 341
Military Original Equipment	153	159	167
Commercial Aftermarket	132	134	133
Military Aftermarket	57	52	54
Total net sales	691	696	694
Operating profit	145	138	160
Restructuring and related charges*	—	8	—
Assets	559	512	512
Operating margin	21.0%	19.9%	23.1%

* The restructuring and related charges are included in operating profit and operating margin.

2015 compared with 2014

Aerospace & Electronics sales decreased \$5 million, or 0.7%, to \$691 million in 2015. The commercial market and military market accounted for 70% and 30%, respectively, of total segment sales in 2015. Sales to original equipment manufacturer ("OEM") and aftermarket customers were 73% and 27%, respectively, in 2015.

- Sales of Commercial Original Equipment decreased by \$1.4 million, or 0.4%, to \$349 million in 2015. The sales decrease was driven by lower shipments to regional aircraft customers, lower engineering sales and lower sales for other commercial applications, partially offset by higher sales to manufacturers of large commercial transport aircrafts.
- Sales of Military Original Equipment decreased by \$6 million, or 4%, to \$153 million in 2015. The sales decrease reflected lower build rates related to certain military platforms.
- Sales of Commercial Aftermarket decreased by \$2 million, or 1%, to \$132 million in 2015. The sales decrease reflected lower sales to airlines and other aftermarket customers.
- Sales of Military Aftermarket increased by \$5 million, or 9%, to \$57 million in 2015. The sales increase was driven by higher military modernization and upgrade product sales primarily associated with the B-52H brake control upgrade program for the U.S. Air Force.

Aerospace & Electronics operating profit increased by \$7 million, or 5%, to \$145 million in 2015, primarily as a result of strong productivity and repositioning benefits, a decrease in restructuring and related charges and a favorable product mix, partially offset by higher engineering expense.

2014 compared with 2013

Aerospace & Electronics sales increased \$2 million, or 0.3%, to \$696 million in 2014. The commercial market and military market accounted for 70% and 30%, respectively, of total segment sales in 2014. Sales to OEM and aftermarket customers were 73% and 27%, respectively, in 2014.

- Sales of Commercial Original Equipment increased by \$10 million, or 3%, to \$351 million in 2014. The sales increase was driven by higher sales to manufacturers of large commercial transport aircrafts as industry build rates increased.
- Sales of Military Original Equipment decreased by \$7 million, or 4%, to \$159 million in 2014. The sales decrease reflected a decline in market demand for microwave components and lower product shipments for space applications.

Aerospace & Electronics operating profit decreased by \$22 million, or 14%, to \$138 million in 2014, primarily due to an increase in engineering and new product development spending supporting new program wins and higher costs associated with new product launches in our cabin business, restructuring and related charges of \$8 million and an unfavorable product mix driven by stronger demand in early commercial programs which tend to carry lower margins, partially offset by productivity gains.

ENGINEERED MATERIALS

(in millions, except %)	2015	2014	2013
Net sales by product line:			
FRP- Recreational Vehicles	\$ 134	\$ 134	\$ 114
FRP- Building Products	83	82	84
FRP- Transportation	38	38	35
Total net sales	255	253	232
Operating profit	48	37	34
Assets	228	229	233
Operating margin	19.0%	14.5%	14.8%

2015 compared with 2014

Engineered Materials sales increased by \$2 million, or 1%, to \$255 million in 2015.

- Sales of Fiberglass-reinforced plastic panels ("FRP") to recreational vehicle ("RV") manufacturers increased slightly, resulting from higher sales of our RV-related applications as RV OEM build rates remained strong throughout 2015, primarily reflecting low fuel prices and continued low interest rates.
- Sales of FRP to building products customers increased \$1 million, or 2%, to \$83 million in 2015, reflecting a modest recovery in commercial construction end markets in the United States.

Engineered Materials operating profit increased by \$12 million, or 32%, to \$48 million in 2015, reflecting lower raw material costs, primarily resin, and strong productivity gains.

2014 compared with 2013

Engineered Materials sales increased by \$21 million, or 9%, to \$253 million in 2014.

- Sales of FRP to RV manufacturers increased by \$20 million, or 18%, to \$134 million in 2014, reflecting higher demand for our RV-related applications as RV OEM build rates remained strong, with both dealer and retail demand continuing through 2014.
- Sales of FRP to building products customers decreased \$2 million, or 3%, to \$82 million in 2014, reflecting a slow recovery in commercial construction end markets in the United States.
- Sales of FRP to transportation-related customers increased by \$3 million, or 10%, to \$38 million in 2014, reflecting higher sales in Latin America, timing of a large fleet build with one customer in North America and higher sales of aerodynamic side skirts for trailers.

Engineered Materials operating profit increased by \$2 million, or 7%, to \$37 million, in 2014, reflecting a \$6 million impact from the higher sales and strong productivity gains, partially offset by an unfavorable product mix and higher raw material costs, primarily resin and substrates.

CORPORATE

(in millions, except %)	2015	2014	2013
Corporate expense	\$ (48)	\$ (54)	\$ (76)
Corporate expense — Environmental	—	(56)	—
Total Corporate	(48)	(109)	(76)
Interest income	2	2	2
Interest expense	(38)	(39)	(26)
Miscellaneous	(1)	2	3

2015 compared with 2014

Total Corporate decreased by \$62 million, or 56%, to \$48 million in 2015, primarily due to the absence a \$49 million charge related to an increase in the Company's liability at its Goodyear Site, a \$6.8 million charge for expected remediation costs associated with our Roseland Site and a \$6.5 million charge related to a lawsuit settlement recorded in 2014.

2014 compared with 2013

Total Corporate increased by \$33 million, or 45%, to \$109 million in 2014, primarily due to the aforementioned \$49 million charge related to our Goodyear Site, a \$6.8 million charge related to our Roseland Site and a \$6.5 million charge related to a lawsuit settlement. These increases were partially offset by \$20.4 million lower MEI acquisition related costs in 2014 compared to 2013.

Income Tax

(in millions, except %)	2015	2014	2013
Income before tax — U.S.	\$ 262	\$ 142	\$ 177
Income before tax — non-U.S.	75	139	149
Income before tax — worldwide	337	281	326
Provision for income taxes	107	88	105
Effective tax rate	31.7%	31.2%	32.2%

Our effective tax rate is affected by a number of items, both recurring and discrete, including the amount of income we earn in different jurisdictions and their respective statutory tax rates, acquisitions and dispositions, changes in the valuation of our deferred tax assets and liabilities, changes in tax laws, regulations and accounting principles, the continued availability of statutory tax credits and deductions, the continued reinvestment of our overseas earnings, and examinations initiated by tax authorities around the world. See Application of Critical Accounting Policies included later in this Item 7 for additional information about our provision for income taxes. A reconciliation of the statutory U.S. federal tax rate to our effective tax rate is set forth in Note 2 of the Notes to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K.

2015 compared with 2014

Our effective tax rate was higher in 2015 than in 2014 primarily because we earned a higher amount of income in jurisdictions with higher statutory tax rates, partially offset by a higher U.S. federal tax benefit from domestic manufacturing activities.

2014 compared with 2013

Our effective tax rate was lower in 2014 than in 2013 primarily because our 2013 effective tax rate included the unfavorable effects of non-deductible transaction costs and withholding taxes related to the MEI acquisition. However, this was partially offset by less benefit from the U.S. federal research credit in 2014. While our 2014 effective tax rate includes one year's worth of benefit for the credit because it was extended during 2014 with retroactive effect to January 1, 2014, our 2013 effective tax rate included two years' worth of credit because it was extended during 2013 with retroactive effect to January 1, 2012.

LIQUIDITY AND CAPITAL RESOURCES

Our operating philosophy is to deploy cash provided from operating activities, when appropriate, to provide value to shareholders by reinvesting in existing businesses, by making acquisitions that will complement our portfolio of businesses, by divesting businesses that are no longer strategic and by paying dividends and/or repurchasing shares.

Our current cash balance of \$364 million, together with cash we expect to generate from future operations and the \$451 million available under our Commercial Paper ("CP") Program and revolving credit facility, is expected to be sufficient to finance our short- and long-term capital requirements, as well as to fund payments associated with our asbestos and environmental liabilities, restructuring and acquisition integration activities and expected pension contributions. In addition, we believe our credit ratings afford us adequate access to public and private markets for debt. We have borrowings totaling \$49.0 million outstanding under our CP Program as of December 31, 2015. There are no other significant debt maturities coming due until 2018.

We have an estimated liability of \$546 million for pending and reasonably anticipated asbestos claims through 2021, and while it is probable that this amount will change and we may incur additional liabilities for asbestos claims after 2021, which additional liabilities may be material, we cannot reasonably estimate the amount of such additional liabilities at this time. Similarly, we have an estimated liability of \$64 million related to environmental remediation costs projected through 2022 related to our Goodyear Site.

As of December 31, 2015, our non-U.S. subsidiaries held approximately \$358 million of cash, which would be subject to additional tax upon repatriation to the United States. Our current plans do not anticipate that we will need funds generated from our non-U.S. operations to fund our U.S. operations. In the event we were to repatriate the cash balances of our non-U.S. subsidiaries, we would provide for and pay additional U.S. and non-U.S. taxes in connection with such repatriation.

Operating Activities

Cash provided by operating activities, a key source of our liquidity, was \$229.3 million in 2015, compared to \$264.0 million in 2014. The decrease primarily resulted from higher working capital requirements and higher environmental payments, partially offset by lower defined benefit plan and postretirement contributions and lower net asbestos-related payments. Net asbestos-related payments in 2015 and 2014 were \$49.9 million and \$61.3 million, respectively. In 2016, we expect to make payments related to asbestos settlement and defense costs, net of related insurance recoveries, of approximately \$50 million, environmental payments of approximately \$12 million and contributions to our defined benefit plans of approximately \$8 million.

Investing Activities

Cash flows relating to investing activities consist primarily of cash provided by divestitures of businesses or assets and cash used for acquisitions and capital expenditures. Cash used for investing activities was \$35.2 million in 2015, compared to \$25.8 million in 2014. The increase in cash used for investing activities was primarily due to the absence of proceeds from a 2014 purchase price adjustment related to the acquisition of MEI and the divestiture of a small business, coupled with lower proceeds from the disposition of capital assets. These were partially offset by lower capital expenditures. Capital expenditures are made primarily for increasing capacity, replacing equipment, supporting new product development and improving information systems. We expect our capital expenditures to approximate \$50 million in 2016, reflecting anticipated increases in capital assets required to support product development initiatives, primarily in our Aerospace & Electronics segment.

Financing Activities

Financing cash flows consist primarily of payments of dividends to shareholders, share repurchases, repayments of indebtedness, proceeds from the issuance of commercial paper and proceeds from the issuance of common stock. Cash used for financing activities was \$143.8 million in 2015, compared to \$133.0 million in 2014. The higher levels of cash used for financing activities was primarily due to higher payments of outstanding indebtedness, partially offset by less cash used for open market share repurchases (we repurchased 398,095 shares of our common stock at a cost of \$25 million in 2015 and 812,793 shares of our common stock at a cost of \$50 million in 2014).

Financing Arrangements

Total debt was \$799 million and \$850 million as of December 31, 2015 and 2014, respectively. The Company's indebtedness as of December 31, 2015 was as follows:

- \$250 million of 2.75% notes due 2018;
- \$300 million of 4.45% notes due 2023;
- \$199 million of 6.55% notes due 2036;
- \$49 million of borrowing outstanding under our commercial paper program; and
- \$1 million of other debt.

2.75% notes due 2018 - In December 2013, the Company issued five year notes having an aggregate principal amount of \$250 million. The notes are unsecured, senior obligations that mature on December 15, 2018 and bear interest at 2.75% per annum, payable semi-annually on June 15 and December 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of the Company, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 2.92%.

4.45% notes due 2023 - In December 2013, the Company issued 10 year notes having an aggregate principal amount of \$300 million. The notes are unsecured, senior obligations that mature on December 15, 2023 and bear interest at 4.45% per annum, payable semi-annually on June 15 and December 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of the Company, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 4.56%.

6.55% notes due 2036 - In November 2006, the Company issued 30 year notes having an aggregate principal amount of \$200 million. The notes are unsecured, senior obligations of the Company that mature on November 15, 2036 and bear interest at 6.55% per annum, payable semi-annually on May 15 and November 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or in part, at the option of the Company. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of the Company, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require the Company to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization; these notes have an effective annualized interest rate of 6.67%.

Commercial paper program - On March 2, 2015, the Company entered into a commercial paper program (the "CP Program") pursuant to which it may issue short-term, unsecured commercial paper notes (the "Notes") pursuant to the exemption from registration contained in Section 4(a)(2) of the Securities Act of 1933, as amended. Amounts available under the CP Program may be borrowed, repaid and re-borrowed from time to time, with the aggregate principal amount of the Notes outstanding under the CP Program at any time not to exceed \$500 million. The Notes will have maturities of up to 397 days from date of issue. The Notes will rank at least *pari passu* with all of our other unsecured and unsubordinated indebtedness. At December 31, 2015, Notes with a principal amount of \$49.0 million were outstanding. The net proceeds of the issuances of the Notes were used to repay amounts under our revolving credit facility and for general corporate purposes.

Other financing arrangements

On May 27, 2015, the Company entered into an amendment ("Amendment No. 2") to the Company's five-year, \$500 million Second Amended and Restated Credit Agreement. Amendment No. 2, among other things, (i) extends the maturity date under the Second Amended and Restated Credit Agreement to May 27, 2020 and (ii) amends the facility fee and applicable margins on the revolving loans made pursuant to the Second Amended and Restated Credit Agreement. Following the effectiveness of Amendment No. 2, at the Company's current credit rating, the facility fee is reduced by 5 basis points to 0.15% while the applicable margin on revolving loans is increased by 5 basis points to 0.10% for base rate loans and 1.10% for LIBOR loans.

In May 2012, the Company entered into a five year, \$300 million Amended and Restated Credit Agreement (as subsequently amended, and increased to \$500 million, the "facility"), which is due to expire in May 2017. The facility allows the Company to borrow, repay, or to the extent permitted by the agreement, prepay and re-borrow funds at any time prior to the stated maturity date, and the loan proceeds may be used for general corporate purposes including financing for acquisitions. Interest is based on, at our option, (1) a LIBOR-based formula that is dependent in part on the Company's credit rating (LIBOR plus 105 basis points as of the date of this Report; up to a maximum of LIBOR plus 147.5 basis points), or (2) the greatest of (i) the JPMorgan Chase Bank, N.A.'s prime rate, (ii) the Federal Funds rate plus 50 basis points, or (iii) an adjusted LIBOR rate plus 100 basis points, plus a spread dependent on the Company's credit rating (5 basis points as of the date of this Report; up to a maximum of 47.5 basis points). At December 31, 2015, there were no outstanding borrowings under the facility. The facility contains customary affirmative and negative covenants for credit facilities of this type, including the absence of a material adverse effect and limitations on the Company and its subsidiaries with respect to indebtedness, liens, mergers, consolidations, liquidations and dissolutions, sales of all or substantially all assets, transactions with affiliates and hedging arrangements. The facility also provides for customary events of default, including failure to pay principal, interest or fees when due, failure to comply with covenants, the fact that any representation or warranty made by us is false in any material respect, default under certain other indebtedness, certain insolvency or receivership events affecting us and our subsidiaries, certain ERISA events, material judgments and a change in control of the Company. The facility contains a leverage ratio covenant requiring a ratio of total debt to total capitalization of less than or equal to 65%. At December 31, 2015, our ratio was 41%, as follows:

(in millions) December 31,	2015
Short-term borrowings	\$ 49.6
Long-term debt	749.3
Total indebtedness	\$ 798.9
Total shareholders' equity	1,139.4
Capitalization	\$ 1,938.3
Total indebtedness to capitalization	41%

All outstanding senior, unsecured notes were issued under an indenture dated as of April 1, 1991. The indenture contains certain limitations on liens and sale and lease-back transactions.

At December 31, 2015, the Company had open standby letters of credit of \$23 million issued pursuant to a \$125 million uncommitted Letter of Credit Reimbursement Agreement, and certain other credit lines.

Credit Ratings

As of December 31, 2015, our senior unsecured debt was rated BBB by Standard & Poor's with a Stable outlook and Baa2 with a Stable outlook by Moody's Investors Service. We believe that these ratings afford us adequate access to the public and private markets for debt.

Contractual Obligations

Under various agreements, we are obligated to make future cash payments in fixed amounts. These include payments under our long-term debt agreements and rent payments required under operating lease agreements. The following table summarizes our fixed cash obligations as of December 31, 2015:

(in millions)	Payment due by Period				
	Total	2016	2017 -2018	2019 -2020	After 2021
Long-term debt (1)	\$ 750.0	\$ —	\$ 250.0	\$ —	\$ 500.0
Fixed interest payments	402.5	33.3	66.6	52.9	249.7
Operating lease payments	59.6	17.1	26.4	9.1	7.0
Purchase obligations	114.6	108.0	6.3	0.3	—
Pension benefits (2)	484.6	42.1	85.5	92.4	264.6
Other long-term liabilities reflected on Consolidated Balance Sheets (3)	—	—	—	—	—
Total	\$ 1,811.3	\$ 200.5	\$ 434.8	\$ 154.7	\$ 1,021.3

(1) Excludes original issue discount.

(2) Pension benefits are funded by the respective pension trusts. The postretirement benefit component of the obligation is approximately \$1 million per year for which there is no trust and will be directly funded by us. Pension benefits are included through 2025.

(3) As the timing of future cash outflows is uncertain, the following long-term liabilities (and related balances) are excluded from the above table: Long-term asbestos liability (\$471 million), long-term environmental liability (\$49 million) and gross unrecognized tax benefits (\$45 million) and related gross interest and penalties (\$6 million).

Capital Structure

The following table sets forth our capitalization:

(in millions, except %) December 31,	2015	2014
Short-term borrowings	\$ 49.6	\$ 100.8
Long-term debt	\$ 749.3	\$ 749.2
Total debt	798.9	850.0
Less cash and cash equivalents	363.5	346.3
Net debt *	435.4	503.8
Equity	1,150.8	1,070.6
Net capitalization*	\$ 1,586.2	\$ 1,574.4
Net debt to equity*	37.8%	47.1%
Net debt to net capitalization*	27.4%	32.0%

* Net debt, a non-GAAP measure, represents total debt less cash and cash equivalents. As of December 31, 2015, our non-U.S. subsidiaries held approximately \$358 million of cash, which would be subject to additional tax upon repatriation to the United States. We report our financial results in accordance with U.S. generally accepted accounting principles (U.S. GAAP). However, management believes that certain non-GAAP financial measures, which include the presentation of net debt, provide useful information about our ability to satisfy our debt obligation with currently available funds. Management also uses these non-GAAP financial measures in making financial, operating, planning and compensation decisions and in evaluating the Company's performance.

Non-GAAP financial measures, which may be inconsistent with similarly captioned measures presented by other companies, should be viewed in the context of the definitions of the elements of such measures we provide and in addition to, and not as a substitute for, our reported results prepared and presented in accordance with U.S. GAAP.

In 2015, equity increased \$80 million, primarily as a result of net income attributable to common shareholders of \$229 million and stock option exercises of \$11 million, partially offset by cash dividends of \$77 million, changes in currency translation adjustment of \$70 million, open-market share repurchases of \$25 million and changes in pension and postretirement plan assets and benefit obligations, net of tax, of \$8 million.

Off-Balance Sheet Arrangements

We do not have any majority-owned subsidiaries that are not included in the consolidated financial statements, nor do we have any interests in or relationships with any special purpose off-balance sheet financing entities.

OUTLOOK

Overall

Our sales depend heavily on industries that are cyclical in nature or are subject to market conditions which may cause customer demand for our products to be volatile and unpredictable. Demand in these industries is affected by fluctuations in domestic and international economic conditions, as well as currency fluctuations, commodity costs, and a variety of other factors.

We remain generally cautious about global economic conditions and the demand for our products, particularly in our Fluid Handling segment. For 2016, we expect a total year-over-year sales decline of approximately 2% driven by unfavorable foreign exchange, with core sales approximately flat compared to 2015.

Consistent with our focus on productivity, we undertook certain repositioning actions in our Fluid Handling and Aerospace & Electronics segments in 2014 and 2015. The costs associated with these repositioning actions were \$11.6 million in 2015 and \$22.7 million in 2014. Savings associated with these repositioning actions were \$14 million in 2015, and we expect incremental savings of \$18 million in 2016.

In connection with the acquisition of MEI, we recorded \$6.6 million in 2015 and \$20.1 million of integration and restructuring costs in 2014. We realized approximately \$10 million of acquisition-related synergies in 2014, \$14 million in 2015, and we expect an incremental \$9 million of synergies in 2016.

Fluid Handling

In 2016, we expect Fluid Handling sales to decline in the high single-digit range compared to 2015, driven by a mid single-digit core sales decline and unfavorable foreign currency translation.

We expect Process Valves and Related Products sales to decline in the low double-digit range compared to 2015, driven by a low double-digit sales decline and unfavorable foreign currency translation. Core sales are expected to decline because of slow economic growth and continued weakness in oil prices, which contribute to lower levels of customer capital spending and project delays across the power, oil & gas, chemical, and general industrial end markets.

We expect Commercial Valves sales to decline in the mid single-digit range compared to 2015, driven by unfavorable foreign exchange, partially offset by a slight improvement in core sales. Core sales are expected to improve slightly, driven by market share gains, largely offset by soft market conditions in the United Kingdom, Middle East, and Canadian non-residential construction markets.

Our Other Products sales are expected to be approximately flat compared to 2015 given the relative stability of the U.S. municipal market.

For the segment, we expect a modest decline in operating profit compared to 2015, as the negative impact from lower core sales and unfavorable foreign currency will be partially offset by productivity initiatives, repositioning benefits, and lower repositioning costs.

Payment & Merchandising Technologies

We expect Payment & Merchandising Technologies sales to increase in the low single-digit range compared to 2015, with a mid single-digit improvement in core sales partially offset by unfavorable foreign currency translation. We expect core sales to improve across both CPI and Merchandising Systems. At CPI, we expect core sales improvement to be driven by several vertical end markets including transportation, vending, and financial services. At Merchandising Systems, we expect an improvement in core sales driven primarily by better demand from large bottler customers. We expect the segment's operating profit to increase compared to 2015 driven by the higher sales, integration synergies, and lower integration costs, partially offset by unfavorable foreign currency.

Aerospace & Electronics

We expect Aerospace & Electronics core sales to increase in the mid single-digit range compared to 2015. For 2016, we expect that commercial market conditions will remain generally positive. We expect commercial aftermarket sales to decline in the low single digit range primarily because of lower retrofit program sales. Although we expect defense markets to remain relatively flat, we expect our military sales to increase substantially as a result of a large contract for our microwave products, along with higher sales for a major military aerospace program. We expect segment operating profit in 2016 to improve slightly compared to 2015 driven by higher sales and repositioning benefits, partially offset by unfavorable product mix and higher engineering spending.

Engineered Materials

In 2016, we expect the Engineered Materials segment sales will be approximately flat compared to the prior year. We expect modest growth in sales to the RV and building products markets, offset by a decline in sales to the transportation market. Segment operating profit is expected to decline modestly, primarily from a contraction in the spread between raw material costs and pricing.

APPLICATION OF CRITICAL ACCOUNTING POLICIES

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States. Our significant accounting policies are more fully described in Note 1, "Nature of Operations and Significant Accounting Policies" to the Notes to the Consolidated Financial Statements. Certain accounting policies require us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. On an ongoing basis, we evaluate our estimates and assumptions, and the effects of revisions are reflected in the financial statements in the period in which they are determined to be necessary. The accounting policies described below are those that most frequently require us to make estimates and judgments and, therefore, are critical to understanding our results of operations. We have discussed the development and selection of these accounting estimates and the related disclosures with the Audit Committee of our Board of Directors.

Revenue Recognition. Sales revenue is recorded when title (risk of loss) passes to the customer and collection of the resulting receivable is reasonably assured. Revenue on long-term, fixed-price contracts is recorded on a percentage of completion basis using units of delivery as the measurement basis for progress toward completion. Sales under cost-reimbursement-type contracts are recorded as costs are incurred.

In May 2014, the Financial Accounting Standards Board ("FASB") issued new accounting guidance related to revenue recognition. This new standard will replace all current U.S. GAAP guidance on this topic and eliminate all current industry-specific guidance. The new revenue recognition standard provides a unified model to determine when and how revenue is recognized. The core principle is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration for which the entity expects to be entitled in exchange for those goods or services. In July 2015, the FASB agreed to a one-year deferral of the effective date; the new standard is now effective for reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early adoption of the new revenue standard is permitted, however, entities reporting under U.S. GAAP are not permitted to adopt the standard earlier than the original effective date, December 15, 2016. The new standard can be applied either retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. We are currently evaluating when to adopt the new standard, the impacts of adoption and the implementation approach to be used.

Inventories. Inventories include the costs of material, labor and overhead and are stated at the lower of cost or market. We regularly review inventory values on hand and record a provision for excess and obsolete inventory primarily based on historical performance and our forecast of product demand over the next two years. The reserve for excess and obsolete inventory was \$48.4 million and \$47.9 million at December 31, 2015 and 2014, respectively.

Income Taxes. We account for income taxes in accordance with Accounting Standards Codification ("ASC") Topic 740 "Income Taxes" ("ASC 740"), which requires an asset and liability approach for the financial accounting and reporting of income taxes. Under this method, deferred income taxes are recognized for the expected future tax consequences of differences between the tax bases of assets and liabilities and their reported amounts in the financial statements. These balances are measured using the enacted tax rates expected to apply in the year(s) in which these temporary differences are expected to reverse. The effect of a change in tax rates on deferred income taxes is recognized in income in the period when the change is enacted.

Based on consideration of all available evidence regarding their utilization, we record net deferred tax assets to the extent that it is more likely than not that they will be realized. Where, based on the weight of all available evidence, it is more likely than not that some amount of a deferred tax asset will not be realized, we establish a valuation allowance for the amount that, in our judgment, is sufficient to reduce the deferred tax asset to an amount that is more likely than not to be realized. The evidence we consider in reaching such conclusions includes, but is not limited to, (1) future reversals of existing taxable temporary differences, (2) future taxable income exclusive of reversing taxable temporary differences, (3) taxable income in prior carryback year(s) if carryback is permitted under the tax law, (4) cumulative losses in recent years, (5) a history of tax losses or credit carryforwards expiring unused, (6) a carryback or carryforward period that is so brief it limits realization of tax benefits, and (7) a strong earnings history exclusive of the loss that created the carryforward and support showing that the loss is an aberration rather than a continuing condition.

We account for unrecognized tax benefits in accordance with ASC 740, which prescribes a minimum probability threshold that a tax position must meet before a financial statement benefit is recognized. The minimum threshold is defined as a tax

position that is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation, based solely on the technical merits of the position. The tax benefit recognized is the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

We recognize interest and penalties related to unrecognized tax benefits within the income tax expense line of the Consolidated Statement of Operations, while accrued interest and penalties are included within the related tax liability line of the Consolidated Balance Sheets.

In determining whether the earnings of our non-U.S. subsidiaries are permanently reinvested overseas, we consider the following:

- Our history of utilizing non-U.S. cash to acquire non-U.S. businesses,
- Our current and future needs for cash outside the U.S. (e.g., to fund capital expenditures, business operations, potential acquisitions, etc.),
- Our ability to satisfy U.S.-based cash needs (e.g., domestic pension contributions, interest payment on external debt, dividends to shareholders, etc.) with cash generated by our U.S. businesses, and
- The effect U.S. tax reform proposals calling for reduced corporate income tax rates and/or “repatriation” tax holidays would have on the amount of the tax liability.

Goodwill and Other Long-Lived Assets. As of December 31, 2015, we had \$1.168 billion of goodwill. Our business acquisitions typically result in the acquisition of goodwill and other intangible assets. We follow the provisions under ASC Topic 350, “Intangibles – Goodwill and Other” (“ASC 350”) as it relates to the accounting for goodwill in our Consolidated Financial Statements. These provisions require that we, on at least an annual basis, evaluate the fair value of the reporting units to which goodwill is assigned and attributed and compare that fair value to the carrying value of the reporting unit to determine if impairment exists. Impairment testing takes place more often than annually if events or circumstances indicate a change in the impairment status. A reporting unit is an operating segment unless discrete financial information is prepared and reviewed by segment management for businesses one level below that operating segment (a “component”), in which case the component would be the reporting unit. At December 31, 2015, we had seven reporting units.

When performing our annual impairment assessment, we compare the fair value of each of our reporting units to their respective carrying value. Goodwill is considered to be potentially impaired when the net book value of a reporting unit exceeds its estimated fair value. Fair values are established primarily by discounting estimated future cash flows at an estimated cost of capital which varies for each reporting unit and which, as of our most recent annual impairment assessment, ranged between 10.0% and 12.5% (a weighted average of 10.8%), reflecting the respective inherent business risk of each of the reporting units tested. This methodology for valuing our reporting units (commonly referred to as the Income Method) has not changed since the prior year. The determination of discounted cash flows is based on the businesses’ strategic plans and long-range planning forecasts, which change from year to year. The revenue growth rates included in the forecasts represent our best estimates based on current and forecasted market conditions, and the profit margin assumptions are projected by each reporting unit based on the current cost structure and anticipated net cost increases/reductions. There are inherent uncertainties related to these assumptions, including changes in market conditions, and management’s judgment in applying them to the analysis of goodwill impairment. In addition to the foregoing, for each reporting unit, market multiples are used to corroborate our discounted cash flow results where fair value is estimated based on earnings before income taxes, depreciation, and amortization (EBITDA) and revenue multiples determined by available public information of comparable businesses. While we believe we have made reasonable estimates and assumptions to calculate the fair value of our reporting units, it is possible a material change could occur. If actual results are not consistent with management’s estimates and assumptions, goodwill and other intangible assets may be overstated and a charge would need to be taken against net earnings. Furthermore, in order to evaluate the sensitivity of the fair value calculations on the goodwill impairment test, we applied a hypothetical, reasonably possible 10% decrease to the fair values of each reporting unit. The results of this hypothetical 10% decrease would still result in a fair value calculation exceeding our carrying value for each of our reporting units. No impairment charges have been required during 2015, 2014 and 2013.

As of December 31, 2015, we had \$317 million of net intangible assets, of which \$27 million were intangibles with indefinite useful lives, consisting of trade names. We amortize the cost of other intangibles over their estimated useful lives unless such lives are deemed indefinite. Indefinite lived intangibles are tested annually for impairment, or when events or changes in circumstances indicate the potential for impairment. If the carrying amount of the indefinite lived intangible exceeds the fair value, the intangible asset is written down to its fair value. Fair value is calculated using discounted cash flows.

In addition to annual testing for impairment of indefinite-lived intangible assets, we review all of our long-lived assets, including intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Examples of events or changes in circumstances could include, but are not

limited to, a prolonged economic downturn, current period operating or cash flow losses combined with a history of losses or a forecast of continuing losses associated with the use of an asset or asset group, or a current expectation that an asset or asset group will be sold or disposed of before the end of its previously estimated useful life. Recoverability is based upon projections of anticipated future undiscounted cash flows associated with the use and eventual disposal of the long-lived asset (or asset group), as well as specific asset appraisal in certain instances. Reviews occur at the lowest level for which identifiable cash flows are largely independent of cash flows associated with other long-lived assets or asset groups and include consideration of estimated future revenues, gross profit margins, operating profit margins and capital expenditures which are based on the businesses' strategic plans and long-range planning forecasts, which change from year to year. The revenue growth rates included in the forecasts represent our best estimates based on current and forecasted market conditions, and the profit margin assumptions are based on the current cost structure and anticipated net cost increases/reductions. There are inherent uncertainties related to these assumptions, including changes in market conditions, and management's judgment in applying them to the analysis. If the future undiscounted cash flows are less than the carrying value, then the long-lived asset is considered impaired and a charge would be taken against net earnings based on the amount by which the carrying amount exceeds the estimated fair value. Judgments that we make which impact these assessments relate to the expected useful lives of long-lived assets and our ability to realize any undiscounted cash flows in excess of the carrying amounts of such assets. Such judgments are affected primarily by changes in the expected use of the assets, changes in technology or development of alternative assets, changes in economic conditions, changes in operating performance and changes in expected future cash flows. Since judgment is involved in determining the fair value of long-lived assets, there is risk that the carrying value of our long-lived assets may require adjustment in future periods. Historical results to date have generally approximated expected cash flows for the identifiable cash flow generating level. We believe that there have been no events or circumstances which would more likely than not reduce the fair value of our long-lived and amortizable intangible assets below their carrying value.

Contingencies. The categories of claims for which we have estimated our liability, the amount of our liability accruals, and the estimates of our related insurance receivables are critical accounting estimates related to legal proceedings and other contingencies. Please refer to Note 10, "Commitments and Contingencies", of the Notes to the Consolidated Financial Statements for further discussion.

Asbestos Liability and Related Insurance Coverage and Receivable. As of December 31, 2015, we had an aggregate asbestos liability of \$546 million for pending claims and future claims projected to be filed against us through December 31, 2021. Estimation of our exposure for asbestos-related claims is subject to significant uncertainties, as there are multiple variables that can affect the timing, severity and quantity of claims and the manner of their resolution. We have retained the firm of Hamilton, Rabinovitz & Associates, Inc. ("HR&A"), a nationally recognized expert in the field, to assist management in estimating our asbestos liability in the tort system. HR&A reviews information provided by us concerning claims filed, settled and dismissed, amounts paid in settlements and relevant claim information such as the nature of the asbestos-related disease asserted by the claimant, the jurisdiction where filed and the time lag from filing to disposition of the claim. The methodology used by HR&A to project future asbestos costs is based largely on our experience during a base reference period of eleven quarterly periods (consisting of the two full preceding calendar years and three additional quarterly periods to the estimate date) for claims filed, settled and dismissed. Our experience is then compared to estimates of the number of individuals likely to develop asbestos-related diseases determined based on widely used previously conducted epidemiological studies augmented with current data inputs. Using that information, HR&A estimates the number of future claims that would be filed against us through our forecast period and estimates the aggregate settlement or indemnity costs that would be incurred to resolve both pending and future claims based upon the average settlement costs by disease during the reference period. Our liability estimate is augmented for the estimated cost of defending asbestos claims in the tort system. The most significant factors affecting the liability estimate are (1) the number of new mesothelioma claims filed against us, (2) the average settlement costs for mesothelioma claims, (3) the percentage of mesothelioma claims dismissed against us and (4) the aggregate defense costs incurred by us. These factors are interdependent, and no one factor predominates in determining the liability estimate. Management believes that the level of uncertainty regarding the various factors used in estimating future asbestos costs is too great to provide for reasonable estimation of the number of future claims, the nature of such claims or the cost to resolve them for years beyond the indicated estimate. In addition to claim experience, we consider additional quantitative and qualitative factors such as the nature of the aging of pending claims, significant appellate rulings and legislative developments, and their respective effects on expected future settlement values. Based on this evaluation, we determined that no change in the estimate was warranted for the period ended December 31, 2015. Nevertheless, if certain factors show a pattern of sustained increase or decrease, the liability could change materially; however, all the assumptions used in estimating the asbestos liability are interdependent and no single factor predominates in determining the liability estimate. Because of the uncertainty with regard to and the interdependency of such factors used in the calculation of our asbestos liability, and since no one factor predominates, we believe that a range of potential liability estimates beyond the indicated forecast period cannot be reasonably estimated.

In conjunction with developing the aggregate liability estimate referenced above, we also developed an estimate of probable insurance recoveries for our asbestos liabilities. As of December 31, 2015, we had an aggregate asbestos receivable of \$129 million. In developing this estimate, we considered our coverage-in-place and other settlement agreements, as well as a number of additional factors. These additional factors include the financial viability of the insurance companies, the method by which losses will be allocated to the various insurance policies and the years covered by those policies, how settlement and defense costs will be covered by the insurance policies and interpretation of the effect on coverage of various policy terms and limits and their interrelationships.

Environmental. For environmental matters, we record a liability for estimated remediation costs when it is probable that we will be responsible for such costs and they can be reasonably estimated. Generally, third party specialists assist in the estimation of remediation costs. The environmental remediation liability at December 31, 2015 is substantially all for the Goodyear Site. Estimates of the Company's environmental liabilities at the Goodyear Site are based on currently available facts, present laws and regulations and current technology available for remediation, and are recorded on an undiscounted basis. These estimates consider the Company's prior experience in the Goodyear Site investigation and remediation, as well as available data from, and in consultation with, the Company's environmental specialists. Estimates at the Goodyear Site are subject to significant uncertainties caused primarily by the dynamic nature of the Goodyear Site conditions, the range of remediation alternatives available, together with the corresponding estimates of cleanup methodology and costs, as well as ongoing, required regulatory approvals, primarily from the EPA. During the third quarter of 2014, the EPA issued a Record of Decision amendment requiring, among other things, additional source area remediation resulting in the Company recording a charge of \$49.0 million, extending the accrued costs through 2022. As of December 31, 2015, the total estimated gross liability for the Goodyear Site was \$64 million.

On July 31, 2006, we entered into a consent decree with the U.S. Department of Justice on behalf of the Department of Defense and the Department of Energy pursuant to which, among other things, the U.S. Government reimburses us for 21% of qualifying costs of investigation and remediation activities at the Goodyear Site.

Pension Plans. In the United States, we sponsor a defined benefit pension plan that covers approximately 19% of all U.S. employees. The benefits are based on years of service and compensation on a final average pay basis, except for certain hourly employees where benefits are fixed per year of service. This plan is funded with a trustee in respect to past and current service. Charges to expense are based upon costs computed by an independent actuary. Contributions are intended to provide for future benefits earned to date. A number of our non-U.S. subsidiaries sponsor defined benefit pension plans that cover approximately 11% of all non-U.S. employees. The benefits are typically based upon years of service and compensation. These plans are generally funded with trustees in respect to past and current service.

The expected return on plan assets component of Net Periodic Benefit Cost is determined by applying the assumed expected return on plan assets to the fair value of plan assets. For one of the U.K. pension plans, a market-related value of assets is used in lieu of the fair value of plan assets for this purpose. The net actuarial loss (gain) is amortized to the extent that it exceeds 10% of the greater of the fair value of plan assets and the projected benefit obligation. The amortization period is the average life expectancy of plan participants for most plans. The amortization period for plans with a significant number of active participants accruing benefits is the average future working lifetime of plan participants. The prior service cost (credit) is amortized over the average future working lifetime of plan participants whose prior service benefits were changed.

The net periodic pension (benefit) cost was \$(11) million, \$(12) million and \$5 million in 2015, 2014 and 2013, respectively. The net periodic pension benefit was \$1 million less in 2015 compared to 2014. The reasons for the difference between the net periodic pension benefit gain of \$12 million in 2014, and the \$5 million loss in 2013, included the return on plan assets in 2013 being \$56 million higher than expected (\$13 million reduction in net periodic benefit cost), as well as closure of certain defined benefit plans in our U.K. operations recognized at the end of 2013 (\$5 million reduction in net periodic benefit costs). In the United States, the increase in discount rate from 4.20% to 4.90% also contributed to the gain of \$12 million. Employer cash contributions were \$17 million, \$24 million and \$15 million in 2015, 2014 and 2013, respectively, to our U.S. defined benefit pension plan. We expect, based on current actuarial calculations, to contribute cash of approximately \$8 million to our pension plans in 2016. Cash contributions in subsequent years will depend on a number of factors including the investment performance of plan assets.

For the pension plan, holding all other factors constant, a decrease in the expected long-term rate of return of plan assets by 0.25 percentage points would have increased U.S. 2015 pension expense by \$1.0 million for U.S. pension plans and \$1.1 million for non-U.S. pension plans. Also, holding all other factors constant, a decrease in the discount rate used to determine net periodic pension cost by 0.25 percentage points would have increased 2015 pension expense by \$0.2 million for U.S. pension plans and \$0.9 million for non-U.S. pension plans.

The following key assumptions were used to calculate the benefit obligation and net periodic cost for the periods indicated:

December 31,	Pension Benefits		
	2015	2014	2013
Benefit Obligations			
U.S. Plans:			
Discount rate	4.41%	4.10%	4.90%
Rate of compensation increase	N/A	N/A	3.50%
Non-U.S. Plans:			
Discount rate	3.30%	3.01%	4.05%
Rate of compensation increase	2.81%	2.40%	2.56%
Net Periodic Benefit Cost			
U.S. Plans:			
Discount rate	4.10%	4.90%	4.20%
Expected rate of return on plan assets	7.75%	7.75%	7.75%
Rate of compensation increase	N/A	N/A	3.50%
Non-U.S. Plans:			
Discount rate	3.01%	4.05%	3.93%
Expected rate of return on plan assets	6.94%	7.01%	7.01%
Rate of compensation increase	2.40%	2.56%	3.14%

The long-term expected rate of return on plan assets assumptions were determined with input from independent investment consultants and plan actuaries, utilizing asset pricing models and considering historic returns. The discount rates we used for valuing pension liabilities are based on a review of high quality corporate bond yields with maturities approximating the remaining life of the projected benefit obligation.

Recent Accounting Pronouncements

Information regarding new accounting pronouncements is included in Note 1 to the Consolidated Financial Statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Our cash flows and earnings are subject to fluctuations from changes in interest rates and foreign currency exchange rates. We manage our exposures to these market risks through internally established policies and procedures and, when deemed appropriate, through the use of interest-rate swap agreements and forward exchange contracts. We do not enter into derivatives or other financial instruments for trading or speculative purposes.

Total debt outstanding was \$799 million at December 31, 2015, the majority of which was at fixed rates of interest ranging from 2.75% to 6.55%.

The following is an analysis of the potential changes in interest rates and currency exchange rates based upon sensitivity analysis that models effects of shifts in rates. These are not forecasts.

- Our year-end portfolio is comprised primarily of fixed-rate debt; therefore, the effect of a market change in interest rates would not be significant.
- Based on a sensitivity analysis at December 31, 2015, a 10% change in the foreign currency exchange rates for the year ended December 31, 2015 would have impacted our net earnings by approximately \$4.6 million, due primarily to the euro, British pound, Canadian dollar and Japanese yen. This calculation assumes that all currencies change in the same direction and proportion relative to the U.S. dollar and there are no indirect effects, such as changes in non-U.S. dollar sales volumes or prices.

Item 8. Financial Statements and Supplementary Data

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The accompanying consolidated financial statements of Crane Co. and subsidiaries have been prepared by management in conformity with accounting principles generally accepted in the United States of America and, in the judgment of management, present fairly and consistently the Company's financial position and results of operations and cash flows. These statements by necessity include amounts that are based on management's best estimates and judgments and give due consideration to materiality.

Management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2015. In making its assessment, management has utilized the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in its Internal Control—Integrated Framework, released in 2013. Based on our assessment we believe that, as of December 31, 2015, the Company's internal control over financial reporting is effective based on those criteria.

Deloitte & Touche LLP, the independent registered public accounting firm that also audited the Company's consolidated financial statements included in this Annual Report on Form 10-K, audited the internal control over financial reporting as of December 31, 2015, and issued their related attestation report which is included herein.

The Section 302 certifications of the Company's Chief Executive Officer and its Principal Financial Officer have been filed as Exhibit 31 to the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Crane Co.
Stamford, CT

We have audited the accompanying consolidated balance sheets of Crane Co. and subsidiaries (the "Company") as of December 31, 2015 and 2014, and the related consolidated statements of operations, comprehensive income (loss), cash flows and changes in equity for each of the three years in the period ended December 31, 2015. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Crane Co. and subsidiaries as of December 31, 2015 and 2014, and the results of their operations and their cash flows for each of three years in the period ended December 31, 2015, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2015, based on the criteria established in *Internal Control- Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 23, 2016 expressed an unqualified opinion on the Company's internal control over financial reporting.

See Notes to Consolidated Financial Statements

Note 1 – Nature of Operations and Significant Accounting Policies*Nature of Operations*

Crane Co. (the “Company”) is a diversified manufacturer of highly engineered industrial products comprised of four reporting segments: Fluid Handling, Payment & Merchandising Technologies, Aerospace & Electronics and Engineered Materials. Our primary markets are chemicals, power, oil & gas, aerospace & defense, along with a wide range of general industrial and consumer related end markets.

See Note 13, “Segment Information” for the relative size of these segments in relation to the total Company (both net sales and total assets).

Significant Accounting Policies

Accounting Principles The Company’s consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany balances and transactions have been eliminated upon consolidation. Reclassifications of certain prior year amounts have been made to conform to the current year presentation.

Use of Estimates These accounting principles require management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Actual results may differ from those estimated. Estimates and assumptions are reviewed periodically, and the effects of revisions are reflected in the financial statements in the period in which they are determined to be necessary. Estimates are used when accounting for such items as asset valuations, allowance for doubtful accounts, depreciation and amortization, impairment assessments, reserve for excess and obsolete inventory, reserve for warranty provision, restructuring provisions, employee benefits, taxes, asbestos liability and related insurance receivable, environmental liability and contingencies.

Currency Translation Assets and liabilities of subsidiaries that prepare financial statements in currencies other than the U.S. dollar are translated at the rate of exchange in effect on the balance sheet date; results of operations are translated at the average rates of exchange prevailing during the year. The related translation adjustments are included in accumulated other comprehensive income (loss) in a separate component of equity.

Revenue Recognition Sales revenue is recorded when title (risk of loss) passes to the customer and collection of the resulting receivable is reasonably assured. Revenue on long-term, fixed-price contracts is recorded on a percentage of completion basis using units of delivery as the measurement basis for progress toward completion. Sales under cost reimbursement type contracts are recorded as costs are incurred.

Cost of Goods Sold Cost of goods sold includes the costs of inventory sold and the related purchase and distribution costs. In addition to material, labor and direct overhead, inventoried cost and, accordingly, cost of goods sold include allocations of other expenses that are part of the production process, such as inbound freight charges, purchasing and receiving costs, inspection costs, warehousing costs, amortization of production related intangible assets and depreciation expense. The Company also includes costs directly associated with products sold, such as warranty provisions.

Selling, General and Administrative Expenses Selling, general and administrative expense is charged to income as incurred. Such expenses include the costs of promoting and selling products and include such items as compensation, advertising, sales commissions and travel. In addition, compensation for other operating activities such as executive office administrative and engineering functions are included, as well as general operating expenses such as office supplies, non-income taxes, insurance and office equipment rentals.

Income Taxes The Company accounts for income taxes in accordance with Accounting Standards Codification (“ASC”) Topic 740 “Income Taxes” (“ASC 740”) which requires an asset and liability approach for the financial accounting and reporting of income taxes. Under this method, deferred income taxes are recognized for the expected future tax consequences of differences between the tax bases of assets and liabilities and their reported amounts in the financial statements. These balances are measured using the enacted tax rates expected to apply in the year(s) in which these temporary differences are expected to reverse. The effect of a change in tax rates on deferred income taxes is recognized in income in the period when the change is enacted.

Based on consideration of all available evidence regarding their utilization, the Company records net deferred tax assets to the extent that it is more likely than not that they will be realized. Where, based on the weight of all available evidence, it is more likely than not that some amount of a deferred tax asset will not be realized, the Company establishes a valuation allowance for

the amount that, in management's judgment, is sufficient to reduce the deferred tax asset to an amount that is more likely than not to be realized. The evidence the Company considers in reaching such conclusions includes, but is not limited to, (1) future reversals of existing taxable temporary differences, (2) future taxable income exclusive of reversing taxable temporary differences, (3) taxable income in prior carryback year(s) if carryback is permitted under the tax law, (4) cumulative losses in recent years, (5) a history of tax losses or credit carryforwards expiring unused, (6) a carryback or carryforward period that is so brief it limits realization of tax benefits, and (7) a strong earnings history exclusive of the loss that created the carryforward and support showing that the loss is an aberration rather than a continuing condition.

The Company accounts for unrecognized tax benefits in accordance with ASC 740, which prescribes a minimum probability threshold that a tax position must meet before a financial statement benefit is recognized. The minimum threshold is defined as a tax position that is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation, based solely on the technical merits of the position. The tax benefit recognized is the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

The Company recognizes interest and penalties related to unrecognized tax benefits within the income tax expense line of its Consolidated Statement of Operations, while accrued interest and penalties are included within the related tax liability line of its Consolidated Balance Sheets.

In determining whether the earnings of its non-U.S. subsidiaries are permanently reinvested overseas, the Company considers the following:

- Its history of utilizing non-U.S. cash to acquire non-U.S. businesses,
- Its current and future needs for cash outside the U.S. (e.g., to fund capital expenditures, business operations, potential acquisitions, etc.),
- Its ability to satisfy U.S.-based cash needs (e.g., domestic pension contributions, interest payment on external debt, dividends to shareholders, etc.) with cash generated by its U.S. businesses, and
- The effect U.S. tax reform proposals calling for reduced corporate income tax rates and/or “repatriation” tax holidays would have on the amount of the tax liability.

Earnings Per Share The Company’s basic earnings per share calculations are based on the weighted average number of common shares outstanding during the year. Shares of restricted stock are included in the computation of both basic and diluted earnings per share. Potentially dilutive securities include outstanding stock options, restricted share units, deferred stock units and performance-based restricted share units. The dilutive effect of potentially dilutive securities is reflected in diluted earnings per common share by application of the treasury method. Diluted earnings per share gives effect to all potential dilutive common shares outstanding during the year.

(in millions, except per share data) For the year ended December 31,	2015	2014	2013
Net income attributable to common shareholders	\$ 228.9	\$ 192.7	\$ 219.5
Weighted average basic shares outstanding	58.1	58.7	57.9
Effect of dilutive stock options	0.7	0.9	0.9
Weighted average diluted shares outstanding	58.8	59.6	58.8
Earnings per basic share	\$ 3.94	\$ 3.28	\$ 3.79
Earnings per diluted share	\$ 3.89	\$ 3.23	\$ 3.73

Cash and Cash Equivalents Cash and cash equivalents include highly liquid investments with original maturities of three months or less that are readily convertible to cash and are not subject to significant risk from fluctuations in interest rates. As a result, the carrying amount of cash and cash equivalents approximates fair value.

Accounts Receivable Receivables are carried at net realizable value.

A summary of allowance for doubtful accounts activity follows:

(in millions) December 31,	2015	2014	2013
Balance at beginning of year	\$ 4.9	\$ 4.8	\$ 6.7
Provisions	3.0	3.7	1.5
Deductions	(3.2)	(3.6)	(3.4)
Balance at end of year	\$ 4.7	\$ 4.9	\$ 4.8

Concentrations of credit risk with respect to accounts receivable are limited due to the large number of customers and relatively small account balances within the majority of the Company's customer base and their dispersion across different businesses. The Company periodically evaluates the financial strength of its customers and believes that its credit risk exposure is limited.

Inventories Inventories consist of the following:

(in millions) December 31,	2015	2014
Finished goods	\$ 102.3	\$ 111.8
Finished parts and subassemblies	46.9	42.5
Work in process	60.7	53.2
Raw materials	167.0	162.2
Total inventories	\$ 376.9	\$ 369.7

Inventories include the costs of material, labor and overhead and are stated at the lower of cost or market. Domestic inventories are stated at either the lower of cost or market using the last-in, first-out ("LIFO") method or the lower of cost or market using the first-in, first-out ("FIFO") method. Inventories held in foreign locations are primarily stated at the lower of cost or market using the FIFO method. The LIFO method is not being used at the Company's foreign locations as such a method is not allowable for tax purposes. Changes in the levels of LIFO inventories have reduced cost of sales by \$1.5 million, reduced cost of sales by \$0.7 million and increased cost of sales by \$1.1 million for the years ended December 31, 2015, 2014 and 2013, respectively. The portion of inventories costed using the LIFO method was 29% and 28% of consolidated inventories at December 31, 2015 and 2014, respectively. If inventories that were valued using the LIFO method had been valued under the FIFO method, they would have been higher by \$14.3 million and \$15.0 million at December 31, 2015 and 2014, respectively. The reserve for excess and obsolete inventory was \$48.5 million and \$47.9 million at December 31, 2015 and 2014, respectively.

Property, Plant and Equipment, net Property, plant and equipment, net consist of the following:

(in millions) December 31,	2015	2014
Land	\$ 68.8	\$ 73.2
Buildings and improvements	174.7	179.8
Machinery and equipment	566.0	571.9
Gross property, plant and equipment	809.5	824.9
Less: accumulated depreciation	533.5	534.6
Property, plant and equipment, net	\$ 276.0	\$ 290.3

Property, plant and equipment are stated at cost and depreciation is calculated by the straight-line method over the estimated useful lives of the respective assets, which range from 10 to 25 years for buildings and improvements and three to ten years for machinery and equipment. Depreciation expense was \$39.1 million, \$41.7 million and \$38.7 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Goodwill and Intangible Assets The Company's business acquisitions have typically resulted in the recognition of goodwill and other intangible assets. The Company follows the provisions under ASC Topic 350, "Intangibles – Goodwill and Other" ("ASC 350") as it relates to the accounting for goodwill in the Consolidated Financial Statements. These provisions require that the Company, on at least an annual basis, evaluate the fair value of the reporting units to which goodwill is assigned and attributed and compare that fair value to the carrying value of the reporting unit to determine if an impairment has occurred. The Company performs its annual impairment testing during the fourth quarter. Impairment testing takes place more often than annually if events or circumstances indicate a change in status that would indicate a potential impairment. The Company believes that there have been no events or circumstances which would more likely than not reduce the fair value for its reporting units below its carrying value. A reporting unit is an operating segment unless discrete financial information is

prepared and reviewed by segment management for businesses one level below that operating segment (a “component”), in which case the component would be the reporting unit. At December 31, 2015, the Company had seven reporting units.

When performing its annual impairment assessment, the Company compares the fair value of each of its reporting units to its respective carrying value. Goodwill is considered to be potentially impaired when the net book value of the reporting unit exceeds its estimated fair value. Fair values are established primarily by discounting estimated future cash flows at an estimated cost of capital which varies for each reporting unit and which, as of the Company’s most recent annual impairment assessment, ranged between 10.0% and 12.5% (a weighted average of 10.8%), reflecting the respective inherent business risk of each of the reporting units tested. This methodology for valuing the Company’s reporting units (commonly referred to as the Income Method) has not changed since the adoption of the provisions under ASC 350. The determination of discounted cash flows is based on the businesses’ strategic plans and long-range planning forecasts, which change from year to year. The revenue growth rates included in the forecasts represent best estimates based on current and forecasted market conditions. Profit margin assumptions are projected by each reporting unit based on the current cost structure and anticipated net cost increases/reductions. There are inherent uncertainties related to these assumptions, including changes in market conditions, and management’s judgment in applying them to the analysis of goodwill impairment. In addition to the foregoing, for each reporting unit, market multiples are used to corroborate its discounted cash flow results where fair value is estimated based on earnings multiples determined by available public information of comparable businesses. While the Company believes it has made reasonable estimates and assumptions to calculate the fair value of its reporting units, it is possible a material change could occur. If actual results are not consistent with management’s estimates and assumptions, goodwill and other intangible assets may then be determined to be overstated and a charge would need to be taken against net earnings. Furthermore, in order to evaluate the sensitivity of the fair value calculations on the goodwill impairment test performed during the fourth quarter of 2015, the Company applied a hypothetical, reasonably possible 10% decrease to the fair values of each reporting unit. The effects of this hypothetical 10% decrease would still result in the fair value calculation exceeding the carrying value for each reporting unit.

Changes to goodwill are as follows:

(in millions) December 31,	2015	2014
Balance at beginning of period	\$ 1,191.3	\$ 1,249.3
Disposals	—	(0.8)
Adjustments to purchase price allocations	—	(13.9)
Currency translation	(23.4)	(43.3)
Balance at end of period	\$ 1,167.9	\$ 1,191.3

For the year ended December 31, 2014, the adjustments to purchase price allocations primarily included \$6.1 million related to cash received by the Company as part of the final working capital adjustment of the December 2013 acquisition and \$7.8 million of adjustments to preliminary asset valuations of MEI, which is within the Payment & Merchandising Technologies segment. The disposal represents goodwill associated with the pre-tax loss on sale of a small business divested in June 2014.

Changes to intangible assets are as follows:

(in millions) December 31,	2015	2014
Balance at beginning of period, net of accumulated amortization	\$ 353.5	\$ 408.9
Amortization expense	(31.5)	(37.9)
Currency translation and other	(4.9)	(17.5)
Balance at end of period, net of accumulated amortization	\$ 317.1	\$ 353.5

As of December 31, 2015, the Company had \$317.1 million of net intangible assets, of which \$27.2 million were intangibles with indefinite useful lives, consisting of trade names. The Company amortizes the cost of other intangibles over their estimated useful lives unless such lives are deemed indefinite. Intangibles with indefinite useful lives are tested annually for impairment, or when events or changes in circumstances indicate the potential for impairment. If the carrying amount of the intangibles with indefinite useful lives exceeds the fair value, the intangible asset is written down to its fair value. Fair value is calculated using discounted cash flows.

In addition to annual testing for impairment of indefinite-lived intangible assets, the Company reviews all of its long-lived assets, including intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Examples of events or changes in circumstances could include, but are not limited to, a prolonged economic downturn, current period operating or cash flow losses combined with a history of losses

or a forecast of continuing losses associated with the use of an asset or asset group, or a current expectation that an asset or asset group will be sold or disposed of before the end of its previously estimated useful life. Recoverability is based upon projections of anticipated future undiscounted cash flows associated with the use and eventual disposal of the long-lived asset (or asset group), as well as specific appraisal in certain instances. Reviews occur at the lowest level for which identifiable cash flows are largely independent of cash flows associated with other long-lived assets or asset groups and include estimated future revenues, gross profit margins, operating profit margins and capital expenditures which are based on the businesses' strategic plans and long-range planning forecasts, which change from year to year. The revenue growth rates included in the forecasts represent our best estimates based on current and forecasted market conditions, and the profit margin assumptions are based on the current cost structure and anticipated net cost increases/reductions. There are inherent uncertainties related to these assumptions, including changes in market conditions, and management's judgment in applying them to the analysis. If the future undiscounted cash flows are less than the carrying value, then the long-lived asset is considered impaired and a charge would be taken against net earnings based on the amount by which the carrying amount exceeds the estimated fair value. Judgments that the Company makes which impact these assessments relate to the expected useful lives of long-lived assets and its ability to realize any undiscounted cash flows in excess of the carrying amounts of such assets, and are affected primarily by changes in the expected use of the assets, changes in technology or development of alternative assets, changes in economic conditions, changes in operating performance and changes in expected future cash flows. Since judgment is involved in determining the fair value of long-lived assets, there is risk that the carrying value of our long-lived assets may require adjustment in future periods. Historical results to date have generally approximated expected cash flows for the identifiable cash flow generating level. The Company believes that there have been no events or circumstances which would more likely than not reduce the fair value of its indefinite-lived and amortizing intangible assets below their carrying value.

A summary of intangible assets follows:

(in millions)	Weighted Average Amortization Period of Finite Lived Assets (in years)	December 31, 2015			December 31, 2014		
		Gross Asset	Accumulated Amortization	Net	Gross Asset	Accumulated Amortization	Net
Intellectual property rights	16.5	\$ 88.3	\$ 51.4	\$ 36.9	\$ 91.3	\$ 50.4	\$ 40.9
Customer relationships and backlog	15.5	395.7	132.9	262.8	402.6	112.5	290.1
Drawings	37.9	11.1	10.1	1.0	11.1	10.0	1.1
Other	12.9	61.8	45.4	16.4	63.2	41.8	21.4
Total	15.8	\$ 556.9	\$ 239.8	\$ 317.1	\$ 568.2	\$ 214.7	\$ 353.5

Amortization expense for these intangible assets is currently estimated to be approximately \$30.5 million in 2015, \$29.5 million in 2016, \$26.7 million in 2017, \$24.1 million in 2018 and \$179.1 million in 2019 and thereafter.

Valuation of Long-Lived Assets The Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Examples of events or changes in circumstances could include, but are not limited to, a prolonged economic downturn, current period operating or cash flow losses combined with a history of losses or a forecast of continuing losses associated with the use of an asset or asset group, or a current expectation that an asset or asset group will be sold or disposed of before the end of its previously estimated useful life. Recoverability is based upon projections of anticipated future undiscounted cash flows associated with the use and eventual disposal of the long-lived asset (or asset group), as well as specific appraisal in certain instances. Reviews occur at the lowest level for which identifiable cash flows are largely independent of cash flows associated with other long-lived assets or asset groups. If the future undiscounted cash flows are less than the carrying value, then the long-lived asset is considered impaired and a loss is recognized based on the amount by which the carrying amount exceeds the estimated fair value. Judgments that the Company makes which impact these assessments relate to the expected useful lives of long-lived assets and its ability to realize any undiscounted cash flows in excess of the carrying amounts of such assets, and are affected primarily by changes in the expected use of the assets, changes in technology or development of alternative assets, changes in economic conditions, changes in operating performance and changes in expected future cash flows. Since judgment is involved in determining the fair value of long-lived assets, there is risk that the carrying value of our long-lived assets may require adjustment in future periods.

Financial Instruments The Company does not hold or issue derivative financial instruments for trading or speculative purposes. The Company periodically uses forward foreign exchange contracts as economic hedges of anticipated transactions and firm purchase and sale commitments. These contracts are marked to fair value on a current basis and the respective gains and losses are recognized in other income (expense). The Company also periodically enters into interest-rate swap agreements

to moderate its exposure to interest rate changes. Interest-rate swaps are agreements to exchange fixed and variable rate payments based on the notional principal amounts. The changes in the fair value of these derivatives are recognized in other comprehensive income for qualifying cash flow hedges.

Accumulated Other Comprehensive Loss

The tables below provides the accumulated balances for each classification of accumulated other comprehensive loss, as reflected on the Consolidated Balance Sheets.

<i>(in millions)</i>	Defined Benefit Pension and Other Postretirement Items*	Currency Translation Adjustment	Total
Balance as of December 31, 2014	\$ (257.8)	\$ (41.0)	\$ (298.8)
Other comprehensive loss before reclassifications	(16.3)	(69.6)	(85.9)
Amounts reclassified from accumulated other comprehensive loss	7.9	—	7.9
Net current-period other comprehensive loss	(8.4)	(69.6)	(78.0)
Balance as of December 31, 2015	<u>\$ (266.2)</u>	<u>\$ (110.6)</u>	<u>\$ (376.7)</u>

<i>(in millions)</i>	Defined Benefit Pension and Other Postretirement Items*	Currency Translation Adjustment	Total
Balance as of December 31, 2013	\$ (121.3)	\$ 72.6	\$ (48.7)
Other comprehensive loss before reclassifications	(140.6)	(113.6)	(254.2)
Amounts reclassified from accumulated other comprehensive loss	4.1	—	4.1
Net current-period other comprehensive loss	(136.5)	(113.6)	(250.1)
Balance as of December 31, 2014	<u>\$ (257.8)</u>	<u>\$ (41.0)</u>	<u>\$ (298.8)</u>

* Net of tax benefit of \$109.8, \$114.4 and \$53.4 for 2015, 2014, and 2013, respectively.

The table below illustrates the amounts reclassified out of each component of accumulated other comprehensive income for the period ended December 31, 2015 and 2014.

Details of Accumulated Other Comprehensive Loss Components (in millions)	Amount Reclassified from Accumulated Other Comprehensive Loss		Affected Line Item in the Statements of Operations
	December 31, 2015	December 31, 2014	
Amortization of defined benefit pension items:			
Prior-service costs	\$ (0.4)	\$ 0.1	(\$0.5) and \$0.2 have been recorded within Cost of Sales for the years ended December 31, 2015 and 2014, respectively, and \$0.1 and (\$0.0) have been recorded within Selling, General & Administrative for the years ended December 31, 2015 and 2014, respectively
Net loss (gain)	12.3	5.1	\$16.7 and \$6.9 have been recorded within Cost of Sales for the years ended December 31, 2015 and 2014, respectively and (\$4.4) and (\$1.8) have been recorded within Selling, General & Administrative for the years ended December 31, 2015 and 2014, respectively
Amortization of other postretirement items:			
Prior-service costs	(0.2)	(0.2)	Recorded within Selling, General & Administrative
Net loss (gain)	(0.4)	(0.2)	Recorded within Selling, General & Administrative
	\$ 11.3	\$ 4.8	Total before tax
	3.4	0.7	Tax benefit
Total reclassifications for the period	\$ 7.9	\$ 4.1	Net of tax

Recently Issued Accounting Standards

In November 2015, the Financial Accounting Standards Board (“FASB”) issued amended guidance to simplify the presentation of deferred income taxes. The amendments require deferred tax liabilities and assets to be classified as noncurrent. The amended guidance is effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. The amended guidance will not have an impact on the Company’s results of operations or cash flows, but will affect the presentation of deferred income taxes on its consolidated financial position.

In September 2015, the FASB issued amended guidance regarding business combinations that requires an acquirer to recognize post-close measurement adjustments for provisional amounts in the period the adjustment amounts are determined rather than retrospectively. The acquirer is also required to recognize, in the same period’s financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the provisional amount, calculated as if the accounting had been completed at the acquisition date. The updated guidance is to be applied prospectively effective for annual and interim periods beginning after December 15, 2015. The Company does not expect the amended guidance to have a material impact on its consolidated financial statements.

In July 2015, the FASB issued amended guidance, which changes the measurement principle for inventory from the lower of cost or market to the lower of cost and net realizable value. The guidance defines net realizable value as estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. The new guidance must be applied on a prospective basis and is effective for fiscal years beginning after December 15, 2015, and interim periods within those years, with early adoption permitted. The Company does not expect the amended guidance to have a material impact on its consolidated financial statements.

In April 2015, FASB issued amended guidance to simplify the presentation of debt issuance costs. The amended guidance requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The amendment is effective for periods beginning after December 15, 2015, with early adoption permitted. The Company does not expect the amended guidance to have a material impact on its consolidated financial statements.

In May 2014, the FASB issued new accounting guidance related to revenue recognition. This new standard will replace all current U.S. GAAP guidance on this topic and eliminate all current industry-specific guidance. The new revenue recognition standard provides a unified model to determine when and how revenue is recognized. The core principle is that an entity should

recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration for which the entity expects to be entitled in exchange for those goods or services. In July 2015, the FASB agreed to a one-year deferral of the effective date; the new standard is now effective for reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early adoption of the new revenue standard is permitted, however, entities reporting under U.S. GAAP are not permitted to adopt the standard earlier than the original effective date, , December 15, 2016. The new standard can be applied either retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. The Company is currently evaluating when to adopt the new standard, the impacts of adoption and the implementation approach to be used.

Note 2 – Income Taxes

Provision for Income Taxes

The Company's income (loss) before taxes is as follows:

(in millions) For year ended December 31,	2015	2014	2013
U.S. operations	\$ 261.9	\$ 141.8	\$ 177.2
Non-U.S. operations	74.6	139.4	148.8
Total	\$ 336.5	\$ 281.2	\$ 326.0

The Company's provision (benefit) for income taxes consists of:

(in millions) For year ended December 31,	2015	2014	2013
Current:			
U.S. federal tax	\$ 43.0	\$ 14.0	\$ 11.4
U.S. state and local tax	5.4	2.6	3.4
Non-U.S. tax	18.4	33.1	41.3
Total current	66.8	49.7	56.1
Deferred:			
U.S. federal tax	36.5	30.1	43.8
U.S. state and local tax	(0.4)	1.3	0.6
Non-U.S. tax	3.6	6.5	4.6
Total deferred	39.7	37.9	49.0
Total provision (benefit) for income taxes	\$ 106.5	\$ 87.6	\$ 105.1

A reconciliation of the statutory U.S. federal tax rate to the Company's effective tax rate is as follows:

(in millions) For year ended December 31,	2015	2014	2013
Statutory U.S. federal tax rate	35.0 %	35.0 %	35.0 %
Increase (reduction) from:			
Income taxed at non-U.S. rates	(2.0)%	(4.0)%	(2.0)%
Non-U.S. income inclusion, net of tax credits	— %	0.1 %	0.1 %
State and local taxes, net of federal benefit	1.3 %	1.3 %	1.2 %
U.S. research and development tax credit	(0.9)%	(1.0)%	(1.9)%
U.S. domestic manufacturing deduction	(1.3)%	(0.7)%	(1.0)%
Non-deductible acquisition costs	— %	— %	2.3 %
Other	(0.4)%	0.5 %	(1.5)%
Effective tax rate	31.7 %	31.2 %	32.2 %

As of December 31, 2015, the Company has not provided deferred taxes on \$660 million of undistributed earnings of its non-U.S. subsidiaries because the Company intends to permanently reinvest these earnings outside the U.S. Determination of the U.S. income taxes and non-U.S. withholding taxes due upon the repatriation of this \$660 million of earnings is not practicable because the amount of such taxes depends upon circumstances existing in numerous taxing jurisdictions when the remittance occurs.

The Company's non-U.S. subsidiaries held cash of \$358 million and \$330 million at December 31, 2015 and 2014, respectively, and these balances are generally subject to U.S. income and non-U.S. withholding taxation upon repatriation.

The Company's income taxes payable has been reduced by excess tax benefits from equity-based compensation. For stock options, the Company receives an excess income tax benefit calculated as the tax effect of the difference between the fair market value of the stock at the time of grant and exercise. For restricted share units, the Company receives an excess income tax benefit calculated as the tax effect of the difference between the fair market value of the stock at the time of grant and vesting. The Company had excess tax benefits from equity-based compensation of \$1.6 million, \$7.7 million and \$6.4 million in 2015, 2014 and 2013, respectively, which were reflected as increases to capital surplus.

During 2015, 2014 and 2013, tax provision (benefit) of \$4.6 million, \$(61.1) million, and \$36.2 million, respectively, related to changes in pension and post-retirement plan assets and benefit obligations, were recorded to accumulated other comprehensive income.

Deferred Taxes and Valuation Allowances

The components of deferred tax assets and liabilities included on the Company's Consolidated Balance Sheets are as follows:

(in millions) December 31,	2015	2014
Deferred tax assets:		
Asbestos-related liabilities	\$ 162.7	\$ 182.6
Tax loss and credit carryforwards	105.6	113.8
Pension and post-retirement benefits	69.1	78.7
Inventories	23.5	19.3
Accrued bonus and stock-based compensation	17.1	14.9
Environmental reserves	16.0	24.5
Other	55.3	50.4
Total	449.3	484.2
Less: valuation allowance	145.9	141.0
Total deferred tax assets, net of valuation allowance	303.4	343.2
Deferred tax liabilities:		
Basis difference in intangible assets	(142.2)	(134.8)
Basis difference in fixed assets	(21.5)	(25.8)
Total deferred tax liabilities	(163.7)	(160.6)
Net deferred tax asset	\$ 139.7	\$ 182.6
Balance sheet classification:		
Current deferred tax assets	27.5	\$ 33.0
Long-term deferred tax assets	162.4	196.2
Accrued liabilities	(0.2)	(0.4)
Long-term deferred tax liability	(50.0)	(46.3)
Net deferred tax asset	\$ 139.7	\$ 182.6

As of December 31, 2015, the Company had U.S. federal, U.S. state and non-U.S. tax loss and credit carryforwards that will expire, if unused, as follows:

(in millions) Year of expiration	U.S. Federal Tax Credits	U.S. Federal Tax Losses	U.S. State Tax Credits	U.S. State Tax Losses	Non- U.S. Tax Losses	Total
2016-2020	\$ 17.9	\$ 0.2	\$ 4.0	\$ 27.3	\$ 16.3	
After 2020	3.5	1.8	2.4	795.9	3.0	
Indefinite	—	—	19.6	—	98.6	
Total tax carryforwards	\$ 21.4	\$ 2.0	\$ 26.0	\$ 823.2	\$ 117.9	
Deferred tax asset on tax carryforwards	\$ 21.4	\$ 0.7	\$ 16.9	\$ 37.7	\$ 28.9	\$ 105.6
Valuation allowance on tax carryforwards	(21.4)	(0.4)	(16.3)	(36.9)	(23.7)	(98.7)
Net deferred tax asset on tax carryforwards	\$ —	\$ 0.3	\$ 0.6	\$ 0.8	\$ 5.2	\$ 6.9

At December 31, 2015 and 2014, the Company determined that it was more likely than not that \$98.7 million and \$95.5 million, respectively, of its deferred tax assets related to tax loss and credit carryforwards will not be realized. As a result, the Company recorded a valuation allowance against these deferred tax assets. The Company also determined that it is more likely than not that a portion of the benefit related to U.S. state and non-U.S. deferred tax assets other than tax loss and credit carryforwards will be not realized. Accordingly, at December 31, 2015 and 2014, a valuation allowance of \$47.2 million and \$45.5 million, respectively, was established against these U.S. state and non-U.S. deferred tax assets. The Company's total valuation allowance at December 31, 2015 and 2014 was \$145.9 million and \$141.0 million, respectively.

Unrecognized Tax Benefits

A reconciliation of the beginning and ending amount of the Company's gross unrecognized tax benefits, excluding interest and penalties, is as follows:

(in millions)	2015	2014	2013
Balance of liability as of January 1	\$ 40.7	\$ 31.4	\$ 19.2
Increase as a result of tax positions taken during a prior year	1.5	2.0	6.7
Decrease as a result of tax positions taken during a prior year	(2.1)	(1.2)	(0.3)
Increase as a result of tax positions taken during the current year	9.2	11.2	5.9
Decrease as a result of settlements with taxing authorities	—	(1.1)	—
Reduction as a result of a lapse of the statute of limitations	(4.1)	(1.6)	(0.1)
Balance of liability as of December 31	\$ 45.2	\$ 40.7	\$ 31.4

As of December 31, 2015, 2014 and 2013, the amount of the Company's unrecognized tax benefits that, if recognized, would affect its effective tax rate was \$46.6 million, \$42.2 million, and \$27.7 million, respectively. The difference between these amounts and those reflected in the table above relates to (1) offsetting tax effects from other tax jurisdictions, and (2) interest expense, net of deferred taxes.

The Company recognizes interest and penalties related to unrecognized tax benefits as a component of its income tax expense. During the years ended December 31, 2015, 2014 and 2013, the Company recognized interest and penalty expense of \$1.1 million, \$0.7 million, and \$0.9 million, respectively, in its Consolidated Statements of Operations. At December 31, 2015 and 2014, the Company had accrued \$5.8 million and \$4.7 million, respectively, of interest and penalties related to unrecognized tax benefits in its Consolidated Balance Sheets.

During the next twelve months, it is reasonably possible that the Company's unrecognized tax benefits could change by \$2.2 million due to settlements of income tax examinations, the expiration of statutes of limitations or other resolution of uncertainties. However, if the ultimate resolution of income tax examinations results in amounts that differ from this estimate, the Company will record additional income tax expense or benefit in the period in which such matters are effectively settled.

Income Tax Examinations

The Company's income tax returns are subject to examination by U.S. federal, U.S. state and local, and non-U.S. tax authorities.

The Company's federal income tax returns for the years 2010 through 2012 are currently under examination by the U.S Internal Revenue Service, and its federal income tax returns for 2013 and 2014 remain subject to examination. In addition, acquired

subsidiaries' federal income tax returns (2011 through 2013) and federal tax carry forwards (2006 through 2013) remain subject to examination.

With few exceptions, the Company is no longer subject to U.S. state and local or non-U.S. income tax examinations for years before 2009. As of December 31, 2015, the Company and its subsidiaries are under examination in various jurisdictions, including Germany (2008 through 2012) and California (2010 and 2011).

Note 3 – Accrued Liabilities

Accrued liabilities consist of:

(in millions) December 31,	2015	2014
Employee related expenses	\$ 83.1	\$ 81.4
Warranty	15.1	15.5
Advanced payment from customers	29.1	20.0
Other	91.3	108.9
Total	\$ 218.6	\$ 225.8

The Company accrues warranty liabilities when it is probable that an asset has been impaired or a liability has been incurred and the amount of the impairment or loss can be reasonably estimated. Warranty provision is included in cost of sales in the Consolidated Statements of Operations.

A summary of the warranty liabilities is as follows:

(in millions) December 31,	2015	2014
Balance at beginning of period	\$ 15.5	\$ 18.9
Expense	12.1	13.3
Changes due to acquisitions/divestitures	—	(0.1)
Payments / deductions	(12.7)	(16.4)
Currency translation	0.2	(0.2)
Balance at end of period	\$ 15.1	\$ 15.5

Note 4 – Other Liabilities

(in millions) December 31,	2015	2014
Environmental	\$ 48.9	\$ 64.4
Other	63.9	67.5
	\$ 112.8	\$ 131.9

Note 5 – Research and Development

Research and development costs are expensed when incurred. These costs were \$62.8 million, \$68.0 million and \$52.7 million in 2015, 2014 and 2013, respectively.

Note 6 – Pension and Postretirement Benefits

In the United States, the Company sponsors a defined benefit pension plan that covers approximately 19% of all U.S. employees. In the fourth quarter of 2012, the Company announced that pension eligible employees will no longer earn future benefits in the domestic defined benefit pension plan effective January 1, 2013. The benefits are based on years of service and compensation on a final average pay basis, except for certain hourly employees where benefits are fixed per year of service. This plan is funded with a trustee in respect of past and current service. Charges to expense are based upon costs computed by an independent actuary. Contributions are intended to provide for future benefits earned to date. A number of the Company's non-U.S. subsidiaries sponsor defined benefit pension plans that cover approximately 11% of all non-U.S. employees. The benefits are typically based upon years of service and compensation. These plans are funded with trustees in respect of past and current service.

Non-union employees hired after December 31, 2005 are no longer eligible for participation in the ELDEC Corporation ("ELDEC") and Interpoint Corporation ("Interpoint") money purchase plan. Qualifying employees receive an additional 3% Company contribution to their 401(K) plan accounts. Certain of the Company's non-U.S. defined benefit pension plans were also amended whereby eligibility for new participants will cease.

Postretirement health care and life insurance benefits are provided for certain employees hired before January 1, 1990, who meet minimum age and service requirements. The Company does not pre-fund these benefits and has the right to modify or terminate the plan. The Company recorded a pretax gain related to postretirement benefits of \$0.3 million and \$0.0 million in 2015 and 2014, respectively. Accrued postretirement benefits were \$8.7 million and \$8.6 million as of December 31, 2015 and 2014, respectively.

A summary of benefit obligations, fair value of plan assets and funded status is as follows:

(in millions) December 31,	Pension Benefits	
	2015	2014
Change in benefit obligation:		
Beginning of year	\$ 1,093.2	\$ 934.3
Service cost	5.2	4.9
Interest cost	37.9	40.9
Plan participants' contributions	0.5	0.7
Amendments	(18.2)	—
Actuarial (gain) loss	(60.3)	192.7
Settlement	(2.8)	—
Benefits paid	(41.4)	(41.7)
Foreign currency exchange impact	(25.5)	(38.0)
Acquisition/divestitures/curtailment	(0.3)	—
Adjustment for expenses/tax contained in service cost	(0.3)	(0.6)
Benefit obligation at end of year	\$ 988.0	\$ 1,093.2
Change in plan assets:		
Fair value of plan assets at beginning of year	\$ 874.6	\$ 870.7
Actual return on plan assets	(2.0)	54.7
Foreign currency exchange impact	(28.5)	(33.2)
Employer contributions	17.0	24.5
Administrative expenses paid	(0.9)	(1.1)
Plan participants' contributions	0.5	0.7
Settlement	(2.8)	—
Benefits paid	(41.4)	(41.7)
Fair value of plan assets at end of year	\$ 816.5	\$ 874.6
Funded status	\$ (171.5)	\$ (218.6)

Amounts recognized in the Consolidated Balance Sheets consist of:

(in millions) December 31,	Pension Benefits	
	2015	2014
Other assets	\$ 56.3	\$ 53.0
Current liabilities	(1.1)	(1.0)
Accrued pension	(226.7)	(270.6)
Funded status	\$ (171.5)	\$ (218.6)

Amounts recognized in accumulated other comprehensive loss consist of:

(in millions) December 31,	Pension Benefits	
	2015	2014
Net actuarial loss (gain)	\$ 347.4	\$ 363.5
Prior service cost (credit)	(11.6)	0.9
	\$ 335.8	\$ 364.4

The projected benefit obligation, accumulated benefit obligation and fair value of plan assets for the U.S. and Non-U.S. plans, are as follows:

(in millions) December 31,	Pension Obligations/Assets					
	U.S.		Non-U.S.		Total	
	2015	2014	2015	2014	2015	2014
Projected benefit obligation	\$ 548.5	\$ 581.8	\$ 439.5	\$ 511.4	\$ 988.0	\$ 1,093.2
Accumulated benefit obligation	548.4	581.8	432.5	496.7	980.9	1,078.5
Fair value of plan assets	380.2	414.2	436.3	460.4	816.5	874.6

Information for pension plans with an accumulated benefit obligation in excess of plan assets is as follows:

(in millions) December 31,	Pension Benefits	
	2015	2014
Projected benefit obligation	\$ 791.5	\$ 910.3
Accumulated benefit obligation	785.0	896.4
Fair value of plan assets	563.9	638.8

Components of net periodic benefit cost are as follows:

(in millions) December 31,	Pension Benefits		
	2015	2014	2013
Net Periodic Benefit Cost:			
Service cost	\$ 5.2	\$ 4.9	\$ 6.4
Interest cost	37.9	40.9	36.8
Expected return on plan assets	(62.0)	(62.5)	(52.2)
Amortization of prior service cost	(0.4)	0.1	—
Amortization of net loss	12.3	5.1	13.9
Recognized curtailment loss	(5.2)	—	(0.3)
Settlement costs	0.8	—	—
Special termination benefits	—	—	—
Net periodic (benefit) cost	\$ (11.4)	\$ (11.5)	\$ 4.6

The estimated net loss and prior service cost for the defined benefit pension plans that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next fiscal year are \$11.7 million and \$(0.6) million, respectively.

The weighted average assumptions used to determine benefit obligations are as follows:

December 31,	Pension Benefits		
	2015	2014	2013
U.S. Plans:			
Discount rate	4.41%	4.10%	4.90%
Rate of compensation increase	N/A	N/A	3.50%
Non-U.S. Plans:			
Discount rate	3.30%	3.01%	4.05%
Rate of compensation increase	2.81%	2.40%	2.56%

The weighted-average assumptions used to determine net periodic benefit cost are as follows:

December 31,	Pension Benefits		
	2015	2014	2013
U.S. Plans:			
Discount rate	4.10%	4.90%	4.20%
Expected rate of return on plan assets	7.75%	7.75%	7.75%
Rate of compensation increase	N/A	N/A	3.50%
Non-U.S. Plans:			
Discount rate	3.01%	4.05%	3.93%
Expected rate of return on plan assets	6.94%	7.01%	7.01%
Rate of compensation increase	2.40%	2.56%	3.14%

The long-term expected rate of return on plan assets assumptions were determined by the Company with input from independent investment consultants and plan actuaries, utilizing asset pricing models and considering historical returns. The discount rates used by the Company for valuing pension liabilities are based on a review of high quality corporate bond yields with maturities approximating the remaining life of the projected benefit obligations.

In the U.S. Plan, the 7.75% expected rate of return on assets assumption for 2015 reflected a long-term asset allocation target comprised of an asset allocation range of 25%-75% equity securities, 15%-35% fixed income securities, 10%-35% alternative assets, and 0%-10% cash. As of December 31, 2015, the actual asset allocation for the U.S. plan was 62% equity securities, 15% fixed income securities, 22% alternative assets, and 1% cash and cash equivalents.

For the non-U.S. Plans, the 6.94% expected rate of return on assets assumption for 2015 reflected a weighted average of the long-term asset allocation targets for our various international plans. As of December 31, 2015, the actual weighted average asset allocation for the non-U.S. plans was 38% equity securities, 36% fixed income securities, 25% alternative assets/other, and 1% cash and cash equivalents.

Plan Assets

The Company's pension plan target allocations and weighted-average asset allocations by asset category are as follows:

Asset Category December 31,	Actual Allocation	
	2015	2014
Equity securities	35%-75%	49% 51%
Fixed income securities	20%-50%	26% 27%
Alternative assets/Other	0%-20%	24% 20%
Money market	0%-10%	1% 2%

The Company's pension investment committees and trustees, as applicable, exercise reasonable care, skill and caution in making investment decisions. Independent investment consultants are retained to assist in executing the plans' investment strategies. A number of factors are evaluated in determining if an investment strategy will be implemented in the Company's pension trusts. These factors include, but are not limited to, investment style, investment risk, investment manager performance and costs.

The primary investment objective of the Company's various pension trusts is to maximize the value of plan assets, focusing on capital preservation, current income and long-term growth of capital and income. The plans' assets are typically invested in a broad range of equity securities, fixed income securities, alternative assets and cash instruments. The Company's investment strategies across its pension plans worldwide results in a global target asset allocation range of 35%-75% equity securities, 20%-50% fixed income securities, 0%-20% alternative assets, and 0%-10% money market, as noted in the table above.

Equity securities include investments in large-cap, mid-cap, and small-cap companies located in both developed countries and emerging markets around the world. Fixed income securities include government bonds of various countries, corporate bonds that are primarily investment-grade, and mortgage-backed securities. Alternative assets include investments in hedge funds with a wide variety of strategies.

The Company periodically reviews investment managers and their performance in relation to the plans' investment objectives. The Company expects its pension trust investments to meet or exceed their predetermined benchmark indices, net of fees. Generally, however, the Company realizes that investment strategies should be given a full market cycle, normally over a three to five year time period, to achieve stated objectives.

Equity securities include Crane Co. common stock, which represents 4% of plan assets at both December 31, 2015 and 2014.

The fair value of the Company's pension plan assets at December 31, 2015, by asset category are as follows:

(in millions)	Active Markets for Identical Assets Level 1	Other Observable Inputs Level 2	Unobservable Inputs Level 3	Total Fair Value
Cash and Money Markets	\$ 4.9	\$ —	\$ —	\$ 4.9

- (g) These funds invest in a pre defined mix of non-U.S. equity and non-U.S. fixed income securities and seek to meet or exceed the performance of a passive/local benchmark of similar mixes.
- (h) These funds invest in U.S. fixed income securities, corporate, government and agency, and seek to outperform the Barclays Capital Aggregate Index.

- (i) These funds invest in a blend of equities, fixed income, cash and property in the U.S. and seek to outperform a similarly weighted index.
- (j) These funds invest in various commodities and precious metals
- (k) These funds invest in traditional and alternative strategies and seek to add diversification while adding returns greater than equity in a non-correlated approach

Cash Flows

The Company expects, based on current actuarial calculations, to contribute cash of approximately \$8 million to its defined benefit pension plans during 2016. Cash contributions in subsequent years will depend on a number of factors including the investment performance of plan assets.

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

Estimated future payments (in millions)		Pension Benefits
2016	\$	42.1
2017		41.6
2018		43.9
2019		44.9
2020		47.5
2021-2025		264.6
Total payments	\$	484.6

The Company's subsidiaries ELDEC and Interpoint have a money purchase plan to provide retirement benefits for all eligible employees which was frozen effective January 1, 2014. The contributions to this plan were \$0.0 million in 2015, \$1.1 million in 2014 and \$2.2 million in 2013.

The Company and its subsidiaries sponsor savings and investment plans that are available to eligible employees of the Company and its subsidiaries. The Company made contributions to the plans of \$7.9 million in 2015, \$6.9 million in 2014 and \$6.7 million in 2013.

In addition to participant deferral contributions and Company matching contributions on those deferrals, the Company provides a 3% non-matching contribution to eligible participants. The Company made non-matching contributions to these plans of \$8.7 million in 2015, \$3.5 million in 2014 and \$3.3 million in 2013.

Note 7 – Long-Term Debt and Notes Payable

The following table summarizes the Company's debt as of December 31, 2015 and 2014:

(in millions)	December 31, 2015	December 31, 2014
Long-term debt consists of:		
2.75% notes due 2018	\$ 250.0	\$ 250.0
4.45% notes due 2023	300.0	300.0
6.55% notes due 2036	199.3	1,199.2
Total long-term debt	\$ 749.3	\$ 749.2
Short-term borrowings consists of:		
Revolving credit facility	\$ —	\$ 100.0
Commercial paper	49.0	—
Other	0.6	0.8
Total short-term borrowings	\$ 49.6	\$ 100.8

2.75% notes due 2018 - In December 2013, the Company issued five year notes having an aggregate principal amount of \$250 million. The notes are unsecured, senior obligations that mature on December 15, 2018 and bear interest at 2.75% per annum, payable semi-annually on June 15 and December 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of the Company, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in

part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 2.92%.

4.45% notes due 2023 - In December 2013, the Company issued 10 year notes having an aggregate principal amount of \$300 million. The notes are unsecured, senior obligations that mature on December 15, 2023 and bear interest at 4.45% per annum, payable semi-annually on June 15 and December 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or part, at our option. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of the Company, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require us to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 4.56%.

6.55% notes due 2036 - In November 2006, the Company issued 30 year notes having an aggregate principal amount of \$200 million. The notes are unsecured, senior obligations of the Company that mature on November 15, 2036 and bear interest at 6.55% per annum, payable semi-annually on May 15 and November 15 of each year. The notes have no sinking fund requirement, but may be redeemed, in whole or in part, at the option of the Company. These notes do not contain any material debt covenants or cross default provisions. If there is a change in control of the Company, and if as a consequence, the notes are rated below investment grade by both Moody's Investors Service and Standard & Poor's, then holders of the notes may require the Company to repurchase them, in whole or in part, for 101% of the principal amount plus accrued and unpaid interest. Debt issuance costs are deferred and included in Other assets and then amortized as a component of interest expense over the term of the notes. Including debt issuance cost amortization, these notes have an effective annualized interest rate of 6.67%.

Commercial Paper program - On March 2, 2015, the Company entered into a commercial paper program (the "CP Program") pursuant to which it may issue short-term, unsecured commercial paper notes (the "Notes") pursuant to the exemption from registration contained in Section 4(a)(2) of the Securities Act of 1933, as amended. Amounts available under the CP Program may be borrowed, repaid and re-borrowed from time to time, with the aggregate principal amount of the Notes outstanding under the CP Program at any time not to exceed \$500 million. The Notes will have maturities of up to 397 days from date of issue. The Notes will rank at least *pari passu* with all of our other unsecured and unsubordinated indebtedness. At December 31, 2015, Notes with a principal amount of \$49.0 million were outstanding. The net proceeds of the issuances of the Notes were used to repay amounts under our revolving credit facility and for general corporate purposes.

Other financing arrangements

On May 27, 2015, the Company entered into an amendment ("Amendment No. 2") to the Company's five-year, \$500 million Second Amended and Restated Credit Agreement. Amendment No. 2, among other things, (i) extends the maturity date under the Second Amended and Restated Credit Agreement to May 27, 2020 and (ii) amends the facility fee and applicable margins on the revolving loans made pursuant to the Second Amended and Restated Credit Agreement. Following the effectiveness of Amendment No. 2, at the Company's current credit rating, the facility fee is reduced by 5 basis points to 0.15% while the applicable margin on revolving loans is increased by 5 basis points to 0.10% for base rate loans and 1.10% for LIBOR loans.

In May 2012, the Company entered into a five year, \$300 million Amended and Restated Credit Agreement (as subsequently amended, and increased to \$500 million, the “facility”), which is due to expire in May 2017. The facility allows the Company to borrow, repay, or to the extent permitted by the agreement, prepay and re-borrow funds at any time prior to the stated maturity date, and the loan proceeds may be used for general corporate purposes including financing for acquisitions. Interest is based on, at our option, (1) a LIBOR-based formula that is dependent in part on the Company's credit rating (LIBOR plus 105 basis points as of the date of this Report; up to a maximum of LIBOR plus 147.5 basis points), or (2) the greatest of (i) the JPMorgan Chase Bank, N.A.'s prime rate, (ii) the Federal Funds rate plus 50 basis points, or (iii) an adjusted LIBOR rate plus 100 basis points, plus a spread dependent on the Company's credit rating (5 basis points as of the date of this Report; up to a maximum of 47.5 basis points). At December 31, 2015, there were no outstanding borrowings under the facility. The facility contains customary affirmative and negative covenants for credit facilities of this type, including the absence of a material adverse effect and limitations on the Company and its subsidiaries with respect to indebtedness, liens, mergers, consolidations, liquidations and dissolutions, sales of all or substantially all assets, transactions with affiliates and hedging arrangements. The facility also provides for customary events of default, including failure to pay principal, interest or fees when due, failure to comply with covenants, the fact that any representation or warranty made by us is false in any material respect, default under certain other indebtedness, certain insolvency or receivership events affecting us and our subsidiaries, certain ERISA events, material judgments and a change in control of the Company. The facility contains a leverage ratio covenant requiring a ratio of total debt to total capitalization of less than or equal to 65%. At December 31, 2015, our ratio was 41%, calculated as follows:

(in millions) December 31,	2015
Short-term borrowings	\$ 49.6
Long-term debt	749.3
Total indebtedness	\$ 798.9
Total indebtedness	\$ 798.9
Total shareholders' equity	1,139.4
Capitalization	\$ 1,938.3
Total indebtedness to capitalization	41%

All outstanding senior, unsecured notes were issued under an indenture dated as of April 1, 1991. The indenture contains certain limitations on liens and sale and lease-back transactions.

At December 31, 2015, the Company had open standby letters of credit of \$23 million issued pursuant to a \$125 million uncommitted Letter of Credit Reimbursement Agreement, and certain other credit lines.

Note 8 - Fair Value Measurements

Accounting standards define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are to be considered from the perspective of a market participant that holds the asset or owes the liability. The standards also establish a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The standards describe three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices in active markets for identical or similar assets and liabilities.

Level 2: Quoted prices for identical or similar assets and liabilities in markets that are not active or observable inputs other than quoted prices in active markets for identical or similar assets and liabilities. Level 2 assets and liabilities include over-the-counter derivatives, principally forward foreign exchange contracts, whose value is determined using pricing models with inputs that are generally based on published foreign exchange rates and exchange traded prices, adjusted for other specific inputs that are primarily observable in the market or can be derived principally from or corroborated by observable market data.

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The following table summarizes assets and liabilities measured at fair value on a recurring basis at the dates indicated:

	December 31, 2015				December 31, 2014			
	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	Total Fair Value	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs	Total Fair Value
(in millions)	Level 1	Level 2	Level 3		Level 1	Level 2	Level 3	
Assets:								
Derivatives - foreign exchange contracts	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —
Liabilities:								
Derivatives - foreign exchange contracts	\$ —	\$ 0.4	\$ —	\$ 0.4	\$ —	\$ 2.5	\$ —	\$ 2.5

Valuation Technique - The Company's derivative assets and liabilities include foreign exchange contract derivatives that are measured at fair value using internal models based on observable market inputs such as forward rates and interest rates. Based on these inputs, the derivatives are classified within Level 2 of the valuation hierarchy.

The carrying value of the Company's financial assets and liabilities, including cash and cash equivalents, accounts receivable, accounts payable and short-term loans payable approximate fair value, without being discounted, due to the short periods during which these amounts are outstanding. Long-term debt rates currently available to the Company for debt with similar terms and remaining maturities are used to estimate the fair value for debt issues that are not quoted on an exchange. The estimated fair value of long-term debt is measured using Level 2 inputs and was \$791.1 million and \$815.2 million at December 31, 2015 and 2014, respectively.

Note 9 - Derivative Instruments and Hedging Activities

The Company is exposed to certain risks related to its ongoing business operations, including market risks related to fluctuation in currency exchange. The Company uses foreign exchange contracts to manage the risk of certain cross-currency business relationships to minimize the impact of currency exchange fluctuations on the Company's earnings and cash flows. The Company does not hold or issue derivative financial instruments for trading or speculative purposes. As of December 31, 2015, the foreign exchange contracts designated as hedging instruments did not have a material impact on the Company's consolidated statement of operations, balance sheet or cash flows. Foreign exchange contracts not designated as hedging instruments, which primarily pertain to foreign exchange fluctuation risk of intercompany positions, had a notional value of \$38 million and \$216 million as of December 31, 2015 and December 31, 2014, respectively. The settlement of derivative contracts for the years ended December 31, 2015, 2014 and 2013 resulted in net cash inflows (outflows) of \$(13.6) million, \$(16.0) million and \$4.9 million, respectively, and is reported within "Total provided by operating activities" on the Consolidated Statements of Cash Flows. As of December 31, 2015 and 2014, the Company's payable position for the foreign exchange contracts was \$0.4 million and \$2.5 million, respectively.

Note 10 - Commitments and Contingencies**Leases**

The Company leases certain facilities, vehicles and equipment. Future minimum payments, by year and in the aggregate, under leases with initial or remaining terms of one year or more consisted of the following at December 31, 2015:

(in millions)	Operating Leases
2016	\$ 17.1
2017	14.6
2018	11.8
2019	5.9
2020	3.2
Thereafter	7.0
Total minimum lease payments	\$ 59.6

Rental expense was \$25.7 million, \$28.7 million and \$26.9 million for 2015, 2014 and 2013, respectively.

The Company entered into a five year operating lease for an airplane in the first quarter of 2014 which included a maximum residual value guarantee of \$7.8 million by the Company if the fair value of the airplane is less than \$9.5 million at the end of the lease term. In 2014, the Company made a \$9.5 million residual value guarantee payment in connection with a previous airplane lease which ended January 30, 2014. This payment was reported within "Other" in "Total provided by operating activities" on the Consolidated Statements of Cash Flows.

Asbestos LiabilityInformation Regarding Claims and Costs in the Tort System

As of December 31, 2015, the Company was a defendant in cases filed in numerous state and federal courts alleging injury or death as a result of exposure to asbestos. Activity related to asbestos claims during the periods indicated was as follows:

For the year ended December 31,	2015	2014	2013
Beginning claims	47,507	51,490	56,442
New claims	2,572	2,743	2,950
Settlements	(954)	(992)	(1,142)
Dismissals	(8,035)	(5,734)	(6,762)
MARDOC claims*	—	—	2
Ending claims	41,090	47,507	51,490

* As of January 1, 2010, the Company was named in 36,448 maritime actions which had been administratively dismissed by the United States District Court for the Eastern District of Pennsylvania ("MARDOC claims"), and therefore were not classified as active claims. In addition, the Company was named in 8 new maritime actions in 2010 (also not classified as active claims). By settlement agreement of December 30, 2013, the Company resolved all of the remaining MARDOC claims with plaintiffs' counsel. The agreement resulted in the dismissal of all MARDOC claims against the Company.

Of the 41,090 pending claims as of December 31, 2015, approximately 18,500 claims were pending in New York, approximately 5,000 claims were pending in Texas, approximately 5,100 claims were pending in Mississippi, and approximately 200 claims were pending in Ohio, all jurisdictions in which legislation or judicial orders restrict the types of claims that can proceed to trial on the merits.

The Company has tried several cases resulting in defense verdicts by the jury or directed verdicts for the defense by the court. The Company further has pursued appeals of certain adverse jury verdicts that have resulted in reversals in favor of the defense.

On March 23, 2010, a Philadelphia, Pennsylvania, state court jury found the Company responsible for a 1/11th share of a \$14.5 million verdict in the *James Nelson* claim, and for a 1/20th share of a \$3.5 million verdict in the *Larry Bell* claim. On February 23, 2011, the court entered judgment on the verdicts in the amount of \$0.2 million against the Company, only, in *Bell*, and in the amount of \$4.0 million, jointly, against the Company and two other defendants in *Nelson*, with additional interest in the amount of \$0.01 million being assessed against the Company, only, in *Nelson*. All defendants, including the Company, and the plaintiffs took timely appeals of certain aspects of those judgments. The Company resolved the *Bell* appeal by settlement, which is reflected in the settled claims for 2012. On September 5, 2013, a panel of the Pennsylvania Superior Court, in a 2-1 decision,

vacated the *Nelson* verdict against all defendants, reversing and remanding for a new trial. Plaintiffs requested a rehearing in the Superior Court and by order dated November 18, 2013, the Superior Court vacated the panel opinion, and granted en banc reargument. On December 23, 2014, the Superior Court issued a second opinion reversing the jury verdict. Plaintiffs sought leave to appeal to the Pennsylvania Supreme Court, which defendants have opposed. By order dated May 20, 2015, the Supreme Court of Pennsylvania is holding, but not acting on, the plaintiffs' petition pending the outcome of another appeal in which the Company is not a party.

On August 17, 2011, a New York City state court jury found the Company responsible for a 99% share of a \$32 million verdict on the *Ronald Dummitt* claim. The Company filed post-trial motions seeking to overturn the verdict, to grant a new trial, or to reduce the damages, which the Company argued were excessive under New York appellate case law governing awards for non-economic losses. The Court held oral argument on these motions on October 18, 2011 and issued a written decision on August 21, 2012 confirming the jury's liability findings but reducing the award of damages to \$8 million. At plaintiffs' request, the Court entered a judgment in the amount of \$4.9 million against the Company, taking into account settlement offsets and accrued interest under New York law. The Company appealed, and the judgment was affirmed in a 3-2 decision and order dated July 3, 2014. The Company has appealed to the New York Court of Appeals. The parties' briefing has concluded and oral argument may be heard in 2016.

On August 29, 2012, the Company received an adverse verdict in the *William Paulus* claim in Los Angeles, California. The jury found that the Company was responsible for ten percent (10%) of plaintiffs' non-economic damages of \$6.5 million, plus a portion of plaintiffs' economic damages of \$0.4 million. Based on California court rules regarding allocation of damages, judgment was entered in the amount of \$0.8 million against the Company. The Company filed post-trial motions requesting judgment in the Company's favor notwithstanding the jury's verdict, which were denied. The Company appealed, and the judgment was affirmed by order dated February 21, 2014. The Company sought review of certain aspects of the ruling before the California Supreme Court, and review was denied. Having exhausted all post-trial and appellate remedies, the Company in June 2014 paid to plaintiffs the amount of \$0.9 million, the judgment including interest, and this amount is included in the second quarter 2014 indemnity totals.

On October 23, 2012, the Company received an adverse verdict in the *Gerald Suttner* claim in Buffalo, New York. The jury found that the Company was responsible for four percent (4%) of plaintiffs' damages of \$3 million. The Company filed post-trial motions requesting judgment in the Company's favor notwithstanding the jury's verdict, which were denied. The court entered a judgment of \$0.1 million against the Company. The Company appealed, and the judgment was affirmed by order dated March 21, 2014. The Company sought reargument of this decision, which was denied. The Company sought review before the New York Court of Appeals, which was accepted in the fourth quarter of 2014. The parties' briefing has concluded and oral argument may be heard in 2016.

On November 28, 2012, the Company received an adverse verdict in the *James Hellam* claim in Oakland, CA. The jury found that the Company was responsible for seven percent (7%) of plaintiffs' non-economic damages of \$4.5 million, plus a portion of their economic damages of \$0.9 million. Based on California court rules regarding allocation of damages, judgment was entered against the Company in the amount of \$1.282 million. The Company filed post-trial motions requesting judgment in the Company's favor notwithstanding the jury's verdict and also requesting that settlement offsets be applied to reduce the judgment in accordance with California law. On January 31, 2013, the court entered an order disposing partially of that motion. On March 1, 2013, the Company filed an appeal regarding the portions of the motion that were denied. The court entered judgment against the Company in the amount of \$1.1 million. The Company appealed. By opinion dated April 16, 2014, the Court of Appeal affirmed the finding of liability against the Company, and the California Supreme Court denied review of this ruling. The Court of Appeal reserved the arguments relating to recoverable damages to a subsequent appeal that remains pending. On August 21, 2015, the Court of Appeal reversed the trial court with respect to a \$20,000 damages item, but affirmed the trial court in all other respects. The Company sought review of that ruling before the Supreme Court of California, which was denied. The Company settled the matter in December 2015. The settlement is reflected in the fourth quarter 2015 indemnity amount.

On February 25, 2013, a Philadelphia, Pennsylvania, state court jury found the Company responsible for a 1/10th share of a \$2.5 million verdict in the *Thomas Amato* claim and a 1/5th share of a \$2.3 million verdict in the *Frank Vinciguerra* claim, which were consolidated for trial. The Company filed post-trial motions requesting judgments in the Company's favor notwithstanding the jury's verdicts or new trials, and also requesting that settlement offsets be applied to reduce the judgment in accordance with Pennsylvania law. These motions were denied. The Company has appealed, and on April 17, 2015, a panel of the Superior Court of Pennsylvania affirmed the trial court's ruling. The Supreme Court of Pennsylvania has accepted the Company's petition for review.

On March 1, 2013, a New York City state court jury entered a \$35 million verdict against the Company in the *Ivo Peraica* claim. The Company filed post-trial motions seeking to overturn the verdict, to grant a new trial, or to reduce the damages,

which the Company argues were excessive under New York appellate case law governing awards for non-economic losses and further were subject to settlement offsets. After the trial court remitted the verdict to \$18 million, but otherwise denied the Company's post-trial motion, judgment was entered against the Company in the amount of \$10.6 million (including interest). The Company has appealed. The Company has taken a separate appeal of the trial court's denial of its summary judgment motion. The Court has consolidated the appeals, which were heard in the fourth quarter of 2014.

On July 31, 2013, a Buffalo, New York state court jury entered a \$3.1 million verdict against the Company in the *Lee Holdsworth* claim. The Company filed post-trial motions seeking to overturn the verdict, to grant a new trial, or to reduce the damages, which the Company argues were excessive under New York appellate case law governing awards for non-economic losses and further were subject to settlement offsets. Post-trial motions were denied, and the court entered judgment in the amount of \$1.7 million. On June 12, 2015, the Appellate Division, Fourth Department, affirmed the trial court's ruling denying the Company's motion for summary judgment. The court denied reargument of that ruling. The Company is pursuing a further appeal of the trial court rulings and judgment.

On September 11, 2013, a Columbia, South Carolina state court jury in the *Lloyd Garvin* claim entered an \$11 million verdict for compensatory damages against the Company and two other defendants jointly, and also awarded exemplary damages against the Company in the amount of \$11 million. The jury also awarded exemplary damages against both other defendants. The Company filed post-trial motions seeking to overturn the verdict, which were denied, except that the Court remitted the compensatory damages award to \$2.5 million and exemplary damages award to \$3.5 million. Considering settlement offsets, the Court further reduced the total damages award to \$3.5 million. The Company has settled the matter. The settlement is reflected in the first quarter 2015 indemnity amount.

On September 17, 2013, a Fort Lauderdale, Florida state court jury in the *Richard DeLisle* claim found the Company responsible for 16 percent of an \$8 million verdict. The trial court denied all parties' post-trial motions, and entered judgment against the Company in the amount of \$1.3 million. The Company has appealed. Oral argument on the appeal took place on February 16, 2016.

On June 16, 2014, a New York City state court jury entered a \$15 million verdict against the Company in the *Ivan Sweberg* claim and a \$10 million verdict against the Company in the *Selwyn Hackshaw* claim. The two claims were consolidated for trial. The Company filed post-trial motions seeking to overturn the verdicts, to grant new trials, or to reduce the damages, which were denied, except that the Court reduced the *Sweberg* award to \$10 million, and reduced the *Hackshaw* award to \$6 million. Judgments have been entered in the amount of \$5.3 million in *Sweberg* and \$3.1 million in *Hackshaw*. The Company has appealed. Oral argument on *Sweberg* took place on February 16, 2016, and oral argument on *Hackshaw* is set for March 9, 2016.

On July 2, 2015, a St. Louis, Missouri state court jury in the *James Poage* claim entered a \$1.5 million verdict for compensatory damages against the Company. The jury also awarded exemplary damages against the Company in the amount of \$10 million. The Company filed a motion seeking to reduce the verdict to account for the verdict set-offs. That motion was denied, and judgment was entered against the Company in the amount of \$10.8 million. The Company is pursuing an appeal.

On February 9, 2016, a Philadelphia, Pennsylvania, federal court jury found the Company responsible for a 30 percent share of a \$1.085 million verdict in the *Valent Rabovsky* claim. The court has ordered briefing on the amount of the judgment. The Company will argue, among other things, that settlement offsets reduce the award to plaintiff under Pennsylvania law. A further hearing is scheduled for April 26, 2016, and it is anticipated that the court will enter judgment on the verdict after that argument. The Company will pursue post-trial relief and an appeal if necessary.

Such judgment amounts are not included in the Company's incurred costs until all available appeals are exhausted and the final payment amount is determined.

The gross settlement and defense costs incurred (before insurance recoveries and tax effects) for the Company for the years ended December 31, 2015, 2014 and 2013 totaled \$69.4 million, \$81.1 million and \$90.8 million, respectively. In contrast to the recognition of settlement and defense costs, which reflect the current level of activity in the tort system, cash payments and receipts generally lag the tort system activity by several months or more, and may show some fluctuation from quarter to quarter. Cash payments of settlement amounts are not made until all releases and other required documentation are received by the Company, and reimbursements of both settlement amounts and defense costs by insurers may be uneven due to insurer payment practices, transitions from one insurance layer to the next excess layer and the payment terms of certain reimbursement agreements. The Company's total pre-tax payments for settlement and defense costs, net of funds received from insurers, for the years ended December 31, 2015, 2014 and 2013 totaled \$49.9 million, \$61.3 million and \$62.8 million, respectively. Detailed below are the comparable amounts for the periods indicated.

(in millions) For the year ended December 31,	2015	2014	2013
Settlement / indemnity costs incurred (1)	\$ 27.7	\$ 25.3	\$ 31.6
Defense costs incurred (1)	41.7	55.9	59.1
Total costs incurred	\$ 69.4	\$ 81.1	\$ 90.8
Settlement / indemnity payments	\$ 24.5	\$ 27.3	\$ 37.8
Defense payments	43.5	57.7	59.5
Insurance receipts	(18.1)	(23.8)	(34.5)
Pre-tax cash payments	\$ 49.9	\$ 61.3	\$ 62.8

(1) Before insurance recoveries and tax effects.

The amounts shown for settlement and defense costs incurred, and cash payments, are not necessarily indicative of future period amounts, which may be higher or lower than those reported.

Cumulatively through December 31, 2015, the Company has resolved (by settlement or dismissal) approximately 116,000 claims, not including the MARDOC claims referred to above. The related settlement cost incurred by the Company and its insurance carriers is approximately \$452 million, for an average settlement cost per resolved claim of approximately \$3,900. The average settlement cost per claim resolved during the years ended December 31, 2015, 2014 and 2013 was \$3,100, \$3,800 and \$3,300, respectively. Because claims are sometimes dismissed in large groups, the average cost per resolved claim, as well as the number of open claims, can fluctuate significantly from period to period. In addition to large group dismissals, the nature of the disease and corresponding settlement amounts for each claim resolved will also drive changes from period to period in the average settlement cost per claim. Accordingly, the average cost per resolved claim is not considered in the Company's periodic review of its estimated asbestos liability. For a discussion regarding the four most significant factors affecting the liability estimate, see "Effects on the Consolidated Financial Statements".

Effects on the Consolidated Financial Statements

The Company has retained the firm of Hamilton, Rabinovitz & Associates, Inc. ("HR&A"), a nationally recognized expert in the field, to assist management in estimating the Company's asbestos liability in the tort system. HR&A reviews information provided by the Company concerning claims filed, settled and dismissed, amounts paid in settlements and relevant claim information such as the nature of the asbestos-related disease asserted by the claimant, the jurisdiction where filed and the time lag from filing to disposition of the claim. The methodology used by HR&A to project future asbestos costs is based largely on the Company's experience during a base reference period of eleven quarterly periods (consisting of the two full preceding calendar years and three additional quarterly periods to the estimate date) for claims filed, settled and dismissed. The Company's experience is then compared to estimates of the number of individuals likely to develop asbestos-related diseases determined based on widely used previously conducted epidemiological studies augmented with current data inputs. Those studies were undertaken in connection with national analyses of the population of workers believed to have been exposed to asbestos. Using that information, HR&A estimates the number of future claims that would be filed against the Company and estimates the aggregate settlement or indemnity costs that would be incurred to resolve both pending and future claims based upon the average settlement costs by disease during the reference period. This methodology has been accepted by numerous courts. After discussions with the Company, HR&A augments its liability estimate for the costs of defending asbestos claims in the tort system using a forecast from the Company which is based upon discussions with its defense counsel. Based on this information, HR&A compiles an estimate of the Company's asbestos liability for pending and future claims, based on claim experience during the reference period and covering claims expected to be filed through the indicated forecast period. The most significant factors affecting the liability estimate are (1) the number of new mesothelioma claims filed against the Company, (2) the average settlement costs for mesothelioma claims, (3) the percentage of mesothelioma claims dismissed against the Company and (4) the aggregate defense costs incurred by the Company. These factors are interdependent, and no one factor predominates in determining the liability estimate. Although the methodology used by HR&A can be applied to show claims and costs for periods subsequent to the indicated period (up to and including the endpoint of the asbestos studies referred to above), management believes that the level of uncertainty regarding the various factors used in estimating future asbestos costs is too great to provide for reasonable estimation of the number of future claims, the nature of such claims or the cost to resolve them for years beyond the indicated estimate.

In the Company's view, the forecast period used to provide the best estimate for asbestos claims and related liabilities and costs is a judgment based upon a number of trend factors, including the number and type of claims being filed each year; the

jurisdictions where such claims are filed, and the effect of any legislation or judicial orders in such jurisdictions restricting the types of claims that can proceed to trial on the merits; and the likelihood of any comprehensive asbestos legislation at the federal level. In addition, the dynamics of asbestos litigation in the tort system have been significantly affected over the past five to ten years by the substantial number of companies that have filed for bankruptcy protection, thereby staying any asbestos claims against them until the conclusion of such proceedings, and the establishment of a number of post-bankruptcy trusts for asbestos claimants, which are estimated to provide \$36 billion for payments to current and future claimants. These trend factors have both positive and negative effects on the dynamics of asbestos litigation in the tort system and the related best estimate of the Company's asbestos liability, and these effects do not move in a linear fashion but rather change over multi-year periods. Accordingly, the Company's management continues to monitor these trend factors over time and periodically assesses whether an alternative forecast period is appropriate.

Each quarter, HR&A compiles an update based upon the Company's experience in claims filed, settled and dismissed during the updated reference period (consisting of the preceding eleven quarterly periods) as well as average settlement costs by disease category (mesothelioma, lung cancer, other cancer, and non-malignant conditions including asbestosis) during that period. In addition to this claims experience, the Company also considers additional quantitative and qualitative factors such as the nature of the aging of pending claims, significant appellate rulings and legislative developments, and their respective effects on expected future settlement values. As part of this process, the Company also takes into account trends in the tort system such as those enumerated above. Management considers all these factors in conjunction with the liability estimate of HR&A and determines whether a change in the estimate is warranted.

Liability Estimate. With the assistance of HR&A, effective as of December 31, 2011, the Company updated and extended its estimate of the asbestos liability, including the costs of settlement or indemnity payments and defense costs relating to currently pending claims and future claims projected to be filed against the Company through 2021. The Company's previous estimate was for asbestos claims filed or projected to be filed through 2017. As a result of this updated estimate, the Company recorded an additional liability of \$285 million as of December 31, 2011. The Company's decision to take this action at such date was based on several factors which contribute to the Company's ability to reasonably estimate this liability for the additional period noted. First, the number of mesothelioma claims (which although constituting approximately 8% of the Company's total pending asbestos claims, have accounted for approximately 90% of the Company's aggregate settlement and defense costs) being filed against the Company and associated settlement costs have recently stabilized. In the Company's opinion, the outlook for mesothelioma claims expected to be filed and resolved in the forecast period is reasonably stable. Second, there have been favorable developments in the trend of case law which has been a contributing factor in stabilizing the asbestos claims activity and related settlement costs. Third, there have been significant actions taken by certain state legislatures and courts over the past several years that have reduced the number and types of claims that can proceed to trial, which has been a significant factor in stabilizing the asbestos claims activity. Fourth, the Company has now entered into coverage-in-place agreements with almost all of its excess insurers, which enables the Company to project a more stable relationship between settlement and defense costs paid by the Company and reimbursements from its insurers. Taking all of these factors into account, the Company believes that it can reasonably estimate the asbestos liability for pending claims and future claims to be filed through 2021. While it is probable that the Company will incur additional charges for asbestos liabilities and defense costs in excess of the amounts currently provided, the Company does not believe that any such amount can be reasonably estimated beyond 2021. Accordingly, no accrual has been recorded for any costs which may be incurred for claims which may be made subsequent to 2021.

Management has made its best estimate of the costs through 2021 based on the analysis by HR&A completed in January 2012. Through December 31, 2015, the Company's actual experience during the updated reference period for mesothelioma claims filed and dismissed generally approximated the assumptions in the Company's liability estimate. In addition to this claims experience, the Company considered additional quantitative and qualitative factors such as the nature of the aging of pending claims, significant appellate rulings and legislative developments, and their respective effects on expected future settlement values. Based on this evaluation, the Company determined that no change in the estimate was warranted for the period ended December 31, 2015. Nevertheless, if certain factors show a pattern of sustained increase or decrease, the liability could change materially; however, all the assumptions used in estimating the asbestos liability are interdependent and no single factor predominates in determining the liability estimate. As noted above, the Company continues to monitor trend factors, such as the number and type of claims being filed each year, case management orders and legislation restricting the types of claims that can proceed to trial, significant appellate rulings and developments affecting the post-bankruptcy trusts for asbestos claimants to assess whether the existing forecast period is appropriate. Because of the uncertainty with regard to and the interdependency of such factors used in the calculation of its asbestos liability, and since no one factor predominates, the Company believes that a range of potential liability estimates beyond the indicated forecast period cannot be reasonably estimated.

A liability of \$894 million was recorded as of December 31, 2011 to cover the estimated cost of asbestos claims now pending or subsequently asserted through 2021, of which approximately 80% is attributable to settlement and defense costs for future

claims projected to be filed through 2021. The liability is reduced when cash payments are made in respect of settled claims and defense costs. The liability was \$546 million as of December 31, 2015. It is not possible to forecast when cash payments related to the asbestos liability will be fully expended; however, it is expected such cash payments will continue for a number of years past 2021, due to the significant proportion of future claims included in the estimated asbestos liability and the lag time between the date a claim is filed and when it is resolved. None of these estimated costs have been discounted to present value due to the inability to reliably forecast the timing of payments. The current portion of the total estimated liability at December 31, 2015 was \$75 million and represents the Company's best estimate of total asbestos costs expected to be paid during the twelve-month period. Such amount is based upon the HR&A model together with the Company's prior year payment experience for both settlement and defense costs.

Insurance Coverage and Receivables. Prior to 2005, a significant portion of the Company's settlement and defense costs were paid by its primary insurers. With the exhaustion of that primary coverage, the Company began negotiations with its excess insurers to reimburse the Company for a portion of its settlement and/or defense costs as incurred. To date, the Company has entered into agreements providing for such reimbursements, known as "coverage-in-place", with eleven of its excess insurer groups. Under such coverage-in-place agreements, an insurer's policies remain in force and the insurer undertakes to provide coverage for the Company's present and future asbestos claims on specified terms and conditions that address, among other things, the share of asbestos claims costs to be paid by the insurer, payment terms, claims handling procedures and the expiration of the insurer's obligations. Similarly, under a variant of coverage-in-place, the Company has entered into an agreement with a group of insurers confirming the aggregate amount of available coverage under the subject policies and setting forth a schedule for future reimbursement payments to the Company based on aggregate indemnity and defense payments made. In addition, with ten of its excess insurer groups, the Company entered into policy buyout agreements, settling all asbestos and other coverage obligations for an agreed sum, totaling \$82.5 million in aggregate. Reimbursements from insurers for past and ongoing settlement and defense costs allocable to their policies have been made in accordance with these coverage-in-place and other agreements. All of these agreements include provisions for mutual releases, indemnification of the insurer and, for coverage-in-place, claims handling procedures. With the agreements referenced above, the Company has concluded settlements with all but one of its solvent excess insurers whose policies are expected to respond to the aggregate costs included in the updated liability estimate. That insurer, which issued a single applicable policy, has been paying the shares of defense and indemnity costs the Company has allocated to it, subject to a reservation of rights. There are no pending legal proceedings between the Company and any insurer contesting the Company's asbestos claims under its insurance policies.

In conjunction with developing the aggregate liability estimate referenced above, the Company also developed an estimate of probable insurance recoveries for its asbestos liabilities. In developing this estimate, the Company considered its coverage-in-place and other settlement agreements described above, as well as a number of additional factors. These additional factors include the financial viability of the insurance companies, the method by which losses will be allocated to the various insurance policies and the years covered by those policies, how settlement and defense costs will be covered by the insurance policies and interpretation of the effect on coverage of various policy terms and limits and their interrelationships. In addition, the timing and amount of reimbursements will vary because the Company's insurance coverage for asbestos claims involves multiple insurers, with different policy terms and certain gaps in coverage. In addition to consulting with legal counsel on these insurance matters, the Company retained insurance consultants to assist management in the estimation of probable insurance recoveries based upon the aggregate liability estimate described above and assuming the continued viability of all solvent insurance carriers. Based upon the analysis of policy terms and other factors noted above by the Company's legal counsel, and incorporating risk mitigation judgments by the Company where policy terms or other factors were not certain, the Company's insurance consultants compiled a model indicating how the Company's historical insurance policies would respond to varying levels of asbestos settlement and defense costs and the allocation of such costs between such insurers and the Company. Using the estimated liability as of December 31, 2011 (for claims filed or expected to be filed through 2021), the insurance consultant's model forecasted that approximately 25% of the liability would be reimbursed by the Company's insurers. While there are overall limits on the aggregate amount of insurance available to the Company with respect to asbestos claims, those overall limits were not reached by the total estimated liability currently recorded by the Company, and such overall limits did not influence the Company in its determination of the asset amount to record. The proportion of the asbestos liability that is allocated to certain insurance coverage years, however, exceeds the limits of available insurance in those years. The Company allocates to itself the amount of the asbestos liability (for claims filed or expected to be filed through 2021) that is in excess of available insurance coverage allocated to such years. An asset of \$225 million was recorded as of December 31, 2011 representing the probable insurance reimbursement for such claims expected through 2021. The asset is reduced as reimbursements and other payments from insurers are received. The asset was \$129 million as of December 31, 2015.

The Company reviews the aforementioned estimated reimbursement rate with its insurance consultants on a periodic basis in order to confirm its overall consistency with the Company's established reserves. The reviews encompass consideration of the performance of the insurers under coverage-in-place agreements and the effect of any additional lump-sum payments under

policy buyout agreements. Since December 2011, there have been no developments that have caused the Company to change the estimated 25% rate, although actual insurance reimbursements vary from period to period, and will decline over time, for the reasons cited above.

Uncertainties. Estimation of the Company's ultimate exposure for asbestos-related claims is subject to significant uncertainties, as there are multiple variables that can affect the timing, severity and quantity of claims and the manner of their resolution. The Company cautions that its estimated liability is based on assumptions with respect to future claims, settlement and defense costs based on past experience that may not prove reliable as predictors. A significant upward or downward trend in the number of claims filed, depending on the nature of the alleged injury, the jurisdiction where filed and the quality of the product identification, or a significant upward or downward trend in the costs of defending claims, could change the estimated liability, as would substantial adverse verdicts at trial that withstand appeal. A legislative solution, structured settlement transaction, or significant change in relevant case law could also change the estimated liability.

The same factors that affect developing estimates of probable settlement and defense costs for asbestos-related liabilities also affect estimates of the probable insurance reimbursements, as do a number of additional factors. These additional factors include the financial viability of the insurance companies, the method by which losses will be allocated to the various insurance policies and the years covered by those policies, how settlement and defense costs will be covered by the insurance policies and interpretation of the effect on coverage of various policy terms and limits and their interrelationships. In addition, due to the uncertainties inherent in litigation matters, no assurances can be given regarding the outcome of any litigation, if necessary, to enforce the Company's rights under its insurance policies or settlement agreements.

Many uncertainties exist surrounding asbestos litigation, and the Company will continue to evaluate its estimated asbestos-related liability and corresponding estimated insurance reimbursement as well as the underlying assumptions and process used to derive these amounts. These uncertainties may result in the Company incurring future charges or increases to income to adjust the carrying value of recorded liabilities and assets, particularly if the number of claims and settlement and defense costs change significantly, or if there are significant developments in the trend of case law or court procedures, or if legislation or another alternative solution is implemented; however, the Company is currently unable to estimate such future changes and, accordingly, while it is probable that the Company will incur additional charges for asbestos liabilities and defense costs in excess of the amounts currently provided, the Company does not believe that any such amount can be reasonably determined beyond 2021. Although the resolution of these claims may take many years, the effect on the results of operations, financial position and cash flow in any given period from a revision to these estimates could be material.

Other Contingencies

Environmental Matters

For environmental matters, the Company records a liability for estimated remediation costs when it is probable that the Company will be responsible for such costs and they can be reasonably estimated. Generally, third party specialists assist in the estimation of remediation costs. The environmental remediation liability as of December 31, 2015 is substantially related to the former manufacturing sites in Goodyear, Arizona (the "Goodyear Site") and Roseland, New Jersey (the "Roseland Site"), each discussed below.

Goodyear Site

The Goodyear Site was operated by UniDynamics/Phoenix, Inc. ("UPI"), which became an indirect subsidiary of the Company in 1985 when the Company acquired UPI's parent company, UniDynamics Corporation. UPI manufactured explosive and pyrotechnic compounds, including components for critical military programs, for the U.S. government at the Goodyear Site from 1962 to 1993, under contracts with the Department of Defense and other government agencies and certain of their prime contractors. In 1990, the U.S. Environmental Protection Agency ("EPA") issued administrative orders requiring UPI to design and carry out certain remedial actions, which UPI has done. Groundwater extraction and treatment systems have been in operation at the Goodyear Site since 1994. On July 26, 2006, the Company entered into a consent decree with the EPA with respect to the Goodyear Site providing for, among other things, a work plan for further investigation and remediation activities (inclusive of a supplemental remediation investigation and feasibility study). During the third quarter of 2014, the EPA issued a Record of Decision amendment requiring, among other things, additional source area remediation resulting in the Company recording a charge of \$49.0 million, extending the accrued costs through 2022. The total estimated gross liability was \$63.7 million as of December 31, 2015, and as described below, a portion is reimbursable by the U.S. Government. The current portion of the total estimated liability was approximately \$16.0 million and represents the Company's best estimate, in consultation with its technical advisors, of total remediation costs expected to be paid during the twelve-month period.

It is not possible at this point to reasonably estimate the amount of any obligation in excess of the Company's current accruals through the 2022 forecast period because of the aforementioned uncertainties, in particular, the continued significant changes in the Goodyear Site conditions and additional expectations of remediation activities experienced in recent years.

On July 31, 2006, the Company entered into a consent decree with the U.S. Department of Justice on behalf of the Department of Defense and the Department of Energy pursuant to which, among other things, the U.S. Government reimburses the Company for 21% of qualifying costs of investigation and remediation activities at the Goodyear Site. As of December 31, 2015, the Company has recorded a receivable of \$14.0 million for the expected reimbursements from the U.S. Government in respect of the aggregate liability as at that date. The receivable is reduced as reimbursements and other payments from the U.S. Government are received.

Roseland Site

The Roseland Site was operated by Resistoflex Corporation ("Resistoflex"), which became an indirect subsidiary of the Company in 1985 when the Company acquired Resistoflex's parent company, UniDynamics Corporation. Resistoflex manufactured specialty lined pipe and fittings at the site from the 1950s until it was closed in the mid-1980s. In 2009, at the request of the New Jersey Department of Environmental Protection ("NJDEP"), the Company performed certain tests of the indoor air quality of approximately 40 homes in a residential area surrounding the Roseland Site to determine if any contaminants (volatile organic compound vapors from groundwater) from the Roseland Site were present in those homes. The test results showed that three homes had volatile organic compound vapors above NJDEP's recommended concentration levels, and the Company installed vapor mitigation equipment in those homes. On April 15, 2011, those three homeowners, and the tenants in one of those homes, filed separate suits against the Company seeking unspecified compensatory and punitive damages for their lost property value and nuisance. In addition, a homeowner in the testing area, whose home tested negative for the presence of contaminants, filed a class action suit against the Company on behalf of himself and 138 other homeowners in the surrounding area, claiming damages in the nature of loss of value on their homes due to their proximity to the Roseland Site. The plaintiffs in these cases amended their complaints to assert claims under New Jersey's Environmental Rights Act for the Company's alleged failure to properly report its waste discharge practices in the late 1960s and early 1970s, and for natural resource damages. In late December 2013, the plaintiffs moved to have a class of 139 homeowners certified, and the motion was granted in early February 2014. At the same time the Court also entered partial summary judgment on liability for the three homes where the Company had installed vapor mitigation equipment. The Company reached an agreement to settle all current claims with the class and individual plaintiffs for a one-time payment of \$6.5 million. This agreement was approved by the Court on July 23, 2014 and the Company completed all obligations required of it to complete the settlement on October 10, 2014. The stipulation of dismissal with prejudice of all claims against the Company was filed on April 6, 2015.

The Company undertook an extensive soil remediation effort at the Roseland Site following its closure, and had been monitoring the Site's condition in the years that followed. In response to changes in remediation standards, the Company has conducted further site characterization and delineation studies. In the three months ended September 30, 2014, the Company, in consultation with its advisors, substantially completed its assessment of soil and groundwater contaminants at the Roseland Site, and developed an enhanced remediation plan for the site, which includes further soil removal, groundwater treatment, and soil vapor extraction, resulting in a charge of \$6.8 million for remediation activities which are expected to be completed by 2017. Estimates of the Company's environmental liabilities at the Roseland Site are based on currently available facts, present laws and regulations and current technology available for remediation, and are recorded on an undiscounted basis. While actual remediation cost may be more or less than amounts accrued, the Company believes it has established adequate reserves for all probable and reasonably estimable costs.

Other Environmental Matters

The Company has been identified as a potentially responsible party ("PRP") with respect to environmental contamination at the Crab Orchard National Wildlife Refuge Superfund Site (the "Crab Orchard Site"). The Crab Orchard Site is located near Marion, Illinois, and consists of approximately 55,000 acres. Beginning in 1941, the United States used the Crab Orchard Site for the production of ordnance and other related products for use in World War II. In 1947 about half of the Crab Orchard Site was leased to a variety of industrial tenants whose activities (which continue to this day) included manufacturing ordnance and explosives. A predecessor to the Company formerly leased portions of the Crab Orchard Site, and conducted manufacturing operations at the Crab Orchard Site from 1952 until 1964. General Dynamics Ordnance and Tactical Systems, Inc. ("GD-OTS") is in the process of conducting a remedial investigation and feasibility study for a portion of the Crab Orchard Site, which includes an area where the Company maintained operations, (referred to as the "AUS-OU"), pursuant to an Administrative Order on Consent. Work on interim deliverables for the feasibility study is reportedly underway, including discussions intended to define preliminary remedial goals and potential remedial alternatives. It is unclear when a feasibility study report or final Record of Decision may be issued.

GD-OTS has asked the Company to participate in a voluntary cost allocation/mediation exercise with respect to response costs it has incurred or will incur with respect to the AUS-OU. The Company, along with a number of other PRPs that were contacted, initially declined, but in light of the ongoing investigative activities, and the apparent willingness of the U.S. government to participate in a mediation proceeding, the Company and a number of PRPs have agreed to participate in a non-binding mediation process. The Company and other PRPs executed a mediation agreement on March 16, 2015, and the U.S. government, following the resolution of an inter-agency dispute, executed the mediation agreement on August 6, 2015. The participants have selected a mediator and are exchanging relevant information. The Company at present cannot predict when any determination of the allocable share of the various PRPs, including the U.S. Government, is likely to be completed. Although a loss is probable, it is not possible at this time to reasonably estimate the amount of any obligation for remediation of the Crab Orchard Site because the extent of the environmental impact, allocation among PRPs, remediation alternatives, and concurrence of regulatory authorities have not yet advanced to the stage where a reasonable estimate can be made. The Company notified its insurers of this potential liability and has obtained coverage under certain of its insurance policies.

Other Proceedings

The Company was named as a defendant in a suit filed in June 2015 by a small group of homeowners in Missoula, Montana, whose homes are near the site of a former lumber mill and wood processing facility (the "White Pine Site") that operated from approximately 1920 to 1996. The suit alleges that the homeowners' property was damaged by coming into contact with certain hazardous substances that migrated from the White Pine Site. The White Pine Site was owned and operated by a predecessor to Huttig Building Products, Inc. ("Huttig"), which was a subsidiary of the Company from 1968 until Huttig's shares were distributed to the Company's shareholders in 1999. Under the terms of the distribution agreement, Huttig retained the liability for its prior operations. The Company tendered the defense of this matter to Huttig, and Huttig has agreed to defend and indemnify the Company. In a related matter, Huttig filed suit against certain insurers who Huttig claims are obligated to provide insurance coverage for the environmental remediation costs and other damages caused by the operations at the White Pine Site. The Company was brought into that case in October 2015 as a third party defendant by two of the insurers seeking declaratory relief that no coverage obligations are owed to Huttig or the Company with respect to the White Pine Site. In late 2015 Huttig notified the Company of its intention to pursue an action against the Company for damages related to Huttig's environmental liability at the White Pine Site and the scope of coverage under the Company's historical insurance policies available to Huttig for such liability. Huttig has not yet made a formal claim or filed a lawsuit against the Company. As of December 31, 2015, no loss amount has been accrued in connection with any of these matters because a loss is not considered probable, nor can an amount be reasonably estimated, and the Company does not believe that any of these matters is likely to have a material impact on its consolidated results of operations, financial position or the cash flows of the Company.

The Company regularly reviews the status of lawsuits, claims and proceedings that have been or may be asserted against the Company relating to the conduct of its business, including those pertaining to product liability, patent infringement, commercial, employment, employee benefits, environmental and stockholder matters. The Company records a provision for a liability for such matters when it is considered probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions, if any, are reviewed quarterly and adjusted as additional information becomes available. If either or both of the criteria are not met, the Company assesses whether there is at least a reasonable possibility that a loss, or additional losses, may have been incurred. If there is a reasonable possibility that a loss or additional loss may have been incurred for such matters, the Company discloses the estimate of the amount of loss or range of loss, discloses that the amount is immaterial, or discloses that an estimate of loss cannot be made, as applicable. The Company believes that as of December 31, 2015, there was no reasonable possibility that a material loss, or any additional material losses, may have been incurred for such matters, and that adequate provision has been made in its financial statements for the potential impact of all such matters.

Note 11 - Acquisitions and Divestitures

On December 11, 2013, the Company completed the acquisition of MEI Conlux Holdings (U.S.), Inc. and its affiliate MEI Conlux Holdings (Japan), Inc. (together, "MEI"), a leading provider of payment solutions for unattended transaction systems, serving customers in the transportation, gaming, retail, financial services and vending markets. The purchase price was \$804 million for all of the outstanding equity interests of MEI. MEI had sales of \$399 million in 2012 and has been integrated into the Company's Crane Payment Innovations business within its Payment & Merchandising Technologies segment.

Acquisition-Related Costs

Acquisition-related costs were expensed as incurred. For the year ended December 31, 2015, the Company recorded \$7.2 million of acquisition integration related charges and a \$0.6 million restructuring gain (see additional discussion in Note 15). For the year ended December 31, 2014, the Company recorded \$9.8 million of acquisition integration related charges, \$4.8 million of inventory step-up and backlog amortization within cost of sales in the Consolidated Statement of Operations and \$10.3 million of restructuring costs (see additional discussion in Note 15). For the year ended December 31, 2013, the Company recorded \$22.8 million of transaction costs within the selling, general and administrative category in the Consolidated Statement of Operations. In addition, as part of the execution of regulatory remedies associated with the MEI acquisition, the Company sold a product line, which was formerly part of its Payment & Merchandising Technologies segment, to Suzo-Happ Group for \$6.8 million and recorded a \$2 million gain. Sales of this product line were \$15.1 million in 2013.

Supplemental Pro-Forma Data (Unaudited):

MEI's results of operations have been included in the Company's financial statements for the period subsequent to the completion of the acquisition on December 11, 2013. MEI contributed sales of approximately \$25 million resulting in an operating loss of approximately \$2 million for the period from the completion of the acquisition through December 31, 2013. The following unaudited supplemental pro forma data for the year ended December 31, 2013 presents consolidated information as if the acquisition had been completed on January 1, 2012. There were no significant pro forma adjustments required for the year ended December 31, 2013. The pro forma results were calculated by combining the results of Crane Co. with the stand-alone results of MEI for the pre-acquisition periods, which were adjusted to account for certain costs which would have been incurred during this pre-acquisition period:

For the year ended December 31, (in millions)	2013
Net Sales	\$ 2,936
Net income attributable to common shareholders	\$ 242
Basic earnings per share	\$ 4.18
Diluted earnings per share	\$ 4.11

The unaudited supplemental pro-forma data above includes adjustments for inventory step up, depreciation and amortization related to acquired MEI property, plant & equipment and intangible assets, transaction costs, interest expense related financing directly associated with the acquisition and the effect of required dispositions to meet regulatory approval.

Note 12 – Stock-Based Compensation Plans

Effective February 2013, the Company terminated its two existing stock compensation plans and created a single plan to cover all employees and directors: the Stock Incentive Plan and the Non-Employee Director Stock Compensation Plan. The Stock Incentive Plan is used to provide long-term incentive compensation through stock options, restricted share units and performance-based restricted share units.

Options are granted under the Stock Incentive Plan to officers and other key employees and directors at an exercise price equal to the closing price on the date of grant. For grants prior to April 23, 2007, the exercise price is equal to the fair market value of the shares on the date of grant, which is defined for purposes of the plans as the average of the high and low prices for the Company's common stock on the 10 trading days ending on the date of grant. Unless otherwise determined by the Compensation Committee which administers the plan, options become exercisable at a rate of 25% after the first year, 50% after the second year, 75% after the third year and 100% after the fourth year from the date of grant. Options granted in 2014 expire in 10 years. Options granted from 2004 to 2013 expire six years after the date of grant. All options granted to directors and options granted to officers and employees prior to 2014 and after 2014 expire ten years after date of grant. Options granted prior to January 29, 2007, became exercisable at a rate of 50% after the first year, 75% after the second year and 100% after the third year.

The Company determines the fair value of each grant using the Black-Scholes option pricing model. The weighted-average assumptions for grants made during the years ended December 31, 2015, 2014 and 2013 are as follows:

	2015	2014	2013
Dividend yield	2.95%	2.50%	2.76%
Volatility	24.97%	27.49%	35.52%
Risk-free interest rate	1.32%	1.39%	0.76%
Expected lives in years	4.2	4.2	4.2

Expected dividend yield is based on the Company's dividend rate. Expected stock volatility was determined based upon the historical volatility for the four-year-period preceding the date of grant. The risk-free interest rate was based on the yield curve in effect at the time the options were granted, using U.S. constant maturities over the expected life of the option. The expected lives of the awards represents the period of time that options granted are expected to be outstanding.

Activity in the Company's stock option plans for the year ended December 31, 2015 was as follows:

Option Activity	Number of Shares (in 000's)	Weighted Average Exercise Price	Weighted Average Remaining Life (Years)
Options outstanding at January 1, 2015	2,426	\$ 50.52	
Granted	749	58.19	
Exercised	(356)	40.25	
Canceled	(149)	52.58	
Options outstanding at December 31, 2015	2,670	\$ 53.69	5.15
Options exercisable at December 31, 2015	1,123	\$ 48.94	2.71

The weighted-average fair value of options granted during 2015, 2014 and 2013 was \$9.80, \$12.57 and \$12.08, respectively. The total fair value of shares vested during 2015, 2014 and 2013 was \$9.0 million, \$9.6 million and \$9.1 million, respectively. The total intrinsic value of options exercised during 2015, 2014 and 2013 was \$7.9 million, \$25.4 million and \$26.2 million, respectively. The total cash received from these option exercises was \$11.9 million, \$20.5 million and \$31.0 million, respectively, and the tax benefit realized for the tax deductions from option exercises and vesting of restricted stock was \$1.6 million, \$7.7 million and \$6.4 million, respectively. The aggregate intrinsic value of exercisable options was \$2.1 million, \$12.5 million and \$26.4 million as of December 31, 2015, 2014 and 2013, respectively. As of December 31, 2015, there was \$10.3 million of total future compensation cost related to unvested share-based awards to be recognized over a weighted-average period of 1.24 years.

Restricted stock and restricted share units vest at a rate of 25% after the first year, 50% after the second year, 75% after the third year and 100% after the fourth year from the date of grant and are subject to forfeiture restrictions which lapse over time. The vesting of Performance-based restricted share units is determined in three years based on relative total shareholder return for Crane Co. compared to the S&P Midcap 400 Capital Goods Group, with payout potential ranging from 0% to 175% but capped at 100% if the Company's three-year total shareholder return is negative.

Included in the Company's share-based compensation was expense recognized for its restricted stock, restricted share unit and performance-based restricted share unit awards of \$12.2 million, \$10.9 million and \$11.9 million in 2015, 2014 and 2013, respectively. As of December 31, 2015, there was \$19.0 million of total future compensation cost related to restricted stock, restricted share unit and performance-based restricted share unit award over a weighted-average period of 1.15 years.

Changes in the Company's restricted stock and restricted share units for the year ended December 31, 2015 were as follows:

Restricted Stock and Restricted Share Unit Activity	Restricted Stock and Restricted Share Units (in 000's)	Weighted Average Grant-Date Fair Value
Restricted Stock and Restricted Share Units at January 1, 2015	650	\$ 52.92
Restricted Share Units granted	194	57.15
Restricted Share Units vested	(129)	51.30
Restricted Share Units forfeited	(45)	58.14
Performance-based Restricted Share Units granted	90	61.10
Performance-based Restricted Share Units vested	(97)	47.07
Performance-based Restricted Share Units forfeited	(9)	54.98
Restricted Stock and Restricted Share Units at December 31, 2015	654	\$ 56.16

Note 13 – Segment Information

The Company's segments are reported on the same basis used internally for evaluating performance and for allocating resources. The Company has four reporting segments: Fluid Handling, Payment & Merchandising Technologies, Aerospace & Electronics and Engineered Materials.

The Fluid Handling segment is a provider of highly engineered fluid handling equipment for critical performance applications that require high reliability. The segment is comprised of Process Valves and Related Products, Commercial Valves, and Other Products. Process Valves and Related Products include on/off valves and related products for critical and demanding applications in the chemical, oil & gas, power, and general industrial end markets globally. Commercial Valves is engaged primarily in the manufacturing and distribution of valves and related products for the non-residential construction, general industrial, and to a lesser extent, the municipal market. Other Products include pumps and related products primarily for water and wastewater applications in the industrial, municipal, commercial and military markets.

The Payment & Merchandising Technologies segment consists of Crane Payment Innovations, which provide high technology payment acceptance and dispensing products to original equipment manufacturers, including coin accepters and dispensers, coin hoppers, coin recyclers, bill validators and bill recyclers and, Merchandising Systems, which provide merchandising equipment, including include food, snack and beverage vending machines and vending machine software and online solutions.

Aerospace & Electronics segment supplies critical components and systems, including original equipment and aftermarket parts, primarily for the commercial aerospace and military aerospace and defense markets.

Engineered Materials segment manufactures fiberglass-reinforced plastic panels and coils ("FRP"), primarily for use in the manufacturing of recreational vehicles, truck bodies and trailers (Transportation), with additional applications in commercial and industrial buildings (Building Products).

In accordance with ASC Topic 280, "Segment Reporting", for purposes of segment performance measurement, the Company does not allocate to the business segments items that are of a non-operating nature, including charges which occur from time to time related to the Company's asbestos liability and its legacy environmental liabilities, as such items are not related to current business activities; or corporate organizational and functional expenses of a governance nature. "Corporate expenses-before asbestos and environmental charges" consist of corporate office expenses including compensation, benefits, occupancy, depreciation, and other administrative costs. Assets of the business segments exclude general corporate assets, which principally consist of cash and cash equivalents, deferred tax assets, insurance receivables, certain property, plant and equipment, and certain other assets.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. The Company accounts for intersegment sales and transfers as if the sales or transfers were to third parties at current market prices.

Financial information by reportable segment is set forth below:

(in millions)	2015	2014	2013
Fluid Handling			
Net sales	\$ 1,091.3	\$ 1,263.7	\$ 1,288.6

- (a) Includes a \$6.5 million charge related to the settlement of the environmental lawsuits by certain homeowners in Roseland, New Jersey.
- (b) Includes the impact of item (a) cited above, net of tax and \$1.1 million loss on divestiture of a small business.
- (c) Includes a \$49.0 million charge related to an increase in the Company's liability at the Goodyear Site, and \$6.8 million charge for expected remediation costs associated with an environmental site in Roseland, New Jersey.
- (d) Includes the impact of item (c) cited above, net of tax and \$0.7 million gain on divestiture of real estate.
- (e) Includes a \$3.5 million gain on divestiture of real estate.

Note 15 – Restructuring and Related Costs

The following table summarizes the restructuring costs associated with repositioning and acquisition-related actions noted below:

(in millions)	Costs Incurred in 2015	Total Costs Incurred Through December 31, 2015
2014 Repositioning Actions	\$ (0.2)	\$ 18.7
2015 Repositioning Actions	8.6	8.6
Acquisition-Related Restructuring	(0.6)	9.7
Total Restructuring	\$ 7.8	\$ 37.0

2014 Repositioning Actions

The Company recorded total pre-tax restructuring charges of \$18.7 million (a gain of \$0.2 million in 2015 and a charge of \$18.9 million in 2014) related to the consolidation of a facility in Europe in the Fluid Handling segment and certain facility consolidation activities in the Aerospace & Electronics segment. The Company expects these repositioning actions to result in workforce reductions of approximately 320 employees, or about 3% of the Company's global workforce.

The following table summarizes the restructuring charges by cost type and segment:

(in millions)	Costs Incurred in 2015	Total Costs Incurred Through December 31, 2015
Fluid Handling		
Severance	\$ (0.6)	\$ 11.6
Other	—	0.2
Asset write-down	—	0.2
Gain on sale of asset	(0.4)	(0.4)
Total Fluid Handling Restructuring	(1.0)	11.6
Aerospace & Electronics		
Severance	\$ (2.0)	\$ 2.2
Asset write-down	0.2	0.2
Other	0.5	2.6
Total Aerospace & Electronics Restructuring	(1.3)	5.0
Corporate		
Asset write-down	\$ 2.1	\$ 2.1
Total Corporate Restructuring	2.1	2.1
Total Restructuring	\$ (0.2)	\$ 18.7

In addition to the restructuring costs summarized above, the Company recorded \$5.4 million (\$2.8 million in 2015 and \$2.6 million in 2014) and \$1.6 million (\$0.4 million in 2015 and \$1.2 million in 2014) for additional costs incurred as a direct result of the facility consolidations within the Fluid Handling segment and Aerospace & Electronics segment, respectively.

The following table summarizes the accrual balances related to these cash-related restructuring charges:

<i>(in millions)</i>	Balance at December 31, 2014	Expense	Utilization	Balance at December 31, 2015
Fluid Handling				
Severance	\$ 10.7	\$ (0.6)	\$ (8.8)	\$ 1.3
Total Fluid Handling	\$ 10.7	\$ (0.6)	\$ (8.8)	\$ 1.3
Aerospace & Electronics				
Severance	\$ 1.9	\$ (2.0)	\$ 0.1	\$ —
Other	0.5	0.5	(1.0)	—
Total Aerospace & Electronics	\$ 2.4	\$ (1.5)	\$ (0.9)	\$ —
Total Restructuring	\$ 13.1	\$ (2.1)	\$ (9.7)	\$ 1.3

The Company does not expect any further significant costs associated with these actions.

2015 Repositioning Actions

The Company initiated incremental restructuring activities and recorded pre-tax restructuring charges of \$8.6 million in 2015. The Company expects these actions to result in workforce reductions of approximately 125 employees, or about 1%, of the Company's global workforce.

The following table summarizes the restructuring charges by cost type and segment:

<i>(in millions)</i>	Costs Incurred in 2015	Total Costs Incurred Through December 31, 2015
Fluid Handling		
Severance	\$ 7.9	\$ 7.9
Aerospace & Electronics		
Severance	0.7	0.7
Total Restructuring	\$ 8.6	\$ 8.6

The following table summarizes the accrual balances related to these cash-related restructuring charges:

<i>(in millions)</i>	Balance at December 31, 2014	Expense	Utilization	Balance at December 31, 2015
Fluid Handling				
Severance	\$ —	\$ 7.9	\$ (3.8)	\$ 4.1
Aerospace & Electronics				
Severance	\$ —	\$ 0.7	\$ (0.6)	\$ 0.1
Total Restructuring	\$ —	\$ 8.6	\$ (4.4)	\$ 4.2

The Company does not expect any further significant costs associated with these actions.

Acquisition-Related Restructuring

The Company recorded total pre-tax restructuring charges of \$9.7 million (a gain of \$0.6 million in 2015 and a charge of \$10.3 million in 2014) related to the December 2013 acquisition of MEI within the Company's Payment & Merchandising Technologies segment. The Company expects these actions to result in workforce reductions of approximately 240 employees, or less than 2% of the Company's global workforce.

The following table summarizes the restructuring charges by cost type and segment:

Acquisition-Related Restructuring <i>(in millions)</i>	Costs Incurred in 2015	Total Costs Incurred Through December 31, 2015
<u>Payment & Merchandising Technologies</u>		
Severance	\$ 3.6	\$ 13.8
Other	0.2	0.2
Asset write-down	—	0.1
Pension curtailment gain	(4.4)	(4.4)
Total Restructuring	\$ (0.6)	\$ 9.7

The following table summarizes the accrual balances related to these cash-related restructuring charges:

<i>(in millions)</i>	Balance at December 31, 2014	Expense	Utilization	Balance at December 31, 2015
<u>Payment & Merchandising Technologies</u>				
Severance	\$ 7.0	\$ 3.6	\$ (4.3)	\$ 6.3
Other	—	0.2	(0.2)	—
Total Restructuring	\$ 7.0	\$ 3.8	\$ (4.5)	\$ 6.3

The Company does not expect any further significant costs associated with these actions.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. The Company's Chief Executive Officer and Principal Financial Officer evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the year covered by this annual report. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that are filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's ("SEC") rules and forms and the information is accumulated and communicated to the Company's Chief Executive Officer and Principal Financial Officer to allow timely decisions regarding required disclosure. Based on this evaluation, the Company's Chief Executive Officer and Principal Financial Officer have concluded that these controls are effective as of the end of the year covered by this annual report.

Change in Internal Controls over Financial Reporting. During the fiscal quarter ended December 31, 2015, there have been no changes in the Company's internal control over financial reporting, identified in connection with our evaluation thereof, that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Design and Evaluation of Internal Control over Financial Reporting. Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we included a report of our management's assessment of the design and effectiveness of our internal controls as part of this Annual Report on Form 10-K for the year ended December 31, 2015. Our independent registered public accounting firm also attested to, and reported on, our management's assessment of the effectiveness of internal control over financial reporting. Our management's report and our independent registered public accounting firm's attestation report are set forth in Part II, Item 8 of this Annual Report on Form 10-K under the captions entitled "Management's Responsibility for Financial Reporting" and "Report of Independent Registered Public Accounting Firm."

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Crane Co.
Stamford, CT

We have audited the internal control over financial reporting of Crane Co. and subsidiaries (the "Company") as of December 31, 2015 based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in "Management's Responsibility for Financial Reporting" appearing in Item 9A. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on the criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2015 of the Company and our report dated February 23, 2016 expressed an unqualified opinion on those financial statements.

EQUAL EMPLOYMENT OPPORTUNITY POLICY

Crane Co. is an equal opportunity employer. It is the policy of the Company to recruit, hire, promote and transfer to all job classifications without regard to race, color, religion, national origin, age, sex, marital status, sexual orientation, physical or learning disability, or any other characteristics protected by law in all aspects of the employment process and relationship.

ENVIRONMENT, HEALTH AND SAFETY POLICY

Crane Co. is committed to protecting the environment by taking responsibility to prevent serious or irreversible environmental degradation through efficient operations and activities. Crane Co. recognizes environmental management among its highest priorities throughout the corporation, and has established policies and programs that are integral and essential elements of the business plan of each of the business units. Additionally, Crane Co. has established the position of Vice President, Environment, Health and Safety, which is responsible for assuring compliance, measuring environment, health and safety performance and conducting associated audits on a regular basis in order to provide appropriate information to the Crane Co. management team and to regulatory authorities.
