Diversifying Operator Mix**

Based on 4Q 2014 net operating income.

New Senior Investment Group (NYSE: SNR) is a publicly-traded real estate investment trust focused on investing in senior housing properties across the United States. The Company is one of the largest owners of senior housing properties and, as of December 31, 2014, owned 100 properties located across 27 states. New Senior is managed by an affiliate of Fortress Investment Group LLC, a global investment management firm.

Dear fellow shareholders:

2014 was a transformational year for New Senior, the only pure-play, publicly traded senior housing REIT in the U.S. We executed on many key initiatives, including spinning off into a stand-alone publicly traded company and significantly growing our earnings through accretive acquisitions and strong organic growth.

2014: Just the Beginning

A few of our key highlights for the year:

- Spun off from Newcastle Investment Corp. (NYSE: NCT) on November 6th, creating the only pure-play, publicly traded senior housing REIT and one of the top 10 largest senior housing platforms in the U.S.
- Closed and/or announced approximately \$750 million of primarily private pay senior housing acquisitions
- Added 16 properties to our portfolio, ending 2014 with 100 primarily private pay senior housing properties with over 12,000 beds diversified across 27 states
- Declared our first quarterly dividend of \$0.23 per share
- Added to the MSCI US REIT Index, a leading and widely followed index for the REIT industry
- Completed building out our team of experienced professionals in all key functions of the business

A Differentiated Strategy

Our overall strategy continues to be unique as we set ourselves apart from our peers by primarily investing in private pay senior housing assets. Approximately 90% of our NOI is concentrated in assisted living and independent living property types, which we consider to be more stable and predictable versus government reimbursed property types. This focus on acquiring high quality private pay senior housing properties has been, and will continue to be, our strategy as we build our company.

We began building our portfolio in 2012 with the purchase of eight senior housing properties. Since then, we have experienced significant growth and have closed on 18 additional transactions to end 2014 with 100 primarily private pay senior housing assets comprised of nearly \$2 billion of investments. We have maintained our disciplined underwriting standards at all times. Despite the low interest rate environment and increased competition, our team has successfully executed acquisitions at very attractive net operating income ("NOI") yields of approximately 7.5% for 2014, well above industry averages for larger portfolio acquisitions. We believe our performance is the direct result of our unique and successful two-pronged acquisition strategy: 1) source smaller, off-market acquisitions where we think the assets are undervalued and we can achieve attractive returns, and 2) continue to leverage the relationship of our manager, Fortress Investment Group. Fortress's longstanding track record of over 15 years in the senior housing industry provides us with a unique competitive advantage to source and underwrite acquisitions that are typically not available to other competitors.

In 2014, we continued to grow our relationships with key best-in-class operators. Over 80% of our NOI is generated from the top 3 largest senior housing operators in the U.S. and they have provided strong and consistent results for New Senior—including 10% same store NOI growth for our managed portfolio for 4Q'14 compared to 4Q'13. Looking forward, we expect continued strong growth as our partners further drive revenues and optimize operations. In addition, to diversify our portfolio we are constantly evaluating new relationships with experienced operators that have a superior track record of providing quality care to our nation's elderly population.

A Look Ahead

The opportunity to significantly grow our platform is huge. The senior housing industry—which we estimate to total approximately \$300 billion—remains highly fragmented with approximately 66% of these owned by small “mom and pop” operators. Given the increasing complexities of providing care to seniors, we expect a growing number of these operators, many of whom are multi-generational owners, to exit the business over time. Our business is well positioned to take advantage of this dynamic and we believe our dedicated and experienced acquisition team will be able to continue its strong track record of acquiring assets at attractive yields.

We also remain enthusiastic about the fundamentals in the senior housing industry. Demand continues to increase as the population of seniors over 70 years of age, which totals 32 million seniors, is growing at 4 times the rate of the overall population. While supply has increased slightly in recent years, it remains at modest levels and continues to be absorbed by the increasing number of seniors moving into senior housing. Industry experts are also projecting that this demand will continue to outpace new supply in 2015, boding well for continued strong industry fundamentals from which we expect to benefit.

While we accomplished a lot in 2014, we are excited about what lies ahead in 2015. Our growth prospects are stronger than ever, and we have the team in place to continue to execute and deliver results for our shareholders.

We appreciate your continued support and look forward to a productive 2015.

Sincerely,

A handwritten signature in black ink, appearing to read 'Susan Givens'.

The information required by Part III (Items 10, 11, 12, 13 and 14) will be incorporated by reference from the registrant’s Definitive Proxy Statement for its 2014 Annual Meeting of Stockholders to be filed with the Securities and Exchange Commission pursuant to Regulation 14A.

CAUTIONARY NOTE REGARDING FORWARD LOOKING STATEMENTS

This report contains certain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements relate to, among other things, the operating performance of New Senior Investment Group Inc.’s (“New Senior,” the “Company,” “we,” “us,” or “our”) investments, the stability of our earnings and our financing needs. Forward-looking statements are generally identifiable by use of forward-looking terminology such as “may,” “will,” “should,” “potential,” “intend,” “expect,” “endeavor,” “seek,” “anticipate,” “estimate,” “overestimate,” “underestimate,” “believe,” “could,” “project,” “predict,” “continue” or other similar words or expressions. Forward-looking statements are based on certain assumptions, discuss future expectations, describe future plans and strategies, contain projections of results of operations or of financial condition or state other forward-looking information. Our ability to predict results or the actual outcome of future plans or strategies is inherently uncertain. Although we believe that the expectations reflected in such forward-looking statements are based on reasonable assumptions, our actual results and performance could differ materially from those set forth in the forward-looking statements. These forward-looking statements involve risks, uncertainties and other factors that may cause our actual results in future periods to differ materially from forecasted results. Factors which could have a material adverse effect on our operations and future prospects include, but are not limited to:

- our ability to successfully operate as a standalone public company;
- our dependence on our property managers and tenants (collectively, our “Operators”);
- the relative spreads between the yield on the assets we invest in and the cost of financing;
- reductions in cash flows received from our real estate investments;
- our ability to take advantage of investment opportunities at attractive risk-adjusted prices;
- the ability of our property managers and tenants (including the tenants to which properties are leased under triple net leases, collectively the “Master Tenants”) to comply with laws, rules and regulations in the operation of our properties;
- the ability of our property managers and tenants, as applicable, to effectively conduct their operations, maintain and improve our properties, to deliver high-quality services, to attract and retain qualified personnel and to attract residents;
- increases in costs at our senior housing properties (including, but not limited to, the costs of labor, supplies, insurance and property taxes);
- our occupancy rates;
- the ability and willingness of our tenants (including the Master Tenants) to renew their leases with us upon expiration of the leases and competition for tenants, including with respect to new leases and the renewal or rollover of existing leases;
- our ability to reposition our properties on the same or better terms in the event of nonrenewal;
- in the event we exercise our right to replace an existing tenant, the obligations, including indemnification obligations, we may incur in connection with the replacement of an existing tenant;
- the sale of properties, including our ability to close our anticipated dispositions on currently anticipated terms, or within currently anticipated timeframes, or at all, and realize currently anticipated benefits from such dispositions;
- availability of suitable properties to acquire at favorable prices and the competition for the acquisition and financing of those properties;
- our ability and the ability of our property managers and tenants (including the Master Tenants) to obtain and maintain adequate property, liability and other insurance from reputable, financially stable providers;
- changes of federal, state and local laws and regulations relating to fraud and abuse practices, Medicaid reimbursement and licensure, etc., including those affecting the healthcare industry that affect our costs of compliance or increase the costs, or otherwise affect the operations or our property managers or tenants;
- the ability of our property managers and tenants and guarantors (including the Master Tenants) to maintain the financial strength and liquidity necessary to satisfy their respective obligations and liabilities to third parties, including without limitation obligations under their existing credit properties and other indebtedness;
- a lack of liquidity surrounding our investments which could impede our ability to vary our portfolio in an appropriate manner;
- changes in economic conditions generally and the real estate and bond markets specifically;
- the quality and size of the investment pipeline and the rate at which we can invest our cash;
- changes in interest rates and/or credit spreads, as well as the success of any hedging strategy we may undertake in relation to such changes;
- our ability to maintain our qualification as a Real Estate Investment Trust (“REIT”) for U.S. federal income tax purposes and the potentially onerous consequences that any failure to maintain such qualification would have on our business; and
- our ability to maintain our exemption from registration under the Investment Company Act of 1940, as amended (the “1940 Act”) and the fact that maintaining such exemption imposes limits on our operations.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. The factors noted above could cause our actual results to differ significantly from those contained in any forward-looking statement.

Readers are cautioned not to place undue reliance on any of these forward-looking statements, which reflect our management's views only as of the date of this report. We are under no duty to update any of the forward-looking statements after the date of this report to conform these statements to actual results.

SPECIAL NOTE REGARDING EXHIBITS

In reviewing the agreements included as exhibits to this Annual Report on Form 10-K, please remember they are included to provide you with information regarding their terms and are not intended to provide any other factual or disclosure information about the Company or the other parties to the agreements. The agreements contain representations and warranties by each of the parties to the applicable agreement. These representations and warranties have been made solely for the benefit of the other parties to the applicable agreement and:

- should not in all instances be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate;
- have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;
- may apply standards of materiality in a way that is different from what may be viewed as material to you or other investors; and
- were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

Accordingly, these representations and warranties may not describe the actual state of affairs as of the date they were made or at any other time. Additional information about the Company may be found elsewhere in this Annual Report on Form 10-K and the Company's other public filings, which are available without charge through the SEC's website at <http://www.sec.gov>. See "Business – Corporate Governance and Internet Address; Where Readers Can Find Additional Information."

The Company acknowledges that, notwithstanding the inclusion of the foregoing cautionary statements, it is responsible for considering whether additional specific disclosures of material information regarding material contractual provisions are required to make the statements in this report not misleading.

PART I

ITEM 1. BUSINESS

COMPANY OVERVIEW

We are a publicly traded REIT with a diversified portfolio of primarily private pay senior housing properties located across the United States. We were formed as Newcastle Senior Living Holdings LLC, a Delaware limited liability company and wholly owned subsidiary of Newcastle Investment Corp. (“Newcastle”), on May 17, 2012. We converted to a Delaware corporation on May 30, 2014 and changed our name to New Senior Investment Group Inc. on June 16, 2014. On November 6, 2014, we were spun off from Newcastle with the distribution of all our outstanding shares to the holders of Newcastle common stock.

We have a differentiated strategy of concentrating our investment activities on acquiring private pay senior housing and, as a result, are one of the largest owners of senior housing properties in the United States. Our portfolio at December 31, 2014 was comprised of 100 primarily private pay senior housing properties located across 27 states. We divide our properties into two reportable segments: (1) Managed Properties, which are operated by property managers pursuant to property management agreements and (2) Triple Net Lease Properties, which we lease to tenants through long-term triple net leases. See our Consolidated Financial Statements and the related notes, including “Note 1-Organization,” included in Part II, Item 8 of this Annual Report on Form 10-K.

The majority of our portfolio is managed or leased by some of the largest and most experienced operators in the United States. Currently, our managed properties are managed by affiliates or subsidiaries of either Holiday Acquisitions Holdings LLC (“Holiday”), FHC Property Management LLC (together with its subsidiaries, “Blue Harbor”), or Jerry Erwin Associates, Inc. (“JEA”), and all of our Triple Net Lease properties are leased to an affiliate of Holiday or Life Care Services (“LCS”), a third party. Holiday and LCS are among the top three largest senior housing operators in the United States. The assets in our portfolio are described in more detail below under “Our Portfolio.”

While our investment guidelines are purposefully broad to enable us to make investments in a wide array of assets, we actively explore new business opportunities and asset categories as part of our business strategy. Our investment strategy is focused on acquiring private pay senior housing properties which we believe is unique compared to our publicly traded peers. For more information about our investment guidelines, see “Investment Guidelines” below.

Pursuant to a management agreement (the “Management Agreement”), we are externally managed and advised by FIG LLC (the “Manager”), an affiliate of Fortress Investment Group LLC (“Fortress”), which is a leading global investment management firm with \$67.5 billion of assets under management as of December 31, 2014. Fortress, through the private equity funds managed by its affiliates, is a large investor in the senior housing sector. Private equity funds managed by an affiliate of our Manager currently own a majority of Holiday, and Blue Harbor is an affiliate of our Manager. We intend to leverage Fortress’s nearly 15 years of experience in the senior housing industry to assist us in retaining best-in-class property managers and sourcing and completing attractive acquisitions.

ACQUIRED PROPERTIES

During 2014, we completed \$314.9 million of primarily private pay senior housing acquisitions totaling 16 properties, which were comprised of ten assisted living/memory care (“AL/MC”) properties, four continuing care retirement communities (“CCRC”) and two dedicated independent living (“IL-only”) properties. Ten of these properties were added into our Managed Properties segment and the remaining six were integrated into our Triplet Net Lease Properties segment. The acquisitions included the following:

- In the first quarter of 2014, we acquired two portfolios (one IL-only property and one AL/MC property) for an aggregate purchase price of approximately \$22.8 million and financed the properties with \$17.3 million of non-recourse mortgage notes. Both properties were integrated into our Managed Properties segment and are managed by Holiday.
- During the second quarter, we acquired one portfolio with three AL/MC properties for approximately \$21.7 million, financed with approximately \$15.6 million of non-recourse mortgage notes. These properties were integrated into our Managed Properties segment and are managed by Blue Harbor.
- In the second quarter, we acquired one portfolio with six properties (four CCRC, one IL-only and one AL/MC), collectively the “LCS Portfolio,” for approximately \$183.0 million plus acquisition costs. Subsequent to the acquisition of the LCS Portfolio, we entered into a triple net lease agreement with a third party. The LCS Portfolio triple net lease has a 15-year term with two five-year renewal options and first-year rent equal to approximately \$14.2 million with annual increases during the following three years of 3.75% and up to 2.5% per year thereafter. In October 2014, we entered into a loan

agreement in the total amount of \$115.0 million which carries an interest rate of London Interbank Offered Rate (“LIBOR”) plus 3.25% and has an initial maturity in October 2017. This loan is secured by the LCS Portfolio.

- In the third quarter, we acquired one portfolio with one AL/MC property for \$44.4 million which was financed with \$33.8 million of non-recourse mortgage notes. This property was integrated into our Managed Properties segment and is managed by Blue Harbor.
- In the third quarter, we acquired two portfolios for a total of three AL/MC properties for \$27.3 million which were financed with \$13.5 million of non-recourse mortgage notes. These properties were integrated into our Managed Properties segment and are managed by Blue Harbor.
- In the fourth quarter, we acquired one portfolio with one AL/MC property for \$15.7 million which was financed with cash on hand. This property was integrated into our Managed Properties segment and is managed by JEA.
- Subsequent to December 31, 2014, we consummated the acquisition of a four property portfolio, the “CSL Portfolio,” for total consideration of \$36.3 million. The CSL Portfolio consists of four IL-only properties and will be included in our Managed Properties segment.
- On December 21, 2014, we entered into a Purchase and Sale Agreement with an affiliate of Hawthorn Retirement Group LLC to acquire 17 IL-only properties for approximately \$435.0 million in cash, subject to customary adjustments and proration and less any debt assumed at the closing. The acquisition is subject to various conditions, including the completion of due diligence, and is expected to close in March 2015.

Each of the above acquisitions was accounted for under the acquisition method whereby all assets acquired and liabilities assumed are recognized at their acquisition-date fair value with acquisition-related costs being expensed as incurred.

We continue to explore opportunities to invest in additional senior housing properties across the United States. While we generally target smaller, local and regional portfolios, we may continue to invest in large portfolios that we believe offer attractive risk-adjusted returns.

MARKET OPPORTUNITY

Opportunity to Consolidate Large and Fragmented Industry

We believe there are significant investment opportunities in the U.S. senior housing market driven by three factors: (i) growing demand from significant increases in the senior citizen population and only modest levels of new construction, (ii) highly fragmented ownership of senior housing properties among many smaller local (“mom and pop”) and regional owner/operators and (iii) operational improvement opportunities to increase property-level net operating income leveraging the experience and economies of scale of our Manager. We estimate the size of the senior housing industry in the United States to be approximately \$300 billion, and, according to the 2013 American Seniors Housing Association 50 Report, approximately 66% of these senior housing facilities are owned by mom and pop operators with 15 or fewer properties. Given our strong track record of external growth, we believe an opportunity exists to continue to participate in the consolidation of this fragmented industry as many of these smaller owner/operators may decide to sell their portfolios. An attractive investment opportunity exists to acquire high quality properties where operational performance can be improved by leveraging the experience of our Manager. While the acquisition environment is more competitive, we believe these properties are still too small to attract many larger REIT and other institutional investors, affording us the opportunity to acquire properties at attractive prices in a less competitive environment than larger portfolios. We expect to structure these investments as either triple net leases or managed properties by entering into a management agreement with a REIT Investment Diversification and Empowerment Act of 2007 (“RIDEA”) compliant structure allowing us to participate directly in the cash flows of the facilities.

Attractive Demand - Supply Fundamentals to Drive Organic Growth

We believe that the rapidly growing senior citizen population in the U.S. will result in a substantially increased demand for senior housing properties as the baby boomer generation ages, life expectancies lengthen and more health-related services are demanded. The U.S. Census Bureau estimates that the total number of Americans aged 65 and older is expected to increase from approximately 47.7 million in 2015 to 77.3 million by 2035, with the number of citizens aged 65 and older expected to grow at four times the rate of the overall population by 2035. Healthcare is the largest private-sector industry in the U.S., with healthcare expenditures in the U.S. accounting for approximately 17% of gross domestic product in December 2013. According to the Center for Medicare and Medicaid Services (“CMS”), the average annual compounded growth rate for national healthcare expenditures from 2015 through 2022 is expected to be 6.2%. Additionally, senior citizens are the largest consumers

of healthcare services. The target age group for our properties is Americans over 70 years old while a typical resident is 80 to 85 years of age. According to CMS, average per capita healthcare expenditures by those 65 years and older continue to be about three times more than the average spent by those 19 to 64 years old. Demand for senior housing is driven both by growth of an aging population and by an increasing array of services and support required by residents. According to the U.S. Census Bureau, the percentage of Americans between ages 75 and 79 seeking assistance with basic and instrumental activities of daily living is 15%, increasing to 30% for Americans over 80 years of age. According to the Alzheimer's Association, over one-third of individuals over age 85 have Alzheimer's disease. To address these resident needs, senior housing provides varying and flexible levels of services. While our target population is growing, the rate of supply growth of new senior housing facilities remains modest. During the recent recession, according to the National Investment Center for Seniors Housing and Care ("NIC"), senior housing units under construction declined significantly beginning in 2008. While construction has increased in recent years, the pace of construction of new units continues to be modest.

Differentiated Strategy Focused on Private Pay Senior Housing

We generally seek investments in senior housing facilities that have an emphasis on private pay sources of revenue which is considered more stable and predictable compared to government reimbursed property types and believe this strategy is more focused than many of our publicly traded peers. Private pay residents are individuals who are personally obligated to pay the costs of their housing and services without relying significantly on reimbursement payments from Medicaid or Medicare. Sources for these private payments include: (i) pensions, savings and retirement funds; (ii) proceeds from the sale of real estate and personal property; (iii) assistance from residents' families; and (iv) private insurance. While our investments may have some level of revenues related to government reimbursements, we focus on investments with high levels of private pay revenue and, for the year ended December 31, 2014, private pay sources represented 98% of the property level revenue from the residents at our facilities. Private pay facilities are not subject to governmental rate setting and, accordingly, we believe they provide for more predictable and higher rental rates from residents than facilities primarily reliant on government-funded sources.

The senior housing industry offers a full continuum of care to seniors with product types that range from "mostly housing" (i.e., senior apartments) to "mostly healthcare" (i.e., skilled nursing, hospitals, etc.). We primarily focus on product types at the center of this continuum, namely IL-only properties and AL/MC properties. Many of our peers have significant exposure to skilled nursing facilities and hospitals providing higher acuity levels of healthcare. Accordingly, these peers have higher levels of exposure to revenues derived from Medicaid and Medicare reimbursements. Our facilities are predominantly reliant on private pay sources of revenue and have limited risk exposure to regulatory changes in the healthcare arena. We believe that our focused portfolio of primarily IL-only and AL/MC properties will allow investors to participate in the positive fundamentals of the senior housing sector without similar levels of risk exposure associated with higher acuity types of healthcare real estate.

Attractive Portfolio Diversified by Product Type, Operating Model and Geography

Since we started building this platform in July 2012, we have invested \$1.8 billion to acquire 100 senior housing properties through December 31, 2014. Our portfolio is diversified in terms of product type, operating model and geography. At December 31, 2014, we have 56 IL-only properties, 40 AL/MC properties and four CCRC properties across 27 states. Our portfolio provides an attractive mix of triple net lease and managed properties. At December 31, 2014, our triple net lease portfolio totals 57 properties (52 IL-only properties, one AL/MC property and four CCRC properties), and our managed properties portfolio totals 43 properties (four IL-only properties and 39 AL/MC properties).

Manager Expertise Owning and Operating Senior Housing

We are externally managed and advised by an affiliate of Fortress, a large investor with nearly 15 years of experience in the senior housing sector. Our Manager and its affiliates have a far-reaching presence in consumer-facing industries across the United States through Fortress's investments in healthcare, leisure, gaming, real estate and transportation companies. Private equity funds managed by an affiliate of our Manager currently own a majority of Holiday, the largest independent living operator in the United States with over 300 properties in 43 states, and Blue Harbor is an affiliate of our Manager. Due to this presence, we believe we are able to achieve volume discounts for services and products at many of our properties, such as insurance and food and beverage. These types of benefits often allow us to be a more competitive bidder for small- and mid-sized managed properties than other potential buyers. Furthermore, we intend to leverage our Manager's deep experience and industry relationships to provide us with growth opportunities for the Company.

Tax Efficient REIT Status

We have elected to be treated as a REIT, and we intend to operate in conformity with the requirements for qualification and taxation as a REIT. Our REIT status provides us with certain tax advantages compared to some of our competitors. Those advantages include an ability to reduce our corporate-level income taxes by making dividend distributions to our stockholders and an ability to pass our capital gains through to our stockholders in the form of capital gains dividends. We believe our REIT status provides us with a significant advantage as compared to other companies or industry participants who do not have a similar tax efficient structure.

SENIOR HOUSING INDUSTRY

Overview

For an overview of the senior housing industry, see “Opportunity to Consolidate Large and Fragmented Industry” and “Attractive Demand - Supply Fundamentals to Drive Organic Growth.”

Government Regulations

AL/MC properties and operations are subject to extensive and complex federal, state and local healthcare laws and regulations relating to fraud and abuse practices, government reimbursement, licensure and certificate of need (“CON”) and similar laws governing the operation of healthcare properties. While the AL/MC properties within our portfolio are subject to many varying types of regulatory and licensing requirements, we expect that the healthcare industry, in general, will continue to face increased regulation, enforcement and pressure in the areas of fraud, waste and abuse, cost control, healthcare management and provision of services, among others. In fact, some states have revised and strengthened their regulation of senior housing properties and, that trend may continue. In addition, efforts by third-party payors, such as Governmental Programs (as defined below) and private insurance payor organizations (which include insurance companies, health maintenance organizations and other types of health plans/managed care organizations) to impose more stringent controls upon operators are expected to intensify and continue. Changes in applicable federal, state or local laws and regulations and new interpretations of existing laws and regulations could have a material adverse effect on our business.

As used in this section, “Governmental Program” means, individually and collectively, any federal, state or local governmental reimbursement programs administered through a governmental body, agency thereof or contractor thereof (including a Governmental Program Payor) including, without limitation, the Medicare and Medicaid programs or successor programs to any of the aforementioned programs. “Governmental Program Payor” means a private insurance payor organization which has a contract with a Governmental Program to arrange for the provision of assisted living property or skilled nursing facility (“SNF”) services to Governmental Program beneficiaries and which receives reimbursement from the Governmental Program to do so.

Our AL/MC senior housing properties are regulated by state and local laws governing licensure, provision of services, staffing requirements and other operational matters. The laws that govern our properties vary greatly from one jurisdiction to another. Owners and/or operators of certain senior housing properties, including, but not limited to, AL/MC properties, are required to be licensed or certified by the state in which they operate. In granting and renewing such licenses, the state regulatory agencies consider numerous factors relating to a property’s physical plant and operations, including, but not limited to, admission and discharge standards, staffing and training. A decision to grant or renew a license may also be affected by a property’s record with respect to licensure compliance, patient and consumer rights, medication guidelines and other regulations. Certain states require additional licensure and impose additional staffing and other operational standards in order for a property to provide higher levels of assisted living services. Senior housing properties may also be subject to state and/or local building, zoning, fire and food service laws before licensing or certification may be granted. Our properties may also be affected by changes in accreditation standards or procedures of accreditation bodies that are recognized by states or a Governmental Program in the licensure or certification process.

In the future, we may also acquire senior housing properties that include SNFs. SNFs are licensed by the state in which the facility is located, and, if an owner chooses to participate in Medicaid, Medicare or certain other Governmental Programs, the facility must also be certified to participate in such programs. In that regard, SNFs are particularly subject to myriad, comprehensive federal Medicare and Medicaid certification requirements that not only require state licensure but also separately (apart from state licensure) regulate the type and quality of the medical and/or nursing care provided, ancillary services (e.g., respiratory, occupational, physical and infusion therapies), qualifications of the administrative personnel and nursing staff, the adequacy of the physical plant and equipment, reimbursement and rate setting and other operational issues and policies.

In the future, we may also acquire certain healthcare properties (including assisted living properties in some states and SNFs in most states) that are subject to a variety of CON or similar laws. None of our properties are currently subject to such laws. Where applicable, such laws generally require, among other requirements, as a predicate to licensure that a facility demonstrate the need for (i) constructing a new facility, (ii) adding beds or expanding an existing facility, (iii) investing in major capital equipment or adding new services, (iv) changing the ownership or control of an existing licensed facility, or (v) terminating services that have been previously approved through the CON process. These laws could affect, and even restrict, our ability to expand into new markets and to expand our properties and services in existing markets. In addition, CON laws may constrain the ability of an operator to transfer responsibility for operating a particular facility to a new operator. If we have to replace a facility operator who is excluded from participating in a federal or state healthcare program (as discussed below), our ability to replace the operator may be affected by a particular state's CON laws, regulations and applicable guidance governing changes in provider control.

Aside from CON considerations, transfers of ownership, provider control and/or operations of assisted living properties and SNFs are subject to licensure and other regulatory approvals not required for transfers of other types of commercial operations and real estate. These regulations may also constrain or even impede our ability to replace property managers or tenants of our properties, and they may also impact our acquisition or sale of senior housing properties. In addition, if any of our licensed properties operate outside of its licensed authority, doing so could subject the facility to penalties, including closure of the facility. Failure to obtain licensure or loss or suspension of licensure or certification may prevent an assisted living property or SNF from operating or result in a suspension of Governmental Program reimbursement payment until all licensure or certification issues have been resolved.

A significant portion of the revenues received by our properties are from self-pay residents. The remaining revenue source is primarily Medicaid under certain federal waiver programs. As a part of the Omnibus Budget Reconciliation Act of 1981 ("OBRA"), Congress established a waiver program enabling some states to offer Medicaid reimbursement to assisted living providers as an alternative to institutional long-term care services. The provisions of OBRA and subsequent federal enactments permit states to seek a waiver from typical Medicaid requirements to develop cost-effective alternatives to long-term care, including Medicaid payments for assisted living and, in some instances, including payment for such services through Governmental Program Payors. In 2014, approximately 2% of the revenues at our senior housing properties were from Medicaid reimbursement. There can be no guarantee that a state Medicaid program operating pursuant to a waiver will be able to maintain its waiver status, that funding levels will not decrease or that eligibility requirements will not change.

Rates paid by self-pay residents of properties within our Managed Properties segment are determined in accordance with applicable provisions of the management agreements entered into with our property managers, and are impacted by local market conditions and operating costs. Rates paid by self-pay residents of properties within our Triple Net Lease Properties segment are determined by the tenant.

The level of assisted living Medicaid reimbursement varies from state to state. Thus, the revenues generated by our assisted living properties may be adversely affected by payor mix, acuity level, changes in Medicaid eligibility and reimbursement levels. In addition, a state could lose its Medicaid waiver and no longer be permitted to utilize Medicaid dollars to reimburse for assisted living services. Such changes in revenues could in turn have a material adverse effect on our business.

Unlike assisted living operators, SNF operators typically receive most of their revenues from the Medicare and Medicaid programs, with the balance representing reimbursement payments from private insurance payor organizations (and perhaps minimal self-pay). Consequently, changes in federal or state reimbursement policies may also adversely affect our business if we acquire properties with an SNF component.

The percentage of federal Medicaid revenue support used for long-term care varies from state to state, due in part to different ratios of elderly population and eligibility requirements. Within certain federal guidelines, states have a fairly wide range of discretion to determine eligibility and to establish a reimbursement methodology for SNF Medicaid patients. Many states reimburse SNFs pursuant to fixed daily Medicaid rates which are applied prospectively based on patient acuity and the historical costs incurred in providing patient care. Reasonable costs typically include allowances for staffing, administrative and general expenses, property and equipment (e.g., real estate taxes, depreciation and fair rental).

The Medicare SNF benefit covers skilled nursing care, rehabilitation services and other goods and services, and the facility receives a pre-determined daily rate for each day of care, up to 100 days. These prospective payment system ("PPS") rates are expected to cover all operating and capital costs that efficient properties would be expected to incur in furnishing most SNF services, with certain high-cost, low-probability ancillary services paid separately.

There is a risk that some skilled nursing facilities' costs could exceed the fixed payments under the prospective payment system for skilled nursing facilities ("SNF PPS"), and there is also a risk that payments under the SNF PPS may be set below the costs to provide certain items and services, which could have a material adverse effect on an SNF. Further, SNFs are subject to periodic

pre and post-payment reviews and other audits by federal and state authorities. Such a review or audit could result in recoupments, denials, or delay of payments in the future, which could have a material adverse effect on the business of an SNF.

In the ordinary course of business, our AL/MC properties have been and are subject regularly to inspections, inquiries, investigations and audits by state agencies that oversee applicable laws and regulations. State licensure laws and, where applicable, Governmental Program certification, require license renewals and compliance surveys on an annual or bi-annual basis. The failure of our AL/MC property managers to maintain or renew any required license or regulatory approval, as well as the failure of our managers to correct serious deficiencies identified in a compliance survey, could result in the suspension of operations at a property. In addition, if an AL/MC or SNF property, where applicable, is found to be out of compliance with Governmental Program conditions of participation, the property's manager may be excluded from participating in those Governmental Programs. Any such occurrence may impair the ability of a property manager to meet its obligations. If we have to replace a property manager, our ability to do so may be affected by the federal and state regulations governing such changes. This may result in payment delays, an inability to find a replacement property manager or other difficulties. Unannounced surveys or inspections of a property may occur annually or bi-annually or following a regulator's receipt of a complaint regarding the property. From time-to-time, our properties receive deficiency reports from state regulatory bodies resulting from such inspections or surveys. Most deficiencies are resolved through a plan of corrective action relating to the property's operations but, whether the deficiencies are cured or not, the applicable governmental authority typically has the authority to take further action against a licensee. Such an action could result in the imposition of fines, imposition of a provisional or conditional license, suspension or revocation of a license or Governmental Program participation, suspension or denial of admissions or imposition of other sanctions, including criminal penalties. The imposition of such sanctions may adversely affect our business.

Assisted living properties and SNFs that participate in Governmental Programs are subject to numerous federal, state and local laws, including implementing regulations and applicable governmental guidance that govern the operational, financial and other arrangements that may be entered into by healthcare properties and other providers. Certain of these laws prohibit direct or indirect payments of any kind for the purpose of inducing or encouraging the referral of patients for medical products or services reimbursable by Governmental Programs. Other laws require providers to furnish only medically necessary services and submit to the Governmental Program and Governmental Program Payors valid and accurate statements for each service, and other laws require providers to comply with a variety of safety, health and other requirements relating to the condition of the licensed property and the quality of care provided. Sanctions for violations of these laws may include, but are not limited to, criminal and/or civil penalties and fines, loss of licensure, immediate termination of government payments and exclusion from any Governmental Program participation. In certain circumstances, violation of these laws (such as those prohibiting abusive and fraudulent behavior and, in the case of Governmental Program Payors, also prohibiting insurance fraud) with respect to one property may subject other properties under common control or ownership to sanctions, including exclusion from participation in Governmental Programs. In the ordinary course of business, our properties are regularly subjected to inquiries, investigations and audits by the federal and state agencies that oversee these laws.

All healthcare providers, including, but not limited to, assisted living properties and SNFs that participate in Governmental Programs, are also subject to the Federal Anti-Kickback Statute, a criminal statute which generally prohibits persons from offering, providing, soliciting or receiving remuneration to induce either the referral of an individual or the furnishing of a good or service for which payment may be made under a federal Governmental Program. SNFs and certain other types of healthcare properties and providers are also subject to the Federal Ethics in Patient Referral Act of 1989, commonly referred to as the "Stark Law." The Stark Law generally prohibits the submission of claims to Medicare for payment if the claim results from a physician referral for certain designated services and the physician has a financial relationship with the health service provider that does not qualify under one of the exceptions for a financial relationship under the Stark Law. Many states have similar prohibitions on physician self-referrals and submission of claims which are applicable to all payor sources, including state Medicaid programs.

Further, healthcare properties and other providers, including, but not limited to, assisted living properties and SNFs, that receive Governmental Program payments, are subject to substantial financial and other (in some cases, criminal) penalties under the Civil Monetary Penalties Act, the Federal False Claims Act and, in particular, actions under the Federal False Claims Act's "whistleblower" provisions. Violations of these laws can also subject persons and entities to termination from participation in Governmental Programs or result in the imposition of substantial damages, fines or other penalties. Private enforcement of healthcare fraud has increased due in large part to amendments to the Federal False Claims Act that encourage private individuals to sue on behalf of the government. These whistleblower suits brought by private individuals, known as "qui tam actions," may be filed by almost anyone, including present and former patients, nurses and other employees. Significantly, if a claim is successfully adjudicated, the Federal False Claims Act provides for treble damages in addition to penalties up to \$11,000 per claim. Various state false claim act and anti-kickback laws may also apply to each property operator, regardless of payor source (i.e., such as a private insurance payor organization or a Governmental Program), and violations of those state laws can also result in substantial fines and/or adverse licensure actions to our material detriment.

Government investigations and enforcement actions brought against the healthcare industry have increased dramatically over the past several years and are expected to continue. Some of these enforcement actions represent novel legal theories and expansions in the application of the Federal False Claims Act. Governmental agencies, both state and federal, are also devoting increasing attention and resources to anti-fraud initiatives against healthcare properties and other providers. Legislative developments, including changes to federal Health Insurance Portability and Accountability Act of 1996 (“HIPAA”), have greatly expanded the definition of healthcare fraud and related offenses and broadened its scope to include certain private insurance payor organizations in addition to Governmental Programs. Congress also has greatly increased funding for the Department of Justice, Federal Bureau of Investigation and the Office of the Inspector General of the Department of Health and Human Services (“HHS”) to audit, investigate and prosecute suspected healthcare fraud. Moreover, a significant portion of the billions in healthcare fraud recoveries over the past several years has also been returned to government agencies to further fund their fraud investigation and prosecution efforts.

HIPAA regulations provide for communication of health information through standard electronic transaction formats and for the privacy and security of health information. In order to comply with the regulations, healthcare providers often must undertake significant operational and technical implementation efforts. Operators also may face significant financial exposure if they fail to maintain the privacy and security of medical records and other personal health information about individuals. The Health Information Technology for Economic and Clinical Health Act (“HITECH”), passed in February 2009, strengthened the HHS Secretary’s authority to impose civil money penalties for HIPAA violations occurring after February 18, 2009. HITECH directs the HHS Secretary to provide for periodic audits to ensure that covered entities and their business associates (as that term is defined under HIPAA) comply with the applicable HITECH requirements, increasing the likelihood that a HIPAA violation will result in an enforcement action. The CMS issued an interim final rule which conformed HIPAA enforcement regulations to HITECH, increasing the maximum penalty for multiple violations of a single requirement or prohibition to \$1.5 million. Higher penalties may accrue for violations of multiple requirements or prohibitions. Additionally, on January 17, 2013, the CMS released a final rule, which expands the applicability of HIPAA and HITECH and strengthens the government’s ability to enforce these laws. The final rule broadens the definition of “business associate” and provides for civil money penalty liability against covered entities and business associates for the acts of their agents regardless of whether a business associate agreement is in place. Additionally, the final rule adopts certain changes to the HIPAA enforcement regulations to incorporate the increased and tiered civil monetary penalty structure provided by HITECH, and makes business associates of covered entities directly liable under HIPAA for compliance with certain of the HIPAA privacy standards and HIPAA security standards. HIPAA violations are also potentially subject to criminal penalties.

The Patient Protection and Affordable Care Act (the “Affordable Care Act”) and the HealthCare and Education Reconciliation Act of 2010, which amends the Affordable Care Act (collectively, the “Health Reform Laws”), and the June 28, 2012 United States Supreme Court ruling upholding the individual mandate of the Health Reform Laws and partially invalidating the expansion of Medicaid (further discussed below) may have a significant impact on Medicare, Medicaid and other Governmental Programs, as well as private insurance payor organizations, which in turn may impact the reimbursement amounts received by our properties which participate in Governmental Programs. In fact, the Health Reform Laws could have a substantial and material adverse effect on all parties directly or indirectly involved in the healthcare system. Together, the Health Reform Laws make the most sweeping and fundamental changes to the U.S. healthcare system undertaken since the creation of Medicare and Medicaid and contain various provisions that may directly impact our business.

These new Health Reform Laws include, without limitation, the expansion of Medicaid eligibility, requiring most individuals to have health insurance, establishing new regulations on certain private insurance payor organizations (including Governmental Program Payors), establishing health insurance exchanges and modifying certain payment systems to encourage more cost-effective care and a reduction of inefficiencies and waste, including through new tools to address fraud and abuse. Because many of our properties deliver healthcare services, we will be impacted by the risks associated with the healthcare industry, including the Health Reform Laws. While the expansion of healthcare coverage may result in some additional demand for services provided by our properties, reimbursement levels may be lower than the costs required to provide such services, which could materially adversely affect our business. The Health Reform Laws also enhance certain fraud and abuse penalty provisions in the event of one or more violations of the federal healthcare regulatory laws. In addition, the Health Reform Laws have provisions that impact the health coverage that our property managers or tenants provide to their respective employees. We cannot predict whether the existing Health Reform Laws, or future healthcare reform legislation or regulatory changes, will have a material impact on our business.

Additionally, certain provisions of the Health Reform Laws are designed to increase transparency and program integrity of SNFs. Specifically, SNFs will be required to institute compliance and ethics programs. Additionally, the Health Reform Laws make it easier for consumers to file complaints against nursing homes by mandating that states establish complaint websites. The provisions calling for enhanced transparency will increase the administrative burden and costs on SNF providers.

OUR PORTFOLIO

The key characteristics of our high quality senior housing portfolio are set forth in the table below:

(dollars in thousands)			Real Estate Investments ^(A) as of December 31, 2014			Revenues for the Year Ended December 31, 2014		Number of States
Operating Model	Number of Communities	Number of Beds	Real Estate Investments	Percent of Total Real Estate Investment	Real Estate Investment per Bed	Total Revenues ^(B)	Percent of Total Revenues	
Managed Properties	43	5,362	\$ 632,486	34.8%	\$ 118	\$ 156,993	61.6%	17
Triple Net Lease Properties	57	7,074	1,185,058	65.2%	168	97,992	38.4%	24
Total	100	12,436	\$ 1,817,544	100.0%		\$ 254,985	100.0%	27

(dollars in thousands)			Real Estate Investments ^(A) as of December 31, 2013			Revenues for the Year Ended December 31, 2013		Number of States
Operating model	Number of Communities	Number of Beds	Real Estate Investments	Percent of Total Real Estate Investment	Real Estate Investment per Bed	Total Revenues ^(B)	Percent of Total Revenues	
Managed Properties	33	4,453	\$ 496,016	33.1%	\$ 111	\$ 83,218	97.7%	11
Triple Net Lease Properties	51	5,840	1,000,475	66.9%	171	1,918	2.3%	24
Total	84	10,293	\$ 1,496,491	100.0%		\$ 85,136	100.0%	25

(A) Real estate investments represent the carrying value of real estate excluding accumulated depreciation and amortization.

(B) Revenues relate to the period the properties were owned by us in a calendar year and, therefore, are not indicative of full-year results for all properties.

For the years ended December 31, 2014, and December 31, 2013 the average occupancy rate of our managed portfolio was 83.6% and 82.5%, respectively, and the average occupancy rate for our triple net portfolio was 88.8% and 89.1%, respectively.

We classify our properties by asset type and operating model, as described in more detail below.

Product Type

IL-only Properties: As of December 31, 2014, our portfolio includes 56 IL-only properties, of which 52 are Triple Net Lease Properties and four are Managed Properties. IL-only properties are age-restricted, multifamily properties with central dining that provide residents access to meals and other services such as housekeeping, linen service, transportation and social and recreational activities. A typical resident is 80 to 85 years old and is relatively healthy. Residents are typically charged all-inclusive monthly rates.

AL/MC Properties: As of December 31, 2014, our portfolio includes 40 AL/MC properties, of which 39 are Managed Properties and one is a Triple Net Lease Property. AL/MC properties are state-regulated rental properties that provide the same services as IL-only properties and additionally have staff to provide residents assistance with activities of daily living, such as management of medications, bathing, dressing, toileting, ambulating and eating. AL/MC properties may include memory care properties that specifically provide care for individuals with Alzheimer's disease and other forms of dementia or memory loss. The average age of an AL/MC resident is similar to that of an IL-only resident, but AL/MC residents typically have greater healthcare needs. Residents are typically charged all-inclusive monthly rates for IL-only services and additional "care charges" for AL/MC services, which vary depending on the types of services required. AL/MC properties are generally private pay, although many states will allow residents to cover a portion of the cost with Medicaid.

CCRC Properties: As of December 31, 2014, our portfolio includes four CCRC properties, all of which are Triple Net Lease properties. CCRCs are a particular type of retirement community that offers several levels (generally more than three) of health care at one facility or campus, often including independent living, assisted living/memory care and skilled nursing. CCRCs offer a tiered approach to the aging process, accommodating residents' changing needs as they age.

Operating Model

Managed Properties: As of December 31, 2014, our portfolio includes 43 Managed Properties managed by either Blue Harbor, Holiday, or JEA. These properties include four IL-only properties and 39 AL/MC properties and are located across 17 states with 5,362 beds. We enter into long-term property management agreements for our managed properties with Blue Harbor, Holiday and JEA. Blue Harbor and Holiday's property management agreements have initial ten-year terms, with successive, automatic one-year renewal periods. JEA's property management agreement has an initial five-year term, with successive, automatic one-year renewal periods. Under these agreements, we pay monthly property management fees. For AL/MC properties managed by Blue Harbor and Holiday, we pay management fees equal to 6% of effective gross income for the first two years and 7% thereafter. For IL-only properties managed by Blue Harbor and Holiday, we pay management fees equal to 5% of effective gross income. We pay management fees equal to 5% of gross revenues for the property managed by JEA. As the owner of the Managed Properties, we are responsible for the properties' operating costs, including repairs, maintenance, capital expenditures, utilities, taxes, insurance and the payroll expense of property-level employees. The payroll expense, which is included in property operating expense in our Consolidated Statement of Operations, is structured as a reimbursement to the property manager, who is the employer of record. We have various rights as the property owner under our property management agreements, including rights to set budget guidelines and to terminate and exercise remedies under those agreements as provided therein. However, we rely on our property managers' personnel, expertise, technical accounting resources and information systems, proprietary information, good faith and judgment to manage our senior housing operations efficiently and effectively. We also rely on our property managers to otherwise operate our properties in compliance with the terms of the management agreements, although we have various rights as the property owner to terminate and exercise remedies under the management agreements.

Triple Net Lease Properties: As of December 31, 2014, our portfolio includes 57 Triple Net Lease properties. These properties include 52 IL-only properties, four CCRC properties and one AL/MC property and are located across 24 states with 7,074 beds, in aggregate. These properties are leased to the Master Tenants pursuant to the triple net leases. Our triple net lease arrangements have initial terms of 15 and 17 years and include renewal options and periodic rent increases ranging from 2.5% to 4.5% based on changes in consumer price index ("CPI"). Under each triple net master lease, the respective Master Tenant is typically responsible for (i) operating its portion of the portfolio and bearing the related costs, including repairs, maintenance, capital expenditures, utilities, taxes, insurance and the payroll expense of property-level employees, and (ii) complying with the terms of the mortgage financing documents. The obligations of the tenant under the triple net master leases for a portfolio of properties (the "Holiday Portfolios") are guaranteed to us by a subsidiary of Holiday. Both the tenant and the guarantor of the Holiday Portfolios are affiliates of Fortress. The obligations of the tenant under the triple net master leases for the LCS Portfolio, are guaranteed to us by LCS.

Our portfolio of senior housing properties is broadly diversified by geographic location throughout the United States. The following table shows the geographic location of our senior housing properties, and the percentage of total revenues by geographic location for the year ended December 31, 2014.

Location	Managed Properties			Triple Net Lease Properties			Total		
	Number of Communities	Number of Beds	% of Revenue	Number of Communities	Number of Beds	% of Revenue	Number of Communities	Number of Beds	% of Revenue
Arizona	1	108	2.9%	1	115	1.3%	2	223	2.3%

FINANCING STRATEGY

Our capital structure provides us with the resources and flexibility to position us to favorably capitalize on strategic growth opportunities in the senior housing industry through acquisitions, investments and development projects. Our ability to access capital in a timely and cost effective manner is critical to the success of our business strategy because it affects our ability to satisfy existing obligations, including the repayment of maturing indebtedness and to make future investments. Our access to and cost of external capital are dependent on various factors, including general market conditions, interest rates, credit ratings on our securities, expectations of our potential future earnings and cash distributions and the trading price of our common stock.

We employ leverage as part of our investment strategy. We do not have a predetermined target debt to equity ratio as we believe the appropriate leverage for the particular assets we are financing depends on the credit quality of those assets. We utilize leverage for the sole purpose of financing our portfolio and not for the purpose of speculating on changes in interest rates. We strive to maintain our financial strength and invest profitably by actively managing our leverage, continuing to lower our cost of capital and developing our access to multiple sources of liquidity. Historically, we have relied on non-recourse mortgage notes to finance a portion of our real estate investments. We intend, over time, to obtain access to additional sources of liquidity, including revolving credit agreements, bank debt, U.S. government agency financing and the unsecured public debt and equity markets. Generally, we

attempt to match the long-term duration of our investments in senior housing properties with staggered maturities of long-term debt and equity. At December 31, 2014, approximately 31% of our consolidated debt was variable rate debt.

Subject to maintaining our qualification as a REIT, we may, from time to time, utilize derivative financial instruments to manage interest rate risk associated with our borrowings. These derivative instruments may include interest rate swap agreements, interest rate cap agreements, interest rate floor or collar agreements or other financial instruments that we deem appropriate.

INVESTMENT GUIDELINES

Our board of directors has adopted a broad set of investment guidelines to be used by our Manager to evaluate specific investments. Our general investment guidelines prohibit any investment that would cause us to fail to qualify as a REIT. These investment guidelines may be changed by our board of directors without the approval of our stockholders. If our board changes any of our investment guidelines, we will disclose such changes in our next required periodic report.

Management Agreement

In connection with the spin-off from Newcastle, we entered into a Management Agreement with the Manager, an affiliate of Fortress, pursuant to which the Manager provides a management team and other professionals who are responsible for implementing our business strategy, subject to the supervision of our board of directors. Our Manager is responsible for, among other things, (i) setting investment criteria in accordance with broad investment guidelines adopted by our board of directors, (ii) sourcing, analyzing and executing acquisitions, (iii) providing financial and accounting management services and (iv) performing other duties as specified in the Management Agreement.

We pay a management fee equal to 1.5% per annum of our gross equity, which is calculated and payable monthly in arrears in cash. Gross equity is generally the equity invested by Newcastle (including cash contributed to the Company) as of the distribution date, plus the aggregate offering price from stock offerings, plus certain capital contributions to subsidiaries, less capital distributions (calculated without regard to depreciation and amortization) and repurchases of common stock. We pay or reimburse our Manager for performing certain legal, accounting, due diligence tasks and other services that outside professionals or outside consultants otherwise would perform, provided that such costs and reimbursements are no greater than those which would be paid to outside professionals or consultants on an arm's-length basis.

Our Manager is entitled to receive annual incentive compensation, paid quarterly, in an amount equal to the product of (A) 25% of the dollar amount by which (1)(a) funds from operations (as defined in Item 7-"Non GAAP Financial Measures") before the incentive compensation per share of common stock, plus (b) gains (or losses) from sales of property per share of common stock, plus (c) internal and third party acquisition-related expenses, plus (d) un consummated transaction expenses, and plus (e) other non-routine items, exceed (2) an amount equal to (a) the weighted average value per share of the equity invested by Newcastle in the assets of the Company (including cash contributed to the Company) as of the distribution date and the price per share of our common stock in any offerings by us (adjusted for prior capital dividends or capital distributions, which is calculated without regard to depreciation and amortization) multiplied by (b) a simple interest rate of 10% per annum, multiplied by (B) the weighted average number of shares of common stock.

Our Management Agreement has an initial ten-year term and will be automatically renewed for one-year terms thereafter unless terminated either by us or our Manager. Our Manager is also entitled to receive a termination fee from us under certain circumstances. Between November 7, 2014 and December 31, 2014, we incurred \$1.9 million in management fees under the Management Agreement, which includes the management fee to affiliate on the Consolidated Statement of Operations. The Manager earned no incentive compensation during the period from November 7, 2014 to December 31, 2014.

Prior to completion of the spin-off from Newcastle, we were not party to a management agreement with the Manager. However, Newcastle is party to a management agreement with the Manager, and, as a subsidiary of Newcastle, we were allocated a portion of the management fee in the period prior to the spin-off calculated as 1.5% of daily gross equity, as defined in the management agreement between the Manager and Newcastle. In addition, the Manager was entitled to receive incentive compensation, which was subject to certain performance targets and contingent events. Before the spin-off, none of the conditions requiring an incentive payment by Newcastle to the Manager were met and as such, no incentive expense was allocated to us.

POLICIES WITH RESPECT TO CERTAIN OTHER ACTIVITIES

Subject to the approval of our board of directors, we have the authority to offer our common stock or other equity or debt securities in exchange for property and to repurchase or otherwise reacquire our common stock or any other securities and may engage in such activities in the future.

We also may make loans to, or provide guarantees of certain obligations of, our subsidiaries.

Subject to the percentage ownership and gross income and asset tests necessary for REIT qualification, we may invest in securities of other REITs, other entities engaged in real estate activities or securities of other issuers, including for the purpose of exercising control over such entities.

We may engage in the purchase and sale of investments.

Our officers and directors may change any of these policies and our investment guidelines without a vote of our stockholders.

In the event that we determine to raise additional equity capital, our board of directors has the authority, without stockholder approval (subject to certain NYSE requirements), to issue additional common stock or preferred stock in any manner and on such terms and for such consideration it deems appropriate, including in exchange for property.

Decisions regarding the form and other characteristics of the financing for our investments are made by our Manager, subject to the general investment guidelines adopted by our board of directors.

CONFLICTS OF INTEREST

Although we have established certain policies and procedures designed to mitigate conflicts of interest, there can be no assurance that these policies and procedures will be effective in doing so. It is possible that actual, potential or perceived conflicts of interest could give rise to investor dissatisfaction, litigation or regulatory enforcement actions. Below is a summary of certain factors that could result in conflicts of interest.

One or more of our officers and directors have responsibilities and commitments to entities other than us, including, but not limited to, Newcastle. In addition, we do not have a policy that expressly prohibits our directors, officers, security holders or affiliates from engaging for their own account in business activities of the types conducted by us. Moreover, our certificate of incorporation provides that if any of the officers, directors or employees of Newcastle or Fortress acquire knowledge of a potential transaction that could be a corporate opportunity for us, they have no duty, to the fullest extent permitted by law, to offer such corporate opportunity to us. In the event that any of our directors and officers who is also a director, officer or employee of Newcastle or Fortress acquires knowledge of a corporate opportunity or is offered a corporate opportunity, provided that this knowledge was not acquired solely in such person's capacity as a director or officer of us and such person acts in good faith, then such person is deemed to have fully satisfied such person's fiduciary duties owed to us and is not liable to us, to the fullest extent permitted by law, if Newcastle or Fortress or their affiliates, pursues or acquires the corporate opportunity or if such person does not present the corporate opportunity to us. See "Risk Factors-Risks Related to Our Manager-There are conflicts of interest in our relationship with our Manager."

Our key agreements, including the Management Agreement, were negotiated among related parties, and their respective terms, including fees and other amounts payable, may not be as favorable to us as terms negotiated on an arm's-length basis with unaffiliated parties. Our independent directors may not vigorously enforce the provisions of our Management Agreement against our Manager. For example, our independent directors may refrain from terminating our Manager because doing so could result in the loss of key personnel.

The structure of the Manager's compensation arrangement may have unintended consequences for us. We have agreed to pay our Manager a management fee that is not tied to our performance and incentive compensation that is based entirely on our performance. The management fee may not sufficiently incentivize our Manager to generate attractive risk-adjusted returns for us, while the performance-based incentive compensation component may cause our Manager to place undue emphasis on the maximization of earnings, including through the use of leverage, at the expense of other objectives, such as preservation of capital, to achieve higher incentive distributions. Since investments with higher yield potential are generally riskier or more speculative than investments with lower yield potential, this could result in increased risk to the value of our portfolio of assets and your investment in us.

We may compete with entities affiliated with our Manager or Fortress for certain assets that we may seek to acquire. From time to time, affiliates of Fortress may focus on investments in assets with a similar profile as our target assets. These affiliates may have meaningful purchasing capacity, which may change over time depending upon a variety of factors, including, but not limited

to, available equity capital and debt financing, market conditions and cash on hand. Fortress has two funds that were primarily focused on investing in senior housing properties with approximately \$1.6 billion in capital commitments in aggregate, as well as other funds with significant investments in senior housing. All of these Fortress funds are outside their respective investment periods (including one that is in liquidation), although one of these funds has approximately \$120.0 million in unfunded commitments that may be drawn for follow-on investments. Fortress funds generally have a fee structure similar to the structure of the fees in our Management Agreement, but the fees actually paid will vary depending on the size, terms and performance of each fund.

Our Manager may determine, in its discretion, to make a particular investment through an investment vehicle other than us. Investment allocation decisions will reflect a variety of factors, such as a particular vehicle's availability of capital (including financing), investment objectives and concentration limits, legal, regulatory, tax and other similar considerations, the source of the investment opportunity and other factors that the Manager, in its discretion, deems appropriate. Our Manager does not have an obligation to offer us the opportunity to participate in any particular investment, even if it meets our investment objectives.

OPERATIONAL AND REGULATORY STRUCTURE

REIT Qualification

We have been operating so as to qualify as a REIT for U.S. federal income tax purposes for our initial taxable year ending December 31, 2014. Our qualification as a REIT depends upon our ability to meet, on a continuing basis, various complex requirements under the Internal Revenue Code ("Code"), relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels to our stockholders and the concentration of ownership of our capital stock. We believe that, commencing with our initial taxable year ending December 31, 2014, we have been organized in conformity with the requirements for qualification and taxation as a REIT under the Code and that our intended manner of operation will enable us to meet the requirements for qualification and taxation as a REIT. In connection with the spin-off, we received an opinion of Skadden, Arps, Slate, Meagher & Flom LLP to the effect that we have been organized in conformity with the requirements for qualification and taxation as a REIT under the Code and that our proposed method of operation will enable us to meet the requirements for qualification and taxation as a REIT.

COMPETITION

Our success depends, in large part, on our ability to acquire senior housing properties on terms consistent with our business and economic model. In acquiring these assets, we expect to compete with other REIT's, real estate partnerships, private equity and hedge fund investors, banks, insurance companies, finance and investment companies, government-sponsored agencies, healthcare operators, developers and other investors. Many of our anticipated competitors are significantly larger than we are, have access to greater capital and other resources and may have other advantages over us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could lead them to offer higher prices for assets that we might be interested in acquiring and cause us to lose bids for those assets. In addition, other potential purchasers of senior housing properties may be more attractive to sellers of senior housing properties if the sellers believe that these potential purchasers could obtain any necessary third party approvals and consents more easily than us.

Our property managers and tenants compete on a local and regional basis with operators of properties that provide comparable services. Operators compete for residents based on a number of factors including quality of care, reputation, physical appearance of properties, location, services offered, family preferences, staff and price. We also face competition from other healthcare facilities for tenants, such as physicians and other healthcare providers that provide comparable properties and services.

In the face of this competition, we expect to take advantage of the experience of members of our management team and their industry expertise, which may provide us with a competitive advantage and help us assess potential risks and determine appropriate pricing for certain potential acquisitions of senior housing properties. In addition, we expect that these relationships will enable us to compete more effectively for attractive acquisition opportunities. However, we may not be able to achieve our business goals or expectations due to the competitive risks that we face.

EMPLOYEES

Pursuant to the Management Agreement, all of our officers are employees of our Manager or an affiliate of our Manager. We do not have any employees.

ITEM 1A. RISK FACTORS

You should carefully consider the following risks and other information in this Form 10-K in evaluating us and our common stock. Any of the following risks, as well as additional risks and uncertainties not currently known to us or that we currently deem immaterial, could materially and adversely affect our results of operations or financial condition. The risk factors generally have been separated into the following groups: risks related to our business, risks related to our Manager, risks related to our taxation as a REIT and risks related to our common stock. However, these categories do overlap and should not be considered exclusive.

RISKS RELATED TO OUR BUSINESS

We have limited operating history as a standalone public company and may not be able to successfully operate our business strategy or generate sufficient revenue to make or sustain distributions to our stockholders.

We have limited experience operating as a standalone public company and cannot assure you that we will be able to successfully operate our business or implement our operating policies and strategies as described in this Form 10-K. Furthermore, we were formed in 2012 and have a limited operating history. We completed our first investment in senior housing properties in July 2012. The timing, terms, price and form of consideration that we pay in future transactions may vary meaningfully from prior transactions.

There can be no assurance that we will be able to generate sufficient returns to pay our operating expenses and make satisfactory distributions to our stockholders, or any distributions at all. Our results of operations and our ability to make or sustain distributions to our stockholders depend on several factors, including the availability of opportunities to acquire attractive assets, the level and volatility of interest rates, the availability of adequate short- and long-term financing, fluctuations in occupancy, Medicaid reimbursement, if applicable, and private pay rates; economic conditions; competition; federal, state, local and industry-regulated licensure, certification and inspection laws, regulations and standards; the availability and increases in cost of general and professional liability insurance coverage; state regulation and rights of residents related to entrance fees; and the availability and increases in the cost of labor (as a result of unionization or otherwise).

The financial information included in this Form 10-K may not be indicative of the results we would have achieved as a separate standalone company and are not a reliable indicator of our future performance or results.

We did not operate as a separate, standalone company for the entirety of the historical periods presented in the financial information included in this Form 10-K, which has been derived from Newcastle's historical financial statements. Therefore, the financial information in this Form 10-K does not necessarily reflect what our financial condition, results of operations or cash flows would have been had we been a separate, stand-alone public company prior to our spin-off from Newcastle. This is primarily a result of the following factors:

- the financial results in this Form 10-K do not reflect all of the expenses we will incur as a public company;
- the working capital requirements and capital for general corporate purposes for our assets were satisfied prior to the spin-off as part of Newcastle's corporate-wide cash management policies. Newcastle is not required, and does not intend, to provide us with funds to finance our working capital or other cash requirements, so we may need to obtain additional financing from banks, through public offerings or private placements of debt or equity securities, strategic relationships or other arrangements; and
- our cost structure, management, financing and business operations are significantly different as a result of operating as an independent public company. These changes result in increased costs, including, but not limited to, fees paid to our Manager, legal, accounting, compliance and other costs associated with being a public company with equity securities traded on the NYSE.

Our determination of how much leverage to apply to our investments may adversely affect our return on our investments and may reduce cash available for distribution.

We may leverage our assets through a variety of borrowings. Our investment guidelines do not limit the amount of leverage we may incur with respect to any specific senior housing property or pool of properties. The return we are able to earn on our investments and cash available for distribution to our stockholders may be significantly reduced due to changes in market conditions, which may cause the cost of our financing to increase relative to the income that can be derived from our assets.

The income from any senior housing properties is dependent on the ability of the property managers of such properties to successfully manage these properties.

Subject to maintaining our qualification as a REIT, we intend to continue to purchase senior housing properties and engage other parties (including affiliates of our Manager) to manage the operations or lease the properties. The income we recognize from any senior housing properties that we engage other parties to manage would be dependent on the ability of the property manager(s) of such properties to successfully manage these properties. The property manager(s) would compete with other companies on a number of different levels, including: the quality of care provided, reputation, the physical appearance of a property, price and range of services offered, alternatives for healthcare delivery, the supply of competing properties, physicians, staff, referral sources, location, the size and demographics of the population in surrounding areas and the financial condition of tenants and managers. A property manager's inability to successfully compete with other companies on one or more of the foregoing levels could adversely affect the senior housing property and materially reduce the income we receive from an investment in such property.

Our inability to obtain financing on favorable terms, if at all, may impede our ability to grow.

We may not be able to fund all future capital needs from cash retained from operations. If we are unable to obtain enough internal capital, we may need to rely on external sources of capital (including debt and equity financing) to fulfill our capital requirements. If we cannot access these external sources of capital, we may not be able to make the investments needed to grow our business. Our ability to obtain financing depends upon a number of factors, some of which we have little or no control over, including but not limited to:

- general availability of credit and market conditions, including rising interest rates and increasing borrowing cost;
- the market price of the shares of our equity securities and the credit ratings of our debt and preferred securities;
- the market's perception of our growth potential and our current and potential future earnings and cash distributions;
- our degree of financial leverage and operational flexibility;
- the financing integrity of our lenders, which might impair their ability to meet their commitments to us or their willingness to make additional loans to us, and our inability to replace the financing commitment of any such lender on favorable terms, or at all;
- the stability in the market value of our properties;
- the financial performance and general market perception of our property managers and tenants (including the Master Tenants);
- changes in the credit ratings on United States government debt securities or default or delay in payment by the United States of its obligations; and
- issues facing the healthcare industry, including, but not limited to, healthcare reform and changes in government reimbursement policies.

If our access to financing is limited by these factors or other factors, it could impede our ability to grow and have a material adverse impact on our ability to fund operations, refinance our debt obligations, fund dividend payments, acquire properties and undertake development activities.

Our returns from our managed properties depend on the ability of our managers to continue to maintain or improve occupancy levels.

Any senior housing property in which we invest may have relatively flat or declining occupancy levels due to falling home prices, declining incomes, stagnant home sales, competition from other senior housing developments and a variety of other factors. In addition, the senior housing sector may continue to experience a decline in occupancy due to the weak economy and the associated decision of certain residents to vacate a property and instead be cared for at home. Occupancy levels may also decline due to seasonal contagious illnesses such as influenza. A material decline in occupancy levels and revenues may make it more difficult for the manager of any senior housing property in which we invest to successfully generate income for us. Alternatively, to avoid a decline in occupancy, a manager may reduce the rates charged, which would also reduce our revenues and therefore negatively impact the ability to generate income.

We are not permitted to operate our properties, and we are dependent on the property managers and tenants (including the Master Tenants) of our properties.

We are not permitted to operate our AL/MC properties, and we are dependent on the property managers of our AL/MC properties and on the tenants of our Triple Net Lease Properties.

Because U.S. federal income tax laws generally restrict REITs and their subsidiaries from operating healthcare properties, we do not manage our AL/MC senior housing properties. Instead, AL/MC investments are structured to be RIDEA compliant.

The RIDEA structure permits a REIT to lease properties to a Taxable REIT Subsidiary (“TRS”) if the TRS hires an “eligible independent contractor” (“EIK”) to manage the property. Under this structure, the REIT leases healthcare properties to the TRS and receives rent while the TRS earns income from the properties’ operations, and pays a management fee to the EIK and rent to the REIT property owner.

Accordingly, our TRS has retained Holiday, Blue Harbor and JEA to manage properties owned by us. Although we have various rights pursuant to our property management agreements, we rely upon our property managers’ personnel, expertise, technical resources and information systems, proprietary information, good faith and judgment to manage our senior housing operations efficiently and effectively. We also rely on our property managers to provide accurate property-level financial results for our properties in a timely manner and to otherwise operate our properties in compliance with the terms of our property management agreements and all applicable laws and regulations. We rely on Holiday, Blue Harbor and JEA to attract and retain skilled management personnel and property level personnel who are responsible for the day-to-day operations of our properties. Increases in labor costs and other property operating expense, or significant changes in Holiday’s, Blue Harbor’s or JEA’s ability to manage our properties efficiently and effectively, could adversely affect the income we receive from our properties and have a material adverse effect on us. As managers, our property managers do not lease our properties, and, therefore, we are not directly exposed to their credit risk in the same manner or to the same extent as our triple net tenants. However, any adverse developments in Holiday’s, Blue Harbor’s or JEA’s business and affairs or financial condition could impair its ability to manage our properties efficiently and effectively and could have a material adverse effect on us.

While we monitor our property managers’ performance, we have limited recourse under our property management agreements if we believe that the property managers are not performing adequately. In addition, our property managers may manage, own or invest in, properties that compete with our properties, which may result in conflicts of interest. As a result, our property managers may make decisions regarding competing properties that are not in our best interests.

The triple net lease structure also provides us with a REIT-eligible structure for owning senior housing properties. The triple net lease structure permits a REIT to lease properties to an operator and collect rent from the operator. Unlike the RIDEA structure, the triple net lease structure subjects us to credit risk from the tenant. We depend on our tenants to pay all insurance, taxes, utilities and maintenance and repair expenses in connection with the leased properties. Our Master Tenants may not have sufficient assets, income and access to financing to enable them to make rental payments to us or to otherwise satisfy their respective obligations under our leases, and any inability or unwillingness by them to do so could have a material adverse effect on us. In addition, any failure by a Master Tenant to effectively conduct its operations or to maintain and improve our properties could adversely affect its business reputation and its ability to attract and retain residents in our properties, which could have a material adverse effect on us. Our Master Tenants have also agreed to indemnify, defend and hold us harmless from and against various claims, litigation and liabilities arising in connection with their respective businesses, and we cannot assure you that they will have sufficient assets, income, access to financing and insurance coverage to enable them to satisfy their respective indemnification obligations.

Increases in labor costs at our senior housing properties may have a material adverse effect on us.

Wages and employee benefits represent a significant part of the expenses of any senior housing property. In connection with our RIDEA AL/MC properties and in connection with our IL-only properties that are managed by our property managers, we rely on our property managers to attract and retain skilled management personnel and property level personnel who are responsible for the day-to-day operations of our properties.

The market for qualified nurses and healthcare professionals is highly competitive. Periodic and geographic area shortages of nurses or other trained personnel may require our property managers to increase the wages and benefits offered to their employees in order to attract and retain these personnel or to hire more expensive temporary personnel. Also, our property managers may have to compete with numerous other employers for lesser skilled workers.

As we acquire additional properties, we may be required to pay increased compensation or offer other incentives to retain key personnel and other employees at our managed properties. Employee benefits costs, including employee health insurance and workers’ compensation insurance costs, have materially increased in recent years. Increasing employee health and workers’

compensation insurance costs may materially and negatively affect our earnings at our senior housing properties. We cannot assure you that labor costs at our senior housing properties will not increase or that any increase will be matched by corresponding increases in rates charged to residents. Any significant failure by our property managers to control labor costs or to pass on any such increased labor costs to residents through rate increases could have a material adverse effect on our business, financial condition and results of operations. In addition, if our tenants fail to attract and retain qualified personnel, their ability to satisfy their obligations to us could be impaired.

Termination of assisted living resident agreements and resident attrition could adversely affect our revenues and earnings.

State regulations governing assisted living properties typically require a written agreement with each resident. Most of these regulations also require that each resident have the right to terminate these assisted living resident agreements for any reason on reasonable notice. Consistent with these regulations, most resident agreements at our senior housing properties allow residents to terminate their agreements on 30 days' notice. Thus, our property managers may be unable to contract with assisted living residents to stay for longer periods of time, unlike typical apartment leasing arrangements that involve lease agreements with terms of up to a year or longer. If a large number of residents elected to terminate their resident agreements at or around the same time, our revenues and earnings from our assisted living properties could be materially and adversely affected. In addition, the advanced ages of the residents at our senior housing properties make the resident turnover rate in these properties difficult to predict.

We do not know if our tenants will renew their leases, and if they do not, we may be unable to lease the properties on as favorable terms, or at all.

We cannot predict whether our tenants (including the Master Tenants) will renew their leases at the end of their lease terms, which expire at various times. If these leases are not renewed, we would be required to find other tenants to occupy those properties or sell them. There can be no assurance that we would be able to identify suitable replacement tenants or enter into leases with new tenants on terms as favorable to us as the current leases or that we would be able to lease those properties at all.

Our Operators may be faced with significant potential litigation and rising insurance costs that not only affect their ability to obtain and maintain adequate liability and other insurance, but also may affect, in the case of our triple net lease properties, their ability to pay their lease payments and generally to fulfill their insurance and indemnification obligations to us.

In some states, advocacy groups monitor the quality of care at assisted and independent living communities, and these groups have brought litigation against operators. Also, in several instances, private litigation by assisted and independent living community residents or their families have succeeded in winning very large damage awards for alleged neglect. The effect of this litigation and potential litigation has been to materially increase the costs of monitoring and reporting quality of care compliance. The cost of liability and medical malpractice insurance has increased and may continue to increase so long as the present litigation environment in many parts of the United States continues. This may affect the ability of some of our property managers and tenants to obtain and maintain adequate liability and other insurance and manage their related risk exposures. In addition to causing some of our property managers and tenants to be unable to fulfill their insurance, indemnification and other obligations to us under their property management agreements or leases and thereby potentially exposing us to those risks, these litigation risks and costs could cause some of our tenants to become unable to pay rents due to us. Such nonpayment could potentially affect our ability to meet future monetary obligations under our financing arrangements.

The failure of our Operators to comply with laws relating to the operation of our properties may have a material adverse effect on the ability of our tenants to pay us rent, the profitability of our managed properties and the values of our properties.

We and our Operators are subject to or impacted by extensive, frequently changing federal, state and local laws and regulations. Some of these laws and regulations include: state and local licensure laws; laws protecting consumers against deceptive practices; laws relating to the operation of our properties and how our property managers and tenants conduct their operations, such as fire, health and safety laws and privacy laws; federal and state laws affecting communities that participate in Medicare and Medicaid; the Americans with Disabilities Act and similar state and local laws; and safety and health standards set by the Occupational Safety and Health Administration. We and our property managers and tenants expend significant resources to maintain compliance with these laws and regulations, and responding to any allegations of noncompliance also results in the expenditure of significant resources. If we or our Operators fail to comply with any applicable legal requirements, or are unable to cure deficiencies, certain sanctions may be imposed and, if imposed, may adversely affect our tenants' ability to pay their rent, the profitability of our managed properties and the values of our properties. Further, changes in the regulatory framework could have a material adverse effect on the ability of our tenants to pay us rent (and any such nonpayment could potentially affect our ability to meet future monetary obligations under our financing arrangements), the profitability of and the values of our properties.

We and our Operators are required to comply with federal and state laws governing the privacy, security, use and disclosure of individually identifiable information, including financial information and protected health information. Under HIPAA, we and our Operators are required to comply with the HIPAA privacy rule, security standards and standards for electronic healthcare transactions. State laws also govern the privacy of individual health information, and these laws are, in some jurisdictions, more stringent than HIPAA. Other federal and state laws govern the privacy of individually identifiable information. If we or our Operators fail to comply with applicable federal or state standards, we or they could be subject to civil sanctions and criminal penalties, which could materially and adversely affect our business, financial condition and results of operations.

Our properties and their operations are subject to extensive regulations.

Various governmental authorities mandate certain physical characteristics of senior housing properties. Changes in laws and regulations relating to these matters may require significant expenditures. Our property management agreements and triple net leases generally require our Operators to maintain our properties in compliance with applicable laws and regulations, and we expend resources to monitor their compliance. However, our Operators may neglect maintenance of our properties if they suffer financial distress. In the case of our triple net lease properties, we may agree to fund capital expenditures in return for rent increases or other concessions. Our available financial resources or those of our tenants may be insufficient to fund the expenditures required to operate our properties in accordance with applicable laws and regulations. If we fund these expenditures, our tenants' financial resources may be insufficient to satisfy their increased rental payments to us or other incremental obligations.

Licensing, Medicare and Medicaid laws may also require some or all of our Operators to comply with extensive standards governing their operations. In addition, certain laws prohibit fraud by senior housing operators and other healthcare communities, including civil and criminal laws that prohibit false claims in Medicare, Medicaid and other programs that regulate patient referrals. In recent years, the federal and state governments have devoted increasing resources to monitoring the quality of care at senior housing communities and to anti-fraud investigations in healthcare operations generally. When violations of applicable laws are identified, federal or state authorities may impose civil monetary damages, treble damages, repayment requirements and criminal sanctions. Healthcare communities may also be subject to license revocation or conditional licensure and exclusion from or conditional Medicare or Medicaid participation. When quality of care deficiencies or improper billing are identified, various laws may authorize civil money penalties or fines; the suspension, modification or revocation of a license or Medicare or Medicaid participation; the suspension or denial of admissions of residents; the denial of payments in full or in part; the implementation of state oversight, temporary management or receivership; and the imposition of criminal penalties. We, our property managers and our tenants may receive notices of potential sanctions from time to time, and governmental authorities may impose such sanctions from time to time on our properties. If our property managers and tenants are unable to cure deficiencies which have been identified or which are identified in the future, these sanctions may be imposed and, if imposed, may adversely affect our tenants' ability to pay rents to us (and any such nonpayment could potentially affect our ability to meet future monetary obligations under our financing arrangements), and our ability to identify substitute property managers or tenants. Federal and state requirements for change in control of healthcare communities, including, as applicable, approvals of the proposed operator for licensure, CON, Medicare and Medicaid participation, may also limit or delay our ability to find substitute tenants or property managers. If any of our property managers or tenants becomes unable to operate our properties, or if any of our tenants becomes unable to pay its rent because it has violated government regulations or payment laws, we may experience difficulty in finding a substitute tenant or property manager or selling the affected property for a fair and commercially reasonable price, and the value of an affected property may decline materially.

Changes in reimbursement rates, payment rates or methods of payment from government and other third-party payors, including Medicaid and Medicare, could have a material adverse effect on us and our operators.

Certain of our Operators rely on reimbursement from third-party payors, including the Medicare and Medicaid programs. Medicare and Medicaid programs, as well as numerous private insurance and managed care plans, generally require participating providers to accept government-determined reimbursement levels as payment in full for services rendered, without regard to the facility's charges. Changes in the reimbursement rate or methods of payment from third-party payors, including Medicare and Medicaid, or the implementation of other measures to reduce reimbursements for services provided by our property managers or our tenants, could result in a substantial reduction in our and our tenant's revenues. In addition, the implementation of the Resource Utilization Group, Version Four, or "RUG-IV", which revises the payment classification system for skilled nursing facilities, may impact our tenants by revising the classifications of certain patients. The federal reimbursement for certain facilities, such as skilled nursing facilities, incorporates adjustments to account for facility case-mix. Additionally, revenue under third-party payor agreements can change after examination and retroactive adjustment by payors during the claims settlement processes or as a result of post-payment audits. Payors may disallow requests for reimbursement based on determinations that certain costs are not reimbursable or reasonable or because additional documentation is necessary or because certain services were not covered or were not medically necessary. We cannot assure you that our Operators who currently depend on governmental or private payor reimbursement will be adequately reimbursed for the services they provide. Significant limits by governmental and private third-party payors on the

scope of services reimbursed or on reimbursement rates and fees, whether from legislation, administrative actions or private payor efforts, could have a material adverse effect on liquidity, financial condition and results of operations, which could affect adversely their ability to comply with the terms of our leases and have a material adverse effect on us.

On July 31, 2014, Centers for Medicare & Medicaid Services released its final rule updating the SNF PPS for the 2015 fiscal year (October 1, 2014 through September 30, 2015). Under the final rule, the SNF PPS standard federal payment rate will increase by 2.0% in fiscal year 2015, reflecting a 2.5% increase in the market basket index, less a 0.5% productivity adjustment mandated by the Affordable Care Act. We are currently analyzing the financial implications of this final rule on the operators of our CCRCs.

We cannot provide any assurance that this rule or future updates to SNF PPS or Medicare reimbursement for skilled nursing facilities will not materially adversely affect our tenants and property managers, which, in turn, could have a material adverse effect on us.

Our tenants may be unable to cover their lease obligations to us, and there can be no assurance that the guarantor of our triple net leases will be able to cover any shortfall.

Our tenants are subject to various financial covenants pursuant to the lease agreements, including compliance with a lease coverage ratio. If any of our tenants is not able to satisfy its obligations to us, we would be entitled, among other remedies, to use any funds of such tenants then held by us and to seek recourse against the guarantor under its guaranty of the applicable master lease. Such guaranty includes certain financial covenants of the guarantor, including maintaining a minimum net worth, a minimum fixed charge coverage ratio of 1.10 and a maximum leverage ratio. There can be no assurance that a guarantor will have the resources necessary to satisfy its obligations to us under its guaranty of a master lease in the event that a Master Tenant fails to satisfy its lease obligations to us in full, which could have a material adverse effect on us.

We may not be able to complete accretive acquisitions, and the acquisitions we do complete may not be successful.

We intend to acquire additional senior housing properties. We may not be able to consummate attractive acquisition opportunities, and those that we do consummate may not be successful. The current low interest rate environment may drive upward sales prices or lead to overbuilding. We might encounter unanticipated difficulties and expenditures relating to any acquired properties. Newly acquired properties might require significant management attention. We might never realize the anticipated benefits of our acquisitions. Notwithstanding pre-acquisition due diligence, we do not believe that it is possible to fully understand a property before it is operated for an extended period of time. For example, we could acquire a property that contains undisclosed defects in design or construction. In addition, after our acquisition of a property, the market in which the acquired property is located may experience unexpected changes that adversely affect the property's value. The occupancy of properties that we acquire may decline during our ownership, and rents or returns that are in effect or expected at the time a property is acquired may decline thereafter. Also, our property operating costs for acquisitions may be higher than we anticipate and acquisitions of properties may not yield the returns we expect and, if financed using debt or new equity issuances, may result in stockholder dilution. For these reasons, among others, any acquisitions of additional properties may not succeed or may cause us to experience losses.

Competition may affect our Operators' ability to meet their obligations to us or make it difficult for us to identify and purchase, or develop, suitable senior housing properties to grow our investment portfolio.

We face significant competition from other REITs, investment companies, private equity and hedge fund investors, sovereign funds, healthcare operators, lenders, developers and other institutional investors, some of whom may have greater resources and lower costs of capital than we do. Increased competition makes it more challenging for us to identify and successfully capitalize on opportunities that meet our business goals and could improve the bargaining power of property owners seeking to sell, thereby impeding our investment, acquisition and development activities. If we cannot identify and purchase a sufficient quantity of senior housing properties at favorable prices or if we are unable to finance acquisitions on commercially favorable terms, it could have a material adverse effect on our business, financial condition and results of operations.

The healthcare industry is also highly competitive, and our Operators may encounter increased competition for residents and patients, including with respect to the scope and quality of care and services provided, reputation and financial condition, physical appearance of the properties, price and location. The operations of our RIDEA AL/MC properties and our IL-only properties depend on the competitiveness and financial viability of the properties. If our managers are unable to successfully compete with other operators and managers by maintaining profitable occupancy and rate levels, their ability to generate income for us may be materially adversely affected. The operations of our triple net lease tenants (including the Master Tenants) also depend upon their ability to successfully compete with other operators and managers. If our tenants (including the Master Tenants) are unable to successfully compete, their ability to fulfill their obligations to us, including the ability to make rent payments to us, may be materially adversely affected. Future changes in government regulation may adversely affect the healthcare industry, including our senior housing properties and healthcare operations, property managers and tenants, and our property managers and tenants may not achieve and maintain occupancy and rate levels that will enable them to satisfy their obligations to us. Any adverse changes in the regulation

of the healthcare industry or the competitiveness of our property managers and tenants could have a more pronounced effect on us than if we had investments outside the senior housing and healthcare industries.

Our tenants may become subject to bankruptcy or insolvency proceedings.

Our tenants may not be able to meet the rent or other payments due to us, which may result in a tenant bankruptcy or insolvency, or a tenant might become subject to bankruptcy or insolvency proceedings for other reasons. Although our operating lease agreements provide us with the right to evict tenants, demand immediate payment of rent and exercise other remedies, the bankruptcy and insolvency laws afford certain rights to a party that has filed for bankruptcy or reorganization. A tenant in bankruptcy or subject to insolvency proceedings may be able to limit or delay our ability to collect unpaid rent and to exercise other rights and remedies.

We may be required to fund certain expenses (e.g., real estate taxes and maintenance) to preserve the value of an investment property, avoid the imposition of liens on a property and/or transition a property to a new tenant. If we cannot transition a leased property to a new tenant, we may take possession of that property, which may expose us to certain successor liabilities. Should such events occur, our revenue and operating cash flow may be adversely affected.

Transfers of healthcare properties may require regulatory approvals, and these properties may not have efficient alternative uses.

Transfers of healthcare properties to successor operators frequently are subject to regulatory approvals or notifications, including, but not limited to, change of ownership approvals under a CON or determination of need laws, state licensure laws, Medicare and Medicaid provider arrangements that are not required for transfers of other types of real estate. The replacement of a healthcare property operator could be delayed by the approval process of any federal, state or local agency necessary for the transfer of the property or the replacement of the operator licensed to manage the property. Alternatively, given the specialized nature of our properties, we may be required to spend substantial time and funds to adapt these properties to other uses. If we are unable to timely transfer properties to successor operators or find efficient alternative uses, our revenue and operations may be adversely affected.

Certain of our properties may require a license or registration to operate.

Failure to obtain a license or registration or loss of a required license or registration would prevent a property from operating in the manner intended by the property managers or tenants (including the Master Tenants). These events could materially adversely affect our property managers' ability to generate income for us or our tenants' ability to make rent payments to us. State and local laws also may regulate the expansion, including the addition of new beds or services or acquisition of medical equipment, and the construction or renovation of healthcare properties, by requiring a CON or other similar approval from a state agency.

The impact of the comprehensive healthcare regulation enacted in 2010 on us and our Operators cannot accurately be predicted.

The Health Reform Laws, provide states with an increased federal medical assistance percentage under certain conditions. On June 28, 2012, The United States Supreme Court upheld the individual mandate of the Health Reform Laws but partially invalidated the expansion of Medicaid. The ruling on Medicaid expansion allows states not to participate in the expansion—and to forgo funding for the Medicaid expansion—without losing their existing Medicaid funding. Thus far, approximately one-half of the states are fully participating. Given that the federal government substantially funds the Medicaid expansion, it is unclear whether any state will pursue this option, although at least some appear to be considering this option at this time. The participation by states in the Medicaid expansion could have the dual effect of increasing our property managers' and tenants revenues, through new patients, but further straining state budgets. While the federal government will pay for approximately 100% of those additional costs until 2016, states will be expected to begin paying for part of those additional costs in 2017. With increasingly strained budgets, it is unclear how states will pay their share of these additional Medicaid costs and what other healthcare expenditures could be reduced as a result. A significant reduction in other healthcare related spending by states to pay for increased Medicaid costs could affect our property managers' and tenants' revenue streams, which could materially and adversely affect our business, financial condition and results of operations.

There are risks related to new properties under construction or development.

In the future, we might construct one or more new properties. Any failure by us or our property managers to obtain the required license, certification, contracts, governmental permits and authorizations, or to obtain financing on favorable terms, may impede our ability to earn revenues on the relevant properties. Additionally, we may have to wait years for significant cash returns on newly developed properties, and if the cash flow from operations or refinancing is not sufficient, we may be forced to borrow additional money to fund our cash distributions to stockholders. Furthermore, if our financial projections with respect to a new

property are inaccurate due to increases in capital costs or other factors, the property may fail to perform as we expected in analyzing our investment.

Our investments are concentrated in senior housing real estate, making us more vulnerable economically to adverse changes in the real estate market and the senior housing industry than if our investments were diversified.

We invest primarily in senior housing properties. Our investment focus exposes us to greater economic risk than if our portfolio were to include real estate assets in other industries or non-real estate assets.

Any adverse changes in the regulation of the healthcare industry or the competitiveness of our property managers and tenants could have a more pronounced effect on us than if our investments were further diversified.

Real estate investments are relatively illiquid, and our ability to quickly sell or exchange our properties in response to changes in economic or other conditions is limited. In the event we desire or need to sell any of our properties, the value of those properties and our ability to sell at a price or on terms acceptable to us could be adversely affected by a downturn in the real estate industry or any weakness in the senior housing industry. We cannot assure you that we will recognize the full value of any property that we sell for liquidity or other reasons, and the inability to respond quickly to changes in the performance of our investments could adversely affect our business, results of operations and financial condition.

Overbuilding in markets in which our senior housing properties are located could adversely affect our future occupancy rates, operating margins and profitability.

The senior housing industry generally has limited barriers to entry, and, as a consequence, the development of new senior housing properties could outpace demand. If development outpaces demand for those asset types in the markets in which our properties are located, those markets may become saturated, and we could experience decreased occupancy, reduced operating margins and lower profitability.

If any of our properties are found to be contaminated, or if we become involved in any environmental disputes, we could incur substantial liabilities and costs.

Under federal and state environmental laws and regulations, a current or former owner of real property may be liable for costs related to the investigation, removal and remediation of hazardous or toxic substances or petroleum that are released from or are present at or under, or that are disposed of in connection with such property. Owners of real property may also face other environmental liabilities, including government fines and penalties imposed by regulatory authorities and damages for injuries to persons, property or natural resources. Environmental laws and regulations often impose liability without regard to whether the owner was aware of, or was responsible for, the presence, release or disposal of hazardous or toxic substances or petroleum. In certain circumstances, environmental liability may result from the activities of a current or former operator of the property. Although we are generally indemnified by our property managers and tenants (including the Master Tenants) of our properties for contamination caused by them, these indemnities may not adequately cover all environmental costs.

All of our revenue is attributable to properties managed by three property managers, Holiday, Blue Harbor and JEA, and tenants affiliated with Holiday and LCS.

As of December 31, 2014, either Blue Harbor, Holiday or JEA managed all of our Managed Properties. Currently, Blue Harbor and Holiday property management agreements have initial 10-year terms, while the property management agreement with JEA has an initial term of 5 years, with successive automatic 1-year renewal periods. We pay monthly property management fees to Holiday, Blue Harbor and JEA. For IL-only properties, we pay base management fees of 5% of effective gross income. For AL/MC properties, we pay base management fees equal to 6% of effective gross income for the first two years and 7% thereafter to Holiday and Blue Harbor, while we pay 5% of effective gross income to JEA. As managers, Blue Harbor, Holiday and JEA do not lease our properties and, therefore, we are not directly exposed to their credit risk in the same manner or to the same extent as a triple net lease tenant. However, we rely on our managers' personnel, expertise, technical resources and information systems, proprietary information, good faith and judgment to manage our senior housing operations efficiently and effectively. We also rely on our managers to set appropriate resident fees and to otherwise operate our senior housing communities in compliance with the terms of our property management agreements and all applicable laws and regulations. Although we have various rights as the property owner under our property management agreements, including various rights to set budget guidelines and to terminate and exercise remedies under those agreements as provided therein, Blue Harbor's, Holiday's or JEA's failure, inability or unwillingness to satisfy its respective obligations under those agreements, to efficiently and effectively manage our properties or to provide timely and accurate accounting information with respect thereto, could have a material adverse effect on us.

We may continue to purchase senior housing properties and engage the sellers of such facilities or other third parties under a triple net lease in which the rental payments are fixed with scheduled periodic increases that are either fixed or based on CPI with caps. The properties we currently lease to Holiday and LCS account for a significant portion of our total revenues and net operating income from our senior housing properties, and because our leases with Holiday and LCS are triple net leases, we depend on Holiday and LCS to pay all operating costs, including repairs, maintenance, capital expenditures, utilities, taxes, insurance and payroll expense of property-level employees in connection with the leased properties. We cannot assure you that Holiday and LCS will have sufficient assets, income and access to financing to enable them to satisfy their obligations to us, and any failure, inability or unwillingness by Holiday or LCS to do so could have a material adverse effect on us. In addition, although a subsidiary of Holiday and LCS provided a lease guaranty in connection with their respective leases, the guarantees may not be sufficient to satisfy Holiday's or LCS' obligations to us, and Holiday or LCS may not have sufficient assets, income and access to financing to enable them to satisfy their obligations to us. Our reliance on Holiday and LCS for a significant portion of our total revenues and net operating income from our senior housing investments creates credit risk. If Holiday or LCS becomes unable or unwilling to satisfy their obligations to us, our financial condition and results of operations could be weakened.

The geographic concentration of our assets in Florida and Texas may result in losses due to our significant exposure to the effects of economic and real estate conditions in those markets.

As of December 31, 2014, approximately 21.7% and 21.5% of the beds in our senior housing portfolios were located in Florida and Texas, respectively. In addition, as of December 31, 2014, 44.2% and 28.5% of total revenue for our Managed Properties segment and our Triple Net Lease Properties segment, respectively, was derived from our properties in Florida and Texas. As a result of this concentration, a material portion of our portfolios are significantly exposed to the effects of economic and real estate conditions in those particular markets, such as the supply of competing properties, home prices, income levels, the financial condition of our tenants, and general levels of employment and economic activity, which may be adversely affected by the recent decline in oil prices. To the extent that weak economic or real estate conditions affect Florida or Texas more severely than other areas of the country, our financial performance could be negatively impacted.

We rely on information technology in our operations, and any material failure, inadequacy, interruption or security failure of that technology could harm our business.

We rely on information technology networks and systems, including the Internet, to process, transmit and store electronic information and to manage or support a variety of our business processes, including financial transactions and maintenance of records, which in the case of our business, may include personal identifying information. We rely on commercially available systems, software, tools and monitoring to provide security for processing, transmitting and storing this confidential information, such as individually identifiable information relating to financial accounts. Although we have taken steps to protect the security of the data maintained in our information systems, it is possible that our security measures will not be able to prevent the systems' improper functioning, or the improper disclosure of personally identifiable information such as in the event of cyber-attacks. Security breaches, including physical or electronic break-ins, computer viruses, attacks by hackers and similar breaches, can create system disruptions, shutdowns or unauthorized disclosure of confidential information. Any failure to maintain proper function, security and availability of our information systems could interrupt our operations, damage our reputation, subject us to liability claims or regulatory penalties and could materially and adversely affect our business, financial condition and results of operations.

Some of our senior housing properties generate infectious medical waste due to the illness or physical condition of the residents.

The management of infectious medical waste, including handling, storage, transportation, treatment and disposal, is subject to regulation under various laws, including federal and state environmental laws. These environmental laws set forth the management requirements, as well as permit, record-keeping, notice, and reporting obligations. Each of our senior housing properties has an agreement with a waste management company for the proper disposal of all infectious medical waste. The use of such waste management companies does not immunize us from alleged violations of such medical waste laws for operations for which we are responsible even if carried out by such waste management companies, nor does it immunize us from third-party claims for the cost to clean up disposal sites at which such wastes have been disposed. Any finding that we are not in compliance with these environmental laws could adversely affect our business, financial condition and results of operations. While we are not aware of non-compliance with environmental laws related to infectious medical waste at our senior housing properties, these environmental laws are amended from time to time and we cannot predict when and to what extent liability may arise. In addition, because these environmental laws vary from state to state, expansion of our operations to states where we do not currently operate may subject us to additional restrictions on the manner in which we operate our senior housing properties.

Changes in accounting rules could occur at any time and could impact us in significantly negative ways that we are unable to predict or protect against.

As has been widely publicized, the Securities Exchange Commission, the Financial Accounting Standards Board (“FASB”) and other regulatory bodies that establish the accounting rules applicable to us have recently proposed or enacted a wide array of changes to accounting rules. Moreover, in the future these regulators may propose additional changes that we do not currently anticipate. Changes to accounting rules that apply to us could significantly impact our business or our reported financial performance in negative ways that we cannot predict or protect against. We cannot predict whether any changes to current accounting rules will occur or what impact any codified changes will have on our business, results of operations, liquidity or financial condition.

Failure to maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002 could have a material adverse effect on our business and stock price.

As a public company, we will be required to maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002. Internal control over financial reporting is complex and may be revised over time to adapt to changes in our business, or changes in applicable accounting rules. In addition, as a result of any new investment in senior housing properties, we may be required to consolidate additional entities, and, therefore, to document and test effective internal controls over the financial reporting of these entities in accordance with Section 404, which we may not be able to do. Even if we are able to do so, there could be significant costs and delays, particularly if these entities were not subject to Section 404 prior to being acquired by us. We cannot assure you that our internal control over financial reporting will be effective in the future or that a material weakness will not be discovered with respect to a prior period for which we had previously believed that internal controls were effective. If we are not able to maintain or document effective internal control over financial reporting, our independent registered public accounting firm will not be able to certify as to the effectiveness of our internal control over financial reporting. Matters impacting our internal controls may cause us to be unable to report our financial information on a timely basis, or may cause us to restate previously issued financial information, and thereby subject us to adverse regulatory consequences, including sanctions or investigations by the SEC, or violations of applicable stock exchange listing rules. There could also be a negative reaction in the financial markets due to a loss of investor confidence in us and the reliability of our financial statements. Confidence in the reliability of our financial statements is also likely to suffer if we or our independent registered public accounting firm reports a material weakness in our internal control over financial reporting. This could materially adversely affect us by, for example, leading to a decline in our share price and impairing our ability to raise capital.

RISKS RELATED TO OUR MANAGER

We are dependent on our Manager and may not find a suitable replacement if our Manager terminates the Management Agreement.

We do not have employees. Our officers and other individuals who perform services for us are employees of our Manager, or our Operators. We are completely reliant on our Manager, which has significant discretion as to the implementation of our operating policies and strategies, and our Operators to conduct our business. We are subject to the risk that our Manager will terminate the Management Agreement and that we will not be able to find a suitable replacement for our Manager in a timely manner, at a reasonable cost or at all. Furthermore, we are dependent on the services of certain key employees of our Manager whose compensation may be partially or entirely dependent upon the amount of incentive or management compensation earned by our Manager and whose continued service is not guaranteed, and the loss of such services could adversely affect our operations.

There are conflicts of interest in our relationship with our Manager.

Our Management Agreement with our Manager was not negotiated at arm’s-length, and its terms, including fees payable, may not be as favorable to us as if it had been negotiated with an unaffiliated third party.

There are conflicts of interest inherent in our relationship with our Manager insofar as our Manager and its affiliates—including investment funds, private investment funds, or businesses managed by our Manager—invest in senior housing properties and whose investment objectives overlap with our investment objectives. Certain investments appropriate for us may also be appropriate for one or more of these other investment vehicles. Certain members of our board of directors and employees of our Manager who are our officers also serve as officers and/or directors of these other entities. Although we have the same Manager, we may compete with entities affiliated with our Manager or Fortress for certain target assets. Fortress has two funds that were primarily focused on investing in senior housing properties. The first, raised in 2006 with \$650 million in commitments at closing had its final liquidation in December 2014. The second, also raised in 2006, had \$1.6 billion in capital commitments as of December 31, 2014. Certain of Fortress’s other funds also hold significant investments in senior housing. All of these funds are outside their respective investment periods, although one of these funds has approximately \$120 million in unfunded commitments which may be drawn for follow-on investments. Fortress funds generally have a fee structure similar to ours, but the fees actually paid will vary depending

on the size, terms and performance of each fund. From time to time, affiliates of Fortress focus on investments in assets with a similar profile as our target assets that we may seek to acquire. These affiliates may have meaningful purchasing capacity, which may change over time depending upon a variety of factors, including, but not limited to, available equity capital and debt financing, market conditions and cash on hand. Fortress had approximately \$67.5 billion of assets under management as of December 31, 2014.

Our Management Agreement with our Manager generally does not limit or restrict our Manager or its affiliates from engaging in any business or managing other pooled investment vehicles that invest in investments that meet our investment objectives. Our Manager intends to engage in additional senior housing properties-related management and senior housing properties and other investment opportunities in the future, which may cause our Manager to compete with us for investments or result in a change in our current investment strategy. In addition, our certificate of incorporation will provide that if Fortress or an affiliate or any of their officers, directors or employees acquire knowledge of a potential transaction that could be a corporate opportunity, they have no duty, to the fullest extent permitted by law, to offer such corporate opportunity to us, our stockholders or our affiliates. In the event that any of our directors and officers who is also a director, officer or employee of Fortress or its affiliates acquires knowledge of a corporate opportunity or is offered a corporate opportunity, provided that this knowledge was not acquired solely in such person's capacity as a director or officer of ours and such person acts in good faith, then to the fullest extent permitted by law such person is deemed to have fully satisfied such person's fiduciary duties owed to us and is not liable to us if Fortress or its affiliates pursues or acquires the corporate opportunity or if such person did not present the corporate opportunity to us.

The ability of our Manager and its officers and employees to engage in other business activities, subject to the terms of our Management Agreement with our Manager, may reduce the amount of time our Manager, its officers or other employees spend managing us. In addition, we may engage (subject to our investment guidelines) in material transactions with our Manager or another entity managed by our Manager or one of its affiliates, including Newcastle, which may present an actual, potential or perceived conflict of interest. It is possible that actual, potential or perceived conflicts could give rise to investor dissatisfaction, litigation or regulatory enforcement actions. Appropriately dealing with conflicts of interest is complex and difficult, and our reputation could be damaged if we fail, or appear to fail, to deal appropriately with one or more potential, actual or perceived conflicts of interest. Regulatory scrutiny of, or litigation in connection with, conflicts of interest could have a material adverse effect on our reputation, which could materially adversely affect our business in a number of ways, including causing an inability to raise additional funds, a reluctance of counterparties to do business with us, a decrease in the prices of our equity securities and a resulting increased risk of litigation and regulatory enforcement actions.

The management compensation structure that we have agreed to with our Manager, as well as compensation arrangements that we may enter into with our Manager in the future (in connection with new lines of business or other activities), may incentivize our Manager to invest in high risk investments. In addition to its management fee, our Manager is currently entitled to receive incentive compensation. In evaluating investments and other management strategies, the opportunity to earn incentive compensation may lead our Manager to place undue emphasis on the maximization of such measures at the expense of other criteria, such as preservation of capital, in order to achieve higher incentive compensation. Investments with higher yield potential are generally riskier or more speculative than lower-yielding investments. Moreover, because our Manager receives compensation in the form of options in connection with the completion of our common equity offerings, our Manager may be incentivized to cause us to issue additional common stock, which could be dilutive to existing stockholders.

It would be difficult and costly to terminate our Management Agreement with our Manager.

It would be difficult and costly for us to terminate our Management Agreement with our Manager. After its initial ten-year term, the Management Agreement will be automatically renewed for one-year terms unless terminated (i) by a majority vote of at least two-thirds of our independent directors, or by a vote of the holders of a simple majority of the outstanding shares of our common stock, that there has been unsatisfactory performance by our Manager that is materially detrimental to us or (ii) a determination by a simple majority of our independent directors that the management fee payable to our Manager is not fair, subject to our Manager's right to prevent such a termination by continuing to provide the services under the Management Agreement at a fee that a simple majority of our independent directors have reasonably determined to be fair. Our Manager will be provided 60 days' prior notice of any termination and will be paid a termination fee equal to the amount of the management fee earned by the Manager during the 12-month period preceding such termination. In addition, following any termination of the Management Agreement, our Manager may require us to purchase its right to receive incentive compensation at a price determined as if our assets were sold for their then current fair market value or otherwise we may continue to pay the incentive compensation to our Manager. These provisions may increase the effective cost to us of terminating the Management Agreement, thereby adversely affecting our ability to terminate our Manager without cause.

Our board of directors has approved broad investment guidelines for our Manager and do not approve each investment decision made by our Manager. In addition, we may change our investment strategy without a stockholder vote, which may result in our making investments that are different, riskier or less profitable than our current investments.

Our Manager is authorized to follow broad investment guidelines. For more information about our investment guidelines, see Part II. Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Our Manager and Management Agreement and Other Compensation Arrangements – Management Agreement.” Consequently, our Manager has great latitude in determining the types and categories of assets it may decide are proper investments for us, including the latitude to invest in types and categories of assets that may differ from those in which we currently invest. Our board of directors will periodically review our investment guidelines and our investment portfolio. However, our board of directors does not review or pre-approve each proposed investment or our related financing arrangements. In addition, in conducting periodic reviews, our board of directors relies primarily on information provided to them by our Manager. Furthermore, transactions entered into by our Manager may be difficult or impossible to unwind by the time they are reviewed by our board of directors even if the transactions contravene the terms of the Management Agreement. In addition, we may change our investment strategy, including our target asset classes, without a stockholder vote.

Our investment strategy may evolve in light of existing market conditions and investment opportunities, and this evolution may involve additional risks depending upon the nature of the assets in which we invest and our ability to finance such assets on a short- or long-term basis. Investment opportunities that present unattractive risk-return profiles relative to other available investment opportunities under particular market conditions may become relatively attractive under changed market conditions, and changes in market conditions may therefore result in changes in the investments we target. Decisions to make investments in new asset categories present risks that may be difficult for us to adequately assess and could therefore reduce our ability to pay dividends on our common stock or have adverse effects on our liquidity or financial condition. A change in our investment strategy may also increase our exposure to interest rate, real estate market or credit market fluctuations. In addition, a change in our investment strategy may increase the guarantee obligations we agree to incur or increase the number of transactions we enter into with affiliates. Our failure to accurately assess the risks inherent in new asset categories or the financing risks associated with such assets could adversely affect our results of operations and our financial condition.

Our Manager will not be liable to us for any acts or omissions performed in accordance with the Management Agreement, including with respect to the performance of our investments.

Pursuant to our Management Agreement, our Manager will not assume any responsibility other than to render the services called for thereunder in good faith and will not be responsible for any action of our board of directors in following or declining to follow its advice or recommendations. Our Manager, its members, managers, officers and employees will not be liable to us or any of our subsidiaries, to our board of directors, or our or any subsidiary’s stockholders or partners for any acts or omissions by our Manager, its members, managers, sub-advisers, officers or employees, except by reason of acts constituting bad faith, willful misconduct, gross negligence or reckless disregard of our Manager’s duties under our Management Agreement. We shall, to the full extent lawful, reimburse, indemnify and hold our Manager, its members, managers, officers and employees, sub-advisers and each other person, if any, controlling our Manager, harmless of and from any and all expenses, losses, damages, liabilities, demands, charges and claims of any nature whatsoever (including attorneys’ fees) in respect of or arising from any acts or omissions of an indemnified party made in good faith in the performance of our Manager’s duties under our Management Agreement and not constituting such indemnified party’s bad faith, willful misconduct, gross negligence or reckless disregard of our Manager’s duties under our Management Agreement.

Our Manager’s due diligence of investment opportunities or other transactions may not identify all pertinent risks, which could materially affect our business, financial condition, liquidity and results of operations.

Our Manager intends to conduct due diligence with respect to each investment opportunity or other transaction it pursues. It is possible, however, that our Manager’s due diligence processes will not uncover all relevant facts, particularly with respect to any assets we acquire from third parties. In these cases, our Manager may be given limited access to information about the investment and will rely on information provided by the target of the investment. In addition, if investment opportunities are scarce, the process for selecting bidders is competitive, or the timeframe in which we are required to complete diligence is short, our ability to conduct a due diligence investigation may be limited, and we would be required to make investment decisions based upon a less thorough diligence process than would otherwise be the case. Accordingly, investments and other transactions that initially appear to be viable may prove not to be over time, due to the limitations of the due diligence process or other factors.

RISKS RELATED TO OUR TAXATION AS A REIT

Our failure to qualify as a REIT would result in higher taxes and reduced cash available for distribution to our stockholders. Newcastle’s failure to qualify as a REIT could cause us to lose our REIT status.

We intend to elect and qualify us as a REIT for U.S. federal income tax purposes. Our ability to satisfy the REIT asset tests depends upon our analysis of the fair market values of our assets, some of which are not susceptible to a precise determination, and for which we do not obtain independent appraisals. Our compliance with the REIT income and quarterly asset requirements also depends upon our ability to successfully manage the composition of our income and assets on an ongoing basis. Moreover, the proper classification of one or more of our investments may be uncertain in some circumstances, which could affect the application of the REIT qualification requirements. Accordingly, there can be no assurance that the Internal Revenue Service (“IRS”) will not contend that our investments violate the REIT requirements.

If we were to fail to qualify as a REIT in any taxable year, we would be subject to U.S. federal income tax, including any applicable alternative minimum tax, on our taxable income at regular corporate rates and distributions to stockholders would not be deductible by us in computing our taxable income. Any such corporate tax liability could be substantial and would reduce the amount of cash available for distribution to our stockholders, which in turn could have an adverse impact on the value of, and trading prices for, our stock. Unless entitled to relief under certain provisions of the Code, we also would be disqualified from taxation as a REIT for the four taxable years following the year during which we initially ceased to qualify as a REIT.

If Newcastle were to fail to qualify as a REIT, the rule against re-electing REIT status following a loss of such status would also apply to us if we were treated as a successor to Newcastle for U.S. federal income tax purposes. Although Newcastle has provided (i) a representation in the separation and distribution agreement entered into to effect the spin-off (“Separation and Distribution Agreement”) that it has no knowledge of any fact or circumstance that would cause us to fail to qualify as a REIT and (ii) a covenant in the Separation and Distribution Agreement to use its reasonable best efforts to maintain its REIT status for each of Newcastle’s taxable years ending on or before 2015 (unless Newcastle obtains an opinion from a nationally recognized tax counsel or a private letter ruling from the IRS to the effect that Newcastle’s failure to maintain its REIT status will not cause us to fail to qualify as a REIT under the successor REIT rule referred to above), no assurance can be given that such representation and covenant would prevent us from failing to qualify as a REIT. Although, in the event of a breach, we may be able to seek damages from Newcastle, there can be no assurance that such damages, if any, would appropriately compensate us. In addition, if Newcastle were to fail to qualify as a REIT despite its reasonable best efforts, we would have no claim against Newcastle.

Our failure to qualify as a REIT would cause our stock to be delisted from the NYSE.

The NYSE requires, as a condition to the listing of our shares, that we maintain our REIT status. Consequently, if we fail to maintain our REIT status, our shares would promptly be delisted from the NYSE, which would decrease the trading activity of such shares. This could make it difficult to sell shares and would likely cause the market volume of the shares trading to decline.

If we were delisted as a result of losing our REIT status and desired to relist our shares on the NYSE, we would have to reapply to the NYSE to be listed as a domestic corporation. As the NYSE’s listing standards for REITs are less onerous than its standards for domestic corporations, it would be more difficult for us to become a listed company under these heightened standards. We might not be able to satisfy the NYSE’s listing standards for a domestic corporation. As a result, if we were delisted from the NYSE, we might not be able to relist as a domestic corporation, in which case our shares could not trade on the NYSE.

Dividends payable by REITs do not qualify for the reduced tax rates available for some dividends.

Dividends payable to domestic stockholders that are individuals, trusts and estates are generally taxed at reduced tax rates. Dividends payable by REITs, however, generally are not eligible for the reduced rates. The more favorable rates applicable to regular corporate dividends could cause investors who are individuals, trusts and estates to perceive investments in REITs to be relatively less attractive than investments in the stocks of non-REIT corporations that pay dividends, which could adversely affect the value of the stock of REITs, including our common stock. In addition, the relative attractiveness of real estate in general may be adversely affected by the favorable tax treatment given to non-REIT corporate dividends, which could affect the value of our real estate assets negatively.

Qualifying as a REIT involves highly technical and complex provisions of the Code.

Qualification as a REIT involves the application of highly technical and complex Code provisions for which only limited judicial and administrative authorities exist. Even a technical or inadvertent violation could jeopardize our REIT qualification. Our qualification as a REIT will depend on our satisfaction of certain asset, income, organizational, distribution, stockholder ownership and other requirements on a continuing basis. Compliance with these requirements must be carefully monitored on a continuing basis, and there can be no assurance that our Manager’s personnel responsible for doing so will be able to successfully monitor our compliance.

REIT distribution requirements could adversely affect our liquidity and our ability to execute our business plan.

We generally must distribute annually at least 90% of our REIT taxable income, excluding any net capital gain, in order for corporate income tax not to apply to earnings that we distribute. We intend to make distributions to our stockholders to comply with the REIT requirements of the Code. However, differences in timing between the recognition of taxable income and the actual receipt of cash could require us to sell assets or borrow funds on a short-term or long-term basis to meet the 90% distribution requirement of the Code. Certain of our assets may generate substantial mismatches between taxable income and available cash. As a result, the requirement to distribute a substantial portion of our REIT taxable income could cause us to: (i) sell assets in adverse market conditions; (ii) borrow on unfavorable terms; (iii) distribute amounts that would otherwise be invested in future acquisitions, capital expenditures or repayment of debt; or (iv) make taxable distributions of our capital stock or debt securities in order to comply with REIT requirements. Further, amounts distributed will not be available to fund investment activities. If we fail to obtain debt or equity capital in the future, it could limit our ability to satisfy our liquidity needs, which could adversely affect the value of our common stock.

We may be unable to generate sufficient revenue from operations to pay our operating expenses and to pay distributions to our stockholders.

As a REIT, we are generally required to distribute at least 90% of our REIT taxable income (determined without regard to the dividends paid deduction and not including net capital gain) each year to our stockholders. To qualify for the tax benefits accorded to REITs, we intend to make distributions to our stockholders in amounts such that we distribute an amount at least equal to all or substantially all of our REIT taxable income each year, subject to certain adjustments. However, our ability to make distributions may be adversely affected by the risk factors described herein.

The stock ownership limit imposed by the Code for REITs and our certificate of incorporation may inhibit market activity in our stock and restrict our business combination opportunities.

In order for us to maintain our qualification as a REIT under the Code, not more than 50% in value of our outstanding stock may be owned, directly or indirectly, by five or fewer individuals (as defined in the Code to include certain entities) at any time during the last half of each taxable year after our first taxable year. Our certificate of incorporation, with certain exceptions, will authorize our board of directors to take the actions that are necessary and desirable to preserve our qualification as a REIT. Unless exempted by our board of directors, no person may own more than 9.8% of the aggregate value of our outstanding capital stock, treating classes and series of our stock in the aggregate. Our board of directors may grant an exemption in its sole discretion, subject to such conditions, representations and undertakings as it may determine in its sole discretion. These ownership limits could delay or prevent a transaction or a change in our control that might involve a premium price for our common stock or otherwise be in the best interest of our stockholders.

Even if we remain qualified as a REIT, we may face other tax liabilities that reduce our cash flow.

Even if we remain qualified for taxation as a REIT, we may be subject to certain federal, state and local taxes on our income and assets, including taxes on any undistributed income, tax on income from some activities conducted as a result of a foreclosure, and state or local income, property and transfer taxes. Moreover, if a REIT distributes less than 85% of its taxable income to its stockholders during any calendar year (including any distributions declared by the last day of the calendar year but paid in the subsequent year), then it is required to pay an excise tax on 4% of any shortfall between the required 85% and the amount that was actually distributed. Any of these taxes would decrease cash available for distribution to our stockholders. In addition, our TRS will be subject to corporate level income tax at regular rates.

Complying with the REIT requirements may negatively impact our investment returns or cause us to forego otherwise attractive opportunities, liquidate assets or contribute assets to the TRS.

To qualify as a REIT for U.S. federal income tax purposes, we must continually satisfy tests concerning, among other things, the sources of our income, the nature and diversification of our assets, the amounts we distribute to our stockholders and the ownership of our stock. As a result of these tests, we may be required to make distributions to stockholders at disadvantageous times or when we do not have funds readily available for distribution, forego otherwise attractive investment opportunities, liquidate assets in adverse market conditions or contribute assets to a TRS that is subject to regular corporate federal income tax. Our ability to acquire investments will be subject to the applicable REIT qualification tests, and we may have to hold these interests through our TRS, which would negatively impact our returns from these assets. In general, compliance with the REIT requirements may hinder our ability to make and retain certain attractive investments.

Complying with the REIT requirements may limit our ability to hedge effectively.

The existing REIT provisions of the Code may substantially limit our ability to hedge our operations because a significant amount of the income from those hedging transactions is likely to be treated as non-qualifying income for purposes of both REIT gross income tests. In addition, we must limit our aggregate income from non-qualified hedging transactions, from our provision of services and from other non-qualifying sources, to less than 5% of our annual gross income (determined without regard to gross income from qualified hedging transactions). As a result, we may have to limit our use of certain hedging techniques or implement those hedges through total return swaps. This could result in greater risks associated with changes in interest rates than we would otherwise want to incur or could increase the cost of our hedging activities. If we fail to comply with these limitations, we could lose our REIT qualification for U.S. federal income tax purposes, unless our failure was due to reasonable cause, and not due to willful neglect, and we meet certain other technical requirements. Even if our failure were due to reasonable cause, we might incur a penalty tax.

Distributions to tax-exempt investors may be classified as unrelated business taxable income.

Neither ordinary nor capital gain distributions with respect to our stock nor gain from the sale of stock should generally constitute unrelated business taxable income to a tax-exempt investor. However, there are certain exceptions to this rule. In particular:

- part of the income and gain recognized by certain qualified employee pension trusts with respect to our stock may be treated as unrelated business taxable income if shares of our stock are predominantly held by qualified employee pension trusts, and we are required to rely on a special look-through rule for purposes of meeting one of the REIT ownership tests, and we are not operated in a manner to avoid treatment of such income or gain as unrelated business taxable income; and
- part of the income and gain recognized by a tax-exempt investor with respect to our stock would constitute unrelated business taxable income if the investor incurs debt in order to acquire the stock.

The tax on prohibited transactions will limit our ability to engage in certain transactions which would be treated as prohibited transactions for U.S. federal income tax purposes.

Net income that we derive from a prohibited transaction is subject to a 100% tax. The term “prohibited transaction” generally includes a sale or other disposition of property that is held primarily for sale to customers in the ordinary course of our trade or business. We might be subject to this tax if we were to dispose of our property in a manner that was treated as a prohibited transaction for U.S. federal income tax purposes.

We generally intend to conduct our operations so that no significant asset that we own (or are treated as owning) will be treated as, or as having been, held for sale to customers, and that a sale of any such asset will not be treated as having been in the ordinary course of our business. As a result, we may choose not to engage in certain sales at the REIT level, even though the sales might otherwise be beneficial to us. In addition, whether property is held “primarily for sale to customers in the ordinary course of a trade or business” depends on the particular facts and circumstances. No assurance can be given that any property that we sell will not be treated as property held for sale to customers, or that we can comply with certain safe-harbor provisions of the Code that would prevent such treatment. The 100% prohibited transaction tax does not apply to gains from the sale of property that is held through a TRS or other taxable corporation, although such income will be subject to tax in the hands of the corporation at regular corporate rates. We intend to structure our activities to prevent prohibited transaction characterization.

New legislation or administrative or judicial action, in each instance potentially with retroactive effect, could make it more difficult or impossible for us to qualify as a REIT.

The present U.S. federal income tax treatment of REITs may be modified, possibly with retroactive effect, by legislative, judicial or administrative action at any time, which could affect the U.S. federal income tax treatment of an investment in us. The U.S. federal income tax rules dealing with REITs constantly are under review by persons involved in the legislative process, the IRS and the U.S. Treasury Department, which results in statutory changes as well as frequent revisions to regulations and interpretations. Revisions in U.S. federal tax laws and interpretations thereof could affect or cause us to change our investments and commitments and affect the tax considerations of an investment in us.

Liquidation of assets may jeopardize our REIT qualification or create additional tax liability for us.

To qualify as a REIT, we must comply with requirements regarding the composition of our assets and our sources of income. If we are compelled to liquidate our investments to repay obligations to our lenders, we may be unable to comply with these requirements, ultimately jeopardizing our qualification as a REIT, or we may be subject to a 100% tax on any resultant gain if we sell assets that are treated as dealer property or inventory.

The lease of our properties to a TRS is subject to special requirements.

Under the provisions of RIDEA, we currently lease certain “qualified healthcare properties” (which generally include assisted living properties but not independent living properties) to our TRS (or a limited liability company of which the TRS is a member). The TRS in turn contracts with an affiliate of our manager to manage the healthcare operations at these properties. The rents paid by the TRS in this structure will be treated as qualifying rents from real property for purposes of the REIT requirements only if (i) they are paid pursuant to an arm’s-length lease of a qualified healthcare property and (ii) the operator qualifies as an “eligible independent contractor” with respect to the property. An operator will qualify as an eligible independent contractor if it meets certain ownership tests with respect to us, and if, at the time the operator enters into the property management agreement, the operator is actively engaged in the trade or business of operating qualified healthcare properties for any person who is not a related person to us or the TRS. If any of the above conditions were not satisfied, then the rents would not be considered income from a qualifying source for purposes of the REIT rules, which could cause us to incur penalty taxes or to fail to qualify as a REIT.

RISKS RELATED TO OUR COMMON STOCK

There can be no assurance that the market for our stock will provide you with adequate liquidity.

The market price of our common stock may fluctuate widely, depending upon many factors, some of which may be beyond our control. These factors include, without limitation:

- a shift in our investor base;
- our quarterly or annual earnings, or those of other comparable companies;
- actual or anticipated fluctuations in our operating results;
- changes in accounting standards, policies, guidance, interpretations or principles;
- announcements by us or our competitors of significant investments, acquisitions or dispositions;
- the failure of securities analysts to cover our common stock;
- changes in earnings estimates by securities analysts or our ability to meet those estimates;
- the operating and stock price performance of other comparable companies;
- overall market fluctuations; and
- general economic conditions.

Stock markets in general have experienced volatility that has often been unrelated to the operating performance of a particular company. These broad market fluctuations may adversely affect the trading price of our common stock.

Your percentage ownership in our Company may be diluted in the future.

Your percentage ownership in our Company may be diluted in the future because of equity awards that we expect will be granted to our Manager, to the directors, officers and employees of our Manager who perform services for us, and to our directors, officers and employees, as well as other equity instruments such as debt and equity financing. Our board of directors has approved a Nonqualified Stock Option and Incentive Award Plan (the “Plan”) providing for the grant of equity-based awards, including restricted stock, stock options, stock appreciation rights, performance awards, tandem awards and other equity-based and non-equity based awards, in each case to our Manager, to the directors, officers, employees, service providers, consultants and advisors of our Manager who perform services for us, and to our directors, officers, employees, service providers, consultants and advisors. We have reserved shares of our common stock for issuance under the Plan. On the first day of each fiscal year beginning during the ten-year term of the Plan and beginning with calendar year 2015, that number will be increased by a number of shares of our common stock equal to 10% of the number of shares of our common stock newly issued by us during the immediately preceding fiscal year. Upon the successful completion of an offering of our common stock by us, we will issue to our Manager options (including cash-settled options) equal to 10% of the number of shares sold in the offering. Our board of directors may also determine to issue options to the Manager that are not subject to the Plan, provided that the number of shares underlying any options granted to the Manager in connection with capital raising efforts would not exceed 10% of the shares sold in such offering and would be subject to NYSE rules.

We may incur or issue debt or issue equity, which may negatively affect the market price of our common stock.

We may in the future incur or issue debt or issue equity or equity-related securities. Upon our liquidation, lenders and holders of our debt and holders of our preferred stock (if any) would receive a distribution of our available assets before common stockholders. Any future incurrence or issuance of debt would increase our interest cost and could adversely affect our results of operations and cash flows. We are not required to offer any additional equity securities to existing common stockholders on a preemptive basis. Therefore, additional issuances of common stock, directly or through convertible or exchangeable securities (including limited partnership interests in our operating partnership), warrants or options, will dilute the holdings of our existing common stockholders and such issuances, or the perception of such issuances, may reduce the market price of our common stock. Any preferred stock issued by us would likely have a preference on distribution payments, periodically or upon liquidation, which could eliminate or otherwise limit our ability to make distributions to common stockholders. Because our decision to incur or issue debt or issue equity or equity-related securities in the future will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing, nature or success of our future capital raising efforts. Thus, common stockholders bear the risk that our future incurrence or issuance of debt or issuance of equity or equity-related securities will adversely affect the market price of our common stock.

We have not established a minimum distribution payment level, and we cannot assure you of our ability to pay distributions in the future.

We intend to make quarterly distributions of an amount at least equal to all or substantially all of our REIT taxable income to holders of our common stock out of assets legally available therefore. We have not established a minimum distribution payment level and our ability to pay distributions may be adversely affected by a number of factors, including the risk factors described in this Form 10-K. Distributions will be authorized by our board of directors and declared by us based upon a number of factors, including actual results of operations, restrictions under Delaware law or any applicable debt covenants, our financial condition, our taxable income, the annual distribution requirements under the REIT provisions of the Code, our operating expenses and other factors our board of directors deems relevant. We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions in the future.

Furthermore, while we are required to make distributions in order to maintain our REIT status (as described above under “Risks Related to our Taxation as a REIT—We may be unable to generate sufficient revenue from operations to pay our operating expenses and to pay distributions to our stockholders”), we may elect not to maintain our REIT status, in which case we would no longer be required to make such distributions. Moreover, even if we do elect to maintain our REIT status, we may elect to comply with the applicable requirements by, after completing various procedural steps, distributing, under certain circumstances, a portion of the required amount in the form of shares of our common stock in lieu of cash. If we elect not to maintain our REIT status or to satisfy any required distributions in shares of common stock in lieu of cash, such action could negatively affect our business and financial condition as well as the price of our common stock. No assurance can be given that we will pay any dividends on shares of our common stock in the future.

We may in the future choose to pay dividends in our own stock, in which case you could be required to pay income taxes in excess of the cash dividends you receive.

We may in the future distribute taxable dividends that are payable in cash and shares of our common stock at the election of each stockholder. Taxable stockholders receiving such dividends will be required to include the full amount of the dividend as ordinary income to the extent of our current and accumulated earnings and profits for U.S. federal income tax purposes. As a result, stockholders may be required to pay income taxes with respect to such dividends in excess of the cash dividends received. If a U.S. stockholder sells the stock that it receives as a dividend in order to pay this tax, the sale proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our stock at the time of the sale. Furthermore, with respect to certain non-U.S. stockholders, we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in stock. In addition, if a significant number of our stockholders determine to sell shares of our common stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our common stock.

It is unclear whether and to what extent we will be able to pay taxable dividends in cash and stock in later years. Moreover, various aspects of such a taxable cash/stock dividend are uncertain and have not yet been addressed by the IRS. No assurance can be given that the IRS will not impose additional requirements in the future with respect to taxable cash/stock dividends, including on a retroactive basis, or assert that the requirements for such taxable cash/stock dividends have not been met.

An increase in market interest rates may have an adverse effect on the market price of our common stock.

One of the factors that investors may consider in deciding whether to buy or sell shares of our common stock is our distribution rate as a percentage of our share price relative to market interest rates. If the market price of our common stock is based primarily on the earnings and return that we derive from our investments and income with respect to our investments and our related distributions to stockholders, and not from the market value of the investments themselves, then interest rate fluctuations and capital market conditions will likely affect the market price of our common stock. For instance, if market interest rates rise without an increase in our distribution rate, the market price of our common stock could decrease as potential investors may require a higher distribution yield on our common stock or seek other securities paying higher distributions or interest. In addition, rising interest rates would result in increased interest expense on our floating rate debt, thereby adversely affecting cash flow and our ability to service our indebtedness and pay distributions.

Provisions in our certificate of incorporation and bylaws and of Delaware law may prevent or delay an acquisition of our company, which could decrease the trading price of our common stock.

Our certificate of incorporation, bylaws and Delaware law contain provisions that are intended to deter coercive takeover practices and inadequate takeover bids by making such practices or bids unacceptably expensive to the raider and to encourage prospective acquirers to negotiate with our board of directors rather than to attempt a hostile takeover. These provisions include, among others:

- a classified board of directors with staggered three-year terms;
- amendment of provisions in our certificate of incorporation and bylaws regarding the election of directors, classes of directors, the term of office of directors, the filling of director vacancies and the resignation and removal of directors only upon the affirmative vote of at least 80% of the then issued and outstanding shares of our capital stock entitled to vote thereon;
- amendment of provisions in our certificate of incorporation regarding corporate opportunity only upon the affirmative vote of at least 80% of the then issued and outstanding shares of our capital stock entitled to vote thereon;
- removal of directors only for cause and only with the affirmative vote of at least 80% of the then issued and outstanding shares of our capital stock entitled to vote in the election of directors;
- our board of directors to determine the powers, preferences and rights of our preferred stock and to issue such preferred stock without stockholder approval;
- advance notice requirements applicable to stockholders for director nominations and actions to be taken at annual meetings;
- a prohibition, in our certificate of incorporation, stating that no holder of shares of our common stock will have cumulative voting rights in the election of directors, which means that the holders of a majority of the issued and outstanding shares of common stock can elect all the directors standing for election; and
- a requirement in our bylaws specifically denying the ability of our stockholders to consent in writing to take any action in lieu of taking such action at a duly called annual or special meeting of our stockholders.

Public stockholders who might desire to participate in these types of transactions may not have an opportunity to do so, even if the transaction is considered favorable to stockholders. These anti-takeover provisions could substantially impede the ability of public stockholders to benefit from a change in control or a change in our management and board of directors and, as a result, may adversely affect the market price of our common stock and stockholders' ability to realize any potential change of control premium.

ERISA may restrict investments by plans in our common stock.

A plan fiduciary considering an investment in our common stock should consider, among other things, whether such an investment is consistent with the fiduciary obligations under the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), including whether such investment might constitute or give rise to a prohibited transaction under ERISA, the Code or any substantially similar federal, state or local law and, if so, whether an exemption from such prohibited transaction rules is available.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our direct investments in senior housing are described under “Business - Our Portfolio.”

Our Manager leases principal executive and administrative offices located at 1345 Avenue of the Americas, New York, New York 10105.

We maintain our properties in good condition and believe that our current facilities are adequate to meet the present needs of our business. We do not believe any individual property is material to our financial condition or results of operations.

ITEM 3. LEGAL PROCEEDINGS

We may be involved in litigation matters arising in the ordinary course of our business. Although we will be unable to predict with certainty the eventual outcome of any litigation, in the opinion of management, our legal proceedings are not expected to have a material adverse effect on our financial position or results of operations.

ITEM 4. MINE SAFETY DISCLOSURES

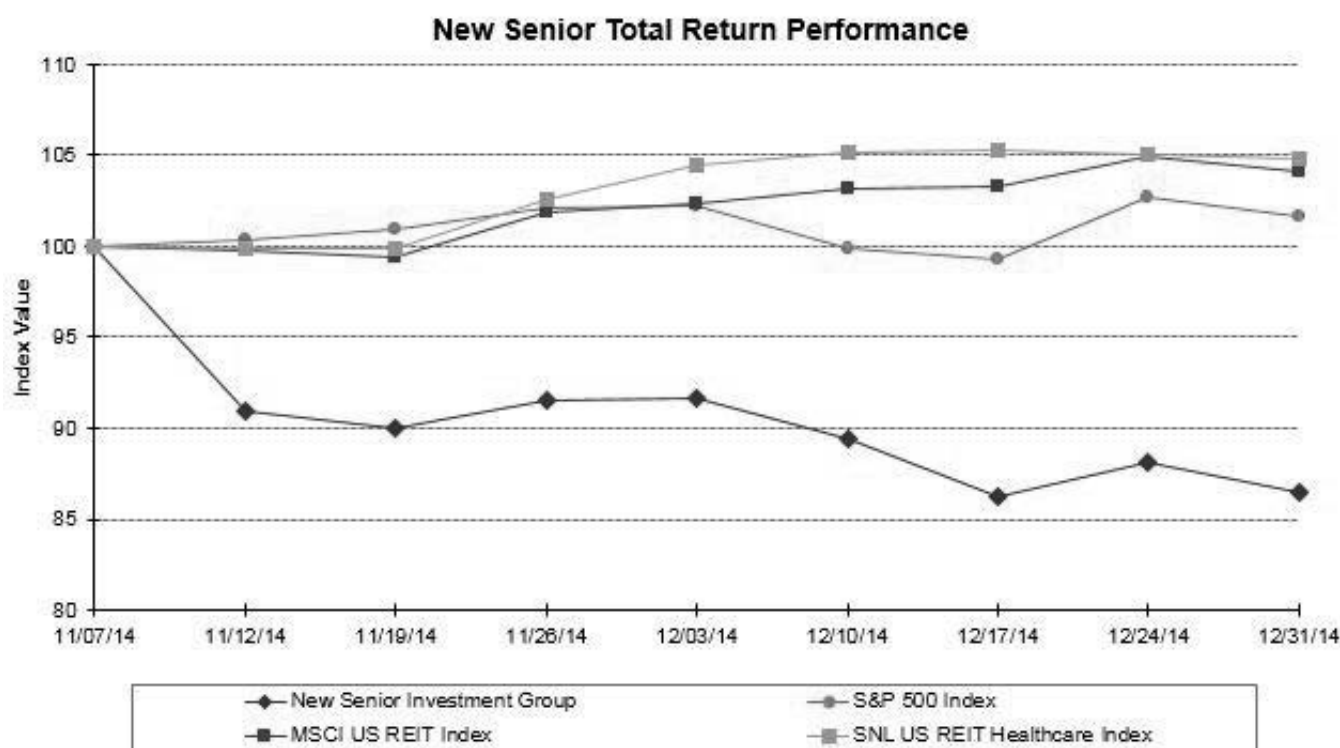

None.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

PERFORMANCE GRAPH

The following graph compares the cumulative total return for our shares (stock price change plus reinvested dividends) with the comparable return of three indices: S&P 500 Index, MSCI US REIT Index and SNL US REIT Healthcare Index. The graph assumes an investment of \$100 in the Company's shares and in each of the indices on November 7, 2014, and that all dividends were reinvested. The past performance of our shares is not an indication of future performances.

Index	Period Ending								
	11/07/14	11/12/14	11/19/14	11/26/14	12/03/14	12/10/14	12/17/14	12/24/14	12/31/14
New Senior Investment Group Inc.	100.00	90.93	89.95	91.55	91.66	89.43	86.22	88.08	86.42
S&P 500 Index	100.00	100.35	100.91	102.13	102.24	99.92	99.30	102.75	101.64
MSCI US REIT Index	100.00	99.72	99.44	101.88	102.40	103.15	103.34	104.97	104.12
SNL US REIT Healthcare Index	100.00	99.93	99.84	102.59	104.47	105.13	105.31	104.99	104.84

We have one class of common stock which trades on the NYSE under the trading symbol “SNR” since the spin-off from Newcastle. A “when-issued” trading market for our common stock on the NYSE began on October 27, 2014 and “regular-way” trading of our common stock began on November 7, 2014. Prior to October 27, 2014, there was no public market for our common stock. The following table sets forth, for the periods indicated, the high, low and last sale prices in dollars on the NYSE for our common stock and the distributions we declared with respect to the periods indicated.

2014	High	Low	Last Sale	Distributions Declared
Fourth Quarter ^(A)	\$ 19.30	\$ 16.45	\$ 16.45	\$ 0.23

(A) On November 6, 2014, we completed our spin-off from Newcastle. The November 7, 2014 closing price of our common stock on the NYSE was \$19.30.

We may declare quarterly distributions on our common stock. No assurance, however, can be given that any future distributions will be made or, if made, as to the amounts or timing of any future distributions as such distributions are subject to our earnings, financial condition, liquidity, capital requirements, REIT requirements and such other factors as our board of directors deems relevant.

On December 19, 2014, New Senior's board of directors declared a dividend of \$15.3 million, or \$0.23 per share, payable to shareholders of record on January 2, 2015. This dividend was paid on January 30, 2015.

On December 31, 2014, the closing sale price for our common stock, as reported on the NYSE, was \$16.45. As of December 31, 2014, there were approximately 39 record holders of our common stock. This figure does not reflect the beneficial ownership of shares held in nominee name.

Nonqualified Stock Option and Incentive Award Plan

The Plan provides for the grant of equity-based awards including restricted stock, stock options, stock appreciation rights, performance awards, tandem awards and other equity-based and non-equity based awards, in each case to the Manager, and to the directors, officers, employees, service providers, consultants and advisors of the Manager who perform services for New Senior and to New Senior's directors, officers, service providers, consultants and advisors. New Senior initially reserved 30 million shares of its common stock for issuance under the Plan; on the first day of each fiscal year beginning during the ten-year term of the Plan in and after calendar year 2014, that number will be increased by a number of shares of New Senior's common stock equal to 10% of the number of shares of common stock newly issued by New Senior during the immediately preceding fiscal year. New Senior's board of directors may also determine to issue options to the Manager that are not subject to the Plan, provided that the number of shares underlying any options granted to the Manager in connection with capital raising efforts would not exceed 10% of the shares sold in such offering and would be subject to NYSE rules.

Prior to the spin-off, Newcastle had issued rights relating to its common stock (the "Newcastle options") to the Manager in connection with its capital raising activities on behalf of Newcastle. In connection with the spin-off, 5,500,599 options that were held by the Manager, or by the directors, officers or employees of the Manager, were converted into an adjusted Newcastle option and a right relating to a number of shares of New Senior common stock (the "New Senior option"). The exercise price of each adjusted Newcastle option and New Senior option was set to collectively maintain the intrinsic value of the Newcastle option immediately prior to the spin-off and to maintain the ratio of the exercise price of the adjusted Newcastle option and the New Senior option, respectively, to the fair market value of the underlying shares as of the spin-off date, in each case based on the five day average closing price subsequent to the spin-off date. The options expire between January 12, 2015 and August 18, 2024.

The following table summarizes the total number of outstanding securities in the Plan and the number of securities remaining for future issuance, as well as the weighted average strike price of all outstanding securities as of December 31, 2014.

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options	Weighted Average Strike Price of Outstanding Options	Number of Securities Remaining Available for Future Issuance Under the Plan
Equity compensation plans approved by security holders:			
Nonqualified stock option and incentive award plan	20,000	\$ 17.21	29,978,630
Total approved	20,000 ^(A)	\$ 17.21	29,978,630 ^(B)

(A) The number of securities to be issued upon exercise of outstanding options does not include the 5,500,599 options converted into New Senior options as noted above, of which 4,991,752 are held by an affiliate of our manager and 508,847 were granted to the Manager, and assigned to certain Fortress employees. The 20,000 options in the table represent shares granted to our directors, other than Mr. Edens.

(B) No awards shall be granted on or after November 6, 2024 (but awards granted may extend beyond this date). The number of securities remaining available for future issuance is net of an aggregate of 1,370 shares of our common stock awards to our directors.

Equity Compensation Plans Not Approved by Security Holders

None.

ITEM 6. SELECTED FINANCIAL DATA

The Company's initial acquisition of senior care facilities on July 18, 2012 was accounted for as a business combination which gave rise to a new basis of accounting. Activities prior to and including July 17, 2012 are referred to as the "Predecessor" period and are prepared on a combined basis. Activities on and after July 18, 2012 are referred to as the "Successor" period and are prepared on a consolidated basis. The financial data as of and for the years ended December 31, 2014 (audited), December 31, 2013 (audited), the period from July 18, 2012 to December 31, 2012 (audited) and the period from January 1, 2012 to July 17, 2012 (audited) has been derived from our audited financial statements for those dates and periods included elsewhere in this Form 10-K. The financial data as of December 31, 2012 (audited) and the financial data as of and for the years ended December 31, 2011 (audited) and December 31, 2010 (unaudited) has been derived from our historical Consolidated and Combined Financial Statements that are not included in this Form 10-K. The selected financial data provided below should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our historical Consolidated and Combined Financial Statements and related notes.

As described in Note 2 of our Consolidated Financial Statements included in this filing, we applied acquisition accounting as of July 18, 2012 in connection with the acquisition of the initial portfolio of senior housing properties by Newcastle. As a result, the financial data for the Successor periods is not comparable to that of our Predecessor.

Operating results for the periods presented are not necessarily indicative of the results that may be expected for the entire year ending December 31, 2015 or for any future period. The impact of acquisitions, change in the Management Agreement and other changes due to the spin-off are discussed in greater detail within the "Consolidated Financial Information" section of this filing. The data should be read in conjunction with the Consolidated and Combined Financial Statements, related notes and other financial information included herein.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's discussion and analysis of financial condition and results of operations is intended to help the reader understand the results of operations and financial condition of New Senior. The following should be read in conjunction with the Consolidated Financial Statements and notes thereto included in Item 8 within this Annual Report on Form 10-K. This discussion contains forward-looking statements that are subject to known and unknown risks and uncertainties. Actual results and the timing of events may differ significantly from those expressed or implied in such forward-looking statements due to a number of factors, including those included in Part I. Item 1A. "Risk Factors" of this Annual Report on Form 10-K.

OVERVIEW

Our Business

We invest in a diversified portfolio of senior housing properties across 27 states in the United States. We were formed as Newcastle Senior Living Holdings LLC, a Delaware limited liability company, in 2012. We converted to a Delaware corporation on May 30, 2014 and changed our name to New Senior Investment Group Inc. on June 16, 2014.

On November 6, 2014, our spin-off was completed with the distribution of all of our outstanding shares to the holders of Newcastle common stock. Newcastle was our sole stockholder until the spin-off. Following the spin-off, we are a separate publicly traded REIT primarily focused on investing in senior housing properties and listed on the NYSE under the symbol "SNR." We are headquartered in New York, New York.

We conduct our business through two reportable segments: Managed Properties and Triple Net Lease Properties. See our Consolidated Financial Statements and the related notes, including "Note 1. Organization," included in Part II, Item 8 of this Annual Report on Form 10-K.

We are externally managed by the Manager and advised by Fortress on various aspects of our business and our operations, subject to the supervision of our board of directors. For its services, the Manager is entitled to an annual management fee and incentive compensation, both as defined in, and in accordance with the terms of, the Management Agreement.

Acquisitions

For a discussion of acquisitions made in the current year, See Part I, Item 1- "Business—Acquired Properties" of this Annual Report on Form 10-K.

We intend to continue to acquire senior housing properties for both our Managed Properties and Triple Net Lease Properties segments.

MARKET CONSIDERATIONS

We invest in assets that generate significant cash flows and have the potential for meaningful capital appreciation. We seek to employ a conservative capital structure to generate attractive risk adjusted returns throughout different business cycles and interest rate environments. We take an active approach centered around identifying and executing on opportunities, responding to the changing market environment, and managing our investment portfolio to enhance returns. Specifically:

- we expect projected changes in demographics to drive increased demand for senior housing, creating favorable supply-demand fundamentals;
- targeting smaller portfolios enables us to reduce competition with other active REIT buyers of large portfolios; and
- capitalizing on the experience of our Manager in the senior housing industry, we expect to generate growth in property-level net operating income when operational and structural efficiencies are achieved.

We made eight acquisitions of senior housing portfolios comprised of 16 properties during the year ended December 31, 2014. We continue to explore opportunities to invest in additional senior housing properties across the United States. While we generally target small portfolios, we have invested in large portfolios that we believe offer attractive risk-adjusted returns.

Our senior housing acquisitions have been financed with a combination of fixed and floating rate debt. Rising interest rates would increase the cost of our floating rate financing and negatively impact the returns on our senior housing investments.

RESULTS OF OPERATIONS

Comparability of Information

We have a limited operating history as we acquired our first portfolio of senior housing properties in July 2012. Prior to November 7, 2014 we were not operating as a separate, standalone entity, and our results of operations were prepared on a spin-off basis from the Consolidated Financial Statements and accounting records of Newcastle and reflected Newcastle's basis in the acquired properties. Management believes that the assumptions and methods of allocation used in our results of operations are reasonable.

Segment Overview

We evaluate our business operations and allocate resources based on two segments: (i) Managed Properties and (ii) Triple Net Lease Properties. Under our Managed Properties segment, we operate 43 properties under property management agreements with the Property Managers. Under our Triple Net Lease Properties segment, we lease 57 of our properties under three triple net master leases.

We evaluate performance of these reportable business segments based on segment net operating income ("NOI"). We consider NOI as an important supplemental measure used to evaluate the operating performance of our segments because it allows investors, analysts and our management to assess our unleveraged property-level operating results and to compare our operating results with other real estate companies, and between periods on a consistent basis. We define NOI as total revenue less property operating expense.

Our Managed Properties segment operates various types of senior housing properties and provides our customers with a broad range of services that management believes are integral to the success and growth of this segment. Our Triple Net Lease Properties segment leases senior housing properties on a long-term basis whereby we do not manage the underlying operations, as our tenants are typically responsible for bearing operating costs including maintenance, utilities, taxes, insurance, repairs and capital improvements. Thus, resident fees and services, property operating expense, general and administrative expense, other income and expense and income tax expense are not relevant to the Triple Net Lease Properties segment. Because of such differences in the nature of the segments' activities, each segment requires a different type of management focus. As such, these segments are managed separately. In deciding how to allocate resources and assess performance, our chief operating decision maker regularly evaluates the performance of our reportable segments on the basis of NOI.

Year ended December 31, 2014 compared to the year ended December 31, 2013

The following table sets forth our historical results of operations for the years ended December 31, 2014 and December 31, 2013, derived from our audited Consolidated Financial Statements included elsewhere in this Form 10-K.

(dollars in thousands)

	Year Ended December 31, 2014		Year Ended December 31, 2013	
	Amount	Percent of Revenues	Amount	Percent of Revenues
Revenues				
Resident fees and services	\$ 156,993	61.6 %	\$ 83,218	97.7 %
Rental revenue	97,992	38.4 %	1,918	2.3 %
Total revenues	254,985	100.0 %	85,136	100.0 %
Expenses				
Property operating expense	112,242	44.0 %	59,726	70.2 %
Depreciation and amortization	103,279	40.5 %	26,933	31.6 %
Interest expense	57,026	22.4 %	10,589	12.4 %
Acquisition, transaction and integration expense	14,295	5.6 %	13,294	15.6 %
Management fee to affiliate	8,470	3.3 %	1,796	2.1 %
General and administrative expense	7,416	2.9 %	2,188	2.6 %
Other (income) expense	(1,500)	(0.6)%	—	0.0 %
Total expenses	301,228	118.1 %	114,526	134.5 %
Loss before income taxes	(46,243)	(18.1)%	(29,390)	(34.5)%
Income tax expense	160	0.1 %	656	0.8 %
Net loss	\$ (46,403)	(18.2)%	\$ (30,046)	(35.3)%

The operating results shown above include both the Managed Properties and Triple Net Lease Properties segments. Our initial Triple Net Lease Properties were acquired in December 2013. As these properties were acquired in December 2013, they had a negligible impact on operating results for the year ended December 31, 2013. A significant portion of the changes in revenues and expenses between the years ended December 31, 2014 and December 31, 2013 are a direct result of owning the 51 Triple Net Lease Properties that were acquired in December 2013 for the full year ended December 31, 2014.

The following table provides a comparison of the results of operations of our segments for the years ended December 31, 2014 and December 31, 2013:

(dollars in thousands)

	Year Ended December 31, 2014		Year Ended December 31, 2013	
	Amount	Percent of Revenues	Amount	Percent of Revenues
<i>Managed Properties</i>				
Resident fees and services	\$ 156,993	100.0%	\$ 83,218	100.0%
Property operating expense	112,242	71.5%	59,726	71.8%
Segment NOI for Managed Properties	44,751	28.5%	23,492	28.2%
<i>Triple Net Lease Properties</i>				
Rental revenue	97,992	100.0%	1,918	100.0%
Segment NOI for Triple Net Lease Properties	\$ 97,992	100.0%	\$ 1,918	100.0%

The following table provides the reconciliation of our segment NOI to net loss, and compares the results of operations for the years ended December 31, 2014 and December 31, 2013:

	Year Ended December 31, 2014		Year Ended December 31, 2013	
	Amount	Percent of Revenues	Amount	Percent of Revenues
(dollars in thousands)				
Total revenue	\$ 254,985	100.0 %	\$ 85,136	100.0 %

Segment NOI for Triple Net Lease Properties	97,992	38.4 %	1,918	2.3 %
Total Segment NOI	142,743	56.0 %	25,410	29.9 %
Expenses				
Depreciation and amortization	103,279	40.5 %	26,933	31.6 %
Interest expense	57,026	22.4 %	10,589	12.4 %
Acquisition, transaction and integration expense	14,295	5.6 %	13,294	15.6 %
Management fee to affiliate	8,470	3.3 %	1,796	2.1 %
General and administrative expense	7,416	2.9 %	2,188	2.6 %
Other (income) expense	(1,500)	(0.6)%	—	—
Income tax expense	160	0.1 %	656	0.8 %
Net loss	\$ (46,403)	(18.2)%	\$ (30,046)	(35.3)%

Managed Properties

During 2014, we acquired 10 senior housing properties in seven different portfolios bringing the total number of Managed Properties to 43 as of December 31, 2014. We accounted for each acquisition under the acquisition method, whereby all assets acquired and liabilities assumed are recognized at their acquisition-date fair value with acquisition-related costs being expensed as incurred. The results of operations from the acquisitions are reflected in our Consolidated Financial Statements from the date of respective acquisition.

	As of and for the Year Ended December 31,	
	2014	2013
Total properties	43	33
Total beds	5,362	4,453
Average occupancy rate	83.6%	82.5%

Same store information, as used herein, is defined as information for 12 properties owned for the entirety of comparable periods. The following table presents Same Store Segment NOI, Segment NOI for non-Same Store properties and Total Segment NOI for the years ended December 31, 2014 and December 31, 2013:

	Year Ended December 31,		Increase (Decrease)	
	2014	2013	Amount	Percentage
(dollars in thousands)				
<i>Managed Properties</i>				
Resident fees and services	\$ 58,759	\$ 53,967	\$ 4,792	8.9%
Property operating expense	(39,685)	(37,749)	(1,936)	5.1%
Same Store Segment NOI	19,074	16,218	2,856	17.6%
Segment NOI for non-Same Store properties	25,677	7,274	NM	NM
Total Segment NOI	\$ 44,751	\$ 23,492	NM	NM

NM – Not meaningful

Resident fees and services

Resident fees and services represent residents' monthly rental and care fees. Revenue from resident fees and services for the years ended December 31, 2014 and December 31, 2013 was \$157.0 million and \$83.2 million, respectively. For the year ended December 31, 2014, resident fees and services include revenues derived from the additional ten properties that were acquired after December 31, 2013 and have been part of operations since their acquisition date. This series of acquisitions increased the total number of

beds by 909 to bring the total bed count to 5,362 for the Managed Properties segment at December 31, 2014. Average occupancy rates for the years ended December 31, 2014 and December 31, 2013 were 83.6% and 82.5%, respectively.

Same store resident fees and services increased by \$4.8 million to \$58.8 million for the year ended December 31, 2014 from \$54.0 million for the year ended December 31, 2013. This increase was driven by an increase in rental rates, offset by a 0.7% decrease in average occupancy rates on a same store basis from 83.5% as of December 31, 2013 to 82.8% as of December 31, 2014.

Property operating expense

Property operating expense for the years ended December 31, 2014 and December 31, 2013 were \$112.2 million and \$59.7 million, respectively. The increase was primarily due to increases in labor, food, utilities, marketing and other costs as a result of the additional properties that were acquired after December 31, 2013 and have been part of our operations since their respective acquisition dates. Property operating expense as a percent of segment revenues decreased to 71.5% for the year ended December 31, 2014 from 71.8% for the year ended December 31, 2013.

Property operating expense include property management fee and travel reimbursements paid to Property Managers of \$9.7 million and \$5.2 million for the years ended December 31, 2014 and December 31, 2013, respectively. With the exception of the addition of JEA as a Property Manager, there have been no changes to the basis by which property management fees are paid to the Property Managers.

Same store property operating expense increased by \$1.9 million to \$39.7 million from \$37.8 million for the years ended December 31, 2014 and December 31, 2013, respectively, primarily due to an increase in labor costs.

Segment NOI for Managed Properties

Segment NOI for Managed Properties was \$44.8 million and \$23.5 million, or as a percent of resident fees and services, 28.5% and 28.2%, for the years ended December 31, 2014 and December 31, 2013, respectively. The increase in segment NOI was primarily due to the increase in resident fees and services, as explained above, and reflects the impact of the ten senior housing property acquisitions since December 31, 2013.

Same Store Segment NOI for the Managed Properties segment increased by \$2.9 million, to \$19.1 million for the year ended December 31, 2014 from \$16.2 million for the year ended December 31, 2013, due to proportionally larger increases in rental rates when compared to increases in labor costs.

Triple Net Lease Properties

Rental revenue and Segment NOI for Triple Net Lease Properties

Segment NOI for Triple Net Lease Properties was \$98.0 million and \$1.9 million for the years ended December 31, 2014 and December 31, 2013, respectively. The Holiday Portfolios, our initial Triple Net Lease Properties, were acquired in December 2013. Therefore, a significant portion of the increase in revenues between the year ended December 31, 2014 and December 31, 2013 is a direct result of the 51 Triple Net Lease Properties that were acquired in December 2013. As a percentage of rental revenue, segment NOI was 100% of revenue for each fiscal year as the lessee operates the property and bears the related costs, including repairs, maintenance, capital expenditures, utilities, taxes, insurance and the payroll expense of property-level employees.

Expenses

Depreciation and amortization

Depreciation and amortization expense was \$103.3 million and \$26.9 million for the years ended December 31, 2014 and December 31, 2013, respectively. The increase was primarily the result of depreciation and amortization related to the Holiday Portfolios that were acquired in December 2013. In addition, 16 additional properties were acquired in our Managed Properties and Triple Net Lease segments after December 31, 2013 and have been part of our operations since their respective acquisition dates.

Interest expense

Interest expense was \$57.0 million and \$10.6 million for the years ended December 31, 2014 and December 31, 2013, respectively. The increase was primarily the result of additional interest expense related to the Holiday Portfolios that were acquired in December

2013. In addition, we incurred an additional \$195.1 million in debt since December 31, 2013 and repaid \$13.7 million of mortgage notes payable. The net increase in mortgage notes payable, related to the acquisition of 16 properties since December 31, 2013, resulted in increased interest expense.

The weighted average effective interest rate for the years ended December 31, 2014 and December 31, 2013 was 5.00% and 4.15%, respectively.

Acquisition, transaction and integration expense

Acquisition, transaction and integration expense for the years ended December 31, 2014 and December 31, 2013 was \$14.3 million and \$13.3 million, respectively. Acquisition and transaction expenses included costs related to completed and potential acquisitions and transactions and include advisory, legal, accounting, valuations and other professional or consulting fees and spin-off related costs. Integration expenses include costs directly related to the integration of acquired businesses such as lender mandated repairs, licensing, rebranding and training. Acquisition, transaction and integration expense includes \$9.3 million and \$1.7 million of spin-off related costs and \$0.4 million and \$0.7 million of integration costs for the years ended December 31, 2014 and December 31, 2013, respectively.

Management fee to affiliate

Management fee to affiliate expense was \$8.5 million and \$1.8 million for the years ended December 31, 2014 and December 31, 2013, respectively.

Subsequent to the spin-off, we are party to a management agreement with the Manager, and management fee to affiliate expense for the period from November 7, 2014 to December 31, 2014 was \$1.9 million. We pay a management fee equal to 1.5% per annum of our gross equity, which is generally the equity invested by Newcastle as of the distribution date, plus certain adjustments as defined in the agreement with the Manager. The Manager is also entitled to receive, on a quarterly basis, incentive compensation. Prior to the spin-off, Newcastle was party to a management agreement with the Manager, and, as a subsidiary of Newcastle, we were allocated a portion of the relevant management fee calculated as 1.5% of daily gross equity, as defined in the management agreement.

General and administrative expense

General and administrative expense for the years ended December 31, 2014 and December 31, 2013 was \$7.4 million and \$2.2 million, respectively. The increase was primarily driven by growth in the portfolio, coupled with expenses associated with the implementation of Sarbanes-Oxley compliant accounting policies and procedures as part of becoming a standalone public company.

Other (income) expense

We recognized \$1.5 million in other income for the year ended December 31, 2014 related to the change in fair value of contingent consideration attributable to a portfolio of senior housing facilities acquired in 2013.

Income tax expense

We have been operating so as to qualify as a REIT under the requirements of the Code. However, certain of our activities are conducted through our TRS and therefore are subject to federal and state income taxes. During the years ended December 31, 2014 and December 31, 2013, our TRS recorded approximately \$0.2 million and \$0.7 million in income tax expense, respectively.

Year ended December 31, 2013 compared to the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012

The following table sets forth our historical results of operations for the year ended December 31, 2013, the period from July 18, 2012 to December 31, 2012, and the period from January 1 to July 17, 2012, derived from our audited Consolidated Financial Statements included elsewhere in this Form 10-K.

(dollars in thousands)	Successor				Predecessor	
	Year Ended December 31, 2013		July 18, 2012 to December 31, 2012		January 1, 2012 to July 17, 2012	
	Amount	Percent of Revenues	Amount	Percent of Revenues	Amount	Percent of Revenues
Revenues						
Resident fees and services	\$ 83,218	97.7 %	\$ 18,000	100.0 %	\$ 19,680	100.0%

Loss before income taxes	(29,390)	(34.5)%	(9,337)	(51.8)%	2,145	10.9%
Income tax expense	656	0.8 %	150	0.8 %	—	—
Net loss	\$ (30,046)	(35.3)%	\$ (9,487)	(52.6)%	\$ 2,145	10.9%

While the operating results shown above include both the Managed Properties and Triple Net Lease Properties segments, our initial Triple Net Lease Properties were acquired in December 2013. Thus, the overall results for the year ended December 31, 2013, the period from July 18, 2012 to December 31, 2012, and the period from January 1, 2012 to July 17, 2012 are primarily those of the Managed Properties segment. In addition, a significant portion of the changes in revenues and expenses between the years ended December 31, 2013 and December 31, 2012 are a direct result of the series of acquisitions completed in the fourth calendar quarter of 2012 and in 2013, which increased the total number of properties owned from 12 as of December 31, 2012 to 84 as of December 31, 2013.

The following table provides a comparison of the results of operations of our segments for the year ended December 31, 2013, the period from July 18, 2012 to December 31, 2012 and the period from January 1, 2012 to July 17, 2012:

(dollars in thousands)	Successor				Predecessor

Managed Properties

During 2013, we acquired 21 senior housing properties in seven different portfolios bringing the total number of Managed Properties to 33 as of December 31, 2013. We accounted for each acquisition under the acquisition method, whereby all assets acquired and liabilities assumed are recognized at their acquisition-date fair value with acquisition-related costs being expensed as incurred. The results of operations from the acquisitions are reflected in our Consolidated Financial Statements from the date of respective acquisition.

	As of and for the Year Ended December 31,	
	2013	2012
Total properties	33	12
Total beds	4,453	1,426

Resident fees and services

Resident fees and services represent residents' monthly rental and care fees. Revenue from resident fees and services for the year ended December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012 was \$83.2 million, \$18.0 million and \$19.7 million, respectively. Resident fees and services include revenues derived from the acquisitions of 21 senior housing facilities in 2013 and subsequent operations of such facilities. This series of acquisitions increased the total number of beds by 3,027, and brought the total bed count to 4,453 for the Managed Properties segment at December 31, 2013. Average occupancy rates for the year ended December 31, 2013 and the period July 18, 2012 to December 31, 2012 were 82.5% and 86.3%, respectively.

Property operating expense

Property operating expense for the year ended December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012 was \$59.7 million, \$13.0 million and \$13.8 million, respectively. The increase was primarily due to increases in labor, food, utilities, marketing and other costs as a result of the additional properties that were acquired and have been part of the operations. As a percentage of segment revenues, property operating expense remained fairly stable at 71.8%, 72.3% and 70.0% for the year ended December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, respectively.

Property operating expense includes property management fee and travel reimbursements paid to property managers of \$5.2 million, \$1.1 million and \$1.0 million, for the year ended December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, respectively. Pursuant to our property management agreements, we pay fees equal to either (i) 5% of the property's effective gross income (as defined in each respective agreement) or (ii) 6% of the property's effective gross income (as defined in each respective agreement) for the first two years and 7% thereafter. The increase in dollar amount is due to additional properties acquired and managed by property managers. JEA was not a property manager in either 2013 or 2012.

Segment NOI for Managed Properties

Segment NOI for Managed Properties was \$23.5 million, \$5.0 million and \$5.9 million, or as a percent of segment revenues was 28.2%, 27.7% and 30.0% for the year ended December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, respectively. The decrease in NOI as a percent of resident fees and services was due to increase in property operating expenses as discussed above. The dollar increase reflects the impact of the acquisitions of 33 senior housing properties since July 2012.

Triple Net Lease Properties

Rental revenue and Segment NOI for Triple Net Lease Properties

We completed the acquisition of the Holiday Portfolios in December 2013 which resulted in the creation of our Triple Net Lease Properties segment. Due to the timing of this acquisition, the results of operations for this segment have only limited results. Rental revenue was \$1.9 million for the year ended December 31, 2013 and \$0 in prior periods. Rental revenue is comprised of fixed lease payments from the Master Tenants and is generally not impacted by the performance of the properties. The average occupancy rate during the period of time that the Triple Net Lease Properties were held in 2013 was 89.1%. As a percentage of rental revenue, segment NOI was 100% for the year ended December 31, 2013.

Expenses

Depreciation and amortization

As of July 18, 2012, our real estate investments were recorded at fair value as a result of the acquisition of our initial portfolio of senior housing properties. Consequently, because of the change in basis in our real estate investments, depreciation and amortization is not comparable between the Predecessor and Successor periods. We recorded \$26.9 million in depreciation and amortization for the year ended December 31, 2013, \$5.8 million for the period from July 18, 2012 to December 31, 2012, and \$1.2 million for the period from January 1, 2012 to July 17, 2012.

Interest expense

Interest expense was \$10.6 million, \$1.8 million and \$2.5 million for the year ended December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, respectively. Because all but one of the mortgages relating to Managed Properties acquired were refinanced, interest expense between Predecessor and Successor periods is not directly comparable.

In 2013, we incurred an additional \$957.0 million and repaid \$0.7 million of mortgage notes payable. The weighted average interest rate for the year ended December 31, 2013 and the period from July 18, 2012 to December 31, 2012 was 4.15% and 3.60%, respectively.

Acquisition, transaction and integration expense

Acquisition, transaction and integration expense for the year ended December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012 was \$13.3 million, \$6.0 million and \$0, respectively. Acquisition and transaction expenses included costs related to completed and potential acquisitions and transactions and include advisory, legal, accounting, valuations and other professional or consulting fees and spin-off related costs. Integration expenses include costs directly related to the integration of acquired businesses such as lender mandated repairs, licensing, rebranding and training. Acquisition, transaction and integration expense include \$1.7 million for spin-off related costs during the year ended December 31, 2013. No such costs were incurred during the previous periods. The remaining increase in dollar amounts was a result of the acquisition of 21 properties in 2013, up from 12 properties during the period from July 18, 2012 to December 31, 2012. Integration

costs of \$0.7 million for the year ended December 31, 2013 has been reclassified from Property operating expense to Acquisition, transaction and integration expense to conform to the 2014 presentation.

Management fee to affiliate

Management fee to affiliate expense was \$1.8 million, \$0.5 million and \$0, for the year ended December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, respectively.

Newcastle was party to a management agreement with the Manager during the Successor period, and as a subsidiary of Newcastle, we were allocated a portion of this management fee, calculated as 1.5% of daily gross equity, as defined. We were not party to the management agreement between the Manager and Newcastle during the Predecessor periods.

General and administrative expense

General and administrative expense for the year ended December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012 was \$2.2 million, \$0.3 million and \$0.0 million, respectively. We acquired 21 properties in 2013 and 12 properties during the period from July 18, 2012 to December 31, 2012. The increase in general and administrative expense was a result of an increase in the number of properties being operational subsequent to respective acquisition dates.

Income tax expense

We have been operating so as to qualify as a REIT under the requirements of the Code. However, certain of our activities are conducted through our TRS and therefore are subject to federal and state income taxes. During the year ended December 31, 2013, and the period from July 18, 2012 to December 31, 2012, our TRS recorded approximately \$0.7 million and \$0.2 million in income tax expense, respectively. In the Predecessor period, we were treated as a disregarded single-member limited liability entity for U.S. federal and state income tax purposes, and, consequently, were not subject to, and did not record, any income tax expense.

OUR PORTFOLIO

See Item 1 - "Business - Our Portfolio" for a description of our portfolio of senior housing.

TRANSACTIONS WITH AFFILIATES AND AFFILIATED ENTITIES

Management Agreements

See Item 1 - "Business - Management Agreements" included in part I, Item 1 of this Annual report on Form 10-K and "Note 10. Transactions with Affiliates and Affiliated Entities," included in part II, Item 8 of this Annual report on Form 10-K for more information on the Management Agreement.

Property Management Agreements

We are party to property management agreements for each senior housing property within the Managed Properties segment. We enter into long-term property management agreements for our managed properties with Blue Harbor, Holiday and JEA. Blue Harbor and Holiday's property management agreements have initial ten-year terms, with successive automatic one-year renewal periods. JEA's property management agreement has an initial five-year term, with successive automatic one-year renewal periods. Under these agreements, we pay monthly property management fees. For AL/MC properties managed by Blue Harbor and Holiday, we pay management fees equal to 6% of effective gross income for the first two years and 7% thereafter. For IL-only properties managed by Blue Harbor and Holiday, we pay management fees equal to 5% of effective gross income. We pay management fees equal to 5% of gross revenues for the property managed by JEA.

LIQUIDITY AND CAPITAL RESOURCES

Our principal liquidity needs are to (i) fund operating expenses, (ii) meet debt service requirements, (iii) fund recurring capital expenditures and acquisition activities and (iv) make dividend distributions. At December 31, 2014, we had approximately \$226.4 million in liquidity, consisting of unrestricted cash and cash equivalents. In connection with the spin-off, Newcastle contributed cash to us in the amount of \$197.0 million. Accordingly, we had approximately \$245.2 million in liquidity at the spin-off date. Cash flow provided by operations constitutes a critical component of our liquidity. Essentially, our cash flow provided by operations is equal to (i) revenues received from our senior housing portfolios, less (ii) operating expenses (primarily management fees, property operating expense, professional fees, insurance and taxes), less (iii) interest on the mortgage notes payable. Net cash provided by (used in) operating activities was \$46.6 million, \$42.5 million, \$(1.5) million, and \$3.1 million for the years ended December 31, 2014 and December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, respectively.

We anticipate that our cash on hand combined with our cash flows provided by operating activities will be sufficient to fund our business operations, recurring capital expenditures, debt service and distributions to our shareholders over the next twelve months. In addition, we may elect to meet certain liquidity requirements through proceeds from the sale of assets or from borrowings and/or equity and debt offerings.

These expectations are forward-looking and subject to a number of uncertainties and assumptions, which are described below under "Factors That Could Impact Our Liquidity, Capital Resources and Capital Obligations" as well as "Risk Factors." If our expectations about our liquidity prove to be incorrect, we could be subject to a shortfall in liquidity in the future, and this shortfall may occur rapidly and with little or no notice, which would limit our ability to address the shortfall on a timely basis.

Factors That Could Impact Our Liquidity, Capital Resources and Capital Obligations

The following factors could impact our liquidity, capital resources and capital obligations. As such, if their outcomes do not meet our expectations, changes in these factors may negatively impact liquidity:

- *Access to Financing:* Decisions by investors, counterparties and lenders to enter into transactions with us will depend upon a number of factors, such as our historical and projected financial performance, compliance with covenant terms, industry and market trends, the availability of capital and our investors', counterparties' and lenders' policies and rates applicable thereto and the relative attractiveness of alternative investment or lending opportunities.
- *Impact of Expected Additional Borrowings or Sales of Assets on Cash Flows:* The availability and timing of and proceeds from additional borrowings may be different than expected or may not occur as expected. Proceeds from sales of assets are unpredictable and may vary materially from their estimated fair value and carrying value.

Debt Obligations

Mortgage notes related to certain senior housing properties contain various customary loan covenants, in some cases including a Debt Service Coverage Ratio and Project Yield, as defined in the agreements. We were in compliance with all of the covenants as of December 31, 2014.

See Note 8 to the Consolidated Financial Statements, included in Part II, Item 8 of this Annual Report on Form 10-K, for further information related to our non-recourse mortgage notes as of December 31, 2014.

Capital Expenditures

For our Managed Properties segment, we anticipate that capital expenditures will be funded through operating cash flows from the Managed Properties along with additional borrowings. However, our borrowing capability may be limited or restricted in certain circumstances by our existing contractual debt obligations and, therefore, limit our ability to fund capital expenditures.

With respect to our Triple Net Lease Properties segment, the terms of these arrangements typically require the tenants to fund all necessary capital expenditures in order to maintain and improve the applicable senior housing properties. To the extent that our tenants are unwilling or unable to fund these capital expenditure obligations under the existing lease arrangements, we may fund capital expenditures with additional borrowings or cash flow from the operations of these senior housing properties. We may also provide corresponding loans or advances to tenants which would increase the rent payable to us.

Cash Flows

The following table provides a summary of our cash flows for the year ended December 31, 2014, the year ended December 31, 2013, the period from July 18 to December 31, 2012, and the period from January 1, 2012 to July 17, 2012:

(dollars in thousands)

	Successor			Predecessor
	Year Ended December 31, 2014	Year Ended December 31, 2013	July 18, 2012 to December 31, 2012	January 1, 2012 to July 17, 2012
Net cash provided by (used in)				
Operating activities	\$ 46,611	\$ 42,532	\$ (1,486)	\$ 3,076
Investing activities	(331,858)	(1,253,174)	(44,411)	(251)
Financing activities	481,231	1,231,315	55,617	(2,955)
Net increase (decrease) in cash and cash equivalents	195,984	20,673	9,720	(130)
Cash and cash equivalents, beginning of period	30,393	9,720	—	1,057
Cash and cash equivalents, end of period	\$ 226,377	\$ 30,393	\$ 9,720	\$ 927

Operating activities

Net cash provided by (used in) operating activities was \$46.6 million, \$42.5 million, \$(1.5) million, and \$3.1 million for the years ended December 31, 2014 and December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, respectively.

The \$4.1 million increase from the year ended December 31, 2013 to the year ended December 31, 2014 was primarily driven by an increase in cash flows provided by resident fees and services as a result of an increased number of properties in the Managed Properties segment and rental revenue in the Triple Net Lease Properties segment. The increase in cash provided by resident fees and services due to the increased number of properties was largely offset by a proportional increase in property operating expense for the additional properties acquired within the Managed Properties segment, and the increase in rental revenue in the Triple Net Lease Properties segment was partially offset by increased interest expense related to debt issued to finance acquisitions in the Triple Net Lease Properties segment.

The increase in cash from operating activities for the year ended December 31, 2013 over prior periods was primarily driven by incremental cash received from resident fees and services in the Managed Properties segment along with cash received from rental revenue in the Triple Net Lease Properties segment. Conversely, cash flow from operating activities for the period from July 18, 2012 to December 31, 2012 decreased from the period from January 1, 2012 to July 17, 2012 as a result of additional costs incurred by the Company in connection with the integration of our acquisitions.

Investing activities

Net cash used in investing activities was \$331.9 million, \$1,253.2 million, \$44.4 million, and \$0.3 million for the years ended December 31, 2014 and December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, respectively.

Net cash used in investing activities during the year ended December 31, 2014 was less than net cash used during the year ended December 31, 2013 due to a change in the relative magnitude of acquisitions between the respective periods. During the year ended December 31, 2014, we acquired 16 properties for \$314.9 million, whereas during the year ended December 31, 2013, we acquired 72 properties for \$1,249.2 million. During the years ended December 31, 2014 and December 31, 2013, cash used and cash reserved for capital expenditures amounted to \$12.1 million and \$3.5 million, respectively. Net cash used in investing activities during the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012 was significantly lower compared to the year ended December 31, 2013 because our operations had only recently commenced, and there were only four properties acquired in the period from July 18, 2012 to December 31, 2012 while there were no significant acquisitions in the period from January 1, 2012 through July 17, 2012.

Financing activities

Net cash provided by (used in) financing activities was \$481.2 million, \$1,231.3 million, \$55.6 million and \$(3.0) million for the years ended December 31, 2014 and December 31, 2013 and the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, respectively.

Compared to December 31, 2013, cash flow from financing activities for the year ended December 31, 2014 decreased \$750.1 million, primarily because we acquired 14 properties financed with \$195.1 million in long term debt during the year ended December 31, 2014 whereas we acquired 72 properties financed with \$904.5 million in long-term debt during the year ended December 31, 2013. Net cash provided by financing activities further decreased during the year ended December 31, 2014 when compared to the year ended December 31, 2013 because the net amount of contributions and distributions from Newcastle decreased by \$65.9 million due to the decrease in property acquisitions.

Compared to the periods from July 18, 2012 to December 31, 2012 and January 1, 2012 to July 17, 2012, cash flow from financing activities for the year ended December 31, 2013 increased \$1,178.7 million, primarily because we acquired 72 properties financed with \$904.5 million in long-term debt, offset by \$40.6 million in finance costs during the year ended December 31, 2013, whereas we acquired four properties financed with \$32.1 million in long-term debt during the period from July 18, 2012 to December 31, 2012 and had no significant acquisitions in the period from January 1, 2012 to July 17, 2012. Net cash provided by financing activities further increased between the year ended December 31, 2013 and the period from July 18, 2012 to December 31, 2012 because the net amount of contributions and distributions from Newcastle increased by \$343.9 million.

REIT Compliance Requirements

We have been operating so as to qualify as a REIT for U.S. federal income tax purposes. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its REIT taxable income, excluding net capital gains. We intend to pay dividends greater than all of our REIT taxable income to holders of our common stock in 2014, if, and to the extent, authorized by our board of directors. We note that a portion of this requirement may be able to be met in future years with stock dividends, rather than cash distributions, subject to limitations. We expect that our operating cash flows will exceed REIT taxable income due to depreciation and other non-cash deductions in computing REIT taxable income. However, before we pay any dividend, whether for U.S. federal income tax purposes or otherwise, we must first meet both our operating requirements and debt service on our obligations. If we do not have sufficient liquid assets to enable us to satisfy the 90% distribution requirement, or if we decide to retain cash, we may sell assets, issue additional equity securities or borrow funds to make cash distributions, or we may make a portion of the required distribution in the form of a taxable stock distribution or distribution of debt securities.

Income Tax

We have been operating so as to qualify as a REIT under the requirements of the Code. Currently, certain of our activities are conducted through our TRS and therefore are subject to federal and state income taxes at regular corporate tax rates. Our TRS leases properties from our REIT entities for which the TRS is charged rent based on market rates following the terms of the lease agreements between the TRS and the REIT entities. As of December 31, 2014, the Company is in the process of reviewing these agreements and we may modify certain provisions in order to clarify existing terms. Any modification to the timing or extent of

lease payments between our REIT entities and the TRS would result in a change to our taxable income, although our pre-tax income would remain unchanged due to the fact that our REIT entities and the TRS are consolidated and transactions between consolidated entities are eliminated.

OFF-BALANCE SHEET ARRANGEMENTS

As of December 31, 2014, we do not have any off-balance sheet arrangements. We do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured investment vehicles, special purpose or variable interest entities established to facilitate off-balance sheet arrangements. Further, we have not guaranteed any obligations of unconsolidated entities or entered into any commitment or intend to provide additional funding to any such entities.

CONTRACTUAL OBLIGATIONS

As of December 31, 2014, we had the following material contractual obligations (dollars in thousands):

Contractual obligation	2015	2016	2017	2018	2019	Thereafter
Mortgage notes payable ^(A)	\$ 17,046	\$ 42,302	\$ 204,128	\$ 206,774	\$ 140,657	\$ 647,663

(A) These amounts include only scheduled principal repayments. See Note 8 to the Consolidated Financial Statements, included in Part II, Item 8 of this Annual Report on Form 10-K, for further information about interest rates.

In addition to mortgage notes payable, we are a party to the Management Agreement with the Manager and property management agreements with Property Managers. However, at this time, the amount of this obligation is not estimable. We also committed to making available \$6.5 million immediately for capital improvements and other repairs in the properties under certain lease agreements and also agreed to make available an additional \$9.0 million at certain intervals during the lease period, under the same lease agreements, to be used for further capital improvements. Upon funding the capital improvements, we will be entitled to rent increases. No capital improvements or other repairs have been funded as of December 31, 2014. Finally, we have two ground leases with initial terms of 74 and 82 years. The ground leases require equal annual rent payments that together amount to \$0.4 million over the life of the leases. We do not have any supplier contracts or other material commitments at this time.

INFLATION

Our triple net leases provide for either fixed increases in base rents and/or indexed escalators, based on the CPI. In our Managed Properties segment, resident agreements are generally month to month agreements affording us the opportunity to increase prices subject to market and other conditions. We believe that inflationary increases in costs and expenses will be offset, at least in part, by contractual rent and resident fee increases.

NON-GAAP FINANCIAL MEASURES

We believe that net income, as defined by GAAP, is the most appropriate earnings measurement. However, we consider certain non-GAAP financial measures to be useful supplemental measures of our operating performance. A non-GAAP financial measure is a measure of historical or future financial performance, financial position or cash flows that excludes or includes amounts that are not excluded from or included in the most comparable GAAP measure. The following describes the non-GAAP financial measures based on which management evaluates our operating performance and that we consider most useful to investors, and sets forth reconciliations of these measures to the most directly comparable GAAP financial measures.

The non-GAAP financial measures we present in this Form 10-K may not be identical to those presented by other real estate companies due to the fact that not all real estate companies use the same definitions. You should not consider these measures as alternatives to net income (determined in accordance with GAAP) as indicators of our financial performance or as alternatives to cash flow from operating activities (determined in accordance with GAAP) as measures of our liquidity, nor are these measures necessarily indicative of sufficient cash flow to fund all of our needs. In order to facilitate a clear understanding of our consolidated historical operating results, you should examine these measures in conjunction with net income as presented in our Consolidated Financial Statements and other financial data included elsewhere in this Form 10-K.

We have a limited operating history and we acquired our first portfolio of senior housing properties on July 18, 2012. Since real estate investments have been remeasured to fair value as of the date of acquisition, the carrying amount of these assets on our consolidated balance sheets, as well as the related depreciation expense, in the Successor periods increased significantly which, accordingly, cannot be meaningfully compared to depreciation expense for the Predecessor periods as it is based on a lower

historical cost basis. In addition, because we typically refinance the mortgages associated with the senior housing properties that we acquire, interest expense for the Successor and Predecessor periods is not directly comparable. Also, during the successor period, but prior to our spin-off from Newcastle, our Parent was party to a management agreement with FIG LLC, a subsidiary of Fortress, and we were allocated a portion of the management fee. Since the spin-off, we have been party to the Management Agreement with FIG LLC, for which we pay a management fee. We were not party to any management agreement during the Predecessor periods. As such, we believe the non-GAAP financial measures for the Predecessor periods are not meaningful to investors, analysts and our management to assess the financial performance of the Company and have not been presented herein.

Funds From Operations and Normalized Funds From Operations

Historical cost accounting for real estate assets implicitly assumes that the value of real estate assets diminishes predictably over time. However, since real estate values historically have risen or fallen with market conditions, many industry investors deem presentations of operating results for real estate companies that use historical cost accounting to be insufficient by themselves. To overcome this problem, we consider Funds From Operations ("FFO") and Normalized FFO to be appropriate measures of operating performance of an equity REIT. In particular, we believe that Normalized FFO is useful because it allows investors, analysts and our management to compare our operating performance to the operating performance of other real estate companies and between periods on a consistent basis without having to account for differences caused by period specific items and events such as transaction costs.

We use the National Association of Real Estate Investment Trusts ("NAREIT") definition of FFO. NAREIT defines FFO as net income (computed in accordance with GAAP) excluding gains (losses) from sales of depreciable real estate assets, impairment charges of depreciable real estate, plus real estate depreciation and amortization, and after adjustments for unconsolidated entities and joint ventures to reflect FFO on the same basis. We define Normalized FFO as FFO excluding the following income and expense items (which may be recurring in nature): (a) acquisition, transaction and integration related costs and expenses; (b) the write off of unamortized deferred financing fees, or additional costs, make whole payments, penalties or premiums incurred as the result of early repayment of debt; and (c) changes in the fair value of contingent consideration and financial instruments.

The following table sets forth a reconciliation of net loss to FFO and Normalized FFO for the year ended December 31, 2014, the year ended December 31, 2013 and the period from July 18 to December 31, 2012:

(dollars in thousands)

	Successor		
	Year Ended December 31, 2014	Year Ended December 31, 2013	July 18 2012 to December 31, 2012
Net income (loss)	\$ (46,403)	\$ (30,046)	\$ (9,487)
Depreciation and amortization	103,279	26,933	5,784
FFO	56,876	(3,113)	(3,703)
Acquisition, transaction and integration expense	14,295	13,294	6,037
Change in fair value of contingent consideration ^(A)	(1,500)	—	—
Normalized FFO	<u>\$ 69,671</u>	<u>\$ 10,181</u>	<u>\$ 2,334</u>

(A) Included in other (income) expense in the Consolidated Statements of Operations.

Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization

We consider Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization ("Adjusted EBITDA") as an important supplemental measure to net income because it provides additional information with which to evaluate our operating performance on an unleveraged basis. Adjusted EBITDA is defined as earnings before interest, taxes, depreciation and amortization, excluding acquisition, transaction and integration expense, gains (losses) on sales of real estate, impairment charges and changes in fair value of contingent consideration and financial instruments. Adjusted EBITDA does not represent, and should not be considered as an alternative to, net income as determined in accordance with GAAP.

The following table sets forth a reconciliation of net loss to Adjusted EBITDA for the year ended December 31, 2014, the year ended December 31, 2013, and the period from July 18, 2012 to December 31, 2012:

(dollars in thousands)

	Successor		
	Year Ended December 31, 2014	Year Ended December 31, 2013	July 18 to December 31, 2012
Net loss	\$ (46,403)	\$ (30,046)	\$ (9,487)
Interest expense	57,026	10,589	1,767
Income tax expense	160	656	150
Depreciation and amortization	103,279	26,933	5,784
Acquisition, transaction and integration expense	14,295	13,294	6,037
Change in fair value of contingent consideration ^(A)	(1,500)	—	—
Adjusted EBITDA	<u>\$ 126,857</u>	<u>\$ 21,426</u>	<u>\$ 4,251</u>

(A) Included in other (income) expense in the Consolidated Statements of Operations.

APPLICATION OF CRITICAL ACCOUNTING POLICIES

Management's discussion and analysis of financial condition and results of operations is based upon our historical financial statements, which have been prepared in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires the use of estimates and assumptions that could affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenue and expenses. Actual results could differ from these estimates. Management believes that the estimates and assumptions utilized in the preparation of the Consolidated Financial Statements are prudent and reasonable. Actual results historically have been in line with management's estimates and judgments used in applying each of the accounting policies described below, as modified periodically to reflect current market conditions.

A summary of our significant accounting policies is presented in Note 2 to our Consolidated Financial Statements. The following is a summary of our accounting policies that are most effected by judgments, estimates and assumptions.

Revenue Recognition

Resident Fees and Services - Resident fees and services include monthly rental revenue, care income and ancillary income recognized from the Managed Properties segment. Resident fees and services are recognized monthly as services are provided. Lease agreements with residents are cancelable by the resident with 30 days' notice. Ancillary income primarily relates to non-refundable community fees. Non-refundable community fees are recognized on a straight-line basis over the average length of stay of residents, which we estimate to be approximately 24 months for AL/MC properties and approximately 33 months for IL-only properties.

Rental revenue - Rental revenue from the Triple Net Lease Properties segment is recognized on a straight-line basis over the applicable term of the lease when collectability is reasonably assured. Recognizing rental revenue on a straight-line basis typically results in recognizing revenue in excess of cash amounts contractually due from the Company's tenants during the first half of the lease term, creating a straight-line rent receivable that is included in receivables and other assets, net.

Acquisition Accounting

The Company has determined that all of its acquisitions should be accounted for under the acquisition method. The accounting for acquisitions requires the identification and measurement of all acquired tangible and intangibles assets and assumed liabilities at their respective fair values as of the respective transaction dates. Recognized intangible assets primarily include the fair value of in-place resident leases and above/below market lease intangibles. In measuring the fair value of net tangible and identified intangible assets acquired and liabilities assumed, management uses information obtained as a result of pre-acquisition due diligence, marketing, leasing activities and independent appraisals. In the case of real property, the fair value of the tangible assets acquired is determined by valuing the property as if it were vacant.

We estimate the fair value of in-place leases as (i) the present value of the estimated rental revenue that would have been forgone, offset by variable costs that would have otherwise been incurred during a reasonable lease-up period, as if the acquired units were vacant and (ii) the estimated absorption costs, such as additional marketing costs that would have been incurred during the lease-up period. The acquisition fair value of the in-place lease intangibles is amortized over the average length of stay of the residents at the senior housing properties on a straight-line basis, which is estimated to be 24 months for AL/MC and CCRC properties and 33 months for IL-only properties.

We estimate the fair value of above/below market lease intangibles as the difference between contract rent and market rent over the remaining lease term for each leased property, on a discounted basis. Above/below market lease intangibles also include ground lease intangibles that are amortized over the contractual lives of the leases.

Other intangibles recognized upon acquisition include intangible assets such as non-compete intangibles. Non-compete intangibles reflect the fair value of non-compete agreements at acquisition. We estimate the fair value of non-compete intangibles as the sum of (i) the present value of the consulting services during the non-compete period and (ii) the difference between (a) the present value of the net operating income with the non-compete agreements in place and (b) the present value of the net operating income, as if the non-compete agreements were not in place. The acquisition fair value of the non-compete intangibles is amortized over the non-compete period on a straight-line basis.

Contingent consideration, if any, is measured at fair value on the date of acquisition. In subsequent reporting periods, the fair value of the contingent consideration is remeasured at each reporting date, with any change recorded in other income and expense in the Consolidated Statements of Operations.

Acquisition and transaction expense includes costs related to completed and potential acquisitions and transactions and include advisory, legal, accounting, valuation and other professional or consulting fees. Integration expense includes costs directly related to the integration of acquired businesses such as lender mandated repairs, licensing, rebranding and training incurred in connection with the acquisition.

Acquisition, transaction and integration costs are expensed as incurred. Integration costs of \$0.7 million for the year ended December 31, 2013 have been reclassified from Property operating expense to Acquisition, transaction and integration expense to conform to the 2014 presentation.

Provision for Uncollectible Receivables

We assess the collectibility of our rent receivables on an ongoing basis. We base our assessment on several factors, including, resident payment history, the financial strength of the resident and any guarantors, the value of the underlying collateral, if any, and current economic conditions. If our evaluation of these factors indicates it is probable that the Company will not be able to recover the full value of the receivable, we provide a specific reserve against the portion of the receivable that we estimate may not be recovered.

Impairment of Long Lived Assets

We periodically evaluate long-lived assets, including definite lived intangible assets, primarily consisting of our real estate investments, for impairment indicators. If indicators of impairment are present, we evaluate the carrying value of the related real estate investments in relation to the future undiscounted cash flows of the underlying operations. In performing this evaluation, market conditions and our current intentions with respect to holding or disposing of the asset are considered. We adjust the net book value of leased properties and other long-lived assets to fair value if the sum of the expected future undiscounted cash flows, including sales proceeds, is less than book value. An impairment loss is recognized at the time any such determination is made.

For further information on significant accounting policies, refer to Note 2 to the Consolidated Financial Statements, included in Item 8.

Recent Accounting Pronouncements

In April 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-08, *Presentation of Financial Statements (Topic 205) and Property, Plant and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity*. ASU 2014-08 raises the threshold for disposals to qualify as discontinued operations. A discontinued operation is defined as: (1) a component of an entity or group of components that has been disposed of or classified as held for sale and represents a strategic shift that has or will have a major effect on an entity's operations and financial results; or (2) an acquired business that is classified as held for sale on the acquisition date. ASU 2014-08 also requires additional disclosures regarding discontinued operations, as well as material disposals that do not meet the definition of discontinued operations. This update is effective for New Senior in the first quarter of 2015. New Senior does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements until it disposes of its assets in future periods.

In May 2014, the FASB and the International Accounting Standards Board ("IASB") issued ASU 2014-09 *Revenues from Contracts with Customers (Topic 606)*. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under today's guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. The ASU is effective for the Company in the first quarter of 2017. Early application is not permitted. Entities have the option of using either a full retrospective or a modified approach to adopt the guidance in the ASU. The Company is currently evaluating the new guidance to determine the impact it may have on its Consolidated Financial Statements.

In November 2014, the Emerging Issues Task Force (EITF) and FASB issued ASU 2014-17 *Pushdown Accounting*. The guidance will allow but not require an acquired entity to apply pushdown accounting upon acquisition by a new parent. It will give acquired entities that are businesses or nonprofit activities the option to apply pushdown accounting in their separate financial statements when an acquirer obtains control of them. The guidance represents a significant change from current practice which requires registrants to apply pushdown accounting when they become substantially wholly owned and prohibits pushdown accounting at ownership levels of less than 80%. The guidance is effective immediately from November 18, 2014. The election to apply pushdown accounting can be made either in the period in which the change of control occurred, or in a subsequent period. If the election is made in a subsequent period, it would be considered a change in accounting principle and treated in accordance with Topic 250, Accounting Changes and Error Corrections. This ASU is applicable to the Company as it is considered a variable interest entity ("VIE") due to the terms of the Management Agreement with the Manager, and the Manager has been deemed the primary beneficiary. As the Manager is a wholly owned subsidiary of Fortress, Fortress is consolidating New Senior as of November 7, 2014, and we have elected not to apply push down accounting

In February 2015, the FASB issued ASU 2015-02 which amends the consolidation guidance in ASC 810. The standard eliminates the deferral of FAS 167, per ASC 810-10-65-2(a), that has allowed certain investment funds to follow the previous consolidation guidance in FIN 46 (R). The standard changes whether (1) fees paid to a decision maker or service provider represent a variable interest, (2) a limited partnership or similar entity has the characteristics of a VIE and (3) a reporting entity is the primary beneficiary of a VIE. The effective date of the standard will be for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015 for public companies, and early adoption is permitted. The Company is currently evaluating the new guidance to determine the impact, if any, it may have on its Consolidated Financial Statements.

The FASB has recently issued or discussed a number of proposed standards on such topics as financial statement presentation, leases, financial instruments and hedging. Some of the proposed changes are significant and could have a material impact on the Company's Consolidated Financial Statements. The Company has not yet fully evaluated the potential impact of all these proposals, but will make such an evaluation as the standards are finalized.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the exposure to loss resulting from changes in interest rates, credit spreads, foreign currency exchange rates, commodity prices and equity prices. The primary market risks that we are exposed to are interest rate risk and credit risk. These risks are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. All of our market risk sensitive assets and liabilities are for non-trading purposes only. In addition, we are exposed to liquidity risk, which may impact our access to capital resources and repayment of capital obligations.

Interest Rate Risk

We are exposed to market risk related to changes in interest rates on borrowings under our mortgage loans that are floating rate obligations. These market risks result primarily from changes in LIBOR or prime rates. We continuously monitor our level of floating rate debt with respect to total debt and other factors, including our assessment of current and future economic conditions.

For fixed rate debt, interest rate fluctuations generally affect the fair value, but do not impact our earnings or cash flows. Therefore, interest rate risk does not have a significant impact on our fixed rate debt obligations until such obligations mature or until we elect to prepay and refinance such obligations. If interest rates have risen at the time our fixed rate debt matures or is refinanced, our future earnings and cash flows could be adversely affected by additional borrowing costs. Conversely, lower interest rates at the time of maturity or refinancing may lower our overall borrowing costs.

For floating rate debt, interest rate fluctuations can affect the fair value, as well as earnings or cash flows. If market interest rates rise, our earnings and cash flows could be adversely affected by an increase in interest expense. In contrast, lower interest rates may reduce our borrowing costs and improve our operational results.

At December 31, 2014 we had \$393.4 million of floating rate debt, representing approximately 31.3% of our total indebtedness, with a weighted average rate of 4.0%. A 100 basis point change in interest rates, excluding the impact of the 1% LIBOR floor that our floating rate debt is subject to, would change annual interest expense by \$3.9 million on an annualized basis.

Credit Risk

We derive a portion of our revenue from long-term triple net leases in which the minimum rental payments are fixed with scheduled periodic increases. We also earn revenue from senior housing properties operated pursuant to property management agreements. For these properties, rental rates may fluctuate due to lease rollovers and renewals and economic or market conditions.

The Master Tenants account for a significant portion of our total revenues and net operating income, and such concentration creates credit risk. We could be adversely affected if the Master Tenants become unable or unwilling to satisfy their obligations to us. There is no assurance that the Master Tenants or the related guarantors will have sufficient assets, income and access to financing to enable them to satisfy their obligations to us.

Furthermore, although our leases, financing arrangements and other agreements with our tenants and operators generally provide us the right under specified circumstances to terminate a lease, evict an operator or tenant, or demand immediate repayment of certain obligations to us, the bankruptcy and insolvency laws afford certain rights to a party that has filed for bankruptcy or reorganization that may render certain of these remedies unenforceable, or delay our ability to pursue such remedies.

Liquidity Risk

In addition to the discussion in “Risk Factors,” the following factors could affect our liquidity, access to capital resources and our capital obligations. As such, if their outcomes do not fall within our expectations, changes in these factors could negatively affect our liquidity.

- Decisions by investors, counterparties and lenders to enter into transactions with us will depend upon a number of factors, such as our historical and projected financial performance, compliance with the terms of our current credit and derivative arrangements, industry and market trends, the availability of capital and our investors’, counterparties’ and lenders’ policies and rates applicable thereto, and the relative attractiveness of alternative investment or lending opportunities.
- Real estate investments are relatively illiquid, and our ability to quickly sell or exchange our properties in response to changes in economic or other conditions is limited. In the event we desire or need to sell any of our properties, the value of those properties and our ability to sell at a price or on terms acceptable to us could be adversely affected by a downturn in the real estate industry or any weakness in the senior housing and healthcare industries. We cannot assure you that we will recognize the full value of any property that we sell for liquidity or other reasons, and the inability to respond quickly to changes in the performance of our investments could adversely affect our business, results of operations and financial condition.
- Because we derive substantially all of our revenues from triple net lease and managed property tenants and operators, any inability or unwillingness by these tenants and operators to satisfy their respective obligations to us or to renew their leases with us upon expiration of the terms thereof could have a material adverse effect on our liquidity, financial condition, our ability to service our indebtedness and to make distributions to our stockholders.
- To comply with the 90% distribution requirement applicable to REITs and to avoid income and excise taxes, we must make distributions to our stockholders. Such distributions will limit our liquidity to finance investments, acquisitions and new developments and may limit our ability to engage in transactions that are otherwise in the best interests of our stockholders. Although we do not anticipate any inability to satisfy the REIT distribution requirement, from time to time, we may not have sufficient cash or other liquid assets to do so. For example, timing differences between the actual receipt of income and actual payment of deductible expenses, on the one hand, and the inclusion of that income and deduction of those expenses in arriving at our taxable income, on the other hand, or non-deductible expenses such as principal amortization or repayments or capital expenditures in excess of non-cash deductions may cause us to fail to have sufficient cash or liquid assets to enable us to satisfy the 90% distribution requirement. In the event that timing differences occur or we decide to retain cash or to distribute such greater amount as may be necessary to avoid income and excise taxation, we may seek to borrow funds, issue additional equity securities, pay taxable stock dividends, distribute other property or securities or engage in a transaction intended to enable us to meet the REIT distribution requirements. Any of these actions may require us to raise additional capital to meet our obligations; however, limitations on our ability to access capital, as

described above, could have an adverse effect on our ability to make required payments on our debt obligations, make distributions to our stockholders or make future investments necessary to implement our business strategy. The terms of the instruments governing our existing indebtedness restrict our ability to engage in certain types of these transactions.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of
New Senior Investment Group Inc.

We have audited the accompanying consolidated balance sheets of New Senior Investment Group Inc. and Subsidiaries (the "Company") as of December 31, 2014 and 2013, and the related consolidated (Successor) and combined (Predecessor) statements of operations, changes in equity (deficit) and cash flows for each of the two years in the period ended December 31, 2014 and for the period from July 18, 2012 to December 31, 2012 (Successor), and the period from January 1, 2012 to July 17, 2012 (Predecessor). Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of New Senior Investment Group Inc. and Subsidiaries at December 31, 2014 and 2013, and the consolidated (Successor) and combined (Predecessor) results of their operations and their cash flows for each of the two years in the period ended December 31, 2014 and for the period from July 18, 2012 to December 31, 2012 (Successor), and the period from January 1, 2012 to July 17, 2012 (Predecessor), in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), New Senior Investment Group Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated February 26, 2015 expressed an unqualified opinion thereon.

New York, New York
February 26, 2015

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of
New Senior Investment Group Inc.

We have audited New Senior Investment Group Inc. and Subsidiaries' internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework), (the COSO criteria). New Senior Investment Group Inc. and Subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, New Senior Investment Group Inc. and Subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of New Senior Investment Group Inc. and Subsidiaries as of December 31, 2014 and 2013, and the related consolidated (Successor) and combined (Predecessor) statements of operations, changes in equity (deficit) and cash flows for each of the two years in the period ended December 31, 2014 and for the period from July 18, 2012 to December 31, 2012 (Successor), and the period from January 1, 2012 to July 17, 2012 (Predecessor) of New Senior Investment Group Inc. and Subsidiaries and our report dated February 26, 2015 expressed an unqualified opinion thereon.

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012

(dollars in thousands, except share data)

1. ORGANIZATION

New Senior Investment Group Inc. (“New Senior” or “the Company”) invests in a diversified portfolio of senior housing properties across 27 states in the United States. The Company was formed as Newcastle Senior Living Holdings LLC, a Delaware limited liability company, in 2012 and converted to a Delaware corporation on May 30, 2014 and changed its name to New Senior Investment Group Inc. on June 16, 2014.

On November 6, 2014, the spin-off of New Senior was completed with the distribution of all of the outstanding shares of New Senior to the holders of Newcastle Investment Corp. (“Newcastle”) common stock. Newcastle was the sole stockholder of the Company until the spin-off. Following the spin-off, New Senior is a separate publicly traded Real Estate Investment Trust (“REIT”) primarily focused on investing in senior housing properties and listed on the New York Stock Exchange (“NYSE”) under the symbol “SNR.” The Company is headquartered in New York, New York.

New Senior has been operating so as to qualify as a REIT for U.S. federal income tax purposes for the tax year ending December 31, 2014. As such, New Senior will generally not be subject to U.S. federal corporate income tax on that portion of its net income that is distributed to stockholders if it distributes at least 90% of its REIT taxable income to its stockholders by prescribed dates and complies with various other requirements.

The Company has invested in 100 senior housing properties as of December 31, 2014 and operates in two reportable segments: (1) Managed Properties and (2) Triple Net Lease Properties.

Managed Properties – The Company has engaged property managers to manage 43 of its properties on a day-to-day basis under the Managed Properties segment. These properties consist of four dedicated independent living facilities (“IL-only”) and 39 properties with a combination of assisted living/memory care (“AL/MC”) facilities. The Company’s Managed Properties are managed by Holiday Acquisition Holdings LLC (“Holiday”), a portfolio company that is majority owned by private equity funds managed by an affiliate of FIG LLC (the “Manager”), a subsidiary of Fortress Investment Group LLC (“Fortress”), FHC Property Management LLC (together with its subsidiaries, “Blue Harbor”), an affiliate of the Manager, or Jerry Erwin Associates, Inc. (“JEA”), collectively, the “Property Managers,” under property management agreements (the “Property Management Agreements”). Under the Property Management Agreements, the Property Managers are responsible for the day-to-day operations of the Company’s senior housing properties and are entitled to a management fee in accordance with the terms of the Property Management Agreements.

The Company has entered into long-term property management agreements for its managed properties with Blue Harbor, Holiday and JEA. Blue Harbor and Holiday’s property management agreements have initial ten-year terms, with successive, automatic one-year renewal periods. JEA’s property management agreement has an initial five-year term, with successive, automatic one-year renewal periods. Under these agreements, the Company pays monthly property management fees. For AL/MC properties managed by Blue Harbor and Holiday, the Company pays management fees equal to 6% of effective gross income for the first two years and 7% thereafter. For IL-only properties managed by Blue Harbor and Holiday, the Company pays management fees equal to 5% of effective gross income. The Company pays management fees equal to 5% of gross revenues for the property managed by JEA.

Triple Net Lease Properties – As of December 31, 2014, the Company has also invested in 57 properties (the “Holiday Portfolios” and the LCS Portfolio, as defined in Note 3) subject to triple net lease arrangements under the Triple Net Lease Properties segment. These properties consist of 52 IL-only properties, four Continuing Care Retirement Communities (“CCRC”) properties and one AL/MC property. In a triple net lease arrangement, the Company purchases property and leases it back to the seller or to a third party, and the lessee agrees to operate and maintain the property at its own expense, including repairs, maintenance, capital expenditures, utilities, taxes, insurance and the payroll expense of property-level employees. The Company’s triple net lease agreements have initial terms of approximately 15 or 17 years and include renewal options and periodic rent increases ranging from 2.5% to 4.5% in future years.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Principles of Consolidation

The accompanying Consolidated (Successor) and Combined (Predecessor) Financial Statements are prepared in accordance with U.S. Generally Accepted Accounting Principles (“GAAP”). The Consolidated Financial Statements include the accounts of New Senior and its consolidated subsidiaries. All significant intercompany transactions and balances have been eliminated. New Senior consolidates those entities in which it has control over significant operating, financial and investing decisions of the entity. At

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

December 31, 2014 and December 31, 2013, the Company did not have any investments in Variable Interest Entities (“VIEs”). VIEs are defined as entities in which equity investors do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included.

On July 18, 2012 (the “Initial Acquisition Date” and “Commencement of Operations”), New Senior completed the initial acquisition of a portfolio of senior housing properties (the “BPM Portfolio”). The acquisition was accounted for as a business combination using the acquisition method of accounting. As a result, the Consolidated Financial Statements reflect a new basis of accounting for periods subsequent to the Initial Acquisition Date, and the financial information is referred to as “Successor” information. Successor information includes the results of the BPM portfolio and all subsequent acquisitions.

Financial information through, but not including, the Initial Acquisition Date (i.e., financial information on or before July 17, 2012) is referred to as “Predecessor” company information, which has been prepared using the prior owner historical cost basis of accounting. Information in the Combined Financial Statements for the Predecessor period reflects a different ownership and capital structure and does not include the effects of acquisition accounting prior to the Initial Acquisition Date. As a result of the application of acquisition accounting on the Initial Acquisition Date, the Consolidated Financial Statements for the Successor periods are presented on a different basis of accounting when compared to the Predecessor period and, therefore, are not comparable. Black lines have been drawn to separate the Successor’s financial information from that of the Predecessor.

During the Predecessor period, the BPM Portfolio comprised stand-alone businesses under common management and control. Therefore, Combined Financial Statements are presented for the Predecessor period. These Combined Financial Statements have been derived using the historical basis of such properties’ assets and liabilities.

During a portion of the Successor period, the Company was not operated as a stand-alone business from Newcastle. Information in the Consolidated Financial Statements for Successor periods prior to November 7, 2014 have been prepared on a stand-alone basis from the Consolidated Financial Statements and accounting records of Newcastle. Information in the Consolidated Financial Statements for periods prior to November 7, 2014 does not necessarily reflect what New Senior’s consolidated results of operations, financial position and cash flows would have been had New Senior operated as an independent company prior to the spin-off. Management believes the assumptions and methods of allocation used in the accompanying Consolidated Financial Statements are reasonable.

Information in the Consolidated Financial Statements for the period from November 7, 2014 through December 31, 2014 and as of December 31, 2014 reflect the revenues, expenses, cash flows and financial position of the Company as a stand-alone company.

The Consolidated (Successor) and Combined (Predecessor) Financial Statements reflect all revenues, expenses and cash flows directly attributable to the Company. Certain expenses of Newcastle, comprised primarily of a portion of its management fee, acquisition and transaction costs and general and administrative costs, have been allocated to New Senior to the extent they were directly associated with the Company for Successor periods prior to the spin-off. The portion of the management fee allocated to New Senior prior to the spin-off represents the product of the management fee rate payable by Newcastle, 1.50% and New Senior’s gross equity, which management believes is a reasonable method for quantifying the cost of the services provided by the employees of the Manager to the Company. New Senior and Newcastle have not shared any costs subsequent to the spin-off. See Note 10 for details related to management agreement terms.

Certain prior period amounts have been reclassified to conform to the current period’s presentation.

Use of Estimates

Management is required to make estimates and assumptions when preparing financial statements in conformity with GAAP. These estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the accompanying Consolidated Financial Statements and the reported amounts of revenue and expenses during the reporting period. Actual results may differ from management’s estimates.

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

Revenue Recognition

Resident Fees and Services - Resident fees and services include monthly rental revenue, care income and ancillary income recognized from the Managed Properties segment. Resident fees and services are recognized monthly as services are provided. Lease agreements with residents are cancelable by the resident with 30 days' notice. Ancillary income primarily relates to non-refundable community fees. Non-refundable community fees are recognized on a straight-line basis over the average length of stay of residents, which management estimates to be approximately 24 months for AL/MC properties and approximately 33 months for IL-only properties.

Rental Revenue - Rental revenue from the Triple Net Lease Properties segment is recognized on a straight-line basis over the applicable term of the lease when collectability is reasonably assured. Recognizing rental revenue on a straight-line basis typically results in recognizing revenue in excess of cash amounts contractually due from the Company's tenants during the first half of the lease term, creating a straight-line rent receivable that is included in other assets. As of December 31, 2014 and December 31, 2013, straight-line rent receivables were \$26,454 and \$522, respectively.

Acquisition Accounting

The Company has determined that all of its acquisitions should be accounted for under the acquisition method. The accounting for acquisitions requires the identification and measurement of all acquired tangible and intangible assets and assumed liabilities at their respective fair values as of the respective transaction dates. Recognized intangible assets primarily include the fair value of in-place resident leases and above/below market lease intangibles. In measuring the fair value of net tangible and identified intangible assets acquired and liabilities assumed, management uses information obtained as a result of pre-acquisition due diligence, marketing, leasing activities and independent appraisals. In the case of real property, the fair value of the tangible assets acquired is determined by valuing the property as if it were vacant.

The Company estimates the fair value of in-place leases as (i) the present value of the estimated rental revenue that would have been forgone, offset by variable costs that would have otherwise been incurred during a reasonable lease-up period, as if the acquired units were vacant and (ii) the estimated absorption costs, such as additional marketing costs that would have been incurred during the lease-up period. The acquisition fair value of the in-place lease intangibles is amortized over the average length of stay of the residents at the senior housing properties on a straight-line basis, which is estimated to be 24 months for AL/MC and CCRC properties and 33 months for IL-only properties.

The Company estimates the fair value of above/below market lease intangibles as the difference between contract rent and market rent over the remaining lease term for each leased property, on a discounted basis. Above/below market lease intangibles also include ground lease intangibles that are amortized over the contractual lives of the leases.

Other intangibles recognized upon acquisition include intangible assets such as non-compete intangibles. Non-compete intangibles reflect the fair value of non-compete agreements at acquisition. The Company estimates the fair value of non-compete intangibles as the sum of (i) the present value of the consulting services during the non-compete period and (ii) the difference between (a) the present value of the net operating income with the non-compete agreements in place and (b) the present value of the net operating income, as if the non-compete agreements were not in place. The acquisition fair value of the non-compete intangibles is amortized over the non-compete period on a straight-line basis.

Contingent consideration, if any, is measured at fair value on the date of acquisition. The fair value of the contingent consideration is remeasured at each reporting date with any change recorded in other (income) and expense in the Consolidated Statements of Operations.

Acquisition and transaction expense includes costs related to completed and potential acquisitions and transactions and include advisory, legal, accounting, valuation and other professional or consulting fees. Integration expense includes costs directly related to the integration of acquired businesses such as lender mandated repairs, licensing, rebranding and training incurred in connection with the acquisition.

Acquisition, transaction and integration costs are expensed as incurred. Integration costs of \$726 for the year ended December 31, 2013 have been reclassified from property operating expense to acquisition, transaction and integration expense to conform to the 2014 presentation.

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

Real Estate Investments

Real estate investments are recorded at cost less accumulated depreciation or accumulated amortization.

Depreciation is calculated on a straight-line basis using estimated remaining useful lives not to exceed 40 years for buildings, 3 to 10 years for building improvements and 3 to 5 years for other fixed assets.

Amortization is calculated on a straight-line basis using estimated useful lives of 24 to 33 months and 5 to 13 years for in-place lease intangibles and other intangibles, respectively. Above/below market lease intangibles are generally amortized over a period of 15 to 17 years except for ground lease intangibles which are amortized over a period of 74 to 82 years.

Impairment of Long Lived Assets

The Company periodically evaluates long-lived assets, including definite lived intangible assets, primarily consisting of the Company's real estate investments, for impairment indicators. If indicators of impairment are present, the Company evaluates the carrying value of the related real estate investments in relation to the future undiscounted cash flows of the underlying operations. In performing this evaluation, market conditions and the Company's current intentions with respect to holding or disposing of the asset are considered. The Company adjusts the net book value of leased properties and other long-lived assets to fair value if the sum of the expected future undiscounted cash flows, including sales proceeds, is less than book value. An impairment loss is recognized at the time any such determination is made.

The Company did not record any impairment charges related to its real estate assets and related intangibles during any of the reporting periods presented.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand and all highly liquid short term investments with maturities of 90 days or less, when purchased.

Deferred Financing Costs

The Company amortizes deferred financing costs as a component of interest expense over the terms of the related borrowings using a method that approximates the effective interest rate method.

Receivables and Other Assets

Receivables and other assets consist primarily of escrows held by lenders, net resident receivables, prepaid expenses and straight-line rent receivables. The Company assesses the collectibility of rent receivables on an ongoing basis, based on an assessment of several factors, including, resident payment history, the financial strength of the resident and any guarantors, the value of the underlying collateral, if any, and current economic conditions. If the evaluation of these factors indicates it is probable that the Company will not be able to recover the full value of the receivable, the Company provides a specific reserve against the portion of the receivable that the Company estimates may not be recovered.

Deferred Revenue

Deferred revenue primarily includes non-refundable community fees received by the Company when residents move in. Deferred revenue amounts are amortized into income on a straight-line basis over the average length of stay of the residents, and are included within accrued expenses and liabilities on the Consolidated Balance Sheets.

Income Taxes

New Senior has been operating so as to qualify as a REIT under the requirements of the Internal Revenue Code of 1986, as amended ("Code"). Requirements for qualification as a REIT include various restrictions on ownership of stock, requirements concerning distribution of taxable income and certain restrictions on the nature of assets and sources of income. A REIT must distribute at least 90% of its taxable income to its stockholders of which 85% plus any undistributed amounts from the prior year must be distributed within the taxable year in order to avoid the imposition of an excise tax. Distribution of the remaining balance may

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

extend until timely filing of New Senior's tax return in the subsequent taxable year. Qualifying distributions of taxable income are deductible by a REIT in computing taxable income.

Certain activities are conducted through a taxable REIT subsidiary ("TRS") and therefore are subject to federal and state income taxes. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases upon the change in tax status. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

New Senior recognizes tax benefits for uncertain tax positions only if it is more likely than not that the position is sustainable based on its technical merits. Interest and penalties on uncertain tax positions are included as a component of the provision for income taxes on the Consolidated Statements of Operations. As of December 31, 2014 and December 31, 2013, the Company had no uncertain tax positions.

For the Successor periods, the Company's Consolidated Financial Statements have been prepared based upon the operations of the Company separate from those of Newcastle and include current and deferred income taxes calculated in accordance with the operations of the spin-off. During the Predecessor periods, the Company was treated as a disregarded single-member limited liability entity for U.S. federal and state income tax purposes and was not subject to income taxes.

Fair Value Measurement

Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. A three-tier fair value hierarchy, which is described below, prioritizes the inputs used by the Company in measuring fair value:

- Level 1 - Quoted prices for identical instruments in active markets.
- Level 2 - Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-derived valuations, in which all significant inputs are observable in active markets.
- Level 3 - Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Stock Options

Options granted to New Senior's directors are measured at fair value at the grant date with the related expense recognized over the service term, if any.

Equity

Net income earned prior to the spin-off is included in additional paid in capital instead of retained earnings since the accumulation of retained earnings began as of the date of spin-off from Newcastle.

Expense Recognition

Management Fee to Affiliate – During the Successor period and prior to the spin-off from Newcastle, this represents an amount of the management fee charged to Newcastle by the Manager and allocated to the Company. During the Successor period and after the spin-off from Newcastle, this represents amounts due to the Manager (as defined in Note 10) pursuant to the Management Agreement between the Manager and New Senior (as defined in Note 10).

Advertising Costs – The Company expenses advertising costs as incurred. Advertising costs were \$495, \$336, and \$71 for the year ended December 31, 2014, December 31, 2013, and the period from July 18, 2012 to December 31, 2012, respectively, and are included in property operating expense in the Consolidated Statements of Operations. Advertising costs were \$76 for the period from January 1, 2012 to July 17, 2012 and are included in property operating expense in the Combined Statement of Operations.

Recent Accounting Pronouncements

In April 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-08, *Presentation of Financial Statements (Topic 205) and Property, Plant and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity*. ASU 2014-08 raises the threshold for disposals to qualify as discontinued operations. A discontinued operation is defined as: (1) a component of an entity or group of components that has been disposed of or classified as held for sale and represents a strategic shift that has or will have a major effect on an entity's operations and financial results; or (2) an acquired business that is classified as held for sale on the acquisition date. ASU 2014-08 also requires additional disclosures regarding discontinued operations, as well as material disposals that do not meet the definition of discontinued operations. This update is effective for New Senior in the first quarter of 2015. New Senior does not expect the adoption of this guidance to have a material impact on its Consolidated Financial Statements until it disposes of a component of its business in future periods.

In May 2014, the FASB and the International Accounting Standards Board ("IASB") issued ASU 2014-09 *Revenues from Contracts with Customers (Topic 606)*. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under today's guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. The ASU is effective for the Company in the first quarter of 2017. Early application is not permitted. Entities have the option of using either a full retrospective or a modified approach to adopt the guidance in the ASU. The Company is currently evaluating the new guidance to determine the impact it may have on its Consolidated Financial Statements.

In November 2014, the Emerging Issues Task Force (EITF) and FASB issued ASU 2014-17 *Pushdown Accounting*. The guidance will allow but not require an acquired entity to apply pushdown accounting upon acquisition by a new parent. It will give acquired entities that are businesses or nonprofit activities the option to apply pushdown accounting in their separate financial statements when an acquirer obtains control of them. The guidance represents a significant change from current practice which requires registrants to apply pushdown accounting when they become substantially wholly owned and prohibits pushdown accounting at ownership levels of less than 80%. The guidance is effective immediately from November 18, 2014. The election to apply pushdown accounting can be made either in the period in which the change of control occurred, or in a subsequent period. If the election is made in a subsequent period, it would be considered a change in accounting principle and treated in accordance with Topic 250, Accounting Changes and Error Corrections. This ASU is applicable to the Company as it is considered a variable interest entity ("VIE") due to the terms of the Management Agreement with the Manager, and the Manager has been deemed the primary beneficiary. As the Manager is a wholly owned subsidiary of Fortress, Fortress is consolidating New Senior as of November 7, 2014, and New Senior has elected not to apply push down accounting.

In February 2015, the FASB issued ASU 2015-02 which amends the consolidation guidance in ASC 810. The standard eliminates the deferral of FAS 167, per ASC 810-10-65-2(a), that has allowed certain investment funds to follow the previous consolidation guidance in FIN 46 (R). The standard changes whether (1) fees paid to a decision maker or service provider represent a variable interest, (2) a limited partnership or similar entity has the characteristics of a VIE and (3) a reporting entity is the primary beneficiary of a VIE. The effective date of the standard will be for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015 for public companies, and early adoption is permitted. The Company is currently evaluating the new guidance to determine the impact, if any, it may have on its Consolidated Financial Statements.

The FASB has recently issued or discussed a number of proposed standards on such topics as financial statement presentation, leases, financial instruments and hedging. Some of these proposed changes are significant and could have a material impact on New Senior's Consolidated Financial Statements. The Company has not yet fully evaluated the potential impact of all these proposals, but will make such an evaluation as the standards are finalized.

3. ACQUISITIONS

During the year ended December 31, 2014, the Company completed the acquisitions of eight portfolios representing 16 senior housing properties for total consideration of \$314,935, of which \$195,144 was financed through debt issued in connection with the acquisitions, and the remainder paid in cash. Ten of these properties (nine AL/MC properties and one IL-only property) were integrated into the Company's Managed Properties segment while the remaining six properties (four CCRC, one AL/MC and one IL-only (together, the "LCS Portfolio")) are subject to triple net leases with a third party ("LCS") and are included in the Company's

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

Triple Net Lease segment. Included in Resident fees and services, Rental revenue, and Net Loss is \$16,327, \$8,799, and \$9,543, respectively, attributable to these acquisitions.

The Company has retained Holiday, Blue Harbor and JEA to manage two, seven and one of the properties, respectively, acquired in the Managed Properties segment during the year ended December 31, 2014.

During the year ended December 31, 2013, the Company completed the acquisitions of nine portfolios representing 72 senior housing properties. Seven of the portfolios (representing 21 properties) were integrated into the Company's Managed Properties segment and the Company retained Holiday and Blue Harbor to manage 18 and three of the properties, respectively. Two portfolios (representing 51 properties) were integrated into the Triple Net Lease segment and were leased to Holiday.

The following table summarizes the acquisition date fair value of identifiable assets acquired and liabilities assumed in connection with the acquisitions completed in the years ended December 31, 2014 and December 31, 2013, in accordance with the acquisition method of accounting:

	2014 Acquisitions			2013 Acquisitions		
	Managed Properties (A)	Triple Net Lease Properties	Total	Managed Properties (B)	Triple Net Lease Properties	Total
Real estate investments	\$ 116,674	\$ 143,869	\$ 260,543	\$ 268,011	\$ 937,596	\$ 1,205,607
In-place lease intangibles	15,301	39,894	55,195	31,673	57,830	89,503
Above/below market lease intangibles	—	819	819	—	5,049	5,049
Other intangibles	—	—	—	5,200	—	5,200
Assumed mortgage notes payable	—	—	—	(43,128)	—	(43,128)
Other assets, net of other liabilities	(70)	(1,552)	(1,622)	(2,157)	—	(2,157)
Total Consideration	131,905	183,030	314,935	259,599	1,000,475	1,260,074
Mortgage notes payable	(80,144)	(115,000)	(195,144)	(175,871)	(719,350)	(895,221)
Net assets	51,761	68,030	119,791	83,728	281,125	364,853
Total acquisition related expenses	\$ 2,105	\$ 993	\$ 3,098	\$ 5,810	\$ 4,513	\$ 10,323

(A) Includes \$50 for the fair value of earn-out consideration. The earn-out is limited to \$750 as per the agreement.

(B) Includes \$1,500 for the fair value of earn-out consideration. In 2014, this earn-out was remeasured to zero.

The Company's acquisition accounting for transactions completed during the year ended December 31, 2014 is still preliminary (with the exception of properties acquired during the first quarter of 2014 for which the acquisition accounting has been finalized), pending the completion of various analyses and the finalization of estimates used in the determination of fair values. During the measurement period, additional assets or liabilities may be recognized if new information is obtained about facts and circumstances that existed as of the acquisition date that, if known, would have resulted in the recognition of those assets or liabilities as of that date. The preliminary measurement of net assets acquired may be adjusted after obtaining additional information regarding, among other things, asset valuations (including market and other information with which to determine fair values), liabilities assumed, the analysis of assumed contracts, and revisions of previous estimates. These adjustments may be significant and will be accounted for retrospectively.

During the year ended December 31, 2014, measurement period adjustments were made based on the valuation of assets acquired and liabilities assumed. For the year ended December 31, 2014, the adjustments included a decrease of \$18,379 to real estate investments, an increase of \$18,164 to in-place lease intangibles, an increase of \$141 to above/below market lease intangibles and an increase of \$74 to other liabilities. None of the measurement period adjustments had a material impact on the Company's previously reported results of operations.

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

The following table illustrates the effect of the acquisitions completed in the year ended December 31, 2014 on revenues and pre-tax net income (loss) as if they had been consummated as of January 1, 2013:

	For the Year Ended December 31, 2014	For the Year Ended December 31, 2013
Revenues	\$ 278,900	\$ 267,822
Pre-tax net Income (loss)	\$ (55,028)	\$ (53,767)

The pro forma results are not necessarily indicative of the operating results that would have been obtained had the acquisitions occurred as of January 1, 2013, nor are they necessarily indicative of future operating results.

4. SEGMENT REPORTING

As of December 31, 2014, the Company operated in two reportable business segments: Managed Properties and Triple Net Lease Properties. Under its Managed Properties segment, the Company invests in senior housing properties throughout the United States and engages property managers to manage those senior housing properties. Under its Triple Net Lease Properties segment, the Company invests in senior housing and healthcare properties throughout the United States and leases those properties to healthcare operating companies under triple net leases that obligate the tenants to pay all property-related expenses, including repairs, maintenance, capital expenditures, utilities, taxes, insurance and the payroll expense of property-level employees.

The Company evaluates performance of the combined properties in each reportable business segment based on segment net operating income ("NOI"). The Company defines NOI as total revenues less property-level operating expenses, which include property management fees and travel cost reimbursements to affiliates. The Company believes that net income, as defined by GAAP, is the most appropriate earnings measurement. However, the Company believes that segment NOI serves as a useful supplement to net income because it allows investors, analysts and management to measure unlevered property-level operating results and to compare the Company's operating results to the operating results of other real estate companies and between periods on a consistent basis. Segment NOI should not be considered as an alternative to net income as determined in accordance with GAAP.

Interest expense, depreciation and amortization, general and administrative expense, acquisition, transaction and integration expense, management fee to affiliate, income tax expense, discontinued operations (if any) and other non-property specific revenues and expenses are not allocated to individual segments for purposes of assessing segment performance. There are no intersegment sales or transfers.

	Year Ended December 31, 2014

Total Capital Expenditures	<u>\$ 8,538</u>	<u>100%</u>	<u>\$ 3,502</u>	<u>100%</u>

The tenant for the Holiday Portfolios, an affiliate of Fortress, accounted for 35% of the total revenues for the year ended December 31, 2014. The Company's properties in Florida and Texas accounted for approximately 25.2% and 12.9% of the Company's revenues for the year ended December 31, 2014, respectively. None of the Company's other properties accounted for more than 10% of the Company's revenues.

5. REAL ESTATE INVESTMENTS

	December 31, 2014			December 31, 2013		
	Gross Carrying Amount	Accumulated Depreciation	Net Carrying Value	Gross Carrying Amount	Accumulated Depreciation	Net Carrying Value
Land	\$ 138,799	\$ —	\$ 138,799	\$ 102,064	\$ —	\$ 102,064

Triple Net Lease Properties							
Fixed Rate ^(D)	Jan 2021-Jan 2024	3.83% to 8.00%	708,383	708,383	7.1	719,350	719,350
Floating Rate	Oct 2017	LIBOR + 3.25%	115,000	115,000	2.8	—	—
Total			<u>\$ 1,258,570</u>	<u>\$ 1,259,430</u>	<u>5.5</u>	<u>\$ 1,077,162</u>	<u>\$ 1,077,172</u>

(A) Includes a loan with an outstanding face amount of \$11,432, as of December 31, 2014, which has an interest rate based on the applicable U.S. Treasury Security rates for the first two years. The interest rate is 4.5%, 4.75% and 5.0% for years three through five, respectively.

(B) Includes loans with an outstanding face amount of \$40,584, as of December 31, 2014, for which the Company bought down the interest rate to 4.0% for the first two years. The interest rate will range from 5.99% to 6.76% thereafter.

(C) Includes floating rate mortgage loans with a total carrying value of \$164,974, as of December 31, 2014, which have a LIBOR floor of 1.0%.

(D) Includes loans with an outstanding face amount of \$356,818 and \$312,157, as of December 31, 2014, for which the Company bought down the interest rates to 4.00% and 3.83%, respectively, through January 2019. The interest rates will increase to 4.99% and 4.56%, respectively, thereafter.

The carrying value of collateral relating to fixed rate and floating rate mortgages was \$1,130,582 and \$524,996 as of December 31, 2014 and \$1,193,616 and \$269,117 as of December 31, 2013, respectively.

The Company's mortgage notes payable have contractual maturities as follows:

2015	\$ 17,046
2016	42,302
2017	204,128
2018	206,774
2019	140,657
Thereafter	647,663
Total	<u>\$ 1,258,570</u>

The Company's mortgage notes payable contain various customary financial and other covenants, in some cases including Debt Service Coverage Ratio and Project Yield, as defined in the agreements. The Company was in compliance with the covenants in its mortgage notes payable agreements as of December 31, 2014.

The fair values of mortgage notes payable as of December 31, 2014 and December 31, 2013 was \$1,283,109 and \$1,075,390, respectively. Mortgage notes payable are not measured at fair value in the Consolidated Balance Sheets. The disclosed fair value of mortgage notes payable, classified as level 3 within the fair value hierarchy, is based on a discounted cash flow valuation model. Significant inputs in the model include amounts and timing of expected future cash flows and market yields which are constructed based on inputs implied from similar debt offerings.

The Company incurred \$2,486, \$1,519 and \$426 in workers' compensation expense during the year ended December 31, 2014, December 31, 2013 and the period from July 18, 2012 to December 31, 2012, respectively. The Company incurred \$462 in workers' compensation expense during the period from January 1, 2012 to July 17, 2012.

10. TRANSACTIONS WITH AFFILIATES AND AFFILIATED ENTITIES

Management Agreements

In conjunction with the spin-off, New Senior entered into a management agreement (the "Management Agreement") with the Manager dated November 6, 2014 (effective November 7, 2014), under which the Manager advises the Company on various aspects of its business and manages its day-to-day operations, subject to the supervision of the Company's board of directors. For its management services, the Manager is entitled to a fee of 1.5% per annum of the Company's gross equity. Gross equity is generally defined as the equity invested by Newcastle as of the distribution date calculated and payable monthly in arrears in cash, plus the aggregate offering price from stock offerings, plus certain capital contributions to subsidiaries, less capital distributions (calculated without regard to depreciation and amortization) and repurchases of common stock. Between November 7, 2014 and December 31, 2014, the Company incurred \$1,860 in management fees under the Management Agreement which has been included in the management fee to affiliate caption of the Consolidated Statements of Operations.

The Manager is entitled to receive, on a quarterly basis, incentive compensation on a cumulative, but not compounding basis, in an amount equal to the product of (A) 25% of the dollar amount by which (1)(a) funds from operations (as defined in the Management Agreement) before the incentive compensation per share of common stock, plus (b) gains (or losses) from sales of property per share of common stock, plus (c) internal and third party acquisition-related expenses, plus (d) unconsummated transaction expenses, and plus (e) Other Non-Routine Items, exceed (2) an amount equal to (a) the weighted average value per share of the equity invested by Newcastle in the assets of the Company (including total cash contributed to the Company) as of the distribution date and the price per share of the Company's common stock in any offerings by the Company (adjusted for prior capital dividends or capital distributions, which shall be calculated without regard to depreciation and amortization) multiplied by (b) a simple interest rate of 10% per annum, multiplied by (B) the weighted average number of shares of common stock outstanding. The Manager earned no incentive compensation during the period from November 7, 2014 to December 31, 2014.

Because the Manager's employees perform certain legal, accounting, due diligence tasks and other services that outside professionals or outside consultants otherwise would perform, the Manager is paid or reimbursed for the cost of performing such tasks, provided that such costs and reimbursements are no greater than those which would be paid to outside professionals or consultants on an arm's-length basis. The Company is also required to pay all operating expenses, except those specifically required to be borne by the Manager under the Management Agreement. The Company is required to pay expenses that include, but are not limited to, issuance and transaction costs incidental to the sourcing, evaluation, acquisition, management, disposition, and financing of the Company's investments, legal, underwriting, sourcing, asset management and auditing fees and expenses, the compensation and expenses of independent directors, the costs associated with the establishment and maintenance of any credit facilities and other indebtedness of the Company (including commitment fees, legal fees, closing costs, etc.), expenses associated with other securities offerings of the Company, the costs of printing and mailing proxies and reports to the Company's stockholders, costs incurred by employees or agents of the Manager for travel on the Company's behalf, costs associated with any computer

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

software or hardware that is solely used by the Company, costs to obtain liability insurance to indemnify directors and officers and the compensation and expenses of the Company's transfer agent. During the period from November 7, 2014 to December 31, 2014, the Company reimbursed the Manager for \$1,551 for other tasks and services under the Management Agreement.

As of, and for the Successor periods prior to, November 6, 2014, the Company was not party to a stand-alone management agreement with the Manager. However, the Company was allocated a portion of the fees paid by Newcastle to the Manager for management services in the amount of \$6,610, \$1,796 and \$464 for the period from January 1, 2014 to November 6, 2014, for the year ended December 31, 2013 and for the period from July 18, 2012 to December 31, 2012, respectively.

Newcastle's management agreement with the Manager provides that Newcastle reimburses the Manager for various expenses incurred by the Manager or its officers, employees and agents on its behalf, including costs of legal, accounting, tax, auditing, administrative and other similar services rendered for Newcastle by providers retained by the Manager or, if provided by the Manager's employees, based on amounts which are no greater than those which would be payable to outside professionals or consultants engaged to perform such services pursuant to agreements negotiated on an arm's-length basis. Newcastle's Manager was also entitled to receive an incentive return on a cumulative, but not compounding basis, and subject to certain performance targets and contingent events. Because none of the conditions requiring an incentive payment by Newcastle to the Manager were met, no incentive expense was allocated to the Company. As such, no incentive expense was allocated to the Company.

Property Management Agreements

Within the Company's Managed Properties segment, the Company is party to Property Management Agreements with Blue Harbor and Holiday, both affiliates of Fortress, to manage a portion of its senior housing properties. Pursuant to these Property Management Agreements, the Company pays monthly property management fees. For AL/MC properties managed by Blue Harbor and Holiday, the Company pays management fees equal to 6% of effective gross income for the first two years and 7% thereafter. For IL-only properties managed by Blue Harbor and Holiday, the Company pays management fees equal to 5% of effective gross income. Property management fees are included in property operating expense. Property operating expense for Property Managers affiliated with Fortress include property management fees of \$9,327, \$4,976 and \$1,082 and travel reimbursement costs of \$318, \$181 and \$35 for the year ended December 31, 2014, December 31, 2013 and the period from July 18, 2012 to December 31, 2012, respectively. The payroll expense is structured as a reimbursement to the Property Manager, who is the employer of record. The Company reimbursed the Property Managers affiliated with Fortress for approximately \$58,017, \$32,520 and \$6,761 of property-level payroll expenses relating to the Company's operations during the year ended December 31, 2014, December 31, 2013 and the period from July 18, 2012 to December 31, 2012, respectively. The Property Management Agreements with affiliated managers have an initial term of 10 years and provide for automatic one-year extensions after the initial term, subject to termination rights.

During the Predecessor period, the Company was party to property management agreements with Regent Assisted Living, Inc. and BPM Senior Housing Company to manage its senior housing properties. BPM Senior Housing Company was also the employer of record. Pursuant to these property management agreements, the Company paid management fees equal to 5% of the property's effective gross income, as defined in the respective agreements. During the period from January 1, 2012 to July 17, 2012, property management fees expensed in property operating expense amounted to \$988. Additionally, the Company reimbursed payroll costs of \$3,538 for the period from January 1, 2012 to July 17, 2012.

Triple Net Lease Agreements

Within the Company's Triple Net Lease segment, the Company is party to triple net master leases with the tenant for the Holiday Portfolios. Pursuant to the leases, the tenant pays monthly lease payments at a fixed rate through the lease term which expires in 2031. For the year ended December 31, 2014, December 31, 2013 and the period from July 18, 2012 to December 31, 2012, such payments amounted to \$65,031, \$1,399 and \$0, respectively.

11. INCOME TAXES

New Senior has been operating so as to qualify as a REIT under the requirements of the Code. However, certain of the Company's activities are conducted through its TRS and therefore are subject to federal and state income taxes at regular corporate tax rates.

During the Predecessor periods, the Company was treated as a disregarded single-member limited liability for U.S. federal and state income tax purposes and was not subject to income taxes. Accordingly, amounts included below apply only to the Successor period.

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

The provision for income taxes consists of the following:

	Successor		
	For the Year Ended December 31, 2014	For the Year Ended December 31, 2013	For the period from July 18, 2012 to December 31, 2012
Current			
Federal	\$ (925)	\$ 437	\$ 501
State and local	170	93	101
Total current provision	(755)	530	602
Deferred			
Federal	907	116	(404)
State and local	8	10	(48)
Total deferred provision	915	126	(452)
Total provision for income taxes	<u>\$ 160</u>	<u>\$ 656</u>	<u>\$ 150</u>

During the year ended December 31, 2014, December 31, 2013, and the period from July 18, 2012 to December 31, 2012, New Senior's TRS recorded approximately \$160, \$656 and \$150 in current and deferred income tax expense, respectively. Generally, the Company's effective tax rate differs from the federal statutory rate as a result of state and local taxes and non-taxable REIT income. The table below provides a reconciliation of the Company's provision, based on the statutory rate of 35%, to the effective tax rate.

	Successor		
	For the Year Ended December 31, 2014	For the Year Ended December 31, 2013	For the Period from July 18, 2012 to December 31, 2012
Statutory U.S. Federal income tax rate	35.00 %	35.00 %	35.00 %
Non-taxable REIT (loss)	(35.03)%	(36.90)%	(36.42)%
State and local taxes	(0.29)%	(0.24)%	(0.19)%
Other	(0.03)%	(0.09)%	—
Effective income tax rate	<u>(0.35)%</u>	<u>(2.23)%</u>	<u>(1.61)%</u>

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

The tax effects of temporary differences that give rise to significant portions of the Company's deferred tax assets and deferred tax liabilities as of December 31, 2014, 2013 and 2012 are presented below:

	Successor		
	December 31, 2014	December 31, 2013	December 31, 2012
Deferred tax assets:			
Depreciation and amortization	\$ 837	\$ —	\$ 4
Prepaid fees and rent	2,091	1,156	448
Net operating loss	1,724	—	—
Other	20	23	—
Total deferred tax assets	4,672	1,179	452
Less valuation allowance	—	—	—
Net deferred tax assets	4,672	1,179	452
Deferred tax liabilities:			
Depreciation and amortization	—	853	—
Deferred revenues	—	—	—
Total deferred tax liabilities	—	853	—
Total net deferred tax assets (liabilities)	\$ 4,672	\$ 326	\$ 452

On the Consolidated Balance Sheets, deferred tax assets are recorded within receivables and other assets and deferred tax liabilities are recorded within accrued expenses and other liabilities.

As of December 31, 2014, New Senior had a loss carryforward of approximately \$4,149 for federal income tax purposes. The net operating loss carryforward can generally be used to offset future taxable income, if and when it arises. The net operating loss carryforward will expire in 2034.

In assessing the recoverability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which temporary differences become deductible. New Senior has not recorded a valuation allowance against its deferred tax assets as of December 31, 2014, as management believes that it is more likely than not that its deferred tax assets will be realized.

New Senior and its TRS file income tax returns with the U.S. federal government and various state and local jurisdictions. New Senior is no longer subject to tax examinations by tax authorities for tax years ended December 31, 2012, December 31, 2013 and December 31, 2014. New Senior recognizes tax benefits for uncertain tax positions only if it is more likely than not that the position is sustainable based on its technical merits. Generally, New Senior has assessed its tax positions for all open years, which includes 2012 to 2014, and concluded that there are no material uncertainties to be recognized. Interest and penalties, if any, on uncertain tax positions are included as a component of the provision for income taxes in the Consolidated Statements of Operations.

12. EQUITY AND EARNINGS PER SHARE

Equity and Dividends

On November 6, 2014, the spin-off of New Senior was effected as a taxable pro rata distribution of all of the outstanding shares of common stock of New Senior to the holders of Newcastle common stock. Newcastle distributed one share of New Senior common stock for each share of Newcastle common stock held by Newcastle stockholders of record as of the record date, October 27, 2014. The distribution occurred on November 6, 2014. The distribution ratio was based on the number of Newcastle shares outstanding of 66,399,857.

In connection with the spin-off, Newcastle contributed to New Senior all of its investments in senior housing properties, any liabilities relating to these properties and a cash and cash equivalents balance of \$245,244.

On October 23, 2014, the Company's certificate of incorporation was amended so that its authorized capital stock now consists of 2 billion shares of common stock, par value \$0.01 per share and 100 million shares of preferred stock, par value \$0.01 per share.

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

On the spin-off date, there were 66,399,857 issued and outstanding shares of common stock which was based on the number of Newcastle's shares of common stock outstanding on October 27, 2014 and a distribution ratio of one share of New Senior common stock for each share of Newcastle common stock.

On December 19, 2014, New Senior's board of directors declared a dividend of \$15,276, or \$0.23 per share, payable to shareholders of record on January 2, 2015. This dividend was paid on January 30, 2015.

1,071,658 shares of New Senior's common stock were held by Fortress, through its affiliates, and its principals as of December 31, 2014.

Option Plan

Effective upon the spin-off, the Company has a Nonqualified Stock Option and Incentive Award Plan (the "Plan") which provides for the grant of equity-based awards, including restricted stock, stock options, stock appreciation rights, performance awards, tandem awards and other equity-based and non-equity based awards, in each case to the Manager and to the directors, officers, employees, service providers, consultants and advisors of the Manager who perform services for New Senior and to New Senior's directors, officers, service providers, consultants and advisors. New Senior has initially reserved 30 million shares of its common stock for issuance under the Plan; on the first day of each fiscal year beginning during the ten-year term of the Plan in and after calendar year 2014, that number will be increased by a number of shares of New Senior's common stock equal to 10% of the number of shares of common stock newly issued by New Senior during the immediately preceding fiscal year. New Senior's board of directors may also determine to issue options to the Manager that are not subject to the Plan, provided that the number of shares underlying any options granted to the Manager in connection with capital raising efforts would not exceed 10% of the shares sold in such offering and would be subject to NYSE rules.

Prior to the spin-off, Newcastle had issued rights relating to shares of Newcastle's common stock (the "Newcastle options") to the Manager in connection with capital raising activities. In connection with the spin-off, 5.5 million options that were held by the Manager, or by the directors, officers or employees of the Manager, were converted into an adjusted Newcastle option and a right relating to a number of shares of New Senior common stock (the "New Senior option"). The exercise price of each adjusted Newcastle option and New Senior option was set to collectively maintain the intrinsic value of the Newcastle option immediately prior to the spin-off and to maintain the ratio of the exercise price of the adjusted Newcastle option and the New Senior option, respectively, to the fair market value of the underlying shares as of the spin-off date, in each case based on the five day average closing price subsequent to the spin-off date. The options expire between January 12, 2015 and August 18, 2024.

Upon joining the board, non-employee directors were, in accordance with the Plan, granted options relating to an aggregate of 20,000 shares of common stock. The fair value of such options was not material at the date of grant.

In December 2014, New Senior issued an aggregate of 1,370 shares of its common stock to independent directors as compensation for their services.

New Senior's outstanding options are summarized as follows:

	December 31, 2014			December 31, 2013		
	Issued Prior to 2012	Issued in 2012- 2014	Total	Issued Prior to 2012	Issued in 2012- 2013	Total
Held by the Manager	623,623	4,368,129	4,991,752	715,258	3,866,906	4,582,164
Issued to the Manager and subsequently transferred to certain of the Manager's employees	42,202	466,645	508,847	290,929	216,668	507,597
Issued to the independent directors	—	20,000	20,000	—	666	666
Total	665,825	4,854,774	5,520,599	1,006,187	4,084,240	5,090,427

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

The following table summarizes New Senior's outstanding options as of December 31, 2014. The last sale price on the NYSE for New Senior's common stock in the year ended December 31, 2014 was \$16.45 per share.

Recipient	Date of Grant/ Exercise ^(A)	Number of Options	Options Exercisable as of December 31, 2014	Weighted Average Exercise Price ^(B)	Intrinsic Value as of December 31, 2014 (millions)
Directors	November 2014	20,000	667	\$ 17.21	—

Manager ^(C)	March 2011	182,527	182,527	\$ 7.18	\$ 1.7
Manager ^(C)	September 2011	283,305	283,305	\$ 4.09	\$ 3.5
Manager ^(C)	April 2012	311,191	306,991	\$ 7.66	\$ 2.7
Manager ^(C)	May 2012	377,495	372,440	\$ 8.75	\$ 2.9
Manager ^(C)	July 2012	416,522	397,869	\$ 8.71	\$ 3.2
Manager ^(C)	January 2013	958,331	734,720	\$ 14.42	\$ 1.9
Manager ^(C)	February 2013	383,331	281,109	\$ 16.85	—
Manager ^(C)	June 2013	670,829	402,497	\$ 17.89	—
Manager ^(C)	November 2013	965,847	418,534	\$ 19.23	—
Manager ^(C)	August 2014	765,416	102,055	\$ 20.89	—
Exercised ^(D)	December 2014	(14,188)	N/A	\$ 8.41	N/A
Expired unexercised	2004	(27,080)	N/A	\$ 61.11	N/A
Outstanding		5,520,599	3,682,707	\$ 16.33	

(A) Options expire on the tenth anniversary from date of grant.

(B) The strike prices are subject to adjustment in connection with return of capital dividends.

(C) The Manager assigned certain of its options to Fortress's employees as follows:

Date of Grant	Range of Strike Prices	Total Unexercised Inception to Date
2004 - 2007	\$53.26-60.92	42,202
2012	\$7.66-8.75	199,988
2013	\$14.42-19.23	266,657
Total		508,847

(D) The options were exercised by a former employee of Fortress for an equal amount of New Senior shares.

Earnings Per Share

New Senior is required to present both basic and diluted earnings per share ("EPS"). Basic EPS is calculated by dividing net income by the weighted average number of shares of common stock outstanding. Diluted EPS is computed by dividing net income by the weighted average number of shares of common stock outstanding plus the additional dilutive effect, if any, of common stock equivalents during each period. New Senior's common stock equivalents are its outstanding stock options.

Basic and Diluted EPS for all periods prior to the spin-off reflect the number of distributed shares on November 7, 2014, or 66.4 million shares. For 2014 year-to-date calculations, these shares are treated as issued and outstanding from January 1, 2014 for purposes of calculating historical basic EPS, similar to a stock split. At the time of the spin-off, the Newcastle options were converted to awards of New Senior, and, therefore, there were no potentially dilutive securities outstanding for historical periods. For 2014, the Company determined its weighted average diluted shares outstanding assuming that the date of New Senior's separation from Newcastle was the beginning of the period.

During the fiscal year ended December 31, 2014, 162,563 potentially dilutive shares were excluded given the Company's loss position. During the years ended December 31, 2013 and December 31, 2012, there were no potentially dilutive shares outstanding as EPS for those periods assumes the same number of shares outstanding as issued upon its spin-off from Newcastle.

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

13. CONCENTRATION OF CREDIT RISK

As of December 31, 2014, December 31, 2013 and December 31, 2012, Blue Harbor and Holiday managed and operated approximately 32%, 32% and 100%, of the Company's real estate investments (based on their carrying amount), respectively. Also, as of December 31, 2014, December 31, 2013 and December 31, 2012, senior housing properties under triple net master leases constituted approximately 67%, 68% and 0%, respectively, of the Company's real estate investments (based on their carrying amount).

Managed Properties

Blue Harbor and Holiday managed 96.5%, 100% and 100% of segment real estate investment; 99.8%, 100% and 100% of segment revenue; and 99.7%, 100% and 100% of segment NOI as of and for the years ended December 31, 2014, December 31, 2013 and December 31, 2012, respectively.

Because Blue Harbor and Holiday manage, but do not lease New Senior's properties in the Managed Properties segment, the Company is not directly exposed to their credit risk in the same manner or to the same extent as the Company's triple net lease tenants. However, the Company relies on Blue Harbor and Holiday's personnel, expertise, accounting resources and information systems, proprietary information, good faith and judgment to manage the Company's properties efficiently and effectively. New Senior also relies on Blue Harbor and Holiday to otherwise operate the Company's properties in compliance with the terms of the Property Management agreements, although the Company has various rights as the property owner to terminate and exercise remedies under the Property Management agreements. Blue Harbor's and Holiday's inability or unwillingness to satisfy their obligations under those agreements, to efficiently and effectively manage the Company's properties, or to provide timely and accurate accounting information could have a material adverse effect on the Company. In addition, significant changes in Blue Harbor's and Holiday's senior management or adverse developments in their business and affairs or financial condition could have a material adverse effect on the Company.

Triple Net Lease Properties

For the year ended December 31, 2014, December 31, 2013, and for the period from July 18, 2012 through December 31, 2012, approximately 35.0%, 2.3% and 0% respectively, of New Senior's total revenues and 62.5%, 7.8% and 0% respectively, of segment NOI were derived from lease agreements with the tenant for the Holiday Portfolios, an affiliate of Fortress.

Triple net leases obligate the tenant to pay all property-related expenses, including maintenance, utilities, repairs, taxes, insurance and capital expenditures, and to comply with the terms of the mortgage financing documents, if any, affecting the properties. In addition, each of these leases has guaranty and cross-default provisions tied to other leases with the same tenant.

Because the properties leased to the tenant for the Holiday Portfolios account for a significant portion of total revenues and NOI, the Company's financial condition and results of operations could be weakened and the Company's ability to service its indebtedness and to make distributions to stockholders could be limited if the tenant for the Holiday Portfolios becomes unable or unwilling to satisfy its obligations to the Company or to renew leases with the Company upon expiration of the terms thereof. New Senior cannot assure that the tenant for the Holiday Portfolios will have sufficient assets, income and access to financing to enable it to satisfy its respective obligations to the Company, and any inability or unwillingness by the tenant for the Holiday Portfolios to do so could have a material adverse effect on the Company's business, financial condition, results of operations and liquidity, the Company's ability to service its indebtedness and other obligations and ability to make distributions to stockholders, as required for the Company to continue to qualify as a REIT. New Senior also cannot assure that the tenant for the Holiday Portfolios will elect to renew leases with the Company upon expiration of the terms thereof or that New Senior will be able to reposition any properties that are not renewed on a timely basis or on the same or better economic terms, if at all.

Each triple net master lease includes (i) a covenant requiring the tenant for the Holiday Portfolios to maintain a minimum lease coverage ratio, which the triple net master lease defines as net operating income less a reserve for capital expenditures for the applicable trailing 12-month period for the Holiday Portfolios divided by the base rental revenue for such trailing 12-month period, which steps up during the term of the lease and is subject to certain cure provisions, (ii) minimum capital expenditure requirements, (iii) customary operating covenants, events of default, and remedies, (iv) a non-compete clause restricting certain affiliates of the tenant for the Holiday Portfolios from developing or constructing new independent living properties within a specified radius of any property acquired by the Company in this transaction, and (v) restrictions on a change of control of the tenant for the Holiday Portfolios and Guarantor (as defined below), subject to certain exceptions. The triple net master leases also require the tenant for the Holiday Portfolios to fund a security deposit in the amount of approximately \$43,400, which

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

serves as security for the tenant for the Holiday Portfolios' performance of its obligations to the Company. Additionally, the tenant for the Holiday Portfolios granted the Company a first priority security interest in certain personal property and receivables arising from the operations of the Holiday Portfolios, which security interest also secures the tenant for the Holiday Portfolios' obligations under the triple net master leases. The tenant for the Holiday Portfolios' obligations to the Company under the triple net master leases are further guaranteed by Holiday AL Holdings LP, (the "Guarantor"), an affiliate of Fortress. The Guarantor is required to maintain a minimum net worth of \$150,000, a minimum fixed charge coverage ratio of 1.10 and a maximum leverage ratio of 10 to 1.

14. FUTURE MINIMUM RENTS

The following table sets forth future contracted minimum rental receipts from tenants within the Triple Net Lease Properties segment, excluding contingent payment escalations, as of December 31, 2014:

	Total
2015	\$ 82,439
2016	86,040
2017	89,798
2018	92,882
2019	95,972
Thereafter	1,269,839
Total	\$ 1,716,970

15. COMMITMENTS AND CONTINGENCIES

As of December 31, 2014, management believes there are no material contingencies that would affect the Company's results of operations, cash flows or financial position.

Certain Obligations, Liabilities and Litigation

The Company may be subject to various obligations, liabilities and litigation assumed in connection with or arising out of its acquisitions or otherwise arising in connection with its on-going business. Some of these liabilities may be indemnified by third parties. However, if these liabilities are greater than expected or were not known to the Company at the time of acquisition, if the Company is not entitled to indemnification, or if the responsible third party fails to indemnify the Company for these liabilities, such obligations, liabilities and litigation could have a material adverse effect on the Company. In addition, in connection with the sale or leasing of properties, the Company may incur various obligations and liabilities, including indemnification obligations, relating to the operations of those properties, which could have a material adverse effect on the Company's financial position, cash flows and results of operations.

Certain Tax-Related Covenants

If New Senior is treated as a successor to Newcastle under applicable U.S. federal income tax rules, and if Newcastle fails to qualify as a REIT, New Senior could be prohibited from electing to be a REIT. Accordingly, Newcastle has (i) represented that it has no knowledge of any fact or circumstance that would cause New Senior to fail to qualify as a REIT, (ii) covenanted to use commercially reasonable efforts to cooperate with New Senior as necessary to enable New Senior to qualify for taxation as a REIT and receive customary legal opinions concerning REIT status, including providing information and representations to New Senior and its tax counsel with respect to the composition of Newcastle's income and assets, the composition of its stockholders and its operation as a REIT, and (iii) covenanted to use its reasonable best efforts to maintain its REIT status for each of Newcastle's taxable years ending on or before December 31, 2015 (unless Newcastle obtains an opinion from a nationally recognized tax counsel or a private letter ruling from the Internal Revenue Service ("IRS") to the effect that Newcastle's failure to maintain its REIT status will not cause New Senior to fail to qualify as a REIT under the successor REIT rule referred to above).

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED (SUCCESSOR) AND COMBINED (PREDECESSOR) FINANCIAL STATEMENTS
December 31, 2014, 2013, 2012
(dollars in thousands, except share data)

Proceedings Indemnified and Defended by Third Parties

From time to time, the Company is party to certain legal actions, regulatory investigations and claims for which third parties are contractually obligated to indemnify, defend and hold the Company harmless. While the Company is presently not being defended by any tenant and other obligated third parties in these types of matters, there is no assurance that its tenants, their affiliates or other obligated third parties will continue to defend the Company in these matters, or that such parties will have sufficient assets, income and access to financing to enable them to satisfy their defense and indemnification obligations to the Company.

Environmental Costs

As a commercial real estate owner, the Company is subject to potential environmental costs. As of December 31, 2014, management of the Company is not aware of any environmental concerns that would have a material adverse effect on the Company's financial position or results of operations.

Capital Improvement, Repair and Lease Commitments

The Company is committed to making \$6,500 available for capital improvements to the triple net lease properties under the LCS Portfolio and also agreed to make available an additional \$9,000 at certain intervals over the 15 year lease period to be used for further capital improvements. Upon funding the capital improvements, the Company will be entitled to a rent increase. No capital improvements and repairs have been funded as of December 31, 2014. The Company has two ground leases with initial terms of 74 and 82 years. Both ground leases require equal annual rent payments that amount to an aggregate \$368 over the life of the leases.

16. SUBSEQUENT EVENTS

These Consolidated Financial Statements include a discussion of material events, if any, which have occurred subsequent to December 31, 2014 (referred to as subsequent events) through the issuance of the Consolidated Financial Statements.

On January 22, 2015, the Company consummated the acquisition of a four property portfolio, the "CSL Portfolio" for total consideration of \$36,299. The CSL Portfolio consists of four IL-only properties and will be included in the Company's Managed Properties segment.

The following table illustrates the effect of the CSL Portfolio acquisition on revenues and pre-tax net income as if they had been consummated as of January 1, 2013:

	For the Year Ended December 31, 2014	For the Year Ended December 31, 2013
Revenues	\$ 9,846	\$ 9,582
Pre-tax net Income (loss)	\$ (548)	\$ (676)

On December 21, 2014, the Company entered into a Purchase and Sale Agreement with an affiliate of Hawthorn Retirement Group LLC to acquire 17 IL-only properties for approximately \$435,000 in cash, subject to customary adjustments and prorations, which the Company intends to integrate into the Managed Properties segment. The acquisition is subject to various conditions, including the completion of due diligence, and is expected to close in March 2015.

(A) AL/MC represents assisted living and memory care; IL represents independent living and CCRC represents continuing care retirement communities.

(B) For United States federal income tax purposes, the initial aggregate cost basis, including furniture, fixtures, and equipment, for New Senior's senior housing real estate assets at December 31, 2014 was approximately \$1.66 billion.

NEW SENIOR INVESTMENT GROUP INC. AND SUBSIDIARIES
SCHEDULE III - REAL ESTATE AND ACCUMULATED DEPRECIATION
December 31, 2014
(dollars in thousands)

The following is a rollforward of the gross carrying amount and accumulated depreciation (depreciation is calculated on a straight line basis using the estimated useful lives detailed in Note 2) of senior housing real estate for the years ended December 31, 2014, December 31, 2013 and December 31, 2012:

<u>Gross carrying amount</u>	<u>December 31, 2014</u>	<u>December 31, 2013</u>	<u>December 31, 2012 ^(A)</u>
Beginning of period	\$ 1,373,428	\$ 164,360	\$ 126,201
Acquisitions	260,543	1,205,607	37,872
Additions	8,538	3,502	297
Disposals and other	(3,580)	(41)	(10)
End of period	\$ 1,638,929	\$ 1,373,428	\$ 164,360
<u>Accumulated depreciation</u>			
Beginning of period	\$ (10,526)	\$ (1,558)	\$ —
Depreciation expense	(46,622)	(8,984)	(1,559)
Disposals and other	160	16	1
Balance at end of year	\$ (56,988)	\$ (10,526)	\$ (1,558)

(A) The rollforward of the gross real estate investment for the period ended December 31, 2012 excludes any activity in the predecessor period as such balances are on a different basis of accounting. The balance at the beginning of the period for the period reflects the Company's initial investment in senior housing properties as of July 18, 2012.

ITEM 9. CHANGES IN DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

- (a) Disclosure Controls and Procedures. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act") as of the end of the period covered by this report. The Company's disclosure controls and procedures are designed to provide reasonable assurance that information is recorded, processed, summarized and reported accurately and on a timely basis. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective.
- (b) There were no material changes noted during the timeframe of October 2014 to December 2014.

Management's Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended, as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's board of directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in the Internal Control-Integrated Framework (1992).

Based on our assessment, management concluded that, as of December 31, 2014, the Company's internal controls over financial reporting was effective.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2014 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report included herein.

ITEM 9B. OTHER INFORMATION

None

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Incorporated by reference to our definitive proxy statement for the 2014 annual meeting of stockholders to be filed with the Securities and Exchange Commission pursuant to Regulation 14A Exchange Act, within 120 days after the fiscal year ended December 31, 2014.

ITEM 11. EXECUTIVE COMPENSATION

Incorporated by reference to our definitive proxy statement for the 2014 annual meeting of stockholders to be filed with the Securities and Exchange Commission pursuant to Regulation 14A Exchange Act, within 120 days after the fiscal year ended December 31, 2014.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Incorporated by reference to our definitive proxy statement for the 2014 annual meeting of stockholders to be filed with the Securities and Exchange Commission pursuant to Regulation 14A Exchange Act, within 120 days after the fiscal year ended December 31, 2014.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Incorporated by reference to our definitive proxy statement for the 2014 annual meeting of stockholders to be filed with the Securities and Exchange Commission pursuant to Regulation 14A Exchange Act, within 120 days after the fiscal year ended December 31, 2014.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Incorporated by reference to our definitive proxy statement for the 2014 annual meeting of stockholders to be filed with the Securities and Exchange Commission pursuant to Regulation 14A Exchange Act, within 120 days after the fiscal year ended December 31, 2014.

ITEM 15. EXHIBITS; FINANCIAL STATEMENT SCHEDULES

(a) Financial statements and schedules:

See “Financial Statements and Supplementary Data” included in Part II, Item 8 of this Form 10-K

(b) Exhibits filed with this Form 10-K:

- 2.1 Separation and Distribution Agreement dated October 16, 2014, between the Registrant and Newcastle Investment Corp. (incorporated by reference to Newcastle Investment Corp.’s Report on Form 10-Q, Exhibit 2.2, filed on November 5, 2014).

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain items in this annual report constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, such as statements regarding expected continued strong growth, small "mom and pop" operators exiting the senior housing industry and increased demand for senior housing. These statements are not historical facts. They represent management's current expectations regarding future events and are subject to a number of trends and uncertainties, many of which are beyond our control, that could cause actual results to differ materially from those described in the forward-looking statements. Accordingly, you should not place undue reliance on any forward-looking statements contained herein. For a discussion of some of the risks and important factors that could affect such forward-looking statements, see the sections entitled "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Annual Report on Form 10-K, which is available on the Company's website (www.newseniorinv.com). New risks and uncertainties emerge from time to time, and it is not possible for New Senior to predict or assess the impact of every factor that may cause its actual results to differ from those contained in any forward-looking statements. Forward-looking statements contained herein speak only as of the date of annual report, and New Senior expressly disclaims any obligation to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in New Senior's expectations with regard thereto or change in events, conditions or circumstances on which any statement is based.
