(Mark One)

- ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**
For the fiscal year ended December 31, 2008
- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**
For the transition period from _____ to _____
Commission file number 1-14982

HUTTIG BUILDING PRODUCTS, INC.

(Exact name of registrant as specified in its charter)

Delaware
*(State or other jurisdiction of
incorporation or organization)*

43-0334550
*(I.R.S. Employer
Identification No.)*

**555 Maryville University Drive
Suite 400**

St. Louis, Missouri 63141
(Address of principal executive offices, including zip code)

(314) 216-2600

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

<u>(Title of Each Class)</u>	<u>(Name of Each Exchange on Which Registered)</u>
Common Stock, par value \$.01 per share	None
Preferred Share Purchase Rights	None

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for at least the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the Common Stock held by non-affiliates of the registrant as of the last business day of the quarter ended **June 30, 2008** was approximately **\$27 million**. For purposes of this calculation only, the registrant has excluded stock beneficially owned by the registrants' directors and officers. By doing so, the registrant does not admit that such persons are affiliates within the meaning of Rule 405 under the Securities Act of 1933 or for any other purposes.

The number of shares of Common Stock outstanding on **February 16, 2009** was **22,037,716** shares.

DOCUMENTS INCORPORATED HEREIN BY REFERENCE.

Parts of the registrant's definitive proxy statement for the 2009 Annual Meeting of Shareholders are incorporated by reference in Part III of this Annual Report on Form 10-K.

PART I

ITEM 1 — BUSINESS

General

Huttig Building Products, Inc., a Delaware corporation incorporated in 1913, is one of the largest domestic distributors of millwork, building materials and wood products used principally in new residential construction and in home improvement, remodeling and repair work. We purchase from leading manufacturers and we distribute our products through 30 wholesale distribution centers serving 45 states. Our distribution centers sell principally to building materials dealers, national buying groups, home centers and industrial users, including makers of manufactured homes. For the year ended December 31, 2008, we generated net sales of \$671.0 million.

We conduct our business through a two-step distribution model. This means we resell the products we purchase from manufacturers to our customers, who then sell the products to the final end users, who are typically professional builders and independent contractors engaged in residential construction projects.

Our products fall into three categories: (i) millwork, which includes doors, windows, moulding, stair parts and columns, (ii) general building products, which include composite decking, connectors, fasteners, house-wrap, roofing products and insulation, and (iii) wood products, which include engineered wood products, such as floor systems, as well as wood panels and lumber.

Doors and engineered wood products often require an intermediate value added service between the time the product leaves the manufacturer and before it is delivered to the final customer. Such services include pre-hanging doors and cutting engineered wood products from standard lengths to job-specific requirements, both of which services we perform on behalf of our customers. In addition, with respect to almost all of our products, we have the capability to buy in bulk and disaggregate these large shipments to meet individual customer requirements. For some products, we carry a depth and breadth of products that our customers cannot reasonably stock themselves. Our customers benefit from these services because they do not need to invest capital in door hanging facilities or cutting equipment, nor do they need to incur the costs associated with maintaining large inventories of products. Our size, broad geographic presence and extensive fleet and logistical capabilities enable us to purchase products in large volumes at favorable prices, stock a wide range of products for rapid delivery and manage inventory in a reliable, efficient manner.

We serve our customers, whether a local dealer or a national account, through our 30 wholesale distribution centers. This approach enables us to work with our customers and suppliers to ensure that local inventory levels, merchandising, purchasing and pricing are tailored to the requirements of each market. Each distribution center also has access to our single-platform nation-wide inventory management system. This provides the local manager with real-time inventory availability and pricing information. We also support our distribution centers with credit and financial controls, training and marketing programs and human resources expertise. We believe that these distribution capabilities and efficiencies offer us a competitive advantage as compared to those of local and regional competitors.

In this Annual Report on Form 10-K, when we refer to “Huttig,” the “Company”, “we” or “us,” we mean Huttig Building Products, Inc. and its subsidiaries and predecessors unless the context indicates otherwise.

Industry Characteristics and Trends

The residential building materials distribution industry is characterized by its substantial size, its highly fragmented ownership structure and an increasingly competitive environment. The industry can be broken into two categories: (i) new construction and (ii) home repair and remodeling.

Residential construction activity in both categories is closely linked to a variety of factors directly affected by general economic conditions, including employment levels, job and household formation, interest rates, housing prices, tax policy, availability of mortgage financing, prices of commodity wood and steel products, immigration patterns, regional demographics and consumer confidence. We monitor a broad set of

macroeconomic and regional indicators, including new housing starts and permit issuances, as indicators of our potential future sales volume.

New housing activity in the United States is currently in a severe downturn, which is expected to continue during 2009. New housing starts in the United States decreased to approximately 0.9 million in 2008 from 1.4 million and 1.8 million in 2007 and 2006, respectively, including 0.6 million single family residences in 2008 versus 1.0 million and 1.5 million in 2007 and 2006, respectively, based on data from the U.S. Census Bureau. According to the U.S. Census Bureau, total spending on new single family residential construction in 2008 was \$186 billion.

The residential building materials distribution industry has undergone significant changes over the last three decades. Prior to the 1970s, residential building products were distributed almost exclusively by local dealers, such as lumberyards and hardware stores. These channels served both the retail consumer and the professional builder. Dealers generally purchased their products from wholesale distributors and sold building products directly to homeowners, contractors and homebuilders. In the late 1970s and 1980s, substantial changes began to occur in the retail distribution of building products. The introduction of the mass retail, big box format by The Home Depot and Lowe's began to alter this distribution channel, particularly in metropolitan markets. They began displacing local dealers by selling a broad range of competitively priced building materials to the homeowner and small home improvement contractors. We generally do not compete with building products mass retailers such as The Home Depot and Lowe's. Their business model for building products is primarily suited to sell products that require little or no differentiation and that turn over in very high volumes. Conversely, a substantial portion of our product offering consists of products that typically require intermediate value-added handling and/or a large breadth of SKUs. Furthermore, we do not sell directly to retail customers.

We service large local, regional and national independent building products dealers who in turn sell to contractors and professional builders. These large local, regional and national building products dealers, often referred to as "pro dealers," continue to distribute a significant portion of the residential building materials sold in the United States. These pro dealers operate in an increasingly competitive environment. Consolidation among building products manufacturers favors distributors that can buy in bulk and break down large production runs to specific local requirements. In addition, increasing scale and sophistication among professional builders and contractors places a premium on pro dealers that can make a wide variety of building products readily available at competitive prices. In response to the increasingly competitive environment for building products, many pro dealers have either consolidated or formed buying groups in order to increase their purchasing power and/or service levels.

We believe the evolving characteristics of the residential building materials distribution industry, particularly the consolidation trend, favor companies like us that operate nationally and have significant infrastructure in place to accommodate the needs of customers across geographic regions. We are the only national distributor of millwork products. Because of our wide geographic presence, size, purchasing power, materials handling efficiencies, and investment in millwork services, we believe we are well positioned to serve the needs of the consolidating pro dealer community.

Products

Our goal is to offer products that allow us to provide value to our customers, either by performing incremental services on the products before delivering them to customers, buying products in bulk and disaggregating them for individual customers, or carrying a depth and breadth of products that customers cannot reasonably stock themselves at each location. Our products can be broken into three main categories:

- Millwork, including exterior and interior doors, pre-hung door units, windows, patio doors, mouldings, frames, stair parts and columns. Key brands in this product category include Therma-Tru, Masonite, HB&G, Woodgrain, Windsor, and L. J. Smith;
- General building products, such as roofing, siding, insulation, flashing, housewrap, connectors and fasteners, decking, drywall, kitchen cabinets and other miscellaneous building products. Key brands in

this product category include Typar, Timbertech, Simpson Strong-Tie, Owens Corning, CertainTeed and Grace;

- Wood products, which include engineered wood products, such as floor systems, and other wood products, such as lumber and wood panels. Within the wood products category, engineered wood continues to be a focus product for us. The engineered wood product line offers us the ability to provide our customers with value-added services, such as floor system take-offs, cut-to-length packages and just-in-time, cross-dock delivery capabilities.

The following table sets forth information regarding the percentage of our net sales from continuing operations represented by our principal product categories sold during each of the last three fiscal years. While the table below generally indicates the mix of our sales by product category, changes in the prices of commodity wood products and in unit volumes sold typically affect our product mix on a year-to-year basis.

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Millwork	46%	50%	54%
General Building Products	43%	37%	32%
Wood Products	11%	13%	14%

Customers

During 2008, we served over 6,400 customers, with no single customer accounting for more than 9% of our sales. Building materials pro dealers represent our single largest customer group. Our top 10 customers accounted for approximately 35% of our total sales in 2008.

Within the pro dealer category, a growing number of our customers represent national accounts. These are large pro dealers that operate in more than one state or region. We sell to pro dealer national accounts such as Pro-Build, 84 Lumber, Stock Building Supply, BMC West and Builders FirstSource. To a much lesser extent, we also sell to the home centers. We believe that our size, which lets us purchase in bulk, achieve operating efficiencies, operate on a national scale and offer competitive pricing, makes us well suited to service the consolidating pro dealer community. During 2008, our sales to national accounts, including buying groups, were 37% of our total sales, an increase from 35% of our total sales in 2007.

Organization

Huttig operates on a nation-wide basis. Customer sales are conducted principally through 30 distribution centers serving 45 states. Distribution centers are organized into two regions, primarily divided between branches east and west of St. Louis, Missouri. Administrative and executive management functions are centralized in a headquarters office located in St. Louis, Missouri. We believe that this structure permits us to be closer to our customers and serve them better, while being able to take advantage of certain scale efficiencies that come from our size.

Headquarter functions include those activities that can be shared across our full distribution platform. These include items such as treasury management, accounting, information technology, human resources, legal, internal audit and investor relations along with small corporate operations, marketing and product management groups.

Operating responsibility resides with each distribution center’s general manager. The general manager assumes responsibility for daily operations, inventory management and on-site personnel and logistics. Each distribution center generally maintains its own separate sales and warehouse staffs supported by a small administrative team.

Sales

Sales responsibility principally lies with general managers at our distribution centers. The sales function is generally divided into two channels: outside sales and inside sales. Our outside field representatives make on-site calls to local and regional customers. Our inside sales people generally receive telephone orders from

customers. In addition, we maintain a national account sales team that serves customers that span multiple regions. Our outside sales force is generally compensated by a base salary plus commissions determined primarily on sales margin.

Distribution Strategy and Operations

We conduct our business through a two-step distribution model. This means that we resell the products that we purchase from manufacturers to our customers, who then sell the products to the final end user. Our principal customer is the pro dealer. To a much more limited extent, we also sell to the retail home centers and certain industrial users, such as makers of manufactured housing.

Despite our nation-wide reach, the local distribution center is still a principal focus of our operations, and we tailor our business to meet local demand and customer needs. We customize product selection, inventory levels, services provided and prices to meet local market requirements. We support this strategy through our single platform information technology system. This system provides each distribution center's general manager real-time access to pricing, inventory availability and margin analysis. This system provides product information both for that location and across the entire Huttig network of distribution centers. More broadly, our sales force, in conjunction with our product management teams, works with our suppliers and customers to get the appropriate mix, quantity and pricing of products suited to each local market.

We purchased products from more than 1,000 different suppliers in 2008. We generally negotiate with our major suppliers on a national basis to leverage our total volume purchasing power, which we believe provides us with an advantage over our locally based competitors. The majority of our purchases are made from suppliers that offer payment discounts and volume-related incentive programs. Although we generally do not have exclusive distribution rights for our key products and we do not have long-term contracts with many of our suppliers, we believe our national footprint, buying power and distribution network makes us an attractive distributor for many manufacturers. Moreover, we have long-standing relationships with many of our key suppliers.

We regularly evaluate opportunities to introduce new products. This is primarily driven by customer demand or market requirements. We have found that customers generally welcome a greater breadth of product offering as it can improve their purchasing and operating efficiencies by providing for "one stop" shopping. Similarly, selectively broadening our product offering enables us to drive additional products through our distribution system, thereby increasing the efficiency of our operations by better utilizing our existing infrastructure.

We focus on selling respected, brand-name products. We believe that brand awareness is an increasingly important factor in building products purchasing decisions. We generally benefit from the quality levels, marketing initiatives and product support provided by manufacturers of branded products. We also benefit by being associated with the positive attributes that customers typically equate with branded products.

Competition

We compete with many local and regional building product distributors and in certain markets and product categories, with national building product distributors. In certain markets, we compete with national building materials suppliers with national distribution capability, such as BlueLinx, Boise Cascade and Weyerhaeuser. We also compete with product manufacturers that engage in direct sales, while at the same time distributing products for some of these same manufacturers.

The principal factors on which we compete are pricing and availability of product, service and delivery capabilities, ability to assist with problem-solving, customer relationships, geographic coverage and breadth of product offerings.

Our size and geographic coverage are advantageous in obtaining and retaining distribution rights for brand name products. Our size also permits us to attract experienced sales and service personnel and gives us the resources to provide company-wide sales, product and service training programs. By working closely with

our customers and suppliers and utilizing our single information technology platform, we believe our branches are well-positioned to maintain appropriate inventory levels and to deliver completed orders on time.

Seasonality and Working Capital

Various cyclical and seasonal factors, such as general economic conditions and weather, historically have caused our results of operations to fluctuate from period to period. Our size, extensive nation-wide operating model and the geographic diversity of our distribution centers to some extent mitigate our exposure to these cyclical and seasonal factors. These factors include levels of new construction, home improvement and remodeling activity, weather, interest rates and other local, regional and national economic conditions. During the past three years, our results of operations have been adversely affected by the severe downturn in new housing activity in the United States. We expect this downturn to continue during 2009 based on the current level of housing activity and industry forecasts for 2009. We anticipate that fluctuations from period to period will continue in the future. Our first and fourth quarters are generally adversely affected by winter weather patterns in the Midwest and Northeast, which typically result in seasonal decreases in levels of construction activity in these areas. Because much of our overhead and expenses remain relatively fixed throughout the year, our operating profits also tend to be lower during the first and fourth quarters. In addition, other weather patterns, such as hurricane season in the Southeast region of the United States during the third and fourth quarters, can have an adverse impact on our profits in a particular period.

We depend on cash flow from operating activities and funds available under our secured credit facility to finance seasonal working capital needs, capital expenditures and any acquisitions that we may undertake. We typically generate cash from working capital reductions in the fourth quarter of the year and build working capital during the first quarter in preparation for our second and third quarters. Our working capital requirements are generally greatest in the second and third quarters, reflecting the seasonal nature of our business. The second and third quarters are also typically our strongest operating quarters, largely due to more favorable weather throughout many of our markets compared to the first and fourth quarters. We maintain significant inventories to meet rapid delivery requirements of our customers and to enable us to obtain favorable pricing, delivery and service terms with our suppliers. At December 31, 2008 and 2007, inventories constituted approximately 41% and 42% of our total assets, respectively. We closely monitor operating expenses and inventory levels during seasonally affected periods and, to the extent possible, manage variable operating costs to minimize seasonal effects on our profitability.

Credit

Huttig's corporate management establishes an overall credit policy for sales to customers and then delegates responsibility for most credit decisions to credit personnel located within our two regions. Our credit policies, together with careful monitoring of customer balances, have resulted in bad debt expense of less than 0.3% of net sales in 2008 and less than 0.1% during 2007 and 2006. The increase in 2008 relates primarily to the downturn in business of our customers. Approximately 98% of our sales in 2008 were to customers to whom we had provided credit for those sales.

Backlog

Our customers generally order products on an as-needed basis. As a result, virtually all product shipments in a given fiscal quarter result from orders received in that quarter. Consequently, order backlog represents only a very small percentage of the product sales that we anticipate in a given quarter and is not indicative of actual sales for any future period.

Tradenames

Historically, Huttig has operated under various trade names in the markets we serve, retaining the names of acquired businesses for a period of time to preserve local identification. To capitalize on our national presence, all of our distribution centers operate under the primary trade name "Huttig Building Products."

Huttig has no material patents, trademarks, licenses, franchises or concessions other than the Huttig Building Products® name and logo, which are registered trademarks.

Environmental Matters

We are subject to federal, state and local environmental protection laws and regulations. We believe that we are in material compliance, or are taking action aimed at assuring material compliance, with applicable environmental protection laws and regulations. However, there can be no assurance that future environmental liabilities will not have a material adverse effect on our financial condition or results of operations.

We have been identified as a potentially responsible party in connection with the cleanup of contamination at a formerly owned property in Montana and currently owned property in Oregon. See Part I, Item 3 — “Legal Proceedings.”

In addition, some of our current and former distribution centers are located in areas of current or former industrial activity where environmental contamination may have occurred, and for which we, among others, could be held responsible. We currently believe that there are no material environmental liabilities at any of our distribution center locations.

Employees

As of December 31, 2008, we employed approximately 1,200 persons, of which approximately 13% were represented by unions. We have not experienced any significant strikes or other work interruptions in recent years and have maintained generally favorable relations with our employees.

Available Information

Huttig files with the U.S. Securities and Exchange Commission quarterly and annual reports on Forms 10-Q and 10-K, respectively, current reports on Form 8-K and proxy statements pursuant to the Securities Exchange Act of 1934, in addition to other information as required. The public may read and copy our SEC filings at the SEC’s Public Reference Room at 100 F Street, N.E., Room 1580, Washington, D.C. 20549 and may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. We file this information with the SEC electronically, and the SEC maintains a website that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC at <http://www.sec.gov>.

Our website address is <http://www.huttig.com>. We make available, free of charge at the “Investor Relations” section of our website, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the 1934 Act. This information is available on our website as soon as reasonably practicable after we electronically file it with, or furnish it to, the SEC. Reports of beneficial ownership filed pursuant to Section 16(a) of the 1934 Act are also available on our website.

ITEM 1A — RISK FACTORS

In addition to the other information contained in this Form 10-K, the following risk factors should be considered carefully in evaluating the Company’s business. The Company’s business, financial condition or results of operations could be materially adversely affected by any of these risks. Please note that additional risks not presently known to the Company or that the Company currently deems immaterial may also impair its business and operations.

The homebuilding industry is in a prolonged significant downturn and any further downturn or sustained continuation of the current downturn will continue to materially affect our business, liquidity and operating results

The downturn in the residential construction market is in its third year and it has become one of the most severe housing downturns in U.S. history. Currently, the U.S. economy appears to be heading into a deepening

recession. There is an oversupply of unsold homes on the market coupled with tighter lending requirements from financial institutions. As a result, the pool of qualified home buyers has declined significantly. Moreover, the government's legislative and administrative measures aimed at restoring liquidity to the credit markets and providing relief to homeowners facing foreclosure have only recently begun. It is unclear whether these measures will effectively stabilize prices and home values or restore confidence and increase demand in the homebuilding industry.

Our sales depend heavily on the strength of national and local new residential construction and home improvement and remodeling markets. The strength of these markets depends on new housing starts and residential renovation projects, which are a function of many factors beyond our control. Some of these factors include employment levels, job and household formation, interest rates, housing prices, tax policy, availability of mortgage financing, prices of commodity wood and steel products, immigration patterns, regional demographics and consumer confidence. In particular, an increase in the unemployment levels in 2008 and a further increase in early 2009 appear certain.

During the past three years, our results of operations have been adversely affected by the severe downturn in new housing activity in the United States which is expected to continue during 2009. A prolonged continuation of the current downturn and any future downturns in the markets that we serve or in the economy generally will have a material adverse effect on our operating results, liquidity and financial condition, including but not limited to the valuation of our goodwill and deferred tax assets. Reduced levels of construction activity may result in continued intense price competition among building materials suppliers, which may adversely affect our gross margins. We can not provide assurance that our responses to the downturn or the government's attempts to address the troubles in the economy will be successful.

The industry in which we compete is highly cyclical, and any downturn resulting in lower demand or increased supply would have a materially adverse impact on our financial results.

The building products distribution industry is subject to cyclical market pressures caused by a number of factors that are out of our control, such as general economic and political conditions, inventory levels of new and existing homes for sale, levels of new construction, home improvement and remodeling activity, interest rates and population growth. To the extent that cyclical market factors adversely impact overall demand for building products or the prices that we can charge for our products, our net sales and margins would likely decline in the same time frame as the cyclical downturn occurs. Because much of our overhead and expense is relatively fixed in nature, a decrease in sales and margin generally has a significant adverse impact on our results of operations. For example, during the past three years, our results of operations have been adversely affected by the severe downturn in new housing activity in the United States. Also, to the extent our customers experience downturns in business, our ability to collect our receivables could be adversely affected. Finally, the unpredictable nature of the cyclical market factors that impact our industry make it difficult to forecast our operating results.

Our financial results reflect the seasonal nature of our operations.

Our first quarter revenues and, to a lesser extent, our fourth quarter revenues are typically adversely affected by winter construction cycles and weather patterns in colder climates as the level of activity in the new construction and home improvement markets decreases. Because much of our overhead and expense remains relatively fixed throughout the year, our operating profits also tend to be lower during the first and fourth quarters. In addition, other weather patterns, such as hurricane season in the Southeast region of the United States during the third and fourth quarters, can have an adverse impact on our profits in a particular period.

The building materials distribution industry is fragmented and competitive, and we may not be able to compete successfully with some of our existing competitors or new entrants in the markets we serve.

The building materials distribution industry is fragmented and competitive. Our competition varies by product line, customer classification and geographic market. The principal competitive factors in our industry are:

- pricing and availability of product;
- service and delivery capabilities;
- ability to assist with problem-solving;
- customer relationships;
- geographic coverage; and
- breadth of product offerings.

Also, financial stability is important to manufacturers in choosing distributors for their products.

We compete with many local, regional and, in some markets and product categories, national building materials distributors and dealers. In addition, some product manufacturers sell and distribute their products directly to our customers, and the volume of such direct sales could increase in the future. Additionally, manufacturers of products distributed by us may elect to sell and distribute directly to our customers in the future or enter into exclusive supplier arrangements with other two-step distributors. In addition, home center retailers, which have historically concentrated their sales efforts on retail consumers and small contractors, may intensify their marketing efforts to larger contractors and homebuilders. Some of our competitors have greater financial and other resources and may be able to withstand sales or price decreases better than we can. We also expect to continue to face competition from new market entrants. We may be unable to continue to compete effectively with these existing or new competitors, which could have a material adverse effect on our financial condition and results of operations.

The termination of key supplier relationships may have an immediate adverse effect on our financial condition and results of operations.

We distribute building materials that we purchase from a number of major suppliers. As is customary in our industry, most of our relationships with these suppliers are terminable without cause on short notice. Although we believe that relationships with our existing suppliers are strong and that in most cases we would have access to similar products from competing suppliers, the termination of key supplier relationships or any other disruption in our sources of supply, particularly of our most commonly sold items, could have a material adverse effect on our financial condition and results of operations. Supply shortages resulting from unanticipated demand or production difficulties could occur from time to time and could have a material adverse effect on our financial condition and results of operations.

If we are unable to meet the financial covenant under our credit facility, the lenders could elect to accelerate the repayment of the outstanding balance and, in that event, we would be forced to seek alternative sources of financing.

We are party to a five-year \$160.0 million asset based senior secured revolving credit facility which contains a minimum fixed charge coverage ratio that is tested when our excess borrowing availability, as defined, is less than \$25.0 million. This agreement matures in October 2011. Our excess committed borrowing availability at December 31, 2008 and February 16, 2009 was \$44.5 million and \$39.6 million, respectively. Our excess borrowing availability could drop below \$25.0 million and we would be required to meet the minimum fixed charge coverage ratio. As of December 31, 2008 and February 16, 2009, we would not have met the minimum fixed charged overage ratio, and we believe we will not achieve sufficient financial results necessary to satisfy this covenant if it were required to be tested. If we were unable to maintain excess borrowing availability of more than \$25.0 million and were also unable to comply with this financial covenant,

our lenders would have the right, but not the obligation, to terminate the loan commitments and accelerate the repayment of the entire amount outstanding under the credit facility. The lenders also could foreclose on our assets that secure our credit facility. In that event, we would be forced to seek alternative sources of financing, which may not be available on terms acceptable to us, or at all.

Compliance with the restrictions and the financial covenant under our credit agreement will likely limit, at least in the near term, the amount available to us for borrowing under that facility and may limit management's discretion with respect to certain business matters.

The borrowings under our credit agreement are collateralized by substantially all of the Company's assets, including accounts receivable, inventory and property and equipment, and are subject to certain operating limitations commonly applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends, stock repurchases and transactions with affiliates. A minimum fixed charge coverage ratio must be tested on a pro forma basis prior to consummation of certain significant business transactions outside the Company's ordinary course of business and prior to increasing the size of the facility. These restrictions may limit management's ability to operate our business in accordance with management's discretion, which could limit our ability to pursue certain strategic objectives.

Fluctuation in prices of commodity wood and steel products that we buy and then resell may have a significant impact on our results of operations.

Changes in wood and steel commodity prices between the time we buy these products and the time we resell them have occurred in the past, and we expect fluctuations to occur again in the future. Such changes can adversely affect the gross margins that we realize on the resale of the products. We may be unable to manage these fluctuations effectively or minimize any impact of these changes on our financial condition and results of operations.

We may acquire other businesses, and, if we do, we may be unable to integrate them with our business, which may impair our financial performance.

If we find appropriate opportunities, we may acquire businesses that we believe provide strategic opportunities. If we acquire a business, the process of integration may produce unforeseen operating difficulties and expenditures and may absorb significant attention of our management that would otherwise be available for the ongoing development of our business. If we make future acquisitions, we may issue shares of stock that dilute other stockholders, expend cash, incur debt, assume contingent liabilities or create additional expenses relating to amortizing intangible assets with estimated useful lives, any of which might harm our business, financial condition or results of operations.

We face risks of incurring significant costs to comply with environmental regulations.

We are subject to federal, state and local environmental protection laws and regulations and may have to incur significant costs to comply with these laws and regulations in the future. We have been identified as a potentially responsible party in connection with the cleanup of contamination at a formerly owned property in Montana, where we are voluntarily remediating the property under the oversight of the Montana Department of Environmental Quality. Until the Montana DEQ selects and orders us to implement a final remedy, we can give no assurance as to the scope or cost to us of any final remediation order. We have been identified as a potentially responsible party in connection with the cleanup of possible contamination at a currently owned property in Oregon. We are voluntarily remediating this property under the oversight of the Oregon Department of Environmental Quality. Until the Oregon DEQ selects a final remedy, we can give no assurance as to the scope or cost to us of any final remediation order. In addition, some of our current and former distribution centers are located in areas of current or former industrial activity where environmental contamination may have occurred, and for which we, among others, could be held responsible. As a result, we may incur material environmental liabilities in the future with respect to our current or former distribution center locations.

Goodwill is a significant portion of our total assets and is tested for impairment at least annually, which could result in a material non-cash write-down of goodwill.

Goodwill is subject to impairment tests at least annually and between annual tests in certain circumstances. During 2008, we recorded non-cash impairment charges of goodwill of \$8.7 million primarily related to a reduction in fair value of some of our reporting units primarily as a result of the continuing downturn in the residential construction market. At December 31, 2008 we had goodwill assets of \$9.6 million. We may be required to incur additional non-cash impairment charges in the future that could have a material adverse effect on our financial results in any such period.

We face the risks that product liability claims and other legal proceedings relating to the products we distribute may adversely affect our business and results of operations.

As is the case with other companies in our industry, we face the risk of product liability and other claims of the type that are typical to our industry in the event that the use of products that we have distributed causes personal injury or other damages. Product liability claims in the future, regardless of their ultimate outcome and whether or not covered under our insurance policies or indemnified by our suppliers, could result in costly litigation and have a material adverse effect on our business and results of operations.

Our failure to attract and retain key personnel could have a material adverse effect on our future success.

Our future success depends, to a significant extent, upon the continued service of our executive officers and other key management and sales personnel and on our ability to continue to attract, retain and motivate qualified personnel. The loss of the services of one or more key employees or our failure to attract, retain and motivate qualified personnel could have a material adverse effect on our business.

A number of our employees are unionized, and any work stoppages by our unionized employees may have a material adverse effect on our results of operations.

Approximately 13% of our employees are represented by labor unions as of December 31, 2008. As of December 31, 2008, we had 9 collective bargaining agreements. We may become subject to significant wage increases or additional work rules imposed by future agreements with labor unions representing our employees. Any such cost increases or new work rule implementation could increase our selling, general and administrative expenses to a material extent. In addition, although we have not experienced any strikes or other significant work interruptions in recent years and have maintained generally favorable relations with our employees, no assurance can be given that there will not be any work stoppages or other labor disturbances in the future, which could adversely impact our financial results.

Our retained accident risk is based on estimates, which may not be accurate.

We retain a portion of the accident risk under vehicle liability, workers' compensation and other insurance programs. Loss accruals are based on our best estimate of the cost of resolution of these matters and are adjusted periodically as circumstances change. Due to limitations inherent in the estimation process, our estimates may change. Changes in the estimates of these accruals are charged or credited to earnings in the period determined and may have a material adverse affect on our results of operations in any such period.

Federal and state transportation regulations, as well as increases in the cost of fuel, could impose substantial costs on us, which could adversely affect our results of operations.

As of December 31, 2008, we use our own fleet of approximately 220 tractors, 15 trucks and 390 trailers to service customers throughout the United States. The U.S. Department of Transportation, or DOT, regulates our operations, and we are subject to safety requirements prescribed by the DOT. Vehicle dimensions and driver hours of service also are subject to both federal and state regulation. More restrictive limitations on vehicle weight and size, trailer length and configuration, or driver hours of service would increase our costs.

In addition, distributors are inherently dependent upon energy to operate and, therefore, are impacted by changes in diesel fuel prices. The cost of fuel, which was at a historically high level over the last two years, is largely unpredictable and has a significant impact on the Company's results of operations. Fuel availability, as well as pricing, is also impacted by political and economic factors. It is difficult to predict the future availability of fuel due to the following, among other, factors: dependency on foreign imports of crude oil and the potential for hostilities or other conflicts in oil producing areas; limited refining capacity; and the possibility of changes in governmental policies on fuel production, transportation and marketing. Significant disruptions in the supply of fuel could have a negative impact on the Company's operations and results of operations.

ITEM 1B — UNRESOLVED STAFF COMMENTS

None.

ITEM 2 — PROPERTIES

Our corporate headquarters is located at 555 Maryville University Drive, Suite 400, St. Louis, Missouri 63141, in leased facilities. We lease approximately half of our distribution centers and own the balance. Warehouse space at distribution centers aggregated to approximately 3.2 million square feet as of December 31, 2008. Distribution centers range in size from 21,100 square feet to 260,000 square feet. The types of facilities at these centers vary by location, from traditional wholesale distribution warehouses to facilities with broad product offerings and capabilities for a wide range of value added services such as pre-hung door operations. We believe that our locations are well maintained and adequate for their purposes.

ITEM 3 — LEGAL PROCEEDINGS

We are involved in various claims and litigation arising principally in the ordinary course of business. We believe that the disposition of these matters will not have a material adverse effect on our business or our financial condition.

We are subject to federal, state and local environmental protection laws and regulations. We believe that we are in compliance, or are taking action aimed at assuring compliance, with applicable environmental protection laws and regulations. However, there can be no assurance that future environmental liabilities will not have a material adverse effect on our financial condition or results or operations.

Environmental Matters

In 1995, Huttig was identified as a potentially responsible party in connection with the clean up of contamination at a formerly owned property in Montana that was used for the manufacture of wood windows. We are voluntarily remediating this property under the oversight of and in cooperation with the Montana Department of Environmental Quality (Montana DEQ) and are complying with a 1995 unilateral administrative order of the Montana DEQ to complete a remedial investigation and feasibility study. The remedial investigation was completed and approved in 1998 by the Montana DEQ, which has issued its final risk assessment of this property. In March 2003, the Montana DEQ approved Huttig's work plan for conducting a feasibility study to evaluate alternatives for cleanup. In July 2004, we submitted the feasibility study report, which evaluated several potential remedies, including continuation and enhancement of remedial measures already in place and operating. We also submitted plans for testing a newer technology that could effectively remediate the site. The Montana DEQ approved these plans and a pilot test of the remediation technology was completed in July 2007. The Montana DEQ is in the process of reviewing the results of the pilot test. After evaluating the results of the pilot test, the Montana DEQ will comment on the feasibility study report and its recommended remedy, and then will select a final remedy, publish a record of decision and negotiate with Huttig for an administrative order of consent on the implementation of the final remedy. We spent less than \$0.2 million on remediation costs at this site in each of the years ended December 31, 2008 and 2007. The annual level of future remediation expenditures is difficult to estimate because of the uncertainty relating to the final remedy to be selected by the Montana DEQ. As of December 31, 2008, we have accrued \$0.6 million

for future costs of remediating this site, which management believes represents a reasonable estimate, based on current facts and circumstances, of the currently expected costs of continued remediation. Until the Montana DEQ selects a final remedy, however, management cannot estimate the top of the range of loss or cost to Huttig of the final remediation order.

In June 2004, as part of the due diligence conducted by a party interested in acquiring the American Pine Products facility, a previously unknown release of petroleum hydrocarbons and pentachlorophenol, or PCP, was discovered in soil and groundwater at the facility. Based on the initial investigation, we believe that the source of the contamination was a former wood-dipping operation on the property that was discontinued approximately 20 years ago, prior to our acquiring the facility. We voluntarily reported this discovery to the Oregon Department of Environmental Quality (Oregon DEQ) and agreed to participate in the Oregon DEQ's voluntary cleanup program. Pursuant to this program, we have begun to remediate the property by product recovery under the oversight of the Oregon DEQ. We completed our investigation of the nature and extent of contamination and submitted a final remedial investigation report to the Oregon DEQ in November 2007. The remedial investigation report was approved by the Oregon DEQ in December 2007. A feasibility study report that evaluates the possible remedies for the site was approved by the Oregon DEQ in February 2009. We have also placed previous owners of the facility on notice of the related claim against them and continue to review whether we can recover our costs from other possible responsible parties. We spent less than \$0.2 million on remediation costs at this site in each of the years ended December 31, 2008 and 2007. As of December 31, 2008, we have accrued approximately \$0.2 million for future costs of remediating this site, which management believes represents a reasonable estimate, based on current facts and circumstances, of the currently expected costs of continued remediation. Until the Oregon DEQ selects a final remedy, however, management cannot estimate the top of the range of loss or cost to Huttig of the final remediation order.

In addition, some of our current and former distribution centers are located in areas of current or former industrial activity where environmental contamination may have occurred, and for which we, among others, could be held responsible. We currently believe that there are no material environmental liabilities at any of our distribution center locations.

ITEM 4 — SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of our shareholders during the fourth quarter of 2008.

PART II

ITEM 5 — MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock was traded on the New York Stock Exchange (NYSE) until December 3, 2008, when it was delisted for failure to meet a NYSE listing requirement, which required that the Company's average market capitalization over a consecutive 30-day trading period not be less than \$25 million. On December 3, 2008, our common stock began trading over the counter, where it currently trades under the symbol "HBPLPK"

At February 20, 2009, there were approximately 2,344 holders of record of our common stock. The following table sets forth the range of high and low sale prices of the common stock on the New York Stock Exchange Composite Tape during each quarter of the years ended December 31, 2008 and 2007 as reported by the New York Stock Exchange to December 3, 2008 and over the counter thereafter:

	2008		2007	
	High	Low	High	Low
First Quarter	4.78	2.17	6.87	5.26
Second Quarter	2.85	1.64	8.77	6.05
Third Quarter	3.15	1.50	7.66	4.81
Fourth Quarter	2.38	0.24	5.69	3.30

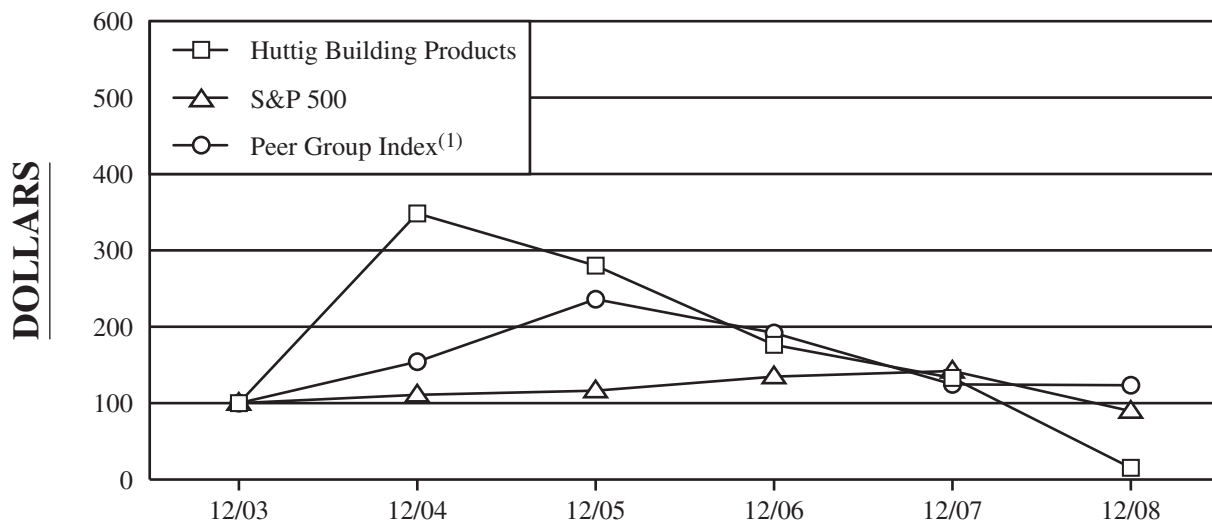

We have never declared, nor do we anticipate at this time declaring or paying, any cash dividends on our common stock in the foreseeable future in order to make cash generated available for use in operations, debt reduction, stock repurchases and, if any, acquisitions. Provisions of our credit facility contain various covenants, which, among other things, limit our ability to incur indebtedness, incur liens, make certain types of acquisitions, declare or pay dividends or sell assets. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Liquidity and Capital Resources.”

See Part III, Item 12, for information on securities authorized for issuance under equity compensation plans.

Performance Graph

The following Performance Graph and related information shall not be deemed “soliciting material” or to be “filed” with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933 or Securities Exchange Act of 1934, each as amended, except to the extent that the Company specifically incorporates it by reference into such filing.

The following table compares total shareholder returns for the Company over the last five years to the Standard and Poor’s 500 Stock Index and that of a peer group made up of other building material and industrial products distributors assuming a \$100 investment made on December 31, 2003. Each of the three measures of cumulative total return assumes reinvestment of dividends. The stock performance shown on the graph below is not necessarily indicative of future price performance.

	<u>Huttig Building Products</u>	<u>S&P 500</u>	<u>Peer Group Index(1)</u>
12/03.....	\$100.00	\$100.00	\$100.00
12/04.....	348.33	110.88	154.24
12/05.....	280.00	116.33	236.03
12/06.....	176.33	134.70	191.86
12/07.....	133.00	142.10	124.54
12/08.....	15.33	89.53	123.43

(1) The peer group includes the following companies: QEP Co., Watsco Inc., Building Materials Holding Corporation and Universal Forest Products, Inc.

ITEM 6 — *SELECTED CONSOLIDATED FINANCIAL DATA*

The following table summarizes certain selected financial data of continuing operations of Huttig for each of the five years in the period ended December 31, 2008. The information contained in the following table may not necessarily be indicative of our future performance. Such historical data should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our consolidated financial statements and notes thereto included elsewhere in this report.

	Year Ended December 31,				
	2008	2007	2006	2005(3)	2004
(In millions, except per share data)

(1) Amounts exclude operations classified as discontinued.

(2) Debt includes both current and long-term portions of bank debt, capital leases and other obligations. See Note 5 to our consolidated financial statements.

(3) Texas Wholesale Buildings Materials, Inc. was acquired on January 11, 2005.

ITEM 7 — *MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS*

Overview

Huttig is a distributor of building materials used principally in new residential construction and in home improvement, remodeling and repair work. We distribute our products through 30 distribution centers serving 45 states and sell primarily to building materials dealers, national buying groups, home centers and industrial users, including makers of manufactured homes.

Industry Conditions

The downturn in the residential construction market is in its third year and it has become one of the most severe housing downturns in U.S. history. Currently, the U.S. economy appears to be heading into a deepening recession. Our sales depend heavily on the strength of national and local new residential construction and

home improvement and remodeling markets. During the past three years, our results of operations have been adversely affected by the severe downturn in new housing activity in the United States. We expect the severe downturn in new housing activity to continue to adversely affect our operating results throughout 2009.

In reaction to the housing downturn the Company has been restructuring its operations since the second quarter of 2006. From the quarter ending June 30, 2006 through the end of 2008, the Company closed, consolidated or sold 17 distribution centers. In addition, the Company reduced its workforce by approximately 1,000 in this same time frame ending 2008 with approximately 1,200 employees. These cost reduction efforts are primarily responsible for the \$58.6 million reduction in operating expenses from the year ended December 31, 2006 as compared to the year ended December 31, 2008.

Various factors historically have caused our results of operations to fluctuate from period to period. These factors include levels of construction, home improvement and remodeling activity, weather, prices of commodity wood and steel products, interest rates, competitive pressures, availability of credit and other local, regional and economic conditions. Many of these factors are cyclical or seasonal in nature. We anticipate that further fluctuations in operating results from period to period will continue in the future. Our first quarter and fourth quarter are generally adversely affected by winter weather patterns in the Midwest and Northeast, which typically result in seasonal decreases in levels of construction activity in these areas. Because much of our overhead and expenses remain relatively fixed throughout the year, our operating profits tend to be lower during the first and fourth quarters.

We believe we have the product offerings, warehouse and builder support facilities, personnel, systems infrastructure and financial and competitive resources necessary for continued operations. Our future revenues, costs and profitability, however, are all likely to be influenced by a number of risks and uncertainties, including those in Item 1A — RISK FACTORS.

Critical Accounting Policies

We prepare our consolidated financial statements in accordance with U.S. generally accepted accounting principles, which require management to make estimates and assumptions. Management bases these estimates and assumptions on historical results and known trends as well as management forecasts. Actual results could differ from these estimates and assumptions.

Accounts Receivable — Trade accounts receivable consist of amounts owed for orders shipped to customers and are stated net of an allowance for doubtful accounts. Huttig's corporate management establishes an overall credit policy for sales to customers and delegates responsibility for most credit decisions to credit personnel located within Huttig's two regions. The allowance for doubtful accounts is determined based on a number of factors including when customer accounts exceed 90 days past due or sooner depending on the credit strength of the customer. Our credit policies, together with monitoring of customer balances, have resulted in bad debt expense of less than 0.3% of net sales during 2008 and less than 0.1% in 2007 and 2006. Due to the current downturn in new housing activity, we expect that our bad debt expense could continue to increase as our customers experience greater financial difficulties.

Inventory — Inventories are valued at the lower of cost or market. We review inventories on hand and record a provision for slow-moving and obsolete inventory based on historical and expected sales.

Valuation of Goodwill and Other Long-Lived Assets — We test the carrying value of our goodwill for impairment on an annual basis and between annual tests in certain circumstances. The carrying value of goodwill is considered impaired when the discounted cash flow is less than the carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair value of goodwill. We test the carrying value of other long-lived assets, including intangible and other tangible assets, for impairment when events and circumstances warrant such review. The carrying value of long-lived assets is considered impaired when the anticipated undiscounted cash flows from such assets are less than the carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. Fair value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved.

In 2008, we recorded goodwill impairments of \$8.7 million primarily as a result of the carrying value at six reporting units exceeding their respective fair values. The fair value we calculated includes multiple assumptions of our future operations to determine future cash flows including but not limited to such factors as, sales levels, gross margin rates, capital requirements, and discount rates. If the assumptions we used were more favorable we may not have impaired as much goodwill, or if the assumptions we used were less favorable it is possible we may have impaired more goodwill. As we continue to face a challenging housing environment and general uncertainty in the U.S. economy our assumptions may change significantly in the future resulting in further goodwill impairments in future periods.

Contingencies — We accrue expenses when it is probable that an asset has been impaired or a liability has been incurred and we can reasonably estimate the expense. Contingencies for which we have made accruals include environmental, product liability and other legal matters. It is possible that future results of operations for any particular quarter or annual period and our financial condition could be materially affected by changes in assumptions or other circumstances related to these matters. We accrue an estimate of the cost of resolution of these matters and make adjustments to the amounts accrued as circumstances change.

Insurance — We carry insurance policies on insurable risks with coverages and other terms that we believe are appropriate. We generally have self-insured retention limits and have obtained fully insured layers of coverage above such self-insured retention limits. Accruals for self-insurance losses are made based on our claims experience. We accrue for these liabilities for existing and unreported claims when it is probable that future costs will be incurred and when we can estimate those costs.

Supplier Rebates — We enter into agreements with certain vendors providing for inventory purchase rebates upon achievement of specified volume purchasing levels. We record vendor rebates as a reduction of the cost of inventory purchased.

Income Taxes — We operate within multiple taxing jurisdictions and are subject to audit in these jurisdictions. These audits can involve complex issues, which may require an extended period of time to resolve. We regularly review our potential tax liabilities for tax years subject to audit. Changes in our tax liability occurred in 2008 and may occur in the future as our assessment changes based on the progress of tax examinations in various jurisdictions and/or changes in tax regulations. In management's opinion, adequate provisions for income taxes have been made for all years presented.

Deferred tax assets and liabilities are recognized for the future tax benefits or liabilities attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates would be recognized in income in the period that includes the enactment date. We regularly review our deferred tax assets for recoverability and establish a valuation allowance when we believe that such assets may not be recovered, taking into consideration historical operating results, expectations of future earnings, changes in operations, the expected timing of the reversal of existing temporary differences and available tax planning strategies.

Share-Based Compensation — We account for share-based compensation in accordance with SFAS No. 123R, "Share-Based Payment," which requires companies to recognize the cost of employee services received in exchange for awards of equity instruments, based on the grant date fair value of those awards, in the financial statements. We estimate the fair value of stock option awards on the date of grant utilizing a modified Black-Scholes option pricing model. The Black-Scholes option valuation model was developed for use in estimating the fair value of short-term traded options that have no vesting restrictions and are fully transferable. The estimate may materially change because it depends on, among other things, levels of share-based payments granted, the market value of our common stock as well as assumptions regarding a number of complex variables. These variables include, but are not limited to, our stock price, volatility, risk-free interest rate, dividend rate and employee stock option exercise behaviors and the related tax impact. We value restricted stock awards at the grant date using the average of the high and low traded prices for the day. The Company recognizes compensation cost for equity awards on a straight-line basis over the requisite service period for the entire award.

SFAS 123R also requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. If actual forfeitures vary from our estimates, we will recognize the difference in compensation expense in the period the actual forfeitures occur or when options vest.

Results of Operations

Fiscal 2008 Compared to Fiscal 2007

Continuing Operations

Net sales from continuing operations were \$671.0 million in 2008, which were \$203.8 million, or approximately 23%, lower than 2007. This decrease was attributable to a significant decline in new housing activity as new housing starts in the United States decreased 36% to approximately 0.9 million in 2008 from 1.4 million in 2007, including 0.6 million single family residences in 2008 versus 1.0 million in 2007, based on data from the U.S. Census Bureau. We anticipate decreased housing starts in 2009 versus 2008 based on the current level of housing activity and industry forecasts for 2009.

Sales decreased in all major product categories in 2008 from 2007. Millwork sales decreased 30% in 2008 to \$305.5 million. Building product sales decreased 10% in 2008 to \$289.9 million. Wood products decreased 35% to \$75.6 million in 2008 with a 42% decrease in sales of engineered wood products and a 32% decrease in sales of other wood products. Sales of building products decreased less than the overall market due to new product initiatives in the building products category that we implemented over the past several years, including initiatives with respect to decking and railing, fasteners, connectors and housewrap.

Gross margin decreased approximately 26% to \$122.4 million or 18.2% of sales in 2008 as compared to \$165.0 million or 18.9% of sales in 2007. The 2008 and 2007 results include an impact from charges related to the impairment of inventory from liquidating inventory at our closed branches of \$1.0 million and \$1.5 million, respectively. This decreased gross margin by 0.1% in 2008 and 2007. The 2008 gross margin dollars also decreased due to a lower of cost or market adjustment of \$1.3 million recorded by the Company during 2008 related to a decline in prices for our metal fastener inventory. Excluding 2008 and 2007 charges and the lower of cost or market adjustment, gross margin decreased to 18.6% in 2008 from 19.0% in 2007. The decrease is primarily a result of a lower mix of higher margin exterior and interior doors and higher mix of lower margin building products. The 2008 gross margin was also impacted by pricing pressure in the down housing market, which may continue for 2009.

Operating expenses decreased \$14.9 million to \$160.0 million or 23.8% of sales in 2008, compared to approximately \$174.9 million or 20.0% of sales in 2007. Operating expenses for 2008 include \$10.8 million of expenses primarily related to an \$8.7 million goodwill impairment and \$2.1 million related to severance and lease termination associated with the shut down or consolidation of five branches during 2008. Operating expenses for 2007 include \$3.8 million of expenses, primarily severance and lease termination, associated with the shut down, consolidation or sale of six branches during 2007 and related severance costs associated with other workforce reductions in addition to the reductions in force associated with the branch closures and consolidation and \$0.8 million related to goodwill impairment charges. Operating expenses in 2008 also reflected decreased wage and benefit costs from lower headcount, lower incentive compensation, lower building and equipment costs associated with reduced locations and lower insurance and travel costs, partially offset by higher contract hauling, fuel and bad debt expense. We recorded total stock-based compensation expense of \$1.3 million in 2008 compared to \$1.6 million in 2007.

The results for the year ended December 31, 2008 included a gain on disposal of capital assets of \$1.0 million primarily as a result of the sale of a previously closed facility. The results for the year ended 2007 included a gain on disposal of capital assets of \$2.4 million primarily as a result of the sale of three previously closed facilities.

Net interest expense was \$2.6 million in 2008 compared to \$4.2 million in 2007 primarily due to lower average debt outstanding and lower LIBOR-based borrowing rates in 2008 versus 2007.

Income taxes as a percentage of pre-tax loss for the years ended December 31, 2008 and 2007 were approximately 10% and 32%, respectively. In 2008, the benefit for federal and state tax net operating loss carry forwards were decreased by an \$8.7 million increase in the related valuation allowance. At December 31, 2008 the federal net operating loss carry forward of approximately \$28.0 million could not be carried back to years with taxable income. In 2008, the Company was able to carry back the 2007 federal net operating loss to prior years and receive tax refunds.

As a result of the foregoing factors, we incurred a loss from continuing operations of \$35.2 million in 2008 as compared to a loss from continuing operations of \$8.0 million in 2007.

Discontinued Operations

Discontinued operating results in 2008 and 2007 included \$0.2 million in charges, net of tax.

Fiscal 2007 Compared to Fiscal 2006

Continuing Operations

Net sales from continuing operations were \$874.8 million in 2007, which were \$227.9 million, or approximately 21%, lower than 2006. This decrease was attributable to a significant decline in new housing activity as new housing starts in the United States decreased 22% to approximately 1.4 million in 2007 from 1.8 million in 2006, including 1.0 million single-family residences in 2007 versus 1.5 million in 2006, based on data from the U.S. Census Bureau.

By product category, sales decreased in all major product categories in 2007 from 2006. Millwork sales decreased 26% in 2007 to \$436.9 million. Building product sales decreased 9% in 2007 to \$321.7 million. Wood products decreased 27% to \$116.2 million in 2007 with a 25% decrease in sales of engineered wood products and a 28% decrease in sales of other wood products. Sales of building products decreased less than the overall market due to new product initiatives in the building products category that we implemented over the past several years, including initiatives with respect to composite decking and railing, fasteners, connectors and housewrap.

Gross margin decreased approximately 20% to \$165.0 million or 18.9% of sales in 2007 as compared to \$205.8 million or 18.7% of sales in 2006. The 2007 results include a \$1.5 million impact, or 0.1% of sales, from charges related to the impairment of inventory from liquidating inventory at our closed branches. The 2006 results include a \$5.4 million impact, or 0.5% of sales, from charges related to the impairment of inventory associated with the exit of a wood decking product line and the conversion of six branches to a new exterior door vendor and from liquidating inventory at our closed branches. Excluding the 2007 and 2006 impairment charges, gross margin percentage decreased to 19.0% in 2007 from 19.2% in 2006. The 2007 gross margin percentage was adversely impacted by the lower mix of millwork sales and lower vendor rebates earned as compared to 2006, which was partially offset by a greater mix of higher margin products sold out of warehouse.

Operating expenses decreased \$35.0 million to \$174.9 million or 20.0% of sales in 2007, compared to \$209.9 million or 19.0% of sales in 2006. Operating expenses for 2007 include \$3.8 million of expenses, primarily severance and lease termination, associated with the shut down, consolidation or sale of six branches during 2007, severance costs associated with other workforce reductions and consolidation of leased space at headquarters. Operating expenses for 2007 also include \$0.8 million related to goodwill impairment charges. Operating expenses for 2006 include \$10.7 million of expenses related to the decision to discontinue the implementation of, and write-off capitalized costs associated with, a new enterprise resource planning system, \$1.9 million of expenses, primarily severance and lease termination, associated with the shut down and consolidation of five branches during the third and fourth quarters of 2006 and \$0.9 million related to severance costs associated with other workforce reductions. Operating expenses in 2007 also reflected decreased wage and benefit costs from lower headcount, lower incentive compensation and lower building and equipment rent associated with reduced infrastructure levels.

The results for the year ended December 31, 2007 included a gain on disposal of capital assets of \$2.4 million primarily as a result of the sale of three previously closed facilities.

Net interest expense was \$4.2 million in 2007 compared to \$5.3 million in 2006 primarily due to lower average debt outstanding and lower LIBOR-based borrowing rates in 2007 versus 2006. In addition, in 2006, we refinanced our previous credit agreement and recorded a non-cash charge of \$1.1 million to write off the remaining unamortized loan fees related to this credit agreement and a \$0.5 million gain on termination of a related interest rate swap in place on the prior credit facility.

Income taxes as a percentage of pre-tax loss for the years ended December 31, 2007 and 2006 were approximately 32% and 23%, respectively. In 2006, the benefit for certain state tax net operating loss carry forwards increased by \$1.3 million, but was offset by a \$2.7 million increase in the related valuation allowance, resulting in a \$1.4 million net reduction to the overall 2006 income tax benefit.

As a result of the foregoing factors, we incurred a loss from continuing operations of \$8.0 million in 2007 as compared to a loss from continuing operations of \$7.7 million in 2006.

Discontinued Operations

Discontinued operating results in 2007 included \$0.2 million in charges, net of tax.

Liquidity and Capital Resources

We depend on cash flow from operations and funds available under our revolving credit facility to finance seasonal working capital needs, capital expenditures and any acquisitions that we may undertake. Our working capital requirements are generally greatest in the second and third quarters, which reflect the seasonal nature of our business. The second and third quarters are also typically our strongest operating quarters, largely due to more favorable weather throughout many of our markets compared to the first and fourth quarters. We typically generate cash from working capital reductions in the fourth quarter of the year and build working capital during the first quarter in preparation for our second and third quarters. We also maintain significant inventories to meet rapid delivery requirements of our customers and to enable us to obtain favorable pricing, delivery, and service terms with our suppliers. At December 31, 2008 and 2007, inventories constituted approximately 41% and 42% of our total assets, respectively. We also closely monitor operating expenses and inventory levels during seasonally affected periods and, to the extent possible, manage variable operating costs to minimize seasonal effects on our profitability.

Operations. Cash provided from operating activities from continuing operations decreased by \$10.2 million to \$3.6 million for the year ended December 31, 2008, from \$13.8 million in 2007. Accounts receivable decreased by \$23.1 million during 2008 compared to a decrease of \$18.0 million a year ago. Days sales outstanding improved by 4.6 days to 23.9 days at December 31, 2008 from 28.5 days at December 31, 2007 based on annualized fourth quarter sales for the respective periods. Inventory decreased during 2008 by \$29.3 million compared to a decrease of \$8.6 million in 2007. Our inventory turns increased to 6.5 turns in 2008 from 6.2 turns in 2007. Accounts payable decreased by \$26.6 million during 2008 compared to a \$12.0 million decrease in the year ago period.

Investing. In 2008, net cash used in investing activities was \$0.5 million, as compared to \$1.0 million of net cash provided by investing activities in 2007. The Company received proceeds of \$0.8 million as a result of our sale of the Macon, GA facility in 2008 and \$0.7 million related to sales of machinery and equipment. The Company received proceeds of \$4.0 million primarily as a result of our sales of the Spokane, WA, Grand Rapids, MI and Green Bay, WI facilities in 2007. The Company invested \$2.0 million in machinery and equipment at multiple locations in 2008. In 2007, the Company invested \$3.0 million in software and in machinery and equipment at multiple locations.

Financing. Cash used in financing activities of \$2.1 million in 2008 reflects net debt repayments of \$1.3 million on our revolving line of credit facility and term loans and payments of \$1.2 million for our capital lease and other debt obligations, which are partially offset by \$0.9 million received from the exercise of stock options. Cash used in financing activities of \$19.1 million in 2007 reflects net debt repayments of

\$17.0 million on our revolving line of credit and \$3.2 million on our capital lease and other debt obligations partially offset by \$1.1 million from the exercise of stock options.

At December 31, 2008, under our credit facility we had revolving credit borrowings of \$23.5 million outstanding at a weighted average interest rate of 3.67%, letters of credit outstanding totaling \$6.0 million, primarily for health and workers' compensation insurance, and \$44.5 million of additional committed borrowing capacity. In addition, we had \$0.6 million of capital lease and other obligations outstanding at December 31, 2008.

The borrowings under our credit facility are collateralized by substantially all of the Company's assets and are subject to certain operating limitations applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends and transactions with affiliates. The financial covenant in the facility is limited to a fixed charge coverage ratio to be tested only when excess borrowing availability is less than \$25.0 million and on a pro forma basis prior to consummation of certain significant business transactions outside the Company's ordinary course of business and prior to increasing the size of the facility.

We believe that cash generated from our operations and funds available under our credit facility will provide sufficient funds to meet our currently anticipated short-term and long-term liquidity and capital expenditure requirements.

Off-Balance Sheet Arrangements

In addition to funds available from operating cash flows and our bank credit facility as described above, we use operating leases as a principal off balance sheet technique. Operating leases are employed as an alternative to purchasing certain property, plant and equipment. Future rental commitments, extending through the year 2020, under all non-cancelable operating leases in effect at December 31, 2008 total \$66.4 million.

Commitments and Contingencies

The table below summarizes our contractual obligations as of December 31, 2008 (in millions):

	<u>Total</u>	<u>Payments Due by Period</u>			
		<u>2009</u>	<u>2010- 2011</u>	<u>2012- 2013</u>	<u>Beyond 2013</u>
Long-term debt, including current portion(1)	\$24.1	\$ 0.4	\$23.5	\$ 0.1	\$ 0.1
Operating lease obligations	66.4	14.3	24.0	14.7	13.4
Guaranteed payments(2)	1.1	0.4	0.7	—	—
Purchase obligations(3)	—	—	—	—	—
Total	<u>\$91.6</u>	<u>\$15.1</u>	<u>\$48.2</u>	<u>\$14.8</u>	<u>\$13.5</u>

(1) Amounts represent the expected cash payments of our long-term debt and do not include any fair value adjustments. The estimated fair value of our long-term debt approximates book value because interest rates on nearly all of the outstanding borrowings are reset every 30 to 90 days.

(2) Amounts represent guaranteed payments related to the acquisition of Texas Wholesale Building Materials, Inc. on January 11, 2005.

(3) On August 2, 2004, we sold to Woodgrain Millwork, Inc. substantially all of the assets, but excluding the land, buildings, and building improvements, of American Pine Products, a mouldings manufacturing facility in Prineville, Oregon. We also entered into a non-exclusive supply agreement with Woodgrain under which we have agreed to purchase mouldings, doors, windows, door frames and other millwork products from Woodgrain for a period of five years at market prices. In 2009, the supply agreement requires that we purchase a certain minimum unit volume of certain products from Woodgrain and that Woodgrain sell such products at competitive market prices. The minimum volume requirements represent less than half of our current overall requirements for such products.

Recent Accounting Developments

In March 2008, the Financial Accounting Standards Board (FASB) issued Statement No. 161, “Disclosures about Derivative Instruments and Hedging Activities — an amendment of FASB Statement No. 133” (Statement 161). Statement 161 requires entities that utilize derivative instruments to provide qualitative disclosures about their objectives and strategies for using such instruments, as well as any details of credit-risk-related contingent features contained within derivatives. Statement 161 also requires entities to disclose additional information about the amounts and location of derivatives located within the financial statements, how the provisions of SFAS 133 have been applied, and the impact that hedges have on an entity’s financial position, financial performance, and cash flows. Statement 161 is effective for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. We do not anticipate the adoption of Statement 161 will have a material impact on the disclosures already provided.

In June 2008, the FASB issued an exposure draft of a proposed amendment to SFAS 133. As proposed, this amendment would make several significant changes to the way in which entities account for hedging activities involving derivative instruments. We do not anticipate the adoption of the proposed amendment to Statement 133 will have a material impact on our financial results or disclosures.

In October 2008, the FASB issued Staff Position No. FAS 157-3, “Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active” (FSP 157-3). FSP 157-3 clarifies the application of SFAS 157, which the Company adopted as of January 1, 2008, in cases where a market is not active. We have considered the guidance provided by FSP 157-3 in its determination of estimated fair values as of December 31, 2008, and the impact was not material.

Cautionary Statement Relevant to Forward-looking Information for the Purpose of “Safe Harbor” Provisions of the Private Securities Litigation Reform Act of 1995

This Annual Report on Form 10-K and our annual report to shareholders contain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, including but not limited to statements regarding:

- our belief that cash generated from operations and funds available under our credit facility will be sufficient to meet our future liquidity and capital expenditure needs;
- our belief that we have the product offerings, warehouse and builder support facilities, personnel, systems infrastructure and financial and competitive resources necessary for continued business operations;
- our expectation that housing starts will decrease in 2009 from 2008;
- our expectation that the severe downturn in new housing activity will continue during 2009 and will continue to adversely affect our operating results, liquidity and financial condition;
- our expectation that the bad debt expense could continue to increase as our customers experience greater financial difficulties as a result of the current downturn in new housing activity;
- Our belief that we will not achieve sufficient financial results to satisfy the financial covenant under our credit facility if it were required to be tested;
- our expectation that the disposition of the various claims and litigation in which we are involved will not have a material effect on our business or financial condition;
- our belief that there are no material environmental liabilities at any of our current or former distribution center locations;
- our expectation that we will continue to face competition from new market entrants;
- the future impact of competition and our ability to maintain favorable terms with our suppliers and transition to alternative suppliers of building products, and the effects of slower economic activity on our results of operations;

- our expectation that the fluctuations in wood and steel commodity prices between the time we buy the products and the time we resell them will occur in the future;
- our liquidity and exposure to market risk;
- our anticipation that we will not pay dividends in the future;
- our estimate of future amortization expense for intangible assets;
- our expectation that there will not be any significant increases or decreases to our unrecognized tax benefits within the 12 months of the financial statement reporting date;
- anticipation that neither the adoption of SFAS Statement No. 161, “Disclosures about Derivative Instruments and Hedging Activities” nor the adoption of the proposed amendment to SFAS 133 will have a material impact on our financial results or disclosures; and
- cyclical and seasonal trends.

The words or phrases “will likely result,” “are expected to,” “will continue,” “is anticipated,” “believe,” “estimate,” “project” or similar expressions identify “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995.

These statements present management’s expectations, beliefs, plans and objectives regarding our future business and financial performance. These forward-looking statements are based on current projections, estimates, assumptions and judgments, and involve known and unknown risks and uncertainties. We disclaim any obligation to publicly update or revise any of these forward-looking statements. There are a number of factors that could cause our actual results to differ materially from those expressed or implied in the forward-looking statements. These factors include, but are not limited to those set forth under Item 1A-Risk Factors.

ITEM 7A — *QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*

We have exposure to market risk as it relates to effects of changes in interest rates. We had debt outstanding at December 31, 2008 under our credit facility of \$23.5 million.

All of our debt under our revolving credit facility accrues interest at a floating rate basis. If market interest rates for LIBOR had been different by an average of 1% for the year ended December 31, 2008, our interest expense and income before taxes would have changed by \$0.4 million. These amounts are determined by considering the impact of the hypothetical interest rates on our borrowing cost. This analysis does not consider the effects of any change in the overall economic activity that could exist in such an environment. Further, in the event of a change of such magnitude, management may take actions to further mitigate its exposure to the change. However, due to the uncertainty of the specific actions that would be taken and their possible effects, the sensitivity analysis assumes no changes in our financial structure.

We are subject to periodic fluctuations in the price of wood, steel commodities, petrochemical-based products and fuel. Profitability is influenced by these changes as prices change between the time we buy and sell the wood, steel or petrochemical-based products. Profitability is influenced by changes in prices of fuel. In addition, to the extent changes in interest rates affect the housing and remodeling market, we would be affected by such changes.

ITEM 8 — FINANCIAL STATEMENTS AND SUPPLEMENTAL DATA

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Huttig Building Products, Inc.:

We have audited the accompanying consolidated balance sheets of Huttig Building Products, Inc. as of December 31, 2008 and 2007, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2008. We also have audited Huttig Building Products, Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Huttig Building Products, Inc.'s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Internal Control Over Financial Reporting*. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Huttig Building Products, Inc. as of December 31, 2008 and 2007, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles. Also in our opinion, Huttig Building Products, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

HUTTIG BUILDING PRODUCTS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS YEARS ENDED DECEMBER 31, 2008, 2007 AND 2006

(In Millions, Except Share and Per Share Data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND PROCEDURES

Organization — Huttig Building Products, Inc. and subsidiaries (the “Company” or “Huttig”) is a distributor of building materials used principally in new residential construction and in home improvement, remodeling and repair work. Huttig’s products are distributed through 30 distribution centers serving 45 states and are sold primarily to building materials dealers, national buying groups, home centers and industrial users including makers of manufactured homes.

Principles of Consolidation — The consolidated financial statements include the accounts of Huttig Building Products, Inc. and its wholly owned subsidiaries. All significant inter-company accounts and transactions have been eliminated.

Reclassifications — Certain prior year amounts have been reclassified to conform to the current year presentation.

Revenue Recognition — Revenues are recorded when title passes to the customer, which occurs upon delivery of product, less an allowance for returns, customer rebates and discounts for early payments. Returned products for which the Company assumes responsibility is estimated based on historical returns and are accrued as a reduction of sales at the time of the original sale.

Use of Estimates — The preparation of the Company’s consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Management makes estimates including but not limited to the following financial statement items; allowance for doubtful accounts, slow-moving and obsolete inventory, lower of cost or market provisions for inventory, long-lived asset impairments including but not limited to goodwill, contingencies including environmental liabilities, accrued expenses and insurance accruals, and income tax expense and net deferred tax assets. Actual results may differ from these estimates.

Cash and Equivalents — The Company considers all highly liquid interest-earning investments with an original maturity of three months or less at the date of purchase to be cash equivalents. The carrying value of cash and equivalents approximates their fair value.

Accounts Receivable — Trade accounts receivable consist of amounts owed for orders shipped to customers and are stated net of an allowance for doubtful accounts. Huttig’s corporate management establishes an overall credit policy for sales to customers. The allowance for doubtful accounts is determined based on a number of factors including when customer accounts exceed 90 days past due along with the credit strength of the customer.

Inventory— Inventories are valued at the lower of cost or market. The Company’s entire inventory is comprised of finished goods. The Company reviews inventories on hand and records a provision for slow-moving and obsolete inventory. The provision for slow-moving and obsolete inventory is based on historical and expected sales. Approximately 87% and 85% of inventories were determined by using the LIFO (last-in, first-out) method of inventory valuation as of December 31, 2008 and December 31, 2007, respectively. The balance of all other inventories is determined by the average cost method, which approximates costs on a FIFO (first-in, first-out) method. The replacement cost would be higher than the LIFO valuation by \$13.1 million in 2008 and \$8.9 million in 2007.

Supplier Rebates — The Company enters into agreements with certain vendors providing for inventory purchase rebates upon achievement of specified volume purchasing levels. The Company records vendor rebates as a reduction of the cost of inventory purchased.

Property, Plant and Equipment — Property, plant and equipment are stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the respective assets and is charged to operating expenses. Buildings and improvements lives range from 3 to 25 years. Machinery and equipment lives range from 3 to 10 years. The Company recorded depreciation expense of \$3.8 million, \$4.1 million and \$5.2 million in 2008, 2007 and 2006, respectively.

Goodwill and Other Intangible Assets — Goodwill is reviewed for impairment annually, or more frequently if certain indicators arise. The Company also reassesses useful lives of previously recognized intangible assets. The fair value we calculated includes multiple assumptions of our future operations to determine future cash flows including but not limited to such factors as, sales levels, gross margin rates, capital requirements, and discount rates. If the assumptions we used were more favorable we may not have impaired as much goodwill, or if the assumptions we used were less favorable it is possible we may have been required to impair more goodwill. As we continue to face a challenging housing environment and general uncertainty in the U.S. economy our assumptions may change significantly in the future resulting in further goodwill impairments in future periods. See Note 3, “Goodwill and Other Intangible Assets” for additional information.

Valuation of Long-Lived Assets — The Company periodically evaluates the carrying value of its long-lived assets, including intangible and other tangible assets, when events and circumstances warrant such a review. The carrying value of long-lived assets is considered impaired when the anticipated undiscounted cash flows from such assets are less than the carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved.

Shipping — Costs associated with shipping products to the Company’s customers are charged to operating expense. Shipping costs were approximately \$38.4 million, \$40.2 million and \$43.2 million in 2008, 2007, and 2006, respectively.

Income Taxes— Deferred income taxes reflect the impact of temporary differences between assets and liabilities recognized for financial reporting purposes and such amounts recognized for tax purposes using currently enacted tax rates. A valuation allowance would be established to reduce deferred income tax assets if it is more likely than not that a deferred tax asset will not be realized. The Company includes interest and penalties related to uncertain tax positions in income tax expense.

Net Loss Per Share — Basic net loss per share is computed by dividing loss available to common stockholders by weighted average shares outstanding. Diluted net loss per share reflects the effect of all other potentially dilutive common shares using the treasury stock method.

Accounting For Stock-Based Compensation— The Company has share-based compensation plans covering the majority of its employee groups and a plan covering the Company’s Board of Directors. The Company accounts for share-based compensation utilizing the fair value recognition provisions of SFAS No. 123R, “Share-Based Payment.” The Company recognizes compensation cost for equity awards on a straight-line basis over the requisite service period for the entire award. See Note 9.

Concentration of Credit Risk — The Company is engaged in the distribution of building materials throughout the United States. The Company grants credit to customers, substantially all of whom are dependent upon the construction sector. The Company periodically evaluates its customers’ financial condition but does not generally require collateral. The concentration of credit risk with respect to trade accounts receivable is limited due to the Company’s large customer base located throughout the United States. The Company maintains an allowance for doubtful accounts based upon the expected collectibility of its accounts receivable.

Accounting for Derivative Instruments and Hedging Activities — SFAS No. 133, as amended, established accounting and reporting standards for derivative instruments, including certain derivative instruments used for hedging activities. All derivative instruments, whether designated in hedging relationships or not, are required

to be recorded on the balance sheet at fair value. If the derivative is designated as a cash flow hedge, the effective portions of changes in the fair value of the derivative are recorded in other comprehensive income (“OCI”) and are recognized in the statement of income when the hedged item affects earnings. Ineffective portions of changes in the fair value of cash flow hedges are recognized in earnings. If the derivative is not designated as a hedge for accounting purposes, changes in fair value are immediately recognized in earnings.

Financial Information About Industry Segments.

Statement of Financial Accounting Standards (“SFAS”) No. 131, “Disclosures about Segments of an Enterprise and Related Information” (“SFAS 131”) defines operating segments as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. At December 31, 2008, under the definition of a segment, each of our branches is considered an operating segment of our business. Under SFAS 131, segments may be aggregated if the segments have similar economic characteristics and if the nature of the products, distribution methods, customers and regulatory environments are similar. The Company has aggregated its branches into one reporting segment, consistent with SFAS 131.

2. RECENT ACCOUNTING DEVELOPMENTS

Recent Accounting Developments.

In March 2008, the Financial Accounting Standards Board (FASB) issued Statement No. 161, “Disclosures about Derivative Instruments and Hedging Activities — an amendment of FASB Statement No. 133” (Statement 161). Statement 161 requires entities that utilize derivative instruments to provide qualitative disclosures about their objectives and strategies for using such instruments, as well as any details of credit-risk-related contingent features contained within derivatives. Statement 161 also requires entities to disclose additional information about the amounts and location of derivatives located within the financial statements, how the provisions of SFAS 133 have been applied, and the impact that hedges have on an entity’s financial position, financial performance, and cash flows. Statement 161 is effective for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The Company currently does not anticipate the adoption of Statement 161 will have a material impact on the disclosures already provided.

In June 2008, the FASB issued an exposure draft of a proposed amendment to SFAS 133. As proposed, this amendment would make several significant changes to the way in which entities account for hedging activities involving derivative instruments. The Company does not anticipate the adoption of the proposed amendment to Statement 133 will have a material impact on our financial results or disclosures.

In October 2008, the FASB issued Staff Position No. FAS 157-3, “Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active” (FSP 157-3). FSP 157-3 clarifies the application of SFAS 157, which the Company adopted as of January 1, 2008, in cases where a market is not active. The Company has considered the guidance provided by FSP 157-3 in its determination of estimated fair values as of December 31, 2008, and the impact was not material.

3. GOODWILL AND OTHER INTANGIBLE ASSETS

Under SFAS No. 142, “Goodwill and other Intangible Assets” (“SFAS No. 142”), goodwill is reviewed for impairment annually, or more frequently if certain indicators arise. In addition, the statement requires reassessment of the useful lives of previously recognized intangible assets.

SFAS No. 142 prescribes a two-step process for impairment testing of goodwill. During the fourth quarter of each of 2008 and 2007, the Company performed the annual test for impairment of the Company’s reporting units. The Company recorded \$8.5 million in goodwill impairment throughout 2008 and \$0.4 million in goodwill impairment in 2007. The 2008 goodwill impairments resulted from the continued decline in the housing markets and fair market values of certain reporting units. In the first quarter of 2008, the Company recorded \$6.9 million in goodwill impairments primarily related to facilities in its Texas and California markets. In the fourth quarter of 2008, the Company recorded \$1.6 million in goodwill impairments primarily

related to facilities in its Florida markets. In addition, the Company also reduced goodwill in 2008 and 2007 by \$0.2 million and \$0.4 million, respectively, for sold and closed branches.

	<u>Cost</u>		<u>Accumulated Amortization</u>	
	<u>2008</u>	<u>2007</u>	<u>2008</u>	<u>2007</u>
	(In millions)			
Unamortizable intangible assets:				
Goodwill, net	9.6	18.3	N/A	N/A
Amortizable intangible assets:(1)				
Covenant not to compete	2.5	2.5	1.6	1.2
Customer relationships	1.4	1.4	0.3	0.2
Trademarks	0.5	0.5	0.4	0.4

(1) Amortizable intangible assets are included in “Other Assets”

The Company recorded amortization expense of \$0.5 million for each of the years ended December 31, 2008, 2007 and 2006. The Company expects to record amortization expense for its existing intangible assets of approximately \$0.5 million per year from 2009 to 2010, approximately \$0.1 million in 2010 and 2011, and in total, approximately \$0.9 million thereafter.

4. ALLOWANCE FOR DOUBTFUL ACCOUNTS

The allowance for doubtful accounts as of December 31, 2008, 2007 and 2006 consisted of the following (in millions):

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Balance at beginning of year	\$ 0.8	\$ 0.8	\$ 0.9
Provision charged to expense	2.0	0.8	0.8
Write-offs, less recoveries	<u>(1.4)</u>	<u>(0.8)</u>	<u>(0.9)</u>
Balance at end of year	<u>\$ 1.4</u>	<u>\$ 0.8</u>	<u>\$ 0.8</u>

The Company recorded bad debt expense of 0.3% of sales for 2008 and less than 0.1% of sales for the years ended December 31, 2007 and 2006.

5. LONG-TERM DEBT

Debt as of December 31, 2008 and 2007 consisted of the following (in millions):

	<u>2008</u>	<u>2007</u>
Revolving credit facility	\$23.5	\$24.8
Other obligations	<u>0.6</u>	<u>1.8</u>
Total debt	24.1	26.6
Less current portion	<u>0.4</u>	<u>1.2</u>
Long-term debt	<u>\$23.7</u>	<u>\$25.4</u>

Credit Agreement — The Company has a five-year \$160.0 million asset based senior secured revolving credit facility (“credit facility”). Borrowing availability under the credit facility is based on eligible accounts receivable, inventory and real estate. The real estate component of the borrowing base amortizes monthly over ten years on a straight-line basis. Additionally, the credit facility includes an option to request an increase in the size of the facility by up to an additional \$40.0 million, subject to certain conditions and approvals. The Company must also pay a fee in the range of 0.25% to 0.32% per annum on the average daily-unused amount of the revolving credit commitment. The entire unpaid balance under the credit facility is due and payable on October 20, 2011, the maturity date of the credit agreement.

At December 31, 2008, under the credit facility the Company had revolving credit borrowings of \$23.5 million outstanding at a weighted average interest rate of 3.67%, letters of credit outstanding totaling \$6.0 million, primarily for health and workers' compensation insurance, and \$44.5 million of additional committed borrowing capacity. In addition, the Company had \$0.6 million of capital lease and other obligations outstanding at December 31, 2008.

The borrowings under the credit facility are collateralized by substantially all of the Company's assets and are subject to certain operating limitations applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends and transactions with affiliates. The financial covenant in the facility is limited to a fixed charge coverage ratio to be tested only when excess borrowing availability is less than \$25.0 million and on a pro forma basis prior to consummation of certain significant business transactions outside the Company's ordinary course of business and prior to increasing the size of the facility.

In connection with the closing of the current credit facility in 2006, the Company terminated an interest rate swap agreement, associated with the term loan under the prior credit facility. The interest rate swap termination resulted in a gain of \$0.5 million that partially offset a charge of \$1.1 million to write off unamortized costs associated with the prior loan facility. Both the gain and write-off were recognized in the 2006 fourth quarter.

Maturities — At December 31, 2008, the aggregate scheduled maturities of debt are as follows (in millions):

2009	\$ 0.4
2010	—
2011	23.5
2012	—
2013	0.1
Thereafter	<u>0.1</u>
Total	<u>\$24.1</u>

The estimated fair value of the Company's debt approximates book value since the interest rates on nearly all of the outstanding borrowings are frequently adjusted.

6. PREFERRED SHARE PURCHASE RIGHTS

In December 1999, the Company adopted a Shareholder Rights Plan. The Company distributed one preferred share purchase right for each outstanding share of common stock at December 16, 1999. The preferred rights were not exercisable when granted and may only become exercisable under certain circumstances involving actual or potential acquisitions of the Company's common stock by a person or affiliated persons. Depending upon the circumstances, if the rights become exercisable, the holder may be entitled to purchase shares of the Company's Series A Junior Participating Preferred Stock. Preferred shares purchasable upon exercise of the rights will not be redeemable. Each preferred share will be entitled to preferential rights regarding dividend and liquidation payments, voting power, and, in the event of any merger, consolidation or other transaction in which common shares are exchanged, preferential exchange rate. The rights will remain in existence until December 6, 2009 unless they are terminated earlier, exercised or redeemed. The Company has authorized 5 million shares of \$0.01 par value preferred stock of which 250,000 shares have been designated as Series A Junior Participating Preferred Stock.

7. COMMITMENTS AND CONTINGENCIES

The Company leases certain of its vehicles, equipment and warehouse and manufacturing facilities from various third parties with non-cancelable operating leases with various terms. Certain leases contain renewal or

purchase options. Future minimum payments, by year, and in the aggregate, under these leases with initial terms of one year or more consisted of the following at December 31, 2008 (in millions):

	<u>Non Cancelable Operating Leases</u>	<u>Minimum Sublease Income</u>	<u>Net</u>
2009	\$16.0	\$(1.7)	\$14.3
2010	14.0	(1.4)	12.6
2011	12.3	(0.9)	11.4
2012	10.0	(0.9)	9.1
2013	6.4	(0.8)	5.6
Thereafter	<u>14.8</u>	<u>(1.4)</u>	<u>13.4</u>
Total minimum lease payments	<u>\$73.5</u>	<u>\$(7.1)</u>	<u>\$66.4</u>

Operating lease obligations expire in varying amounts through 2020. Rental expense for all operating leases was \$20.7 million, \$23.6 million and \$26.3 million in 2008, 2007 and 2006, respectively.

The Company carries insurance policies on insurable risks with coverage and other terms that it believes to be appropriate. The Company generally has self-insured retention limits and has obtained fully insured layers of coverage above such self-insured retention limits. Accruals for self-insurance losses are made based on claims experience. Liabilities for existing and unreported claims are accrued for when it is probable that future costs will be incurred and can be reasonably estimated.

In 1995, Huttig was identified as a potentially responsible party in connection with the clean up of contamination at a formerly owned property in Montana that was used for the manufacture of wood windows. Huttig is voluntarily remediating this property under the oversight of and in cooperation with the Montana Department of Environmental Quality (Montana DEQ) and is complying with a 1995 unilateral administrative order of the Montana DEQ to complete a remedial investigation and feasibility study. The remedial investigation was completed and approved in 1998 by the Montana DEQ, which has issued its final risk assessment of this property. In March 2003, the Montana DEQ approved Huttig's work plan for conducting a feasibility study to evaluate alternatives for cleanup. In July 2004, the Company submitted the feasibility study report, which evaluated several potential remedies, including continuation and enhancement of remedial measures already in place and operating. Huttig also submitted plans for testing a newer technology that could effectively remediate the site. The Montana DEQ approved these plans and a pilot test of the remediation technology was completed in July 2007. The Montana DEQ is in the process of reviewing the results of the pilot test. After evaluating the results of the pilot test, the Montana DEQ will comment on the feasibility study report and its recommended remedy, and then will select a final remedy, publish a record of decision and negotiate with Huttig for an administrative order of consent on the implementation of the final remedy. Huttig spent less than \$0.2 million on remediation costs at this site in each of the years ended December 31, 2008 and 2007. The annual level of future remediation expenditures is difficult to estimate because of the uncertainty relating to the final remedy to be selected by the Montana DEQ. As of December 31, 2008, the Company has accrued \$0.6 million for future costs of remediating this site, which management believes represents a reasonable estimate, based on current facts and circumstances, of the currently expected costs of continued remediation. Until the Montana DEQ selects a final remedy, however, management cannot estimate the top of the range of loss or cost to Huttig of the final remediation order.

In June 2004, as part of the due diligence conducted by a party interested in acquiring the American Pine Products facility, a previously unknown release of petroleum hydrocarbons and pentachlorophenol, or PCP, was discovered in soil and groundwater at the facility. Based on the initial investigation, the Company believes that the source of the contamination was a former wood-dipping operation on the property that was discontinued approximately 20 years ago, prior to Huttig acquiring the facility. Huttig voluntarily reported this discovery to the Oregon Department of Environmental Quality (Oregon DEQ) and agreed to participate in the Oregon DEQ's voluntary cleanup program. Pursuant to this program, the Company has begun to remediate the property by product recovery under the oversight of the Oregon DEQ. The Company completed an

investigation and submitted a final remedial investigation report to the Oregon DEQ in November 2007. The remedial investigation report was approved by the Oregon DEQ in December 2007. A feasibility study report, that evaluates the possible remedies for the site, was approved by the Oregon DEQ in February 2009. Huttig has also placed previous owners of the facility on notice of the related claim against them and continues to review whether costs can be recovered from other possible responsible parties. The Company spent less than \$0.2 million per year on remediation costs at this site in each of the years ended December 31, 2008 and 2007. As of December 31, 2008, Huttig has accrued approximately \$0.2 million for future costs of remediating this site, which management believes represents a reasonable estimate, based on current facts and circumstances, of the currently expected costs of continued remediation. Until the Oregon DEQ selects a final remedy, however, management cannot estimate the top of the range of loss or cost to Huttig of the final remediation order.

The Company accrues expenses for contingencies when it is probable that an asset has been impaired or a liability has been incurred and management can reasonably estimate the expense. Contingencies for which the Company has made accruals include environmental, product liability and other legal matters. It is possible, however, that future results of operations for any particular quarter or annual period and our financial condition could be materially affected by changes in assumptions or other circumstances related to these matters.

8. EMPLOYEE BENEFIT PLANS

Defined Benefit Plans — The Company participates in several multi-employer pension plans that provide benefits to certain employees under collective bargaining agreements. Total contributions to these plans were \$0.7 million, \$0.7 million, and \$0.6 million in 2008, 2007 and 2006, respectively.

Defined Contribution Plans — The Company sponsors a qualified defined contribution plan covering substantially all its employees. The plan provides for Company matching contributions based upon a percentage of the employee's voluntary contributions. The Company's matching contributions were \$1.0 million, \$1.3 million and \$1.6 million for the years ended December 31, 2008, 2007 and 2006, respectively.

The Company has established a nonqualified deferred compensation plan to allow for the deferral of employee voluntary contributions that are limited under the Company's existing qualified defined contribution plan. The plan provides for deferral of up to 44% of an employee's total compensation and matching contributions based upon a percentage of the employee's voluntary contributions. The Company's matching contributions to this plan were less than \$0.1 million in each of 2008, 2007 and 2006.

9. STOCK AND INCENTIVE COMPENSATION PLANS

2005 Executive Incentive Compensation Plan

In 2005, the Company's Board of Directors adopted and the Company's stockholders approved the 2005 Executive Incentive Compensation Plan under which incentive awards of up to 675,000 shares of common stock may be granted. In 2007 this plan was amended to increase the number of shares that may be granted by 750,000 shares, to 1,425,000. In addition, upon adoption of this Plan, no further awards may be issued under either the 1999 Stock Incentive Plan or the 2001 Stock Incentive Plan; however, shares forfeited under those plans are available for subsequent issuance under this Plan. The Plan allows the Company to grant awards to key employees, including restricted stock awards and stock options, subject primarily to the requirement of continued employment. The awards for this Plan are available for grant over a ten-year period unless terminated earlier by the Board of Directors. In 2006, the Company granted 188,750 options with a weighted average exercise price of \$8.77. No options were issued in 2008 or 2007. The options vest 50% on the first anniversary of the date of grant, 25% on the second anniversary and the remaining 25% on the third anniversary. In 2008, the Company granted 389,750 shares of restricted stock, net of forfeitures, at an average market value of \$3.95. In 2007, the Company granted 223,500 shares of restricted stock, net of forfeitures, at an average market value of \$6.31. In 2006, the Company granted 95,000 and 74,915 shares of restricted stock, net of forfeitures, at a market value of \$8.78 and \$8.76 per share, respectively. The restricted shares generally vest ratably over three years, however, 74,915 shares of restricted stock granted on February 28, 2006 vested 50% on December 31, 2006 and December 31, 2007. The unearned compensation is being amortized to

expense over the respective vesting periods. No monetary consideration is paid by employees who receive restricted stock. Restricted stock can be granted with or without performance restrictions.

2005 Non-Employee Directors’ Restricted Stock Plan

In 2005, the Company’s Board of Directors adopted and the Company’s stockholders approved the 2005 Non-employee Directors’ Restricted Stock Plan providing for awards of restricted stock and restricted stock units to directors who are not employees of the Company. This Plan replaces the 1999 Non-Employee Director Restricted Stock Plan. This Plan authorizes the granting of awards of up to 75,000 shares of stock. The awards for this Plan are available for grant over a ten-year period unless terminated earlier by the Board of Directors. In 2008, the Company granted 27,648 restricted stock units at a market value of \$2.39 per share. In 2007, the Company granted 19,845 restricted stock units at a market value of \$6.81 per share. In 2006, the Company granted 13,680 and 13,824 restricted stock units at a market value of \$8.78 and \$8.69 per share, respectively. The 2008 grant of restricted stock units vest on the date of the 2009 annual shareholders’ meeting. The 2007 grant of restricted stock units vested on the date of the 2008 annual shareholders’ meeting. The first grant of restricted stock units vested on the date of the 2006 annual shareholders’ meeting and the second 2006 grant vested on the date of the 2007 annual shareholders’ meeting. The total market value of the awards granted was recorded as unearned compensation in additional paid-in capital line of Shareholders’ Equity.

EVA Incentive Compensation Plan

The Company’s EVA Incentive Compensation Plan (the “EVA Plan”) is intended to maximize shareholder value by aligning management’s interests with those of shareholders by rewarding management for sustainable and continuous improvement in operating results. No expense was recorded under this plan in 2008 and 2007, and \$0.2 million of compensation was forfeited in 2006.

Accounting For Stock-Based Compensation

The Company recognized approximately \$1.3 million, or \$1.1 million, net of tax effects, in non-cash stock-based compensation expense for the year ended December 31, 2008, comprised of stock options (\$0.1 million) and restricted stock awards (\$1.2 million). The Company recognized approximately \$1.6 million, or \$1.0 million, net of tax effects, in non-cash stock-based compensation expense for the year ended December 31, 2007, comprised of stock options (\$0.3 million) and restricted stock awards (\$1.3 million). The Company recognized approximately \$1.8 million, or \$1.1 million, net of tax effects, in non-cash stock-based compensation expense for the year ended December 31, 2006, comprised of stock options (\$0.8 million) and restricted stock awards (\$1.0 million). Cash received from exercises of stock options for the years ended December 31, 2008, 2007 and 2006 was \$0.4 million, \$0.6 million and \$0.8 million, respectively.

At December 31, 2008 the Company had 751,131 shares available under all of the stock compensation plans. On January 27, 2009, the Company issued 568,500 restricted shares.

Stock Options

The fair value of each option award is estimated as of the date of grant using the Black-Scholes option pricing model. The weighted average assumptions used in the model were as follows:

	<u>2006</u>
Volatility	49%
Risk-free interest rate	4.4%
Dividend yield	0%
Expected life of options (years)	6
Weighted average fair value of options granted	\$4.48

The volatility is estimated based on historical volatility of Huttig stock calculated over the expected term of the option.

The risk-free interest rate assumption is based on observed interest rates appropriate for the expected term of the Company's employee stock options. The Company has not paid any dividends on common stock since its inception and does not anticipate paying any dividends on its common stock for the foreseeable future. The expected life is estimated based on the Company's past history of exercises and post-vesting employment termination behavior.

The following table summarizes the stock option transactions pursuant to the Company's stock incentive plans for the three years ended December 31, 2008:

	Shares (000's)	Weighted Average Exercise Price Per Share	Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value (000's)	Average Remaining Vesting Period (Months)	Unrecognized Compensation Expense (000's)
Options outstanding at January 1, 2006	1,292	\$4.90

10. INCOME TAXES

The provision for income taxes, relating to continuing operations, is composed of the following (in millions):

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Current:			
U.S. Federal tax benefit	\$ —	\$(4.1)	\$(0.4)
State and local tax	<u>0.1</u>	<u>0.1</u>	<u>—</u>
Total current	<u>0.1</u>	<u>(4.0)</u>	<u>(0.4)</u>
Deferred:			
U.S. Federal tax (benefit)	(4.1)	0.3	(3.0)
State and local tax	<u>—</u>	<u>—</u>	<u>1.1</u>
Total deferred	<u>(4.1)</u>	<u>0.3</u>	<u>(1.9)</u>
Total income tax benefit	<u>\$(4.0)</u>	<u>\$(3.7)</u>	<u>\$(2.3)</u>

A reconciliation of income taxes based on the application of the statutory federal income tax rate to income taxes as set forth in the consolidated statements of continuing operations follows:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Federal statutory rate	35.0%	35.0%	35.0%
Increase (decrease) in taxes resulting from:			
State and local taxes	1.8	7.4	2.8
Contingency accrual adjustment	0.2	0.8	1.8
Valuation allowance adjustment	(23.3)	(7.6)	(13.6)
Nondeductible items	(3.4)	(3.6)	(2.1)
Other, net	<u>(0.1)</u>	<u>(0.4)</u>	<u>(0.7)</u>
Effective income tax rate	<u>10.2%</u>	<u>31.6%</u>	<u>23.2%</u>

In 2008, 2007 and 2006, the Company recorded a loss from continuing operations before income taxes of \$39.2 million, \$11.7 million, and \$10.0 million, respectively. The Company was able to carry back substantially all of the losses in 2007 and 2006 and amend previous year's returns to receive tax refunds in 2008 and 2007 of \$5.3 million and \$4.4 million, respectively. The loss before continuing operations in 2008 can not be carried back to an open year with taxable income and as such, the Company has recorded valuation allowances of \$8.7 million and \$0.3 million for 2008 and 2007, respectively. In 2007, the Company re-evaluated its tax position assertions and was able to reduce its previous tax accruals by \$0.1 million largely due to the lapse of statutes.

Deferred income taxes at December 31, 2008 and 2007 are comprised of the following (in millions):

	<u>2008</u>		<u>2007</u>	
	<u>Assets</u>	<u>Liabilities</u>	<u>Assets</u>	<u>Liabilities</u>
Accelerated depreciation	\$ 1.6	\$ —	\$ 1.3	\$ —
Goodwill	1.1	—	—	0.8
Employee benefits related	1.6	—	2.2	—
Inventories	2.2	—	1.9	—
LIFO	—	9.5	—	9.1
Insurance related	1.2	—	0.7	—
Other accrued liabilities	1.2	—	1.0	—
Accounts receivables	0.6	—	0.3	—
Income tax loss carryforwards	16.1	—	5.9	—
Other	<u>0.3</u>	<u>0.5</u>	<u>0.3</u>	<u>0.6</u>
Gross deferred tax assets and liabilities	25.9	10.0	13.6	10.5
Valuation allowance	<u>(14.8)</u>	<u>—</u>	<u>(5.9)</u>	<u>—</u>
Total	<u>\$ 11.1</u>	<u>\$10.0</u>	<u>\$ 7.7</u>	<u>\$10.5</u>

The Company has both federal and state tax loss carry forwards reflected above. The Company's federal tax loss carryforwards of approximately \$28.0 million will expire in 2028. The state tax loss carry forwards have expiration dates extending out to 2027. The Company's net deferred tax assets are expected to be realized with tax planning strategies that include the reversal of deferred tax liabilities and sales of existing real estate from closed facilities.

The total deferred income tax assets (liabilities) as presented in the accompanying consolidated balance sheets are as follows (in millions):

	<u>2008</u>	<u>2007</u>
Net current deferred taxes	\$(6.9)	\$(5.3)
Net long-term deferred taxes	8.0	2.5

Huttig adopted FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (“FIN 48”), on January 1, 2007. As a result of the implementation, the Company recognized a \$0.4 million decrease to liabilities for uncertain tax positions. This decrease was accounted for as an increase to the beginning balance of retained earnings on the balance sheet. Including the cumulative-effect decrease to liabilities for uncertain tax positions, at the beginning of 2007, Huttig had approximately \$0.4 million of unrecognized tax benefits, all of which, if recognized, would affect the effective income tax rate in future periods. As of December 31, 2008, there have been no material changes to the liabilities for uncertain tax positions. The Company does not expect any significant increases or decreases to its unrecognized tax benefits within 12 months of this reporting date.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in millions):

	<u>2008</u>	<u>2007</u>
Beginning Balance	\$0.3	\$ 0.4
Lapse of statute of limitations	—	(0.1)
Ending Balance	<u>\$0.3</u>	<u>\$ 0.3</u>

The Company has \$0.3 million of unrecognized tax benefits at December 31, 2008 and 2007 and \$0.1 million and \$0.2 million of accrued interest related to uncertain tax positions included in “Other non-current liabilities” at December 31, 2008 and December 31, 2007, respectively.

Huttig and its subsidiaries are subject to U.S. federal income tax as well as income tax of multiple state jurisdictions. The Company has substantially concluded all U.S. federal income tax matters for years through 2005. Open tax years related to state jurisdictions remain subject to examination but are not considered material.

11. BASIC AND DILUTED NET LOSS PER SHARE

The following table sets forth the computation of net income per basic and diluted share (net income amounts in millions, share amounts in thousands, per share amounts in dollars):

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Net loss available to common shareholders			
Net loss from continuing operations	\$ (35.2)	\$ (8.0)	\$ (7.7)
Net loss from discontinued operations	<u>(0.2)</u>	<u>(0.2)</u>	<u>—</u>
Net loss (numerator)	<u>\$ (35.4)</u>	<u>\$ (8.2)</u>	<u>\$ (7.7)</u>
Weighted average number of basic and diluted shares outstanding (denominator)	<u>20,923</u>	<u>20,570</u>	<u>20,270</u>
Net loss per share — Basic and Diluted			
Net loss from continuing operations	\$ (1.68)	\$ (0.39)	\$ (0.38)
Net loss from discontinued operations	<u>(0.01)</u>	<u>(0.01)</u>	<u>—</u>
Net loss	<u>\$ (1.69)</u>	<u>\$ (0.40)</u>	<u>\$ (0.38)</u>

At December 31, 2008, 2007 and 2006, all outstanding stock options and all non-vested restricted shares were anti-dilutive. Anti-dilutive shares were not included in the computations of diluted income per share amounts in 2008, 2007 and 2006.

12. SELECTED QUARTERLY FINANCIAL DATA (UNAUDITED)

The following table provides selected consolidated financial information from continuing operations on a quarterly basis for each quarter of 2008 and 2007. The Company's business is seasonal and particularly sensitive to weather conditions. Interim amounts are therefore subject to significant fluctuations (in millions, except per share data).

	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>	<u>Full Year</u>
2008					
Net sales	\$166.8	\$195.4	\$182.8	\$126.0	\$671.0
Gross profit	32.1	36.7	33.0	20.6	122.4
Operating loss	(13.3)	(2.8)	(6.2)	(14.3)	(36.6)
Net loss from continuing operations	(9.8)	(2.4)	(7.7)	(15.3)	(35.2)
Net loss from discontinued operations	—	(0.1)	—	(0.1)	(0.2)
Net loss per share — Diluted					
Net loss from continuing operations	\$(0.47)	\$(0.11)	\$(0.37)	\$(0.73)	\$(1.68)
Net loss from discontinued operations	—	(0.01)	—	—	(0.01)
Net loss	<u>\$(0.47)</u>	<u>\$(0.12)</u>	<u>\$(0.37)</u>	<u>\$(0.73)</u>	<u>\$(1.69)</u>
2007					
Net sales	\$222.4	\$239.5	\$233.0	\$179.9	\$874.8
Gross profit	41.8	45.7	43.4	34.1	165.0
Operating profit (loss)	(3.8)	2.9	1.0	(7.6)	(7.5)
Net income (loss) from continuing operations	(3.2)	1.1	(0.1)	(5.8)	(8.0)
Net loss from discontinued operations	(0.2)	—	—	—	(0.2)
Net income (loss) per share — Diluted					
Net income (loss) from continuing operations	\$(0.16)	\$ 0.05	\$ —	\$(0.28)	\$(0.39)
Net loss from discontinued operations	(0.01)	—	—	—	(0.01)
Net income (loss)	<u>\$(0.17)</u>	<u>\$ 0.05</u>	<u>\$ —</u>	<u>\$(0.28)</u>	<u>\$(0.40)</u>

13. DISCONTINUED OPERATIONS

Huttig sold its mouldings manufacturer, American Pine Products in August of 2004, and its one-step branches in three separate transactions in August and December of 2004, and in February of 2005. These operations are accounted for as discontinued operations. The discontinued operations of the Company had no sales in 2008, 2007 and 2006. A net loss from discontinued operations of \$0.2 million, \$0.2 million and \$0.0 million was recorded in 2008, 2007 and 2006, respectively.

14. ASSET IMPAIRMENT

The Company recorded an impairment charge of \$10.7 million in the caption "Operating expenses" on its consolidated statements of operations for the year ended December 31, 2006 for the discontinued implementation of a new enterprise resource system.

15. BRANCH CLOSURES AND OTHER SEVERANCE

In 2008, the Company closed its Fresno, California, Springfield, Missouri, Jackson, Tennessee, Fredericksburg, Virginia, and Macon, Georgia branch operations. The Company recorded \$2.1 million in operating charges from the closures in the caption “Operating expenses” on its consolidated statements of operations for 2008. In addition, the Company recorded \$1.0 million in inventory losses related to the branch closures recorded in the caption “Cost of sales” on its consolidated statements of operations for 2008.

In 2007, the Company closed its Long Island, New York, Dothan, Alabama, Spokane, Washington, Greensburg, Pennsylvania, and Kansas City, Missouri branch operations and sold its Green Bay, Wisconsin branch operations. The Company recorded \$3.8 million in operating charges from the closures, from severance associated with other reductions in force in 2007, and from the consolidation of leased space at its headquarters location in the caption “Operating expenses” on its consolidated statements of operations for 2007. In addition, the Company recorded \$1.5 million in inventory losses related to the branch closures recorded in the caption “Cost of sales” on its consolidated statements of operations for 2007.

In 2006, the Company closed its Grand Rapids, Michigan, Minneapolis, Minnesota and Hazelwood, Missouri branches, consolidated its Fort Wayne, Indiana branch into its Indianapolis, Indiana branch operations and consolidated its Albany, New York branch operations into its Selkirk, New York operations. The Company recorded \$2.9 million in operating charges from the closures and from severance associated with other reductions in force in 2006 in the caption “Operating expenses” on its consolidated statements of operations for 2006. In addition, the Company recorded \$1.0 million in inventory losses related to the branch closures recorded in the caption “Cost of sales” on its consolidated statements of operations for 2006.

At December 31, 2008 and 2007, the Company has \$0.9 million and \$1.8 million, respectively, in accruals related to severance and the remaining building lease rentals that will be paid out over the terms of the various leases through 2015 recorded in the caption “Accrued compensation” and “Other accrued liabilities” on its consolidated balance sheets.

Branch Closure Reserve and Other Severance (in millions)

	<u>Inventory</u>	<u>Operating Expenses</u>	<u>Total</u>
January 1, 2006	\$ —	\$ —	\$ —
Branch closures and other severance	1.0	2.9	3.9
Amount paid/utilized	<u>(1.0)</u>	<u>(1.7)</u>	<u>(2.7)</u>
Balance December 31, 2006	—	1.2	1.2
Branch closures and other severance	1.5	4.2	5.7
Amount paid/utilized	<u>(1.5)</u>	<u>(3.6)</u>	<u>(5.1)</u>
Balance December 31, 2007	—	1.8	1.8
Branch closures and other severance	1.0	2.1	3.1
Amount paid/utilized	<u>(1.0)</u>	<u>(3.0)</u>	<u>(4.0)</u>
Balance December 31, 2008	<u>\$ —</u>	<u>\$ 0.9</u>	<u>\$ 0.9</u>

16. SUBSEQUENT EVENTS

In March 2009, the Company announced the closing of its Atlanta, Georgia and its Indianapolis, Indiana facilities. The Company expects to incur between \$1.8 million and \$2.3 million in operating charges related to these actions during the remainder of 2009 for remaining lease rentals, asset write-offs/transfer costs and employee severance payments. The Company expects approximately \$1.2 million of these charges to be cash payments, including approximately \$0.8 million related to lease rentals (net of anticipated sublease rentals) on these facilities, being paid out over the terms of two leases expiring in October 2009 and June 2012.

ITEM 9 — CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A — CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures — The Company, under the supervision and with the participation of our Disclosure Committee and management, including our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934). Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures are effective as of December 31, 2008 in all material respects in (a) causing information required to be disclosed by us in reports that we file or submit under the Securities and Exchange Act of 1934 to be recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (b) causing such information to be accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control on financial reporting during the Company's fiscal fourth quarter ended December 31, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Control systems must reflect resource constraints and be cost-effective, can be undercut by simple errors and misjudgments, and can be circumvented by individuals within an organization. Because of these and other inherent limitations in all control systems, no matter how well they are designed, our disclosure controls and procedures and internal controls can provide reasonable, but not absolute, protection from error and fraud.

Management's Report on Internal Control Over Financial Reporting — The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management's assessment included an evaluation of the design of Huttig Building Products, Inc.'s internal control over financial reporting and testing of the operational effectiveness of its internal control over financial reporting. Management reviewed the results of its assessment with the Audit Committee of our Board of Directors. Based on our evaluation under the framework in *Internal Control — Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 31, 2008.

ITEM 9B — OTHER INFORMATION

Branch Closures

In March 2009, the Company announced the closing of its Atlanta, Georgia and its Indianapolis, Indiana facilities. The Company expects to incur between \$1.8 million and \$2.3 million in operating charges related to these actions during the remainder of 2009 for remaining lease rentals, asset write-offs/transfer costs and employee severance payments. The Company expects approximately \$1.2 million of these charges to be cash payments, including approximately \$0.8 million related to lease rentals (net of anticipated sublease rentals) on these facilities, being paid out over the terms of two leases expiring in October 2009 and June 2012.

PART III

ITEM 10 — DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information regarding executive officers and directors of Huttig is set forth in the Company's definitive proxy statement for its 2009 Annual Meeting of Stockholders (the "2009 Proxy Statement") under the caption "Executive Officers" and "Election of Directors", respectively, and is incorporated herein by reference. Information regarding Section 16(a) beneficial ownership reporting compliance is set forth in the

2009 Proxy Statement under the caption “Section 16(a) Beneficial Ownership Reporting Compliance,” and is incorporated herein by reference.

The information regarding the Company’s “audit committee financial expert” and identification of the members of the Audit Committee of the Company’s Board of Directors is set forth in the 2009 Proxy Statement under the caption “Board Committees” and is incorporated herein by reference.

The Company adopted a Code of Business Conduct and Ethics applicable to all directors and employees, including the principal executive officer, principal financial officer and principal accounting officer. The Code of Business Conduct and Ethics is available on the Company’s website at www.huttig.com. The contents of the Company’s website are not part of this Annual Report. Stockholders may request a free copy of the Code of Business Conduct and Ethics from:

Huttig Building Products, Inc.
 Attention: Corporate Secretary
 555 Maryville University Dr.
 Suite 400
 St. Louis, Missouri 63141
 (314) 216-2600

The Company intends to post on its website any amendments to, or waivers from, its Code of Business Conduct and Ethics within two days of any such amendment or waiver.

ITEM 11 — EXECUTIVE COMPENSATION

The information required by Item 11 is set forth in the 2009 Proxy Statement under the captions “Board of Directors and Committees of the Board of Directors,” “Executive Compensation,” “Compensation Committee Interlocks and Insider Participation” and “Report on Executive Compensation by the Management Organization and Compensation Committee of the Company” and is incorporated herein by reference.

ITEM 12 — SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Except as set forth below, the information required by Item 12 is set forth in the 2009 Proxy Statement under the captions “Beneficial Ownership of Common Stock by Directors and Management” and “Principal Stockholders of the Company,” and is incorporated herein by reference.

Equity Compensation Plan Information

The following table presents information, as of December 31, 2008, for equity compensation plans under which Huttig’s equity securities are authorized for issuance.

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column(a)) (c)
Equity compensation plans approved by security holders	922,735	\$2.90	751,134(1)
Equity compensation plans not approved by security holders(2) . .	<u>140,000(3)</u>	<u>\$4.30</u>	<u>0</u>
Total	<u>1,062,735</u>	<u>\$3.09</u>	<u>751,134</u>

(1) To the extent such shares are not issued pursuant to future option grants, 751,134 of such shares are available for issuance in the form of awards of restricted stock under the Company’s 2005 Executive Incentive Compensation Plan and 3 of such shares are available for awards under the Company’s 2005 Non-Employee Director Restricted Stock Plan.

- (2) Includes written option agreements providing for option grants to certain of the Company's non-employee directors (see footnote (3) below).
- (3) Includes options to purchase 100,000 shares at a per share price of \$4.29 granted on January 24, 2000 to Mr. Evans, a director of the Company. Includes options to purchase 20,000 shares at a per share exercise price of \$4.34 granted on January 22, 2001 to each of Messrs. Bigelow and Forté both of whom are directors of the Company. Each of these options has vested in full.

ITEM 13 — CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by Item 13 is set forth in the 2009 Proxy Statement under the caption "Certain Relationships and Related Transactions and Director Independence," and is incorporated herein by reference.

ITEM 14 — PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by Item 14 is set forth in the 2009 Proxy Statement under the caption "Principal Accounting Firm Services and Fees," and is incorporated herein by reference.

PART IV

ITEM 15 — EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) The following documents are filed as part of this report:

1. Financial Statements:

Report of Independent Registered Public Accounting Firm

Consolidated Balance Sheets as of December 31, 2008 and 2007

Consolidated Statements of Operations for the years ended December 31, 2008, 2007 and 2006
