Equal Employment Opportunity Policy

Norfolk Southern Corporation's policy is to comply with all applicable laws, regulations and executive orders concerning equal employment opportunity and nondiscrimination and to offer employment on the basis of qualification and performance, regardless of race, religion, color, national origin, sex, age, sexual orientation, veteran status, the presence of a disability or any other legally protected status.

Description of Business

Norfolk Southern Corporation is a Norfolk, Va.-based company that controls a major freight railroad, Norfolk Southern Railway Company. The railway operates 21,500 route miles in 22 eastern states, the District of Columbia and the province of Ontario, serves 20 ports and connects with rail partners in the West and Canada, linking customers to markets around the world. Norfolk Southern provides comprehensive logistics services and offers the most extensive intermodal network in the East.

Number of employees at year end	28,514	28,160	(1)

¹ Results in 2003 include the costs of a voluntary separation program and a charge to recognize the impairment of certain telecommunications assets. The costs of the voluntary separation program reduced income from railway operations by \$107 million and increased the railway operating ratio by 1.6 percentage points. These two items reduced income from continuing operations before accounting changes by \$119 million or 30 cents per diluted share.

² Excludes notes payable to Conrail

DEAR FELLOW SHAREHOLDERS:

In 2003, your company posted significant improvements in performance not only in the bottom line, but in overall results, affirming our formula for creating continued growth and improvement in stockholder value.

Our formula is based on our belief that if we perform well — really well — improvements in our business process will drive better service for our customers. In turn, we are convinced we can sell more of our enhanced transportation products at better value. At the same time, improving performance drives a more efficient transportation system and better productivity.

In short, focusing intently on improving performance allows us to introduce new products higher up on the logistics value chain and reduce costs by better managing and utilizing capacity.

Inevitably, execution of that formula makes our returns better, and that flows to all our constituents — the communities and customers we serve, our own people and, of course, our investors. I believe 2003 shows the formula works and suggests the growth we can produce if we stay focused and continue the momentum we have developed.

The year's hallmark, along with our continued leadership in safety, was the service improvement shown by Norfolk Southern in a time when the North American rail transportation system as a whole was stretched to provide strong service. With full implementation of our proprietary Thoroughbred Operating Plan — in effect, our scheduled railroad — we were able to achieve clearly visible improvements in the consistency and quality of our service. As a result, we were ready to serve our customers as the economy grew stronger in the second half of 2003. We are well equipped for what promises to be a continuing strong recovery in 2004.

We were able to respond to early challenges from harsh weather and slow economic conditions and hit the strong third and fourth quarters

with good service and improving efficiency. That is due to the great response of our people to the diagnostic operating tools our technology has produced and our relentless search for improvement.

The commitment of Norfolk Southern people to provide the highest levels of service is central to all we do. Norfolk Southern long has been the industry leader in safety. Our intent is to continue as an industry benchmark in safety and apply the same level of commitment to service so we can assume transportation leadership in both.

I believe our strong revenue growth and our improvement in margins over time are directly attributable to making our products more attractive and more valuable while improving our efficiency and costs through better performance. Norfolk Southern's improving results are proof of the strategy. Now, we have to perform at world-class levels to produce the results our customers and investors deserve. We showed in '03 that we've just begun to roll.

For the past couple of years in this letter, I have said we would accomplish several specific objectives. Let's take a quick look at how we did in 2003.

- **Improve service:** Measuring more aspects of the transportation cycle means we can hone in on specific service issues. Metrics improved, and consistency improved even more. Customers noticed, and you can read on Page 7 a list of some of the service awards Norfolk Southern received during the year.
- **Improve productivity:** Process analysis of work functions and our ongoing Six Sigma initiatives produced better asset utilization and work force productivity during 2003.
- **Grow revenue:** Despite a particularly challenging economic environment in the first half, annual revenue increased more than 3 percent overall and set a record. This was primarily the result of service improvements, value-based pricing and highway-to-rail traffic conversions. Importantly, the increases were seen in all our major business lines.
- **Generate cash flow, pay down debt:** We achieved more than \$400 million of debt reduction during the year and redeemed \$43 million of preferred stock. Our credit ratings continue to be among the top of the industry.
- **Earn fair returns:** Earnings per share grew 16 percent. We increased our dividend for the second consecutive year.
- **Improve governance:** We continued our tradition of strong ethics and governance for the company by working proactively to make sure our standards remain at the

very top. I refer you to Page 16 for a list of actions taken.

What does this mean for tomorrow? We'll take the experience and wisdom gained over the last few years and make them pay off. Our people have worked hard to restore Norfolk Southern to the efficient and highly productive organization our customers and shareholders deserve. A lot of progress has been made, with more to come. We clearly are ready to grow now that the economy is improving and demand for our transportation is increasing.

We'll grow revenues — both in values and increasingly by emphasizing our high-end transportation products. We'll continue to improve productivity. The reductions in staffing and overheads achieved in '03 and the improvements of technology will be fully felt in '04. We have taken constructive actions to control medical cost increases and other administrative costs. Meanwhile, we will maintain our world-class performance as a safe operation.

We'll push even harder to help policymakers understand, as our transportation partners and shippers already do, that it pays to use rail whenever possible. Rail is better for the environment. It reduces road congestion, thereby enhancing mobility. It is more economical and efficient.

We'll continue to improve on our balance sheet. We'll pay off debt and use our assets even more effectively. We'll generate cash flow to continue our capital investment program and enhance returns to our shareholders.

Norfolk Southern will make improvements and changes in performance. We will, however, do that in the continuing environment of sound corporate governance, strong ethical com-

mitment and safety, which have been hallmarks of our company and culture. We're making improvements in our structure and governance practices. Norfolk Southern will continue its tradition of absolute devotion to honesty, high ethics and clear financial reporting.

The rail transportation industry is showing stability and strength, I believe the best in many years. It has enormous potential to grow and be an even greater piece of the fabric that makes our economy strong.

We at Norfolk Southern have shown willingness and an ability to make the necessary commitment to growth, in the conviction that we can both serve and benefit by that commitment. Now, we see the value of our capacity and the investments we have made.

We have been tested by our own expansion and by an economy that failed to expand at the pace we had counted on. Now, however, we are seeing much greater demand for our services. This comes at an ideal time, because we have a system second to none and a lean, tested and experienced group of Norfolk Southern people ready to serve our customers.

This combination of factors has every prospect of enabling our success, as long as we perform at the levels we know we can. That's why we put the word "performance" on the cover of this report. We'll constantly remind ourselves of our obligation to our owners, customers and communities to perform better and better. I have every confidence the Thoroughbred will continue to respond.

January 27, 2004

PERFORMANCE DRIVES GROWTH

Norfolk Southern achieved higher levels of performance throughout the organization in 2003.

Refinements to the operating plan and new performance measurement tools helped the company produce more consistent and reliable transportation service and provide higher value to customers.

Asset and work force productivity were enhanced through the development of more cost-effective ways of doing business.

The collective efforts of many initiatives paid off in revenue growth and better returns for shareholders. NS strengthened its network for supporting new business growth anticipated as a result of improved service and a more robust economy.

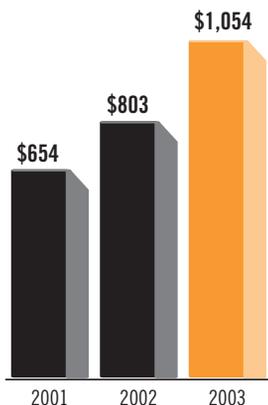

NS received its 14th consecutive E.H. Harriman Gold Medal Award, continuing its leadership in employee safety among the nation's largest railroads.

The company continued its support of employee reservists called up for active duty in the armed forces. Beginning with the activation of reservists for Operation Enduring Freedom in 2001, NS has offered enhanced benefits designed to help employees and their families during the deployments. The leave benefits include a monthly income supplement and continued health care and life insurance coverage.

Net Income, Earnings per Share Increase

- NS posted revenues \$198 million higher than in 2002.
- Net income increased by \$75 million or 16 percent.
- Earnings per share increased by 16 percent.
- For the second consecutive year, NS increased the quarterly dividend on its common stock, from 7 cents to 8 cents in July.
- Cash provided by operating activities increased by \$251 million more than in 2002.
- NS has reduced long-term debt by \$693 million since the beginning of 2001. NS' share of Conrail's long-term debt has declined \$103 million. The total three-year reduction in debt obligations is \$796 million.
- NS credit ratings are among the best in the industry, reflecting the company's emphasis on solid financial performance.

Cash Provided by Operating Activities (\$ millions)

Long-term Debt* (\$ millions)

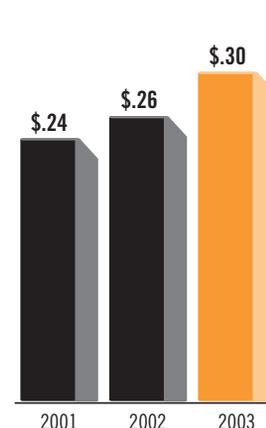

* Excludes notes payable to Conrail

Debt to Total Capitalization Ratio* (percent)

* Excludes notes payable to Conrail

Dividends per Share Paid (dollars)

■ NS' fuel hedging program in 2003 lowered the company's average price per gallon of fuel. Favorable hedge settlements reduced expenses by \$59 million for the year. Hedging helps to reduce the volatility in the price of diesel fuel and protects the company and investors from the impact of erratic price swings in the fuel market. At year-end 2003, NS had 63 percent of projected 2004 fuel

consumption hedged at an average price of 78 cents per gallon.

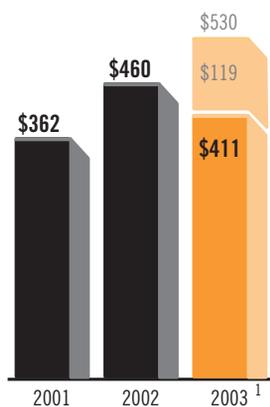

As part of an effort to address costs, the company initiated a voluntary separation program for nonunion employees. In total, 553 employees were approved for separation, of which 314 also were eligible to retire under the company's retirement plan. NS recorded a \$66 million after-tax charge against fourth-quarter earnings related to the program.

Systems Refine Operations, Improve Service

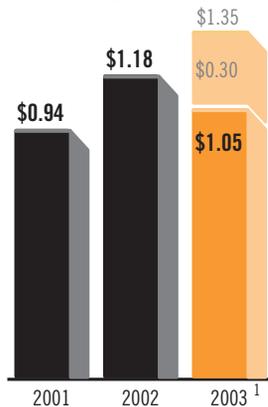

New and enhanced tools added to the company's abilities to measure service performance and to make quick adjustments to network operations when necessary. Field personnel were equipped with improved real-time information, helping them to make informed decisions about service and to master performance of their own operations.

The company's Thoroughbred Operating Plan, the foundation for NS' transportation network, drove greater consistency for merchandise traffic movements. NS' Coal Transportation Management System — a commodity transportation management system that now includes grain traffic information — and the Strategic Intermodal Management System also provided support for improved network operations.

Income from Continuing Operations before Accounting Changes (\$ millions)

Diluted Earnings per Share from Continuing Operations before Accounting Changes (dollars)

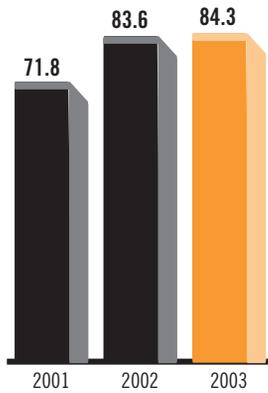

¹ 2003 results include \$107 million of costs related to a voluntary separation program and an \$84 million charge to recognize the impaired value of certain telecommunications assets. Together, these items reduced income from continuing operations before accounting changes by \$119 million, or 30 cents per diluted share.

**Switching Performance
2003* (percent)**

**On-Time Train
Performance (percent)**

**Connection Performance
2003* (percent)**

* Measurement began in second quarter.

Further driving productivity and efficiency, NS continued use of remote control locomotive technology in switching operations.

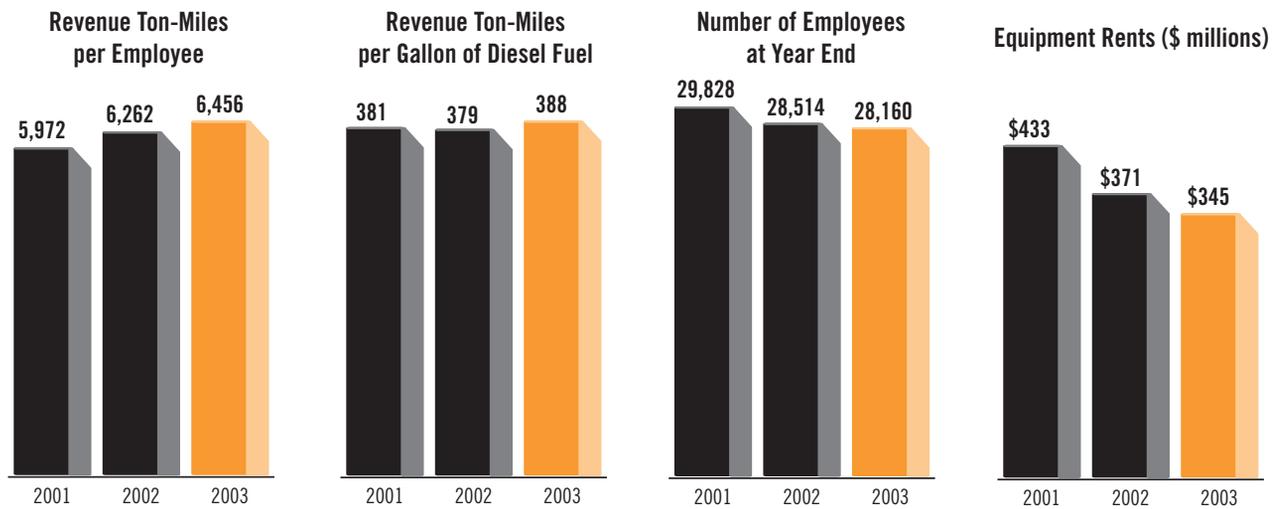

Rail freight transportation essentially comprises three operations: customer pickup and delivery, running the trains, and making the right connections at intermediate yards between origin and destination. NS rolled out new systems in the second quarter of 2003 that enhance the measurement and management of these components in detail. The systems pinpoint performance on a car-level basis, helping to improve consistency and reliability of service for customers.

■ **Customer pickup and delivery** is a function of moving a rail car between a customer's facility and a local yard at origin and destination. NS created a system called Local Operating Plan Adherence to help manage this transportation segment. The system measures the amount of local switching work actually performed against the work scheduled in a 24-hour period. Field personnel can drill down to identify service issues by region, division, terminal, serving yard, customer or industry route. NS' local switching performance improved from 65 percent in the second quarter, when

the system was introduced, to 74 percent in the fourth quarter.

■ **Running the trains** from origin to destination is measured best by on-time performance. Running trains according to the operating schedule results in dependable, consistent customer service. NS is implementing a set of tools in its Operating Plan Adherence system to help manage compliance with the Thoroughbred Operating Plan for individual shipments moving over the road from origination to destination yards. The tools measure actual versus scheduled times of arrival and permit better analysis of system operations. Overall on-time train performance improved to 84.3 percent in 2003.

■ **Making the right connections** is essential for efficient, on-time transportation operations. The Operating Plan Adherence tools provide for measurements of train blocking and terminal connections. The measurement data are supported by NS' Thoroughbred Yard Enterprise System, newly enhanced as a real-time railroad management tool. TYES now highlights cars that must make a connection on the next train, cars in jeopardy of missing connections, and cars running late.

Blocking plans and car trip plans are compared to actual results to ensure that the right cars are in the right blocks on the right trains. Operating Plan Adherence began at 11 rail yards in the second quarter and was integrated at more than 70 yards in the fourth quarter. In that time, total connection performance held steady around 75 percent, with major emphasis for improvement focused in 2004.

In addition to the benefits in operational efficiency and customer service, these new and enhanced systems and other efforts in 2003 also led to improvements in asset utilization.

- Locomotive fuel consumption was reduced by three-fourths of a gallon per carload, saving more than 5 million gallons.
- Better asset utilization led to a reduction of more than 5,000 freight cars from the fleet.

- Freight car utilization improved 2 percent.
- Locomotive use efficiency increased 2 percent.

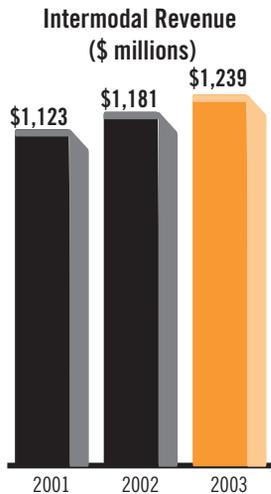

NS Earns Service Stars

Gains in operating efficiency mean better service. NS achieved a record number of consecutive days without a service failure for customer United Parcel Service, including a perfect fall peak season. The error-free service streak exceeded 100 days, continuing into 2004.

Here are some customer service awards NS received during 2003.

- Coors Brewing Company named NS Transportation Supplier of the Year.
- Toyota presented NS two Logistics Excellence Awards for on-time performance and quality performance.

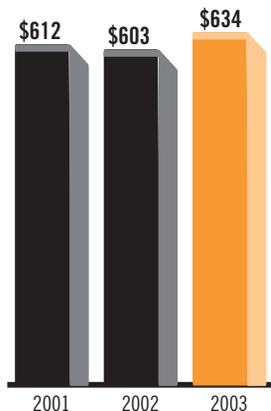

- Schneider National presented its Partners in Quality Award to NS for achievements in service, innovation, continuous improvement and ease of doing business.
- Eaglebrook Inc. named NS Carrier of the Year.
- Hershey Corp. presented its Galaxy Award to local NS crews serving Hershey facilities.
- The American Chemistry Council recognized NS with its National Achievement Award for outstanding support of TRANSCAER, a chemical safety awareness program.
- Logistics Management magazine cited Triple Crown Services Company, an NS affiliate, as Best Intermodal Service Provider for the third consecutive year.

Agriculture, Consumer Products and Government Revenue (\$ millions)

Paper, Clay and Forest Products Revenue (\$ millions)

Revenue, Carloads Increase

The payoff for improvements in operating performance and service is better business results. Overall for 2003, revenue increased \$198 million on 2 percent more carloads than in 2002. Service improvements and marketing efforts led to significant conversion of both intermodal and merchandise traffic from the highways to the rails. Value-based pricing contributed to a 1 percent increase in average revenue per unit.

NS' industrial development activity resulted in the location of 69 new industries and expansion of another 20 in 2003. This represents investment of \$1.5 billion by NS customers and creates an estimated 7,200 jobs in 17 states. NS expects this activity eventually to generate more than 85,000 carloads annually.

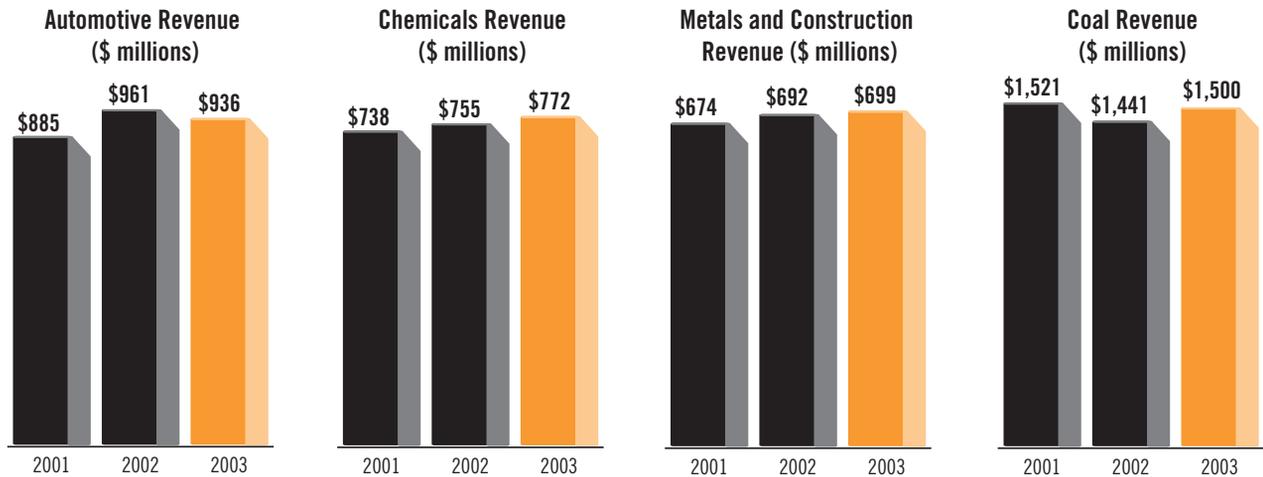

Intermodal Sets Volume Record

- Intermodal traffic grew 5 percent to a record volume. Revenue increased by 5 percent over 2002.
- The truckload segment led the growth with a 14 percent increase, more than half of which was highway-to-rail conversions.

- NS opened its first local guaranteed service lane between Chicago and the Northeast.
- Interline guaranteed service lanes were increased from nine to 15.
- International traffic grew by 9 percent.

Agriculture, Paper Lead Merchandise Growth

- Overall, merchandise revenues increased by 2 percent in 2003, and carloads increased by 1 percent. Revenue per car increased by 1 percent.
- **Agriculture, Consumer Products and Government** posted an 8 percent revenue growth on a 7 percent increase in carloads. Revenue and carloads both were record highs. Corn shipments set a volume record, resulting in an 8 percent revenue increase. Reopening of a PCS facility at Occidental, Fla., brought back phosphate shipments, generating an increase of 11 percent in fertilizer revenue. Shipments of military equipment increased by 36 percent.
- **Paper, Clay and Forest Products** revenue was up by 5 percent, and carloads increased by 1 percent.

Pulpboard, woodchips and printing paper markets benefited from improved paper market conditions and motor carrier conversions. Partnerships with other carriers enabled NS to extend storage, rail and truck delivery services for paper, lumber and other wood products.

- **Automotive** revenue and carloads decreased by 3 percent due principally to reduced vehicle production and numerous model changeovers at NS-served plants. During 2003, NS began direct rail service to a new Honda plant at Lincoln, Ala. NS teamed with Union Pacific to create the de Mex AutoFlyer, which reduced transit schedules by two days for auto parts shipments from the Midwest to Mexico.
- **Chemicals** revenue increased by 2 percent on 1 percent more carloads. Motor carrier diversions, higher plastics shipments and

increased industrial chemical volume contributed to 2003 results. Plastics carloads increased by 2 percent for the year.

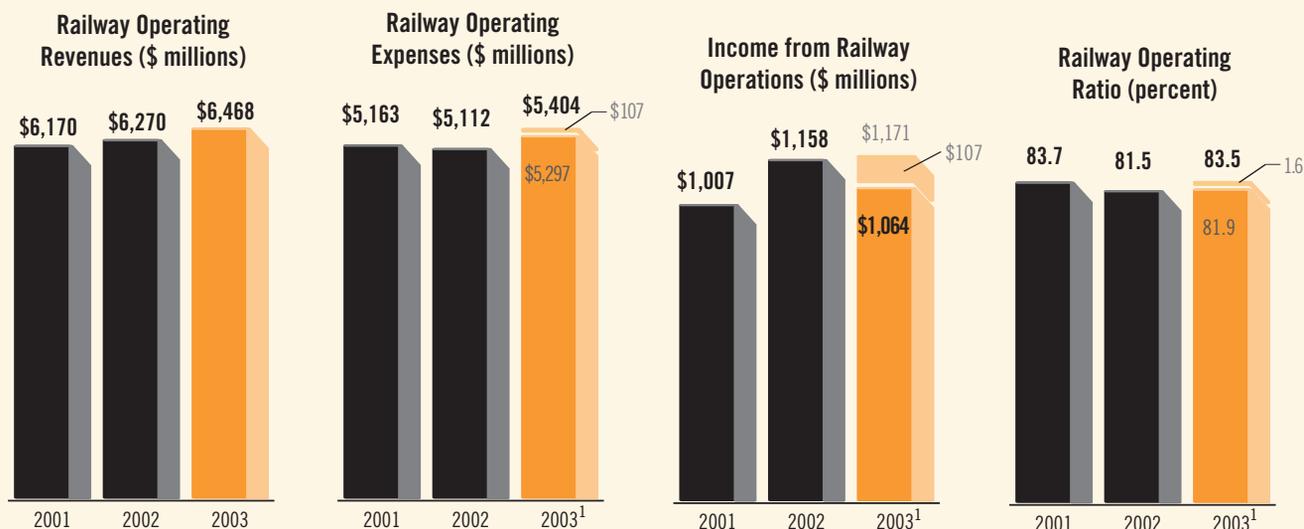

- **Metals and Construction** revenue was up 1 percent on 1 percent fewer carloads. Sheet steel revenue was up by 3 percent, scrap metal revenue increased by 11 percent, and cement revenue was up by 6 percent. A new Steelnet distribution facility expanded market reach. Highway conversions helped offset lower volumes in import slab steel.

NS Cycles Coal Faster

- Overall, coal revenue increased by 4 percent in 2003 on slightly more carloads.
- A new Coal Transportation Management System improved trip and car planning. The system allows NS to move loads and empties quicker,

generating faster load-to-load cycles, which improves customer service and reduces investment in hopper cars.

- Export coal through NS' Lamberts Point transload facility at Norfolk was up by about 2 million tons. Increased demand from Europe developed during the year and continued in first-quarter 2004.
- Utility shipments increased in the North and decreased in the South, where reduced electricity generation was a result of mild weather and installation of clean coal technology devices.
- Industrial coal traffic was flat with 2002 levels, while the domestic metallurgical coal market was down due to a decline in integrated steel production.

¹ 2003 operating expenses include \$107 million of costs related to a voluntary separation program, which reduced income from railway operations by \$107 million and increased the railway operating ratio by 1.6 percentage points.

Financial Overview

Net income was \$535 million, or \$1.37 per diluted share, in 2003. These results include the following:

- the cumulative effect of required changes in accounting principles, which increased net income by \$114 million, or 29 cents per share;
- the costs of a voluntary separation program, which reduced net income by \$66 million, or 17 cents per share;
- the impairment of certain telecommunications assets, which lowered net income by \$53 million, or 13 cents per share; and
- a discontinued operations gain of \$10 million, or 3 cents per share, related to the 1998 sale of a motor carrier subsidiary.

Absent all of these items, net income would have been \$530 million, or \$1.35 per share, up \$70 million or 15 percent.

Railway operating revenues were \$6.5 billion in 2003, up \$198 million or 3 percent compared with 2002, a result of increases in traffic volume and average revenue per carload. General merchandise revenues rose \$81 million or 2 percent, coal revenues increased \$59 million or 4 percent, and intermodal revenues were up \$58 million or 5 percent.

Railway operating expenses were \$5.4 billion, up \$292 million or 6 percent, while traffic volume was up 2 percent. The expense increase reflected higher compensation and benefits, including the \$107 million

cost of the voluntary separation program, and higher diesel fuel prices.

Income from railway operations was \$1.1 billion, down \$94 million or 8 percent, reflecting the costs of the voluntary separation program.

The railway operating ratio was 83.5 percent in 2003, two percentage points above the 81.5 percent of 2002. The cost of the voluntary separation program added 1.6 percentage points to the ratio for 2003.

Five-Year Financial Review

Notes

¹ 2003 operating expenses include a \$107 million charge for a voluntary separation program. Other income — net includes an \$84 million charge to recognize the impaired value of certain telecommunications assets. These charges reduced net income by \$119 million, or 30 cents per diluted share.

² In 1998, NS sold all the common stock of its motor carrier subsidiary, North American Van Lines, Inc. (NAVL), for \$207 million and recorded a \$90 million pretax (\$105 million, or 28 cents per diluted share, after-tax) gain. Results in 2001 include an additional after-tax gain of \$13 million, or 3 cents per diluted share, that resulted from the expiration of certain indemnity obligations contained in the sales agreement. Results in 2003 include an additional after-tax gain of \$10 million, or 3 cents per diluted share, resulting from the resolution of tax issues related to the transaction.

³ Net income in 2003 reflects two accounting changes, the cumulative effect of which increased net income by \$114 million or 29 cents per diluted share: a change in accounting for the cost to remove railroad crossties, which increased net income by \$110 million; and a change in accounting related to a special-purpose entity that leases certain locomotives to NS, which increased net income by \$4 million. This entity's assets and liabilities, principally the locomotives and debt related to their purchase, are now reflected in NS' Consolidated Balance Sheet.

⁴ Excludes notes payable to Conrail of \$716 million in 2003, \$513 million in 2002, \$301 million in 2001, \$51 million in 2000 and \$123 million in 1999.

⁵ 2000 operating expenses include \$165 million in work force reduction costs for early retirement and separation programs. These costs reduced net income by \$101 million, or 26 cents per diluted share.

⁶ On June 1, 1999, NS began operating a substantial portion of Conrail's properties. As a result, both its railroad route miles and the number of its railroad employees increased by approximately 50 percent on that date.

NS Strengthens Corporate Governance

Norfolk Southern is committed to high standards of corporate governance, and the board of directors acted to strengthen the company's policies.

- Implementing new rules of the New York Stock Exchange, the board determined that all NS directors are independent, with the exception of David Goode, NS chairman, president and chief executive officer.
- Board committees were restructured in January 2004. A new Governance and Nominating Committee combines duties previously held by two separate board committees and improves coordination between the two important and related functions. The new committee structure also stipulates that only independent directors may serve on the Compensation, Performance-Based Compensation, Audit and Governance and Nominating committees.
- A revised Code of Ethics now applies to directors in addition to officers and employees.
- A new Code of Ethical Conduct for Senior Financial Officers was adopted.
- Corporate Governance Guidelines, board committee charters, the corporation's bylaws, Code of Ethics, Code of Ethical Conduct for Senior Financial Officers and procedures for reporting accounting concerns are posted on the NS Web site at www.nscorp.com.
- The board and the committees continue to perform annual self-evaluations, which are established practice at NS.
- The Internal Audit Hotline, in existence for many years, has been designated for use by employees and third parties who wish to report concerns about accounting and audit matters confidentially. The number is 800-732-9279.
- The NS board has determined that the Audit Committee includes at least one audit committee financial expert.
- While companies are not yet required to include a management report on internal control and auditors' assessment, NS included an independent public accountants' report on management's assertion of the effectiveness of the company's internal control over financial reporting in this annual report and in the annual report for 2002.
- Shareholders can contact outside board members by sending written communication to the Chair of the Governance and Nominating Committee, c/o Corporate Secretary, Norfolk Southern Corporation, Three Commercial Place, Norfolk, Virginia 23510. All communications directed to this address will be forwarded to the Chair.

Stockholder Information

Common Stock

Common stock of Norfolk Southern Corporation is listed and traded on the New York Stock Exchange.

Annual Meeting

May 13, 2004, at 10 a.m. CDT
The Eric P. Newman Education Center
320 S. Euclid Ave.
St. Louis, Mo.

Publications

Upon written request, the corporation's annual and quarterly reports on Forms 10-K and 10-Q will be furnished free to stockholders. Write to: Public Relations Department, Norfolk Southern Corporation, Three Commercial Place, Norfolk, Va. 23510-9227.

A notice and proxy statement/annual meeting of stockholders are furnished to stockholders in advance of the annual meeting.

Upon request, a stockholder may receive a printed copy of the Corporate Governance Guidelines, board committee charters, Code of Ethics, and Code of Ethical Conduct for Senior Financial Officers. Contact the Corporate Secretary, Norfolk Southern Corporation, Three Commercial Place, Norfolk, Va. 23510-9219.

A toll-free telephone number — (800) 531-6757 — is available for information.

Dividends

At its January 2004 meeting, the corporation's board of directors declared a quarterly dividend of 8 cents per share on its common stock, payable on March 10, 2004, to stockholders of record on Feb. 6, 2004.

Norfolk Southern Corporation pays quarterly dividends on its common stock, usually on or about March 10, June 10, Sept. 10 and Dec. 10. The corporation has paid 86 consecutive quarterly dividends since its inception in 1982.

Dividend Reinvestment Plan

Stockholders whose names appear on their stock certificates (not a street or broker name) are eligible to participate in the Dividend Reinvestment Plan.

The plan provides a convenient, economical and systematic method of acquiring additional shares of the corporation's common stock by permitting eligible stockholders of record to reinvest dividends.

The plan's administrator is The Bank of New York. For additional information, dial (866) 272-9472.

PART I

NORFOLK SOUTHERN CORPORATION AND SUBSIDIARIES (NS)

Item 1. Business. and Item 2. Properties.

GENERAL - Norfolk Southern Corporation (Norfolk Southern) was incorporated on July 23, 1980, under the laws of the Commonwealth of Virginia. On June 1, 1982, Norfolk Southern acquired control of two major operating railroads, Norfolk and Western Railway Company (NW) and Southern Railway Company (Southern) in accordance with an Agreement of Merger and Reorganization dated as of July 31, 1980, and with the approval of the transaction by the Interstate Commerce Commission (ICC) (now the Surface Transportation Board [STB]).

Effective Dec. 31, 1990, Norfolk Southern transferred all the common stock of NW to Southern, and Southern's name was changed to Norfolk Southern Railway Company (Norfolk Southern Railway or NSR). Effective Sept. 1, 1998, NW was merged with and into Norfolk Southern Railway. As of Dec. 31, 2003, all the common stock of Norfolk Southern Railway was owned directly by Norfolk Southern.

Through a jointly owned entity, Norfolk Southern and CSX Corporation (CSX) own the stock of Conrail Inc., which owns the major freight railroad in the Northeast. Norfolk Southern has a 58% economic and 50% voting interest in the jointly owned entity. See also the discussion concerning operation of a portion of Conrail's rail assets, below.

On March 28, 1998, Norfolk Southern closed the sale of its motor carrier company, North American Van Lines, Inc. (NAVL) (see "Discontinued Operations" and Note 17). NAVL's results are presented as "Discontinued operations" in the accompanying financial information.

Norfolk Southern makes available free of charge through its website, www.nscorp.com, its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (SEC). Additionally, Norfolk Southern's corporate governance guidelines, board committee charters, code of ethics and code of ethical conduct for senior financial officers are available on the company's website and in print to any shareholder who requests them.

Unless indicated otherwise, Norfolk Southern and its subsidiaries are referred to collectively as NS.

OPERATION OF A PORTION OF THE CONRAIL RAIL ASSETS - On June 1, 1999, Norfolk Southern and CSX, through their respective railroad subsidiaries, began operating separate portions of Conrail's rail routes and assets. Substantially all such assets are owned by two wholly owned subsidiaries of Consolidated Rail Corporation (CRC); one of those subsidiaries, Pennsylvania Lines LLC (PRR), has entered into various operating and leasing arrangements, more particularly described in Note 2, with Norfolk Southern Railway. The other subsidiary, New York Central Lines LLC (NYC) has entered into similar arrangements with CSX Transportation, Inc. (CSXT). Certain rail assets (Shared Assets Areas) still are owned by CRC, which operates them for joint and exclusive use by Norfolk Southern Railway and CSXT.

Operation of the PRR routes and assets increased the size of the system over which Norfolk Southern Railway provides service by nearly 50% and afforded access to the New York metropolitan area, to much of the Northeast and to most of the major East Coast ports north of Norfolk, Virginia. Also, leasing

arrangements with PRR augmented Norfolk Southern Railway's locomotive, freight car and intermodal fleet.

Conrail Corporate Reorganization

NS, CSX and Conrail are jointly seeking to reorganize Conrail and establish direct ownership and control by NSR and CSXT of PRR and NYC, respectively. The proposed reorganization would replace the operating agreements described above and allow NSR and CSXT to directly own and operate PRR and NYC, respectively. Consummation of the reorganization requires a ruling from the Internal Revenue Service (IRS), the approval of the STB and filings with the SEC. In addition, NS, CSX and Conrail must obtain the consent of Conrail's debt holders to carry out the transaction and will obtain a valuation of PRR and of NYC.

In 2003, the IRS issued a ruling that the reorganization would qualify as a tax-free distribution. Also in 2003, the STB granted its authorization to carry out the reorganization, subject to a condition requiring NS, CSX and Conrail to either: (i) obtain the voluntary consent of the Conrail debt holders; or (ii) propose further proceedings to determine whether the terms offered to the Conrail debt holders are fair, just and reasonable. In 2004, NS, CSX and Conrail intend to file registration statements on Form S-4 with the SEC to allow a proposed exchange offer relating to Conrail's unsecured debt (see below). In order to implement the reorganization approved by the IRS, the companies have engaged an investment banking firm to provide a valuation. The results of the valuation could impact NS' carrying amount of its investment in Conrail and the recording of the corporate reorganization.

As a part of the proposed reorganization, Conrail would undertake a restructuring of its existing unsecured and secured public indebtedness. There are currently two series of unsecured public debentures with an outstanding principal amount of \$800 million and 13 series of secured debt with an outstanding principal amount of approximately \$321 million. It is currently contemplated that guaranteed debt securities of two newly formed corporate subsidiaries of NSR and CSXT would be offered in a 58%/42% ratio in exchange for Conrail's unsecured debentures. Upon completion of the proposed transaction, the new debt securities would become direct unsecured obligations of NSR and CSXT, respectively, and would rank equally with all existing and future senior unsecured debt obligations, if any, of NSR and CSXT. These new debt securities will have maturity dates, interest rates and principal and interest payment dates identical to those of the respective series of Conrail's unsecured debentures. In addition, these new debt securities will have covenants substantially similar to those of the publicly traded debt securities of NS and CSX, respectively.

Conrail's secured debt and lease obligations will remain obligations of Conrail and are expected to be supported by new leases and subleases which, upon completion of the proposed transaction, would be the direct lease and sublease obligations of NSR or CSXT.

NS, CSX and Conrail are diligently working to complete all steps necessary to consummate the Conrail corporate reorganization in 2004. Upon consummation of the proposed transaction, NS' investment in Conrail will no longer include amounts related to PRR and NYC. Instead, the assets and liabilities of PRR will be reflected in their respective line items in NS' Consolidated Balance Sheet, and any amounts owed to PRR would be extinguished.

RAILROAD OPERATIONS - As of Dec. 31, 2003, NS' railroads operated approximately 21,500 miles of road in the states of Alabama, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maryland, Michigan, Mississippi, Missouri, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia, the District of Columbia and in the Province of Ontario, Canada. The miles operated were as follows:

Mileage Operated as of Dec. 31, 2003

	Miles of Road	Second and Other Main Track	Passing Track, Crossovers and Turnouts	Way and Yard Switching	Total
Owned	11,707	1,383	1,623	5,972	20,685
Operated under lease, contract or trackage rights	9,813	3,435	891	3,647	17,786
Total	<u>21,520</u>	<u>4,818</u>	<u>2,514</u>	<u>9,619</u>	<u>38,471</u>

In addition to the lines leased from Conrail previously discussed, NS' railroads have major leased lines between Cincinnati, Ohio, and Chattanooga, Tennessee, and operate over trackage owned by North Carolina Railway Company (NCR). The Cincinnati-Chattanooga lease, covering about 335 miles of road, expires in 2026, and is subject to an option to extend the lease for an additional 25 years, at terms to be agreed upon. The trackage rights over NCR cover approximately 315 miles of road under an agreement through 2014 with the right to renew for two additional 15-year periods.

NS' railroads carry raw materials, intermediate products and finished goods primarily in the Southeast, East and Midwest, and via interchange with other rail carriers, to and from the rest of the United States and parts of Canada. They also transport overseas freight through several Atlantic and Gulf Coast ports. Atlantic ports served by NS include: Norfolk, Virginia; Morehead City, North Carolina; Charleston, South Carolina; Savannah and Brunswick, Georgia; Jacksonville, Florida; Baltimore, Maryland; Philadelphia, Pennsylvania/Camden, New Jersey; Wilmington, Delaware; and the Ports of New York/New Jersey. Gulf Coast ports served include Mobile, Alabama and New Orleans, Louisiana.

The lines of NS' railroads reach most of the larger industrial and trading centers of the Southeast, Northeast, Mid-Atlantic region and Midwest. Chicago, Norfolk, Detroit, Atlanta, Metropolitan New York City, Jacksonville, Kansas City (Missouri), Baltimore, Buffalo, Charleston, Cleveland, Columbus, Philadelphia, Pittsburgh, Toledo, Greensboro, Charlotte and Savannah are among the leading centers originating and terminating freight traffic on the system. In addition, haulage arrangements with connecting carriers allow NS' railroads to provide single-line service to and from additional markets, including haulage provided by Florida East Coast Railway Company to serve southern and eastern Florida, including the port cities of Miami, West Palm Beach and Fort Lauderdale; and haulage provided by The Kansas City Southern Railway Company to provide transcontinental intermodal service via a connection with the Burlington Northern and Santa Fe Railway Company. Service is provided to New England, including the Port of Boston, via haulage, trackage rights and interline arrangements with Canadian Pacific Railway Company and Guilford Transportation Industries. The system's lines also reach many individual industries, electric generating facilities, mines (in western Virginia, eastern Kentucky, southern and northern West Virginia and western Pennsylvania), distribution centers, transload facilities and other businesses located in smaller communities in its service area. The traffic corridors carrying the heaviest volumes of freight include those from the New York City area to Chicago (via Allentown and Pittsburgh); Chicago to Jacksonville (via Cincinnati, Chattanooga and Atlanta); Appalachian coal fields of Virginia, West Virginia and Kentucky to Norfolk, Virginia and Sandusky, Ohio; Cleveland to Kansas City; and Knoxville to Chattanooga. Chicago, Memphis, Sidney/Salem, New Orleans, Kansas City, Buffalo, St. Louis and Meridian are major gateways for interterritorial system traffic.

Triple Crown Operations - Until April 1993, NS' intermodal subsidiary, Triple Crown Services, Inc. (TCS), offered intermodal service using RoadRailer® equipment and domestic containers. RoadRailer® units are enclosed vans that can be pulled over highways in tractor-trailer configuration and over the rails by locomotives. On April 1, 1993, the business, name and operations of TCS were transferred to Triple Crown Services Company (TCSC), a partnership in which subsidiaries of NS and Conrail are equal partners. From April 1, 1993, to June 1, 1999, the revenues of TCSC were not consolidated with the results of NS; however, effective June 1, 1999, NS gained control of TCSC and, therefore, now includes TCSC's results in its consolidated financial statements. TCSC offers door-to-door intermodal service using RoadRailer® equipment in major traffic corridors, including those between the Midwest and the Northeast, the Midwest and the Southeast and the Midwest and Texas/Mexico.

The following table sets forth certain statistics relating to NS railroads' operations for the past 5 years, including operations in the Northern Region that commenced June 1, 1999:

Rail Operating Statistics

	Year Ended Dec. 31,				
	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
Revenue ton miles (billions)	183	179	182	197	167
Freight train miles traveled (millions)	73.9	72.6	70.0	74.4	61.5
Revenue per ton mile	\$0.0353	\$0.0350	\$0.0339	\$0.0312	\$0.0315
Revenue ton miles per man-hour worked	3,111	3,067	3,023	2,888	2,577
Percentage ratio of railway operating expenses to railway operating revenues	83.5% ¹	81.5%	83.7%	89.7% ²	86.3%

¹Includes \$107 million of costs for a voluntary separation program, which added 1.6 percentage points to the ratio.

²Includes \$165 million of costs for early retirement and separation programs, which added 2.7 percentage points to the ratio.

RAILWAY OPERATING REVENUES - NS' total railway operating revenues were \$6.5 billion in 2003. Revenue, shipments and revenue yield by principal railway operating revenue sources for the past five years are set forth in the following table (prior year amounts have been reclassified to conform to the current market groupings).

Principal Sources of Railway Operating Revenues

COAL TRAFFIC - Coal, coke and iron ore -- most of which is bituminous coal -- is NS' railroads' largest commodity group as measured by revenues. The railroads handled a total of 172 million tons in 2003, most of which originated on NS' lines in West Virginia, Virginia, Pennsylvania and Kentucky. Revenues from coal, coke and iron ore accounted for about 23% of NS' total railway operating revenues in 2003.

Coal, coke and iron ore tonnage by market for the past five years are set forth in the following table.

Coal, Coke and Iron Ore Tonnage by Market

	Year Ended December 31,				
	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
	<i>(tons in thousands)</i>				
Utility	129,904	127,747	132,325	119,284	107,381
Domestic Metallurgical	20,486	21,578	20,457	25,003	21,399
Export	12,312	11,342	13,872	19,845	18,373
Other	9,624	9,733	11,377	10,781	10,348
	<u>172,326</u>	<u>170,400</u>	<u>178,031</u>	<u>174,913</u>	<u>157,501</u>

Total coal handled through all system ports in 2003 was 35 million tons. Of this total, 11 million tons (including coastwise traffic) moved through Norfolk, Virginia, 2 million tons moved through the Baltimore Terminal, 13 million tons moved to various docks on the Ohio River, and 9 million tons moved to various Lake Erie ports. Other than coal for export, virtually all coal handled by NS' railroads was terminated in states east of the Mississippi River.

See the discussion of coal traffic, by type of coal, in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

GENERAL MERCHANDISE TRAFFIC - General merchandise traffic is composed of five major commodity groupings: automotive; chemicals; metals and construction; agriculture, consumer products and government; and paper, clay and forest products. The automotive group includes finished vehicles for BMW, DaimlerChrysler, Ford Motor Company, General Motors, Honda, Isuzu, Jaguar, Land Rover, Mazda, Mercedes-Benz, Mitsubishi, Nissan, Saab, Subaru, Suzuki, Toyota and Volkswagen, and auto parts for Ford Motor Company, General Motors, Mercedes-Benz and Toyota. The chemicals group includes sulfur and related chemicals, petroleum products, chlorine and bleaching compounds, plastics, rubber, industrial chemicals, chemical wastes and municipal wastes. The metals and construction group includes steel, aluminum products, machinery, scrap metals, cement, aggregates, bricks and minerals. The agriculture, consumer products and government group includes soybeans, wheat, corn, fertilizer, animal and poultry feed, food oils, flour, beverages, canned goods, sweeteners, consumer products, ethanol and items for the military. The paper, clay and forest products group includes lumber and wood products, pulpboard and paper products, woodfibers, woodpulp, scrap paper and clay. General merchandise carloads handled in 2003 were 2.78 million, compared with 2.76 million handled in 2002, an increase of 1%.

In 2003, 134 million tons of general merchandise freight, or approximately 66% of total general merchandise tonnage handled by NS, originated online. The balance of general merchandise traffic was received from connecting carriers at interterritorial gateways. The principal interchange points for NS-received traffic included Chicago, Memphis, New Orleans, Cincinnati, Kansas City, Detroit, Hagerstown, St. Louis/East St. Louis and Louisville.

See the discussion of general merchandise rail traffic by commodity group in Part II, Item 7, "Management's Discussion and Analysis."

INTERMODAL TRAFFIC - The intermodal market consists of shipments moving in trailers, domestic and international containers, and Roadrailer® equipment. These shipments are handled on behalf of intermodal marketing companies, international steamship lines, truckers and other shippers. Intermodal units handled in 2003 were 2.47 million, compared with 2.35 million handled in 2002, an increase of 5%.

See the discussion of intermodal traffic in Part II, Item 7, "Management's Discussion and Analysis of Financial Conditions and Results of Operations."

FREIGHT RATES - In 2003, NS' railroads continued their reliance on private contracts and exempt price quotes as their predominant pricing mechanisms. Thus, a major portion of NS' railroads' freight business is not currently economically regulated by the government. In general, market forces have been substituted for government regulation and now are the primary determinant of rail service prices. However, in 2003 there were significant coal movements moving under common carrier (tariff) rates that had previously moved under rates contained in transportation contracts. Beginning Jan. 1, 2002, coal moving to Duke Energy's (Duke) Belew's Creek, Allen, Buck and Dan River generating stations moved under common carrier rates and beginning April 1, 2002, coal moving to Carolina Power and Light's (CP&L) Hyco and Mayo plants moved under common carrier rates. In 2002, Duke and CP&L filed rate reasonableness complaints at the STB alleging that NS' tariff rates for the transportation of coal were unreasonable. In the Duke proceeding the STB initially found NS' rates to be reasonable in November 2003, but subsequently issued technical corrections in February 2004 finding that in certain years some portion of the rates was unreasonable. The case is currently stayed because both parties have indicated that they intend to file petitions for reconsideration, and the STB has not yet ordered any rate relief. In the CP&L proceeding the STB found NS' rates to be unreasonable in December 2003, but upheld a significant portion of NS' tariff increase. Both of the STB's rate decisions remain subject to petitions for rehearing and appeals. Future developments in the two cases could result in additional adjustments, and could have a significant impact on results of operations in a particular quarter.

In 2003, NS' railroads were found by the STB not to be "revenue adequate" based on results for the year 2002. A railroad is "revenue adequate" under the applicable law when its return on net investment exceeds the rail industry's composite cost of capital. This determination is made pursuant to a statutory requirement and does not adversely impact NS' liquidity or capital resources.

PASSENGER OPERATIONS - Regularly scheduled passenger trains are operated by Amtrak on NS' lines between Alexandria and New Orleans, and between Greensboro and Selma, North Carolina. Commuter trains are operated on the NS line between Manassas and Alexandria in accordance with contracts with two transportation commissions of the Commonwealth of Virginia. NS also leases the Chicago to Manhattan, Illinois, line to the Commuter Rail Division of the Regional Transportation Authority of Northeast Illinois. Since June 1, 1999, Norfolk Southern Railway has operated former Conrail lines on which Amtrak conducts regularly scheduled passenger operations between Chicago, Illinois, and Detroit, Michigan, and between Chicago and Harrisburg, Pennsylvania.

Also since June 1, 1999, through its operation of PRR's routes, Norfolk Southern Railway has been providing freight service over former Conrail lines with significant ongoing Amtrak and commuter passenger operations, and is conducting freight operations over some trackage owned by Amtrak or by New Jersey Transit, the Southeastern Pennsylvania Transportation Authority, Metro-North Commuter Railroad Company and Maryland DOT. Finally, passenger operations are conducted either by Amtrak or by the commuter agencies over trackage owned by Pennsylvania Lines LLC, or by Conrail in the Shared Assets Areas.

NONCARRIER OPERATIONS - NS' noncarrier subsidiaries engage principally in the acquisition, leasing and management of coal, oil, gas and minerals; the development of commercial real estate; telecommunications; and the leasing or sale of rail property and equipment. In 2003, no such noncarrier subsidiary or industry segment grouping of noncarrier subsidiaries met the requirements for a reportable business segment set forth in Statement of Financial Accounting Standards No. 131.

RAILWAY PROPERTY

The NS railroad system extends across 22 states, the District of Columbia and portions of Canada. The railroad infrastructure makes the company very capital intensive with total property of approximately \$12 billion and investment in Conrail of approximately \$6 billion.

Capital Expenditures - Capital expenditures for road, equipment and other property for the past five years were as follows (including capitalized leases):

	Capital Expenditures				
	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
	<i>(\$ in millions)</i>				
Road	\$ 495	\$ 519	\$ 505	\$ 557	\$ 559
Equipment	218	174	233	146	349
Other property	7	2	8	28	4
Total	<u>\$ 720</u>	<u>\$ 695</u>	<u>\$ 746</u>	<u>\$ 731</u>	<u>\$ 912</u>

Capital spending and maintenance programs are and have been designed to assure the ability to provide safe, efficient and reliable transportation services. For 2004, NS has budgeted \$810 million of capital spending. See the discussion following "Cash used for investing activities," in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Equipment - As of Dec. 31, 2003, NS owned or leased the following units of equipment:

	Number of Units		Total	Capacity of Equipment
	Owned*	Leased**		
Locomotives:				(Horsepower)
Multiple purpose	2,412	777	3,189	10,951,550
Switching	104	101	205	300,700
Auxiliary units	56	18	74	--
Total locomotives	<u>2,572</u>	<u>896</u>	<u>3,468</u>	<u>11,252,250</u>
Freight cars:				(Tons)
Hopper	16,099	5,014	21,113	2,232,141
Box	16,644	4,810	21,454	1,694,590
Covered hopper	9,369	3,084	12,453	1,359,205
Gondola	26,850	11,217	38,067	4,085,456
Flat	3,111	1,435	4,546	343,587
Caboose	162	50	212	--
Other	3,250	--	3,250	162,514
Total freight cars	<u>75,485</u>	<u>25,610</u>	<u>101,095</u>	<u>9,877,493</u>
Other:				
Work equipment	4,479	1,022	5,501	
Vehicles	3,629	959	4,588	
Highway trailers and containers	877	7,345	8,222	
RoadRailer®	5,549	--	5,549	
Miscellaneous	1,422	13,380	14,802	
Total other	<u>15,956</u>	<u>22,706</u>	<u>38,662</u>	

* Includes equipment leased to outside parties and equipment subject to equipment trusts, conditional sale agreements and capitalized leases.

** Includes locomotives, freight cars and units of other equipment leased from PRR.

The following table indicates the number and year built for locomotives and freight cars owned at Dec. 31, 2003.

	Year Built								
	2003	2002	2001	2000	1999	1992- 1998	1987- 1991	1986 & Before	Total
Locomotives:									
No. of units	100	--*	160	200	147	592	238	1,135	2,572
% of fleet	4%	--%	6%	8%	6%	23%	9%	44%	100%
Freight cars:									
No. of units	--	--	--	112	515	8,193	5,530	61,135	75,485
% of fleet	--%	--%	--%	--%	1%	11%	7%	81%	100%

*Fifty of the locomotives built in 2001 were purchased in 2002.

As of Dec. 31, 2003, the average age of the locomotive fleet was 15.3 years. During 2003, 91 locomotives, the average age of which was 28.7 years, were retired. The average age of the freight car fleet at Dec. 31, 2003, was 26.6 years. During 2003, 4,855 freight cars were retired.

Since 1988, about 29,000 coal cars have been rebodied. As a result, the remaining serviceability of the freight car fleet is greater than may be inferred from the high percentage of freight cars built in earlier years.

	Annual Average Bad Order Ratio				
	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
Freight cars:					
NS Rail	7.4%	8.1%	6.9%	5.7%	3.7%
Locomotives:					
NS Rail	6.2%	6.3%	5.8%	5.5%	5.3%

Ongoing freight car and locomotive maintenance programs are intended to ensure the highest standards of safety, reliability, customer satisfaction and equipment marketability. In past years, the freight car bad order ratio reflected the storage of certain types of cars that were not in high demand. The ratio rose in 2000, 2001 and 2002 as a result of decreased maintenance activity. The decline in 2003 reflected an increase in maintenance activity as well as the retirement of unserviceable units. The locomotive bad order ratio includes units out of service for required inspections every 92 days and program work such as overhauls. The ratio rose slightly in 2000 as maintenance activities were curtailed in response to a slowing economy. The elevated ratio through 2003 reflected units out of service related to the resumption of maintenance and modification activities.

Track Maintenance - Of the approximately 38,500 total miles of track operated, NS had responsibility for maintaining about 31,000 miles of track with the remainder being operated under trackage rights. Over 75% of the main line trackage (including first, second, third and branch main tracks, all excluding trackage rights) has rail ranging from 131 to 155 pounds per yard with the standard installation currently at 141 pounds per yard. Approximately 40% of NS lines carried 20 million or more gross tons per track mile.

The following table summarizes several measurements regarding NS' track roadway additions and replacements during the past five years:

	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
Track miles of rail installed	233	235	254	390	403
Miles of track surfaced	5,105	5,270	3,836	3,687	5,087
New crossties installed (millions)	2.8	2.8	1.5	1.5	2.3

Microwave System - The NS microwave system, consisting of approximately 7,400 radio route miles, 424 core stations, 14 secondary stations and 5 passive repeater stations, provides communications between most operating locations. The microwave system is used primarily for voice communications, VHF radio control circuits, data and facsimile transmissions, traffic control operations and AEI data transmissions.

Traffic Control - Of a total of 21,500 route miles operated by NS, excluding trackage rights over foreign lines, 10,978 miles are signalized, including 8,091 miles of centralized traffic control (CTC) and 2,887

miles of automatic block signals. Of the 8,091 miles of CTC, 2,487 miles are controlled by data radio originating at 183 base station radio sites.

Computers - A computer network consisting of a centralized data center in Atlanta, Georgia, and various distributed computers throughout the company connects the yards, terminals, transportation offices, rolling stock repair points, sales offices and other key system locations. Operating and traffic data are processed and stored to provide customers with information on their shipments throughout the system. Computer systems provide current information on the location of every train and each car on line, as well as related waybill and other train and car movement data. In addition, the computer systems are utilized to assist management in the performance of a variety of functions and services including payroll, car and revenue accounting, billing, material management activities and controls, and special studies.

Other - The railroads have extensive facilities for support of operations, including freight depots, car construction shops, maintenance shops, office buildings, and signals and communications facilities.

Encumbrances - Certain railroad equipment is subject to the prior lien of equipment financing obligations amounting to approximately \$910 million as of Dec. 31, 2003, and \$864 million at Dec. 31, 2002.

Environmental Matters - Compliance with federal, state and local laws and regulations relating to the protection of the environment is a principal NS goal. To date, such compliance has not affected materially NS' capital additions, earnings, liquidity or competitive position. See the discussion of "Environmental Matters" in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and in Note 18 to the Consolidated Financial Statements.

EMPLOYEES - NS employed an average of 28,753 employees in 2003, compared with an average of 28,970 in 2002. The approximate average cost per employee during 2003 was \$58,000 in wages and \$28,000 in employee benefits.

Approximately 85% of NS' railroad employees are covered by collective bargaining agreements with 14 different labor unions. See the discussion of "Labor Agreements" in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations."

GOVERNMENT REGULATION - In addition to environmental, safety, securities and other regulations generally applicable to all businesses, NS' railroads are subject to regulation by the STB. The STB has jurisdiction over some rates, routes, conditions of service and the extension or abandonment of rail lines. The STB also has jurisdiction over the consolidation, merger or acquisition of control of and by rail common carriers. The Department of Transportation regulates certain track and mechanical equipment standards.

The relaxation of economic regulation of railroads, begun over two decades ago under the Staggers Rail Act of 1980, has continued. Significant exemptions are TOFC/COFC (i.e., "piggyback") business, rail boxcar traffic, lumber, manufactured steel, automobiles and certain bulk commodities such as sand, gravel, pulpwood and wood chips for paper manufacturing. Transportation contracts on regulated shipments effectively remove those shipments from regulation as well. About 80% of NS' freight revenues come from either exempt traffic or traffic moving under transportation contracts.

Efforts may be made in 2004 to re-subject the rail industry to unwarranted federal economic regulation. The Staggers Rail Act of 1980, which substantially reduced such regulation, encouraged and enabled rail carriers to innovate and to compete for business, thereby contributing to the economic health of the nation

and to the revitalization of the industry. Accordingly, NS will oppose efforts to reimpose unwarranted economic regulation.

COMPETITION - There is continuing strong competition among rail, water and highway carriers. Price is usually only one factor of importance as shippers and receivers choose a transport mode and specific hauling company. Inventory carrying costs, service reliability, ease of handling and the desire to avoid loss and damage during transit are also important considerations, especially for higher-valued finished goods, machinery and consumer products. Even for raw materials, semifinished goods and work-in-process, users are increasingly sensitive to transport arrangements that minimize problems at successive production stages.

NS' primary rail competitor is the CSX system; both operate throughout much of the same territory. Other railroads also operate in parts of the territory. NS also competes with motor carriers, water carriers and with shippers who have the additional option of handling their own goods in private carriage.

Certain marketing strategies among railroads and between railroads and motor carriers enable carriers to compete more effectively in specific markets.

Item 3. Legal Proceedings.

None.

Item 4. Submission of Matters to a Vote of Security Holders.

There were no matters submitted to a vote of security holders during the fourth quarter of 2003.

Executive Officers of the Registrant.

Norfolk Southern's executive officers generally are elected and designated annually by the Board of Directors at its first meeting held after the annual meeting of stockholders, and they hold office until their successors are elected. Executive officers also may be elected and designated throughout the year as the Board of Directors considers appropriate. There are no family relationships among the officers, nor any arrangement or understanding between any officer and any other person pursuant to which the officer was selected. The following table sets forth certain information, as of February 1, 2004, relating to the executive officers.

Name, Age, Present Position	Business Experience During Past Five Years
David R. Goode, 63, Chairman, President and Chief Executive Officer	Present position since September 1992.
L. I. Prillaman, 60, Vice Chairman and Chief Marketing Officer	Present position since August 1998.
Stephen C. Tobias, 59, Vice Chairman and Chief Operating Officer	Present position since August 1998.

Henry C. Wolf, 61, Vice Chairman and Chief Financial Officer	Present position since August 1998.
James A. Hixon, 50, Senior Vice President Legal and Government Affairs	Present position since December 1, 2003. Served as Senior Vice President Administration from February 2001 to December 1, 2003, Senior Vice President Employee Relations from November 1999 to February 2001, and prior thereto was Vice President Taxation.
Henry D. Light, 63, Senior Vice President Law	Present position since January 2002. Served as Vice President Law from April 2000 to January 2002, and prior thereto was General Counsel Operations.
Kathryn B. McQuade, 47, Senior Vice President Finance	Present position since December 1, 2003. Served as Senior Vice President Financial Planning from April 2000 to December 1, 2003, Vice President Financial Planning from August 1998 to April 2000, and prior thereto was Vice President Internal Audit.
Charles W. Moorman, 52, Senior Vice President Corporate Planning and Services	Present position since December 1, 2003. Served as Senior Vice President Corporate Services from February 1, 2003, to December 1, 2003; also served as President Thoroughbred Technology and Telecommunications, Inc. since October 1999, and prior thereto was Vice President Information Technology.
John P. Rathbone, 52, Senior Vice President Administration	Present position since December 1, 2003. Served as Senior Vice President and Controller from April 2000 to December 1, 2003; prior thereto was Vice President and Controller.
Donald W. Seale, 51, Senior Vice President Marketing Services	Present position since December 1, 2003. Served as Senior Vice President Merchandise Marketing from December 1999 to December 1, 2003; prior thereto was Vice President Merchandise Marketing.
Daniel D. Smith, 52, Senior Vice President Energy and Properties	Present position since December 1, 2003. Served as President NS Development; prior thereto was President Pocahontas Land Corporation.
Marta R. Stewart, 46, Vice President and Controller	Present position since December 1, 2003; prior thereto was Assistant Vice President Corporate Accounting.

PART II

Item 5. Market for Registrant's Common Stock and Related Stockholder Matters.

NORFOLK SOUTHERN CORPORATION AND SUBSIDIARIES STOCK PRICE AND DIVIDEND INFORMATION

The Common Stock of Norfolk Southern Corporation, owned by 52,091 stockholders of record as of Dec. 31, 2003, is traded on the New York Stock Exchange with the symbol NSC. The following table shows the high and low sales prices as reported by Bloomberg L.P. on its internet-based service and dividends per share, by quarter, for 2003 and 2002.

	Quarter			
2003	<u>1st</u>	<u>2nd</u>	<u>3rd</u>	<u>4th</u>
Market price				
High	\$ 20.89	\$ 22.39	\$ 20.20	\$ 24.62
Low	17.35	18.31	18.00	18.32
Dividends per share	\$ 0.07	\$ 0.07	\$ 0.08	\$ 0.08
2002				
Market price				
High	\$ 26.98	\$ 24.45	\$ 23.90	\$ 22.54
Low	18.26	19.85	17.20	18.70
Dividends per share	\$ 0.06	\$ 0.06	\$ 0.07	\$ 0.07

- ¹ 2003 operating expenses include a \$107 million charge for a voluntary separation program. Other income – net includes an \$84 million charge to recognize the impaired value of certain telecommunications assets. These charges reduced net income by \$119 million, or 30 cents per diluted share.
- ² In 1998, NS sold all the common stock of its motor carrier subsidiary, North American Van Lines, Inc. (NAVL), for \$207 million and recorded a \$90 million pretax (\$105 million, or 28 cents per diluted share, after-tax) gain. Accordingly, NAVL's results of operations, financial position and cash flows are presented as "Discontinued operations." Results in 2001 include an additional after-tax gain of \$13 million, or 3 cents per diluted share, that resulted from the expiration of certain indemnity obligations contained in the sales agreement. Results in 2003 include an additional after-tax gain of \$10 million, or 3 cents per diluted share, resulting from resolution of tax issues related to the transaction.
- ³ Net income in 2003 reflects two accounting changes, the cumulative effect of which increased net income by \$114 million, or 29 cents per diluted share: a change in accounting for the cost to remove railroad crossties, which increased net income by \$110 million, and a change in accounting related to a special-purpose entity that leases certain locomotives to NS, which increased net income by \$4 million. This entity's assets and liabilities, principally the locomotives and debt related to their purchase, are now reflected in NS' Consolidated Balance Sheet.
- ⁴ Excludes notes payable to Conrail of \$716 million in 2003, \$513 million in 2002, \$301 million in 2001, \$51 million in 2000 and \$123 million in 1999.
- ⁵ 2000 operating expenses include \$165 million in work force reduction costs for early retirement and separation programs. These costs reduced net income by \$101 million or 26 cents per diluted share.
- ⁶ On June 1, 1999, NS began operating a substantial portion of Conrail's properties. As a result, both its railroad route miles and the number of its railroad employees increased by approximately 50% on that date.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

**NORFOLK SOUTHERN CORPORATION AND SUBSIDIARIES
Management's Discussion and Analysis of
Financial Condition and Results of Operations**

The following discussion and analysis should be read in conjunction with the Consolidated Financial Statements and Notes and the Five-Year Financial Review.

SUMMARIZED RESULTS OF OPERATIONS

2003 Compared with 2002

Net income was \$535 million, or \$1.37 per diluted share, in 2003, up \$75 million, or 16%. Results in 2003 included a \$10 million, or 3 cents per share, gain from discontinued operations (see Note 17) and a \$114 million, or 29 cents per share, benefit related to the cumulative effect of changes in accounting principles (see Note 1). Income from continuing operations before accounting changes, which excludes these items, was \$411 million, or \$1.05 per diluted share, down \$49 million, or 11%, compared with 2002, reflecting higher compensation and benefits costs, which included the costs of a voluntary separation program (see Note 11), and lower nonoperating income that reflected the impairment of certain telecommunications assets (see Note 6). The costs of the voluntary separation program and the asset impairment combined to reduce income by \$119 million, or 30 cents per share.

2002 Compared with 2001

Net income was \$460 million, or \$1.18 per diluted share, in 2002, up \$85 million, or 23%. Net income in 2001 was \$375 million and included a \$13 million, or 3 cents per share, gain from discontinued operations (see Note 17); accordingly, income from continuing operations was \$362 million, or 94 cents per diluted share. Results in 2002 were \$98 million, or 27%, above 2001's income from continuing operations. The improvement was primarily the result of a \$151 million, or 15%, increase in income from railway operations.

DETAILED RESULTS OF OPERATIONS

Railway Operating Revenues

Railway operating revenues were \$6.5 billion in 2003, \$6.3 billion in 2002 and \$6.2 billion in 2001. The following table presents a three-year comparison of revenues by market group (prior year amounts have been reclassified to conform to the current market groupings).

Revenues by Market Group

	<u>2003</u>	<u>2002</u>	<u>2001</u>
		<i>(\$ in millions)</i>	
Coal	\$ 1,500	\$ 1,441	\$ 1,521
General merchandise:			
Automotive	936	961	885
Chemicals	772	755	738
Metals/construction	699	692	674
Agriculture/consumer products/ government	688	637	617
Paper/clay/forest	634	603	612
General merchandise	<u>3,729</u>	<u>3,648</u>	<u>3,526</u>
Intermodal	<u>1,239</u>	<u>1,181</u>	<u>1,123</u>
Total	<u>\$ 6,468</u>	<u>\$ 6,270</u>	<u>\$ 6,170</u>

In 2003, revenues increased 3%, reflecting a 2% rise in general merchandise revenues, a 4% improvement in coal revenues, and a 5% increase in intermodal revenues. All but automotive within the general merchandise market group posted increases over 2002. As shown in the following table, most of the revenue improvement was the result of higher traffic volumes. The favorable revenue per unit/mix variance was driven by higher average revenue per unit, offset in part by the effects of unfavorable changes in the mix of traffic, particularly a 5% increase in lower-priced intermodal traffic volume.

Revenue Variance Analysis

Increases (Decreases)

	<u>2003 vs. 2002</u>	<u>2002 vs. 2001</u>
	<i>(\$ in millions)</i>	
Volume	\$ 131	\$ 89
Revenue per unit/mix	<u>67</u>	<u>11</u>
Total	<u>\$ 198</u>	<u>\$ 100</u>

In 2002, revenues increased 2%, as a 3% rise in general merchandise revenues coupled with a 5% improvement in intermodal revenues offset a 5% decline in coal revenues. All but one of the general merchandise market groups (paper, clay and forest products) posted increases over 2001.

Beginning March 1, 2004, NS will modify its fuel surcharge program for its merchandise and coal traffic. The fuel surcharge program in effect until that time applies a 2% fuel surcharge to line haul freight charges when the WTI crude oil price, as published in the Wall Street Journal, exceeds \$28.00 per barrel for 30 consecutive business days. For each \$5.00 per barrel increase, an additional 2% fuel surcharge applies. The revised fuel surcharge will be based on the monthly average price of West Texas Intermediate (WTI) crude oil. Line haul freight charges will be adjusted by 0.4% for every dollar the average price exceeds \$23 per barrel in the second calendar month prior to the month in which the fuel surcharge is applied. The modification in the fuel surcharge program will cause the amount charged to more closely reflect fuel price fluctuations in today's volatile market.

COAL tonnage increased 1% in 2003 and revenues increased 4% versus 2002. Revenue per unit increased 4%, reflecting favorable developments in the coal rate reasonableness proceedings before the STB, as discussed below, as well as increases resulting from more longer haul business and loading

productivity improvements that led to more tons per car. Coal, coke and iron ore revenues represented 23% of total railway operating revenues in 2003, and 86% of NS' coal shipments originated on lines it operates.

In 2002, two of NS' utility customers, Duke Energy (Duke) and Carolina Power & Light (CP&L), filed rate reasonableness complaints at the STB alleging that NS' tariff rates for the transportation of coal were unreasonable. In the Duke proceeding the STB initially found NS' rates to be reasonable in November 2003, but subsequently issued technical corrections in February 2004 finding that in certain years some portion of the rates was unreasonable. The case is currently stayed because both parties have indicated that they intend to file petitions for reconsideration, and the STB has not yet ordered any rate relief. In the CP&L proceeding the STB found NS' rates to be unreasonable in December 2003, but upheld a significant portion of NS' tariff increase. Both of the STB's rate decisions remain subject to petitions for rehearing and appeals. Future developments in the two cases could result in additional adjustments and could have a significant impact on results of operations in a particular quarter. Over the long term, Management believes the STB decisions in the Duke and CP&L proceedings will help support improved pricing for coal transportation services.

In 2002, coal tonnage decreased 4% and revenues declined 5%. Revenue per unit declined slightly, reflecting unfavorable changes in the mix of traffic (more shorter-haul business) that offset the effects of rate increases and gains in tonnage per car.

Total Coal, Coke and Iron Ore Tonnage

	<u>2003</u>	<u>2002</u>	<u>2001</u>
	<i>(In millions of tons)</i>		
Utility	130	128	132
Export	12	11	14
Domestic metallurgical	20	21	21
Other	10	10	11
Total	172	170	178

Utility coal tonnage increased 2%, compared to 2002, primarily due to a 6% gain in tonnage moving to the Northeast. These gains were led by a full year's operation of two projects completed in 2002 that captured traffic from truck and barge.

In the first quarter of 2003, higher natural gas prices and colder temperatures caused coal-fired generating stations to run at near capacity in the Northeast, reducing the high stockpiles that were carried forward from 2002. However, the mild temperatures through the remainder of the year diminished seasonal demand for coal. Volumes to utilities in the South decreased 4% due to milder weather and extended power plant outages for the installation of environmental emission-control technology.

In 2002, utility coal tonnage decreased 3%, a result of lower demand that reflected the weak economy, high coal stockpile levels entering the year, mild temperatures in the first quarter, reduced stockpile targets set by utility companies and increased generation from new natural gas-fired plants. Licensing requirements for these new plants resulted in additional generation that temporarily displaced coal-fired generation.

The outlook for utility coal remains positive. Coal-fired generation continues to be the lowest-cost source for electric generation that has additional growth capacity above current levels. Management expects

utilities to use coal-fired plants to meet increased electricity demand because of coal's low generating cost and the strengthening economy. As always, demand will be influenced by the weather.

There remain a number of evolving environmental issues that have the potential to increase or ease cost pressures on the utility coal market, depending upon their outcome. These include a new national energy policy, proposed multi-emissions legislation, mercury emissions standard, new source review and the fate of the United States participation in the Kyoto Protocol. Although developments with these environmental issues could potentially increase cost pressures on coal-fired generation, the outlook remains positive for maintaining coal's position in the power generation mix for regions served by NS. Favorable developments with these issues could actually ease cost pressures on coal-fired generation, further strengthening coal's position.

Export coal tonnage increased 9% in 2003, compared to 2002. Export coal through Norfolk, primarily metallurgical coal, increased by 24% in 2003, benefiting from a decline in exports from China. Strong steel production in China increased demand for metallurgical coal and coke and shifted Chinese exports of these commodities to domestic consumption. Also, ocean freight rates are at an all time high. Spot vessel rates from Australia to Europe have more than tripled, while transatlantic rates have increased less dramatically. The combination of the resulting gap in ocean freight rates and the shorter sailing times has given the United States a competitive advantage in European markets. Last, the decline in the value of the dollar against the Euro and Australian Dollar also increased demand for United States metallurgical coal abroad. Coal exported through Baltimore, primarily steam coal, declined 41% due to strong domestic demand for utility coal, as discussed above.

In 2002, export coal tonnage declined 18% compared to 2001. Steam coal exports through Baltimore declined 4%, and export metallurgical coals through Norfolk declined 22%. During the first half of 2002, demand for U.S. coal was soft as international buyers focused their purchases toward other, lower-priced sources. Market uncertainty resulted in late contract settlements and delayed shipments. Late in 2002, demand for U.S. coking coals increased, reflecting a shift in the market as exports from China, Australia and Poland declined. As a result, shipments through Norfolk increased in the fourth quarter of 2002.

Strong domestic steam coal prices and reduced metallurgical coal production have limited export growth in the United States. The stage is set for further recovery in export volumes in 2004. Export growth will depend, however, upon the availability of coal supply from key metallurgical mines on NS. Pricing is also expected to strengthen.

Domestic metallurgical coal, coke and iron ore volumes decreased 5% in 2003, when compared to 2002, due to the temporary closing of a large mine that produced low-volatile coal, the continuing consolidation of the steel industry, and fewer blast furnaces operating than in the past.

In 2002, domestic metallurgical coal, coke and iron ore tonnage increased 5%, reflecting higher U.S. steel production, aided by the imported steel tariff program implemented in 2002. In addition, continued strong vehicle production resulted in demand for steel.

Future demand for domestic metallurgical coal, coke and iron ore is uncertain but may increase in 2004 due to the shortage that exists in the world market. Continuation of the anticipated rationalization of the steel industry is expected, resulting in fewer blast furnaces in operation; however, the furnaces that remain are expected to run near capacity. Growth may be limited by the availability of coal supply from a key metallurgical mine on NS that was idled in 2003 but is expected to reopen sometime in the second half of 2004. In addition, the end of the steel tariff in December 2003 could mean lower steel prices worldwide and may lead to further consolidations in the industry.

Other coal volumes, principally steam coal shipped to manufacturing plants, finished the year down 1%, when compared to 2002. In 2002, other coal traffic decreased 14%, a result of the weak economy.

GENERAL MERCHANDISE traffic volume (carloads) increased 1% in 2003, and revenues increased 2%, principally due to higher average revenues in most business groups and higher agriculture traffic volume. In 2002, traffic volume increased 2%, and revenues increased 3%, reflecting a 9% improvement in automotive revenues.

Automotive traffic volume and revenues decreased 3% in 2003, principally due to reduced vehicle production.

In 2002, automotive traffic volume increased 7%, and revenues increased 9%, principally due to a rise in vehicle production and new business. Revenue per unit increased 2%, reflecting some pricing improvements, extended length of haul, special ancillary services and the settlement of a disputed charge.

Automotive revenues in 2004 are expected to be somewhat higher than those of 2003, due to several factors: light vehicle production is predicted to be slightly above the 2003 level, NS has increased rail service to a major customer with a second plant opening towards the end of 2004, and the addition of several new products.

Chemicals traffic volume increased 1% and revenue increased 2% compared to 2002. Traffic volume benefited from higher shipments of industrial intermediates, petroleum and environmental products, and plastics. Also contributing to 2003 growth, approximately 2,000 annual carloads of new traffic were diverted from the waterways and highways. Revenue per unit reflected improved pricing to meet market conditions, as well as favorable changes in mix.

In 2002, chemicals traffic volume increased slightly and revenues increased 2%. Higher traffic volume for plastics and a small increase for miscellaneous chemicals offset a decline for petroleum products. Demand for plastics was supported by increases in light vehicle production and housing starts. Traffic volume also benefited from increased shipments through NS' Thoroughbred Bulk Transfer (TBT) facilities that handle chemicals and bulk commodities for customers not located on NS-served lines. Revenue per unit increased as a result of a favorable change in the mix of traffic (more higher-rated business) and market-driven rate increases.

Chemical volume is expected to improve in 2004, primarily due to expectations for a stronger economy and growth from new or expanded plastics plants. However, volume could be adversely affected by the price of energy in North America, particularly that of natural gas and crude oil. Both of these commodities account for more than 50% of the cost of most chemical products, and high North American prices are causing chemical producers increasingly to look off shore for production.

Metals and construction traffic volume decreased 1%, but revenues increased 1% in 2003 compared with 2002. The decline in volume resulted from reduced metals volume (mostly iron and steel), offset in part by higher construction traffic. Revenue per unit improved 2%, reflecting favorable pricing and traffic mix changes.

In 2002, metals and construction traffic volume increased 2%, and revenues improved 3%, reflecting improvement in the steel industry, aided by the two-year imported steel tariff program. Metals volume benefited from resumption of production at some mills that closed in 2001 and increased volume from new mills. Construction traffic declined, primarily as a result of reductions in highway projects due to state government budget pressures.

Metals and construction revenues in 2004 are expected to benefit from an improved economic environment and converting motor carrier traffic to rail, although further consolidation in the steel industry is expected. New stone terminals on NS lines in Florida, Georgia and Tennessee will generate additional aggregate business, and new access to existing cement facilities will increase traffic.

Agriculture, consumer products and government traffic volume increased 7% and revenues increased 8% compared with 2002. Commodities contributing most to these increases were corn, fertilizer, military, sweeteners and wheat. Only feed, food products and beverages showed a slight decrease. Corn shipments increased 4% in 2003 and revenue was up 8%. Due to the drought of 2002, which caused a depletion of inventories, there was a significant increase in demand for corn to Southeast feed mill customers and poultry producers in eastern Pennsylvania, Maryland, and Delaware, resulting in long haul rail movements from Midwest suppliers to these areas. Higher fertilizer traffic resulted from the re-opening of a large phosphate fertilizer plant. Shipments of military vehicles and military equipment increased 36% over 2002 levels due to the war in Iraq.

In 2002, agriculture, consumer products and government traffic volume decreased slightly compared to 2001, but revenues increased 3%. Traffic volume increases for corn, food products and beverages largely offset declines for soybeans and feed. Corn volume benefited from increased shipments from the Midwest to drought-stricken areas in the East. The increase for food products was primarily the result of new business. Soybean and feed volumes were adversely affected by lower domestic and export demand. Revenue per unit increased because of higher rates, increased length of haul and favorable changes in the mix of traffic.

Agriculture, consumer products and government revenues in 2004 are expected to remain steady, reflecting a more normalized 2003 crop, and the overall strong performance of the other commodities. Traffic levels should benefit from new southeastern feed mills that are expected to come on line by late 2004, as well as more shipments of corn, ethanol and transcontinental shipments of fresh and frozen foods.

Paper, clay and forest products traffic increased 1% and revenues increased 5% compared to 2002, principally due to improved domestic demand for paper products. Paper traffic benefited from increased domestic orders for consumer products packaging and from the advertising sector, as well as new business. Newsprint shipments continued to remain soft, largely due to a prolonged decline in demand. Woodchip volume increased significantly as NS-served paper mills experienced shortages and were forced to source wood fiber from more distant suppliers due to wet weather in the Southeast. NS clay revenue was up compared to 2002 due to a strong increase in revenue per carload and a more positive mix as NS handled more long-haul domestic traffic. Lumber business was soft in early 2003 despite strong demand due in part to wet weather and several mill closures. Lumber business was up in the fourth quarter as weather in the Southeast and commodity prices improved.

In 2002, paper, clay and forest products traffic volume declined 3%, and revenues decreased 1%, primarily due to continued weakness in the paper market, especially in the first half of the year. Traffic volume improved later in the year as the paper market strengthened. In addition, NS gained business from conversion of truck shipments to rail and from continued strength in housing starts. Revenue per unit benefited from rate increases and a decline in shorter-haul business.

In 2004, paper, clay and forest product revenues are expected to experience modest growth consistent with the general outlook for the domestic economy. NS revenue growth initiatives will focus on converting motor carrier traffic to rail and offering more transload or rail/truck bundled services to non-rail served customers.

INTERMODAL volume increased 5% and revenues increased 5% compared to 2002. Volume growth was driven by improved service performance that enabled the conversion of truck business to rail. Shipments for asset-based truckload carriers increased 14% as these trucking companies used intermodal to reduce their exposure to driver shortages and the need for larger fleets. International volume, which represents 45% of intermodal's volume, grew 9%, primarily a result of strong import trade and new business driven by enhanced service. Triple Crown Services Company (TCS) grew 1% in 2003, hampered by a fleet at full capacity. NS is expanding this fleet in 2004.

In 2002, intermodal traffic volume increased 6%, and revenues increased 5%, compared to 2001. Volume growth was principally the result of new and improved services that resulted in new business, including the conversion of truck business to rail. International traffic, which accounts for about half of intermodal volume, increased 10%, supported by growth in trade activity and new business. Domestic shipments grew 6%, primarily because of new business gained from the conversion of truck shipments. TCS volume increased 4%. Revenue per unit declined as a result of an increase in shorter-haul business and the absence of fuel surcharges that were in place in 2001, which were partially offset by some rate increases.

In 2004, intermodal revenues are expected to benefit from unfavorable forces affecting trucking companies, including changes to the highway hours of service laws, driver shortages, new truck emission standards and, accordingly, higher truck prices. These forces are expected to accelerate truck to rail conversion in addition to creating an environment conducive to rail price increases.

Railway Operating Expenses

Railway operating expenses increased 6% in 2003, while carloads increased 2%. Expenses in 2003 included \$107 million of costs related to a voluntary separation program to reduce the size of the work force, which resulted in 2% of the 6% expense increase. In 2002, railway operating expenses declined 1%, while carloads increased 1%.

The railway operating ratio, which measures the percentage of railway operating revenues consumed by railway operating expenses, was 83.5% in 2003, compared with 81.5% in 2002 and 83.7% in 2001. The voluntary separation costs added 1.6 percentage points to the 2003 ratio.

The following table shows the changes in railway operating expenses summarized by major classifications.

Operating Expense Variances

Increases (Decreases)

	<u>2003 vs. 2002</u>	<u>2002 vs. 2001</u>
	<i>(\$ in millions)</i>	
Compensation and benefits*	\$ 253	\$ 8
Materials, services and rents	(30)	13
Conrail rents and services	7	(9)
Depreciation	(2)	1
Diesel fuel	38	(70)
Casualties and other claims	10	28
Other	16	(22)
Total	\$ <u>292</u>	\$ <u>(51)</u>

* Includes \$107 million of voluntary separation costs in 2003.

Compensation and benefits represented 42% of total railway operating expenses and increased 13% in 2003. Almost half of the increase was the result of the \$107 million voluntary separation program. The remaining increase was principally due to higher wage rates (including the BLE bonus in lieu of wage increases), which added \$45 million, increased health and welfare benefits costs, which were up \$44 million, and reduced pension income down \$34 million (see Note 11). Approximately \$25 million of the increase in health and welfare benefit costs was attributable to retirees, reflecting a higher estimated medical inflation rate. NS expects these costs to be down slightly in 2004, a result of a recent plan amendment and changes in Medicare coverage (see Note 11). However, NS anticipates that this reduction will largely be offset by lower pension income. Therefore, total pension and postretirement expenses in 2004 are expected to be comparable to 2003.

In 2002, compensation and benefits increased slightly and represented 40% of total railway operating expenses. Higher wage rates, reduced pension income (see Note 11) and increased health and welfare benefits costs more than offset savings from reduced employment levels and lower payroll taxes (see the discussion of the Railroad Retirement and Survivors' Improvement Act, below).

The Railroad Retirement and Survivors' Improvement Act, which took effect on Jan. 1, 2002, provides for a phased reduction of the employers' portions of Tier II Railroad Retirement payroll taxes. The phase-in calls for a reduction from 14.2% in 2003 to 13.1% in 2004 and thereafter. In addition, the supplemental annuity tax was eliminated. These changes resulted in an estimated \$21 million reduction in payroll taxes in 2003 and are expected to result in savings of \$16 million in 2004, compared with 2003. However, these savings are expected to continue to be offset by an increase in the railroad unemployment tax rate, higher payroll taxes on increased wages and a higher wage base. The new law allows for investment of Tier II assets in a diversified portfolio through the newly established National Railroad Retirement Investment Trust. The law also provides a mechanism for automatic adjustment of future Tier II payroll taxes should the trust assets fall below a four-year reserve or exceed a six-year reserve.

Materials, services and rents includes items used for the maintenance of the railroad's lines, structures and equipment; the costs of services purchased from outside contractors, including the net costs of operating joint (or leased) facilities with other railroads; and the net cost of equipment rentals. This category of expenses decreased 2% in 2003 and increased 1% in 2002.

The 2003 decline reflected lower equipment rents costs, down \$26 million, and reduced purchased services, down \$20 million, including lower expenses for intermodal, automotive and bulk transfer services, and professional and legal fees.

The increase in 2002 was the result of higher volume-related expenses for automotive and intermodal traffic, increased material costs for locomotives, higher expenses for roadway and bridge repairs and increased derailment costs. These higher costs were largely offset by a significant reduction in equipment rents.

Equipment rents, which includes the cost to NS of using equipment (mostly freight cars) owned by other railroads or private owners, less the rent paid to NS for the use of its equipment, decreased 7% in 2003 and 14% in 2002. The decline in 2003 was principally the result of lower automotive traffic volume in addition to adjustments relating to periodic studies of equipment rents and favorable settlements of recent bills. In addition, the change in accounting related to certain leased locomotives (see Notes 1 and 6) also reduced equipment rents. The decline in 2002 was principally the result of continued improvement in cycle times, reflecting efficiency gains and, for intermodal equipment, service design and process changes implemented during the year.

Locomotive repair costs increased in 2003 and 2002, due to more maintenance activity. Locomotive and freight car maintenance costs are expected to increase further in 2004.

Conrail rents and services increased 2% in 2003 and decreased 2% in 2002. This item includes amounts due to PRR and CRC for use of their operating properties and equipment and CRC's operation of the Shared Assets Areas. Also included is NS' equity in Conrail's net earnings, plus the additional amortization related to the difference between NS' investment in Conrail and its underlying equity (see Note 2). The increase in 2003 reflects lower Conrail earnings and higher expenses in the Shared Assets Areas, whereas the decline in 2002 reflected higher Conrail earnings and lower expenses in the Shared Assets Areas (see "Conrail's Results of Operations, Financial Condition and Liquidity," below).

Depreciation expense was down slightly in 2003 and up slightly in 2002. Substantial levels of capital spending affected both years; however, expense in 2003 benefited from a change in accounting for the cost to remove crossties (see Note 1), and expenses in 2002 benefited from lower rates implemented early in the year following completion of a periodic study (see Note 1, "Properties," for NS' depreciation policy).

Diesel fuel expenses increased 11% in 2003 and decreased 17% in 2002. The increase in 2003 reflects an 11% rise in the average price per gallon and essentially flat consumption. The decline in 2002 reflected a 16% drop in the average price per gallon and slightly lower consumption. Expenses in 2003 and 2002 included benefits of \$59 million and \$10 million, respectively, from the diesel fuel hedging program (see "Market Risks and Hedging Activities," below and Note 16). NS has hedged approximately 63% of expected 2004 diesel fuel requirements as of December 31, 2003, at an average price of 78 cents per gallon. Accordingly, if diesel fuel prices are volatile during 2004 it is unlikely that NS will experience the same degree of volatility in its diesel fuel expense.

Casualties and other claims expenses (including the estimates of costs related to personal injury, property damage and environmental matters) increased 6% in 2003 and 20% in 2002. The higher expense in 2003 was due to adverse personal injury claims development and derailments earlier in the year as well as higher insurance costs. The increase in 2002 reflected adverse personal injury claims development and higher expenses for loss and damage to lading, as well as higher insurance and environmental remediation costs.

The largest component of casualties and other claims expense is personal injury costs. In 2003, cases involving occupational injuries comprised about 40% of the total employee injury cases settled and 31% of the total settlement payments made. Injuries of this type are often not caused by a specific accident or event, but rather, result from a claimed exposure over time. Many such claims are being asserted by former or retired employees, some of whom have not been actively employed in the rail industry for decades. NS continues to work actively to eliminate all employee injuries and to reduce the associated costs.

The rail industry remains uniquely susceptible to litigation involving job-related accidental injury and occupational claims because of the Federal Employers' Liability Act (FELA), which is applicable only to railroads. FELA, which covers employee claims for job-related injuries, produces results that are unpredictable and inconsistent as compared with a no-fault workers' compensation system.

NS, like many other businesses in the U.S., has experienced difficulty obtaining property and casualty insurance on reasonable terms after the September 11 terrorist attacks. NS has been successful in maintaining a substantial amount of commercial insurance for third-party personal injury, property damage and FELA claims, although both the cost of this insurance and the amount of risk that NS retains

through self-insurance have more than doubled since the attacks. The magnitude of the premium increases that NS experienced in 2002 began to subside in 2003, however.

Other expenses increased 8% in 2003 but decreased 10% in 2002. The increase in 2003 was primarily attributable to higher state franchise and sales and use taxes, the absence of a favorable bad debt settlement that benefited 2002 and higher union employee travel expenses. The decline in 2002 reflected lower expenses for property and sales and use taxes.

Other Income – Net

Other income – net was \$19 million in 2003, \$66 million in 2002 and \$99 million in 2001 (see Note 3). The decline in 2003 was primarily due to the \$84 million telecommunications assets impairment charge that offset increased gains from the sale of properties, higher corporate-owned life insurance returns and lower interest accruals related to tax liabilities. The decline in 2002 was primarily the result of higher interest accruals on federal income tax liabilities, lower gains from the sale of properties and investments, and the absence of a \$13 million gain from a nonrecurring settlement that benefited 2001. These reductions were partially offset by reduced discount from the sales of receivables (due to a lower amount of receivables sold and a lower interest rate environment, which favorably affects the amount of discount).

Income Taxes

Income tax expense in 2003 was \$175 million for an effective rate of 30%, compared with effective rates of 35% in 2002 and 2001. Excluding NS' equity in Conrail's after-tax earnings, the effective rate was 33% in 2003, and 38% in 2002 and 2001.

In 2003, the effective rate was reduced by the favorable resolution of prior years' tax audits. The effective rates in all three years benefited from favorable adjustments upon filing the prior year tax returns and favorable adjustments to state tax liabilities (see Note 4).

In May 2003, the Jobs and Growth Tax Relief Reconciliation Act of 2003 was signed into law. The law increased from 30% to 50% the additional first-year depreciation allowance for property acquired after May 5, 2003, and before January 1, 2005. The 30% additional first-year depreciation allowance was an element of earlier tax legislation. The acceleration of tax depreciation deductions allowed by these laws reduces current taxes and increases deferred tax levels by significant amounts.

Discontinued Operations

Income from discontinued operations in 2003 consisted of a \$10 million after-tax gain related to the resolution of tax issues arising from the sale of NS' motor carrier subsidiary. Income from discontinued operations in 2001 consisted of a \$13 million after-tax gain resulting from the expiration of certain indemnities contained in the sales agreement (see Note 17).

FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Cash provided by operating activities, NS' principal source of liquidity, was \$1,054 million in 2003, compared with \$803 million in 2002 and \$654 million in 2001. The increase in 2003 reflected a smaller change in the amount of accounts receivables sold; declines in receivables sold amounted to \$30 million in 2003 and \$270 million in 2002 (see Note 5). In 2002, the improvement was the result of higher income

from railway operations and favorable changes in working capital, which were offset, in part, by fewer accounts receivable sold (see Note 5).

Payments made to PRR (which are included in “Conrail Rents and Services” and, therefore, are a use of cash in “Cash provided by operating activities”) are largely cash neutral because a significant portion are borrowed back from a PRR subsidiary and, therefore, are a source of cash in “Proceeds from borrowings.” NS' net cash flow from these borrowings amounted to \$203 million in 2003, \$212 million in 2002 and \$250 million in 2001.

NS' working capital deficit was \$376 million at Dec. 31, 2003, compared with \$554 million at Dec. 31, 2002. The improvement resulted principally from an increase in cash flow from operations and a reduction in federal income taxes due within one year. Debt due in 2004 is expected to be paid using cash generated from operations (including sales of accounts receivable) and cash on hand.

NS currently has the capability to increase the amount of accounts receivable being sold under the revolving sale program to meet its more immediate working capital needs. During 2003, the amount of receivables NS could sell under this program ranged from \$358 million to \$433 million, and the amount of receivables NS sold ranged from zero to \$150 million. Moreover, NS has a \$1 billion credit facility, which expires in 2006, that it can borrow under or use to support commercial paper debt; however, reductions in its credit rating could limit NS' ability to access the commercial paper markets (see also the discussion of financing activities, below).

NS expects to generate sufficient cash flow from operations to meet its ongoing obligations. This expectation is based on a view that the economy will continue a moderate growth rate through 2004.

Contractual obligations at Dec. 31, 2003, related to NS' long-term debt (including capital leases) (see Note 8), operating leases (see Note 9), agreements with CRC (see Note 2), unconditional purchase obligations (see Note 18) and other long-term obligations (see Note 18), are as follows:

	Payments Due By Period				
<u>Total</u>	<u>2004</u>	<u>2005- 2006</u>	<u>2007- 2008</u>	<u>2009 and Subsequent</u>	
	<i>(\$ in millions)</i>				
Long-term debt and capital leases	\$ 7,160	\$ 360	\$ 811	\$ 1,338	\$ 4,651
Operating leases	837	111	164	109	453
Agreements with CRC	718	32	67	68	551
Unconditional purchase obligations	166	166	--	--	--
Other long-term obligations	30	8	16	6	--
Total	<u>\$ 8,911</u>	<u>\$ 677</u>	<u>\$ 1,058</u>	<u>\$ 1,521</u>	<u>\$ 5,655</u>

NS also has a contractual obligation related to a lease covering 140 locomotives. The lessor is a special-purpose entity formed to enter into this transaction, but it is not related to NS and its owner has a substantive residual equity capital investment at risk in the entity. The lessor owns the locomotives and issued debt to finance their purchase; however, NS has no obligation related to the debt. NS has the option to purchase the locomotives, but also can return them to the lessor. If NS does not purchase the locomotives at the end of the maximum lease term, it is liable for any shortfall in the then fair value of the locomotives and a specified residual value. NS does not expect to be required to make any payments under this provision (see Note 9). As the primary beneficiary of the business of the lessor, effective

Jan. 1, 2003, NS consolidated the assets (locomotives) and liabilities (debt) of this special-purpose entity when it implemented Financial Accounting Standards Board Interpretation No. 46 (see Note 1, "New Accounting Pronouncements").

In addition, NS has contractual obligations to PRR as disclosed in Note 2. However, NS has the ability to borrow back funds from PRR to the extent they are not needed to fund contractual obligations at Conrail. As an indirect owner of Conrail, NS may need to make capital contributions, loans or advances to Conrail to fund its contractual obligations. The following table presents 58% of Conrail's contractual obligations for long-term debt (including capital leases) and operating leases. Conrail has no unconditional purchase or other long-term obligations.

	<u>Total</u>	<u>Payments Due by Period</u>			<u>2009 and Subsequent</u>
		<u>2004</u>	<u>2005-2006</u>	<u>2007-2008</u>	
			<i>(\$ in millions)</i>		
Long-term debt and capital leases	\$ 676	\$ 43	\$ 60	\$ 60	\$ 513
Operating leases	318	34	66	61	157
Total	<u>\$ 994</u>	<u>\$ 77</u>	<u>\$ 126</u>	<u>\$ 121</u>	<u>\$ 670</u>

Off balance sheet arrangements consist of an accounts receivable sale program (see Note 5). Under the program, NS sells without recourse undivided ownership interests in a pool of accounts receivable to two unrelated buyers. NS has no ownership interest in the buyers. The buyers issued debt to fund their initial purchase, and NS used the proceeds it received from the initial purchase primarily to pay down its outstanding debt. NS has no obligation related to the buyers' debt, and there is no existing obligation to repurchase sold receivables. Upon termination of the program, the buyers would cease purchasing new receivables and would retain collections related to the previously sold receivables (see Note 5). As of Dec. 31, 2003, there were no accounts receivable sold, however, NS has the capability to increase the amounts sold, as discussed above.

Cash used for investing activities decreased 5% in 2003 and increased 12% in 2002. Property additions, which account for most of the recurring spending in this category, were up 4% in 2003 and down 8% in 2002. Property sales were higher in 2003, which resulted in the net decrease in cash used for investing activities. The following tables show capital spending (including capital leases) and track and equipment statistics for the past five years.

Capital Expenditures					
	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
			<i>(\$ in millions)</i>		
Road	\$ 495	\$ 519	\$ 505	\$ 557	\$ 559
Equipment	218	174	233	146	349
Other property	7	2	8	28	4
Total	<u>\$ 720</u>	<u>\$ 695</u>	<u>\$ 746</u>	<u>\$ 731</u>	<u>\$ 912</u>

Capital expenditures increased 4% in 2003 and decreased 7% in 2002 (which included \$6 million of capitalized leases). The increase in 2003 reflects higher locomotive purchases offset, in part, by lower spending on signal and electrical projects and computers. The decline in 2002 reflected higher spending

on track program work that was offset by fewer locomotive purchases (50 in 2002 compared with 100 in 2001) and lower spending for intermodal facilities.

NS and six other railroads (five Class I railroads and a commuter railroad) have agreed to participate in the Chicago Region Environmental and Transportation Efficiency (CREATE) project in Chicago. The project is a proposed public-private partnership between the railroads and city, state and federal governments to design and implement a comprehensive plan to keep passenger and freight trains moving on schedule through the metropolitan Chicago area, the largest rail transportation hub in the U.S. The intent is to reduce rail and highway congestion and add freight and passenger capacity. The project is estimated to cost \$1.5 billion with city, state and federal support. The railroads' financial contribution to the project is contingent upon a binding commitment that establishes the availability, on terms and conditions satisfactory to the railroads, of all required public funding and of third-party properties necessary to complete the entire project. If public funding is secured, the railroads will contribute a total of \$232 million towards the project with NS' share slated to be \$34 million over an estimated six-year period.

Track Structure Statistics (Capital and Maintenance)

	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
Track miles of rail installed	233	235	254	390	403
Miles of track surfaced	5,105	5,270	3,836	3,687	5,087
New crossties installed (millions)	2.8	2.8	1.5	1.5	2.3

Average Age of Owned Railway Equipment

	<u>2003</u>	<u>2002</u>	<u>2001</u>	<u>2000</u>	<u>1999</u>
			(years)		
Freight cars	26.6	25.9	25.4	24.6	23.8
Locomotives	15.3	16.1	15.7	16.1	15.4
Retired locomotives	28.7	28.2	22.4	24.5	22.7

The table above excludes equipment leased from PRR (see Note 2), which comprises 17% of the freight car fleet and 22% of the locomotive fleet.

Through its coal car rebody program, which was suspended in 2000, NS converted about 29,000 hopper cars into high-capacity steel gondolas or hoppers. As a result, the remaining service life of the freight-car fleet is greater than may be inferred from the increasing average age shown in the table above.

For 2004, NS has budgeted \$810 million for capital expenditures. The anticipated spending includes \$517 million for roadway projects, of which \$384 million is for track and bridge program work. Also included are projects for communications, signal and electrical systems, as well as projects for environmental and public improvements such as grade crossing separations and signal upgrades. Other roadway projects include marketing and industrial development initiatives, including increasing track capacity and access to coal receivers and vehicle production and distribution facilities, and continuing investments in intermodal infrastructure. Equipment spending of \$220 million includes the purchase of 100 locomotives and upgrades to existing units, improvements to multilevel automobile racks, and projects related to computers and information technology, including additional security and backup systems.

Cash used for financing activities was \$314 million in 2003 and \$150 million in 2002. Financing activities provided cash of \$151 million in 2001. The comparisons reflect net reductions of debt in 2003 and 2002 and a net increase in 2001. Financing activities include loan transactions with a subsidiary of PRR that resulted in net borrowings of \$203 million in 2003, \$212 million in 2002 and \$250 million in 2001 (see Note 2). Excluding these borrowings, debt was reduced \$370 million in 2003, \$303 million in 2002 and \$20 million in 2001. NS' debt-to-total capitalization ratio (excluding notes payable to the PRR subsidiary) at year end was 50.7% in 2003 and 53.1% in 2002.

In 2003, NS redeemed all publicly held shares of Norfolk Southern Railway's \$2.60 Cumulative Preferred Stock, Series A for a redemption price of \$50 per share plus accrued and unpaid dividends, for an aggregate redemption price of \$50.2066. The total use of cash was \$43 million.

NS currently has in place and available a \$1 billion, five-year credit agreement, which provides for borrowings at prevailing rates and includes financial covenants (see Note 8).

NS has outstanding \$717 million of its 7.05% notes due May 1, 2037. Each holder of a 2037 note may require NS to redeem all or part of the note at face value, plus accrued and unpaid interest, on May 1, 2004. NS will not know the amount of 2037 notes that it may be required to redeem until April 1, 2004. Should it be necessary, NS has the ability and intent to refinance such notes properly presented.

APPLICATION OF CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions may require significant judgment about matters that are inherently uncertain, and future events are likely to occur that may require management to change them. Accordingly, management regularly reviews these estimates and assumptions based on historical experience, changes in the business environment and other factors that management believes to be reasonable under the circumstances. Management discusses the development, selection and disclosures concerning critical accounting estimates with the Audit Committee of its Board of Directors.

Pensions and Other Postretirement Benefits

Accounting for pensions and other postretirement benefit plans requires management to make several estimates and assumptions (see Note 11). These include the expected rate of return from investment of the plans' assets, projected increases in medical costs and the expected retirement age of employees as well as their projected earnings and mortality. In addition, the amounts recorded are affected by changes in the interest rate environment because the associated liabilities are discounted to their present value. Management makes these estimates based on the company's historical experience and other information that it deems pertinent under the circumstances (for example, expectations of future stock market performance). Management engages an independent consulting actuarial firm to aid it in selecting appropriate assumptions and valuing its related liabilities.

NS' net pension benefit, which is included in "Compensation and benefits" on its Consolidated Income Statement, was \$25 million for the year ended Dec. 31, 2003, including \$19 million related to the voluntary separation program. In recording this amount, NS assumed a long-term investment rate of return of 9%. Investment experience of the pension fund over the past 10-, 15- and 20-year periods has

been in excess of 10%. A one percentage point change to this rate of return assumption would result in a \$17 million change to the pension credit and, as a result, an equal change in "Compensation and benefits" expense. Changes that are reasonably likely to occur in assumptions concerning retirement age, projected earnings and mortality would not be expected to have a material effect on NS' net pension benefit or net pension asset in the future. The net pension asset is recorded at its net present value using a discount rate that is based on the current interest rate environment; therefore, management has little discretion in this assumption.

NS' net cost for other postretirement benefits, which is also included in "Compensation and benefits," was \$80 million for the year ended Dec. 31, 2003, which included \$22 million related to the voluntary separation program. In recording this expense and valuing the net liability for other postretirement benefits, which is included in "Other benefits" as disclosed in Note 11, management estimated future increases in health-care costs. These assumptions, along with the effect of a one percentage point change in them, are described in Note 11. Additionally, as discussed in Note 11, recent changes to Medicare are expected to reduce NS' postretirement benefit costs.

Properties and Depreciation

Most of NS' total assets are comprised of long-lived railway properties (see Note 6) and its investment in Conrail (see Note 2). Most of Conrail's assets are long-lived railway properties. As disclosed in Note 1, NS' properties are depreciated using group depreciation. Rail is depreciated primarily on the basis of use measured by gross-ton miles. Other properties are depreciated generally using the straight-line method over the lesser of estimated service or lease lives. NS reviews the carrying amount of properties whenever events or changes in circumstances indicate that such carrying amount may not be recoverable based on future undiscounted cash flows or estimated net realizable value. Assets that are deemed impaired as a result of such review are recorded at the lesser of carrying amount or fair value. NS is amortizing the excess of the purchase price paid for its investment in Conrail over its share of Conrail's net equity using the principles of purchase accounting, based primarily on the estimated remaining useful lives of Conrail's properties.

NS' depreciation expense is based on management's assumptions concerning service lives of its properties as well as the expected net salvage that will be received upon their retirement. These assumptions are the product of periodic depreciation studies that are performed by a firm of consulting engineers. These studies analyze NS' historical patterns of asset use and retirement and take into account any expected change in operation or maintenance practices. NS' recent experience with these studies has been that while they do result in changes in the rates used to depreciate its properties, these changes have not caused a significant effect to its annual depreciation expense. The studies may also indicate that the recorded amount of accumulated depreciation is deficient (or in excess) of the amount indicated by the study. Any such deficiency (or excess) is amortized as a component of depreciation expense over the remaining service lives of the affected class of property. NS' "Depreciation expense" for the year ended Dec. 31, 2003, amounted to \$513 million. NS' weighted-average depreciation rates for 2003 are disclosed in Note 6; a one-tenth percentage point increase (or decrease) in these rates would result in a \$18 million increase (or decrease) to NS' depreciation expense.

Personal Injury, Environmental and Legal Liabilities

NS' expense for "Casualties and other claims" amounted to \$181 million for the year ended Dec. 31, 2003. Most of this expense was composed of NS' accrual related to personal injury liabilities (see discussion of FELA in the discussion captioned "Casualties and other claims" on page K27). NS engages an independent consulting actuarial firm to aid in valuing its personal injury liability and determining the amount to accrue during the year. The actuarial firm studies NS' historical patterns of reserving for

claims and subsequent settlements. The actuary also takes into account outside influences considered pertinent. The study uses the results of these analyses to estimate the ultimate amount of the liability, which includes amounts for incurred but unasserted claims. NS has recorded this actuarially determined liability. The liability is dependent upon many individual judgments made as to the specific case reserves as well as the judgments of the consulting actuary and management in the periodic studies. Accordingly, there could be significant changes in the liability, which NS would recognize when such a change became known. The most recent actuarial study was performed as of Sept. 30, 2003, and resulted in a slight decrease to NS' personal injury liability during the fourth quarter. While the liability recorded is supported by the most recent study, it is reasonably possible that the liability could be higher or lower.

NS is subject to various jurisdictions' environmental laws and regulations. It is NS' policy to record a liability where such liability or loss is probable and its amount can be estimated reasonably (see Note 18). Environmental engineers regularly participate in ongoing evaluations of all known sites and in determining any necessary adjustments to liability estimates. NS also has established an Environmental Policy Council, composed of senior managers, to oversee and interpret its environmental policy.

Operating expenses for environmental matters totaled approximately \$9 million in 2003, \$15 million in 2002 and \$12 million in 2001, and capital expenditures totaled approximately \$9 million in 2003, and \$10 million in both 2002 and 2001. Capital expenditures in 2004 are expected to be comparable to those in 2003.

NS' balance sheets included liabilities for environmental exposures in the amount of \$25 million at Dec. 31, 2003, and \$29 million at Dec. 31, 2002, (of which \$8 million was accounted for as a current liability in each year). At Dec. 31, 2003, the liability represented NS' estimate of the probable cleanup and remediation costs based on available information at 113 identified locations. On that date, 10 sites accounted for \$12 million of the liability, and no individual site was considered to be material. NS anticipates that much of this liability will be paid out over five years; however, some costs will be paid out over a longer period.

At some of the 113 locations, certain NS subsidiaries, usually in conjunction with a number of other parties, have been identified as potentially responsible parties by the Environmental Protection Agency (EPA) or similar state authorities under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, or comparable state statutes, which often impose joint and several liability for cleanup costs.

With respect to known environmental sites (whether identified by NS or by the EPA or comparable state authorities), estimates of NS' ultimate potential financial exposure for a given site or in the aggregate for all such sites are necessarily imprecise because of the widely varying costs of currently available cleanup techniques, the likely development of new cleanup technologies, the difficulty of determining in advance the nature and full extent of contamination and each potential participant's share of any estimated loss (and that participant's ability to bear it), and evolving statutory and regulatory standards governing liability. NS estimates its environmental remediation liability on a site-by-site basis, using assumptions and judgments that management deems appropriate for each site. As a result, it is not practical to quantitatively describe the effects of changes in these many assumptions and judgments. NS has consistently applied its methodology of estimating its environmental liabilities.

The risk of incurring environmental liability is inherent in the railroad business. Some of the commodities in NS' traffic mix, particularly those classified as hazardous materials, can pose special risks that NS and its subsidiaries work diligently to minimize. In addition, several NS subsidiaries own, or have owned, land used as operating property, or which is leased and operated by others, or held for sale. Because environmental problems may exist on these properties that are latent or undisclosed, there can be

no assurance that NS will not incur environmentally related liabilities or costs with respect to one or more of them, the amount and materiality of which cannot be estimated reliably at this time. Moreover, lawsuits and claims involving these and potentially other unidentified environmental sites and matters are likely to arise from time to time. The resulting liabilities could have a significant effect on financial condition, results of operations or liquidity in a particular year or quarter.

However, based on its assessment of the facts and circumstances now known, management believes that it has recorded the probable costs for dealing with those environmental matters of which the Corporation is aware. Further, management believes that it is unlikely that any known matters, either individually or in the aggregate, will have a material adverse effect on NS' financial position, results of operations or liquidity.

Norfolk Southern and certain subsidiaries are defendants in numerous lawsuits and other claims relating principally to railroad operations. When management concludes that it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated, it is accrued through a charge to expenses. While the ultimate amount of liability incurred in any of these lawsuits and claims is dependent on future developments, in management's opinion the recorded liability, if any, is adequate to cover the future payment of such liability and claims. However, the final outcome of any of these lawsuits and claims cannot be predicted with certainty, and unfavorable or unexpected outcomes could result in additional accruals that could be significant to results of operations in a particular year or quarter. Any adjustments to recorded liabilities will be reflected in expenses in the periods in which such adjustments are known.

Income Taxes

NS' net long-term deferred tax liability totaled \$3,223 million at Dec. 31, 2003 (see Note 4). This liability is estimated based on the expected future tax consequences of items recognized in the financial statements. After application of the federal statutory tax rate to book income, judgment is required with respect to the timing and deductibility of expenses in the corporate income tax returns. For state income and other taxes, judgment is also required with respect to the apportionment among the various jurisdictions. A valuation allowance is recorded if management expects that it is more likely than not that its deferred tax assets will not be realized. NS has a \$22 million valuation allowance on \$628 million of deferred tax assets as of Dec. 31, 2003, reflecting the expectation that most of these assets will be realized. For 2003, 2002 and 2001, the effective tax rates, excluding NS' equity in Conrail's earnings, were 33%, 38% and 38%, respectively. For every one half percent change in the 2003 effective tax rate, net income would have changed by \$3 million.

CONRAIL'S RESULTS OF OPERATIONS, FINANCIAL CONDITION AND LIQUIDITY

Conrail's net income was \$203 million in 2003, compared with \$180 million in 2002 and \$174 million in 2001 (see Note 2). Results in 2003 included \$40 million for the cumulative effect on years prior to 2003 of a change in accounting principles as required by Conrail's adoption of SFAS No. 143. NS excluded this amount from its determination of equity in earnings of Conrail because an amount related to Conrail is included in NS' cumulative effect adjustment for SFAS No. 143. Conrail's income before the accounting change was \$163 million, \$17 million below 2002, reflecting lower income from operations.

Conrail's operating revenues were \$918 million in 2003, \$893 million in 2002 and \$903 million in 2001. The 2003 increase was primarily attributable to higher operating fees related to PRR and NYC. The decrease in 2002 resulted from the expiration of certain equipment leases and lower operating fees, largely because of reduced operating costs in the Shared Assets Areas.

Conrail's operating expenses were \$659 million in 2003, \$623 million in 2002 and \$639 million in 2001. The increase in 2003 was primarily the result of higher expenses for compensation and benefits, and casualties and insurance. The decrease in 2002 reflected lower expenses for materials, services and rents and compensation and benefits, which were offset, in part, by higher costs for casualties and other claims.

Conrail's cash provided by operations decreased \$11 million, or 3%, in 2003, and \$79 million, or 16%, in 2002. The decrease in 2003 reflects the absence of an IRS refund received in 2002 that was partially offset by a decreased use of cash for casualty payments. The decline in 2002 was primarily the result of the absence of two items that benefited 2001: a \$50 million cash payment for transferring to a third party certain rights to license, manage and market signboard advertising on Conrail's property for 25 years and proceeds from a favorable insurance settlement. This was offset, in part, by favorable changes in working capital. Cash generated from operations is Conrail's principal source of liquidity and is primarily used for debt repayments and capital expenditures. Debt repayments totaled \$57 million in 2003 and \$59 million in 2002. Capital expenditures totaled \$35 million in 2003 and \$23 million in 2002.

Conrail had a working capital deficit of \$22 million at Dec. 31, 2003, and \$29 million at Dec. 31, 2002. Conrail is not an SEC registrant and, therefore, presently cannot issue any publicly traded securities. Conrail is expected to have sufficient cash flow to meet its ongoing obligations.

NS' equity in earnings of Conrail, net of amortization, was \$58 million in 2003, \$54 million in 2002 and \$44 million in 2001. NS' other comprehensive income (loss) for 2003, 2002 and 2001, as shown in the Consolidated Statement of Changes in Stockholders' Equity, included a \$14 million gain, a \$34 million loss and a \$41 million loss, respectively, for its portion of Conrail's other comprehensive loss (see Note 13).

OTHER MATTERS

Labor Agreements

Approximately 24,000 of NS' railroad employees are covered by collective bargaining agreements with 14 different labor unions. These agreements remain in effect until changed pursuant to the Railway Labor Act. Moratorium provisions in these agreements permitted NS and the unions to propose such changes in late 1999; negotiations at the national level commenced shortly thereafter.

Agreements have been reached with the Brotherhood of Maintenance of Way Employees (BMWE), which represents about 4,200 NS employees; the United Transportation Union (UTU), which represents about 6,700 NS employees; the International Brotherhood of Boilermakers and Blacksmiths (IBB), which represents about 100 NS employees; the Transportation Communications International Union (TCU), which represents about 4,400 NS employees; the American Train Dispatchers Department (ATDD), which represents about 400 NS employees; the Brotherhood of Railroad Signalmen (BRS), which represents about 1,100 NS employees; and the Brotherhood of Locomotive Engineers (BLE), which represents about 4,500 NS employees. The agreement with the BLE was through 2004; NS recently reached a further contract extension with BLE through 2009. A tentative agreement with the International Brotherhood of Electrical Workers (IBEW), which represents about 900 NS employees, failed ratification.

Health and welfare issues have been resolved with BMWE, TCU, BRS, BLE and UTU. Health and welfare issues with the other organizations have not yet been resolved.

Market Risks and Hedging Activities

NS uses derivative financial instruments to reduce the risk of volatility in its diesel fuel costs and to manage its overall exposure to fluctuations in interest rates.

In 2001, NS began a program to hedge a portion of its diesel fuel consumption. The intent of the program is to assist in the management of NS' aggregate risk exposure to fuel price fluctuations, which can significantly affect NS' operating margins and profitability, through the use of one or more types of derivative instruments.

Diesel fuel costs represented 7% of NS' operating expenses for 2003. The program provides that NS will not enter into any fuel hedges with a duration of more than 36 months, and that no more than 80% of NS' average monthly fuel consumption will be hedged for any month within any 36-month period.

As of Dec. 31, 2003, through swap transactions, NS has hedged approximately 63% of expected 2004 diesel fuel requirements. The effect of the hedges is to yield an average cost of 78 cents per hedged gallon, including federal taxes and transportation. A 10% decrease in diesel fuel prices would reduce NS' asset related to the swaps by approximately \$38 million as of Dec. 31, 2003.

NS manages its overall exposure to fluctuations in interest rates by issuing both fixed- and floating-rate debt instruments and by entering into interest-rate hedging transactions to achieve an appropriate mix within its debt portfolio.

At Dec. 31, 2003, NS' debt subject to interest rate fluctuations totaled \$636 million (excluding debt due to the PRR subsidiary). A 1% increase in interest rates would increase NS' total annual interest expense related to all its variable debt by approximately \$6 million. Management considers it unlikely that interest rate fluctuations applicable to these instruments will result in a material adverse effect on NS' financial position, results of operations or liquidity.

Some of NS' capital leases, which carry an average fixed rate of 7%, were effectively converted to variable rate obligations using interest rate swap agreements. On Dec. 31, 2003, the average pay rate under these agreements was 1.6%, and the average receive rate was 7%. During 2003, the effect of the swaps was to reduce interest expense by \$10 million. A portion of the lease obligations is payable in Japanese yen. NS eliminated the associated exchange rate risk at the inception of each lease with a yen deposit sufficient to fund the yen-denominated obligation. Most of these deposits are held by foreign banks, primarily Japanese. As a result, NS is exposed to financial market risk relative to Japan. Counterparties to the interest rate swaps and Japanese banks holding yen deposits are major financial institutions believed by management to be creditworthy.

New Accounting Pronouncements

As discussed in Note 1, effective Jan. 1, 2003, NS adopted Financial Accounting Standards Board (FASB) Statement No. 143, "Accounting for Asset Retirement Obligations," (SFAS No. 143) and FASB Interpretation No. 46, "Consolidation of Variable Interest Entities," (FIN No. 46).

Inflation

In preparing financial statements, accounting principles generally accepted in the United States of America require the use of historical cost that disregards the effects of inflation on the replacement cost of property. NS, a capital-intensive company, has most of its capital invested in such assets. The

replacement cost of these assets, as well as the related depreciation expense, would be substantially greater than the amounts reported on the basis of historical cost.

Trends

Federal Economic Regulation -- Efforts may be made in 2004 to reimpose unwarranted federal economic regulation on the rail industry. The Staggers Rail Act of 1980, which substantially reduced such regulation, encouraged and enabled rail carriers to innovate and to compete for business. NS and other rail carriers will oppose any efforts to reimpose unwarranted economic regulation.

Utility Deregulation -- Deregulation of the electrical utility industry is expected to increase competition among electric power generators; deregulation over time would permit wholesalers and possibly retailers of electric power to sell or purchase increasing quantities of power to or from distant parties. The effects of deregulation on NS and on its customers cannot be predicted with certainty; however, NS serves a number of efficient power producers who are expected to remain competitive in this evolving environment.

Carbon-Based Fuel -- There is growing concern in some quarters that emissions resulting from burning carbon-based fuel, including coal, are contributing to global warming and causing other environmental changes. To the extent that these concerns evolve into a consensus among policy-makers, the impact could be either a reduction in the demand for coal or imposition of more stringent regulations on emissions, which might result in making coal a less economical source of power generation or make permitting of coal-fired facilities even more difficult. The revenues and net income of NSR and other railroads that move large quantities of coal could be affected adversely.

FORWARD-LOOKING STATEMENTS

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that may be identified by the use of words like "believe," "expect," "anticipate" and "project." Forward-looking statements reflect management's good-faith evaluation of information currently available. However, such statements are dependent on and, therefore, can be influenced by, a number of external variables over which management has little or no control, including: domestic and international economic conditions; the business environment in industries that produce and consume rail freight; competition and consolidation within the transportation industry; fluctuation in prices of key materials, in particular diesel fuel; labor difficulties, including strikes and work stoppages; legislative and regulatory developments; changes in securities and capital markets; and natural events such as severe weather, floods and earthquakes. Forward-looking statements are not, and should not be relied upon as, a guaranty of future performance or results. Nor will they necessarily prove to be accurate indications of the times at or by which any such performance or results will be achieved. As a result, actual outcomes and results may differ materially from those expressed in forward-looking statements. The Company undertakes no obligation to update or revise forward-looking statements.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

The information required by this item is included in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" under the heading "Market Risks and Hedging Activities."

Item 8. Financial Statements and Supplementary Data.

Report of Management

January 27, 2004

To the Stockholders
Norfolk Southern Corporation

Management is responsible for the preparation and fair presentation of the financial statements included in this annual report. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America and reflect management's judgments and estimates concerning effects of events and transactions that are accounted for or disclosed.

Management is also responsible for establishing and maintaining effective internal control over financial reporting. The Corporation's internal control over financial reporting includes those policies and procedures that pertain to the Corporation's ability to record, process, summarize and report reliable financial data. Management recognizes that there are inherent limitations in the effectiveness of any internal control over financial reporting, including the possibility of human error and the circumvention or overriding of internal control. Accordingly, even effective internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal control over financial reporting may vary over time.

In order to ensure that the Corporation's internal control over financial reporting is effective, management regularly assesses such controls and did so most recently for its financial reporting as of December 31, 2003. This assessment was based on criteria for effective internal control over financial reporting described in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management believes the Corporation maintained effective internal control over financial reporting as of December 31, 2003.

The Board of Directors, acting through its Audit Committee, is responsible for the oversight of the Corporation's accounting policies, financial reporting and internal control. The Audit Committee of the Board of Directors is comprised entirely of outside directors who are independent of management. The Audit Committee is responsible for the appointment and compensation of the independent auditor and approves decisions regarding the appointment or removal of the Vice President-Internal Audit. It meets periodically with management, the independent auditors and the internal auditors to ensure that they are carrying out their responsibilities. The Audit Committee is also responsible for performing an oversight role by reviewing and monitoring the financial, accounting and auditing procedures of the Corporation in addition to reviewing the Corporation's financial reports. The independent auditors and the internal auditors have full and unlimited access to the Audit Committee, with or without management, to discuss the adequacy of internal control over financial reporting, and any other matters which they believe should be brought to the attention of the Audit Committee.

KPMG LLP, independent auditors of the Corporation's financial statements, has reported on management's assertion with respect to the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2003.

Independent Auditors' Report

The Stockholders and Board of Directors
Norfolk Southern Corporation:

We have audited the accompanying consolidated balance sheets of Norfolk Southern Corporation and subsidiaries as of December 31, 2003 and 2002, and the related consolidated statements of income, changes in stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2003. In connection with our audits of the consolidated financial statements, we have also audited the financial statement schedule as listed in Item 15(A)2. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Norfolk Southern Corporation and subsidiaries as of December 31, 2003 and 2002, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2003 in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, effective January 1, 2003 the Company adopted Financial Accounting Standards Board Statement No. 143, *Accounting for Asset Retirement Obligations*, and Financial Accounting Standards Board Interpretation No. 46, *Consolidation of Variable Interest Entities*.

Norfolk, Virginia
January 27, 2004

**INDEPENDENT ACCOUNTANTS' REPORT ON INTERNAL CONTROL
OVER FINANCIAL REPORTING**

The Board of Directors
Norfolk Southern Corporation:

We have examined management's assertion, included in the accompanying Report of Management, that Norfolk Southern Corporation maintained effective internal control over financial reporting as of December 31, 2003 based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Norfolk Southern Corporation's management is responsible for maintaining effective internal control over financial reporting. Our responsibility is to express an opinion on management's assertion based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included obtaining an understanding of internal control over financial reporting, testing, and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of inherent limitations in any internal control, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of internal control over financial reporting to future periods are subject to the risk that the internal control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assertion that Norfolk Southern Corporation maintained effective internal control over financial reporting as of December 31, 2003 is fairly stated, in all material respects, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

NORFOLK SOUTHERN CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

The following Notes are an integral part of the Consolidated Financial Statements.

1. Summary of Significant Accounting Policies

Description of Business

Norfolk Southern Corporation is a Virginia-based holding company engaged principally in the rail transportation business, operating approximately 21,500 route miles primarily in the East and Midwest. These consolidated financial statements include Norfolk Southern Corporation (Norfolk Southern) and its majority-owned and controlled subsidiaries (collectively, NS). Norfolk Southern's major subsidiary is Norfolk Southern Railway Company (NSR). All significant intercompany balances and transactions have been eliminated in consolidation.

The railroad transports raw materials, intermediate products and finished goods classified in the following market groups (percent of total railway operating revenues in 2003): coal (23%); intermodal (19%); automotive (14%); chemicals (12%); metals/construction (11%); agriculture/consumer products/government (11%); and paper/clay/forest products (10%). Ultimate points of origination or destination for some of the freight (particularly coal bound for export and intermodal containers) are outside the United States. Approximately 85% of NS' railroad employees are covered by collective bargaining agreements with 14 different labor unions.

Through a jointly owned entity, Norfolk Southern and CSX Corporation own the stock of Conrail Inc., which owns the major Northeast freight railroad. Norfolk Southern has a 58% economic and 50% voting interest in the jointly owned entity (see Note 2).

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management reviews its estimates, including those related to the recoverability and useful lives of assets, as well as liabilities for litigation, environmental remediation, casualty claims, income taxes, and pension and postretirement benefits. Changes in facts and circumstances may result in revised estimates.

Cash Equivalents

“Cash equivalents” are highly liquid investments purchased three months or less from maturity.

Investments

Marketable equity and debt securities are reported at amortized cost or fair value, depending upon their classification as securities “held-to-maturity,” “trading” or “available-for-sale.” Unrealized gains and losses for investments designated as “available-for-sale,” net of taxes, are recognized in “Accumulated other comprehensive loss.”

Investments where NS has the ability to exercise significant influence over but does not control the entity are accounted for using the equity method in accordance with APB Opinion No. 18, “The Equity Method of Accounting for Investments in Common Stock.”

Materials and Supplies

“Materials and supplies,” consisting mainly of fuel oil and items for maintenance of property and equipment, are stated at the lower of average cost or market. The cost of materials and supplies expected to be used in capital additions or improvements is included in “Properties.”

Properties

“Properties” are stated principally at cost and are depreciated using group depreciation. Rail is depreciated primarily on the basis of use measured by gross ton-miles. Other properties are depreciated generally using the straight-line method over the lesser of estimated service or lease lives. NS capitalizes interest on major capital projects during the period of their construction. Expenditures, including those on leased assets that extend an asset's useful life or increase its utility, are capitalized. Maintenance expense is recognized when repairs are performed. When properties other than land and nonrail assets are sold or retired in the ordinary course of business, the cost of the assets, net of sale proceeds or salvage, is charged to accumulated depreciation rather than recognized through income. Gains and losses on disposal of land and nonrail assets are included in “Other income - net” (see Note 3).

NS reviews the carrying amount of properties whenever events or changes in circumstances indicate that such carrying amount may not be recoverable based on future undiscounted cash flows or estimated net realizable value. Assets that are deemed impaired as a result of such review are recorded at the lower of carrying amount or fair value (see Note 6).

Revenue Recognition

Revenue is recognized proportionally as a shipment moves from origin to destination. Refunds are recorded as a reduction to revenues based on management's best estimate of projected liability.

Derivatives

NS does not engage in the trading of derivatives. NS uses derivative financial instruments to reduce the risk of volatility in its diesel fuel costs and in the management of its mix of fixed and floating-rate debt. Management has determined that these derivative instruments qualify as either fair-value or cash-flow hedges, having values that highly correlate with the underlying hedged exposures and have designated such instruments as hedging transactions. Income and expense related to the derivative financial instruments are recorded in the same category as generated by the underlying asset or liability. Credit risk related to the derivative financial instruments is considered to be minimal and is managed by requiring high credit standards for counterparties and periodic settlements.

Stock-Based Compensation

NS has stock-based employee compensation plans, which are more fully described in Note 12. NS applies the intrinsic value recognition and measurement principles of APB Opinion No. 25, “Accounting for Stock Issued to Employees” (APB Opinion No. 25), and related interpretations in accounting for these plans.

The following table illustrates the effect on net income and earnings per share if NS had applied the fair value recognition provisions of Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" (SFAS No. 123), to stock-based employee compensation:

	<u>2003</u>	<u>2002</u>	<u>2001</u>
	<i>(\$ in millions except per share)</i>		
Net income, as reported	\$ 535	\$ 460	\$ 375
Add: Stock-based employee compensation expense included in reported net income, net of related tax effects	18	14	12
Deduct: Stock-based employee compensation expense determined under fair value method, net of related tax effects	(35)	(45)	(29)
Pro forma net income	<u>\$ 518</u>	<u>\$ 429</u>	<u>\$ 358</u>
Earnings per share:			
As reported – basic and diluted	\$ 1.37	\$ 1.18	\$ 0.97
Pro forma – basic and diluted	\$ 1.33	\$ 1.10	\$ 0.93

Required Accounting Changes

NS adopted Financial Accounting Standards Board (FASB) Statement No. 143, "Accounting for Asset Retirement Obligations," (SFAS No. 143) effective Jan. 1, 2003, and recorded a \$110 million net adjustment (\$182 million before taxes) for the cumulative effect of this change in accounting on years prior to 2003. Pursuant to SFAS No. 143, the cost to remove crossties must be recorded as an expense when incurred; previously these removal costs were accrued as a component of depreciation. This change in accounting lowered depreciation expense by about \$26 million for 2003 (because the depreciation rate for crossties no longer reflects cost to remove) and increased compensation and benefits and other expenses by about \$21 million for the year (for the costs to remove retired assets).

NS also adopted FASB Interpretation No. 46, "Consolidation of Variable Interest Entities," (FIN No. 46) effective Jan. 1, 2003, and recorded a \$4 million net adjustment (\$6 million before taxes) for the cumulative effect of this change in accounting on years prior to 2003. Pursuant to FIN No. 46, NS has consolidated a special-purpose entity that leases certain locomotives to NS (see Note 9). This entity's assets and liabilities at Jan. 1, 2003, included \$169 million of locomotives and \$157 million of debt related to their purchase as well as a \$6 million minority interest liability. This change in accounting increased depreciation and interest expense (to reflect the locomotives as owned assets) and lowered lease expense. The net effect to total railway operating expenses and net income was not material.

Reclassifications

Certain amounts in the consolidated financial statements and notes thereto have been reclassified to conform to the 2003 presentation.

2. Investment in Conrail and Operations Over Its Lines

Overview

Through a limited liability company, Norfolk Southern and CSX Corporation (CSX) jointly own Conrail Inc. (Conrail), whose primary subsidiary is Consolidated Rail Corporation (CRC), the major freight

railroad in the Northeast. NS has a 58% economic and 50% voting interest in the jointly owned entity, and CSX has the remainder of the economic and voting interests. From time to time, Norfolk Southern and CSX, as the indirect owners of Conrail, may have to make capital contributions, loans or advances to Conrail under the terms of the Transaction Agreement among NS, CSX and Conrail.

Norfolk Southern's railroad subsidiary, NSR, operates as a part of its rail system the routes and assets of Pennsylvania Lines LLC (PRR), a wholly owned subsidiary of CRC, pursuant to operating and lease agreements. CSX Transportation, Inc. (CSXT) operates the routes and assets of another CRC subsidiary under comparable terms.

Operation of Conrail's Lines

The June 1999 Operating Agreement between NSR and PRR governs substantially all track assets operated by NSR and has an initial 25-year term, renewable at the option of NSR for two five-year terms. Payments under the Operating Agreement are subject to adjustment every six years to reflect changes in values. NSR also has leased or subleased equipment for varying terms from PRR. Costs necessary to operate and maintain the PRR assets, including leasehold improvements, are borne by NSR. NSR receives all freight revenues on the PRR lines.

NSR and CSXT also have entered into agreements with CRC governing other properties that continue to be owned and operated by CRC (the Shared Assets Areas). NSR and CSXT pay CRC a fee for joint and exclusive access to the Shared Assets Areas. In addition, NSR and CSXT pay, based on usage, the costs incurred by CRC to operate the Shared Assets Areas.

Future minimum lease payments due to PRR under the Operating Agreement and lease agreements and to CRC under the Shared Assets Areas (SAA) agreements are as follows:

	PRR Oper. <u>Agmt.</u>	PRR Lease <u>Agmt.</u>	SAA <u>Agmts.</u>
	<i>(\$ in millions)</i>		
2004	\$ 238	\$ 104	\$ 32
2005	246	75	33
2006	246	61	34
2007	246	49	34
2008	246	44	34
2009 and subsequent years	4,039	89	551
Total	<u>\$ 5,261</u>	<u>\$ 422</u>	<u>\$ 718</u>

Operating lease expense related to the agreements, which is included in "Conrail rents and services," amounted to \$478 million in 2003, \$468 million in 2002 and \$467 million in 2001.

Conrail Corporate Reorganization

NS, CSX and Conrail are jointly seeking to reorganize Conrail and establish direct ownership and control by NSR and CSXT of PRR and NYC, respectively. The proposed reorganization would replace the operating agreements described above and allow NSR and CSXT to directly own and operate PRR and NYC, respectively. The reorganization would not involve the Shared Assets Areas, and would have no effect on the competitive rail service provided in the Shared Assets Areas. Conrail would continue to own, manage and operate the Shared Assets Areas as previously approved by the Surface Transportation Board (STB).

Consummation of the reorganization requires a ruling from the Internal Revenue Service (IRS), the approval of the STB and filings with the Securities and Exchange Commission. In addition, NS, CSX and Conrail must obtain the consent of Conrail's debt holders to carry out the transaction and will obtain a valuation of PRR and of NYC.

In 2003, the IRS issued a ruling that the reorganization would qualify as a tax-free distribution. Also in 2003, the STB granted its authorization to carry out the reorganization, subject to a condition requiring NS, CSX and Conrail to either: (i) obtain the voluntary consent of the Conrail debt holders; or (ii) propose further proceedings to determine whether the terms offered to the Conrail debt holders are fair, just and reasonable. In 2004, NS, CSX and Conrail intend to file registration statements on Form S-4 with the Securities and Exchange Commission to allow a proposed exchange offer relating to Conrail's unsecured debt (see below). In order to implement the reorganization approved by the IRS, the companies have engaged an investment banking firm to provide a valuation. The results of the valuation could impact NS' carrying amount of its investment in Conrail and the recording of the corporate reorganization.

As a part of the proposed reorganization, Conrail would undertake a restructuring of its existing unsecured and secured public indebtedness. There are currently two series of unsecured public debentures with an outstanding principal amount of \$800 million and 13 series of secured debt with an outstanding principal amount of approximately \$321 million. It is currently contemplated that guaranteed debt securities of two newly formed corporate subsidiaries of NSR and CSXT would be offered in a 58%/42% ratio in exchange for Conrail's unsecured debentures. Upon completion of the proposed transaction, the new debt securities would become direct unsecured obligations of NSR and CSXT, respectively, and would rank equally with all existing and future senior unsecured debt obligations, if any, of NSR and CSXT. These new debt securities will have maturity dates, interest rates and principal and interest payment dates identical to those of the respective series of Conrail's unsecured debentures. In addition, these new debt securities will have covenants substantially similar to those of the publicly traded debt securities of NS and CSX, respectively.

Conrail's secured debt and lease obligations will remain obligations of Conrail and are expected to be supported by new leases and subleases which, upon completion of the proposed transaction, would be the direct lease and sublease obligations of NSR or CSXT.

NS, CSX and Conrail are diligently working to complete all steps necessary to consummate the Conrail corporate reorganization in 2004. Upon consummation of the proposed transaction, NS' investment in Conrail will no longer include amounts related to PRR and NYC. Instead, the assets and liabilities of PRR will be reflected in their respective line items in NS' Consolidated Balance Sheet, and any amounts due to PRR would be extinguished.

Investment in Conrail

NS is applying the equity method of accounting to its investment in Conrail in accordance with APB Opinion No. 18, "The Equity Method of Accounting for Investments in Common Stock." NS is amortizing the excess of the purchase price over Conrail's net equity using the principles of purchase accounting, based primarily on the estimated remaining useful lives of Conrail's depreciable property and equipment, including the related deferred tax effect of the differences in tax and accounting bases for certain assets. At Dec. 31, 2003, the difference between NS' investment in Conrail and its share of Conrail's underlying net equity was \$3.7 billion.

NS' consolidated balance sheet at Dec. 31, 2003, includes \$35 million of liabilities related to the Conrail transaction, principally for contractual obligations to Conrail employees imposed by the Surface Transportation Board when it approved the transaction. Through Dec. 31, 2003, NS had paid \$168 million of such costs.

Related-Party Transactions

NS provides certain general and administrative support functions to Conrail, the fees for which are billed in accordance with several service-provider arrangements and totaled \$7 million in 2003 and 2002 and \$6 million in 2001.

“Conrail rents and services” includes: (1) expenses for amounts due to PRR and CRC for use by NSR of operating properties and equipment and operation of the Shared Assets Areas and (2) NS' equity in the earnings of Conrail, net of amortization.

A significant portion of payments made to PRR is borrowed back from a subsidiary of PRR. Previously, these loans were made under a demand note; however, in the first quarter of 2002, the subsidiary of PRR exchanged this demand note for a new note due in 2032. As a result, borrowings owed to the subsidiary of PRR now comprise the noncurrent balance “Due to Conrail.” The interest rate for these loans is variable and was 1.7% at Dec. 31, 2003. Upon consummation of the proposed reorganization, these loans would be extinguished. The current balance “Due to Conrail” at Dec. 31, 2003, is composed of amounts related to expenses included in “Conrail rents and services,” as discussed above.

Summary Financial Information - Conrail

The following historical cost basis financial information should be read in conjunction with Conrail's audited financial statements, included as Exhibit 99 to this Annual Report on Form 10-K.

Summarized Consolidated Statements of Income - Conrail

	Years Ended Dec. 31,		
	<u>2003</u>	<u>2002</u>	<u>2001</u>
	<i>(\$ in millions)</i>		
Operating revenues	\$ 918	\$ 893	\$ 903
Operating expenses	<u>659</u>	<u>623</u>	<u>639</u>
Operating income	259	270	264
Other – net	<u>(3)</u>	<u>(10)</u>	<u>(6)</u>
Income before income taxes	256	260	258
Provision for income taxes	<u>93</u>	<u>80</u>	<u>84</u>
Income before accounting change	163	180	174
Cumulative effect of change in accounting principle, net of taxes	<u>40</u>	--	--
Net income	<u>\$ 203</u>	<u>\$ 180</u>	<u>\$ 174</u>

Note: Conrail adopted SFAS No. 143, effective Jan. 1, 2003, and recorded a \$40 million net adjustment for the cumulative effect of this change in accounting on years prior to 2003. NS excluded this amount from its determination of equity earnings of Conrail because an amount related to Conrail is included in NS' cumulative effect adjustment for SFAS No. 143.

Summarized Consolidated Balance Sheets - Conrail

	As of Dec. 31,	
	<u>2003</u>	<u>2002</u>
	<i>(\$ in millions)</i>	
Assets:		
Current assets	\$ 257	\$ 300
Noncurrent assets	7,959	7,857
Total assets	<u>\$ 8,216</u>	<u>\$ 8,157</u>
Liabilities and stockholders' equity:		
Current maturities of long-term debt	\$ 58	\$ 57
Other current liabilities	221	272
Long-term debt	1,067	1,123
Other noncurrent liabilities	2,416	2,479
Stockholders' equity	4,454	4,226
Total liabilities and stockholders equity	<u>\$ 8,216</u>	<u>\$ 8,157</u>

Note: Current assets include amounts due from NS and CSX totaling \$136 million at Dec. 31, 2003, and \$158 million at Dec. 31, 2002. Noncurrent assets include amounts due from NS and CSX totaling \$1,231 million at Dec. 31, 2003, and \$892 million at Dec. 31, 2002. Current liabilities include amounts payable to NS and CSX totaling \$5 million at Dec. 31, 2003, and \$9 million at Dec. 31, 2002.

3. Other Income - Net

	<u>2003</u>	<u>2002</u>	<u>2001</u>
	<i>(\$ in millions)</i>		
Income from natural resources:			
Royalties from coal	\$ 39	\$ 48	\$ 52
Nonoperating depletion and depreciation	<u>(15)</u>	<u>(14)</u>	<u>(13)</u>
Subtotal	24	34	39
Gains from sale of properties and investments	45	47	59
Rental income	38	36	40
Corporate-owned life insurance – net	21	(1)	6
Interest income	10	12	15
Discount on sales of accounts receivable (Note 5)	--	(4)	(17)
Impairment of telecommunications assets (Note 6)	(84)	--	--
Taxes on nonoperating property	(8)	(7)	(11)
Other interest expense	(4)	(31)	1
Charitable contributions	(4)	--	(4)
Equity in earnings (losses) of partnerships	--	(1)	(8)
Other	<u>(19)</u>	<u>(19)</u>	<u>(21)</u>
Total	<u>\$ 19</u>	<u>\$ 66</u>	<u>\$ 99</u>

“Other income - net” includes the income generated by the activities of NS' noncarrier subsidiaries as well as the costs incurred by those subsidiaries in their operations.

“Other current assets” in the Consolidated Balance Sheets includes prepaid interest of \$50 million at Dec. 31, 2003, and \$46 million at Dec. 31, 2002, arising from corporate-owned life insurance borrowings.

4. Income Taxes

Provision for Income Taxes

	<u>2003</u>	<u>2002</u>	<u>2001</u>
	<i>(\$ in millions)</i>		
Current:			
Federal	\$ 32	\$ 61	\$ 125
State	<u>11</u>	<u>7</u>	<u>22</u>
Total current taxes	43	68	147
Deferred:			
Federal	97	145	35
State	<u>35</u>	<u>33</u>	<u>9</u>
Total deferred taxes	<u>132</u>	<u>178</u>	<u>44</u>
Provision for income taxes	<u>\$ 175</u>	<u>\$ 246</u>	<u>\$ 191</u>

Reconciliation of Statutory Rate to Effective Rate

Total income taxes as reflected in the Consolidated Statements of Income differ from the amounts computed by applying the statutory federal corporate tax rate as follows:

	<u>2003</u>		<u>2002</u>		<u>2001</u>	
	<u>Amount</u>	<u>%</u>	<u>Amount</u>	<u>%</u>	<u>Amount</u>	<u>%</u>
	<i>(\$ in millions)</i>					
Federal income tax at statutory rate	\$ 205	35	\$ 247	35	\$ 194	35
State income taxes, net of federal tax benefit	30	5	26	4	20	4
Equity in earnings of Conrail	(20)	(3)	(19)	(3)	(16)	(3)
Corporate-owned life insurance	(8)	(1)	(1)	--	(3)	--
Other – net	<u>(32)</u>	<u>(6)</u>	<u>(7)</u>	<u>(1)</u>	<u>(4)</u>	<u>(1)</u>
Provision for income taxes	<u>\$ 175</u>	<u>30</u>	<u>\$ 246</u>	<u>35</u>	<u>\$ 191</u>	<u>35</u>

Deferred Tax Assets and Liabilities

Certain items are reported in different periods for financial reporting and income tax purposes. Deferred tax assets and liabilities are recorded in recognition of these differences.

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are as follows:

	December 31,	
	<u>2003</u>	<u>2002</u>
	<i>(\$ in millions)</i>	
Deferred tax assets:		
Reserves, including casualty and other claims	\$ 194	\$ 178
Employee benefits	--	26
Retiree health and death benefit obligations	157	138
Taxes, including state and property	240	234
Other	37	16
Total gross deferred tax assets	<u>628</u>	<u>592</u>
Less valuation allowance	<u>(22)</u>	<u>(24)</u>
Net deferred tax asset	<u>606</u>	<u>568</u>
Deferred tax liabilities:		
Property	(3,466)	(3,300)
Employee benefits	(8)	--
Other	<u>(166)</u>	<u>(91)</u>
Total gross deferred tax liabilities	<u>(3,640)</u>	<u>(3,391)</u>
Net deferred tax liability	(3,034)	(2,823)
Net current deferred tax asset	<u>189</u>	<u>187</u>
Net long-term deferred tax liability	<u>\$ (3,223)</u>	<u>\$ (3,010)</u>

Except for amounts for which a valuation allowance has been provided, management believes that it is more likely than not that future taxable income will support the realization of the other deferred tax assets. The total valuation allowance decreased \$2 million in 2003 and increased \$6 million in both 2002 and 2001.

Internal Revenue Service (IRS) Reviews

Consolidated federal income tax returns have been examined and Revenue Agent Reports have been received for all years up to and including 1999. The favorable resolution of prior years' audits is reflected in the "Other - net" line of the reconciliation of statutory rate to the effective rate, as shown above, and for 2003 comprised most of that line item. The consolidated federal income tax returns for 2000 and 2001 are being audited by the IRS. In addition, the 1998 through 2001 federal income tax returns of a tax credit investment affiliate in which NS owns a minority interest are being audited by the IRS.

Management believes that adequate provision has been made for any additional taxes and interest thereon that might arise as a result of IRS examinations.

5. Accounts Receivable

Since May 2000, NS has sold, through a bankruptcy-remote special purpose subsidiary, undivided ownership interests in a pool of accounts receivable. The buyers have a priority collection interest in the entire pool of receivables and, as a result, NS has retained credit risk to the extent the pool of receivables exceeds the amount sold. NS services and collects the receivables on behalf of the buyers; however, no servicing asset or liability has been recognized because the benefits of servicing are estimated to be just

adequate to compensate NS for its responsibilities. Payments collected from sold receivables can be reinvested in new accounts receivable on behalf of the buyers. Should NS' credit rating drop below investment grade, the buyers have the right to discontinue this reinvestment.

No accounts receivable have been sold under this arrangement since the third quarter of 2003. At Dec. 31, 2002, \$30 million of accounts receivable were sold, and therefore not included in "Accounts receivable, net" on the Consolidated Balance Sheets. NS' retained interest, which is included in "Accounts receivable, net," is recorded at fair value using estimates of dilution based on NS' historical experience. These estimates are adjusted regularly based on NS' actual experience with the pool, including defaults and credit deterioration. NS has historically experienced very low levels of default. The fees associated with sales, which are based on the buyers' financing costs, are included in "Other income – net" (see Note 3).

NS' allowance for doubtful accounts was \$7 million at Dec. 31, 2003, and \$5 million at Dec. 31, 2002.

6. Properties

	December 31,		Depreciation
	2003	2002	Rate for 2003
	<i>(\$ in millions)</i>		
Railway property:			
Road	\$ 11,243	\$ 10,859	2.7%
Equipment	5,779	5,573	4.2%
Other property	569	655	3.0%
	<u>17,591</u>	<u>17,087</u>	
Less accumulated depreciation	<u>(5,812)</u>	<u>(5,717)</u>	
Net properties	<u>\$ 11,779</u>	<u>\$ 11,370</u>	

Railway property includes \$477 million at Dec. 31, 2003 and \$480 million at Dec. 31, 2002, of assets recorded pursuant to capital leases. Other property includes the costs of obtaining rights to natural resources of \$341 million at Dec. 31, 2003 and 2002.

Impairment of Telecommunications Assets

In 2003, NS recorded an \$84 million non-cash reduction in the carrying value of certain telecommunications assets to recognize their impaired value in accordance with the provisions of SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." NS' subsidiary, Thoroughbred Technology and Telecommunications (T-Cubed), developed fiber optic infrastructure with companies in the telecommunications industry. This industry has been in a severe downturn and, accordingly, T-Cubed monitored the carrying amount of these assets through independent fair market value appraisals. As a result of a deterioration in the long-term prospects for these assets, an updated appraisal obtained in the fourth quarter indicated a significant decline in their value.

Capitalized Interest

Total interest cost incurred on debt in 2003, 2002 and 2001 was \$509 million, \$529 million and \$570 million, respectively, of which \$12 million, \$11 million and \$17 million was capitalized.

7. Current Liabilities

	December 31,	
	<u>2003</u>	<u>2002</u>
	<i>(\$ in millions)</i>	
Accounts payable:		
Accounts and wages payable	\$ 491	\$ 446
Casualty and other claims	218	207
Vacation liability	113	117
Equipment rents payable – net	103	116
Other	23	22
Total	<u>\$ 948</u>	<u>\$ 908</u>
Other current liabilities:		
Interest payable	\$ 104	\$ 118
Retiree health and death benefit obligations (Note 11)	38	31
Liabilities for forwarded traffic	37	34
Accrued Conrail-related costs (Note 2)	21	34
Other	13	15
Total	<u>\$ 213</u>	<u>\$ 232</u>

8. Long-term Debt

	December 31,	
	<u>2003</u>	<u>2002</u>
	<i>(\$ in millions)</i>	
Notes at average rates and maturities as follows:		
7.17%, maturing 2004 to 2008	\$ 1,790	\$ 1,840
7.09%, maturing 2009 to 2011	1,000	1,200
8.10%, maturing 2017 to 2021	800	800
7.54%, maturing 2027 to 2031	1,500	1,500
7.05%, maturing 2037	717	717
7.90%, maturing 2097	350	350
Equipment obligations at an average rate of 3.8%, maturing to 2014	636	558
Capitalized leases at an average rate of 1.7%, maturing to 2023	274	306
Other debt at an average rate of 6.2%, maturing to 2019	118	122
Discounts and premiums, net	<u>(25)</u>	<u>(29)</u>
Total long-term debt	7,160	7,364
Less current maturities	<u>(360)</u>	<u>(358)</u>
Long-term debt excluding current maturities	<u>\$ 6,800</u>	<u>\$ 7,006</u>
Long-term debt maturities subsequent to 2004 are as follows:		
2005	\$ 509	
2006	302	
2007	866	
2008	472	
2009 and subsequent years	<u>4,651</u>	
Total	<u>\$ 6,800</u>	

Each holder of a 2037 note may require NS to redeem all or part of the note at face value, plus accrued and unpaid interest, on May 1, 2004. Should it be necessary, NS has the ability and intent to refinance such notes properly presented.

The railroad equipment obligations and the capitalized leases are secured by liens on the underlying equipment.

Certain lease obligations require the maintenance of yen-denominated deposits, which are pledged to the lessor to satisfy yen-denominated lease payments. These deposits are included in "Other assets" on the balance sheet and totaled \$96 million at Dec. 31, 2003, and \$86 million at Dec. 31, 2002.

Shelf Registration

NS filed on Form S-3 a shelf registration statement with the Securities and Exchange Commission covering the issuance of up to \$1 billion of securities. As of Dec. 31, 2003, NS had issued a total of \$550 million of notes under this shelf registration.

Commercial Paper and Credit Agreement

NS has the ability to issue commercial paper backed by a \$1 billion credit agreement that expires in 2006. At Dec. 31, 2003, and Dec. 31, 2002, NS had no commercial paper outstanding. Any borrowings under the credit agreement are contingent on the continuing effectiveness of the representations and warranties made at the inception of the agreement.

Debt Covenants

NS is subject to various financial covenants with respect to its debt and under its credit agreement, including a minimum net worth requirement, a maximum leverage ratio restriction and certain restrictions on issuance of further debt. At Dec. 31, 2003, NS was in compliance with all debt covenants.

9. Lease Commitments

NS is committed under long-term lease agreements, which expire on various dates through 2067, for equipment, lines of road and other property. The following amounts do not include payments to PRR under the Operating Agreement and lease agreements or to CRC under the SAA agreements (see Note 2). Future minimum lease payments and operating lease expense, other than to PRR and CRC, are as follows:

	Operating Leases	Capital Leases
	<i>(\$ in millions)</i>	
2004	\$ 111	\$ 47
2005	94	48
2006	70	43
2007	61	41
2008	48	14
2009 and subsequent years	453	113
Total	<u>\$ 837</u>	<u>\$ 306</u>
Less imputed interest on capital leases at an average rate of 7.0%		(32)
Present value of minimum lease payments included in debt		<u>\$ 274</u>

Operating Lease Expense

	<u>2003</u>	<u>2002</u> <i>(\$ in millions)</i>	<u>2001</u>
Minimum rents	\$ 130	\$ 140	\$ 149
Contingent rents	63	60	55
Total	<u>\$ 193</u>	<u>\$ 200</u>	<u>\$ 204</u>

During 2000, NS entered into an operating lease for 140 locomotives, which is renewable annually at NS' option, has a maximum term of eight years and includes purchase options. The lessor is a special-purpose entity whose activities are limited to those incident to this particular transaction. As discussed in Note 1 under the heading "Required Accounting Changes," NS has consolidated this entity for reporting purposes as of Jan. 1, 2003. For the periods prior to consolidation, the table above includes operating lease expense related to this lease of \$13 million in 2002 and \$18 million in 2001. If NS does not renew the lease during the eight-year period or does not purchase the locomotives at the end of the maximum lease term, it is liable for any shortfall in the then fair value of the locomotives and a specified residual value. NS does not expect to be required to make any payments under this provision. As of Dec. 31, 2003, the maximum liability under this provision, assuming NS chose not to renew the lease in 2004 and the then fair value of the locomotives was zero, would be \$106 million.

10. Other Liabilities

	<u>December 31,</u>	
	<u>2003</u>	<u>2002</u>
	<i>(\$ in millions)</i>	
Retiree health and death benefit obligations (Note 11)	\$ 321	\$ 286
Casualty and other claims	270	254
Deferred compensation	143	144
Net pension obligations (Note 11)	89	82
Accrued Conrail-related costs (Note 2)	14	26
Other	234	237
Total	<u>\$ 1,071</u>	<u>\$ 1,029</u>

11. Pensions and Other Postretirement Benefits

Norfolk Southern and certain subsidiaries have both funded and unfunded defined benefit pension plans covering principally salaried employees. Norfolk Southern and certain subsidiaries also provide specified health care and death benefits to eligible retired employees and their dependents. Under the present plans, which may be amended or terminated at NS' option, a defined percentage of health care expenses is covered, reduced by any deductibles, copayments, Medicare payments and, in some cases, coverage provided under other group insurance policies.

Pension Plan Asset Management

Eleven investment firms manage the Company's defined benefit pension plan's assets under investment guidelines approved by the Board of Directors. Investments are restricted to domestic fixed income securities, a limited amount of international fixed income securities, domestic and international equity

investments and unleveraged exchange-traded options and financial futures. Limitations restrict investment concentration and use of certain derivative instruments. Fixed income investments must have an average rating of “AA” or better and all fixed income securities must be rated “A” or better except bond index funds. Equity investments must be in liquid securities listed on national exchanges. No investment is permitted in the securities of Norfolk Southern Corporation or its subsidiaries (except through commingled pension trust funds). Investment managers’ returns are expected to exceed selected market indices by prescribed margins.

The target asset allocation range for equity is between 65% and 75% of the fund’s assets, with approximately 10% of the fund’s assets allocated to international equity investments. The asset allocation on Dec. 31, 2003, was 25% in fixed income investments and 75% in equity investments, including 9% in international equities. This compared to 33%, 67% and 9%, respectively, on Dec. 31, 2002.

The plan’s assumed future returns are based principally on the asset allocation and on the historic returns for the plan’s asset classes determined from both actual plan returns and, over longer time periods, market returns for those asset classes. As of Dec. 31, 2003, the plan had assets of \$1.72 billion and a current pension obligation of \$1.49 billion.

Voluntary Separation Program

Compensation and benefits expense in 2003 includes \$107 million of costs related to a voluntary separation program undertaken in the fourth quarter. Through the program, 553 nonagreement employees were separated from service, of which 314 retired under Norfolk Southern’s retirement plan. The costs include \$66 million for separation payments and other benefits of the program and \$41 million of costs related to the pension and other benefit plans.

Medicare Changes

The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (the Act) was signed into law in December 2003. The Act introduces a new prescription drug benefit under Medicare (Medicare Part D) as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. Norfolk Southern believes that its medical plan’s prescription drug benefit will qualify as actuarially equivalent to Medicare Part D based on a review by the plan’s external prescription drug administrator of the plan’s prescription drug benefit compared with the prescription drug benefit that would be paid under Medicare Part D beginning in 2006. Norfolk Southern has elected to take into account these legislative changes in the measurement of its postretirement benefit obligations in accordance with Financial Accounting Standards Board Staff Position No. 106-1. This resulted in a \$45 million decrease in the end-of-year benefit obligation with a corresponding decline in the unrecognized actuarial loss for 2003. There was no effect on the net benefit cost in 2003; however, the effects of the Act will be reflected in the net benefit cost in 2004 and subsequent years. Specific authoritative guidance on the accounting for the Act’s subsidy is pending, and that guidance, when issued, could require Norfolk Southern to change information previously reported herein.

Pension and Other Postretirement Benefit Obligations and Plan Assets

	Pension Benefits		Other Benefits	
	<u>2003</u>	<u>2002</u>	<u>2003</u>	<u>2002</u>
	<i>(\$ in millions)</i>			
<i>Change in benefit obligations</i>

Benefits paid	<u>(113)</u>	<u>(116)</u>	<u>(38)</u>	<u>(31)</u>
Benefit obligation at end of year	<u>1,488</u>	<u>1,370</u>	<u>608</u>	<u>592</u>
<i>Change in plan assets</i>				
Fair value of plan assets at beginning of year	1,469	1,798	106	118
Actual return on plan assets	358	(201)	24	(12)
Employer contribution	6	6	38	31
401(h) account transfer	--	(18)	--	--
Benefits paid	<u>(113)</u>	<u>(116)</u>	<u>(38)</u>	<u>(31)</u>
Fair value of plan assets at end of year	<u>1,720</u>	<u>1,469</u>	<u>130</u>	<u>106</u>
Funded status	232	99	(478)	(486)
Unrecognized (gain) loss	208	305	163	169
Unrecognized prior service cost	21	26	(44)	--
Net amount recognized	<u>\$ 461</u>	<u>\$ 430</u>	<u>\$ (359)</u>	<u>\$ (317)</u>
Amounts recognized in the Consolidated Balance Sheets consist of:				
Prepaid benefit cost	\$ 532	\$ 497	\$ --	\$ --
Accrued benefit liability	(89)	(82)	(359)	(317)
Accumulated other comprehensive income	18	15	--	--
Net amount recognized	<u>\$ 461</u>	<u>\$ 430</u>	<u>\$ (359)</u>	<u>\$ (317)</u>

Of the pension plans included above, the unfunded pension plans were the only plans with an accumulated benefit obligation in excess of plan assets. These plans' accumulated benefit obligations were \$89 million at Dec. 31, 2003, and \$82 million at Dec. 31, 2002. These plans' projected benefit obligations were \$103 million at Dec. 31, 2003, and \$94 million at Dec. 31, 2002. Because of the nature of such plans, there are no plan assets.

Section 401(h) account transfers to NS, from pension assets, were zero in 2003 and \$18 million in 2002 as reimbursement for medical payments for retirees.

During 2003, NS amended its retiree medical plan to require participants retiring after Dec. 31, 2003 to share in any increased medical costs. Contributions will be determined annually and will increase at a

rate similar to that of active nonagreement employees. The amendment decreased the retiree medical benefit obligation by \$51 million.

Pension and Other Postretirement Benefit Costs Components

	<u>2003</u>	<u>2002</u>	<u>2001</u>
	(\$ in millions)		
<i>Pension benefits</i>			
Service cost	\$ 20	\$ 17	\$ 15

Expected return on plan assets	(158)	(179)	(202)
Amortization of prior service cost	5	4	4
Amortization of initial net asset	--	--	(3)
Recognized net actuarial gains (losses)	2	(13)	(24)
Net benefit	<u>\$ (25)</u>	<u>\$ (80)</u>	<u>\$ (116)</u>
<i>Other postretirement benefits</i>			
Service cost	\$ 18	\$ 13	\$ 14
Interest cost	40	33	33
Curtailement loss	10	--	--
Special termination benefits	17	--	--
Expected return on plan assets	(12)	(13)	(13)
Amortization of prior service cost	(7)	--	--
Amortization of unrecognized losses	14	--	--
Net cost	<u>\$ 80</u>	<u>\$ 33</u>	<u>\$ 34</u>

Pension Assumptions

Pension and other postretirement benefit costs are determined based on actuarial valuations that reflect appropriate assumptions as of the measurement date, ordinarily the beginning of each year. The funded status of the plans is determined using appropriate assumptions as of each year end. A summary of the major assumptions follows:

	<u>2003</u>	<u>2002</u>	<u>2001</u>
<i>Funded status:</i>			
Discount rate	6.25%	6.75%	7.25%
Future salary increases	4.5%	4.5%	5%
<i>Pension cost:</i>			
Discount rate	6.75%	7.25%	7.50%
Return on assets in plans	9%	9%	10%
Future salary increases	4.5%	5%	5%

Health Care Cost Trend Assumptions

For measurement purposes, increases in the per capita cost of covered health care benefits were assumed to be 9% for 2004 and 8% for 2005. It is assumed the rate will decrease gradually to an ultimate rate of 5% for 2008 and remain at that level thereafter.

Assumed health care cost trend rates have a significant effect on the amounts reported in the financial statements. To illustrate, a one-percentage-point change in the assumed health care cost trend would have the following effects:

	One percentage point	
	<u>Increase</u>	<u>Decrease</u>
	<i>(\$ in millions)</i>	
Increase (decrease) in:		
Total service and interest cost components	\$ 8	\$ (7)
Postretirement benefit obligation	\$ 65	\$ (47)

Contributions for Pension and Other Postretirement Benefits

NS expects to contribute approximately \$7 million to its pension plans and \$42 million to its other postretirement benefit plans in 2004.

Other Postretirement Coverage

Under collective bargaining agreements, NS and certain subsidiaries participate in a multi-employer benefit plan, which provides certain postretirement health care and life insurance benefits to eligible union employees. Premiums under this plan are expensed as incurred and amounted to \$18 million in 2003, \$11 million in 2002 and \$10 million in 2001.

Section 401(k) Plans

Norfolk Southern and certain subsidiaries provide Section 401(k) savings plans for employees. Under the plans, NS matches a portion of employee contributions, subject to applicable limitations. Since 1999, NS has contributed newly issued shares of Common Stock for its matching contributions. NS' expenses under these plans were \$12 million in 2003, \$12 million in 2002 and \$11 million in 2001.

12. Stock-Based Compensation

Under the stockholder-approved Long-Term Incentive Plan (LTIP), a committee of nonemployee directors of the Board may grant stock options, stock appreciation rights (SARs), restricted shares and performance share units (PSUs), up to a maximum of 88,025,000 shares of Norfolk Southern Common Stock (Common Stock). Of these shares, 5,000,000 were approved by the Board for issuance to non-officer participants; as a broadly based issuance, stockholder approval was not required. Under the Board-approved Thoroughbred Stock Option Plan (TSOP), the committee may grant stock options up to a maximum of 6,000,000 shares of Common Stock. Options may be granted for a term not to exceed 10 years, but may not be exercised prior to the first anniversary of the date of grant. Options are exercisable at the fair market value of Common Stock on the date of grant.

The LTIP also permits the payment – on a current or a deferred basis and in cash or in stock – of dividend equivalents on shares of Common Stock covered by options or PSUs in an amount commensurate with dividends paid on Common Stock. Tax absorption payments also are authorized in amounts estimated to equal the federal and state income taxes applicable to shares of Common Stock issued subject to a share retention agreement.

Accounting Method

As disclosed in Note 1, NS applies APB Opinion 25 and related interpretations in accounting for awards made under the plans. Accordingly, grants of PSUs, restricted shares, dividend equivalents, tax absorption payments and SARs result in charges to net income, while grants of stock options have no effect on net income. Related compensation costs were \$29 million in 2003, \$23 million in 2002 and \$20 million in 2001. NS recognized additional paid-in capital of \$2 million in 2003, \$6 million in 2002 and \$1 million in 2001 related to the tax benefit generated by stock option exercises.

Note 1 includes a table that illustrates the effect on net income and earnings per share had NS applied the fair value recognition provisions of SFAS No. 123 to stock-based employee compensation. The pro forma amounts include compensation costs calculated using the Black-Scholes option-pricing model, with average expected option lives of five years; average risk-free interest rates of 2.8% in 2003, 4.6% in 2002 and 5.1% in 2001; average stock-price volatilities of 33% in 2003, 32% in 2002 and 39% in 2001; and dividend yields of zero in 2003, zero in 2002 and 2% in 2001. These assumptions produced per-share grant-date fair values of \$6.60 in 2003, \$8.26 in 2002 and \$5.48 in 2001.

Stock Option Activity

	<u>Option Shares</u>	<u>Weighted Average Exercise Price</u>
Balance 12/31/00	28,120,950	\$ 24.96
Granted	6,985,000	15.48
Exercised	(1,079,902)	16.58
Expired	<u>(612,525)</u>	26.51
Balance 12/31/01	33,413,523	\$ 23.21
Granted	7,384,000	22.49
Exercised	(2,851,538)	17.48
Expired	<u>(287,341)</u>	26.73
Balance 12/31/02	37,658,644	\$ 23.47
Granted	5,700,000	19.63
Exercised	(781,610)	16.13
Expired	<u>(863,219)</u>	24.37
Balance 12/31/03	<u>41,713,815</u>	\$ 23.07

Of the total options outstanding at Dec. 31, 2003, 36 million were vested and have a weighted-average exercise price of \$23.61.

Stock Options Outstanding

<u>Range</u>	<u>Exercise Price Weighted Average</u>	<u>Number Outstanding at 12/31/03</u>	<u>Weighted Average Remaining Contractual Life</u>
\$15.48-\$16.94	\$16.27	11,568,474	6.5 years
19.63-22.49	21.21	14,070,100	7.9 years
24.31-27.69	26.84	7,658,250	3.7 years
29.46-33.25	32.09	8,416,991	4.4 years
<u>\$15.48-\$33.25</u>	<u>\$23.07</u>	<u>41,713,815</u>	<u>6.1 years</u>

Performance Share Units

PSUs provide for awards based on achievement of certain predetermined corporate performance goals at the end of a three-year cycle. PSU grants and average grant-date fair market values were 946,000 and \$19.63 in 2003; 815,000 and \$22.49 in 2002; and 817,500 and \$15.48 in 2001. PSUs may be paid in the form of shares of Common Stock, cash or any combination thereof. Shares earned and issued may be subject to share retention agreements and held by NS for up to five years.

Restricted Shares

420,000 restricted shares were granted in 2003, with a grant-date fair market value of \$19.63 and a three-year restriction period. At Dec. 31, 2003, the balance of unearned compensation was \$5 million relating to 391,800 restricted shares.

Shares Available and Issued

Shares of stock available for future grants and issued in connection with all features of the LTIP and TSOP are as follows:

	<u>2003</u>	<u>2002</u>	<u>2001</u>
Available for future grants 12/31:			
LTIP	17,994,726	23,645,146	30,816,365
TSOP	2,737,200	2,568,200	2,535,000
Shares of Common Stock issued:			
LTIP	1,412,749	2,917,898	1,146,346
TSOP	--	--	--

13. Stockholders' Equity

Accumulated Other Comprehensive Loss

“Accumulated other comprehensive loss” reported in the Consolidated Statements of Changes in Stockholders' Equity consisted of the following:

	Balance at Beginning of Year	Net Gain (Loss)	Reclassification Adjustments	Balance at End of Year
	<i>(\$ in millions)</i>			
December 31, 2003				
Unrealized gains on securities	\$ 1	\$ (1)	\$ --	\$ --
Cash flow hedges	18	46	(36)	28
Minimum pension liability	<u>(84)</u>	<u>12</u>	<u>--</u>	<u>(72)</u>
Accumulated other comprehensive loss	<u>\$ (65)</u>	<u>\$ 57</u>	<u>\$ (36)</u>	<u>\$ (44)</u>
December 31, 2002				
Unrealized gains on securities	\$ 6	\$ --	\$ (5)	\$ 1
Cash flow hedges	(11)	35	(6)	18
Minimum pension liability	<u>(50)</u>	<u>(34)</u>	<u>--</u>	<u>(84)</u>
Accumulated other comprehensive loss	<u>\$ (55)</u>	<u>\$ 1</u>	<u>\$ (11)</u>	<u>\$ (65)</u>

“Other comprehensive income (loss)” reported in the Consolidated Statements of Changes in Stockholders' Equity consisted of the following:

	<u>Pretax Amount</u>	<u>Tax (Expense) Benefit</u>	<u>Net-of-Tax Amount</u>
	<i>(\$ in millions)</i>		
<i>Year ended Dec. 31, 2003</i>			
Net gain (loss) arising during the year:			
Cash flow hedges	\$ 75	\$ (29)	\$ 46
Reclassification adjustments for gains included in net income	(59)	23	(36)
Subtotal	<u>16</u>	<u>(6)</u>	<u>10</u>
Unrealized gains (losses) on securities	(1)	--	(1)
Minimum pension liability	11	1	12
Other comprehensive income (loss)	<u>\$ 26</u>	<u>\$ (5)</u>	<u>\$ 21</u>
<i>Year ended Dec. 31, 2002</i>			
Net gain (loss) arising during the year:			
Cash flow hedges	\$ 58	\$ (23)	\$ 35
Reclassification adjustments for gains included in net income	(10)	4	(6)
Subtotal	<u>48</u>	<u>(19)</u>	<u>29</u>
Reclassification adjustments for realized gains on securities included in net income	(9)	4	(5)
Minimum pension liability	(34)	--	(34)
Other comprehensive income (loss)	<u>\$ 5</u>	<u>\$ (15)</u>	<u>\$ (10)</u>
<i>Year ended Dec. 31, 2001</i>			
Net gain (loss) arising during the year:			
Cash flow hedges	\$ (27)	\$ 11	\$ (16)
Reclassification adjustments for gains included in Net income	8	(3)	5
Subtotal	<u>(19)</u>	<u>8</u>	<u>(11)</u>
Unrealized gains (losses) on securities	(1)	--	(1)
Minimum pension liability	(35)	(2)	(37)
Other comprehensive income (loss)	<u>\$ (55)</u>	<u>\$ 6</u>	<u>\$ (49)</u>

In 2003, 2002 and 2001, Conrail recorded a \$25 million gain, a \$59 million loss and a \$70 million loss, respectively, in other comprehensive income (loss) related to its minimum pension liability. NS' “Other comprehensive income (loss)” includes a \$14 million gain for 2003, a \$34 million loss for 2002 and a \$41 million loss for 2001, arising from the Conrail adjustments.

Undistributed Earnings of Equity Investees

“Retained income” includes undistributed earnings of equity investees, principally attributable to NS' equity in the earnings of Conrail, of \$455 million at Dec. 31, 2003; \$375 million at Dec. 31, 2002; and \$355 million at Dec. 31, 2001.

14. Earnings Per Share

The following table sets forth the calculation of basic and diluted earnings per share:

	<u>2003</u>	<u>2002</u>	<u>2001</u>
	<i>(\$ in millions except per share, shares in millions)</i>		
Income available to common stockholders for basic and diluted computations	\$ <u>535</u>	\$ <u>460</u>	\$ <u>375</u>
Basic earnings per share:			
Weighted-average shares outstanding	<u>390</u>	<u>388</u>	<u>385</u>
Basic earnings per share	\$ <u><u>1.37</u></u>	\$ <u><u>1.18</u></u>	\$ <u><u>0.97</u></u>
Diluted earnings per share:			
Weighted-average shares outstanding per above	390	388	385
Dilutive effect of outstanding options, PSUs and restricted shares (as determined by the application of the treasury stock method)	<u>2</u>	<u>2</u>	<u>1</u>
Adjusted weighted-average shares outstanding	<u>392</u>	<u>390</u>	<u>386</u>
Diluted earnings per share	\$ <u><u>1.37</u></u>	\$ <u><u>1.18</u></u>	\$ <u><u>0.97</u></u>

These calculations exclude options for which the exercise price exceeded the average market price of Common Stock as follows: 28 million in 2003, 24 million in 2002 and 21 million in 2001.

There are no adjustments to “Net income” or “Income from continuing operations” for the diluted earnings per share computations.

15. Fair Values of Financial Instruments

The fair values of “Cash and cash equivalents,” “Short-term investments,” “Accounts receivable” and “Accounts payable” approximate carrying values because of the short maturity of these financial instruments. The fair value of corporate-owned life insurance approximates carrying value. The carrying amounts and estimated fair values for the remaining financial instruments, excluding derivatives (see Note 16) and investments accounted for under the equity method in accordance with APB Opinion No. 18, consisted of the following at Dec. 31:

	<u>2003</u>		<u>2002</u>	
	<u>Carrying Amount</u>	<u>Fair Value</u>	<u>Carrying Amount</u>	<u>Fair Value</u>
	<i>(\$ in millions)</i>			
Investments	\$ 32	\$ 40	\$ 30	\$ 39
Notes receivable	93	105	93	104
Long-term debt	(7,160)	(8,101)	(7,364)	(8,412)

Quoted market prices were used to determine the fair value of marketable securities; underlying net assets were used to estimate the fair value of other investments. The fair values of notes receivable are based on future discounted cash flows. The fair values of debt were estimated based on quoted market prices or discounted cash flows using current interest rates for debt with similar terms, company rating and remaining maturity.

Carrying amounts of marketable securities reflect unrealized holding gains of \$1 million on Dec. 31, 2003 and 2002. Sales of “available-for-sale” securities were immaterial for the years ended Dec. 31, 2003, 2002 and 2001.

16. Derivative Financial Instruments

On Jan. 1, 2001, NS adopted Statement of Financial Accounting Standards No. 133, “Accounting for Derivative Instruments and Hedging Activities” (SFAS No. 133), as amended by Statement of Financial Accounting Standards No. 138, “Accounting for Certain Derivative Instruments and Certain Hedging Activities” (SFAS No. 138). The Statements establish accounting and reporting standards for derivative instruments and hedging activities, requiring that all derivatives be recognized in the financial statements as either assets or liabilities and that they be measured at fair value. Changes in fair value are recorded as adjustments to the assets or liabilities being hedged in “Other comprehensive income,” or in current earnings, depending on whether the derivative is designated and qualifies for hedge accounting, the type of hedge transaction represented and the effectiveness of the hedge.

NS uses derivative financial instruments to reduce the risk of volatility in its diesel fuel costs and to manage its overall exposure to fluctuations in interest rates. NS does not engage in the trading of derivatives. Management has determined that its derivative financial instruments qualify as either fair-value or cash-flow hedges, having values that highly correlate with the underlying hedged exposures, and has designated such instruments as hedging transactions. Credit risk related to the derivative financial instruments is considered to be minimal and is managed by requiring high credit standards for counterparties and periodic settlements.

Diesel Fuel Hedging

In the second quarter of 2001, NS began a program to hedge a portion of its diesel fuel consumption. The intent of the program is to assist in the management of NS' aggregate risk exposure to fuel price fluctuations, which can significantly affect NS' operating margins and profitability. In order to minimize this risk, NS instituted a continuous hedging strategy for a portion of its estimated future fuel needs by entering into a series of swaps in order to lock in the purchase prices of some of its diesel fuel. Management has designated these derivative instruments as cash-flow hedges of the exposure to variability in expected future cash flows attributable to fluctuations in diesel fuel prices.

Following is a summary of NS' diesel fuel swaps:

	<u>2003</u>	<u>2002</u>
Number of swaps entered into during the year	286	288
Approximate number of gallons hedged (millions)	374	393
Approximate average price per gallon of Nymex No. 2 heating oil	\$0.76	\$0.66
	<u>2004</u>	<u>2005</u>
Percent of estimated future diesel fuel consumption covered as of Dec. 31, 2003	63%	22%
		<u>2006</u>
		--

Hedges are placed each month by competitive bid among selected counterparties. The goal of this hedging strategy is to average fuel costs over an extended period of time while minimizing the incremental cost of hedging. The program provides that NS will not enter into any fuel hedges with a duration of more than 36 months, and that no more than 80% of NS' average monthly fuel consumption will be hedged for each month within any 36-month period. Diesel fuel costs represented 7%, 7% and 8% of NS' operating expenses for the years ended Dec. 31, 2003, 2002 and 2001, respectively.

In 2001, NS also purchased eight monthly call options at a strike price of 84 cents per gallon of Nymex No. 2 heating oil. The cost of the monthly options, which expired serially through Dec. 31, 2001, was amortized as a component of diesel fuel expense. Because the price of diesel fuel did not reach the strike price at any time during the period the options were outstanding, NS did not record any benefit related to these transactions.

NS' fuel hedging activity resulted in a net decrease in 2003 diesel fuel expenses of \$59 million, a net decrease in 2002 diesel fuel expense of \$10 million and a net increase in 2001 diesel fuel expense of \$8 million. Ineffectiveness related to the use of diesel fuel hedges in 2003, 2002 and 2001 was less than \$1 million for each year.

Interest Rate Hedging

NS manages its overall exposure to fluctuations in interest rates by issuing both fixed and floating-rate debt instruments, and by entering into interest rate hedging transactions. NS had \$186 million, or 2.8%, and \$220 million, or 3.2%, of its fixed rate debt portfolio hedged at Dec. 31, 2003, and Dec. 31, 2002, respectively, using interest rate swaps that qualify for and are designated as fair-value hedge transactions. These swaps have been effective in hedging the changes in fair value of the related debt arising from changes in interest rates and, accordingly, there has been no impact on earnings resulting from ineffectiveness associated with these derivative transactions.

Fair Values

The fair values of NS' diesel fuel derivative instruments at Dec. 31, 2003 and 2002, were determined based upon current fair market values as quoted by third party dealers. Fair values of interest rate swaps were determined based upon the present value of expected future cash flows discounted at the appropriate implied spot rate from the spot rate yield curve. Fair value adjustments are noncash transactions and, accordingly, are excluded from the Consolidated Statement of Cash Flows. "Accumulated other comprehensive loss," a component of "Stockholders' equity," included \$40 million (pretax) at Dec. 31, 2003, and \$29 million (pretax) at Dec. 31, 2002, both relating to an increase in the fair value of derivative fuel hedging transactions that will terminate within 12 months.

The asset and liability positions of NS' outstanding derivative financial instruments were as follows:

	December 31,	
	<u>2003</u>	<u>2002</u>
	<i>(\$ in millions)</i>	
<i>Interest rate hedges:</i>		
Gross fair market asset position	\$ 16	\$ 24
Gross fair market (liability) position	--	--
<i>Fuel hedges:</i>		
Gross fair market asset position	45	29
Gross fair market (liability) position	--	--
Total net asset (liability) position	<u>\$ 61</u>	<u>\$ 53</u>

17. Discontinued Operations - Motor Carrier

On March 28, 1998, NS sold all the common stock of North American Van Lines, Inc. (NAVL), its motor carrier subsidiary. Results in 2003 include an additional after-tax gain of \$10 million, or 3 cents per share, that resulted from resolution of tax issues related to the transaction. Results in 2001 include an additional after-tax gain of \$13 million, or 3 cents per share, that resulted from the expiration of certain indemnities contained in the sales agreement.

18. Commitments and Contingencies

Lawsuits

Norfolk Southern and certain subsidiaries are defendants in numerous lawsuits and other claims relating principally to railroad operations. When management concludes that it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated, it is accrued through a charge to expenses. While the ultimate amount of liability incurred in any of these lawsuits and claims is dependent on future developments, in management's opinion, the recorded liability is adequate to cover the future payment of such liability. However, the final outcome of any of these lawsuits and claims cannot be predicted with certainty, and unfavorable or unexpected outcomes could result in accrual adjustments that could be significant to results of operations in a particular year or quarter. Any adjustments to the recorded liability will be reflected in expenses in the periods in which such adjustments are known.

Casualty Claims

NS is generally self-insured for casualty claims. Claims in excess of self-insurance levels are insured up to excess coverage limits. The casualty claims liability is determined actuarially, based upon claims filed and an estimate of claims incurred but not yet reported. While the ultimate amount of claims incurred is dependent on future developments, in management's opinion, the recorded liability is adequate to cover the future payments of claims. However, it is possible that the recorded liability may not be adequate to cover the future payment of claims. Adjustments to the recorded liability will be reflected in operating expenses in the periods in which such adjustments are known.

Environmental Matters

NS is subject to various jurisdictions' environmental laws and regulations. It is NS' policy to record a liability where such liability or loss is probable and its amount can be estimated reasonably. Claims, if any, against third parties for recovery of cleanup costs incurred by NS are reflected as receivables in the balance sheet and are not netted against the associated NS liability. Environmental engineers regularly participate in ongoing evaluations of all identified sites and in determining any necessary adjustments to initial liability estimates. NS also has established an Environmental Policy Council, composed of senior managers, to oversee and interpret its environmental policy.

NS' balance sheets included liabilities for environmental exposures in the amount of \$25 million at Dec. 31, 2003, and \$29 million at Dec. 31, 2002, (of which \$8 million was accounted for as a current liability in each year). At Dec. 31, 2003, the liability represented NS' estimate of the probable cleanup and remediation costs based on available information at 113 identified locations. On that date, 10 sites accounted for \$12 million of the liability, and no individual site was considered to be material. NS anticipates that much of this liability will be paid out over five years; however, some costs will be paid out over a longer period.

At some of the 113 locations, certain NS subsidiaries, usually in conjunction with a number of other parties, have been identified as potentially responsible parties by the Environmental Protection Agency (EPA) or similar state authorities under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, or comparable state statutes, which often impose joint and several liability for cleanup costs.

With respect to known environmental sites (whether identified by NS or by the EPA or comparable state authorities), estimates of NS' ultimate potential financial exposure for a given site or in the aggregate for all such sites are necessarily imprecise because of the widely varying costs of currently available cleanup techniques, the likely development of new cleanup technologies, the difficulty of determining in advance the nature and full extent of contamination and each potential participant's share of any estimated loss (and that participant's ability to bear it), and evolving statutory and regulatory standards governing liability.

The risk of incurring environmental liability is inherent in the railroad business. Some of the commodities in NS' traffic mix, particularly those classified as hazardous materials, can pose special risks that NS and its subsidiaries work diligently to minimize. In addition, several NS subsidiaries own, or have owned, land used as operating property, or which is leased and operated by others, or held for sale. Because environmental problems may exist on these properties that are latent or undisclosed, there can be no assurance that NS will not incur environmentally related liabilities or costs with respect to one or more of them, the amount and materiality of which cannot be estimated reliably at this time. Moreover, lawsuits and claims involving these and potentially other unidentified environmental sites and matters are likely to arise from time to time. The resulting liabilities could have a significant effect on NS' financial condition, results of operations or liquidity in a particular year or quarter.

However, based on its assessment of the facts and circumstances now known, management believes that it has recorded the probable costs for dealing with those environmental matters of which the Corporation is aware. Further, management believes that it is unlikely that any identified matters, either individually or in the aggregate, will have a material adverse effect on NS' financial position, results of operations or liquidity.

Purchase Commitments

NSR had outstanding purchase commitments of approximately \$166 million in connection with its 2004 capital program. In addition, Norfolk Southern has committed to purchase telecommunications services totaling \$30 million through 2006.

Change-In-Control Arrangements

Norfolk Southern has compensation agreements with officers and certain key employees that become operative only upon a change in control of the Corporation, as defined in those agreements. The agreements provide generally for payments based on compensation at the time of a covered individual's involuntary or other specified termination and for certain other benefits.

Guarantees

In a number of instances, NS and its subsidiaries have agreed to indemnify lenders for additional costs they may bear as a result of certain changes in laws or regulations applicable to their loans. Such changes may include impositions or modifications with respect to taxes, duties, reserves, liquidity, capital adequacy, special deposits, and similar requirements relating to extensions of credit by, deposits with, or the assets or liabilities of such lenders. Similar provisions exist in NS' accounts receivable sales program.

The nature and timing of changes in laws or regulations applicable to NS' financings are inherently unpredictable, and therefore NS' exposure in connection with the foregoing indemnifications cannot be quantified. No liability has been recorded related to these indemnifications. In the case of one type of equipment financing, NSR's Japanese leveraged leases, NSR may terminate the leases and ancillary agreements if such a change-in-law indemnity is triggered. Such a termination would require NSR to make early termination payments that would not be expected to have a material adverse effect on NS' financial condition, results of operations or liquidity.

NS has indemnified parties in a number of transactions for U.S. income tax withholding imposed as a result of changes in U.S. tax law. In all cases, NS has the right to unwind the related transaction if the withholding cannot be avoided in the future. Because these indemnities would be triggered and are dependent upon a change in the tax law, the maximum exposure is not quantifiable. Management does not believe that it is likely that it will be required to make any payments under these indemnities.

NS has outstanding warranty liabilities primarily related to work performed at its locomotive facilities. NS has recorded a reserve of \$1 million as of Dec. 31, 2003, and less than \$2 million as of Dec. 31, 2002 for these warranties.

As of Dec. 31, 2003, certain Norfolk Southern subsidiaries are contingently liable as guarantors with respect to \$8 million of indebtedness of an entity in which they have an ownership interest, the Terminal Railroad Association of St. Louis, due in 2019. Six other railroads are also jointly and severally liable as guarantors for this indebtedness. No liability has been recorded related to this guaranty.

NS is liable for any shortfall in the then fair market value of certain leased locomotives and a specified residual value for the locomotives if the leases are not renewed, as discussed in Note 9.

* Includes a \$114 million, or 29 cents per share, increase related to required accounting changes (see Note 1 on page K47), and a \$10 million, or 3 cents per share, gain from discontinued operations (see Note 17 on page K71).

** Includes a \$107 million pre-tax charge for a voluntary separation program (see Note 11 on page K59), which reduced net income by \$66 million or 17 cents per share. Also includes an \$84 million impairment charge (see Note 6 on page K56), which reduced net income by \$53 million or 13 cents per share.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures.

Norfolk Southern's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of NS' disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of December 31, 2003. Based on such evaluation, such officers have concluded that, as of December 31, 2003, NS' disclosure controls and procedures are effective in alerting them on a timely basis to material information relating to NS (including its consolidated subsidiaries) required to be included in NS' periodic filings under the Exchange Act.

(b) Changes in Internal Controls.

During the fourth quarter of 2003, management has not identified any changes in NS' internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, NS' internal controls over financial reporting.

PART III

NORFOLK SOUTHERN CORPORATION AND SUBSIDIARIES (NS)

Item 10. Directors and Executive Officers of the Registrant.

In accordance with General Instruction G(3), information called for by Item 10, Part III, is incorporated herein by reference from the information appearing under the caption "Election of Directors," under the subcaptions "Committees" (including the information appearing under "Audit Committee") and "Corporate Governance" under the caption "Board of Directors;" and under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" in Norfolk Southern's definitive Proxy Statement, for the Norfolk Southern Annual Meeting of Stockholders to be held on May 13, 2004, which definitive Proxy Statement will be filed electronically with the Commission pursuant to Regulation 14A. The information regarding executive officers called for by Item 401 of Regulation S-K is included in Part I hereof beginning under "Executive Officers of the Registrant."

Item 11. Executive Compensation.

In accordance with General Instruction G(3), information called for by Item 11, Part III, is incorporated herein by reference from the information appearing under the subcaption "Compensation" under the caption "Board of Directors" for directors and under the caption "Executive Compensation" for executives, including the information appearing in the "Summary Compensation Table" and under the subcaptions "Long-Term Incentive Plan" (including the three tables therein), "Pension Plans" (including the table therein), and "Change in Control Arrangements" in Norfolk Southern's definitive Proxy Statement, for the Norfolk Southern Annual Meeting of Stockholders to be held on May 13, 2004, which definitive Proxy Statement will be filed electronically with the Commission pursuant to Regulation 14A.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

In accordance with General Instruction G(3), information called for by Item 12, Part III, is incorporated herein by reference from the information appearing under the caption "Beneficial Ownership of Stock" in Norfolk Southern's definitive Proxy Statement, for the Norfolk Southern Annual Meeting of Stockholders to be held on May 13, 2004, which definitive Proxy Statement will be filed electronically with the Commission pursuant to Regulation 14A.

Equity compensation plans not approved by security holders ²	<u>8,262,800³</u>	22.91 ^{3,5}	<u>3,282,200⁷</u>
Total	<u>44,287,315</u>	23.07	<u>21,276,926</u>

¹ The Long-Term Incentive Plan, excluding five million shares for broad-based issuance to non-officers.

² The Long-Term Incentive Plan's five million shares for broad-based issuance to non-officers, the Thoroughbred Stock Option Plan, the Directors' Restricted Stock Plan and the Safety Incentive Plan.

³ Includes options and performance share units granted under the Long-Term Incentive Plan on five million shares for non-officers and options granted under the Thoroughbred Stock Option Plan.

⁴ Calculated without regard to 2,328,500 outstanding performance share units.

⁵ Calculated without regard to 245,000 outstanding performance share units.

⁶ Of the shares remaining available for grant under plans approved by stockholders, 4,239,000 are available for grant as restricted shares or performance shares under the Long-Term Incentive Plan.

⁷ Of the shares remaining available for grant under plans not approved by stockholders, 39,000 are available for grant as restricted stock under the Directors' Restricted Stock Plan and 456,706 are available for grant as stock under the Safety Incentive Plan.

Norfolk Southern Corporation Long-Term Incentive Plan ("LTIP")

Established on June 28, 1983, and approved by the stockholders at their Annual Meetings on May 10, 1984, on May 11, 1995, and most recently on May 10, 2001, LTIP was adopted to promote the success of Norfolk Southern by providing an opportunity for officers and other key employees to acquire a proprietary interest in the Corporation. On January 23, 2001, the Board of Directors approved the issuance of an additional 5,000,000 shares of authorized but unissued Common Stock under LTIP to participants who are not officers of Norfolk Southern. The issuance of these shares was broadly-based, and stockholder approval of these shares was not required. Accordingly, this portion of LTIP is included in the number of securities available for future issuance for plans not approved by stockholders. The Board also adopted an amended plan effective January 23, 2001, subject to stockholder approval, which included the reservation for issuance of an additional 30,000,000 shares of authorized but unissued Norfolk Southern Common Stock, with no more than 6 million of such additional shares to be awarded as restricted shares or performance shares (including performance share units earned as performance shares). This amended plan was approved by stockholders on May 10, 2001, resulting in an aggregate of 74,878,604 shares of Common Stock authorized for issuance under LTIP.

Non-employee directors, officers and other key employees residing in the United States or Canada are eligible for selection to receive LTIP awards. Under LTIP, the Performance-Based Compensation

Committee (Committee) may grant incentive stock options, nonqualified stock options, stock appreciation rights, restricted shares and performance share units (in addition, dividend equivalents may be awarded for options and performance share units). The Committee may establish such terms and conditions for the awards as provided in the plan.

For options, the option price per share will not be less than 100% of the fair market value of Norfolk Southern's Common Stock on the effective date the option is granted. All options are subject to a vesting period of at least one year, and the term of the option will not exceed ten years. LTIP specifically prohibits option repricing without stockholder approval, except for capital adjustments.

Performance share units are performance-based awards which are earned upon achievement of goals the Committee establishes at the time of the grant for three equally weighted performance criteria approved by the stockholders -- return on average invested capital, operating ratio, and total return to NS stockholders as compared with the total return on all stocks comprising the S&P 500 Composite Stock Price Index -- and the units may be payable as shares of Norfolk Southern Common Stock or in cash.

Norfolk Southern Corporation Thoroughbred Stock Option Plan

The Board adopted the Norfolk Southern Corporation Thoroughbred Stock Option Plan ("TSOP") on January 26, 1999, to promote the success of Norfolk Southern by providing an opportunity for nonagreement employees to acquire a proprietary interest in Norfolk Southern and thereby to provide an additional incentive to nonagreement employees to devote their maximum efforts and skills to the advancement, betterment, and prosperity of Norfolk Southern and its stockholders. The plan has not been approved by stockholders. Six million shares of authorized but unissued Common Stock were reserved for issuance under TSOP.

Active full-time nonagreement employees residing in the United States or Canada are eligible for selection to receive TSOP awards. Under TSOP, the Compensation Committee of the Board of Directors may grant nonqualified stock options and may establish such terms and conditions as provided in the plan.

The option price per share will not be less than 100% of the fair market value of Norfolk Southern's Common Stock on the effective date the option is granted. All options are subject to a vesting period of at least one year, and the term of the option will not exceed ten years. TSOP specifically prohibits option repricing without stockholder approval, except for capital adjustments.

Norfolk Southern Corporation Directors' Restricted Stock Plan

The Norfolk Southern Corporation Directors' Restricted Stock Plan ("Plan") was adopted on January 1, 1994, and is designed to increase ownership of Norfolk Southern's Common Stock by its non-employee directors so as to further align their ownership interest in Norfolk Southern with that of stockholders. The Plan has not been approved by stockholders. Currently, a maximum of 66,000 shares of Corporation Common Stock may be granted under the Plan. To make the grants to eligible directors, Norfolk Southern purchases, through one or more subsidiary companies, the number of shares required in open-market transactions at prevailing market prices, or makes such grants from Common Stock already owned by one or more of Norfolk Southern's subsidiary companies.

Only non-employee directors, who are not and never have been employees of Norfolk Southern, are eligible to participate in the Plan. Upon becoming a director, each eligible director receives a one-time grant of 3,000 restricted shares of Norfolk Southern Common Stock. No individual member of the Board exercises discretion concerning the eligibility of any director or the number of shares granted.

The restriction period begins on the date of the grant and ends on the earlier of six months after the eligible director ceases to be a director by reason of disability, retirement or death. Directors will forfeit the right to receive the restricted shares if they cease to serve as a director of Norfolk Southern for reasons other than their disability, retirement or death.

Norfolk Southern Corporation Safety Incentive Plan

The Norfolk Southern Corporation Safety Incentive Plan (“SIP”) is designed to provide an additional incentive for eligible agreement employees to work safely. Under the plan, eligible employees who work without injury during the year receive a safety award whose equivalent value is between five and eight shares of Norfolk Southern Common Stock. Awards for the 2003 calendar year were payable in shares of Norfolk Southern Common Stock. SIP was amended effective Jan. 1, 2004, to provide for safety awards for calendar years beginning on or after Jan. 1, 2004, to be made in the form of stock units payable in cash on the date of the award, so shares of Norfolk Southern Common Stock will no longer be awarded.

SIP is broadly-based and has not been approved by stockholders. Shares of Common Stock issued under its terms are not registered under the Securities Act of 1933, pursuant to a no-action letter issued by the Securities and Exchange Commission on November 20, 1992. Accordingly, SIP does not define a specific amount of authorized shares for issuance under the plan. The Board approved using up to 500,000 authorized but unissued shares for awards under the plan, and the number of shares remaining under this authorization are included in the number of securities available for future issuance for plans not approved by shareholders.

Item 13. Certain Relationships and Related Transactions.

In accordance with General Instruction G(3), information called for by Item 13, Part III, is incorporated herein by reference from the information appearing under the caption “Certain Relationships and Related Transactions” in Norfolk Southern's definitive Proxy Statement, for the Norfolk Southern Annual Meeting of Stockholders to be held on May 13, 2004, which definitive Proxy Statement will be filed electronically with the Commission pursuant to Regulation 14A.

Item 14. Principal Accountant Fees and Services.

In accordance with General Instruction G(3), information called for by Item 14, Part III is incorporated herein by reference from the information appearing under the caption “Ratification of Appointment of Independent Public Accountants” in Norfolk Southern’s definitive Proxy Statement, for the Norfolk Southern Annual Meeting of Stockholders to be held on May 13, 2004, which definitive proxy statement will be filed electronically with the Commission pursuant to Regulation 14A.

Instruments Defining the Rights of Security Holders, Including Indentures:

- (a) Indenture, dated as of January 15, 1991, from Norfolk Southern Corporation to First Trust of New York, National Association, as Trustee, related to the issuance of notes in the principal amount of \$750 million, incorporated by reference to Exhibit 4.1 to Norfolk Southern Corporation's Registration Statement on Form S-3 (No. 33-38595).
- (b) First Supplemental Indenture, dated May 19, 1997, between Norfolk Southern Corporation and First Trust of New York, National Association, as Trustee, related to the issuance of notes in the principal amount of \$4.3 billion, is incorporated herein by reference to Exhibit 1.1(d) to Norfolk Southern Corporation's Form 8-K filed on May 21, 1997.
- (c) Second Supplemental Indenture, dated April 26, 1999, between Norfolk Southern Corporation and U.S. Bank Trust National Association, as Trustee, related to the issuance of notes in the principal amount of \$400 million, is incorporated herein by reference to Exhibit 1.1(c) to Norfolk Southern Corporation's Form 8-K filed on April 30, 1999.
- (d) Third Supplemental Indenture, dated May 23, 2000, between Norfolk Southern Corporation and U.S. Bank Trust National Association, as Trustee, related to the issuance of notes in the principal amount of \$600 million, is incorporated herein by reference to Exhibit 4.1 to Norfolk Southern Corporation's Form 8-K filed on May 25, 2000.
- (e) Fourth Supplemental Indenture, dated as of February 6, 2001, between Norfolk Southern Corporation and U.S. Bank Trust National Association, as Trustee, related to the issuance of notes in the principal amount of \$1 billion, is incorporated herein by reference to Exhibit 4.1 to Norfolk Southern Corporation's Form 8-K filed on February 7, 2001.
- (f) Fifth Supplemental Indenture, dated as of July 5, 2001, between Norfolk Southern Corporation and U.S. Bank Trust National Association, as Trustee, related to the issuance of notes in the principal amount of \$250 million, is incorporated herein by reference to Exhibit 4.1 to Norfolk Southern Corporation's Form 8-K filed on July 5, 2001.
- (g) Rights Agreement, dated as of September 26, 2000, between Norfolk Southern Corporation and The Bank of New York, with exhibits thereto, is incorporated herein by reference to Exhibit 4 to Norfolk Southern Corporation's Form 8-K filed on September 26, 2000.
- (h) Sixth Supplemental Indenture, dated as of April 30, 2002, between Norfolk Southern Corporation and U.S. Bank Trust National Association, as Trustee, relating to the issuance of notes in the principal amount of \$200 million, is incorporated herein by reference to Exhibit 4.1 to Norfolk Southern Corporation's Form 8-K filed on May 1, 2002.
- (i) Seventh Supplemental Indenture, dated as of April 30, 2002, between Norfolk Southern Corporation and U.S. Bank Trust National Association, as Trustee, relating to the issuance of notes in the principal amount of \$100 million, is incorporated herein by reference to Exhibit 4.1 to Norfolk Southern Corporation's Form 8-K filed on May 1, 2002.

- (j) Amendment to Rights Agreement, dated as of November 26, 2002, between Norfolk Southern Corporation and The Bank of New York, with exhibits thereto, is incorporated by reference to Exhibit 4 to Norfolk Southern Corporation's Form 8-K filed on November 26, 2002.

In accordance with Item 601(b)(4)(iii) of Regulation S-K, copies of other instruments of Norfolk Southern Corporation and its subsidiaries with respect to the rights of holders of long-term debt are not filed herewith, or incorporated by reference, but will be furnished to the Commission upon request.

10 Material Contracts -

- (a) The Transaction Agreement, dated as of June 10, 1997, by and among CSX, CSX Transportation, Inc., Registrant, Norfolk Southern Railway Company, Conrail Inc., Consolidated Rail Corporation and CRR Holdings LLC, with certain schedules thereto, previously filed, is incorporated herein by reference to Exhibit 10(a) to Norfolk Southern Corporation's Form 10-K filed on February 24, 2003.
- (b) Amendment No. 1, dated as of August 22, 1998, to the Transaction Agreement, dated as of June 10, 1997, by and among CSX Corporation, CSX Transportation, Inc., Norfolk Southern Corporation, Norfolk Southern Railway Company, Conrail Inc., Consolidated Rail Corporation and CRR Holdings LLC is incorporated herein by reference from Exhibit 10.1 to Norfolk Southern Corporation's Form 10-Q filed on August 11, 1999.
- (c) Amendment No. 2, dated as of June 1, 1999, to the Transaction Agreement, dated June 10, 1997, by and among CSX Corporation, CSX Transportation, Inc., Norfolk Southern Corporation, Norfolk Southern Railway Company, Conrail Inc., Consolidated Rail Corporation and CRR Holdings LLC is incorporated herein by reference from Exhibit 10.2 to Norfolk Southern Corporation's Form 10-Q filed on August 11, 1999.
- (d) Operating Agreement, dated as of June 1, 1999, by and between Pennsylvania Lines LLC and Norfolk Southern Railway Company is incorporated herein by reference from Exhibit 10.3 to Norfolk Southern Corporation's Form 10-Q filed on August 11, 1999.
- (e) Amendment No. 1, dated as of September 29, 2001, to Operating Agreement, dated as of June 1, 1999, by and between Pennsylvania Lines LLC and Norfolk Southern Railway Company, is incorporated herein by reference from Exhibit 10(e) to Norfolk Southern Corporation's Form 10-K filed on February 21, 2002.
- (f) Shared Assets Area Operating Agreement for North Jersey, dated as of June 1, 1999, by and among Consolidated Rail Corporation, CSX Transportation, Inc. and Norfolk Southern Railway Company, with exhibit thereto, is incorporated herein by reference from Exhibit 10.4 to Norfolk Southern Corporation's Form 10-Q filed on August 11, 1999.
- (g) Shared Assets Area Operating Agreement for South Jersey/ Philadelphia, dated as of June 1, 1999, by and among Consolidated Rail Corporation, CSX Transportation, Inc. and Norfolk Southern Railway Company, with exhibit thereto, is incorporated herein by reference from Exhibit 10.5 to Norfolk Southern Corporation's Form 10-Q filed on August 11, 1999.

- (h) Shared Assets Area Operating Agreement for Detroit, dated as of June 1, 1999, by and among Consolidated Rail Corporation, CSX Transportation, Inc. and Norfolk Southern Railway Company, with exhibit thereto, is incorporated herein by reference from Exhibit 10.6 to Norfolk Southern Corporation's Form 10-Q filed on August 11, 1999.
- (i) Amendment No. 1, dated as of June 1, 2000, to the Shared Assets Areas Operating Agreement for North Jersey, South Jersey/Philadelphia and Detroit, dated as of June 1, 1999, by and among Consolidated Rail Corporation, CSX Transportation, Inc. and Norfolk Southern Railway Company, with exhibit thereto, is incorporated herein by reference to Exhibit 10(h) to Norfolk Southern Corporation's 10-K filed on March 5, 2001.
- (j) Amendment No. 2, dated as January 1, 2001, to the Shared Assets Area Operating Agreements for North Jersey, South Jersey/Philadelphia and Detroit, dated as of June 1, 1999, by and among Consolidated Rail Corporation, CSX Transportation, Inc. and Norfolk Southern Railway Company, with exhibit thereto, is incorporated herein by reference to Exhibit 10(j) to Norfolk Southern Corporation's Form 10-K filed on February 21, 2002.
- (k) Amendment No. 3, dated as of June 1, 2001, and executed in May of 2002, to the Shared Assets Area Operating Agreement for North Jersey, South Jersey/Philadelphia and Detroit, dated as of June 1, 1999, by and among Consolidated Rail Corporation, CSX Transportation, Inc. and Norfolk Southern Railway Company, with exhibit thereto, is incorporated herein by reference to Exhibit 10(k) to Norfolk Southern Corporation's Form 10-K filed on February 24, 2003.
- (l) Monongahela Usage Agreement, dated as of June 1, 1999, by and among CSX Transportation, Inc., Norfolk Southern Railway Company, Pennsylvania Lines LLC and New York Central Lines LLC, with exhibit thereto, is incorporated herein by reference from Exhibit 10.7 to Norfolk Southern Corporation's Form 10-Q filed on August 11, 1999.
- (m) The Agreement, entered into as of July 27, 1999, between North Carolina Railroad Company and Norfolk Southern Railway Company, is incorporated herein by reference from Exhibit 10(i) to Norfolk Southern Corporation's Form 10-K filed on March 6, 2000.
- (n) The Supplementary Agreement, entered into as of January 1, 1987, between the Trustees of the Cincinnati Southern Railway and The Cincinnati, New Orleans and Texas Pacific Railway Company (the latter a wholly owned subsidiary of Norfolk Southern Railway Company) - extending and amending a Lease, dated as of October 11, 1881 - is incorporated by reference to Exhibit 10(k) to Norfolk Southern Corporation's Form 10-K filed on March 5, 2001.
- (o) The Norfolk Southern Corporation Executive Management Incentive Plan, effective January 25, 2000, is incorporated by reference herein from Exhibit 10(1) to Norfolk Southern Corporation's Form 10-K filed on March 6, 2000.
- (p) The Norfolk Southern Corporation Long-Term Incentive Plan, as amended effective January 28, 2003, is incorporated herein by reference to Exhibit 10(p) to Norfolk Southern Corporation's Form 10-K filed on February 24, 2003.

- (q) The Norfolk Southern Corporation Officers' Deferred Compensation Plan, as amended effective September 26, 2000, is incorporated herein by reference to Exhibit 10(n) to Norfolk Southern Corporation's Form 10-K filed on March 5, 2001.
- (r) The Norfolk Southern Corporation Executives' Deferred Compensation Plan, as amended effective January 20, 2001, is incorporated herein by reference to Exhibit 10(o) to Norfolk Southern Corporation's Form 10-K filed on March 5, 2001.
- (s) The Directors' Deferred Fee Plan of Norfolk Southern Corporation, as amended effective January 23, 2001, is incorporated herein by reference to Exhibit 10(p) to Norfolk Southern Corporation's Form 10-K filed on March 5, 2001.
- (t) The Norfolk Southern Corporation Directors' Restricted Stock Plan, effective January 1, 1994, as restated November 24, 1998, is incorporated herein by reference from Exhibit 10(h) to Norfolk Southern Corporation's Form 10-K filed on March 24, 1999.
- (u) Form of Severance Agreement, dated as of June 1, 1996, between Norfolk Southern Corporation and certain executive officers (including those defined as "named executive officers" and identified in the Corporation's Proxy Statement for the 1997 through 2001 Annual Meetings of Stockholders) is incorporated herein by reference from Exhibit 10(t) to Norfolk Southern Corporation's Form 10-K filed on February 21, 2002.
- (v) Norfolk Southern Corporation Supplemental (formerly, Excess) Benefit Plan, effective as of August 22, 1999, is incorporated herein by reference from Exhibit 10(r) to Norfolk Southern Corporation's Form 10-K filed on March 6, 2000.
- (w) The Norfolk Southern Corporation Directors' Charitable Award Program, effective February 1, 1996, is incorporated herein by reference from Exhibit 10(v) to Norfolk Southern Corporation's Form 10-K filed on February 21, 2002.
- (x) The Norfolk Southern Corporation Outside Directors' Deferred Stock Unit Program, as amended effective January 28, 2003, is incorporated herein by reference to Exhibit 10(x) to Norfolk Southern Corporation's Form 10-K filed on February 24, 2003.
- (y) Agreement, dated as of October 1, 2001, providing enhanced pension benefits to three officers in exchange for their continued employment with Norfolk Southern Corporation for two years, is incorporated herein by reference to Exhibit 10(w) to Norfolk Southern Corporation's Form 10-Q filed on November 9, 2001. The agreement was entered into with L. Ike Prillaman, Vice Chairman and Chief Marketing Officer; Stephen C. Tobias, Vice Chairman and Chief Operating Officer; and Henry C. Wolf, Vice Chairman and Chief Financial Officer.
- (z) The Norfolk Southern Corporation Thoroughbred Stock Option Plan, as amended effective January 28, 2003, is incorporated herein by reference to Exhibit 10(z) to Norfolk Southern Corporation's Form 10-K filed on February 24, 2003.
- (aa) The Norfolk Southern Safety Incentive Plan for Operating Agreement Employees and For Non-Operating Agreement Employees, as amended effective January 1, 2004, is filed herewith.

- (bb) The Norfolk Southern Corporation Restricted Stock Unit Plan, effective January 28, 2003, is incorporated herein by reference to Exhibit 10(bb) to Norfolk Southern Corporation's Form 10-K filed on February 24, 2003.
 - (cc) The Norfolk Southern Corporation Executive Life Insurance Plan, as amended, effective October 1, 2003, is incorporated herein by reference to Exhibit 10 to Norfolk Southern Corporation's Form 10-Q filed on October 31, 2003.
- 12 Statement re: Computation of Ratio of Earnings to Fixed Charges.
- 21 Subsidiaries of the Registrant.
- 23 Consents of Experts -
- (a) Consent of KPMG LLP.
 - (b) Consent of KPMG LLP and Ernst & Young LLP.
- 31 Rule 13a-14(a)/15d-14(a) Certifications.
- 32 Section 1350 Certifications.
- 99 Conrail Inc. 2003 Annual Report to Stockholders.
- (B) Reports on Form 8-K.

A report on Form 8-K was filed December 23, 2003, advising of the Corporation's review of the Surface Transportation Board's decision in Carolina Power & Light Company v. Norfolk Southern Railway Company and attaching as an exhibit the related press release.

A report on Form 8-K was filed December 17, 2003, advising that the Corporation would record a pretax charge of approximately \$80 million to its fourth-quarter earnings to recognize the impaired value of certain telecommunications assets and attaching as an exhibit the related press release.

A report on Form 8-K was filed December 1, 2003, advising of a series of senior-level executive and organizational changes following the completion of the Corporation's voluntary separation program for non-agreement employees and attaching as an exhibit the related press release.

A report on Form 8-K was filed November 24, 2003, advising that Norfolk Southern Railway Company would redeem on December 29, 2003, all publicly held shares of its \$2.60 Cumulative Preferred Stock, Series A and attaching as an exhibit the related press release.

A report on Form 8-K was filed November 10, 2003, advising that the Corporation had reviewed the Surface Transportation Board's ruling in Duke Energy Corp. v. Norfolk Southern Railway Company and concluded that the impact of the decision on earnings could not be determined at the time and attaching as an exhibit the related press release.

A report on Form 8-K was filed November 6, 2003, advising of the Corporation's review of the Surface Transportation Board's ruling in Duke Energy Corp. v. Norfolk Southern Railway Company and attaching as an exhibit the related press release.

A report on Form 8-K was filed November 5, 2003, advising that the Corporation had expected to record a \$107 million charge against fourth-quarter 2003 earnings related to the completion of its voluntary separation program for non-agreement employees and attaching as an exhibit the related press release.

A report on Form 8-K was filed October 29, 2003, advising of the Corporation's third-quarter 2003 results and attaching as an exhibit the related press release, which included the following financial statements for the Corporation and its subsidiaries: Consolidated Statements of Income (Unaudited) for the three months and nine months ended September 30, 2003 and 2002; Consolidated Balance Sheets (Unaudited) for September 30, 2003, and December 31, 2002; and Consolidated Statements of Cash Flows (Unaudited) for the nine months ended September 30, 2003 and 2002.

(C) Exhibits.

The Exhibits required by Item 601 of Regulation S-K as listed in Item 15(A)3 are filed herewith or incorporated herein by references.

(D) Financial Statement Schedules.

Financial statement schedules and separate financial statements specified by this Item are included in Item 15(A)2 or are otherwise not required or are not applicable.

POWER OF ATTORNEY

CERTIFICATIONS OF CEO AND CFO PURSUANT TO
EXCHANGE ACT RULE 13a-14(a) OR RULE 15d-14(a)

I, David R. Goode, certify that:

1. I have reviewed this annual report on Form 10-K of Norfolk Southern Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - c. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
