FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission File No. 000-16435

Vermont
(State of Incorporation)
Address of Principal Executive Offices: 4811 US Route 5, Derby, Vermont 05829

03-0284070
(IRS Employer Identification Number)

Registrant's telephone number, including area code: (802) 334-7915

Securities registered pursuant to Section 12(b) of the Act

Title of Each Class	Name of each exchange on which registered
NONE	NONE

Securities registered pursuant to Section 12(g) of the Act:
Common Stock - \$2.50 par value per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). YES NO

As of June 30, 2013 the aggregate market value of the voting stock held by non-affiliates of the registrant was \$57,041,906, based on a per share trade price on June 26, 2013 of \$12.75, as reported on the OTC Link ATS® system maintained by the OTC Markets Group Inc. For purposes of the calculation, all directors and executive officers were deemed to be affiliates of the registrant. However, such assumption is not intended as an admission of affiliate status as to any such individual.

There were 4,867,957 shares outstanding of the issuer's class of common stock as of the close of business on March 17, 2014.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Annual Report to Shareholders for the year ended December 31, 2013 are incorporated by reference to Part I of this Report.

Portions of the Annual Report to Shareholders for the year ended December 31, 2013 are incorporated by reference to Part II of this report.

Portions of the Proxy Statement for the Annual Meeting of Shareholders to be held on May 13, 2014 are incorporated by reference to Part III of this report.

PART I

Item 1. The Business

Organization and Operation

The Company. Community Bancorp. (the "**Company**") was organized under the laws of the State of Vermont in 1982 and became a registered bank holding company under the Bank Holding Company Act of 1956, as amended, in October 1983 when it acquired all of the voting shares of Community National Bank (the "**Bank**"). The Bank is the only subsidiary of the Company and principally all of the Company's business operations are presently conducted through it. Therefore, the following narrative and the other information about the Company contained in this report are based primarily on the Bank's operations.

The Bank; Banking Services Community National Bank was organized in 1851 as the Peoples Bank, and was subsequently reorganized as the National Bank of Derby Line in 1865. In 1975, after 110 continuous years of operation as the National Bank of Derby Line, the Bank acquired the Island Pond National Bank and changed its name to "Community National Bank." On December 31, 2007, the Company completed its acquisition of LyndonBank, a Vermont bank headquartered in Lyndonville, Vermont, in a cash merger transaction. As a result of the merger, the Company added three office locations in Caledonia County and one office location in each of Orleans, Lamoille and Franklin Counties.

The Company, through Community National Bank, provides a broad range of retail banking services to the residents, businesses, nonprofit organizations and municipalities in northeastern and central Vermont. Significant services offered by the Company include:

- *Business Banking* – The Company provides a range of banking services to corporations and other business clients. Credit products are available for a wide variety of general business purposes, including financing for commercial business properties, equipment, inventories and accounts receivable, as well as letters of credit. The Company also offers business checking and other deposit accounts, cash management services, repurchase agreements, automated clearing house (ACH) and wire transfer services and remote deposit capture.
- *Commercial Real Estate Lending* – The Company provides a wide range of products to meet the financing needs of commercial developers and investors, residential builders and developers and community development entities. Credit products are available to facilitate the purchase of land and/or build structures for business use and for investors who are developing residential or commercial property, as well as for real estate secured financing of existing businesses.
- *Residential Real Estate Lending* – The Company provides products to help meet the home financing needs of consumers, including conventional permanent and construction/permanent (fixed, adjustable, or variable rate) financing arrangements, and FHA/VA loan products. The Company offers both fixed-rate and adjustable rate residential mortgage (ARM) loans and home equity loans. A portion of the Company's first lien residential mortgage loans originated are sold into the secondary market. The Company offers these products through its network of banking offices. The Company does not originate subprime residential real estate loans.
- *Retail Credit* – The Company provides a full-range of loan products to meet the needs of consumers, including personal loans, automobile loans and boat/recreational vehicle loans. In addition, through a marketing alliance with a third party, the Company offers credit cards.
- *Municipal and Institutional Banking* – The Company provides banking services to meet the needs of state and local governments, schools, charities, membership and not-for-profit associations including deposit account services, tax-exempt loans, lines of credit and term loans. In addition, through an arrangement with the Federal Home Loan Bank of Boston ("**FHLBB**"), the Company offers a secured deposit product to its municipal customers, collateralized by FHLBB letters of credit.
- *Retail Banking* – The Company provides a full-range of consumer banking services, including checking accounts, savings programs, automated teller machines (ATMs), debit/credit cards, night deposit facilities and online and telephone banking.

The Company focuses on establishing and maintaining long-term relationships with customers and is committed to providing for the financial services needs of the communities it serves. In particular, the Company continues to emphasize its relationships with individual customers and small-to-medium-sized businesses. The Company actively evaluates the banking needs of its markets, including low- and moderate-income areas, and offers products that are responsive to the needs of its customer base. The Company's markets provide a mix of real estate, commercial and industrial, municipal and consumer lending opportunities, as well as a stable core deposit base. Additional information about our business, including the Company's deposit-taking activities, lending activities and credit and risk management policies, is set forth under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" contained in the Annual Report to Shareholders for 2013 filed as Exhibit 13 to this Report and is

Trust Company Affiliate. In 2002, the Bank transferred its trust operations to a newly formed Vermont-chartered nondepository trust and investment management affiliate, Community Financial Services Group, LLC, based in Newport, Vermont ("**CFSG**"). The Bank's ownership interest in CFSG is held indirectly, through Community Financial Services Partners, LLC, a Vermont limited liability company ("**CFSG Partners**"), which owns 100% of the limited liability company equity interests of CFSG. Immediately following transfer of its trust operations to CFSG, the Bank sold a two-thirds interest in CFSG Partners, equally to the National Bank of Middlebury, headquartered in Middlebury, Vermont and Guaranty Bancorp Inc., the bank holding company parent of Woodsville Guaranty Savings Bank, headquartered in Woodsville, New Hampshire. CFSG offers fiduciary services throughout the market areas of the three owner financial institutions and leases space from them in some of their branch offices.

Statutory Business Trust. In 2007, the Company formed CMTV Statutory Trust I (the "**Trust**"), a Delaware statutory business trust, for the purpose of issuing \$12.5 million of trust preferred securities and lending the proceeds to the Company. This funding provided a portion of the cash consideration paid by the Company in the acquisition of LyndonBank and provided additional regulatory capital. The Trust is a variable interest entity for which the Company is not the primary beneficiary, within the meaning of applicable accounting standards. Accordingly, the Trust is not consolidated with the Company for financial reporting purposes.

Tax Credit Entity. In 2011, the Company formed a limited liability company ("**LLC**") to facilitate its purchase of federal New Markets Tax Credits ("**NMTCs**") under an investment structure designed by a local community development entity. The LLC is a variable interest entity for which, in the context of the overall NMTC structure, the Company is not the primary beneficiary, within the meaning of applicable accounting standards. Accordingly, the LLC is not consolidated with the Company for financial reporting purposes.

Competition

All of the Bank's offices are located in northern and central Vermont. The Bank's main office is located in Derby, in Orleans County. In addition to its main office, the Bank has four other banking offices in Orleans County, one office in Essex County, four offices in Caledonia County, two offices in Washington County and one office each in Franklin and Lamoille Counties. (See Item 2 (Properties) of this report.)

The Bank competes in all aspects of its business with other banks and credit unions in northern and central Vermont, including three of the largest banks in the state, which maintain branch offices throughout the Bank's service area. Changes in the regulatory framework of the banking industry during the past decade have broadened the competition for commercial bank products, such as deposits and loans, to include not only traditional rivals such as banks, savings banks and credit unions, but also many non-traditional rivals such as insurance companies, brokerage firms, mutual funds and consumer and commercial finance and leasing companies. In addition, many out-of-market nationwide banks, nonbank lenders and other financial service firms operate in the Company's market areas through mass marketing solicitations by mail, radio, television, the internet and email. At the same time, technological changes have facilitated remote delivery of financial services by bank and nonbank competitors outside the context of a traditional branch bank network, thereby intensifying competition from out-of-market firms.

Competition from the tax-exempt credit union industry has also intensified in recent years. A number of the Bank's credit union competitors, including the largest state-chartered Vermont credit union, have converted in recent years from an employment based common bond to a community common bond, thereby significantly increasing their fields of membership in the Bank's market areas. Because federal law subsidizes credit unions by giving them a general exemption from federal income taxes, they have a significant pricing advantage over commercial banks for their deposit and loan products. This pricing advantage, coupled with the relaxing of membership and regulatory restrictions on product offerings, has resulted in increased competition for the Bank from this tax exempt sector of the financial services industry.

In order to compete with other bank and non-bank service providers, the Company stresses the community orientation of its banking operations and relies to a large extent upon personal relationships established by its officers, directors and employees with their customers and on their strong ties to the local community. In addition, management's knowledge of the local community assists it in tailoring the Company's products and services to meet the needs of its customer base. Although competition is strong throughout the Company's market area, management believes that the Company can continue to compete effectively, in view of its local market knowledge and community ties and its understanding of customer needs.

Employees

As of December 31, 2013, the Company did not have any employees at the holding company level. However, as of such date, the Bank employed 131 full-time employees and 20 part-time employees. The Bank is not a party to any collective bargaining agreement and management of the Bank considers its employee relations to be good.

Regulation and Supervision

The following discussion describes elements of an extensive regulatory framework applicable to bank holding companies and banks, to which the Company and the Bank are subject. Regulation of banks and bank holding companies is intended primarily for the protection of depositors and the Deposit Insurance Fund of the FDIC, rather than for the protection of shareholders and creditors.

The Company's earnings are affected by general economic conditions, management policies, changes in federal and state laws and regulations and actions of various regulatory authorities, including those referred to below. Banking is a highly regulated business and proposals to change the laws and regulations to which the Company and the Bank are subject are frequently introduced at both the federal and state levels. The likelihood and timing of any such changes and the impact such changes may have on the Company and the Bank is impossible to predict with any certainty.

The following summary does not purport to be complete and is qualified by reference to the particular statutes and regulations.

Dodd-Frank Act The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the **Dodd-Frank Act**) represents a comprehensive revision and restructuring of many aspects of financial services industry regulation and impacts practically all aspects of a banking organization. Implementation of the Dodd-Frank Act continued throughout 2013, including through various agency rulemakings. Many of the provisions of the Dodd-Frank Act are designed to reduce systemic risk from large, complex "systemically significant" financial institutions, and thus do not apply to a smaller banking organization such as the Company. Nevertheless, certain of its provisions do directly apply to the Company and others will indirectly impact its operations, as the Dodd-Frank Act continues to reshape the financial services environment. Among other things, the Act:

- Established a new independent agency, the Consumer Financial Protection Bureau ("**CFPB**"), with centralized responsibility for implementing and (with respect to large organizations) enforcing and examining compliance with federal consumer financial laws. Although the CFPB does not have enforcement or examination authority over smaller banking organizations such as the Company, its regulatory standards and mandates will ultimately affect all financial service providers;
- Applies the same leverage and risk-based capital requirements that apply to insured depository institutions to most bank holding companies, savings and loan holding companies and systemically important non-bank financial companies on a consolidated basis. These changes prohibit the use of additional trust preferred securities as Tier 1 capital, but the Company's existing trust preferred securities are grandfathered;
- Requires debit card interchange transaction fees charged by large financial institutions to be reasonable and proportional to the cost incurred by the issuer for the transaction. The Federal Reserve adopted regulations during 2011 establishing such fee standards, eliminating exclusivity arrangements between issuers and networks for debit card transactions and limiting restrictions on merchant discounting for use of certain payment forms and minimum or maximum amount thresholds as a condition for acceptance of credit cards. Although smaller institutions such as the Company are not subject to the interchange fee restrictions, it is possible that, over time, competitive pricing pressures in the marketplace may operate to make the restrictions applicable to them by default;
- Requires public companies to periodically seek "say on executive pay" and "say on frequency" votes of shareholders, and in some circumstances, a "say on golden parachute" vote of shareholders. As a smaller reporting company, these vote requirements first became applicable for the Company's 2013 annual meeting of shareholders;
- Allowed depository institutions to pay interest on demand deposits effective July 21, 2011;

- Established by statute the Federal Reserve's "source of strength" doctrine mandating holding company financial support of subsidiary insured depository institutions;
- Eliminated state restrictions on de novo interstate branching;
- Established new requirements related to mortgage lending, including prohibitions against payment of steering incentives and provisions relating to underwriting standards, disclosures, appraisals and escrows. Many of these provisions have been implemented through CFPB rulemakings;
- Weakened federal preemption standards for national banks and federal savings associations and their operating subsidiaries by granting states greater authority to enforce consumer protection laws against them;
- Provided permanent relief for smaller reporting companies, such as the Company, from the requirements of Section 404 of the Sarbanes-Oxley Act for auditor attestation of management's assessment of internal controls and their effectiveness;
- Requires a bank holding company to be well capitalized and well managed to receive regulatory approval of an interstate bank acquisition; and
- Permanently increases the FDIC's standard maximum deposit insurance amount to \$250,000, changes the FDIC insurance assessment base to assets rather than deposits and increases the reserve ratio for the deposit insurance fund to ensure the future strength of the fund. A temporary extension of unlimited deposit insurance on non-interest bearing transaction accounts expired on December 31, 2012.

While significant elements of the Dodd-Frank Act have been implemented through agency rulemakings, additional rulemakings and further studies are required for implementation of other provisions of the Act (See "Qualified Mortgage Rules" below). The Company will continue to monitor the impact of implementation of this significant legislation.

Bank Holding Company Act. As a registered bank holding company, the Company is subject to on-going regulation, supervision and examination by the Board of Governors of the Federal Reserve System ("**Federal Reserve**"), under the Bank Holding Company Act of 1956, as amended (the "**Act**"). A bank holding company for example, must generally obtain the prior approval of the Federal Reserve before it acquires all or substantially all of the assets of any bank, or acquires ownership or control of more than 5% of the voting shares of a bank. Federal Reserve approval is also generally required before a bank holding company may acquire more than 5% of any outstanding class of voting securities of a company other than a bank or a more than 5% interest in its property.

The Act generally limits the activity in which the Company and its subsidiaries may engage to certain specified activities, including those activities which the Federal Reserve may find, by order or regulation, to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. Some of the activities that the Federal Reserve has determined to be closely related to banking are: (1) making and servicing loans that could be made by mortgage, finance, credit card or factoring companies; (2) performing the functions of a trust company; (3) certain leasing of real or personal property; (4) providing certain financial, banking or economic data processing services; (5) except as otherwise prohibited by law, acting as an insurance agent or broker with respect to insurance that is directly related to the extension of credit or the provision of other financial services or, under certain circumstances, with respect to insurance that is sold in certain small communities in which the bank holding company system maintains banking offices; (6) acting as an underwriter for credit life insurance and credit health and accident insurance directly related to extensions of credit by the holding company system; (7) providing certain kinds of management consulting advice to unaffiliated banks and non-bank depository institutions; (8) performing real estate appraisals; (9) issuing and selling money order and similar instruments and travelers checks and selling U.S. Savings Bonds; (10) providing certain securities brokerage and related services for the account of bank customers; (11) underwriting and dealing in certain government obligations and other obligations such as bankers' acceptances and certificates of deposit; (12) providing consumer financial counseling; (13) providing tax planning and preparation services; (14) providing check guarantee services to merchants; (15) operating a collection agency; and (16) operating a credit bureau. Trust and investment management activities conducted through a nondepository trust company such as the Company's affiliate, CFSG, are also considered by the Federal Reserve to be permissible nonbanking activities that are closely related to banking.

Except for CFSG's trust and investment management operations, the Company does not presently engage, directly or indirectly through any affiliate, in any other permissible non-banking activities.

A bank holding company must also obtain prior Federal Reserve approval in order to purchase or redeem its own stock if the gross consideration to be paid, when added to the net consideration paid by the company for all purchases or redemptions by the company of its equity securities within the preceding 12 months, will equal 10% or more of the company's consolidated net worth.

The Company is required to file with the Federal Reserve Board annual quarterly reports and such additional information as the Board may require pursuant to the Act. The Board may also make examinations of the Company and any direct or indirect subsidiary of the Company.

The Company, the Bank, CFSG Partners and CFSG are all considered "affiliates" of each other for the purposes of Section 18(j) of the Federal Deposit Insurance Act ("FDIA"), as amended, and Sections 23A and 23B of the Federal Reserve Act, as amended. In particular, section 23A limits loans or other extensions of credit to, asset purchases with and investments in affiliates of the Bank to 10% of the Bank's capital and surplus. In addition, such loans and extensions of credit and certain other transactions must be collateralized in specified amounts. Section 23B requires, among other things, that certain transactions between the Bank and its affiliates must be on terms substantially the same, or at least as favorable to the Bank, as those prevailing at the time for comparable transactions with or involving non-affiliated persons. Further, the Company is prohibited from engaging in certain tie-in arrangements in connection with any extension of credit or lease or sale of any property or the furnishing of services.

Capital. The Company and the Bank are required under federal law to maintain certain capital levels. The federal banking agencies have issued substantially similar risk-based and leverage capital requirements applicable to banking organizations they supervise. Under the current requirements (which, for community banking organizations such as the Company, will be replaced by new rules, described below, beginning January 1, 2015), the Company and the Bank are required to maintain certain capital standards based on ratios of capital to assets and capital to risk-weighted assets. The requirements define an institution's total qualifying capital as having two components: Tier 1 capital, which must be at least 50% of total qualifying capital and mainly comprises common equity, retained earnings, qualifying preferred stock and (for community banking organizations) qualifying trust preferred securities, less certain intangibles; and Tier 2 capital, which may include the allowance for loan losses up to a maximum of 1.25% of risk weighted assets, qualifying subordinated debt, qualifying preferred stock, hybrid capital instruments and up to 45% of net unrealized gains on available-for-sale equity securities. The requirements also define the weights assigned to assets and off-balance sheet items to determine the risk weighted asset components of the risk-based capital rules.

Under the current requirements, the minimum capital standards that must be met by any bank holding company or bank include a Tier 1 capital ratio of at least 4%, a total risk-based capital ratio of at least 8% and a leverage capital ratio of at least 4% (except for those institutions with the highest regulatory ratings and not experiencing significant growth or expansion). Risks such as concentration of credit risks and the risk arising from non-traditional activities, as well as the institution's exposure to a decline in the economic value of its capital due to changes in interest rates, and an institutions ability to manage those risks, are important factors that are to be taken into account by the federal banking agencies in assessing an institution's overall capital adequacy.

The Dodd-Frank Act contained a number of restrictions designed to strengthen capital for bank holding companies, including a requirement that the Federal Reserve establish minimum leverage and risk-based capital levels that are at least as stringent as that currently in effect for banks. The Act also required that the Federal Reserve issue capital rules that are countercyclical so that the amount of capital required to be maintained by a banking organization would increase in times of economic expansion and decrease in times of economic contractions, consistent with the organization's safety and soundness. In addition, the international oversight body of the Basel Committee on Banking Supervision reached agreement through what is known as the Basel III Capital Framework to increase the minimum common equity capital requirement for banking organizations.

Pursuant to the various directives, the federal banking agencies have issued revised capital rules that change the leverage and risk-based capital requirements (including the prompt corrective action framework), which will become effective for community banking organizations such as the Company as of January 1, 2015. Under these final rules, the definition of the regulatory capital components and minimum capital requirements will materially change. Among the most important of these changes is the addition of a new common equity Tier 1 risk-based capital ratio of 4.5%, and the increase in the overall Tier 1 risk-based capital ratio to 6%. Certain deductions from common equity will be expanded and others, including mortgage servicing assets and deferred tax assets subject to temporary timing differences, will be subject to threshold deductions. In addition, the federal banking agencies are requiring a capital conservation buffer of up to 2.5% above each of the capital ratio requirements (common equity tier 1, tier 1, and total risk-based capital) which must be met for a bank to be able to pay dividends, engage in share buybacks or make discretionary bonus payments to executive management without restriction. When the Basel III capital rules are fully phased in, a banking organization would need to maintain a common equity Tier 1 capital ratio greater than 7.0%, a Tier 1 capital ratio greater than 8.5% and a total risk-based capital ratio greater than 10.5%, otherwise, it will be subject to restrictions on capital distributions and discretionary bonus payments to its executive management. The agency rulemakings also change the risk-weighting of certain assets, including "high volatility" commercial real estate, past due assets, structured securities and equity holdings.

The Company's tier 1 leverage, tier 1 risk-based and total risk-based capital ratios were 8.04%, 11.48% and 13.09%, respectively, at December 31, 2013. The Company's capital ratios exceeded all applicable regulatory requirements at December 31, 2013. The Bank's tier 1 leverage, tier 1 risk-based and total risk-based capital ratios were 8.20%, 11.72% and 12.97%, respectively, at December 31, 2013. Each of these ratios exceeds the current regulatory guidelines for a well-capitalized institution, the highest regulatory capital category. In addition, management is evaluating the potential impact of the Basel III capital rules on the Company and believes that, as of December 31, 2013, the Company and the Bank would meet all capital adequacy requirements under the Basel III capital standards on a fully-phased in basis as if such requirements were currently in effect.

USA Patriot Act In response to the terrorist events of September 11, 2001, Congress enacted the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the "USA Patriot Act" or the "Act"). The USA Patriot Act is intended to strengthen the ability of U.S. law enforcement and the intelligence community to work cooperatively to combat terrorism on a variety of fronts. The impact of the USA Patriot Act on financial institutions is significant and wide ranging. The Act contains sweeping anti-money laundering and financial transparency laws and imposes various regulations, including standards for verifying client identification at account opening, and rules to promote cooperation among financial institutions, regulators and law enforcement entities in identifying parties that may be involved in terrorism or money laundering. The Secretary of the Treasury and banking regulators have adopted several regulations to implement these provisions. The Act also amended the federal Bank Holding Company Act and the Bank Merger Act to require the federal banking regulatory authorities to consider the effectiveness of a bank holding company or a financial institution's anti-money laundering activities when reviewing an application to expand operations. As required by law, Community National Bank has in place a Bank Secrecy Act and Anti-Money Laundering compliance program, as well as a customer identification program.

Sarbanes-Oxley Act The Sarbanes-Oxley Act of 2002 (the "SOX") was enacted to increase corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies and to protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws. SOX is the most far-reaching U.S. securities legislation enacted in decades, and generally applies to companies that file or are required to file periodic reports with the SEC under the Securities Exchange Act of 1934 ("**Exchange Act**"). The SEC has engaged in extensive rulemaking to implement the provisions of SOX.

SOX includes provisions addressing, among other matters, the duties, functions and qualifications of audit committees for all public companies; certification of financial statements by the chief executive officer and the chief financial officer; the forfeiture of bonuses or other incentive-based compensation and profits from the sale of an issuer's securities by directors and senior officers in the twelve month period following initial publication of any financial statements that later require restatement; disclosure of off-balance sheet transactions; a prohibition on personal loans to directors and officers, except (in the case of banking companies) loans in the normal course of business; expedited filing requirements for reports of beneficial ownership of company stock by insiders; disclosure of a code of ethics for senior officers, and of any change or waiver of such code; the formation of a public accounting oversight board; auditor independence; disclosure of fees paid to the company's auditors for non-audit services and limitations on the provision of such services; attestation requirements for company management and external auditors, relating to internal controls and procedures; and various increased criminal penalties for violations of federal securities laws.

In response to SOX, the Board of Directors of the Company approved a series of actions to strengthen and improve its already strong corporate governance practices. Among other measures, the Board adopted a Code of Ethics for Senior Financial Officers and the Principal Executive Officer, adopted an Insider Trading Policy, adopted amendments to the Audit Committee Charter, appointed a Compensation Committee and a Corporate Governance/Nominating Committee and adopted charters for those committees.

Since 2007 Section 404 of SOX has required management of the Company to undertake a periodic assessment of the adequacy and effectiveness of the Company's internal controls over financial reporting. Management's report on internal control over financial reporting for 2013 is contained in Item 9A of this Report. The Company has incurred, and expects to continue to incur, costs in connection with its on-going compliance with Section 404.

As enacted in 2002 and implemented by the SEC, SOX provided that, beginning with annual financial statements for 2010, the Company's external auditors would be required to attest to, and report on, management's assessment of the Company's internal controls and the operating effectiveness of these controls. As noted above, however, the Dodd-Frank Act included permanent relief from this requirement for smaller reporting companies such as the Company.

More information on the Company's corporate governance practices, including committee charters, is available on the Company's website at www.communitybancorpvt.com.

SEC Regulatory Relief for Smaller Reporting Companies. In December 2007, the SEC adopted amendments to its disclosure and reporting rules to extend to more public companies the benefits of the simplified and less rigorous disclosure requirements previously applicable only to "small business issuers." The amendments established a new category of "smaller reporting companies" with a public float of less than \$75 million. The Company continues to qualify as a smaller reporting company as of its last measurement date (June 30, 2013). Under the amendments, smaller reporting companies are able to elect whether to comply with specified financial and nonfinancial disclosure requirements on an item by item basis. The amendments were effective February 4, 2008 and the Company has elected to avail itself of some of the relief provided in the amendments in connection with preparation of the Company's annual meeting proxy statement and its periodic reports, including this annual report on Form 10-K.

Prompt Corrective Action. The Bank is subject to regulatory capital requirements established under the Federal Deposit Insurance Company Improvement Act of 1991 ("**FDICIA**"). Among other things, FDICIA identifies five capital categories for insured depository institutions (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized) and requires the respective U.S. federal regulatory agencies to implement systems for "prompt corrective action" for insured depository institutions that do not meet minimum capital requirements within such categories. FDICIA imposes progressively more restrictive constraints on operations, management and capital distributions, depending on the category in which an institution is classified. Failure to meet the capital guidelines could also subject a banking institution to capital raising requirements. An "undercapitalized" bank must develop a capital restoration plan and its parent holding company must guarantee that bank's compliance with the plan. The liability of the parent holding company under any such guarantee is limited to the lesser of 5% of the bank's assets at the time it became undercapitalized or the amount needed to comply with the plan. Furthermore, in the event of the bankruptcy of the parent holding company, such guarantee would take priority over the parent's general unsecured creditors. In addition, FDICIA requires the various regulatory agencies to prescribe certain non-capital standards for safety and soundness related generally to operations and management, asset quality and executive compensation and permits regulatory action against a financial institution that does not meet such standards.

The various federal bank regulatory agencies have adopted substantially similar regulations that define the five capital categories identified by FDICIA, using the total risk-based capital, Tier 1 risk-based capital and leverage capital ratios as the relevant capital measures. Such regulations establish various degrees of corrective action to be taken when an institution is considered undercapitalized. Under the regulations, a "well capitalized" institution must have a Tier 1 capital ratio to risk weighted assets of at least 6%, a total capital ratio to risk weighted assets of at least 10% and a leverage ratio of at least 5% and not be subject to a capital directive order. An "adequately capitalized" institution must have a Tier 1 capital ratio to risk weighted assets of at least 4%, a total capital ratio to risk weighted assets of at least 8% and a leverage ratio of at least 4%, or 3% in some cases.

As noted above, the Dodd-Frank Act mandates similar capital requirements for bank and thrift holding companies on a consolidated basis to those applicable to insured depository institutions under the Prompt Corrective Action provisions of FDICIA.

As of December 31, 2013, the Bank was considered "well capitalized" under FDICIA's regulatory capital requirements.

Dividends. The Company derives funds for payment of dividends to its shareholders primarily from dividends received from its subsidiary, Community National Bank. Under the National Bank Act, prior approval from the Office of the Comptroller of the Currency ("**OCC**") is required if the total of all dividends declared by a national bank in any calendar year will exceed the sum of such bank's net profits for that last year and its retained net profits for the preceding two calendar years, less any required transfers to surplus. Federal law also prohibits national banks from paying dividends greater than the bank's undivided profits after deducting statutory bad debt in excess of the bank's allowance for loan losses.

In addition, the Company and the Bank are subject to various general regulatory policies and requirements relating to the payment of dividends, including requirements to maintain adequate capital above regulatory minimums. The appropriate federal or state banking agency is authorized to determine under certain circumstances relating to the financial condition of a bank or bank holding company that the payment of dividends would be an unsafe or unsound practice and to prohibit such payment.

In February 2009, the Federal Reserve issued supervisory guidance on the payment of dividends and redemption and repurchases of stock by bank holding companies. The guidance heightened expectations that a bank holding company will inform and consult with Federal Reserve supervisory staff in advance of declaring and paying any dividend that could raise safety and soundness concerns, such as a dividend exceeding current period earnings; redeeming or repurchasing regulatory capital instruments when the bank holding company is experiencing financial weaknesses; or redeeming or repurchasing common stock or perpetual preferred stock that would result in a net reduction in the amount of such equity instruments outstanding compared with the beginning of the quarter in which the redemption or repurchase occurred. The guidance provides that a bank holding company should eliminate, defer or severely limit dividends if net income for the past four quarters is not sufficient to fully fund dividends; the prospective rate of earnings retention is not consistent with the holding company's capital needs and overall current and prospective financial condition; or the holding company will not meet, or is in danger of not meeting, its minimum regulatory capital ratios. The Company would be required in future periods to consult with, and obtain the approval of, the Federal Reserve for payment of any dividends, including regular quarterly cash dividends, that are in excess of earnings for the applicable quarterly period.

OCC Supervision. The Bank is a national banking association and subject to the provisions of the National Bank Act and federal and state statutes and rules and regulations applicable to national banks. The primary supervisory authority for the Bank is the OCC. The OCC's examinations are designed for the protection of the Bank's depositors and not its shareholders. The Bank is subject to periodic examination by the OCC and must file periodic reports with the OCC containing a complete statement of its financial condition and results of operations.

Deposit Insurance. The deposits of the Bank are insured by the Deposit Insurance Fund (**"DIF"**) of the FDIC up to the limits set forth under applicable law and are subject to the deposit insurance premium assessments of the DIF. The FDIC imposes a risk-based deposit premium assessments system, which was amended pursuant to the Federal Deposit Insurance Reform Act of 2005 and further amended by the Dodd-Frank Act. Under this system, as amended, the assessment rates for an insured depository institution vary according to the level of risk incurred in its activities. To arrive at an assessment rate for a banking institution, the FDIC places it in one of four risk categories determined by reference to its capital levels and supervisory ratings. In addition, in the case of those institutions in the lowest risk category, the FDIC further determines its assessment rate based on certain specified financial ratios or, if applicable, its long-term debt ratings. The assessment rate schedule can change from time to time, at the discretion of the FDIC, subject to certain limits. In addition, all FDIC insured depository institutions are required to pay a pro rata portion of the interest due on the obligations issued by the Financing Corporation (**"FICO"**) to fund the closing and disposal of failed thrift institutions by the Resolution Trust Corporation.

The Dodd-Frank Act changed the assessment formula for determining deposit insurance premiums and modified certain insurance coverage provisions of the FDIA. The FDIC's implementing rules, which redefined the base for FDIC insurance assessments from the amount of insured deposits to average consolidated total assets less average tangible equity, became effective April 1, 2011. The Bank's total FDIC insurance assessment for 2013 was \$376,022.

The Dodd-Frank Act also permanently increased from \$100,000 to \$250,000 the maximum per depositor FDIC insurance amount.

Brokered Deposits. Under FDICIA, an FDIC-insured bank is prohibited from accepting brokered deposits without prior approval of the FDIC unless it is well capitalized under the FDICIA's prompt corrective actions guidelines. The Company participates in the Certificate of Deposit Account Registry Service (**"CDARS"**) of the Promontory Interfinancial Network, which uses a deposit-matching engine to match CDARS deposits in other participating banks, dollar-for-dollar. This product is designed to provide deposit insurance in excess of FDIC limits and thereby enhance customer attraction and retention, build deposits and improve net interest margins. CDARS are considered brokered deposits for certain purposes under the Federal Deposit Insurance Act and FDIC regulations. As of December 31, 2013 the Company had \$1,103,008 in CDARS deposits, all of which were exchanged deposits. The Company's Asset, Liability and Funds Management Policy limits the use of brokered deposits to 5% of total assets.

Financial Privacy. Under the federal Gramm-Leach-Bliley Financial Modernization Act of 1999 all financial institutions, including the Company, are required to adopt privacy policies, restrict the sharing of nonpublic consumer customer data with nonaffiliated parties, and establish procedures and practices to protect customer data from unauthorized access. The Company is also subject to similar, but more stringent, requirements under state law, including the Vermont Financial Privacy Act. In addition, the Company is subject to the federal Fair Credit Reporting Act, including the amendments adopted in the federal Fair and Accurate Credit Transactions Act of 2003 (**"FACT Act"**). The FACT Act includes many provisions concerning national credit reporting standards and permits consumers to opt out of information sharing among affiliated companies for marketing purposes. It also requires financial institutions to notify their customers if they report negative information about them to a credit bureau or if they are granted credit terms less favorable than those generally available. The Federal Reserve and the OCC have extensive rulemaking authority under the FACT Act and have promulgated rules implementing the Act, including rules limiting information sharing for affiliate marketing and rules requiring programs to identify, detect and mitigate certain identity theft red flags. The Company is also subject to the requirements of the Vermont Fair Credit Reporting Act, which generally requires an individual's consent in order to obtain a credit report, and to data security standards and data breach notice requirements.

Qualified Mortgage Rules. Pursuant to the Dodd-Frank Act, the CFPB has adopted certain significant amendments to the regulations that implement the Truth in Lending Act. These amendments, which became effective January 10, 2014, address mortgage origination practices by certain housing creditors, including the Bank. The amendments generally require creditors to make a reasonable, good faith determination of a consumer's ability to repay a mortgage (the "ability-to-repay requirement"). The amendments provide that mortgages deemed to be so-called qualified mortgages ("QMs") that are "higher priced" are entitled to a rebuttable presumption that the creditor making the loan satisfied the ability-to-repay requirements and those mortgages deemed to be QMs that are not "higher priced" are entitled to a safe harbor from the ability-to-repay requirements.

Pursuant to the ability-to-repay requirement, creditors must consider eight minimum underwriting factors related to the terms of the mortgage and the income, employment, debt and credit history of the borrower. To be deemed a qualified mortgage, a mortgage cannot include certain features, such as a term exceeding 30 years, negative amortization, an interest-only period, or a balloon payment and must have been originated in compliance with certain underwriting criteria, in particular, a 43% debt-to-income cap. A QM cannot have points and fees that exceed 3% of the total loan amount, with different caps for mortgages under \$100,000.

The amendments also provide for a temporary category of qualified mortgage that will phase out over time. The underwriting requirements for such mortgages have more flexible underwriting requirements – in particular, they are not required to meet the 43% debt-to-income cap so long as they satisfy the general product feature requirements for a qualified mortgage and also satisfy the underwriting requirements of, and are therefore, eligible to be purchased, guaranteed or insured by, Fannie Mae or Freddie Mac while they operate under Federal conservatorship or receivership, the Department of Housing and Urban Development (i.e., the Federal Housing Administration), the Department of Veteran Affairs, the Department of Agriculture or Rural Housing Services.

A lender originating a QM is protected against a legal claim that the lender failed to comply with the ability-to-repay requirement. A lender originating a mortgage that is not a QM is exposed to the risk of a potential claim that the lender did not comply with the ability-to-repay rules, which could require the lender to pay damages to the borrower, including but not necessarily limited to the sum of all finance charges and fees paid by the borrower. The borrower's claim also could impair the lender's ability to enforce the loan terms or foreclose on the real estate collateral. Because of these potential risks, a QM might have more value in the secondary mortgage market and might be easier for a lender to sell into the secondary mortgage market than a mortgage that is not a QM.

Although management of the Bank believes the majority of the Bank's mortgage originations will be QMs, the ability-to-repay requirement creates a new basis for challenge by regulators and by consumers and its future interpretation by the courts creates substantial uncertainty. The CFPB's mission is consumer protection, not lender safety and soundness, and for that reason the CFPB wrote the ability-to-repay rule with the goal of preventing consumers from being steered by lenders into expensive and unsustainable borrowing, rather than with the goal of assuring loan repayment. Accordingly, typical credit-quality features such as loan-to-value standards are not elements of the ability-to-repay rule, and it will not necessarily be the case that QMs have a higher probability or history of repayment than other mortgages. Compliance with the ability-to-repay requirement will increase the Bank's compliance costs, and will potentially adversely affect the profitability of routine residential mortgage lending operations. In addition, for the mortgage lending industry the ability-to-repay rule creates a bias in favor of QMs, which because of factors such as a minimum 43% debt-to-income ratio, could have unintended adverse effects, such as reducing community bank lending to low- and moderate-income borrowers and communities.

Other Consumer Protection and Community Reinvestment Laws The Bank is subject to a variety of federal and state laws intended to protect borrowers, depositors and other Bank customers and to promote lending to various sectors of the economy and population. These laws include, but are not limited to, the Federal Real Estate Settlement Procedures Act, the Federal Truth In Lending Act, the Federal and Vermont Equal Credit Opportunity Acts, the Federal Right to Financial Privacy Act, the Federal Truth in Savings Act, the Federal Electronic Funds Transfer Act, and the Federal Community Reinvestment Act ("CRA").

The CRA requires banks to define the communities they serve, identify the credit needs of those communities, collect and maintain data for each small business or small farm loan originated or purchased by the Bank, and maintain a Public File at each location. The federal banking regulators examine the institutions they regulate for compliance with the CRA and assign one of the following four ratings: "outstanding," "satisfactory," "needs to improve" or "substantial noncompliance". The rating assigned reflects the bank's record of helping to meet the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of the bank. As of the Bank's last CRA examination, completed during 2011, it received a rating of "outstanding".

Home Mortgage Disclosure Act The federal Home Mortgage Disclosure Act (“HMDA”), which is implemented by Federal Reserve Board Regulation C, requires mortgage lenders that maintain offices within Metropolitan Statistical Areas (MSAs) to report and make available to the public specified information regarding their residential mortgage lending activities, such as the pricing of home mortgage loans, including the “rate spread” between the interest rate on loans and certain treasury securities and other benchmarks. Community National Bank became subject to HMDA reporting requirements as a result of its merger with LyndonBank in 2007, as the former LyndonBank branch in Enosburg Falls in Franklin County is included within the Burlington, Vermont MSA.

Reserve Requirements. Federal Reserve Board Regulation D requires all depository institutions to maintain reserves against their transaction accounts (generally, demand deposits, NOW accounts and certain other types of accounts that permit payments or transfers to third parties) or non-personal time deposits (generally, money market deposit accounts or other savings deposits held by corporations or other depositors that are not natural persons, and certain other types of time deposits), subject to certain exemptions. Because required reserves must be maintained in the form of either vault cash, a non-interest bearing account at the Federal Reserve Bank of Boston or a pass through account (as defined by the Federal Reserve Board), the effect of these reserve requirements is to reduce the amount of the Company's interest-bearing assets.

Management reviewed and reclassified the Company's deposits during 2013 and 2012, to the extent permissible under Regulation D, resulting in a reduction in required reserves since the reclassification, as compared to required reserve levels in prior years.

Federal Home Loan Bank System Community National Bank is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank provides a central credit facility primarily for member institutions. Member institutions are required to purchase and hold shares of capital stock in the applicable regional Federal Home Loan Bank (the Federal Home Loan Bank of Boston, in the case of Community National Bank), in an amount at least equal to the sum of 0.35% of the aggregate principal amount of its unpaid residential mortgage loans and similar obligations at the beginning of each year and 4.5% of its advances (borrowings) from the Federal Home Loan Bank. Community National Bank was in compliance with this requirement with an investment in Federal Home Loan Bank of Boston (“FHLBB”) stock at December 31, 2013 of approximately \$3 million. During 2009, the FHLBB experienced significant net operating losses, and as a result temporarily ceased paying dividends on its stock and instituted a moratorium on stock repurchases and redemptions. In 2011, the FHLBB resumed paying dividends, but at a more modest rate than previous years and in February 2012 it lifted the moratorium on stock redemptions. As a member, the Bank is subject to future capital calls by the FHLBB in order to maintain compliance with its capital plan.

Executive Compensation Guidelines In October 2009, the Federal Reserve issued comprehensive guidance on executive compensation policies, intended to ensure that the incentive compensation practices of banking organizations do not undermine their safety and soundness by encouraging excessive risk-taking. The guidance covers all employees that have the ability to affect materially an institution's risk profile, either individually or as part of a group, and establishes that incentive compensation arrangements should (1) provide incentives that do not encourage risk-taking beyond the institution's ability to identify and manage effectively; (2) be compatible with effective internal controls and risk management; and (3) be supported by strong corporate governance, including active and effective oversight by the board of directors. The guidance instructed institutions to begin an immediate review of their incentive compensation policies to ensure that they do not encourage excessive risk-taking and implement corrective programs as needed. Where deficiencies in incentive compensation arrangements exist, they must be immediately addressed. For institutions such as the Company that are not "large, complex banking organizations" as defined in the guidance, the Federal Reserve will review the incentive compensation arrangements as part of its regular, risk-focused examination process and not in a separate examination. These examinations will be tailored to the scope and complexity of the institution's activity and compensation arrangements. The findings will be included in the Federal Reserve's examination report and deficiencies will be incorporated into the institution's supervisory ratings. Enforcement actions may be taken against an institution if its incentive compensation arrangements, or related risk management control or governance processes, pose a risk to the institution's safety and soundness and the institution fails to take prompt and effective measures to correct the deficiencies.

Pursuant to the Dodd-Frank Act, in February 2011, the federal banking agencies issued a joint proposed rulemaking imposing various restrictions on incentive compensation arrangements for institutions with over \$1 billion in assets. Although not directly applicable to smaller institutions such as the Company, the proposal will likely help set “best practices” at financial institutions of all sizes.

In addition to the statutes, regulations and regulatory initiatives described above, new legislation and regulations affecting financial institutions are frequently proposed. If enacted or adopted, these measures could change banking statutes and the Company's operating environment in substantial and unpredictable ways and could further increase reporting and compliance requirements, governance structures and costs of doing business. The Company cannot predict whether any such additional legislation or other regulatory initiatives will be adopted or the effect they may have on the Company's business, results of operations or financial condition.

Effects of Government Monetary Policy

The earnings of the Company are affected by general and local economic conditions and by the policies of various governmental regulatory authorities. In particular, the Federal Reserve Board regulates money supply, credit conditions and interest rates in order to influence general economic conditions, primarily through open market operations in United States Government Securities, varying the discount rate on member bank borrowings, setting reserve requirements against member and nonmember bank deposits, regulating interest rates payable by member banks on time and savings deposits and expanding or contracting the money supply. Federal Reserve Board monetary policies have had a significant effect on the operating results of commercial banks, including the Company, in the past and are expected to continue to do so in the future.

Other Available Information

This annual report on Form 10-K is on file with SEC. The Company also files with the SEC quarterly reports on Form 10-Q and current reports on Form 8-K, as well as proxy materials for its annual meetings of shareholders. You may obtain copies of these documents by visiting the SEC's Public Reference Room at 100F Street, NE, Washington, DC 20549-0213, by calling the SEC at 1-800-SEC-0330 or by accessing the SEC's website at <http://www.sec.gov>. The Company's SEC-filed reports and proxy statements are also available through a link on the Company's website at www.communitybancorpvt.com. The Company has also posted on its website the Company's Code of Ethics for Senior Financial Officers and the Principal Executive Officer, the Insider Trading Policy and the charters of the Audit, Compensation and Nominating Committees. The information and documents contained on the Company's website do not constitute part of this report. Copies of the Company's reports filed with the SEC (other than exhibits) can also be obtained by contacting Chris Bumps, Corporate Secretary, at our principal offices, which are located at 4811 U.S. Route 5, Derby, Vermont 05829 or by calling (802) 334-7915.

Item 1A. Risk Factors

Omitted, in accordance with the regulatory relief available to smaller reporting companies in SEC Release Nos. 33-8876 and 34-56994 (effective February 4, 2008).

Item 1B. Unresolved Staff Comments

Not Applicable

Item 2. Properties

Although Community Bancorp. does not itself own or lease real property, Community National Bank owns and leases various properties for its banking operations. All of the Bank's offices are located in Vermont.

The Company's administrative offices are located at the main offices of the Bank on U.S. Route 5 in Derby, Vermont, with total office space of approximately 34,000 square feet, including retail banking offices, an operations center as well as a community room used by the Bank for meetings and various functions. This community room has a secure outside access making it possible for the Bank to offer it to non-profit organizations after banking hours free of charge. This office is equipped with a remote drive-up facility and a drive-up ATM as well as an inside lobby ATM.

In addition to its main office, the Company maintains thirteen branch offices in five Vermont counties:

Branch Location	Owned	Leased	CFSG Office¹
<i>Caledonia County</i>			
St. Johnsbury (Railroad Street)	X		
St. Johnsbury (Route 5)		X ²	
Lyndon (Memorial Drive)		X ³	X
Lyndonville (Broad Street)	X		
<i>Franklin County</i>			
Enosburg Falls (Sampsonville Road)	X		
<i>Lamoille County</i>			
Morrisville (Route 15 West)		X	
<i>Orleans County</i>			
Barton (Church Street)		X	
Derby Line (Main Street)	X		
Island Pond (Route 105)		X	
Newport (Main Street)	X		X
Troy (Route 101)	X		
<i>Washington County</i>			
Barre (North Main Street)	X		X
Montpelier (State Street)		X	

In addition to ATMs at the main office and all branch locations, the Company maintains ATMs or cash machines at ten third party locations throughout its market area. A complete listing of the Company's banking offices and off-premises ATM and cash machine locations is contained on the Bank's website at www.communitynationalbank.com.

All of the Company's owned premises are free and clear of any mortgages or encumbrances and, in management's view, all locations are suitable for conducting the Bank's business.

Item 3. Legal Proceedings

There are no pending legal proceedings to which the Company or the Bank is a party or of which any of its property is the subject, other than routine litigation incidental to its banking business, none of which, in the opinion of management, is material to the Company's consolidated operations or financial condition.

Item 4. Mine Safety Disclosures

Not Applicable

PART II.

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

¹ The Bank leases space at some of its branch locations to its affiliated trust and investment management affiliate, Community Financial Services Group, LLC (CFSG), including premises in Newport, Vermont used as CFSG's main office.

² This branch consists of approximately 2,250 square feet in the front of the Price Chopper building at the corner of the I-91 Access Road and Route 5 in the town of St. Johnsbury and is leased on market terms from St. Johnsbury Properties, Inc., a wholly owned subsidiary of Murphy Realty Co. Inc. of St. Johnsbury. Peter Murphy, President of Murphy Realty, is a director of the Company and the Bank.

³ This branch consists of a building on Memorial Drive comprising approximately 2,600 square feet in the town of Lyndon and is leased on market terms from a neighboring business, 48 Broad Street, LLC, owned by David Stahler who is a member of the Bank's Caledonia County advisory board.

Information on the trading market in, market price of, and dividends paid on, the Company's common stock is incorporated by reference to the section of the Annual Report to Shareholders for 2013 under the caption "Common Stock Performance by Quarter" immediately following the "Management's Discussion and Analysis of Financial Condition and Results of Operations", filed as Exhibit 13 to this report. The balance of the information required by item 201 of Regulation S-K is omitted in accordance with the regulatory relief available to smaller reporting companies in SEC Release Nos. 33-8876 and 34-56994 (effective February 4, 2008).

The following table provides information as to purchases of the Company's common stock during the fourth quarter ended December 31, 2013, by the Company and by any affiliated purchaser (as defined in SEC Rule 10b-18):

<u>For the month ended:</u>	<u>Total Number of Shares Purchased(1) (2)</u>	<u>Average Price Paid Per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plan</u>	<u>Maximum Number of Shares That May Yet Be Purchased Under the Plan at the End of the Period</u>
October 1 - October 31	0	\$ 0.00	N/A	N/A
November 1 - November 30	0	0.00	N/A	N/A
December 1 - December 31	2,500	13.50	N/A	N/A
Total	<u>2,500</u>	<u>\$ 13.50</u>	<u>N/A</u>	<u>N/A</u>

(1) All 2,500 shares were purchased for the account of participants invested in the Company Stock Fund under the Company's Retirement Savings Plan by or on behalf of the Plan Trustee, the Human Resources Committee of Community National Bank. Such share purchases were facilitated through Community Financial Services Group, LLC ("CFSG"), which provides certain custodial and investment advisory services to the Plan. Both the Plan Trustee and CFSG may be considered affiliates of the Company under Rule 10b-18.

(2) Shares purchased during the period do not include fractional shares repurchased from time to time in connection with the participant's election to discontinue participation in the Company's Dividend Reinvestment Plan.

Item 6. Selected Financial Data

Omitted, in accordance with the regulatory relief available to smaller reporting companies in SEC Release Nos. 33-8876 and 34-56994 (effective Feb. 4, 2008).

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Incorporated by reference to the section of the Annual Report to Shareholders for 2013 under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations," immediately following the "Notes to Consolidated Financial Statements", filed as Exhibit 13 to this report.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Incorporated by reference to the subsection labeled "Risk Management" of Management's Discussion and Analysis of Financial Condition and Results of Operations, contained in the Annual Report to Shareholders for 2013, filed as Exhibit 13 to this report.

Item 8. Financial Statements and Supplementary Data

The audited consolidated financial statements and related notes of Community Bancorp. and Subsidiary and the report thereon of the independent registered accounting firm of Berry Dunn McNeil & Parker, LLC are incorporated herein by reference from the Annual Report to Shareholders for 2013, filed as Exhibit 13 to this report.

In accordance with the regulatory relief available to smaller reporting companies in SEC Release Nos. 33-8876 and 34-56994 (effective Feb. 4, 2008), the Company has elected to present audited statements of income, cash flows and changes in shareholders' equity for each of the preceding two, rather than three, fiscal years.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

Management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"). As of December 31, 2013, an evaluation was performed under the supervision and with the participation of management, including the principal executive officer and principal financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, management concluded that its disclosure controls and procedures as of December 31, 2013 were effective in ensuring that material information required to be disclosed in the reports it files with the Commission under the Exchange Act was recorded, processed, summarized, and reported on a timely basis.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining effective internal controls over financial reporting, as defined in Rule 13a-15(f) under the Exchange Act. As of December 31, 2013, an evaluation was performed under the supervision and with the participation of management, including the principal executive officer and principal financial officer, of the effectiveness of the design and operation of the Company's internal controls over financial reporting. Management assessed the Company's system of internal control over financial reporting as of December 31, 2013, in relation to criteria for effective internal control over financial reporting as described in "Internal Control – Integrated Framework," issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management believes that, as of December 31, 2013, its system of internal control over financial reporting met those criteria and is effective.

This Annual Report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report is not subject to attestation by the Company's independent registered public accounting firm pursuant to permanent relief accorded to smaller reporting companies in the Dodd-Frank Act.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended December 31, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None

PART III.

Item 10. Directors, Executive Officers and Corporate Governance

The following is incorporated by reference to the Company's Proxy Statement for the Annual Meeting of Shareholders to be held on May 13, 2014.

Listing of the names, ages, principal occupations, business experience and specific qualifications of the incumbent directors and nominees under the caption "PROPOSAL I - ELECTION OF DIRECTORS."

Listing of the names, ages, titles and business experience of the executive officers under the caption EXECUTIVE OFFICERS."

Information regarding compliance with Section 16(a) of the Securities Exchange Act of 1934 under the caption "SHARE OWNERSHIP INFORMATION -Section 16(a) Beneficial Ownership Reporting Compliance."

Information regarding changes in the Company's procedures for submission of director nominations by shareholders under the caption "SHAREHOLDER NOMINATIONS AND OTHER PROPOSALS."

Information regarding whether a member of the Audit Committee qualifies as an audit committee financial expert under applicable SEC rules, under the caption "CORPORATE GOVERNANCE - Board Committees."

The Code of Ethics for Senior Financial Officers and the Principal Executive Officer is available on the Company's website at www.communitybancorpvt.com. The Code is also listed as Exhibit 14 to this report and incorporated by reference to a prior filing with the SEC. There were no waivers of any provision of the Code during 2013.

Item 11. Executive Compensation

The following is incorporated by reference to the Company's Proxy Statement for the Annual Meeting of Shareholders to be held on May 13, 2014:

Information regarding compensation of directors under the captions "PROPOSAL I - ELECTION OF DIRECTORS - Directors' Fees and Other Compensation" and "-Directors' Deferred Compensation Plan."

Information regarding executive compensation and benefit plans under the caption "EXECUTIVE COMPENSATION."

Information regarding management interlocks and certain transactions under the caption "CORPORATE GOVERNANCE - Compensation Committee Interlocks and Insider Participation."

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following is incorporated by reference to the Company's Proxy Statement for the Annual Meeting of Shareholders to be held on May 13, 2014:

Information regarding the share ownership of management and principal shareholders under the caption "SHARE OWNERSHIP INFORMATION."

The Company does not maintain any equity compensation plans for which disclosure is required under Item 201(d) of SEC Regulation S-K.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The following is incorporated by reference to the Company's Proxy Statement for the Annual Meeting of Shareholders to be held on May 13, 2014:

Information regarding transactions with management under the caption "CORPORATE GOVERNANCE -Transactions with Management."

Information regarding the independence of directors under the caption "CORPORATE GOVERNANCE – Director Independence."

Item 14. Principal Accounting Fees and Services

The following is incorporated by reference to the Company's Proxy Statement for the Annual Meeting of Shareholders to be held on May 13, 2014 under the caption "PROPOSAL 3 - RATIFICATION OF SELECTION OF INDEPENDENT AUDITORS - Fees Paid to Independent Auditors":

Fees paid to the principal accountant for various audit functions including, but not limited to, the audit of the annual financial statements in the Company's Form 10-K Report and review of the financial statements in the Company's Form 10-Q Reports. Description of the audit committee's pre-approval policies and procedures required by paragraph (c) (7)(I) of rule 2-01of Regulation S-X.

PART IV.

Item 15. Exhibits and Financial Statement Schedules

(a) Financial Statements

The Company's audited consolidated financial statements and notes thereto and the report of Berry Dunn McNeil & Parker, LLC thereon, are incorporated by reference to the Annual Report to Shareholders for the years ended December 31, 2013 and 2012, filed as Exhibit 13 to this report.

(b) Exhibits

The following exhibits, previously filed with the Commission, are incorporated by reference:

Exhibit 3(i) - Amended and Restated Articles of Association, filed as Exhibit 3.1 to the Company's Form 8-K Report filed on July 12, 2010.

Exhibit 3(ii) – Certificate of Creation, Designation, Powers, Preferences, Rights, Privileges, Qualifications, Limitations, Restrictions, Terms and Conditions of the Series A Fixed-to-Floating Non-Cumulative Perpetual Preferred Stock, filed as Exhibit 3(i) to the Company's Form 8-K Report filed on December 31, 2007.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
Community Bancorp. and Subsidiary

We have audited the accompanying consolidated balance sheets of Community Bancorp. and Subsidiary as of December 31, 2013 and 2012 and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Community Bancorp. and Subsidiary as of December 31, 2013 and 2012, and the consolidated results of their operations and their consolidated cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

COMMUNITY BANCORP. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Significant Accounting Policies

The accounting policies of Community Bancorp. and Subsidiary ("Company") are in conformity, in all material respects, with accounting principles generally accepted in the United States of America ("US GAAP") and general practices within the banking industry. The following is a description of the Company's significant accounting policies.

Basis of presentation and consolidation

The consolidated financial statements include the accounts of Community Bancorp. and its wholly-owned subsidiary, Community National Bank ("Bank"). All significant intercompany accounts and transactions have been eliminated. The Company is considered a "smaller reporting company" under applicable disclosure rules of the Securities and Exchange Commission and accordingly, has elected to provide its audited statements of income, comprehensive income, cash flows and changes in shareholders' equity for a two year, rather than a three year, period.

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 810, "Consolidation", in part, addresses limited purpose trusts formed to issue trust preferred securities. It also establishes the criteria used to identify variable interest entities ("VIE") and to determine whether or not to consolidate a VIE. In general, ASC Topic 810 provides that the enterprise with the controlling financial interest, known as the primary beneficiary, consolidates the VIE. In 2007, the Company formed CMTV Statutory Trust I for the purposes of issuing trust preferred securities to unaffiliated parties and investing the proceeds from the issuance thereof and the common securities of the trust in junior subordinated debentures issued by the Company. The Company is not the primary beneficiary of CMTV Statutory Trust I; accordingly, the trust is not consolidated with the Company for financial reporting purposes. CMTV Statutory Trust I is considered an affiliate of the Company (see Note 10).

In December 2011, the Company formed a limited liability company ("LLC") to facilitate its purchase of federal New Markets Tax Credits ("NMTC") under an investment structure designed by a local community development entity. Management has evaluated the Company's interest in the LLC under the ASC guidance relating to VIEs in light of the overall structure and purpose of the NMTC financing transaction and has concluded that the LLC should not be consolidated in the Company's financial statements for financial reporting purposes, as the Company is not the primary beneficiary of the NMTC structure, does not exercise control within the overall structure and is not obligated to absorb a majority of any losses of the NMTC structure (see Note 7).

Nature of operations

The Company provides a variety of deposit and lending services to individuals, municipalities, and business customers through its branches, ATMs and telephone and internet banking capabilities in northern and central Vermont, which is primarily a small business and agricultural area. The Company's primary deposit products are checking and savings accounts and certificates of deposit. Its primary lending products are commercial, real estate, municipal and consumer loans.

Concentration of risk

The Company's operations are affected by various risk factors, including interest rate risk, credit risk, and risk from geographic concentration of its deposit taking and lending activities. Management attempts to manage interest rate risk through various asset/liability management techniques designed to match maturities and repricing of assets and liabilities. Loan policies and administration are designed to provide assurance that loans will only be granted to creditworthy borrowers, although credit losses are expected to occur because of subjective factors and factors beyond the control of the Company. While the Company has a diversified loan portfolio by loan type, most of its lending activities are conducted within the geographic area where its banking offices are located. As a result, the Company and its borrowers may be especially vulnerable to the consequences of changes in the local economy in northern and central Vermont. In addition, a substantial portion of the Company's loans are secured by real estate, which is susceptible to a decline in value, especially during times of adverse economic conditions.

Use of estimates

The preparation of consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions involve inherent uncertainties. Accordingly, actual results could differ from those estimates and those differences could be material.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses and the valuation of OREO. In connection with evaluating loans for impairment or assigning the carrying value of OREO, management generally obtains independent evaluations or appraisals for significant properties. While the allowances for loan losses and OREO represent management's best estimate of probable loan and OREO losses as of the balance sheet date, the ultimate collectibility of a substantial portion of the Company's loan portfolio and the recovery of a substantial portion of the fair value of OREO are susceptible to uncertainties and changes in a number of factors, especially local real estate market conditions. The amount of the change that is reasonably possible cannot be estimated.

While management uses available information to recognize losses on loans and OREO, future additions to the allowances may be necessary based on changes in local economic conditions or other relevant factors. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company's allowances for losses on loans and OREO. Such agencies may require the Company to recognize additions to the allowances based on their judgment about information available to them at the time of their examination.

Mortgage servicing rights associated with loans originated and sold in the secondary market, where servicing is retained, are capitalized and included in other assets in the consolidated balance sheets. Mortgage servicing rights are amortized against non-interest income in proportion to, and over the period of, estimated future net servicing income of the underlying loans. The value of capitalized servicing rights represents the present estimated value of the future servicing fees arising from the right to service loans for third parties. The carrying value of the mortgage servicing rights is periodically reviewed for impairment based on a determination of estimated fair value as compared to amortized cost, and impairment, if any, is recognized through a valuation allowance and is recorded as a write down. Critical accounting policies for mortgage servicing rights relate to the initial valuation and subsequent impairment tests. The methodology used to determine the valuation of mortgage servicing rights requires the development and use of a number of estimates, including anticipated principal amortization and prepayments. Events that may significantly affect the estimates used are changes in interest rates and the payment performance of the underlying loans. Management uses a third party consultant to assist in analyzing the fair value of the Company's mortgage servicing rights.

Management evaluates securities for other-than-temporary impairment on at least a quarterly basis, and more frequently when economic or market conditions warrant such evaluation. Consideration is given to various factors, including the length of time and the extent to which the fair value has been less than cost; the nature of the issuer and its financial condition and near-term prospects; and the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. The evaluation of these factors is a subjective process and involves estimates and assumptions about matters that are inherently uncertain. Should actual factors and conditions differ materially from those used by management, the actual realization of gains or losses on investment securities could differ materially from the amounts recorded in the financial statements.

Management utilizes numerous techniques to estimate the carrying value of various other assets held by the Company, including, but not limited to, bank premises and equipment and deferred taxes. The assumptions considered in making these estimates are based on historical experience and on various other factors that are believed by management to be reasonable under the circumstances. Management acknowledges that the use of different estimates or assumptions could produce different estimates of carrying values.

Accounting for a business combination that was completed prior to 2009 requires the application of the purchase method of accounting. Under the purchase method, the Company was required to record the assets and liabilities acquired through the LyndonBank merger in 2007 at fair market value, with the excess of the purchase price over the fair market value of the net assets recorded as goodwill and evaluated annually for impairment. The determination of the fair value of the acquired LyndonBank assets and liabilities requires the use of numerous assumptions, including discount rates, changes in which could significantly affect fair values.

Presentation of cash flows

For purposes of presentation in the consolidated statements of cash flows, cash and cash equivalents includes cash on hand, amounts due from banks (including cash items in process of clearing), federal funds sold (generally purchased and sold for one day periods) and overnight deposits.

Investment securities

Securities the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity and reported at amortized cost. Debt and equity securities not classified as held-to-maturity are classified as available-for-sale. Investments classified as available-for-sale are carried at fair value, with unrealized gains and losses, net of tax and reclassification adjustments, reflected as a net amount in the shareholders' equity section of the consolidated balance sheets and in the statements of changes in shareholders' equity. Investment securities transactions are accounted for on a trade date basis. The specific identification method is used to determine realized gains and losses on sales of securities available-for-sale. Premiums and discounts are recognized in interest income using the interest method over the period to maturity or call date. The Company does not hold any securities purchased for the purpose of selling in the near term and classified as trading.

Declines in the fair value of individual equity securities that are deemed to be other than temporary are reflected in earnings when identified. For individual debt securities where the Company does not intend to sell the security and it is not more likely than not that the Company will be required to sell the security before recovery of its amortized cost basis, the other-than-temporary decline in the fair value of the debt security related to (1) credit loss is recognized in earnings and (2) other factors is recognized in other comprehensive income or loss. Credit loss is deemed to exist if the present value of expected future cash flows using the interest rates at acquisition is less than the amortized cost basis of the debt security. For individual debt securities where the Company intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost, the other-than-temporary impairment is recognized in earnings equal to the entire difference between the security's cost basis and its fair value at the balance sheet date.

Other investments

In December 2011, the Company made an equity investment in a NMTC financing structure, as discussed further in Note 7 of this report. The Company's investment in the NMTC is amortized using the effective yield method.

From time to time the Company acquires partnership interests in limited partnerships for low income housing projects. The investments in limited partnerships are amortized using the effective yield method.

The Company has a one-third ownership interest in Community Financial Services Group, LLC ("CFSG"), a non-depository trust company, as discussed further in Note 7 of this report. The Company's investment in CFSG is accounted for under the equity method of accounting.

Restricted equity securities

Restricted equity securities are comprised of Federal Reserve Bank stock and Federal Home Loan Bank stock. These securities are carried at cost. As a member of the Federal Reserve Bank of Boston ("FRBB"), the Company is required to invest in FRBB stock in an amount equal to 6% of the Bank's capital stock and surplus.

As a member of the Federal Home Loan Bank of Boston ("FHLBB"), the Company is required to invest in \$100 par value stock of the FHLBB in an amount that approximates 1% of unpaid principal balances on qualifying loans, plus an additional amount to satisfy an activity based requirement. The stock is nonmarketable and redeemable at par value, subject to the FHLBB's right to temporarily suspend such redemptions. Members are subject to capital calls in some circumstances to ensure compliance with the FHLBB's capital plan.

Loans held-for-sale

Loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated fair value in the aggregate. Net unrealized losses, if any, are recognized through a valuation allowance by charges to income.

Loans

Loans receivable that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are reported at their outstanding principal balance, adjusted for any charge-offs, the allowance for loan losses, loan premiums or discounts for acquired loans and any unearned fees or costs on originated loans.

Loan interest income is accrued daily on the outstanding balances. For all loan segments, the accrual of interest is discontinued when a loan is specifically determined to be impaired or when the loan is delinquent 90 days and management believes, after considering collection efforts and other factors, that the borrower's financial condition is such that collection of interest is doubtful. Any unpaid interest previously accrued on those loans is reversed from income. Interest income is generally not recognized on specific impaired loans unless the likelihood of further loss is considered by management to be remote. Interest

payments received on impaired loans are generally applied as a reduction of the loan principal balance. Loans are returned to accrual status when principal and interest payments are brought current and the customer has demonstrated the intent and ability to make future payments on a timely basis. Loans are written down or charged off when collection of principal is considered doubtful. Past due status is determined on a contractual basis.

Loan origination and commitment fees and certain direct loan origination costs are deferred and the net amount amortized as an adjustment of the related loan's yield. The Company generally amortizes these amounts over the contractual life of the loans.

Loan premiums and discounts on loans acquired in the merger with LyndonBank are amortized as an adjustment to yield over the life of the loans.

Allowance for loan losses

The allowance for loan losses is established through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is probable. Subsequent recoveries, if any, are credited to the allowance.

Unsecured loans, primarily consumer loans, are charged off when they become uncollectible and no later than 120 days past due. Unsecured loans to customers who subsequently file bankruptcy are charged off within 30 days of receipt of the notification of filing or by the end of the month in which the loans become 120 days past due, whichever occurs first. For secured loans, both residential and commercial, the potential loss on impaired loans is carried as a loan loss reserve specific allocation; the loss portion is charged off when collection of the full loan appears unlikely. The unsecured portion of a real estate loan is that portion of the loan exceeding the "fair value" of the collateral less the estimated cost to sell. Value of the collateral is determined in accordance with the Company's appraisal policy. The unsecured portion of an impaired real estate secured loan is charged off by the end of the month in which the loan becomes 180 days past due.

As described below, the allowance consists of general, specific and unallocated components. However, the entire allowance is available to absorb losses in the loan portfolio, regardless of specific, general and unallocated components considered in determining the amount of the allowance.

General component

The general component of the allowance for loan losses is based on historical loss experience, adjusted for qualitative factors and stratified by the following loan segments: commercial and industrial, commercial real estate, residential real estate first ("1st") lien, residential real estate junior ("Jr") lien and consumer loans. The Company does not disaggregate its portfolio segments further into classes. Loss ratios are calculated by loan segment for one year, two year and five year look back periods. The highest loss ratio among these look-back periods is then applied against the respective segment. Management uses an average of historical losses based on a time frame appropriate to capture relevant loss data for each loan segment. This historical loss factor is adjusted for the following qualitative factors: levels of and trends in delinquencies and non-performing loans, levels of and trends in loan risk groups, trends in volumes and terms of loans, effects of any changes in loan related policies, experience, ability and the depth of management, documentation and credit data exception levels, national and local economic trends, external factors such as competition and regulation and lastly, concentrations of credit risk in a variety of areas, including portfolio product mix, the level of loans to individual borrowers and their related interests, loans to industry segments, and the geographic distribution of commercial real estate loans. This evaluation is inherently subjective as it requires estimates that are susceptible to revision as more information becomes available.

The qualitative factors are determined based on the various risk characteristics of each loan segment. The Company has policies, procedures and internal controls that management believes are commensurate with the risk profile of each of these segments. Major risk characteristics relevant to each portfolio segment are as follows:

Commercial & Industrial – Loans in this segment include commercial and industrial loans and to a lesser extent loans to finance agricultural production. Commercial loans are made to businesses and are generally secured by assets of the business, including trade assets and equipment. While not the primary collateral, in many cases these loans may also be secured by the real estate of the business. Repayment is expected from the cash flows of the business. A weakened economy, soft consumer spending, unfavorable foreign trade conditions and the rising cost of labor or raw materials are examples of issues that can impact the credit quality in this segment.

Commercial Real Estate – Loans in this segment are principally made to businesses and are generally secured by either owner-occupied, or non-owner occupied commercial real estate. A relatively small portion of this segment includes farm loans secured by farm land and buildings. As with commercial and industrial loans, repayment of owner-occupied commercial real estate loans is expected from the cash flows of the business and the segment would be impacted by the same risk factors as commercial and industrial loans. The non-owner occupied commercial real estate portion includes both residential and commercial construction loans, vacant land and real estate development loans, multi-family dwelling loans and commercial rental property loans. Repayment of construction loans is expected from permanent financing takeout; the Company generally requires a commitment or eligibility for the take-out financing prior to construction loan origination. Real estate development loans are generally repaid from the sale of the subject real property as the project progresses. Construction and development lending entail additional risks, including the project exceeding budget, not being constructed according to plans, not receiving permits, or the pre-leasing or occupancy rate not meeting

expectations. Repayment of multi-family loans and commercial rental property loans is expected from the cash flow generated by rental payments received from the individuals or businesses occupying the real estate. Commercial real estate loans are impacted by factors such as competitive market forces, vacancy rates, cap rates, net operating incomes, lease renewals and overall economic demand. In addition, loans in the recreational and tourism sector can be affected by weather conditions, such as unseasonably low winter snowfalls. Commercial real estate lending also carries a higher degree of environmental risk than other real estate lending.

Residential Real Estate - 1st Lien – All loans in this segment are collateralized by first mortgages on 1 – 4 family owner-occupied residential real estate and repayment is dependent on the credit quality of the individual borrower. The overall health of the economy, including unemployment rates and housing prices, has an impact on the credit quality of this segment.

Residential Real Estate – Jr Lien – All loans in this segment are collateralized by junior lien mortgages on 1 – 4 family residential real estate and repayment is primarily dependent on the credit quality of the individual borrower. The overall health of the economy, including unemployment rates and housing prices, has an impact on the credit quality of this segment.

Consumer – Loans in this segment are made to individuals for consumer and household purposes. This segment includes both loans secured by automobiles and other consumer goods, as well as loans that are unsecured. This segment also includes overdrafts, which are extensions of credit made to both individuals and businesses to cover temporary shortages in their deposit accounts and are generally unsecured. The Company maintains policies restricting the size and term of these extensions of credit. The overall health of the economy, including unemployment rates, has an impact on the credit quality of this segment.

Specific component

The specific component of the allowance for loan losses relates to loans that are impaired. Impaired loans are loan(s) to a borrower that in the aggregate are greater than \$100,000 and that are in non-accrual status or are troubled debt restructurings (“TDR”) regardless of amount. A specific allowance is established for an impaired loan when its estimated impaired basis is less than the carrying value of the loan. For all loan segments, except consumer loans, a loan is considered impaired when, based on current information and events, in management’s estimation it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant or temporary payment delays and payment shortfalls generally are not classified as impaired. Management evaluates the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length and frequency of the delay, the reasons for the delay, the borrower’s prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis, by either the present value of expected future cash flows discounted at the loan’s effective interest rate, the loan’s obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Impaired loans also include troubled loans that are restructured. A TDR occurs when the Company, for economic or legal reasons related to the borrower’s financial difficulties, grants a concession to the borrower that would otherwise not be granted. TDRs may include the transfer of assets to the Company in partial satisfaction of a troubled loan, a modification of a loan’s terms, or a combination of the two.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer loans for impairment evaluation, unless such loans are subject to a restructuring agreement.

Unallocated component

An unallocated component of the allowance for loan losses is maintained to cover uncertainties that could affect management’s estimate of probable losses. The unallocated component reflects management’s estimate of the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Bank premises and equipment

Bank premises and equipment are stated at cost less accumulated depreciation. Depreciation is computed principally by the straight-line method over the estimated useful lives of the assets. The cost of assets sold or otherwise disposed of, and the related accumulated depreciation, are eliminated from the accounts and the resulting gains or losses are reflected in the consolidated statements of income. Maintenance and repairs are charged to current expense as incurred and the cost of major renewals and betterments is capitalized.

Other real estate owned

Real estate properties acquired through or in lieu of loan foreclosure or properties no longer used for bank operations are initially recorded at fair value less estimated selling cost at the date of acquisition, foreclosure or transfer. Such properties are carried at fair value, which is the market value less estimated cost of disposition, i.e. sales commissions and costs associated with the sale. Fair value is determined, as appropriate, either by obtaining a current appraisal or evaluation prepared by an independent, qualified appraiser, by obtaining a broker's market value analysis, and finally, if the Company has limited exposure and limited risk of loss, by the opinion of management as supported by an inspection of the property and its most recent tax valuation. Under recent and current market conditions, and periods of declining market values, the Company will generally obtain a new appraisal or evaluation. Any write-down based on the asset's fair value at the date of acquisition or institution of foreclosure is charged to the allowance for loan losses. After acquisition through or in lieu of foreclosure, these assets are carried at their new cost basis. Costs of significant property improvements are capitalized, whereas costs relating to holding the property are expensed as incurred. Appraisals by an independent, qualified appraiser are performed periodically on properties that management deems significant, or evaluations may be performed by management or a qualified third party on properties in the portfolio that are deemed less significant or less vulnerable to market conditions. Subsequent write-downs are recorded as a charge to other expense. Gains or losses on the sale of such properties are included in income when the properties are sold.

Intangible assets

Intangible assets include the excess of the purchase price over the fair value of net assets acquired (goodwill) in the 2007 acquisition of LyndonBank, as well as a core deposit intangible related to the deposits acquired from LyndonBank (see Note 6). The core deposit intangible is amortized on an accelerated basis over 10 years to approximate the pattern of economic benefit to the Company. The Company evaluates the valuation and amortization of the core deposit intangible asset if events occur that could result in possible impairment. Goodwill is reviewed for impairment annually, or more frequently as events or circumstances warrant.

Income taxes

The Company recognizes income taxes under the asset and liability method. Under this method, deferred tax assets and liabilities are established for the temporary differences between the accounting bases and the tax bases of the Company's assets and liabilities at enacted tax rates expected to be in effect when the amounts related to such temporary differences are realized or settled. Adjustments to the Company's deferred tax assets are recognized as deferred income tax expense or benefit based on management's judgments relating to the realizability of such asset.

Mortgage servicing

Servicing assets are recognized as separate assets when rights are acquired through purchase or retained upon the sale of loans. Capitalized servicing rights are reported in other assets and initially recorded at fair value, and are amortized against non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying loans. Servicing rights are periodically evaluated for impairment, based upon the estimated fair value of the rights as compared to amortized cost. Impairment is determined by stratifying the rights by predominant characteristics, such as interest rates and terms. Fair value is determined using prices for similar assets with similar characteristics, when available, or based upon discounted cash flows using market-based assumptions. Impairment is recognized through a valuation allowance and is recorded as amortization of other assets, to the extent that estimated fair value is less than the capitalized amount at the valuation date. Subsequent improvement, if any, in the estimated fair value of impaired mortgage servicing rights is reflected in a positive valuation adjustment and is recognized in other income up to (but not in excess of) the amount of the prior impairment.

Pension costs

Pension costs are charged to salaries and employee benefits expense and accrued over the active service period.

Advertising costs

The Company expenses advertising costs as incurred.

Comprehensive income

Accounting principles generally require recognized revenue, expenses, gains and losses to be included in net income. Certain changes in assets and liabilities, such as the after-tax effect of unrealized gains and losses on available-for-sale securities, are not reflected in the statement of income, but the cumulative effect of such items from period-to-period is reflected as a separate component of the shareholders' equity section of the balance sheet (accumulated other comprehensive income or loss). Other comprehensive income or loss, along with net income, comprises the Company's total comprehensive income.

Preferred stock

The Company has outstanding 25 shares of fixed-to-floating rate non-cumulative perpetual preferred stock, without par value and with a liquidation preference of \$100,000 per share, issued in December 2007. Under the terms of the preferred stock, the Company pays non-cumulative cash dividends quarterly, when, as and if declared by the Board of Directors. Dividends were payable at a fixed rate of 7.50% per annum for the first five years, and beginning in December 2012, are now at a variable dividend rate equal to the Wall Street Journal Prime Rate in effect on the first business day of each quarterly dividend period. The first dividend using the variable rate calculation was payable on March 31, 2013 with a variable rate of 3.25% and that rate remained unchanged throughout 2013.

Earnings per common share

Earnings per common share amounts are computed based on the weighted average number of shares of common stock issued during the period, including Dividend Reinvestment Plan ("DRIP") shares issuable upon reinvestment of dividends (retroactively adjusted for any stock dividends declared) and reduced for shares held in treasury.

The following table illustrates the calculation for the years ended December 31, as adjusted for the cash dividend declared on the preferred stock:

For The Years Ended December 31,	2013	2012
Net income, as reported	\$ 5,086,655	\$ 4,400,690
Less: dividends to preferred shareholders (1)	81,250	187,500
Net income available to common shareholders	<u>\$ 5,005,405</u>	<u>\$ 4,213,190</u>
Weighted average number of common shares used in calculating earnings per share	4,838,185	4,769,645
Earnings per common share	\$ 1.03	\$ 0.88

(1) Reflects a reduction in the dividend rate paid on the preferred stock during 2013, as noted in the section above labeled "Preferred stock".

Off-balance-sheet financial instruments

In the ordinary course of business, the Company is a party to off-balance-sheet financial instruments consisting of commitments to extend credit, commercial and municipal letters of credit, standby letters of credit, and risk-sharing commitments on residential mortgage loans sold through the FHLBB's Mortgage Partnership Finance ("MPF") program. Such financial instruments are recorded in the consolidated financial statements when they are funded.

Transfers of financial assets

Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Reclassification

Certain amounts in the 2012 financial statements have been reclassified to conform to the current year presentation.

Impact of recently issued accounting standards

In December 2011, the FASB issued Accounting Standards Update (ASU) 2011-11, "Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities," amending Topic 210. The amendments require an entity to disclose both gross and net information about both instruments and transactions that are eligible for offset on the balance sheet and instruments and transactions that are subject to an agreement similar to a master netting arrangement. This guidance is effective for annual periods beginning on or after January 1, 2013 and interim periods within those annual periods, with retrospective disclosure for all comparative periods presented. Adoption of ASU 2011-11 did not have a material impact on the Company's consolidated financial statements.

In July 2012, the FASB issued ASU 2012-02, "Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment," amending Topic 350. The guidance allows entities to first perform an optional qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired in order to determine whether the asset should be further evaluated under quantitative impairment testing. The guidance does not revise the requirement that indefinite-lived intangible assets be tested for impairment at least annually, or more frequently if circumstances warrant, although it does revise the examples of events and circumstances that an entity should consider during interim periods. The ASU is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Adoption of ASU 2012-02 did not have a material impact on the Company's consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income." This ASU improves the reporting of reclassifications out of accumulated other comprehensive income. The amendments in the ASU seek to attain that objective by requiring an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under US GAAP to be reclassified in its entirety to net income. For other amounts that are not required under US GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under US GAAP that provide additional detail about those amounts. This guidance is effective for reporting periods beginning after December 15, 2012. Adoption of ASU 2013-02 did not have a material impact on the Company's consolidated financial statements.

In January 2014, FASB issued ASU No. 2014-01, "*Investments – Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects*". The amendments in this Update permit institutions to make accounting policy elections to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). For those investments in qualified affordable housing projects not accounted for using the proportional amortization method, the ASU requires the investment to be accounted for as an equity method investment or a cost method investment. The amendments in this Update should be applied retrospectively to all periods presented. A reporting entity that uses the effective yield method to account for its investments in qualified affordable housing projects before the date of adoption may continue to apply the effective yield method for those preexisting investments. The amendments in this ASU are effective for annual periods and interim reporting periods within those annual periods, beginning after December 15, 2014. Early adoption is permitted. Management has reviewed the ASU and does not believe that it will have a material impact on the Company's consolidated financial statements.

In January 2014, FASB issued ASU No. 2014-04, "*Receivables – Troubled Debt Restructurings by Creditors (Sub Topic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*". The amendments in this Update clarify that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the amendments require disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. The amendments in this Update are effective for annual periods and interim reporting periods within those annual periods, beginning after December 15, 2014. Management has reviewed the ASU and does not believe that it will have a material impact on the Company's consolidated financial statements.

Note 2. Investment Securities

Securities available-for-sale (AFS) and held-to-maturity (HTM) consist of the following:

Securities AFS	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2013				
U.S. Government sponsored enterprise (GSE) debt securities	\$ 29,220,333	\$ 114,102	\$ 195,521	\$ 29,138,914
U.S. Government securities	6,040,188	10,955	1,455	6,049,688

December 31, 2013				
States and political subdivisions	\$ 37,936,911	\$ 433,089	\$ 0	\$ 38,370,000
December 30, 2012				
States and political subdivisions	\$ 41,865,555	\$ 425,445	\$ 0	\$ 42,291,000

*Method used to determine fair value rounds values to nearest thousand.

The entire balance under "Securities HTM - States and political subdivisions" consists of securities of local municipalities which are attributable to municipal financing transactions directly with the Company. The reported fair value of these securities is an estimate based on an analysis that takes into account future maturities and scheduled future repricing. The Company anticipates no losses on these securities and expects to hold them until their maturity.

Securities AFS with a book value of \$33,275,039 and \$40,625,821 and a fair value of \$33,235,708 and \$40,886,059 at December 31, 2013 and 2012, respectively, were pledged as collateral for larger dollar repurchase agreement accounts and for other purposes as required or permitted by law.

Proceeds from sales of securities AFS were \$9,095,380 in 2013 and \$36,421,608 in 2012 with gains of \$2,566 in 2013 compared to \$351,301 in 2012 and losses of \$8,087 and \$0 in 2013 and 2012, respectively.

The carrying amount and estimated fair value of securities by contractual maturity are shown below. Expected maturities will differ from contractual maturities because issuers may call or prepay obligations with or without call or prepayment penalties, pursuant to contractual terms.

The scheduled maturities of debt securities AFS at December 31, 2013 were as follows:

	<u>Amortized Cost</u>	<u>Fair Value</u>
Due in one year or less	\$ 4,508,181	\$ 4,510,923
Due from one to five years	30,752,340	30,677,679
	<u>\$ 35,260,521</u>	<u>\$ 35,188,602</u>

The scheduled maturities of debt securities HTM at December 31, 2013 were as follows:

	<u>Amortized Cost</u>	<u>Fair Value*</u>
Due in one year or less	\$ 27,615,731	\$ 27,616,000
Due from one to five years	3,939,950	4,048,000
Due from five to ten years	2,592,045	2,700,000
Due after ten years	3,789,185	4,006,000
	<u>\$ 37,936,911</u>	<u>\$ 38,370,000</u>

*Method used to determine fair value rounds values to nearest thousand.

Investments with a continuous loss position more than 12 months consisted of one U.S. GSE security with a fair value of \$1,004,235 and an unrealized loss of \$1,333 in 2013, with none reported for 2012.

Investments with unrealized losses less than 12 months at December 31 were as follows:

	<u>2013</u>		<u>2012</u>	
	<u>Fair Value</u>	<u>Unrealized Losses</u>	<u>Fair Value</u>	<u>Unrealized Losses</u>
U.S. GSE debt securities	\$ 11,094,830	\$ 194,188	\$ 8,715,492	\$ 13,936
U.S. Government securities	1,034,336	1,455	1,052,639	1,072
	<u>\$ 12,129,166</u>	<u>\$ 195,643</u>	<u>\$ 9,768,131</u>	<u>\$ 15,008</u>

The unrealized losses are a result of changes in market interest rates and not of deterioration in the creditworthiness of the issuer. At December 31, 2013, there were 11 U.S. GSE securities and one U.S. Government security in the investment portfolio that were in an unrealized loss position compared to eight U.S. GSE securities and one U.S. Government security at December 31, 2012.

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market conditions, or adverse developments relating to the issuer, warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and the results of reviews of the issuer's financial condition.

As the Company has the ability to hold its debt securities until maturity, or for the foreseeable future if classified as AFS, and it is more likely than not that the Company will not have to sell such securities before recovery of their cost basis, no declines in such securities were deemed to be other-than-temporary at December 31, 2013 and 2012.

The Bank is a member of the FHLBB. The FHLBB is a cooperatively owned wholesale bank for housing and finance in the six New England States. Its mission is to support the residential mortgage and community-development lending activities of its members, which include over 450 financial institutions across New England. As a requirement of membership in the FHLBB, the Bank must own a minimum required amount of FHLBB stock, calculated periodically based primarily on the Bank's level of borrowings from the FHLBB. The Company obtains much of its wholesale funding from the FHLBB. As of December 31, 2013 and 2012, the Company's investment in FHLBB stock was \$3,044,700 and \$3,433,200, respectively. As a member of the FHLBB, the Company is also subject to future capital calls by the FHLBB in order to maintain compliance with its capital plan.

FHLBB stock is a non-marketable equity security and therefore is reported at cost, which equals its par value. Shares held in excess of the minimum required amount are generally redeemable at par value. In the first quarter of 2012, the FHLBB announced the termination of a moratorium on member stock redemptions that it had instituted in 2009 in order to preserve its capital in response to adverse market conditions and declining retained earnings.

In February, 2011, FHLBB announced its intention to declare modest cash dividends beginning in 2011 after a brief period (2008 – 2010) of no dividends. The Company had dividend income on its FHLBB stock of \$12,214 in 2013 and \$17,892 in 2012.

The Company periodically evaluates its investment in FHLBB stock for impairment based on, among other factors, the capital adequacy of the FHLBB and its overall financial condition. No impairment losses have been recorded through December 31, 2013. The Bank will continue to monitor its investment in FHLBB stock.

Note 3. Loans, Allowance for Loan Losses and Credit Quality

The composition of net loans at December 31 was as follows:

	<u>2013</u>	<u>2012</u>

Interest income recognized on impaired loans is immaterial for all periods presented.

As of the balance sheet dates, the Company was not contractually committed to lend additional funds to debtors with impaired, non-accrual or restructured loans.

Credit Quality Grouping

In developing the allowance for loan losses, management uses credit quality grouping to help evaluate trends in credit quality. The Company groups credit risk into Groups A, B and C. The manner the Company utilizes to assign risk grouping is driven by loan purpose. Commercial purpose loans are individually risk graded while the retail portion of the portfolio is generally grouped by delinquency pool.

Group A loans - Acceptable Risk— are loans that are expected to perform as agreed under their respective terms. Such loans carry a normal level of risk that does not require management attention beyond that warranted by the loan or loan relationship characteristics, such as loan size or relationship size. Group A loans include commercial purpose loans that are individually risk rated and retail loans that are rated by pool. Group A retail loans include both performing consumer and residential real estate loans. Residential real estate loans are loans to individuals secured by 1-4 family homes, including first mortgages, home equity and home improvement loans. Loan balances fully secured by deposit accounts or that are fully guaranteed by the Federal Government are considered acceptable risk.

Group B loans – Management Involved - are loans that require greater attention than the acceptable loans in Group A. Characteristics of such loans may include, but are not limited to, borrowers that are experiencing negative operating trends such as reduced sales or margins, borrowers that have exposure to adverse market conditions such as increased competition or regulatory burden, or borrowers that have had unexpected or adverse changes in management. These loans have a greater likelihood of migrating to an unacceptable risk level if these characteristics are left unchecked. Group B is limited to commercial purpose loans that are individually risk rated.

Group C loans – Unacceptable Risk – are loans that have distinct shortcomings that require a greater degree of management attention. Examples of these shortcomings include a borrower's inadequate capacity to service debt, poor operating performance, or insolvency. These loans are more likely to result in repayment through collateral liquidation. Group C loans range from those that are likely to sustain some loss if the shortcomings are not corrected, to those for which loss is imminent and non-accrual treatment is warranted. Group C loans include individually rated commercial purpose loans, and retail loans adversely rated in accordance with the Federal Financial Institutions Examination Council's Uniform Retail Credit Classification Policy. Group C retail loans include 1-4 family residential real estate loans and home equity loans past due 90 days or more with loan-to-value ratios greater than 60%, home equity loans 90 days or more past due where the bank does not hold first mortgage, irrespective of loan-to-value, loans in bankruptcy where repayment is likely but not yet established, and lastly consumer loans that are 90 days or more past due.

Commercial purpose loan ratings are assigned by the commercial account officer; for larger and more complex commercial loans, the credit rating is a collaborative assignment by the lender and the credit analyst. The credit risk rating is based on the borrower's expected performance, i.e., the likelihood that the borrower will be able to service its obligations in accordance with the loan terms. Credit risk ratings are meant to measure risk versus simply record history. Assessment of expected future payment performance requires consideration of numerous factors. While past performance is part of the overall evaluation, expected performance is based on an analysis of the borrower's financial strength, and historical and projected factors such as size and financing alternatives, capacity and cash flow, balance sheet and income statement trends, the quality and timeliness of financial reporting, and the quality of the borrower's management. Other factors influencing the credit risk rating to a lesser degree include collateral coverage and control, guarantor strength and commitment, documentation, structure and covenants and industry conditions. There are uncertainties inherent in this process.

Credit risk ratings are dynamic and require updating whenever relevant information is received. The risk ratings of larger or more complex loans, and Group B and C rated loans, are assessed at the time of their respective annual reviews, during quarterly updates, in action plans or at any other time that relevant information warrants update. Lenders are required to make immediate disclosure to the Chief Credit Officer of any known increase in loan risk, even if considered temporary in nature.

The risk ratings within the loan portfolio by segments as of the balance sheet dates were as follows:

As of December 31, 2013

Group B	593,838	4,139,367	404,752	318,248	0	5,456,205
Group C	1,000,872	4,024,394	2,833,564	548,355	9,747	8,416,932
Total	<u>\$ 49,283,948</u>	<u>\$139,807,517</u>	<u>\$169,612,809</u>	<u>\$ 47,029,023</u>	<u>\$ 10,642,151</u>	<u>\$416,375,448</u>

Modifications of Loans and TDRs

A loan is classified as a TDR if, for economic or legal reasons related to a borrower's financial difficulties, the Company grants a concession to the borrower that it would not otherwise consider.

The Company is deemed to have granted such a concession if it has modified a troubled loan in any of the following ways:

- Reduced accrued interest
- Reduced the original contractual interest rate to a rate that is below the current market rate for the borrower;
- Converted a variable-rate loan to a fixed-rate loan;
- Extended the term of the loan beyond an insignificant delay;
- Deferred or forgiven principal in an amount greater than three months of payments; or,
- Performed a refinancing and deferred or forgiven principal on the original loan.

An insignificant delay or insignificant shortfall in the amount of payments typically would not require the loan to be accounted for as a TDR. However, pursuant to regulatory guidance, any payment delay longer than three months is generally not considered insignificant. The assessment of whether a concession has been granted also takes into account payments expected to be received from third parties, including third-party guarantors, provided that the third party has the ability to perform on the guarantee.

The Company's TDRs are principally a result of extending loan repayment terms to relieve cash flow difficulties. The Company has only, on a limited basis, reduced interest rates for borrowers below the current market rate for the borrower. The Company has not forgiven principal or reduced accrued interest within the terms of original restructurings, nor has it converted variable rate terms to fixed rate terms. However, the Company evaluates each TDR situation on its own merits and does not foreclose the granting of any particular type of concession.

TDRs by segment for the periods presented were as follows:

For the year ended December 31, 2013

	Number of Contracts	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Residential real estate - 1st lien	4	\$ 321,406	\$ 330,266
Residential real estate - Jr lien	1	23,425	23,425
Total	<u>5</u>	<u>\$ 344,831</u>	<u>\$ 353,691</u>

For the year ended December 31, 2012

	Number of Contracts	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Commercial real estate	2	\$ 1,030,645	\$ 1,030,645
Residential real estate - 1st lien	3	200,241	205,588
Total	<u>5</u>	<u>\$ 1,230,886</u>	<u>\$ 1,236,233</u>

There were no TDRs for which there was a payment default under the restructured terms during the twelve month period ended December 31, 2012. The TDRs for which there was a payment default during the twelve month period ended December 31, 2013 were as follows:

	Number of Contracts	Recorded Investment
Residential real estate - 1st lien	<u>2</u>	<u>\$ 213,342</u>

TDRs are treated as other impaired loans and carry individual specific reserves with respect to the calculation of the allowance for loan losses. These loans are categorized as non-performing, may be past due, and are generally adversely risk rated. The TDRs that have defaulted under their restructured terms are generally in collection status and their reserve is typically calculated using the fair value of collateral method. At December 31, 2013 and 2012, the specific allowance related to TDRs was approximately \$5,800 and \$23,000, respectively.

At December 31, 2013, the Company did not have any commitments to lend additional funds to borrowers with loans classified as TDRs.

Note 4. Loan Servicing

Mortgage loans serviced for others are not included in the accompanying consolidated balance sheets. The unpaid principal balances of mortgage loans serviced for others were \$193,751,501 and \$198,438,802 at December 31, 2013 and 2012, respectively. Net gain realized on the sale of loans was \$778,203 and \$1,375,689 for the years ended December 31, 2013 and 2012, respectively.

Changes in mortgage servicing rights for the years ended December 31 are summarized as follows:

	<u>2013</u>	<u>2012</u>
Balance at beginning of year	\$ 1,009,623	\$ 1,097,442
Mortgage servicing rights capitalized	274,253	406,807
Mortgage servicing rights amortized	(317,865)	(409,584)
Change in valuation allowance	363,068	(85,042)
Balance at end of year	<u>\$ 1,329,079</u>	<u>\$ 1,009,623</u>

Note 5. Bank Premises and Equipment

The major classes of bank premises and equipment and accumulated depreciation and amortization at December 31 were as follows:

	<u>2013</u>	<u>2012</u>
Buildings and improvements	\$ 10,896,563	\$ 10,762,761
Land and land improvements	2,408,921	2,403,921
Furniture and equipment	7,797,907	7,340,676
Leasehold improvements	1,316,386	1,302,395
Capital leases	976,907	976,907
Other prepaid assets	28,661	175,507
	<u>23,425,345</u>	<u>22,962,167</u>
Less accumulated depreciation and amortization	(11,701,877)	(10,718,847)
	<u>\$ 11,723,468</u>	<u>\$ 12,243,320</u>

The Company is obligated under non-cancelable operating leases for bank premises expiring in various years through 2018, with options to renew. Minimum future rental payments for these leases with original terms in excess of one year as of December 31, 2013 for each of the next five years and in aggregate are:

2014	\$ 153,900
2015	129,845
2016	61,817
2017	6,817
2018	6,817
	<u>\$ 359,196</u>

Total rental expense amounted to \$231,575 and \$230,756 for the years ended December 31, 2013 and 2012, respectively.

Capital lease obligations

The following is a schedule by years of future minimum lease payments under capital leases, together with the present value of the net minimum lease payments as of December 31, 2013:

2014	\$ 126,255
2015	129,755
2016	129,755
2017	133,255
2018	138,155
Subsequent to 2018	282,501
Total minimum lease payments	939,676
Less amount representing interest	(228,634)
Present value of net minimum lease payments	<u>\$ 711,042</u>

Note 6. Goodwill and Other Intangible Asset

As a result of the merger with LyndonBank on December 31, 2007, the Company recorded goodwill amounting to \$11,574,269. The goodwill is not amortizable and is not deductible for tax purposes.

The Company also recorded \$4,161,000 of acquired identified intangible assets representing the core deposit intangible, which is subject to amortization as a non-interest expense over a ten year period. The accumulated amortization expense was \$3,070,219 and \$2,797,524 as of December 31, 2013 and 2012, respectively.

The amortization expense related to the remaining core deposit intangible at December 31, 2013 is expected to be as follows:

2014	\$ 272,695
2015	272,695
2016	272,695
2017	272,696
Total remaining core deposit intangible expense	<u>\$ 1,090,781</u>

Management evaluated goodwill for impairment at December 31, 2013 and 2012 and concluded that no impairment existed as of such dates.

Note 7. Other Investments

In 2011 the Company established a single-member LLC to facilitate the purchase of federal NMTC through an investment structure designed by a local community development entity. The LLC does not conduct any business apart from its role in the NMTC financing structure. The NMTC equity investment generated tax credits of \$170,750 for each of the years ended December 31, 2013 and 2012, with an amortization expense of \$101,390 and \$39,662, respectively. The carrying value of the NMTC equity investment was \$683,690 and \$785,080 at December 31, 2013 and 2012, respectively, and is included in other assets in the consolidated balance sheets.

The Company purchases from time to time interests in various limited partnerships established to acquire, own and rent residential housing for low and moderate income Vermonters located in northeastern and central Vermont. The tax credits from these investments were \$531,973 for the year ended December 31, 2013 and \$1,157,541 for the year ended December 31, 2012. Expenses related to amortization of the investments in the limited partnerships are recognized as a component of other expenses, and were \$473,842 and \$1,175,177 for 2013 and 2012, respectively. The carrying values of the limited partnership investments were \$2,334,709 and \$2,808,551 at December 31, 2013 and 2012, respectively, and are included in other assets.

The Bank has a one-third ownership interest in a non-depository trust company, CFSG, based in Newport, Vermont, which is held indirectly through Community Financial Services Partners, LLC ("CFSG Partners"), a Vermont LLC that owns 100% of the LLC equity interests of CFSG. The Bank accounts for its investment in CFSG Partners under the equity method of accounting. The Company's investment in CFSG Partners, included in other assets, amounted to \$953,912 as of December 31, 2013 and \$666,661 as of December 31, 2012. The Company recognized income of \$287,252 for 2013 and income of \$149,715 for 2012 through CFSG Partners from the operations of CFSG.

Note 8. Time Deposits

The following is a maturity distribution of time deposits at December 31, 2013:

2014	\$ 72,000,665
2015	22,543,863
2016	13,038,884
2017	9,516,281
2018	3,851,846
Total time deposits	<u>\$120,951,539</u>

Note 9. Borrowed Funds

Borrowings from the FHLBB as of December 31 were as follows:

	<u>2013</u>	<u>2012</u>
Long-Term Borrowings		
FHLBB term borrowing, 1.71% fixed rate, due January 28, 2013	<u>\$ 0</u>	<u>\$ 6,000,000</u>

The Company maintained a \$500,000 IDEAL Way Line of Credit with the FHLBB at December 31, 2013 and 2012, with no outstanding advances under this line at either year-end date. Interest on these borrowings is at a rate determined daily by the FHLBB and payable monthly.

Borrowings from the FHLBB are secured by a blanket lien on qualified collateral consisting primarily of loans with first mortgages secured by 1-4 family residential properties. Qualified collateral for these borrowings totaled \$114,886,791 and \$116,101,167 as of December 31, 2013 and 2012, respectively. As of December 31, 2013 and 2012, the Company's potential borrowing capacity was \$72,556,030 and \$72,591,692, respectively, reduced by outstanding advances and collateral pledges.

Under a separate agreement, the Company has the authority to collateralize public unit deposits, up to its available borrowing capacity, with letters of credit issued by the FHLBB. At December 31, 2013, \$20,800,000 in FHLBB letters of credit was utilized as collateral for these deposits compared to \$15,800,000 at December 31, 2012. Total fees paid by the Company in connection with issuance of these letters of credit were \$43,654 for 2013 and \$41,749 for 2012.

The Company also has a line of credit with the FRBB, which is intended to be used as a contingency funding source. For this Borrower-in-Custody arrangement, the Company pledged eligible commercial and industrial loans, commercial real estate loans and home equity loans, resulting in an available line of \$74,929,216 and \$71,345,734 as of December 31, 2013 and 2012, respectively. Credit advances in the FRBB lending program are overnight advances with interest chargeable at the primary credit rate (generally referred to as the discount rate), which was 75 basis points as of December 31, 2013. As of December 31, 2013 and 2012, the Company had no outstanding advances against this line.

The Company has an unsecured line with one of its correspondent banks with an available line of \$3,000,000 at December 31, 2013 and 2012.

Note 10. Junior Subordinated Debentures

As of December 31, 2013 and 2012, the Company had outstanding \$12,887,000 principal amount of Junior Subordinated Debentures due 2037 (the "Debentures"). The Debentures bore a fixed annual interest rate of 7.56% through December 15, 2012, and thereafter a floating rate equal to the 3-month London Interbank Offered Rate (LIBOR) plus 2.85%. During 2013 the floating rate approximated 3.13% per quarter. The Debentures mature on December 15, 2037 and are subordinated and junior in right of payment to all senior indebtedness of the Company, as defined in the Indenture dated as of October 31, 2007 between the Company and Wilmington Trust Company, as Trustee. The Debentures first became redeemable, in whole or in part, by the Company on December 15, 2012. Interest paid on the Debentures for 2013 and 2012 was \$409,938 and \$974,257, respectively, and is deductible for tax purposes.

The Debentures were issued and sold to CMTV Statutory Trust I (the "Trust"). The Trust is a special purpose trust funded by a capital contribution of \$387,000 from the Company, in exchange for 100% of the Trust's common equity. The Trust was formed for the purpose of issuing corporation-obligated mandatorily redeemable Capital Securities ("Capital Securities") in the principal amount of \$12.5 million to third-party investors and using the proceeds from the sale of such Capital Securities and the Company's initial capital contribution to purchase the Debentures. The Debentures are the sole asset of the Trust. Distributions on the Capital Securities issued by the Trust are payable quarterly at a rate per annum equal to the interest rate being earned by the Trust on the Debentures. The Capital Securities are subject to mandatory redemption, in whole or in part, upon repayment of the Debentures. The Company has entered into an agreement which, taken collectively, fully and unconditionally guarantees the payments on the Capital Securities, subject to the terms of the guarantee.

The Debentures are currently includable in the Company's Tier 1 capital up to 25% of core capital elements (see Note 20).

Note 11. Repurchase Agreements

Securities sold under agreements to repurchase amounted to \$29,644,615 and \$34,149,608 as of December 31, 2013 and 2012, respectively. These agreements were collateralized by U.S. GSE securities and U.S. Treasury notes with a book value of \$33,275,039 and \$40,625,821 and a fair value of \$33,235,708 and \$40,886,059 at December 31, 2013 and 2012, respectively.

The average daily balance of these repurchase agreements was \$28,537,504 and \$26,383,409 during 2013 and 2012, respectively. The maximum borrowings outstanding on these agreements at any month-end reporting period of the Company were \$34,539,586 and \$34,149,608 during 2013 and 2012, respectively. These repurchase agreements mature daily and carried a weighted average interest rate of 0.39% during 2013 and 0.55% during 2012.

Note 12. Income Taxes

The Company prepares its federal income tax return on a consolidated basis. Federal income taxes are allocated to members of the consolidated group based on taxable income.

Federal income tax expense (benefit) for the years ended December 31 was as follows:

	<u>2013</u>	<u>2012</u>
Currently paid or payable	\$ 1,533,835	\$ 92,482
Deferred benefit	(402,748)	(231,970)
Total income tax expense (benefit)	<u>\$ 1,131,087</u>	<u>\$ (139,488)</u>

Total income tax expense (benefit) differed from the amounts computed at the statutory federal income tax rate of 34 percent primarily due to the following for the years ended December 31:

	<u>2013</u>	<u>2012</u>
Computed expense at statutory rates	\$ 2,079,560	\$ 1,448,808
Tax exempt interest & BOLI	(388,524)	(379,715)
Disallowed interest	14,661	20,169
Partnership tax credits	(644,668)	(1,260,200)
New markets tax credit amortization expense	101,390	26,177
Other	(31,332)	5,273
	<u>\$ 1,131,087</u>	<u>\$ (139,488)</u>

The deferred income tax benefit consisted of the following items for the years ended December 31:

	<u>2013</u>	<u>2012</u>
Depreciation	\$ (18,120)	\$ (37,653)
Mortgage servicing rights	108,616	(29,859)
Deferred compensation	(18,090)	(22,827)
Bad debts	(254,234)	(249,202)
Non-accrual loan interest	(5,590)	73,065
Limited partnership amortization	27,529	(340,021)
Investment in CFSG Partners	43,864	44,991
Fair value adjustment on acquired premises and equipment	0	153,862
Core deposit intangible	(92,716)	(115,896)
Loan fair value	(7,165)	(18,031)
Fannie Mae preferred stock write down	0	779,578
Alternative minimum tax	0	59,031
OREO write down	(15,130)	0
Tax credit carryovers	(170,865)	(604,096)
Other	(847)	75,088
Change in deferred tax benefit	<u>\$ (402,748)</u>	<u>\$ (231,970)</u>

Listed below are the significant components of the net deferred tax asset at December 31:

	<u>2013</u>	<u>2012</u>
Components of the deferred tax asset:		
Bad debts	\$ 1,650,671	\$ 1,396,437
Non-accrual loan interest	32,497	26,907
Deferred compensation	263,127	245,037
Limited partnerships	57,212	84,741
Contingent liability - MPF program	45,042	40,526
OREO write down	15,130	0
Capital leases	73,424	71,041
Tax and rehab credit carryforwards	774,961	604,096
Unrealized loss on securities available-for-sale	24,452	0
Other	28,737	34,789
Total deferred tax asset	<u>\$ 2,965,253</u>	<u>\$ 2,503,574</u>
Components of the deferred tax liability:		
Depreciation	242,487	260,607
Mortgage servicing rights	451,887	343,271
Unrealized gain on securities available-for-sale	0	88,482
Investment in CFSG Partners	88,855	44,991
Core deposit intangible	370,866	463,582
Fair value adjustment on acquired loans	47,348	54,513
Total deferred tax liability	<u>1,201,443</u>	<u>1,255,446</u>
Net deferred tax asset	<u>\$ 1,763,810</u>	<u>\$ 1,248,128</u>

US GAAP provides for the recognition and measurement of deductible temporary differences (including general valuation allowances) to the extent that it is more likely than not that the deferred tax asset will be realized.

The net deferred tax asset is included in other assets in the consolidated balance sheets.

ASC Topic 740, "Income Taxes", defines the criteria that an individual tax position must satisfy for some or all of the benefits of that position to be recognized in a company's financial statements. Topic 740 prescribes a recognition threshold of more-likely-than-not, and a measurement attribute for all tax positions taken or expected to be taken on a tax return, in order for those tax positions to be recognized in the consolidated financial statements. The Company has adopted these provisions and there was no material effect on the consolidated financial statements. The Company is currently open to audit under the statute of limitations by the Internal Revenue Service for the years ended December 31, 2010 through 2012.

Note 13. 401(k) and Profit-Sharing Plan

The Company has a defined contribution plan covering all employees who meet certain age and service requirements. The pension expense was \$551,577 and \$481,875 for 2013 and 2012, respectively. These amounts represent discretionary matching contributions of a portion of the voluntary employee salary deferrals under the 401(k) plan and discretionary profit-sharing contributions under the plan.

Note 14. Deferred Compensation and Supplemental Employee Retirement Plans

The Company maintains a directors' deferred compensation plan and, prior to 2005, maintained a retirement plan for its directors. Participants are general creditors of the Company with respect to these benefits. The benefits accrued under these plans were \$399,379 and \$413,884 at December 31, 2013 and 2012, respectively. Expenses associated with these plans were \$26,996 and \$24,199 for the years ended December 31, 2013 and 2012, respectively.

The Company also maintains a supplemental employee retirement plan for certain key employees of the Company. Benefits accrued under this plan were \$374,523 and \$306,815 at December 31, 2013 and 2012, respectively. The expense associated with this plan was \$67,708 and \$62,940 for the years ended December 31, 2013 and 2012, respectively.

Note 15. Financial Instruments with Off-Balance-Sheet Risk

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to extend credit, standby letters of credit and financial guarantees, commitments to sell loans and risk-sharing commitments on certain sold loans. Such instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheet. The contract or notional amounts of those instruments reflect the maximum extent of involvement the Company has in particular classes of financial instruments.

The Company's maximum exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit and financial guarantees written is represented by the contractual notional amount of those instruments. The Company applies the same credit policies and underwriting criteria in making commitments and conditional obligations as it does for on-balance-sheet instruments.

The Company generally requires collateral or other security to support financial instruments with credit risk. At December 31, the following off balance sheet financial instruments representing credit risk were outstanding:

	Contract or Notional Amount	
	2013	2012
Unused portions of home equity lines of credit	\$ 21,961,527	\$ 21,120,077
Other commitments to extend credit	41,230,202	45,551,282
Residential construction lines of credit	2,010,417	1,138,872
Commercial real estate and other construction lines of credit	15,592,702	1,762,424
Standby letters of credit and commercial letters of credit	1,655,469	1,193,480
Recourse on sale of credit card portfolio	276,650	352,000
MPF credit enhancement obligation, net (See Note 16)	1,543,211	2,035,858

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future funding requirements. At December 31, 2013 and 2012, the Company had binding loan commitments to sell residential mortgages at fixed rates totaling \$373,500 and \$3,395,249, respectively (see Note 16). The recourse provision under the terms of the sale of the Company's credit card portfolio in 2007 is based on total lines, not balances outstanding. Based on historical losses, the Company does not expect any significant losses from this commitment.

The Company evaluates each customer's credit-worthiness on a case-by-case basis. The amount of collateral obtained if deemed necessary by the Company upon extension of credit, or a commitment to extend credit, is based on management's credit evaluation of the counter-party. Collateral held varies but may include real estate, accounts receivable, inventory, property, plant and equipment, and income-producing commercial properties.

Standby letters of credit and financial guarantees written are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers. The fair value of standby letters of credit has not been included in the balance sheets as the fair value is immaterial.

In connection with its trust preferred securities financing completed on October 31, 2007, the Company guaranteed the payment obligations under the capital securities of its subsidiary, CMTV Statutory Trust I. The source of funds for payments by the Trust on its capital trust securities is payments made by the Company on its debentures issued to the Trust. The Company's obligation under those debentures is fully reflected in the Company's consolidated balance sheet, in the amount of \$12,887,000 at December 31, 2013 and 2012. Of this amount, \$12,500,000 represents external financing through the issuance to investors of Capital Securities by CMTV Statutory Trust I (See Note 10).

Note 16. Contingent Liability

The Company sells first lien 1-4 family residential mortgage loans under the MPF program with FHLBB. Under this program the Company shares in the credit risk of each mortgage loan, while receiving fee income in return. The Company is responsible for a Credit Enhancement Obligation (CEO) based on the credit quality of these loans. FHLBB funds a First Loss Account (FLA) based on the Company's outstanding MPF mortgage balances. This creates a ladder approach to sharing in any losses. In the event of default, homeowner's equity and private mortgage insurance, if any, are the first sources of repayment; the FHLBB's FLA funds are then utilized, followed by the participant's CEO, with the balance of losses absorbed by FHLBB. These loans must meet specific underwriting standards of the FHLBB. As of December 31, 2013 and 2012, the Company had \$50,925,686 and \$53,255,305, respectively, in loans sold through the MPF program and on which the Company had a CEO. As of December 31, 2013, the notional amount of the maximum CEO related to this program was \$1,675,687 compared to \$2,155,052 as of December 31, 2012. The Company had accrued a contingent liability for this CEO in the amount of \$132,476 and \$119,194 as of December 31, 2013 and 2012, respectively, which is calculated by management based on the methodology used in calculating the allowance for loan losses, adjusted to reflect the risk sharing arrangements with the FHLBB.

Note 17. Legal Proceedings

In the normal course of business, the Company is involved in various claims and legal proceedings. In the opinion of the Company's management, after consulting with the Company's legal counsel, any liabilities resulting from such proceedings are not expected to be material to the Company's consolidated financial condition or results of operations.

Note 18. Transactions with Related Parties

The Company has had, and may be expected to have in the future, banking transactions in the ordinary course of business with directors, principal officers, their immediate families and affiliated companies in which they are principal shareholders (commonly referred to as related parties), all of which have been, in the opinion of management, made on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with others and which do not represent more than the normal risk of collectibility, or present other unfavorable features.

Aggregate loan transactions with related parties as of December 31 were as follows:

	<u>2013</u>	<u>2012</u>
Balance, beginning of year	\$ 7,063,713	\$ 5,998,756
New loans to related parties	7,619,387	36,354,194
Repayment*	<u>(7,153,153)</u>	<u>(35,289,237)</u>
Balance, end of year	<u>\$ 7,529,947</u>	<u>\$ 7,063,713</u>

*Includes loans sold to the secondary market.

Total deposits with related parties were \$5,382,564 and \$7,901,009 at December 31, 2013 and 2012, respectively.

The Company leases 2,253 square feet of condominium space in the state office building on Main Street in Newport, Vermont to its trust company affiliate, CFSG, for its principal offices. CFSG also leases offices in the Company's Barre and Lyndonville branches. The amount of rental income received from CFSG for the years ended December 31, 2013 and 2012 was \$37,062 and \$37,177, respectively.

The Company utilizes the services of CFSG as an investment advisor for the Company's 401(k) plan. The Human Resources committee of the Board of Directors is the Trustee of the plan, and CFSG provides investment advice for the plan. CFSG also acts as custodian of the retirement funds and makes investments on behalf of the plan and its participants. The Company pays monthly management fees to CFSG based on the market value of the total assets under management. The amount paid to CFSG for the years ended December 31, 2013 and 2012 was \$45,892 and \$36,318, respectively.

Note 19. Restrictions on Cash and Due From Banks

Due to a change in FRBB policies that took effect in 2012, the Company was not required to maintain reserve balances in cash at the FRBB due to its vault cash balances at December 31, 2013 and 2012.

In the ordinary course of business the Company may, from time to time, maintain amounts due from correspondent banks that exceed federally insured limits. However, no losses have occurred in these accounts and the Company believes it is not exposed to any significant risk with respect to such accounts. The Company was required to maintain contracted balances with other correspondent banks of \$462,500 at December 31, 2013 and 2012. Of the \$462,500 balance, \$262,500 was a separate agreed upon "impressed" balance to avoid monthly charges on the Company's current federal funds liquidity line.

Note 20. Regulatory Capital Requirements

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory - and possibly additional discretionary - actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items, as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action capital requirements are applicable to banks, but not bank holding companies.

Under current regulations, the Company and the Bank are required to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital (as defined) to average assets (as defined). The Company's non-cumulative Series A preferred stock (\$2.5 million liquidation preference) is includable without limitation in its Tier 1 capital. The Company is allowed to include in Tier 1 capital an amount of trust preferred securities equal to no more than 25% of the sum of all core capital elements, which is generally defined as shareholders' equity, less certain intangibles, including goodwill and the core deposit intangible, net of any related deferred income tax liability, with the balance includable in Tier 2 capital. Management believes that, as of December 31, 2013, the Company and the Bank met all capital adequacy requirements to which they are currently subject.

As of December 31, 2013 the Bank was considered well capitalized under the regulatory capital framework for Prompt Corrective Action and the Company exceeded applicable consolidated regulatory capital guidelines.

The following table shows the regulatory capital ratios for the Company and the Bank as of December 31:

	Actual		Minimum For Capital Adequacy Purposes:		Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions:	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(Dollars in Thousands)						
December 31, 2013						
Total capital (to risk-weighted assets)						
Company	\$ 51,304	13.09%	\$ 31,365	8.00%	N/A	N/A
Bank	\$ 50,765	12.97%	\$ 31,314	8.00%	\$ 39,143	10.00%
Tier I capital (to risk-weighted assets)						
Company	\$ 45,027	11.48%	\$ 15,682	4.00%	N/A	N/A
Bank	\$ 45,873	11.72%	\$ 15,657	4.00%	\$ 23,486	6.00%
Tier I capital (to average assets)						
Company	\$ 45,027	8.04%	\$ 22,409	4.00%	N/A	N/A
Bank	\$ 45,873	8.20%	\$ 22,386	4.00%	\$ 27,983	5.00%
December 31, 2012:						
Total capital (to risk-weighted assets)						
Company	\$ 47,385	12.57%	\$ 30,164	8.00%	N/A	N/A
Bank	\$ 46,796	12.44%	\$ 30,099	8.00%	\$ 37,623	10.00%
Tier I capital (to risk-weighted assets)						
Company	\$ 40,724	10.80%	\$ 15,082	4.00%	N/A	N/A
Bank	\$ 42,440	11.28%	\$ 15,049	4.00%	\$ 22,574	6.00%
Tier I capital (to average assets)						
Company	\$ 40,724	7.27%	\$ 22,416	4.00%	N/A	N/A
Bank	\$ 42,440	7.58%	\$ 22,387	4.00%	\$ 27,984	5.00%

The Company's ability to pay dividends to its shareholders is largely dependent on the Bank's ability to pay dividends to the Company. The Bank is restricted by law as to the amount of dividends that can be paid. Dividends declared by national banks that exceed net income for the current and preceding two years must be approved by the Bank's primary banking regulator, the Office of the Comptroller of the Currency ("OCC"). Regardless of formal regulatory restrictions, the Bank may not pay dividends that would result in its capital levels being reduced below the minimum requirements shown above.

Note 21. Fair Value

Certain assets and liabilities are recorded at fair value to provide additional insight into the Company's quality of earnings. The fair values of some of these assets and liabilities are measured on a recurring basis while others are measured on a nonrecurring basis, with the determination based upon applicable existing accounting pronouncements. For example, securities available-for-sale are recorded at fair value on a recurring basis. Other assets, such as mortgage servicing rights, loans held-for-sale, and impaired loans, are recorded at fair value on a nonrecurring basis using the lower of cost or market methodology to determine impairment of individual assets. The Company groups assets and liabilities which are recorded at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. The level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement (with Level 1 considered highest and Level 3 considered lowest). A brief description of each level follows.

Level 1	Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as U.S. Treasury, other U.S. Government and agency mortgage-backed debt securities that are highly liquid and are actively traded in over-the-counter markets.
Level 2	Observable inputs other than Level 1 prices such as quoted prices for similar assets and liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes mortgage servicing rights, impaired loans and OREO.
Level 3	Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The following methods and assumptions were used by the Company in estimating its fair value measurements and disclosures:

Cash and cash equivalents: The carrying amounts reported in the balance sheet for cash and cash equivalents approximate their fair values. As such, the Company classifies these financial instruments as Level 1.

Securities Available-for-Sale and Held-to-Maturity: Fair value measurement is based upon quoted prices for similar assets, if available. If quoted prices are not available, fair values are measured using matrix pricing models, or other model-based valuation techniques requiring observable inputs other than quoted prices such as yield curves, prepayment speeds and default rates. Level 1 securities would include U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. Level 2 securities include federal agency securities and securities of local municipalities.

Restricted equity securities: Restricted equity securities are comprised of FRBB stock and FHLBB stock. These securities are carried at cost, which is believed to approximate fair value, based on the redemption provisions of the FRBB and the FHLBB. The stock is nonmarketable, and redeemable at par value, subject to certain conditions. As such the Company classifies these securities as Level 2.

Loans and loans held-for-sale: For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying amounts. The fair values for other loans (for example, fixed rate residential, commercial real estate, and rental property mortgage loans, and commercial and industrial loans) are estimated using discounted cash flow analyses, based on interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Loan fair value estimates include judgments regarding future expected loss experience and risk characteristics. Loan impairment is deemed to exist when full repayment of principal and interest according to the contractual terms of the loan is no longer probable. Impaired loans are reported based on one of three measures: the present value of expected future cash flows discounted at the loan's effective interest rate; the loan's observable market price; or the fair value of the collateral if the loan is collateral dependent. If the fair value is less than an impaired loan's recorded investment, an impairment loss is recognized as part of the allowance for loan losses. Accordingly, certain impaired loans may be subject to measurement at fair value on a non-recurring basis. Management has estimated the fair values of these assets using Level 2 inputs, such as the fair value of collateral based on independent third-party appraisals for collateral-dependent loans. All other loans are valued using Level 3 inputs.

The fair value of loans held-for-sale is based upon an actual purchase and sale agreement between the Company and an independent market participant. The sale is executed within a reasonable period following quarter end at the stated fair value.

Mortgage servicing rights: Mortgage servicing rights represent the value associated with servicing residential mortgage loans. Servicing assets and servicing liabilities are reported using the amortization method. In evaluating the carrying values of mortgage servicing rights, the Company obtains third party valuations based on loan level data including note rate, and the type and term of the underlying loans. As such, the Company classifies mortgage servicing rights as nonrecurring Level 2.

OREO: Real estate acquired through or in lieu of foreclosure and bank properties no longer used as bank premises are initially recorded at fair value. The fair value of OREO is based on property appraisals and an analysis of similar properties currently available. As such, the Company records OREO as nonrecurring Level 2.

Deposits, federal funds purchased and borrowed funds: The fair values disclosed for demand deposits (for example, checking accounts, savings accounts and repurchase agreements) are, by definition, equal to the amount payable on demand at the reporting date (that is, their carrying amounts). The fair values for certificates of deposit and borrowed funds are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates and indebtedness to a schedule of aggregated contractual maturities on such time deposits and indebtedness. As such the Company classifies deposits, federal funds purchased and borrowed funds as Level 2.

Capital lease obligations: Fair value is determined using a discounted cash flow calculation using current rates. Based on current rates, carrying value approximates fair value. As such the Company classifies these obligations as Level 2.

Junior subordinated debentures: Fair value is estimated using current rates for debentures of similar maturity. As such the Company classifies these instruments as Level 2.

Accrued interest: The carrying amounts of accrued interest approximate their fair values. As such the Company classifies accrued interest as Level 2.

Off-balance-sheet credit related instruments: Commitments to extend credit are evaluated and fair value is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit-worthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates.

FASB ASC Topic 825 "Financial Instruments", requires disclosures of fair value information about financial instruments, whether or not recognized in the balance sheet, if the fair values can be reasonably determined. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques using observable inputs when available. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. Topic 825 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

Assets Recorded at Fair Value on a Recurring Basis

Assets measured at fair value on a recurring basis and reflected in the consolidated balance sheets at the dates presented, segregated by fair value hierarchy, are summarized below:

December 31, 2013	Level 1	Level 2	Total
Assets: (market approach)			
U.S. GSE debt securities	\$ 0	\$ 29,138,914	\$ 29,138,914
U.S. Government securities	6,049,688	0	6,049,688
December 31, 2012			
Assets: (market approach)			
U.S. GSE debt securities	\$ 0	\$ 33,785,469	\$ 33,785,469
U.S. Government securities	7,100,590	0	7,100,590

There were no transfers between Levels 1 and 2 during the periods presented. There were no Level 3 financial instruments as of the balance sheet dates presented.

Assets Recorded at Fair Value on a Non-Recurring Basis

The following table includes assets measured at fair value on a nonrecurring basis that have had a fair value adjustment since their initial recognition. Impaired loans measured at fair value only include impaired loans with a related specific allowance for loan losses and are presented net of specific allowances as disclosed in Note 3.

Assets measured at fair value on a nonrecurring basis and reflected in the balance sheet at the dates presented, segregated by fair value hierarchy, are summarized below:

December 31, 2013	<u>Level 2</u>
Assets: (market approach)	
Residential mortgage servicing rights	\$ 1,329,079
Impaired loans, net of related allowance	978,892
OREO	1,105,525

December 31, 2012	
Assets: (market approach)	
Residential mortgage servicing rights	\$ 1,009,623
Impaired loans, net of related allowance	737,274
OREO	1,074,705

There were no Level 1 or Level 3 financial instruments measured on a non-recurring basis as of the balance sheet dates presented.

The carrying amounts and estimated fair values of the Company's financial instruments were as follows:

December 31, 2013	<u>Carrying Amount</u>	<u>Fair Value Level 1</u>	<u>Fair Value Level 2</u>	<u>Fair Value Level 3</u>	<u>Fair Value Total</u>

Amortization of tax credit investments	473,842	1,175,177
ATM fees	401,147	363,478
Telephone	358,801	338,239

Note 25. Subsequent Events

Declaration of Cash Dividend

On December 11, 2013, the Company declared a cash dividend of \$0.14 per share payable February 1, 2014 to shareholders of record as of January 15, 2014. On March 11, 2014, the Company declared a cash dividend of \$0.16 per share payable May 1, 2014 to shareholders of record as of April 15, 2014. These dividends have been recorded as of each declaration date, including shares issuable under the DRIP plan.

For purposes of accrual or disclosure in these financial statements, the Company has evaluated subsequent events through the date of issuance of these financial statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the Years Ended December 31, 2013 and 2012

The following discussion analyzes the consolidated financial condition of Community Bancorp. (the "Company") and its wholly-owned subsidiary, Community National Bank, as of December 31, 2013 and 2012, and its consolidated results of operations for the years then ended. The Company is considered a "smaller reporting company" under applicable regulations of the Securities and Exchange Commission ("SEC") and is therefore eligible for relief from certain disclosure requirements. In accordance with such provisions, the Company has elected to provide its audited consolidated statements of income, comprehensive income, cash flows and changes in shareholders' equity for two, rather than three, years.

The following discussion should be read in conjunction with the Company's audited consolidated financial statements and related notes.

FORWARD-LOOKING STATEMENTS

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains certain forward-looking statements about the results of operations, financial condition and business of the Company and its subsidiary. Words used in the discussion below such as "believes," "expects," "anticipates," "intends," "estimates," "plans," "predicts," or similar expressions, indicate that management of the Company is making forward-looking statements.

Forward-looking statements are not guarantees of future performance. They necessarily involve risks, uncertainties and assumptions. Future results of the Company may differ materially from those expressed in these forward-looking statements. Examples of forward looking statements included in this discussion include, but are not limited to, estimated contingent liability related to assumptions made within the asset/liability management process, management's expectations as to the future interest rate environment and the Company's related liquidity level, credit risk expectations relating to the Company's loan portfolio and its participation in the Federal Home Loan Bank of Boston ("FHLBB") Mortgage Partnership Finance ("MPF") program, and management's general outlook for the future performance of the Company or the local or national economy. Although forward-looking statements are based on management's current expectations and estimates, many of the factors that could influence or determine actual results are unpredictable and not within the Company's control. Readers are cautioned not to place undue reliance on such statements as they speak only as of the date they are made. The Company does not undertake, and disclaims any obligation, to revise or update any forward-looking statements to reflect the occurrence or anticipated occurrence of events or circumstances after the date of this Report, except as required by applicable law. The Company claims the protection of the safe harbor for forward-looking statements provided in the Private Securities Litigation Reform Act of 1995.

Factors that may cause actual results to differ materially from those contemplated by these forward-looking statements include, among others, the following possibilities: (1) general economic conditions, either nationally, regionally or locally continue to deteriorate, resulting in a decline in credit quality or a diminished demand for the Company's products and services; (2) competitive pressures increase among financial service providers in the Company's northern New England market area or in the financial services industry generally, including competitive pressures from non-bank financial service providers, from increasing consolidation and integration of financial service providers, and from changes in technology and delivery systems; (3) interest rates change in such a way as to reduce the Company's margins; (4) changes in laws or government rules, including the rules of the federal Consumer Financial Protection Bureau, or the way in which courts or government agencies interpret or implement those laws or rules, increase our costs of doing business causing us to limit or change our product offerings or pricing, or otherwise adversely affect the Company's business; (5) changes in federal or state tax policy; (6) changes in the level of nonperforming assets and charge-offs; (7) changes in estimates of future reserve requirements based upon relevant regulatory and accounting requirements; (8) changes in consumer and business spending, borrowing and savings habits; (9) the effect of changes to the calculation of the Company's regulatory capital ratios under the recently adopted Basel III capital framework which, among other things, will require additional regulatory capital, and change the framework for risk-weighting of certain assets; and (10) the effect of and changes in the United States monetary and fiscal policies, including the interest rate policies of the Federal Reserve Board ("FRB") and its regulation of the money supply; and (11) adverse changes in the credit rating of U.S. government debt.

NON-GAAP FINANCIAL MEASURES

Under SEC Regulation G, public companies making disclosures containing financial measures that are not in accordance with generally accepted accounting principles in the United States ("US GAAP" or "GAAP") must also disclose, along with each non-GAAP financial measure, certain additional information, including a reconciliation of the non-GAAP financial measure to the closest comparable GAAP financial measure, as well as a statement of the company's reasons for utilizing the non-GAAP financial measure. The SEC has exempted from the definition of non-GAAP financial measures certain commonly used financial measures that are not based on GAAP. However, two non-GAAP financial measures commonly used by financial institutions, namely tax-equivalent net interest income and tax-equivalent net interest margin (as presented in the tables in the section labeled Interest

Income Versus Interest Expense (Net Interest Income), have not been specifically exempted by the SEC, and may therefore constitute non-GAAP financial measures under Regulation G. We are unable to state with certainty whether the SEC would regard those measures as subject to Regulation G.

Management believes that these non-GAAP financial measures are useful in evaluating the Company's financial performance and facilitate comparisons with the performance of other financial institutions. However, that information should be considered supplemental in nature and not as a substitute for related financial information prepared in accordance with GAAP.

OVERVIEW

The Company's consolidated assets at year-end 2013 were \$573,667,404 compared to \$575,738,245 at year-end 2012, a decrease of 0.40%. Although total assets were down from prior year end, loans increased by \$23.5 million while lower yielding assets decreased. The increase in loans was driven primarily by growth in commercial loans. On December 31, 2013 loans totaled \$439,908,926 compared to \$416,375,448 on December 31, 2012, an increase of 5.3%. Funding for the increase in loans was provided from a combination of an increase in deposits of \$6.0 million, a decrease in cash and cash equivalents of \$11.6 million and a decrease of \$5.7 million in the available-for-sale securities portfolio. Capital grew to \$46,135,977 with a book value of \$8.96 per share on December 31, 2013 compared to \$43,352,575 with a book value of \$8.49 per share on December 31, 2012.

The Company's net income of \$5,086,655 or \$1.03 per share for 2013 compares favorably to \$4,400,690 or \$0.88 per share in 2012. The 2013 increase in net income is partly attributable to the strong loan growth which helped to minimize margin compression in the persistent low rate environment combined with a decrease in both interest expense and other expenses, including the provision for loan losses. Interest rates have remained at historically low levels for several years causing erosion of yields on earning assets. While, average earning assets increased \$7.4 million in 2013, tax-equivalent interest income decreased by \$163,704, reflecting a decrease in average yield of nine basis points. Management was able to limit the decrease in the average yield on interest earning assets to nine basis points due to the growth in the loan portfolio which provides higher yields than other interest-earning assets. During the year, average interest-bearing liabilities decreased \$3.1 million while the average rates paid on these liabilities decreased by 32 basis points resulting in a decrease in interest expense of \$1.4 million. This decrease was largely due to a 438 basis point decrease in the average interest rate paid on the junior subordinated debentures following a scheduled rate adjustment at the end of 2012, which resulted in a decrease in interest paid on the debentures of \$564,319 for 2013. Also, contributing to the decrease in the average rate paid on the interest-bearing liabilities was the shift of customer funds out of higher yielding CDs to lower yielding demand and savings accounts combined with the payoff of higher-cost borrowings at the beginning of the year. The combined effects of these changes resulted in an increase of \$1.3 million in tax-equivalent net interest income.

Improvement in asset quality and lower levels of charge off activity during 2013 allowed the Company to reduce the provision for loan losses by \$330,000 compared to 2012. In addition, non-interest expenses decreased by \$574,296 year over year, due mostly to a higher level of tax credits amortized in 2012 in the amount of \$701,335 and a prepayment penalty of \$306,338 incurred in the fourth quarter of 2012 related to the early payoff of a higher-cost borrowing. The positive effect of lower non-interest expenses in 2013 compared to 2012 was offset by a decrease in non-interest income of \$206,392 and an increase in the provision for income tax expense of \$1,270,575. The decrease in non-interest income was mainly due to a reduction in income from sold loans in the secondary market of \$202,165.

The Federal Reserve's stimulus program has kept mortgage interest rates low providing several refinancing cycles which continued throughout 2012 and somewhat into 2013, however the opportunity for refinancing has declined resulting in originations of \$27,684,721 in 2013, compared to \$46,562,338 in 2012. The Company reported net gains from the sales of these mortgages of \$778,203 compared to \$1,375,689 in 2012, contributing to a decrease in non-interest income year over year. Also contributing to the decrease was the net realized loss on sale of securities in the available-for-sale portfolio during 2013 of \$5,521 compared to a gain of \$351,301 in 2012. These decreases were offset by increases in service fees and income from other activities.

The Company declared dividends of \$0.56 per common share in 2013 and 2012. The Company reported retained earnings of \$4,997,144 as of December 31, 2013 compared to \$2,698,200 as of December 31, 2012 and total shareholders' equity of \$46,135,977 and \$43,352,575 for the same comparison periods. The Company is committed to remaining a well-capitalized community bank, working to meet the needs of our customers, while providing a fair return to our shareholders.

Recent national economic data reports have produced tepid producer and consumer prices and nonthreatening inflation indicators demonstrating that inflation remains well below the Fed's 2% target. Although the Fed expects inflation to reverse course, nonexistent wage pressures threaten that forecast with ample slack in the labor market and minimal credit creation. Improvements in the housing sector appear slow, possibly due to the rise in mortgage rates since spring. Most of the housing activity is in the sales of existing homes, while new home sales declined. Although employment has continued to expand at a moderate pace, the national unemployment rate remains above the Fed's target of 6%. The comments from the latest meeting of the Federal Reserve's Federal Open Market Committee (FOMC) reaffirmed that the committee believes the current exceptionally low target range for fed funds is appropriate for the current economic conditions.

More locally, according to the State of Vermont Department of Labor, Vermont's unemployment rate for December, 2013 was 4.2%, which is slightly less than the December, 2012 rate of 4.9%, and is well below the national average of 6.6%. On a statewide basis job growth has come from the private sector and health care with contraction in construction, manufacturing and government sectors. Vermont's construction and government sectors are ranked as the lowest for job growth, and with post-tropical storm Irene projects now complete, forecasts for construction jobs are less than optimistic. Nevertheless, economists say that continued strength in the "Vermont" brand has helped recovery in the manufacturing sector and has helped the food and beverage industry to perform well. Technology, financial services and light manufacturing, particularly of specialty artisan foods, continue to be the economic leaders throughout Vermont.

A positive addition to Northern Vermont is a multi-phase expansion project of an Orleans County ski area, where construction of three hotels, a hockey arena, an indoor water park and a golf clubhouse has transformed the ski resort and golf course to a year-round indoor and outdoor recreation and wedding destination resort. This project has injected hundreds of millions of dollars of construction funding into the local economy over the last two years utilizing Federal EB5 program capital from foreign investors. A second project upgraded snowmaking and will soon begin construction of new hotels at another local ski resort in Caledonia County. The permitting process is scheduled to begin this spring for further investments of EB5 capital intended to be utilized for several projects in the region including a bio-tech manufacturing and research facility, a water-front hotel and conference center, and a major revitalization project for downtown Newport. Separate from the EB5 projects, it was announced recently that a Vermont developer has committed to bringing a Wal-Mart Super Store to Orleans County. Furthermore, the area recently received status as a foreign trade zone, propelling a major renovation project at the local airport, including an aviation flight school and small plane manufacturing plant in Newport. The projects that are underway have created jobs and boosted economic activity in the area.

The regulatory environment continues to increase operating costs and place extensive burden on personnel resources to comply with a myriad of legal requirements, including those under the Dodd-Frank Act of 2010, and the numerous rulemakings it has spawned, the Sarbanes-Oxley Act of 2002, the USA Patriot Act, the Bank Secrecy Act, the Real Estate Settlement Procedures Act and the Truth in Lending Act, as well as the new Basel III capital framework. It is unlikely that these administrative costs and burdens will moderate in the future.

CRITICAL ACCOUNTING POLICIES

The Company's consolidated financial statements are prepared according to US GAAP. The preparation of such financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities in the consolidated financial statements and related notes. The SEC has defined a company's critical accounting policies as those that are most important to the portrayal of the Company's financial condition and results of operations, and which require the Company to make its most difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Because of the significance of these estimates and assumptions, there is a high likelihood that materially different amounts would be reported for the Company under different conditions or using different assumptions or estimates. Management evaluates on an ongoing basis its judgment as to which policies are considered to be critical.

Allowance for Loan Losses - Management believes that the calculation of the allowance for loan losses ("ALL") is a critical accounting policy that requires the most significant judgments and estimates used in the preparation of its consolidated financial statements. In estimating the ALL, management considers historical experience as well as other qualitative factors, including the effect of current economic indicators and their probable impact on borrowers and collateral, trends in delinquent and non-performing loans, trends in criticized and classified assets, levels of exceptions, the impact of competition in the market, concentrations of credit risk in a variety of areas, including portfolio product mix, the level of loans to individual borrowers and their related interests, loans to industry segments and the geographic distribution of commercial real estate loans. Management's estimates used in calculating the ALL may increase or decrease based on changes in these factors, which in turn will affect the amount of the Company's provision for loan losses charged against current period income. This evaluation is inherently subjective and actual results could differ significantly from these estimates under different assumptions, judgments or conditions.

Other Real Estate Owned (“OREO”) –Real estate properties acquired through or in lieu of foreclosure or properties no longer used for bank operations, are initially recorded at fair value less estimated selling cost at the date of acquisition, foreclosure or transfer. Such properties are carried at fair value, which is the market value less estimated cost of disposition, i.e. sales commissions and costs associated with the sale. Fair value is determined, as appropriate, either by obtaining a current appraisal or evaluation prepared by an independent, qualified appraiser, by obtaining a broker’s market value analysis, and finally, if the Company has limited exposure and limited risk of loss, by the opinion of management as supported by an inspection of the property and its most recent tax valuation. Under recent and current market conditions, and periods of declining market values, the Company will generally obtain a new appraisal or evaluation. The amount, if any, by which the recorded amount of the loan exceeds the fair value, less estimated cost to sell, is a loss which is charged to the allowance for loan losses at the time of foreclosure or repossession. The recorded amount of the loan is the loan balance adjusted for any unamortized premium or discount and unamortized loan fees or costs, less any amount previously charged off, plus recorded accrued interest. After acquisition through or in lieu of foreclosure, these assets are carried at their new cost basis. Costs of significant property improvements are capitalized, whereas costs relating to holding the property are expensed as incurred. Appraisals by an independent, qualified appraiser are performed periodically on properties that management deems significant, or evaluations may be performed by management or a qualified third party on properties in the portfolio that are deemed less significant or less vulnerable to market conditions. Subsequent write-downs are recorded as a charge to other expense. Gains or losses on the sale of such properties are included in income when the properties are sold.

Investment Securities - Management performs quarterly reviews of individual debt and equity securities in the investment portfolio to determine whether a decline in the fair value of a security is other than temporary. A review of other-than-temporary impairment requires management to make certain judgments regarding the materiality of the decline and the probability, extent and timing of a valuation recovery, the Company’s intent to continue to hold the security and, in the case of debt securities, the likelihood that the Company will not have to sell the security before recovery of its cost basis. Management assesses fair value declines to determine the extent to which such changes are attributable to fundamental factors specific to the issuer, such as financial condition and business prospects, or to market-related or other external factors, such as interest rates, and in the case of debt securities, the extent to which the impairment relates to credit losses of the issuer, as compared to other factors. Declines in the fair value of securities below their cost that are deemed to be other than temporary, and declines in fair value of debt securities below their cost that are related to credit losses, are recorded in earnings as realized losses, net of tax effect. The non-credit loss portion of an other than temporary decline in the fair value of debt securities below their cost basis (generally, the difference between the fair value and the estimated net present value of expected future cash flows from the debt security) is recognized in other comprehensive income as an unrealized loss, provided that the Company does not intend to sell the security and it is more likely than not that the Company will not have to sell the security before recovery of its reduced basis.

Mortgage Servicing Rights -Mortgage servicing rights associated with loans originated and sold, where servicing is retained, are required to be capitalized and initially recorded at fair value on the acquisition date and are subsequently accounted for using the “amortization method”. Mortgage servicing rights are amortized against non-interest income in proportion to, and over the period of, estimated future net servicing income of the underlying financial assets. The value of capitalized servicing rights represents the estimated present value of the future servicing fees arising from the right to service loans for third parties. The carrying value of the mortgage servicing rights is periodically reviewed for impairment based on a determination of estimated fair value compared to amortized cost, and impairment, if any, is recognized through a valuation allowance and is recorded as a reduction of non-interest income. Subsequent improvement (if any) in the estimated fair value of impaired mortgage servicing rights is reflected in a positive valuation adjustment and is recognized in non-interest income up to (but not in excess of) the amount of the prior impairment. Critical accounting policies for mortgage servicing rights relate to the initial valuation and subsequent impairment tests. The methodology used to determine the valuation of mortgage servicing rights requires the development and use of a number of estimates, including anticipated principal amortization and prepayments. Factors that may significantly affect the estimates used are changes in interest rates and the payment performance of the underlying loans. The Company analyzes and accounts for the value of its servicing rights with the assistance of a third party consultant.

Goodwill - Management utilizes numerous techniques to estimate the value of various assets held by the Company, including methods to determine the appropriate carrying value of goodwill. Goodwill from an acquisition accounted for under the purchase accounting method, such as the Company’s 2007 acquisition of LyndonBank, is subject to ongoing periodic impairment evaluation, which includes an analysis of the ongoing assets, liabilities and revenues from the acquisition and an estimation of the impact of business conditions. This evaluation is inherently subjective.

Other - Management utilizes numerous techniques to estimate the carrying value of various assets held by the Company, including, but not limited to, bank premises and equipment and deferred taxes. The assumptions considered in making these estimates are based on historical experience and on various other factors that are believed by management to be reasonable under the circumstances. The use of different estimates or assumptions could produce different estimates of carrying values and those differences could be material in some circumstances.

RESULTS OF OPERATIONS

The Company's net income of \$5,086,655 for the year ended December 31, 2013 increased \$685,965 or 15.6% from net income of \$4,400,690 for the year ended December 31, 2012, resulting in earnings per common share of \$1.03 and \$0.88, respectively. An increase of \$1,258,636 or 7.0% is noted in net interest income for 2013 compared to 2012. Interest income decreased \$181,549 or 0.8% in 2013, but that decrease was more than offset by a decrease in interest expense of \$1,440,185 or 29.5%. The modest decrease in interest income together with the significant decrease in interest expense reflect the low interest rate environment as does the \$564,319 decrease in interest expense associated with the Company's Junior Subordinated Debentures discussed in Note 10 of this Annual Report. Non-interest income decreased \$206,392 or 3.3%, and non-interest expense decreased \$574,296 or 3.0%. The Company had a modest loss of \$5,521 for 2013 on sales of available-for-sale ("AFS") securities, compared to a gain of \$351,301 for 2012 on sales of AFS securities, including its Fannie Mae preferred stock. Salaries and wages increased \$216,151 or 3.5% and an increase of \$209,782 or 9.9% is noted in employee benefits. Other expenses decreased \$485,343 or 7.8% year over year with a substantial portion of the decrease attributable to a decrease of \$412,109 or 46.5% in losses on limited partnerships. In addition, 2012 non-interest expense included a prepayment fee of \$306,338 on the early pay off of a higher cost \$6.0 million advance from FHLBB in 2012, while there were no similar fees incurred in 2013.

Return on average assets ("ROA"), which is net income divided by average total assets, measures how effectively a corporation uses its assets to produce earnings. Return on average equity ("ROE"), which is net income divided by average shareholders' equity, measures how effectively a corporation uses its equity capital to produce earnings.

The following table shows these ratios, as well as other equity ratios, for each of the last three fiscal years:

	December 31,		
	2013	2012	2011
Return on Average Assets	0.90%	0.79%	0.66%
Return on Average Equity	11.43%	10.44%	8.91%
Dividend Payout Ratio (1)	54.37%	63.64%	76.71%
Average Equity to Average Assets Ratio	7.86%	7.53%	7.43%

(1) Dividends declared per common share divided by earnings per common share.

The following table summarizes the earnings performance and balance sheet data of the Company during each of the last five fiscal years:

SELECTED FINANCIAL DATA

Years Ended December 31,	2013	2012	2011	2010	2009

(1) Applicable income tax expense (benefit) assumes a 34% tax rate.

(2) Computed based on the weighted average number of common shares outstanding during the periods presented.

INTEREST INCOME VERSUS INTEREST EXPENSE (NET INTEREST INCOME)

The largest component of the Company's operating income is net interest income, which is the difference between interest earned on loans and investments versus the interest paid on deposits and other sources of funds (i.e. other borrowings). The Company's level of net interest income can fluctuate over time due to changes in the level and mix of earning assets, and sources of funds (volume) and from changes in the yield earned and costs of funds (rate paid). A portion of the Company's income from municipal investments is not subject to income taxes. Because the proportion of tax-exempt items in the Company's portfolio varies from year-to-year, to improve comparability of information across years, the non-taxable income shown in the tables below has been converted to a tax equivalent basis. Because the Company's corporate tax rate is 34%, to equalize tax-free and taxable income in the comparison, we divide the tax-free income by 66%, with the result that every tax-free dollar is equivalent to \$1.52 in taxable income.

Tax-exempt income is derived from municipal investments, which comprised the entire held-to-maturity portfolio of \$37,936,911, \$41,865,555 and \$29,702,159, at December 31, 2013, 2012 and 2011, respectively.

The following table provides the reconciliation between net interest income presented in the consolidated statements of income and the tax equivalent net interest income presented in the table immediately following for each of the last three years.

For the Years Ended December 31,	<u>2013</u>	<u>2012</u>	<u>2011</u>
	(Dollars in Thousands)		
Net interest income as presented	\$ 19,198	\$ 17,939	\$ 17,149
Effect of tax-exempt income	<u>529</u>	<u>511</u>	<u>513</u>
Net interest income, tax equivalent	<u>\$ 19,727</u>	<u>\$ 18,450</u>	<u>\$ 17,662</u>

The following table presents average earning assets and average interest-bearing liabilities supporting earning assets. Interest income (excluding interest on non-accrual loans) and interest expense are both expressed on a tax equivalent basis, both in dollars and as a rate/yield for the last three years.

(1) Included in gross loans are non-accrual loans with an average balance of \$4,401,818, \$6,311,031 and \$5,715,680 for the years ended December 31, 2013,

2012 and 2011, respectively. Loans are stated before deduction of unearned discount and allowance for loan losses.

(2) Included in other investments is the Company's FHLBB Stock with an average balance of \$3,118,142 and \$3,488,914, respectively, for 2013 and 2012

and a payout rate of approximately 0.37% per quarter in 2013 and 0.48% in 2012.

(3) Net interest spread is the difference between the average yield on average earning assets and the average rate paid on average interest-bearing liabilities.

(4) Net interest margin is net interest income divided by average earning assets.

Interest income from loans of \$21,226,505 accounts for 91.6% of total tax-equivalent interest income for 2013 compared to \$21,203,038 or 90.9% for 2012 and \$21,242,577 or 91.3% for 2011, with average yields of 4.99%, 5.27% and 5.45%, respectively. The average volume of loans increased \$23,458,737, or 5.8% from 2012 to 2013 and \$12,412,594 or 3.1% from 2011 to 2012, while the average rate earned on these assets decreased 28 basis points from 2012 to 2013 and 18 basis points from 2011 to 2012, reflecting the prevailing low interest rate environment throughout both comparison periods. The average volume of taxable investments decreased \$16,207,422 or 28.2% from 2012 to 2013 but increased \$24,666,478 or 75.0% from 2011 to 2012. Declines of 17 basis points for 2013 and 15 basis points for 2012 are noted in the average yield on these investments. During the fourth

quarter of 2011 and into the first quarter of 2012, the Company redeployed a substantial portion of the funds held in its account at the Federal Reserve Bank of Boston (FRBB) to purchase taxable investments that earned a slightly better rate than the FRBB account. As loan demand increased beginning in 2012 and into 2013, the Company funded a portion of this increase through sales and maturities from its taxable investments. Sweep and interest earning assets consist primarily of excess funds held in the Company's account at the FRBB. The average volume of these earning assets decreased from \$33,267,247 in 2011 to \$3,880,952 in 2012 and then increased to \$4,457,244 in 2013.

Interest expense on time deposits represents 45.2% of total interest expense for 2013, compared to 44.4% for 2012, and 48.8% for 2011, with interest expense totaling \$1,555,030, \$2,169,578 and \$2,728,478, respectively, and average rates paid of 1.26%, 1.64% and 1.93%, respectively. Major decreases are noted in the average volume of two components of interest-bearing liabilities, with federal funds purchased and other borrowed funds accounting for the biggest decrease in average volume totaling \$15,160,526 or 64.9% and a decrease in the average rate paid of 100 basis points from 2012 to 2013, followed by time deposits with a decrease of \$9,139,668 or 6.9% in average volume and a decrease of 38 basis points in the average rate paid from 2012 to 2013. Increases are noted in the average volumes of other components of interest-bearing liabilities, with money market accounts reporting the largest increase of \$8,323,721 or 10.5% in average volume, followed by interest-bearing transaction accounts with an increase of \$6,642,913 or 6.0% from 2012 to 2013. Time deposits reported the only significant decrease in the 2011 to 2012 comparison period with a decrease in average volume of \$8,826,701 or 6.2% and a decrease in the average rate paid of 29 basis points, compared to an increase in money market accounts of \$7,182,536 or 9.9% in average volume with a decrease in the average rate paid of five basis points, followed by repurchase agreements with an increase in average volume of \$4,658,249 or 21.4% and a decrease in the average rate paid of 10 basis points from 2011 to 2012. Although the average volume of the Company's junior subordinated debentures remained unchanged during 2013, a contractual interest rate adjustment at the end of 2012 resulted in a 438 basis point decrease in the average rate paid on the debentures in 2013, compared to the rate paid in 2012 and 2011.

Overall, during 2013, the average rate earned on interest-earning assets decreased less than the average rate paid on interest-bearing liabilities, causing the net interest spread to increase 23 basis points to 3.73% for 2013, compared to last year's net interest spread of 3.50%. A similar pattern is noted for the period from 2011 to 2012 with a decrease of ten basis points in the average rate earned on interest-earning assets compared to an 18 basis points decrease in the average rate paid on interest-bearing liabilities, causing the eight basis point increase in the spread for 2012 from 3.42% for 2011.

The following table summarizes the variances in income for the years 2013, 2012 and 2011 resulting from volume changes in assets and liabilities and fluctuations in rates earned and paid compared to the prior year.

Changes in Interest Income and Interest Expense

(1) Items which have shown a year-to-year increase in volume have variances allocated as follows:

Variance due to rate = Change in rate x new volume

Variance due to volume = Change in volume x old rate

Items which have shown a year-to-year decrease in volume have variances allocated as follows:

Variance due to rate = Change in rate x old volume

Variances due to volume = Change in volume x new rate

NON-INTEREST INCOME AND NON-INTEREST EXPENSE

Non-interest Income: The Company's non-interest income decreased \$206,392 or 3.3% to \$5,982,568 in 2013 from \$6,188,960 in 2012. Service fees increased \$223,812 or 9.5% due primarily to the implementation of paper statement fees in 2013. Secondary market residential mortgage sales volume was higher in 2012 compared to 2013 with originations of loans sold to the secondary market of \$27,684,721 in 2013 compared to \$46,562,338 in 2012. This resulted in a year over year decrease in income from sold loans of \$202,165 or 11.1%. In 2012, the Company recorded gains through the sale of investments in its AFS portfolio of \$351,301 compared to a loss of \$5,521 in 2013, significantly contributing to the decrease in non-interest income year over year. Other income from loans decreased \$173,927 or 19.3% from 2012 to 2013 due in part to a decrease in residential loan activity which resulted in a decrease of \$150,613 or 39.1% in documentation fees associated with the residential loan application process. Other income increased \$302,710 or 39.7% from 2012 to 2013, due in part to an increase of \$137,537 or 91.9% in income associated with the Company's investment in Community Financial Services Group Partners, LLC ("CFSG Partners"), the holding company for the Company's trust company affiliate, and an increase of \$62,009 or 61.8% in income from the Company's Supplemental Employee Retirement Program ("SERP").

Non-interest Expense: The Company's non-interest expense decreased \$574,296 or just over 3.0% to \$18,292,474 for 2013 compared to \$18,866,770 for 2012. Salaries and employee benefits increased in total \$425,933 or 5.1%, while all other components of non-interest expense decreased, including a decrease of \$126,486 or 3.8% in occupancy expense. During the fourth quarter of 2012, the Company chose to prepay a higher rate borrowing with the FHLBB, resulting in prepayment fees totaling \$306,338, which contributed significantly to the decrease in non-interest expense year over year. A decrease of \$68,175 or 20% is noted in the amortization expense related to the Company's core deposit intangible from the LyndonBank acquisition (see Note 6 to the consolidated financial statements). Other expenses decreased \$485,343 or 7.8% from \$6,244,512 in 2012 to \$5,759,169 in 2013. The components of other expenses noting substantial decreases between periods were losses on limited partnerships (discussed in the following paragraph) which decreased \$701,335 or 59.7% and expenses related to the Company's non-performing assets which decreased \$117,583 or 47.1%. These decreases were offset in part by an increase of \$125,632 or 164.0% in expenses related to the Company's OREO properties, which included write-downs totaling \$44,500 for 2013. The Company began outsourcing its data processing operations late in the fourth quarter of 2012, with related expenses amounting to \$166,159 for 2013 compared to \$11,647 for 2012. Outsourcing of the core processing during 2013 provided the opportunity for the existing information technology staff to take on additional duties and roles prescribed from regulatory and industry changes.

Total losses relating to various limited partnership investments for affordable housing in our market area constitute a notable portion of other expenses. These losses amounted to \$473,842 or 8.2% of other expenses for 2013, compared to \$1,175,177 or 18.8% of other expenses in 2012. These investments provide tax benefits, including tax credits, and are designed to yield a return of between 8% and 10%. The Company amortizes its investments in these limited partnerships under the effective yield method, resulting in the asset being amortized consistent with the periods in which the Company receives the tax benefit. The carrying values of the limited partnerships were \$2,334,709 and \$2,808,551, at December 31, 2013 and 2012, respectively, and are recorded in other assets.

The tax credit from the Company's New Markets Tax Credit ("NMTC") investment was \$170,750 for each of the years ended December 31, 2013 and 2012, with an amortization expense of \$101,339 and \$39,662, respectively, for the years ended December 31, 2013 and 2012. The carrying value of this investment was \$683,690 at December 31, 2013 and \$785,080 at December 31, 2012, and is recorded in other assets.

APPLICABLE INCOME TAXES

The provision for income taxes increased significantly from a tax benefit of \$139,488 in 2012 to a tax expense of \$1,131,087 in 2013, an increase of \$1,270,575. Income before taxes increased \$1,956,540 or 45.9% for 2013 compared to 2012. This increase in income, along with the decrease in tax credits relating to the Company's affordable housing investments, accounts for the significant shift from a tax benefit in 2012 to a tax expense in 2013.

CHANGES IN FINANCIAL CONDITION

The following discussion refers to the volume of average assets, liabilities and shareholders' equity in the table labeled "Distribution of Assets, Liabilities and Shareholders' Equity" on the following page.

Average assets increased \$5.7 million or just over 1.0% from the year ended December 31, 2012 to the year ended December 31, 2013. The interest-bearing balance at the FRBB comprises the entire average volume of federal funds sold and overnight deposits in 2013 and 2012. The average volume of loans increased \$22.8 million or 5.7%, due in part to strong commercial loan demand. The Company used maturities, sales and calls within the taxable investment portfolio to help fund loan growth during 2013 accounting for the decrease of \$16.3 million or 28.3% in the average volume of that portfolio between periods. The average volume of the tax-exempt portfolio increased moderately year over year and is made up of local municipal accounts.

Average liabilities increased \$3.4 million or 0.7% from the year ended December 31, 2012 to the year ended December 31, 2013. The average volume of federal funds purchased and other borrowed funds decreased \$15.2 million or 74.9%, which was mostly attributable to the payoff of a \$6.0 million FHLBB advance in the fourth quarter of 2012 and the maturity of another \$6.0 million FHLBB advance during the first quarter of 2013. The Company borrowed overnight funds during both periods, but the volume was heavier in 2012, with month ending balances for June and July amounting to \$25.8 million and \$28.3 million, respectively, compared to \$22.1 million and \$12.2 million, respectively for the same months in 2013. The average volume of time deposits decreased \$9.1 million or 6.9% from 2012 to 2013 which largely reflects a shift to savings or money market accounts, or customer rate shopping at other financial institutions. The average volume of all other deposits increased with money market funds increasing \$8.3 million in average volume or 10.5% and demand deposits increasing \$7.5 million or 11.4% year over year, accounting for the two largest increases within the deposit accounts. The average volume of savings accounts increased \$4.2 million or 6.4% and interest-bearing transaction accounts increased \$6.6 million or 6.0%. The insured cash sweep account ("ICS") offered through Promontory Interfinancial Network which the Company started offering in 2010, has worked very well as a means of attracting new customers and retaining current customers who are looking for alternatives to time deposits. The average volume of ICS accounts increased from \$12.1 million in 2012 to \$15.9 million in 2013, which is reflected in the increase in the average volume of money market funds during 2013. The Company strives to keep its core customers but is not placing much emphasis on attracting rate shoppers as it has sufficient liquidity to meet reasonably foreseeable loan demand and other requirements.

The following table provides a visual comparison of the breakdown of average assets and average liabilities as well as average shareholders' equity for the comparison periods.

Distribution of Assets, Liabilities and Shareholders' Equity

Average Assets	Year ended December 31,

Total	\$ 46,928,443

RISK MANAGEMENT

Interest Rate Risk and Asset and Liability Management - Management actively monitors and manages the Company's interest rate risk exposure and attempts to structure the balance sheet to maximize net interest income while controlling its exposure to interest rate risk. The Company's Asset/Liability Management Committee ("ALCO") is made up of the Executive Officers and all the Vice Presidents of the Bank. The ALCO formulates strategies to manage interest rate risk by evaluating the impact on earnings and capital of such factors as current interest rate forecasts and economic indicators, potential changes in such forecasts and indicators, liquidity and various business strategies. The ALCO meets monthly to review financial statements, liquidity levels, yields and spreads to better understand, measure, monitor and control the Company's interest rate risk. In the ALCO process, the committee members apply policy limits set forth in the Asset Liability, Liquidity and Investment policies approved and periodically reviewed by the Company's Board of Directors. The ALCO's methods for evaluating interest rate risk include an analysis of the effects of interest rate changes on net interest income and an analysis of the Company's interest rate sensitivity "gap", which provides a static analysis of the maturity and repricing characteristics of the entire balance sheet.

Interest rate risk represents the sensitivity of earnings to changes in market interest rates. As interest rates change, the interest income and expense streams associated with the Company's financial instruments also change, thereby impacting net interest income ("NII"), the primary component of the Company's earnings. Fluctuations in interest rates can also have an impact on liquidity. The ALCO uses an outside consultant to perform rate shock simulations to the Company's NII, as well as a variety of other analyses. It is the ALCO's function to provide the assumptions used in the modeling process. The ALCO utilizes the results of this simulation model to quantify the estimated exposure of NII and liquidity to sustained interest rate changes. The simulation model captures the impact of changing interest rates on the interest income received and interest expense paid on all interest-earning assets and interest-bearing liabilities reflected on the Company's balance sheet. Furthermore, the model simulates the balance sheet's sensitivity to a prolonged flat rate environment. All rate scenarios are simulated assuming a parallel shift of the yield curve; however further simulations are performed utilizing a flattening yield curve as well. This sensitivity analysis is compared to the ALCO policy limits which specify a maximum tolerance level for NII exposure over a 1-year horizon, assuming no balance sheet growth, given a 200 basis point ("bp") shift upward and a 100 bp shift downward in interest rates. The analysis also provides a summary of the Company's liquidity position. Furthermore, the analysis provides testing of the assumptions used in previous simulation models by comparing the projected NII with actual NII. The asset/liability simulation model provides management with an important tool for making sound economic decisions regarding the balance sheet.

The Company's Asset/Liability Policy has been enhanced with a contingency funding plan to help management prepare for unforeseen liquidity restrictions to include hypothetical severe liquidity crises.

While assumptions are developed based upon current economic and local market conditions, the Company cannot provide any assurances as to the predictive nature of these assumptions, including how customer preferences or competitor influences might change.

The following reflects the Company's NII sensitivity analysis over one-year and two-year horizons, assuming a parallel shift of the yield curve as of December 31, 2013.

One Year Horizon		Two Year Horizon	
Rate Change	Percent Change in NII	Rate Change	Percent Change in NII
Down 100 basis points	-0.90%	Down 100 basis points	-3.60%
Up 200 basis points	7.00%	Up 200 basis points	19.90%

The preceding sensitivity analysis does not represent a Company forecast and should not be relied upon as being indicative of expected operating results. These hypothetical estimates are based upon numerous assumptions and factors, some of which are outside the Company's control, including, among others, the nature and timing of interest rate levels, yield curve shape, prepayments on loans and securities, deposit decay rates, pricing decisions on loans and deposits, and reinvestment/replacement of asset and liability cash flows. While assumptions are developed based upon current economic and local market conditions, the Company cannot make any assurances as to the predictive nature of these assumptions, including how customer preferences or competitor influences might change.

Credit Risk - As a financial institution, one of the primary risks the Company manages is credit risk, the risk of loss stemming from borrowers' failure to repay loans or inability to meet other contractual obligations. The Company's Board of Directors prescribes policies for managing credit risk, including Loan, Appraisal and Environmental policies. These policies are supplemented by comprehensive underwriting standards and procedures. The Company maintains a Credit Administration department whose function includes credit analysis and monitoring of and reporting on the status of the loan portfolio, including delinquent and non-performing loan trends. The Company also monitors concentration of credit risk in a variety of areas, including portfolio mix, the level of loans to individual borrowers and their related interest, loans to industry segments, and the geographic distribution of commercial real estate loans. Loans are reviewed periodically by an independent loan review firm in order to assure accuracy of the Company's internal risk ratings and compliance with various internal policies and procedures and regulatory guidance.

Residential mortgages represent approximately half of the Company's loan balances; that level has been on a gradual decline in recent years, with a strategic shift in management emphasis to commercial lending. The severity and depth of the recent recession and slow economic recovery saw the greatest degree of collection and foreclosure activity and losses in this segment of the portfolio. Delinquencies and losses, however, were not experienced to the extent of national peers as the Company maintains a mortgage loan portfolio of traditional mortgage products and has not engaged in higher risk loans such as option adjustable rate mortgage products, high loan-to-value products, interest only mortgages, subprime loans and products with deeply discounted teaser rates. While real estate values also declined in the Company's market area, the sound underwriting standards historically employed by the Company mitigated the trends in defaults and property surrenders experienced elsewhere. Residential mortgages with loan-to-values exceeding 80% are generally covered by private mortgage insurance ("PMI"). A 90% loan-to-value residential mortgage product without PMI is only available to borrowers with excellent credit and low debt-to-income ratios and has not been widely originated. Junior lien home equity products make up approximately 21% of the residential mortgage portfolio with maximum loan-to-value ratios (including prior liens) of 80%. The residential mortgage portfolio has had satisfactory performance in light of the depth of the recent recession and the slow recovery; portfolio performance improved through 2012 and 2013.

Risk in the Company's commercial and commercial real estate loan portfolios is mitigated in part by government guarantees issued by federal agencies such as the U.S. Small Business Administration and USDA Rural Development. At December 31, 2013, the Company had \$25,150,175 in guaranteed loans with guaranteed balances of \$20,044,091, compared to \$24,676,611 in guaranteed loans with guaranteed balances of \$19,787,843 at December 31, 2012.

The Company's strategy is to continue growing the commercial and commercial real estate portfolios. Consistent with the strategic focus on commercial lending, both segments have seen solid growth during 2013. Growth slowed in the residential mortgage first lien portfolio with interest rates increasing late in 2013 and the previously brisk refinancing activity falling off sharply.

The following table reflects the composition of the Company's loan portfolio as of December 31,

Composition of Loan Portfolio

The Company began experiencing increasing delinquencies and collection activity in 2008 when the most recent economic downturn began. The slow recovery resulted in prolonged work through of some of these delinquencies and problem loans. The Company works actively with customers early in the delinquency process to help them to avoid default and foreclosure. During the same period the Company experienced increasing trends in the levels of non-performing loans and criticized and classified assets, which was consistent with the length and depth of the economic recession and the slow recovery. During 2009 the Company had carried the maximum qualitative factor adjustment for weak economic conditions and has been slowly decreasing that factor as the recovery progresses. With the economic recovery continuing, the levels of both Group B (Management Involved) and Group C (Unacceptable Risk) loans (as defined in Note 3 to the Company's audited consolidated financial statements) showed gradual improvement throughout 2012 and into 2013. The level of Group B loans increased in the latter half of 2013 with several loan originations to customers with improving financial condition; while the level of group C loans remained relatively stable through the latter half of 2013. The loan loss reserve factors for trends in delinquency and non-accrual loans and criticized and classified loans were gradually decreased into 2013. However; these factors were again increased in the latter half of 2013 to account principally for higher Group B loans and a higher level of non-performing residential mortgages. Qualitative factors have also been increased to account for growth in the loan portfolio.

Commercial and commercial real estate loans are generally placed on non-accrual status when there is deterioration in the financial position of the borrower, payment in full of principal and interest is not expected, and/or principal or interest has been in default for 90 days or more. However, such a loan need not be placed on non-accrual status if it is both well secured and in the process of collection. Residential mortgages and home equity loans are considered for non-accrual status at 90 days past due and are evaluated on a case-by-case basis. The Company obtains current property appraisals or market value analyses and considers the cost to sell collateral in order to assess the level of specific allocations required. Consumer loans are generally not placed in non-accrual but are charged off by the time they reach 120 days past due. When a loan is placed in non-accrual status, the Company's policy is to reverse the accrued interest against current period income and to discontinue the accrual of interest until the borrower clearly demonstrates the ability and intention to resume normal payments, typically demonstrated by regular timely payments for a period of not less than six months. Interest payments received on non-accrual or impaired loans are generally applied as a reduction of the loan principal balance. Deferred taxes are calculated monthly, based on interest amounts that would have accrued through the normal accrual process. As of December 31, this interest amounted to \$95,580 for 2013, \$214,897 for 2012, \$294,034 for 2011, \$235,602 for 2010, and \$117,575 for 2009.

The Company's non-performing assets increased \$532,333 or 8.6% for 2013 compared to 2012, while a decrease of \$3.1 million or 33.1% is noted for 2012 compared to 2011, with increases in all prior comparison periods year over year beginning with an increase of \$2.3 million or 32.7% for 2011 compared to 2010, and \$1.8 million or 35.9% for 2010 compared to 2009. The notable non-performing loan increase for 2011 was attributable in large part to an increase in non-accrual commercial real estate loans, including two commercial real estate loans to one borrower totaling just over \$1.0 million moved into non-accrual as a result of diminished cash flow due to the devastation caused by Tropical Storm Irene, and four other commercial real estate loan relationships moved into non-performing status as a result of the inability to weather the economic recession. The decrease from 2011 to 2012 is attributable to both improvement in economic conditions and the resolution of numerous problem loans. Those resolutions included completion of the foreclosure process, recognition of government loan guarantee claims receivable, borrower repayment or in limited circumstances, the transition of loans to performing accrual status. The level of non-performing assets remained comparatively stable in 2013.

Non-performing assets were made up of the following:

December 31,	Non-Performing Assets				
	2013	2012	2011	2010	2009
	(Dollars in Thousands)				
Accruing loans past due 90 days or more:					
Commercial & industrial	\$ 22	\$ 0	\$ 60	\$ 29	\$ 0
Commercial real estate	5	54	99	95	0
Residential real estate - 1st lien	817	282	969	1,055	436
Residential real estate - Jr lien	56	42	111	140	102
Consumer	8	1	1	38	20
Total past due 90 days or more	908	379	1,240	1,357	558
Non-accrual loans:					
Commercial & industrial	527	597	1,067	61	201
Commercial real estate	1,404	1,892	3,714	1,146	1,161
Residential real estate - 1st lien	2,203	1,928	2,704	2,831	2,482
Residential real estate - Jr lien	593	338	464	388	0
Total non-accrual loans	4,727	4,755	7,949	4,426	3,844
Total non-accrual and past due loans	5,635	5,134	9,189	5,783	4,402
Other real estate owned	1,106	1,075	90	1,210	743
Total non-performing assets	\$ 6,741	\$ 6,209	\$ 9,279	\$ 6,993	\$ 5,145
Percent of gross loans	1.53%	1.49%	2.39%	1.79%	1.35%
Reserve coverage of non-performing assets	72.03%	69.45%	41.89%	53.31%	67.07%

Non-performing loans as of December 31, 2013 includes approximately 47% residential first mortgages, 12% junior lien home equity loans, 30% commercial real estate and 11% in commercial loans not secured by real estate, compared to 41%, 7%, 40%, and 12% respectively at December 31, 2012.

The Company's TDRs are principally a result of extending loan repayment terms to relieve cash flow difficulties. The Company has only, on a limited basis, reduced interest rates for borrowers below the current market rate for the borrower. The Company has not forgiven principal or reduced accrued interest within the terms of original restructurings, nor has it converted variable rate terms to fixed rate terms. However, the Company evaluates each TDR situation on its own merits and does not foreclose the granting of any particular type of concession. The Non-Performing Assets table includes TDR's that are past due 90 days or more or in non-accrual status. The remainder of the Company's TDR's consist of 10 residential mortgage loans, two commercial real estate loans and three commercial & industrial loans totaling \$1,312,260 at December 31, 2013 compared to six residential mortgage loans, two commercial real estate loans and three commercial & industrial loans totaling \$1,088,222 at December 31, 2012.

The Company is not contractually committed to lend additional funds to debtors with impaired, non-accrual or modified loans.

The Company's OREO portfolio at December 31, 2012 consisted of five properties acquired through the normal foreclosure process. During 2013 the Company moved seven additional properties into OREO totaling \$1,661,920, selling five of those properties and two of the properties held at December 31, 2012. With total sales, net of closing costs, of \$1,596,590 during 2013, and subsequent write-downs totaling \$44,500 on two properties, 2013 ended with an OREO balance of \$1,105,525, representing five properties.

Allowance for loan losses and provisions - The Company maintains an allowance for loan losses (allowance) at a level that management believes is appropriate to absorb losses inherent in the loan portfolio (See Critical Accounting Policies). Although the Company, in establishing the allowance, considers the inherent losses in individual loans and pools of loans, the allowance is a general reserve available to absorb all credit losses in the loan portfolio. No part of the allowance is segregated to absorb losses from any particular loan or segment of loans.

When establishing the allowance each quarter, the Company applies a combination of historical loss factors and qualitative factors to loan segments including residential first and junior lien mortgages, commercial real estate, commercial and industrial, and consumer loan portfolios. No changes were made to the allowance methodology during 2013. The Company will shorten or lengthen its look back period for determining average portfolio historical loss rates as the economy either contracts or expands; during a period of economic contraction a shortening of the look back period may more conservatively reflect the current economic climate. The highest loss rates experienced for the look back period are applied to the various segments in establishing the allowance.

The Company then applies numerous qualitative factors to each of these segments of the loan portfolio. Those factors include the levels of and trends in delinquencies and non-accrual loans, criticized and classified assets, volumes and terms of loans, and the impact of any loan policy changes. Experience, ability and depth of lending personnel, levels of policy and documentation exceptions, national and local economic trends, the competitive environment, and concentrations of credit are also factors considered.

The adequacy of the allowance is reviewed quarterly by the risk management committee of the Board of Directors and then presented to the full Board of Directors for approval.

The following table summarizes the Company's loan loss experience for each of the last five years.

Summary of Loan Loss Experience

December 31,	2013	2012	2011	2010	2009
	(Dollars in Thousands)

Provision charged to income	670	1,000	1,000	1,017	625
Allowance, end of year	\$ 4,855	\$ 4,312	\$ 3,887	\$ 3,728	\$ 3,451
Net charge offs to average loans outstanding	0.03%	0.14%	0.21%	0.19%	0.11%
Provision charged to income as a percent of average loans	0.16%	0.25%	0.26%	0.26%	0.17%
Allowance to average loans outstanding	1.14%	1.07%	0.99%	0.96%	0.93%
Allowance to non-accruing loans	99.04%	90.68%	48.90%	84.23%	89.78%
Allowance to non-accruing loans net of government guarantees	106.87%	121.91%	72.18%	110.23%	90.60%

Net loans charged off increased from 2007 through 2011, peaking at \$841,000 in 2011. Given the trend in charge offs and depth of the recent recession and the sluggish recovery, management increased its provisions for loan losses to \$1.0 million for each of the years 2011 and 2012, compared to \$625,004 for 2009. This increase was directionally consistent with the trends and risk in the loan portfolio and with the growth of the loan portfolio. Improving loan portfolio trends throughout 2012 and 2013, and several recoveries resulted in a \$330,000 or 33.0%, decrease to the provision for 2013; with a total provision of \$670,000 compared to \$1,000,000 for 2012. While the Company's allowance coverage of non-accruing loans increased during 2013, the coverage of non-accruing loans net of government guarantees decreased. The decrease is the result of new non-accruing loans that are not guaranteed, replacing one large government guaranteed loan that was fully liquidated during the second quarter of 2013. The Company has an experienced collections department that continues to work actively with borrowers to resolve problem loans and manage the OREO portfolio, and management continues to monitor the loan portfolio closely.

Specific allocations to the allowance are made for certain impaired loans. Impaired loans are loans to a borrower that in aggregate are greater than \$100,000 and that are in non-accrual status. A loan is considered impaired when it is probable that the Company will be unable to collect all amounts due, including interest and principal, according to the contractual terms of the loan agreement. The Company will review all the facts and circumstances surrounding non-accrual loans and on a case-by-case basis may consider loans below the threshold as impaired when such treatment is material to the financial statements. See Note 3 to the accompanying audited consolidated financial statements for information on the recorded investment in impaired loans and their related allocations.

The portion of the allowance termed "unallocated" is established to absorb inherent losses that exist as of the valuation date although not specifically identified through management's process for estimating credit losses. While the allowance is described as consisting of separate allocated portions, the entire allowance is available to support loan losses, regardless of category.

The following table shows the allocation of the allowance for loan losses, as well as the percent of each loan category to the total loan portfolio for each of the last five years:

Allocation of Allowance for Loan Losses

December 31,	2013	%	2012	%	2011	%	2010	%	2009	%
	(Dollars in Thousands)									
Domestic										
Commercial & industrial	\$ 516	12%	\$ 428	12%	\$ 342	10%	\$ 302	8%	\$ 320	7%
Commercial real estate	2,144	36%	1,537	33%	1,386	34%	1,392	34%	1,296	33%
Residential real estate	1,819	50%	1,896	52%	1,910	53%	1,831	55%	1,589	57%
Consumer	105	2%	139	3%	125	3%	152	3%	182	3%
Unallocated	271	0%	312	0%	124	0%	51	0%	64	0%
Total	<u>\$ 4,855</u>	<u>100%</u>	<u>\$ 4,312</u>	<u>100%</u>	<u>\$ 3,887</u>	<u>100%</u>	<u>\$ 3,728</u>	<u>100%</u>	<u>\$ 3,451</u>	<u>100%</u>

Market Risk - In addition to credit risk in the Company's loan portfolio and liquidity risk in its loan and deposit-taking operations, the Company's business activities also generate market risk. Market risk is the risk of loss in a financial instrument arising from adverse changes in market prices and rates, foreign currency exchange rates, commodity prices and equity prices. Declining capital markets can result in fair value adjustments necessary to record decreases in the value of the investment portfolio for other-than-temporary-impairment. The Company does not have any market risk sensitive instruments acquired for trading purposes. The Company's market risk arises primarily from interest rate risk inherent in its lending and deposit taking activities. During recessionary periods, a declining housing market can result in an increase in loan loss reserves or ultimately an increase in foreclosures. Interest rate risk is directly related to the different maturities and repricing characteristics of interest-bearing assets and liabilities, as well as to loan prepayment risks, early withdrawal of time deposits, and the fact that the speed and magnitude of responses to interest rate changes vary by product. The prolonged weak economy and disruption in the financial markets in recent years may heighten the Company's market risk. As discussed above under "Interest Rate Risk and Asset and Liability Management", the Company actively monitors and manages its interest rate risk through the ALCO process.

INVESTMENT SECURITIES

The Company maintains an investment portfolio of various securities to diversify its revenue sources, as well as to provide interest rate risk and credit risk diversification and to provide for its liquidity and funding needs. The Company's portfolio of available-for-sale securities decreased \$5,697,457 or 13.9% in 2013, from \$40,886,059 at December 31, 2012 to \$35,188,602 at December 31, 2013. The Company's held-to-maturity portfolio consisted entirely of tax-exempt obligations of state and political subdivisions with a book value of \$37,936,911 as of December 31, 2013, compared to \$41,865,555 as of December 31, 2012. The moderate decrease in the held-to-maturity investment portfolio reflects the strong competitive pressures in this segment. However, the Company has maintained most of the new municipal investment relationships it gained in 2012.

Accounting standards require banks to recognize all appreciation or depreciation of investments classified as either trading securities or available-for-sale, either through the income statement or on the balance sheet even though a gain or loss has not been realized. Securities classified as trading securities are marked to market with any gain or loss net of tax effect, charged to income. The Company's investment policy does not permit the holding of trading securities. Securities classified as held-to-maturity are recorded at book value, subject to adjustment for other-than-temporary impairment. Securities classified as available-for-sale are marked to market with any gain or loss after taxes charged to shareholders' equity in the consolidated balance sheets. These adjustments in the available-for-sale portfolio resulted in an accumulated unrealized loss net of taxes of \$47,466 at December 31, 2013, down from an unrealized gain of \$171,758 at December 31, 2012. This decrease of \$219,224 was due primarily to a change in the interest rate environment. Although classified as available-for-sale, these securities are short term and we anticipate keeping them until maturity. The unrealized loss positions within the investment portfolio as of December 31, 2013 and 2012 are considered by management to be temporary.

The restricted equity securities comprise the Company's membership stock in the FRBB and FHLBB. On December 31, 2013 and 2012 the Company held \$588,150 in FRBB stock and \$3,044,700 and \$3,433,200, respectively, in FHLBB stock. Membership in the FRBB and FHLBB requires the purchase of their stock in specified amounts. The stock is typically held for an extended period of time and can only be sold back to the issuer, or in the case of FHLBB, a member institution. Restricted equity stock is sold and redeemed at par. Due to the unique nature of the restricted equity stock, including the non-investment purpose for owning it, the ownership structure and restrictions and the absence of a trading market for the stock, these securities are not marked to market, but carried at par.

Some of the Company's investment securities have a call feature, meaning that the issuer may call in the investment before maturity, at predetermined call dates and prices. In 2013, call features on two investments were exercised by the issuers, compared to three calls during 2012.

The Company's investment portfolios as of December 31 were as follows:

	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Fair Value(1)</u>

(1) Method used to determine fair value of held-to-maturity securities rounds values to the nearest thousand.

(2) Required equity purchases for membership in the Federal Reserve System and Federal Home Loan Bank System.

The Company does not have investments totaling more than 10% of Shareholders' Equity to any one issuer in the periods presented.

In 2013, there were realized losses of \$5,521 from the sale of investments in U.S. GSE debt securities, compared to realized gains of \$263,443 from the sale of investments in U.S. GSE debt securities and \$87,858 from the sale of the Company's Fannie Mae preferred stock during 2012. At the time of sale, the Fannie Mae preferred stock had an aggregate cost basis, net of previous write downs, of \$42,360. In 2011, there were no sales of investments from the available-for-sale portfolio.

The following is an analysis of the maturities and yields of the debt securities in the Company's investment portfolio for each of the last three fiscal years:

Maturities and Yields of Investment Portfolio

December 31,	2013		2012		2011

(1) Investments classified as available-for-sale are presented at fair value, and investments classified as held-to-maturity are presented at book value

(2) The yield on obligations of state and political subdivisions is calculated on a tax equivalent basis assuming a 34 percent tax rate.

(3) Required equity purchases for membership in the Federal Reserve System and Federal Home Loan Bank System.

COMMITMENTS, CONTINGENCIES AND OFF-BALANCE-SHEET ARRANGEMENTS

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and risk-sharing commitments on certain sold loans. Such instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheet. The contract or notional amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments. During 2013, the Company did not engage in any activity that created any additional types of off-balance-sheet risk.

The Company generally requires collateral or other security to support financial instruments with credit risk. The Company's financial instruments whose contract amount represents credit risk as of December 31 were as follows:

	Contract or Notional Amount	
	2013	2012
Unused portions of home equity lines of credit	\$ 21,961,527	\$ 21,120,077
Other commitments to extend credit	41,230,202	45,551,282
Residential construction lines of credit	2,010,417	1,138,872
Commercial real estate and other construction lines of credit	15,592,702	1,762,424
Standby letters of credit and commercial letters of credit	1,655,469	1,193,480
Recourse on sale of credit card portfolio	276,650	352,000
MPF credit enhancement obligation, net (See Note 16)	1,543,211	2,035,858

Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future funding requirements. The Company sold its credit card portfolio during the third quarter of 2007, but retained a partial recourse obligation under the terms of the sale, based on total lines, not balances outstanding. Based on historical losses, the Company does not expect any significant losses from this commitment.

In connection with its 2007 trust preferred securities financing, the Company guaranteed the payment obligations under the \$12,500,000 of capital securities of its subsidiary, CMTV Statutory Trust I. The source of funds for payments by the Trust on its capital securities is payments made by the Company on its debentures issued to the Trust. The Company's obligation under those debentures is fully reflected in the Company's balance sheet, in the gross amount of \$12,887,000 at December 31, 2013 and 2012, of which \$12,500,000 represents external financing through the issuance to investors of capital securities by CMTV Statutory Trust I.

EFFECTS OF INFLATION

Rates of inflation affect the reported financial condition and results of operations of all industries, including the banking industry. The effect of monetary inflation is generally magnified in bank financial and operating statements because most of a bank's assets and liabilities are monetary in nature and, as costs and prices rise, cash and credit demands of individuals and businesses increase, while the purchasing power of net monetary assets declines. During the economic downturn that began in 2008, the capital and credit markets experienced significant volatility and disruption, with the federal government taking unprecedented steps to deal with the economic situation. These measures have included significant deficit spending as well as quantitative easing of the money supply by the FRB, which could result in inflation in future periods.

The impact of inflation on the Company's financial results is affected by management's ability to react to changes in interest rates in order to reduce inflationary effect on performance. Interest rates do not necessarily move in conjunction with changes in the prices of other goods and services. As discussed above, management seeks to manage the relationship between interest-sensitive assets and liabilities in order to protect against significant interest rate fluctuations, including those resulting from inflation.

LIQUIDITY AND CAPITAL RESOURCES

Managing liquidity risk is essential to maintaining both depositor confidence and stability in earnings. Liquidity management refers to the ability of the Company to adequately cover fluctuations in assets and liabilities. Meeting loan demand (assets) and covering the withdrawal of deposit funds (liabilities) are two key components of the liquidity management process. The Company's principal sources of funds are deposits, amortization and prepayment of loans and securities, maturities of investment securities, sales of loans available-for-sale, and earnings and funds provided from operations. Maintaining a relatively stable funding base, which is achieved by diversifying funding sources, competitively pricing deposit products, and extending the contractual maturity of liabilities, reduces the Company's exposure to roll over risk on deposits and limits reliance on volatile short-term borrowed funds. Short-term funding needs arise from declines in deposits or other funding sources and funding requirements for loan commitments. The Company's strategy is to fund assets to the maximum extent possible with core deposits that provide a sizable source of relatively stable and low-cost funds.

Currently, the Company is not offering above market rates or rate “specials” to attract or retain “rate chasers”. The Company however, recognizes that, at times, when loan demand exceeds deposit growth it may be desirable to utilize alternative sources of deposit funding to augment retail deposits and borrowings. One-way deposits purchased through the Certificate of Deposit Account Registry Service (“CDARS”), maintained by the Promontory Interfinancial Network provide an alternative funding source when needed. Such deposits are generally considered a form of brokered deposits. The Company had no one-way deposits at December 31, 2013 and 2012. In addition, two-way CDARS deposits allow the Company to provide FDIC deposit insurance to its customers in excess of account coverage limits by exchanging deposits with other CDARS members. At December 31, 2013 and 2012, the Company reported \$1,103,008 and \$1,028,152, respectively, in CDARS deposits representing exchanged deposits with other CDARS participating banks. The balance in ICS deposits discussed above under “Changes in Financial Condition” was \$17,290,435 and \$13,529,424 at December 31, 2013 and 2012, respectively.

The Company has a Borrower-in-Custody arrangement with the FRBB secured by eligible commercial loans, commercial real estate loans and home equity loans, resulting in an available line of \$74,929,216 and \$71,345,734, respectively, at December 31, 2013 and 2012. Credit advances in the FRBB lending program are overnight advances with interest chargeable at the primary credit rate (generally referred to as the discount rate), which was 75 basis points at December 31, 2013. At December 31, 2013 and 2012, the Company had no outstanding advances against this line.

The Company has an unsecured Federal Funds line with the FHLBB with an available balance of \$500,000 at December 31, 2013 and 2012. Interest is chargeable at a rate determined daily approximately 25 basis points higher than the rate paid on federal funds sold. At December 31, 2013 and 2012, additional borrowing capacity of approximately \$72,556,030 and \$72,591,692, respectively, was available through the FHLBB secured by the Company’s qualifying loan portfolio (generally, residential mortgages), reduced by outstanding advances and collateral pledges.

The Company has an unsecured line with one of its correspondent banks with an available line of \$3,000,000 at December 31, 2013 and 2012.

At December 31, the Company had advances against the respective lines, consisting of the following:

	<u>2013</u>	<u>2012</u>
Long-Term Advances		
FHLBB term borrowing, 1.71% fixed rate, due January 28, 2013	\$ 0	\$ 6,000,000

Under a separate agreement, the Company has the authority to collateralize public unit deposits up to its FHLBB borrowing capacity (\$72,556,030 and \$72,591,692, respectively, less outstanding advances and collateral pledges) with letters of credit issued by the FHLBB. The Company offers a Government Agency Account to its municipal customers collateralized with these FHLBB letters of credit. At December 31, 2013 and 2012, approximately \$20,800,000 and \$15,800,000, respectively, of qualifying residential real estate loans was pledged as collateral to the FHLBB for these collateralized governmental unit deposits, which reduced dollar-for-dollar the available borrowing capacity under the FHLBB line of credit. Total fees paid by the Company to the FHLBB in connection with these letters of credit were \$43,654 for 2013 and \$41,749 for 2012.

Securities sold under agreements to repurchase amounted to \$29,644,615, \$34,149,608, and \$21,645,446 as of December 31, 2013, 2012, and 2011, respectively with weighted average interest rates of 0.24%, 0.57%, and 0.50% at December 31, 2013, 2012, and 2011, respectively. The average daily balance of these repurchase agreements was \$28,537,504 \$26,383,409, and \$21,725,160 during 2013, 2012, and 2011, respectively. The maximum borrowings outstanding on these agreements at any month-end reporting period of the Company were \$34,539,586, \$34,149,608, and \$24,090,954 during 2013, 2012, and 2011 respectively. These repurchase agreements mature daily and carried a weighted average interest rate of 0.39% during 2013, 0.55% during 2012 and 0.65 during 2011.

Total cash dividends of \$0.56 per common share were declared during 2013 and 2012. In December, 2013, the Company declared a \$0.14 per common share cash dividend, payable February 1, 2014 to shareholders of record as of January 15, 2014, requiring the Company to accrue a liability of \$679,631 for this dividend in the fourth quarter of 2013.

The following table illustrates the changes in shareholders' equity from December 31, 2012 to December 31, 2013:

Balance at December 31, 2012 (book value \$8.49 per common share)	\$ 43,352,575
Net income	5,086,655
Issuance of stock through the Dividend Reinvestment Plan	703,682
Dividends declared on common stock	(2,706,461)
Dividends declared on preferred stock	(81,250)
Change in unrealized loss on available-for-sale securities, net of tax	(219,224)
Balance at December 31, 2013 (book value \$8.96 per common share)	<u>\$ 46,135,977</u>

The primary objective of the Company's capital planning process is to balance appropriately the retention of capital to support operations and future growth, with the goal of providing shareholders an attractive return on their investment. To that end, management monitors capital retention and dividend policies on an ongoing basis.

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory - and possibly additional discretionary - actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items, as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Prompt corrective action capital requirements are applicable to banks, but not bank holding companies.

The Company and the Bank are subject to regulatory capital requirements. The Company's tier 1 leverage, tier 1 risk-based and total risk-based capital ratios were 8.04%, 11.48% and 13.09%, respectively, at December 31, 2013. The Company's capital ratios exceeded all applicable regulatory requirements at December 31, 2013. The Bank's tier 1 leverage, tier 1 risk-based and total risk-based capital ratios were 8.20%, 11.72% and 12.97%, respectively, at December 31, 2013. Each of these ratios exceeds the current regulatory guidelines for a well-capitalized institution, the highest regulatory capital category. (See Note 20 to the consolidated financial statements)

In addition, as of December 31, 2013 the Bank was considered well capitalized under the regulatory capital framework for Prompt Corrective Action.

In July 2013, the Federal Reserve Board adopted final rules implementing the Basel III capital standards, which significantly revise the regulatory capital requirements for U.S. financial institutions, including community banks. Among other things, the new capital rules revise the definition of various regulatory capital components and related calculation methods, add a new regulatory capital component (common equity tier 1 capital), increase the minimum required tier 1 capital, implement a new capital conservation buffer and restrict dividends and certain discretionary bonus payments when the buffer is not maintained. The final rules, which contain certain regulatory relief provisions for community banks, take effect for community banks on January 1, 2015, and are phased in over a four year period ending on January 1, 2019. Management is evaluating the potential impact of the new capital rules on the Company and believes that, as of December 31, 2013, the Company and the Bank would meet all capital adequacy requirements under the Basel III capital standards on a fully-phased in basis as if such requirements were currently in effect.

CERTIFICATION

I, Stephen P. Marsh, Chairman, President and Chief Executive Officer, certify that:

1. I have reviewed this annual report on Form 10-K of Community Bancorp.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

I, Louise M. Bonvechio, Treasurer (Principal Financial Officer), certify that:

1. I have reviewed this annual report on Form 10-K of Community Bancorp.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO 18 U. S. C. SECTION 1350 AS ADOPTED
PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Annual Report of Community Bancorp. (the "Company") on Form 10-K for the period ended December 31, 2013, filed with the Securities and Exchange Commission on the date hereof (the "Report"), the undersigned Principal Executive Officer of the Company hereby certifies, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that: 1) the Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, and 2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company as of and for the periods covered in the Report.

A signed original of this written statement required by Section 906 has been provided to Community Bancorp. and will be retained by Community Bancorp. and furnished to the Securities and Exchange Commission or its staff upon request.
