PENNPETRO ENERGY PLC
CHAIRMAN'S STATEMENT

Annual Report & Financial Statements
For the year ended 31 December 2020

Dear Shareholders,

I am pleased to present the annual results for Pennpetro Energy PLC (“Pennpetro”) for the year ended 31 December 2020.

I write to you during what has been the most difficult of times for businesses and families globally. A pandemic not seen in our lifetimes, that has challenged every aspect of the way we live and interact not only on a commercial basis, but the very essence of how we live our lives day to day.

As a business we dealt with the challenges brought about by the COVID-19 pandemic swiftly and humanely to not only ensure the wellbeing of our employees but also the retention of value for our shareholders.

In February of 2020 after selling oil commercially from our initial well in the Gonzales field, as the world went into lockdown, we suspended all operations and activities in line with the requirements of the US Government and Texas State Legislators.

With operations unable to continue we sought to shape Pennpetro to emerge stronger and better positioned to accelerate its growth profile from these challenging times.

To that end I am pleased to welcome Andy Clifford as President of Nobel Petroleum USA Inc., - with overall responsibility for the development of our North American assets. Andy is a highly seasoned oil professional with over 42 years of experience in domestic and international exploration, development and production with a proven track record of exploration and acquisition successes in practically every import petroleum basin in the world and is credited with the discovery of over two billion BOE of reserves worldwide having worked for ExxonMobil, Kuwait Foreign Petroleum, BHP Billiton, Aurora Gas and Saratoga.

I would like to thank our outgoing board members Mr Edelman, and Mr Nash who have worked tirelessly since our listing. They have certainly helped set a solid foundation of management, accounting, and governance for Pennpetro.

They have been drawn into more time demanding roles over this difficult pandemic period but I am grateful that they remain strongly supportive active consultants and shareholders in the company.

The past year has been challenging financially for individuals and corporate enterprises alike, your board therefore not only undertook a strategy of asset protection but also a strategy that allowed us to potentially leverage our existing position for growth. To that end we agreed a three-year £20 Million share subscription facility with the GEM Group, New York (a US\$3.4 Billion alternative investment group), through their affiliates, which was completed in June. Your board also continues to seek accretive options for corporate development.

In addition, the Company recognising the global impact of environmental concerns, has instigated due diligence with regard to expanding its experiences and core competencies within the fossil environment and petroleum drilling to specific green energy initiatives securitised with US intellectual property filings to be expanded internationally.

We remain confident in our petroleum assets, our US operations, and the Board, to continue to build upon what has been a very perplexing year for the Group.

Olof Rapp

Non-Executive Director, Chairman
30 June 2021

PENNPETRO ENERGY PLC
EXECUTIVE DIRECTOR'S STATEMENT

Annual Report & Financial Statements
For the year ended 31 December 2020

Pennpetro's intention is to become an active independent North American development production company.

The key elements of Pennpetro's strategy for achieving this goal are:

- The creation of value through production development success and operational strengths, commencing with the Group's City of Gonzales Lease ("COGLA") assets.
- Focusing on commercialisation and monetisation of oil and gas discoveries, and potentially utilising cash flows from initial projects to fund the acquisition or development of future projects.
- Active asset portfolio management.
- Positioning the Company as a competent partner of choice to maximise opportunities and value throughout the E&P lifecycle.
- Asset acquisitions of producing hydrocarbons and suitable green energy technologies.

Our focus during 2020 was to continue to develop our proven reserve base at our licences in Gonzalez – this was unfortunately curtailed by Covid-19 and the ensuing pandemic conditions imposed across all of the United States.

According to the Group's Competent Person's Report ("CPR"), prepared in December 2017, Pennpetro had a Working Interest in 2,000 Mbbl of oil and 1,000 MMcf of gas across its Gonzalez leases. Most recently, Nobel has increased its working interest in the portfolio of petroleum interests from 75% to 100%, thereby its Working Interest is now over 4,000 MBBL of oil and 2,000 MMcf of gas resulting in a substantive uplift in our valuation metric.

The low oil price environment since mid-2014 presented the opportunity to acquire leases in our core areas of focus, most notably the prolific Austin Chalk and Eagleford Shale in South Texas. To this, we have been able to add additional reserves from the Buda Formation from the drilling of an initial horizontal well, which as prior reported we have now completed with the operator having advised the Texas Railroad Commission, the local authority, that the well is designated as a discovery and commercial unit. Commercial quantities of test hydrocarbons have been sold from this well. The submersible jet pumping unit to the well required significant remedial work as the unit supplied by the vendor was found to have certain issues with regard to the deliverability's of electrical input through the provided electrical circuit boards resulting in operational impairment. This work unfortunately caused significant delays to the Buda oil recovery operations, as the well was required to be suspended on a number of occasions.

Having regard that the Buda oil formation water resulting from prior extensive flooding would need some time to be pumped out and regain pressure thereby recommencing hydrocarbon deliverability from that reservoir, it was decided that as the Buda operations had achieved the important positive result of confirming that this reservoir was now drill confirmed to be active over the acreage and a confirmed secondary recovery reserve, that it was time to clean out and re-enter our initial objective, the Austin Chalk formation which we had drilled out to 3,300 feet horizontally and which had tested positive for both oil and gas recovery. The Austin Chalk formation was drilled out at approximately 7,200 feet sub-surface, whereas the Buda was intersected at 8,500 feet sub-surface.

This would require that we case-off the lower Buda formation until needed to deplete in the future and initiate a work-over rig operation to re-enter and clean out the horizontally drilled formation leg to initiate hydrocarbon recovery from this proven oil interval. However, during the pandemic we continually reviewed our strategic opportunities and decided in line with the results delivered by some of our close petroleum drilling neighbours to benefit from their operational experiences and excellent results to move our focus to the drilling of our second horizontal well (COG#2-H) by way of a Pad (Production Platform) which would also allow us to drill out additional horizontal legs by

PENNPETRO ENERGY PLC
EXECUTIVE DIRECTOR'S STATEMENT (continued)

Annual Report & Financial Statements
For the year ended 31 December 2020

way of extension into the differing Austin Chalk pathways at a much condensed expense. The same methodology would be utilised for our third horizontal well (COG#3-H).

As this operational technique was not available to us at the time for our initial well, COG#1-H, it makes sense to avail ourselves of it now, and then return to COG#1-H to recomplete that well into the prior drill proved production horizon, assessing the economics of the straight cleanout as currently envisaged, or amplify by utilising the Pad experiences for extending the lateral out to 5,000 foot as allowable under the initial RRC drilling authority and capture an additional 3 to 4 fractures which will impact the EUR.

The wells we are drilling and plan to drill are economic at oil prices sub US\$30/bbl; record production rates have been reported as the horizontal laterals are extended and the amount of pay in each well has increased; drilling and completion costs have been significantly reduced; and initial decline rates during the first 12-18 months of production are lower than those in other US plays. Over the last two years, we have taken advantage of depressed market conditions to increase our exposure to these areas.

West Texas Intermediate (“WTI”) averaged US\$39.68/bbl during 2020, \$17.31 per barrel lower than in 2019. The value of WTI as at 22 June 2021 was US\$70.94/bbl. (source: Bloomberg Markets).

PENNPETRO ENERGY PLC
EXECUTIVE DIRECTOR'S STATEMENT (continued)

Annual Report & Financial Statements
For the year ended 31 December 2020

Operations

In terms of our operations, prior to the onset of the pandemic restrictions, our focus had been on completing our initial horizontal well and organising the permitting of our second targeted horizontal well (COG#2-H) situated to the north of COG#1-H. Our operator has filed formal completion certificates with the Texas Railroad Commission confirming that the COG#1-H well was being completed as a producer. As explained, our emphasis has now moved to the development and drilling of COG#2-H, and our prior stated activity pertaining to the COG#1-H Austin Chalk oil operations, will be held pending post the drilling of COG#2-H well into production. Once the process of water removal from the lower reservoirs of COG#1-H is completed – an operation which we have decided to complete with the lower formation being cased-off and to re-enter and take hydrocarbon production from the upper Austin Chalk, from which we initially took oil.

Financially, the Company used 2020 to further lay the foundations for future revenue generation.

Reduced economic activity related to the COVID-19 pandemic caused changes in energy demand and supply patterns in 2020 and will continue to affect these patterns in the future. U.S. gross domestic product (GDP) declined by 4.4% in the first half of 2020 from the same period a year ago. GDP began rising in the third quarter of 2020, with the assumption that it will grow by 3.1% annually in 2021 from 2020. The U.S. macroeconomic assumptions are based on forecasts by IHS Markit completed in early November 2020.

During early 2020 the oil price was severely antagonised by the emergence of the Covid-19 worldwide pandemic, leading to the most unsettled oil environment for many years. However, recently due to both the US shale industry being severely impacted by the oil price and re-emergence of a combined consensus at OPEC, there has been not only a re-emergence of price stability, but a very significant uplift in the oil price to currently US\$72/bbl – with many commentators predicting that this pricing trend will not only stabilise over the coming year, but further increase yet again to potentially challenge what we call \$100 oil. To this bullish scenario, it needs to be further understood that the Company's oil deliveries benefit from an approximately \$5 pricing premium for local refiners as they need our slightly heavier oil to blend out with lighter oil for domestic delivery.

PENNPETRO ENERGY PLC
EXECUTIVE DIRECTOR'S STATEMENT (continued)

Annual Report & Financial Statements
For the year ended 31 December 2020

In this stabilised oil price environment, Pennpetro has emerged from the oil vicissitudes as a low-cost, asset-backed US onshore oil and gas business. Subject to oil prices, market conditions and sentiment, I remain confident that we can deliver our strategy by not only acquiring leases in active and producing US onshore plays and proving up the reserves by drilling new wells, but also by our new strategic acquisition focus on producing assets and directive into green energy initiatives.

This platform is one that has, at its core, the active management of all types of risk associated with the oil and gas industry. Broadly speaking development risk is managed by focusing on proven formations; execution risk is managed by participating in drilling activities with solid experienced industry personnel, which we have in Houston who have an extensive history in South Texas petroleum activities, as well as our operations offsetting those of major industry players, such as EOG Resources, Inc., a multi-billion dollar Goliath; individual well risk is managed by building a diversified portfolio of leases and wells; meanwhile oil price risk is managed by focusing on areas that require relatively low oil prices to breakeven and ensuring our cost base, capital commitments and financing costs remain low, manageable and flexible.

Our asset acquisition strategies target only producing assets and applying proven horizontal technologies to conventional reserves from a firm productive foundation. This initiative is being driven through our Houston technical office with a number of asset opportunities having been investigated, and now with the new era post Covid-19 upon us, we expect further new opportunities.

Pennpetro's Board currently comprises two Directors, who collectively have extensive international experience and a proven track record in investment, corporate finance and business acquisition, operation and development and are well placed to implement the Company's business objectives and strategy highly active plays. The appointment of Andy Clifford in April, a highly seasoned and experienced oil professional as the President of the Company's operational subsidiary Nobel Petroleum USA, Inc., emphasises the Company's dedication to its forward development profile. Andy's appointment coincided with the resignation of Keith Edelman, who remains as a valued consultant to the Company. Philip Nash also departed the board in June due to a full-time involvement and increased obligations to a corporate sports enterprise.

We believe the Company's Board and US management team is strong in terms of having the right mix of industry expertise covering all key areas of the business, including lease acquisition, geology, engineering, and finance.

As has been reported, the Company in April converted a £2,059,202 loan obligation with the issuance of 4,118,404 new shares at £0.50/share. During May 2021 the Company also concluded a three-year £20 Million shares subscription facility with the GEM Group, New York (a US\$3.4 billion alternative investment group), through their affiliates. The Company also agreed to issue 12,000,000 warrants exercisable at 40 pence each as part of this transaction.

Outlook

In line with our strategy, all our operations are in highly active plays where the economics of drilling and producing remain attractive at sub-US\$30 oil prices. This highlights the success we have had in taking advantage of the prior industry downturn to accelerate the positioning of our South Texas leasehold position in favour of the Austin Chalk and Eagleford Shale. With a strategic foothold in these prolific, low cost plays established and a proven management team in place, we will look to further expand our position in this US onshore sweet spot, as and when management considers it most advantageous to do so.

For 2020, our main objectives were to build upon the initiative that commenced with the completion of our initial well, COG#1-H, and to further acquire additional land leases and to progress the permitting and horizontal development of our second objective well. As explained, during the pandemic we reassessed our strategic drivers with the notion of how we were going to deliver our second and third horizontal wells with a greater technical focus. I look forward to providing updates on our progress in the year ahead.

Finally, I would like to thank the Board, management team and all our advisers for their hard work over the last twelve months and also to our shareholders for their continued support.

Thomas Evans
Executive Director
30 June 2021

PENNPETRO ENERGY PLC

OPERATIONS REPORT

Annual Report & Financial Statements
For the year ended 31 December 2020

Summary

Nobel Petroleum USA, Inc., has operational teams on the ground working from its offices in the City of Gonzales. During the period, one new horizontal well in which the Group has an interest commenced completion activity. The Group was planning to initiate an encompassing 3D seismic survey in 2020 with Dawson Geophysical Company to complement its comprehensive well logs geological analysis, together with an enhanced programme of additional new petroleum leasing contiguous to the area, with proposed planning to provide a further number of permitted drilling locations by year end. However, the onset of COVID-19 curtailed these plans. Planning is now initiated for the drilling of the Company's second horizontal well, COG#2-H, for reasons as explained in detail herein, with the side-track/re-entry to the oil-bearing Lower Austin Chalk formation in the Company's initial production well, COG #1-H, reserved for that operation post completion of COG#2-H.

In addition, the Company's recently formed corporate entity, Pennpetro USA Corp, Inc., through its highly regarded Houston based technical teams, has begun to examine a number of asset opportunities encompassing producing hydrocarbons with offsetting strategic leasehold interests capable of both additional infill and expansionary drilling locations, which has been amplified by the new era deigned by the global Covid-19 virus pandemic.

SOUTH TEXAS

The Company, through its indirect wholly owned subsidiary, Nobel Petroleum USA, Inc., holds interests in acreage within active oil and gas plays within the County of Gonzales, State of Texas: The Austin Chalk, and Eagleford Shale horizontal development and vertical development of the Buda formation. Nobel Petroleum USA, Inc. has observed an increase in the value of its interests within its project acreage, due in part to uplifting its active equity interests and increased consolidation of its acreage positions.

Austin Chalk

The play covers an extensive area with over a million acres yet to be developed and runs all the way from the Pearsale Field south of Gonzales to the giant Giddings Oil Field, the largest oilfield found in Texas in the past 50 years to the north of Gonzales, and further north onto the North Rayou Jack Field. Recently, this play has extended into western Louisiana with a number of major players including EOR Resources and Marathon acquiring strong acreage positions. The Austin Chalk overlays the oil rich Eagleford Shale, with both formations capable of interacting with each other, and is a low permeability fractured reservoir that has been the target for horizontal drilling since the mid-1980s and consists of interbedded chinks, volcanic ash, and marls. It is located at drill depths from 7,000 to 8,000 feet. It can be a liquids-rich play, yielding high volumes of oil and condensate. Initial production rates can range over 1,000 bopd with ultimate reserves exceeding 500 MBO per well.

Eagleford Shale

The Eagle Ford continues to prove itself as a world-class crude oil formation having produced in excess of 2.9 billion barrels of crude oil and condensate. This play is classified as a petroleum system in that it is a self-sourced reservoir with seals. Migration of Eagleford hydrocarbons was primarily along bedding planes during the expulsion phase. Absent of traps, hydrocarbons migrated up-dip or north where vertical natural fractures were encountered. These natural fractures were associated with the regional fault trends. Here, the hydrocarbons migrated into the extensively fractured Austin Chalk. Initial production rates with laterals can exceed 1,000 bopd.

PENNPETRO ENERGY PLC
OPERATIONS REPORT (continued)

Annual Report & Financial Statements
For the year ended 31 December 2020

Buda Formation

The Buda is a biomicritic limestone lying below the Eagleford Shale and above the Del Rio Shale. There has been an increase in the focus on, and the development of, the Buda formation by a number of US operators in South Texas, with a number of horizontal wells having been completed. It is a development we are following closely.

As previously identified, while the Buda has always been acknowledged as a resource play in South Texas, it sits at the bottom of our drilling prognosis, as it can be drilled as a separate vertical completion and added to our overall horizontal programme. Furthermore, its unit spacing can be brought significantly down to 40 acres, thereby fulfilling a separate in-fill operation alongside our horizontal drilling focus.

Thomas Evans
Executive Director
30 June 2021

PENNPETRO ENERGY PLC
FINANCIAL REPORT

Annual Report & Financial Statements
For the year ended 31 December 2020

The financial results for the group for the year ended 31 December 2020 are presented below:

The financial results for the year ended 31 December 2020 show a loss after tax of \$1,046,512 (2019: loss \$1,668,410).

The majority of the cost contributing to the Group's loss for the year included legal and professional fees, directors' emoluments and interest charges, which were in line with the Board's expectations.

The Group's borrowings at 31 December 2020 were \$3,727,995 (2019: \$6,078,992). The 2019 balance outstanding included a loan of \$2,417,946 which was converted into shares at a price of £0.50 per share in January 2020. In addition, post year-end the repayment date for the loan facility with Petroquest Energy Limited was extended a further year to 31 December 2022.

The Group had cash balances at 31 December 2020 of \$1,329 (2019: \$8,384) and short-term investments of \$49,152 (2019: \$60,001). The year on year decrease in cash and short-term investments was primarily a result of cash used in operating activities and development expenditure.

As at 31 December 2020, the Group had \$1.1m (2019 \$1.1m) still available to draw under its loan facility of \$5m with Petroquest Energy Limited.

On 30 April 2020, the Company issued 4,118,404 ordinary shares at a price of £0.5 per share, raising gross proceeds of £2,059,202. The shares were issued as part of the settlement of a loan entered into by Nobel Petroleum LLC.

In addition, the Group had a receivables balance at 31 December 2020 of \$308,943 (2019: \$356,928).

Additions of \$23,151 were capitalised in property, plant and equipment during 2020 on the Petroleum mineral leases. As at 31 December 2020, total property, plant and equipment held by the Group was \$1,384,314 (2019: \$1,362,734).

Following additions of \$67,153, cumulative drilling-related expenditure which has been capitalised in intangible assets was \$4,233,890 at 31 December 2019 (2019: \$4,166,737).

Thomas Evans
Executive Director
30 June 2021

PENNPETRO ENERGY PLC

STRATEGIC REPORT

Annual Report & Financial Statements
For the year ended 31 December 2020

The Directors present their strategic report on the group for the year ended 31 December 2020.

Principal Activities

The principal activity of the Group is onshore oil and gas exploration and production in the United States of America. Pennpetro Energy Plc acts as a holding company and provides direction and other services to its subsidiary.

Pennpetro USA Corp., holds 100% of the US operational subsidiary Nobel Petroleum USA, Inc. ("Nobel USA"), an independent oil and gas production company based in the City of Gonzales, Gonzales County, Texas, USA. Nobel USA took over the activities of Nobel Petroleum LLC, the Company's other subsidiary entity in December 2017 pursuant to a seamless internal reorganisation of operational activities and taxation advice. Nobel USA's core area of business is in the Austin Chalk and Eagleford Shale oil and gas horizontal formations together with the lower oil and gas reservoir, the Buda Formation in South Texas, United States.

The review of business and future developments is included in the Executive Directors' Statement and the Operations Report. A review of the financial performance and position is included in the Financial Report.

A summary of the operations conducted by the Group is detailed in both the Executive Directors' Statement and the Operations Report.

Strategic Approach

The Board's strategic intent is to maximise shareholder value through the continuing investment into new wells and leases in proven US onshore formations and participating alongside established operators in multiple wells, while further reducing costs, where applicable.

The Company provides shareholders with exposure to the high growth associated with the producing oil and gas sector. This is achieved with a low overhead base.

Key Performance Indicators

The Board monitors the overall performance of the Group by reference to certain key milestones.

The Group considers its financial KPI's to include:

Key performance indicators	2020	2019
	\$	\$
Net cash flows from operating activities	72,400	(758,974)
Cash and short-term investments	50,481	68,385
Headroom on loan facilities	1.1mil	1.1mil

Due to the Covid-19 pandemic, we closed our operations in Gonzales in March 2020. As at the date of these financial statements, the lockdown regime has relaxed in Texas and our expectations for the remainder of 2021 are that we recommence operations, focussing on the well COG#2-H.

Participation in well drilling programmes are monitored on an individual project basis in terms of revenue and cost per barrel of oil or Mcf (one thousand cubic feet) of gas, together with the anticipated payback period on each project.

Board diversity

Although the Board consisted of four male Directors, the Board supports diversity in the boardroom. Aside from the Directors, there are no employees in the Company. The Board will pursue an equal opportunity policy and seek to employ those persons most suitable to delivering value for the Company.

Social, community and human rights issues

This report does not contain information on such matters.

Corporate responsibility

The Group operates a management system that embodies Environmental, Health, Safety and Social Responsibility principles.

A number of objectives have been set by the Board to address these principles and the Executive director is responsible for demonstrating to the Board that these principles are adhered to in its US Oil and Gas operation.

The policy of the Board of Pennpetro is to be fully accountable for the necessary practices, procedures and means being in place so as to ensure that each objective is demonstrated and that continuous improvement practices are operating to ensure that the required practices, procedures and means are being monitored, refined and optimised as necessary.

The objectives of the Environment, Health, Safety and Social Responsibility Policy include:

- The Group shall manage all operations in a manner that protects the environment and the health and safety of employees, third parties and the community.
- Risk identification, assessment and prioritisation can reduce risk and mitigate hazards to employees, third parties, the community and the environment. Management of risk is a continuous process.
- The use of internationally recognised standards, procedures and specifications for design, construction and commissioning activities are essential for achieving operational excellence.
- The minimisation of environmental risks and liabilities are integral parts of the Group's operations.
- Third parties who provide materials and services or operate facilities on the Group's behalf have an impact on Environmental, Health and Safety and Social Responsibility excellence. It is essential that third-party services are provided in a manner consistent with the Group's Policy.
- Preparedness and planning for emergencies are essential to ensuring that all necessary actions are taken if an incident occurs, to protect employees, third parties, the public, the environment, the assets and brand of Pennpetro.
- Open and honest communication with the communities, authorities and stakeholders with which the Group operates builds confidence and trust in the integrity of Pennpetro.

Corporate responsibility (continued)

- The Group has determined that the greenhouse gas emissions from the operations of the Company and its subsidiaries are sufficiently low that it does not have responsibility to produce the disclosures required under the Companies Act 2006 (Strategic Report and Directors' Reports) Regulations 2013. The reason for this is that there was only limited activity from its US based operating subsidiary during 2020 and notably the Covid-19 pandemic caused the operations in Gonzales to be put on hold from March 2020 onwards. The Directors aim is to recommence operations in the latter half of 2021.

During 2020, the Group closely monitored the limited drilling, completion and production operations of its COG#1-H well and there have been no breaches of any applicable Acts recorded against the Group during the reporting period.

Section 172 statement

Section 172 of the Companies Act 2006 requires Directors to take into consideration the interests of stakeholders and other matters in their decision making. The Directors continue to have regard to the interests of the Company's employees and other stakeholders, the impact of its activities on the community, the environment and the Company's reputation for good business conduct, when making decisions. In this context, acting in good faith and fairly, the Directors consider what is most likely to promote the success of the Company for its members in the long term. We explain in this annual report, and referenced herein, how the Board engages with stakeholders.

Promotion of the Company for the benefit of the members as a whole

The Director's believe they have acted in the way most likely to promote the success of the Company for the benefit of its members as a whole, as required by s172 of the Companies Act 2006.

The requirements of s172 are for the Directors to:

- Consider the likely consequences of any decision in the long term,
- Act fairly between the members of the Company,
- Maintain a reputation for high standards of business conduct,
- Consider the interests of the Company's employees,
- Foster the Company's relationships with suppliers, customers and others, and
- Consider the impact of the Company's operations on the community and the environment.

The Company is quoted on the London Stock Exchange and its members will be fully aware, through detailed announcements, shareholder meetings and financial communications, of the Board's broad and specific intentions and the rationale for its decisions.

When selecting investments, issues such as the impact on the community and the environment have actively been taken into consideration.

The Company pays its employees and creditors promptly and keeps its costs to a minimum to protect shareholders funds.

Promotion of the Company for the benefit of the members as a whole (continued)

The application of the s172 requirements can be demonstrated in relation to some of the key decisions made during 2020:

The Board took the opportunity during 2019 to increase the Group's interest in its principal asset in Gonzales Texas, taking its Working interest in a portfolio of mineral leases to 100%. The most recent CPR prepared in December 2017, estimated that the Group's then 50% Working Interest basis undiscounted Net Revenue Interest in the Gonzales petroleum leases amounted to \$62 million; with the increase to a 100% Working interest and further undiscounted Net Revenue Interest, this has now increased to over \$120 million.

The Company recognising the global impact of environmental concerns, instigated due diligence with regard to expanding its experiences and core competencies within the fossil environment and petroleum drilling to specific green energy initiatives securitised with US intellectual property filings to be expanded internationally.

Risks and Uncertainties

The Group's activities expose it to a variety of risks and uncertainties.

Market risk

The Group operates in an international market for hydrocarbons and is exposed to risk arising from variations in the demand for and price of the hydrocarbons. Oil and gas prices historically have fluctuated widely and are affected by numerous factors over which the Group does not have any control, including world production levels, international economic trends, currency exchange fluctuations, inflation, speculative activity, consumption patterns and global or regional political events. The Group will consider hedging against the risks of fluctuating oil prices and currency exchange once the initial well is in commercial production.

Non-operator risk

On non-operated interests, the Group, in most instances, will depend on operators to initiate and supervise the drilling and operation of such wells. As such the Group cannot always accurately predict the timing of the cash flows associated with the drilling of these wells. If the Group is unable or unwilling to comply with its payment obligations, it would seek to negotiate a farm-out with some sort of back-in upon pay-out or sell down a portion of its leasehold interests and participate with a smaller interest. This could reduce the Group's future revenues and earnings. The Group holds a 100% Working Interest in the Gonzales asset and makes financial, operational and strategic decisions about the development and management of this asset, with input from its advisers.

Environmental risk

The Group's operations are subject to environmental regulation in all the jurisdictions in which it operates. The Group is unable to predict the effect of additional environmental laws and regulations which may be adopted in the future, including whether any such laws or regulations would adversely affect the Group's operations. There can be no assurance that such new environmental legislation once implemented will not oblige the Group to incur significant expenses and undertake significant investments. The Group identifies, assesses and prioritises environmental risks on an ongoing basis, as part of its management system.

Risks and Uncertainties (continued)

Oil and gas exploration and production risks

Whilst Nobel Petroleum USA, Inc., a Group subsidiary, took over the operatorship during 2019 with the formal approval of the regulator, the Texas Railroad Commission, and is the Working Interest owner, the previous operator is still engaged under sub-contracting terms. This allows the Group to fully integrate its operational teams in Houston.

Although it does not engage in exploration activities, per se, it might engage in some limited exploration activity if it was in an area offsetting producing assets and the Company decided such activity was worthwhile on a minimised risk basis to enhance its lease profile. There are significant risks and hazards inherent in the exploration and production of oil and gas, including environmental hazards, industrial incidents, labour disputes, fire, drought, flooding and other acts of God. The occurrence of any of these hazards can delay or interrupt production and increase production costs. The Group operates a management system that embodies Environmental, Health, Safety and Social Responsibility principles in order to mitigate these hazards.

There is no guarantee that oil and/or gas will be discovered in any of the Group's existing or future licences/permitted acreage or that commercial quantities of oil and/or gas can be recovered.

Licences and title

The leases in which the Group has or is seeking to have an interest will be subject to termination after the primary term of such leases unless there is current production of oil and/or gas in commercial quantities. If a lease is not extended after the primary term, the Group may lose the opportunity to develop and discover any hydrocarbon resources on that lease area. The Group retains the services of a team of experienced land managers who monitor and report on the Group's portfolio of leases to the Executive director on an ongoing basis. In taking an assignment of an oil and/or gas lease, the Group would, in accordance with industry practice, rely on the warranty provisions.

Covid-19 Pandemic

The impact of Covid-19 resulted in the temporary closure of our operation in Gonzales in March 2020. Whilst our intention is to recommence operations in the second half of 2021, we cannot be certain whether further lockdowns will be imposed as a result of another outbreak of Covid-19, which could result in operations being suspended in Gonzales again.

This report was approved by the Board on 30 June 2021 and signed on its behalf:

Olof Nils Anders Rapp

PENNPETRO ENERGY PLC

DIRECTORS' REPORT

Annual Report & Financial Statements
For the year ended 31 December 2020

The Directors present their Annual Report and the audited Financial Statements for the year ended 31 December 2020.

The Company's ordinary shares are listed on the London Stock Exchange, on the Official List pursuant to Chapter 14 of the Listing Rules, which sets out the requirements for Standard Listings.

Organisation Review

The Board is responsible for providing strategic direction for the Group. This incorporates setting out objectives, management policies and performance criteria. The Board assesses its performance against these on a monthly basis.

Composition of the Board at 31 December 2020 was one Executive Director and three Non-Executive Directors. On 15 April 2021, Keith Edelman, a Non-Executive Director, resigned. The Board currently comprises of one Executive Director and two Non-Executive Directors. The Board believes that the present composition provides an appropriate mix to conduct the Group's affairs.

The Board is responsible for monitoring risks and uncertainties faced by the Group. These risks and uncertainties are detailed in the Strategic Report and note 3 to the financial statements.

Directors and Directors' interests

The Directors who held office during the year to the date of approval of these financial statements, together with their beneficial interests in the ordinary shares of the Company, are shown below.

	31 December 2020		31 December 2019	
	Ordinary shares (number)	Share options (number)	Ordinary shares (number)	Share options (number)
Keith Edelman	1,000,000	425,000	1,000,000	425,000
Olof Rapp	2,000,000	425,000	2,000,000	425,000
Philip Nash	-	425,000	-	425,000
Thomas Evans ⁽¹⁾	5,000,000	425,000	5,000,000	425,000

⁽¹⁾ Thomas Martin Evans shares are held by FHF Securities (A'Asia) Limited.

The Directors who held office at 31 December 2020 are summarised as follows:

Name of Director	Position
Keith Edelman	Chairman, Non-Executive Director (resigned 15 April 2021)
Thomas Evans	Executive Director
Philip Nash	Finance Director and Non-Executive Director (resigned 8 June 2021)
Olof Rapp	Senior Non-Executive Director

Directors' Remuneration

The Remuneration Committee assesses the appropriateness of the nature and amount of emoluments of the Directors on a periodic basis by reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from the retention of a high-quality Board and senior executive team.

The Directors' remuneration and policies for appointment or replacement of directors are disclosed in the Directors' Remuneration Report.

Dividends

The Directors do not recommend the payment of a dividend (2019: \$Nil).

Share capital and major shareholdings

The issued share capital of the Company as at 31 December 2020 comprised 76,452,106 1p ordinary shares (2019: 72,333,702).

The Company has only one class of share capital formed of ordinary shares. All shares forming part of the ordinary share capital have the same rights and each carry one vote.

As at 24 June 2020 the Company had been notified of the following interests in the Company's ordinary share capital:

	Number of shares	Percentage (%)
York Energy Group Limited	19,000,000	24.85
International Immobiliare Ltd	16,300,000	21.32
FHF Securities (A'Asia) Limited	5,000,000	6.54
RB Nominees Limited	4,118,404	5.39
Nobel Petroleum Ireland Limited	3,400,000	4.45
Griffin Asset Management Limited	3,255,500	4.26
Invictorium Limited	3,200,000	4.19
Mrs. B. Shaw	3,200,000	4.19
FHF Corporate Finance Limited	3,184,560	4.17
Mrs. P. Evans	3,100,000	4.05
Peter Blomqvist	2,400,000	3.14

To the best of the Directors' knowledge, no shareholder directly or indirectly, exercises or could exercise control over the Company.

Going Concern

The Group's business activities, together with the factors likely to affect its future development and performance are set out in the Executive Director's Statement. In addition, notes 3 and 24 to the financial statements disclose the Group's and Company's objectives, policies and processes for managing financial risks and capital.

As a result of the Covid-19 pandemic, the Group temporarily closed down its operations in Gonzales and significantly reduced its operating costs. The ongoing COVID-19 pandemic means there is still some uncertainty around the potential timing of when the Company and Group will be able to recommence operations.

On 2 June 2021, the Company announced the execution of a three-year £20,000,000 Share Subscription Facility Agreement ("Facility") with GEM Global Yield LLC SCS, Luxembourg, and GEM Yield Bahamas Limited (GEM Global). This new source of funds will enable the group to re-establish its operations in Texas and fund the Group's ongoing cashflow needs.

The Group has prepared cashflow forecasts for 12 months from the date of signing the financial statements. The Directors have considered these forecasts and have a reasonable expectation that the Company and Group has adequate resources to continue in operational existence through to 30 June 2022 as projected.

This is subject to material adverse unforeseen events that may occur, including but not limited to oil and gas prices and further hinderances to operations as a result of the Covid-19 pandemic.

The Directors continue to consider it appropriate to prepare the Group and Company financial statements on a going concern basis.

Events after the Reporting Period

On 15 April 2021, Keith Edelman stepped down from the board of directors of Pennpetro Energy plc and Andy Clifford was appointed as the President of the wholly owned subsidiary company Nobel Petroleum USA.

On 2 June 2021, the Company announced the execution of a three-year £20,000,000 Share Subscription Facility Agreement ("Facility") with GEM Global Yield LLC SCS, Luxembourg, and GEM Yield Bahamas Limited (GEM Global). The facility is available to use at the Company's discretion, subject to terms, for both general corporate purposes and the advancement of its petroleum development projects.

On 8 June 2021, Philip Nash stepped down from the board of directors of Pennpetro Energy plc.

Provision of Information to Auditor

So far as each of the Directors is aware at the time this report is approved:

- there is no relevant audit information of which the Company's auditor is unaware; and
- the Directors have taken all steps that they ought to have taken to make themselves aware of any relevant audit information and to establish that the auditor is aware of that information.

Independent Auditor

The auditor, Crowe U.K. LLP will be proposed for reappointment in accordance with section 485 of the Companies Act 2006. Crowe U.K. LLP has signified its willingness to continue in office as auditor.

This report was approved by the board on 30 June 2021 and signed on its behalf:

Olof Nils Anders Rapp
Non-Executive Director, Chairman

PENNPETRO ENERGY PLC DIRECTORS' INFORMATION

Annual Report & Financial Statements
For the year ended 31 December 2020

Keith Graeme Edelman, *Non-Executive Chairman* (resigned on 15 April 2021)

Keith Edelman graduated from UMIST (University of Manchester Institute Science and Technology) in 1971 with a BSc (Hons) in Management Sciences. He worked for Rank Xerox, IBM and Fiat before joining Bank of America in 1978. Starting as Planning Manager, EMEA Division and then Finance Director, UK and Nordic Region, he eventually became Managing Director of Bank of America Finance.

In 1983 he joined Grand Metropolitan as a UK Strategic Director/Director of Finance, Foods Division. In 1985 he joined the Ladbroke Group as Corporate Planning Director and completed a number of major acquisitions and disposals for that group these included the acquisitions of Hilton International, Texas Homecare Plc, Thomson T Line Plc and Gable House Properties Plc and disposals of many leisure businesses including Ladbroke Holidays, Seenews, the 20% stake in Central TV, Laskys to name but a few. Following the acquisition of Hilton International he became Chairman of Texas Homecare, a chain of DIY stores. In 1991 he left to become Managing Director of Carlton Communications and in 1993 Group Chief Executive of Storehouse plc, which included Mothercare and BHS.

He also held a number of executive and non-executive appointments, including Eurotunnel (Audit & Remuneration Committees 1994–2004), Haberdashers' Aske's School (Governor 1994–2005), where he was a pupil from prep school through A Levels, Include (Director (Charity) 1997 – 2001), Glenmorangie (Chairman 2002–2005), Qualceram Shires plc (Director 2005 to 2009) and Arnotts Holdings (2009-2010). Currently he is Chairman of Revolution Bars Group Plc, Chairman of Bullion by Post Limited, a Director of the London Legacy Development Corporation and E20 LLP, Non-Executive Director of Altitude Group PLC and senior Independent Director of Headlam Group plc.

In 2000 he joined Arsenal Football Club as Managing Director, bringing his financial and business experience to the Club. Mr. Edelman was responsible for all commercial and administrative activities at the club. In a period of increased commercialisation of football, he completed the first strategic partnership the Club entered into since its formation, selling a 10 percent stake to Granada Media for £77 million. He oversaw the club's re-branding and crest redesign to create copyright protection and was subsequently involved in a sponsorship deal with Nike, valued at £130 million over 10 years.

He was instrumental in the club's development of its new stadium and he arranged all the funding raising over £380 million of banking facilities. He refinanced these projects finance borrowings with a credit wrapped AAA rated bond and in so doing established Arsenal as the very first club to achieve an investment grade rating from the world's rating agencies. He also completed one of the largest football sponsorship deals with Emirates Airlines for over £100 million, including naming rights to the Emirates Stadium. He opened the stadium in August 2006 both on time and on budget and set up all the operational aspects of the stadium that has made Emirates so successful. He oversaw the development of Highbury Square and pre-sold over 90% of all units and brought the project in on time and on budget. In 2007 Keith became club President of the Arsenal Ladies team. He has always been pragmatic about the club's future and did not rule out the club eventually going public or the major shareholders eventually deciding to sell their stakes. He resigned as a Director at Arsenal Holdings plc on 1 May 2008 and continued until May 2009 as a consultant.

PENNPETRO ENERGY PLC
DIRECTORS' INFORMATION (continued)

Annual Report & Financial Statements
For the year ended 31 December 2020

In 2001 he joined Arsenal Football Club as Stadium Project Director, reporting to the CEO. He was involved in all aspects of the successful Emirates Stadium Project including raising finance, financial control, project management and commercial activities. In 2008 Philip joined Liverpool Football Club as CFO and played a significant role in the transformation of the club. He was involved in the sale of the club to Fenway Sports Group in 2010. He strengthened the club's finance and technology functions, improved governance and lead on a variety of major projects including the appraisal of the Anfield Stadium redevelopment. Philip currently works as an independent business consultant, working across a variety of SME's. Philip holds a Psychology degree from the University of Reading and is a member of the ICAEW.

PENNPETRO ENERGY PLC
STATEMENT OF DIRECTORS' RESPONSIBILITIES

Annual Report & Financial Statements
For the year ended 31 December 2020

The Directors are responsible for preparing the Annual Report and the Financial Statements in accordance with applicable law and regulations. Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have elected to prepare the Group and Parent Company Financial Statements in accordance with International Financial Reporting Standards (IFRSs) adopted pursuant to Regulation (EC) No. 1606/2002 as it applies in the European Union.

Under company law the Directors must not approve the Financial Statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and Group as at the end of the financial year and of the profit or loss of the Group for that period. In preparing these Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and accounting estimates that are reasonable and prudent;
- state whether the applicable IFRS's adopted pursuant to Regulation (EC) No. 1606/2002 as it applies in the European Union have been followed; subject to any material departures disclosed and explained in the Financial Statements; and
- prepare the Financial Statements on a going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and the Group and enable them to ensure that the Financial Statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and Group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The maintenance and integrity of the website is the responsibility of the Directors. Legislation in the United Kingdom governing the preparation and dissemination of the Financial Statements and other information included in annual reports may differ from legislation in other jurisdictions.

The Company is compliant with the London Stock Exchange regarding the Company's website.

The Company recognises the importance of, and is committed to, high standards of corporate governance.

Corporate Governance Practices

Pennpetro Energy plc has a standard listing on the London Stock Exchange and is thus not required to comply with the requirements of the U.K. Corporate Governance Code (“the Code”) as issued by the Financial Reporting Council. The disclosures below are required by the UKLA’s Disclosure and Transparency Rule 7.

The Board is committed to ensuring the highest standards of corporate governance, and voluntarily complies with, subject to a small number of exceptions listed below, the supporting principles and provisions set out in the Code.

The following describes the ways in which the Company does not comply with the detailed provisions of the Code and the Board’s rationale thereon:

- given the size of the Board and the Company’s current limited operational status, certain provisions of the Corporate Governance Code (in particular the provisions relating to the composition of the Board and the division of responsibilities between the Chairman and chief executive and executive compensation), are not being complied with by the Company as the Board does not consider these provisions to be appropriate for the Company;
- the Board as a whole will review audit, remuneration and risk matters, on the basis of adopted terms of reference governing the matters to be reviewed and the frequency with which such matters are considered. The Board as a whole will also take responsibility for the appointment of auditors and payment of their audit fee, monitor and review the integrity of the Company’s financial statements and take responsibility for any formal announcements on the Company’s financial performance;
- the Board as a whole will be responsible for the appointment of executive and non-executive Directors. The Company does not currently believe it is necessary to have a separate nominations committee at this time. The requirement for a nominations committee will be considered on an ongoing basis;
- the Board believes in the benefits of diversity, including the need for diversity in order to effectively represent shareholders’ interests. This diversity is not restricted to gender but also includes geographic location, nationality, skills, age, educational and professional background. The board’s policy remains that selection should be based on the best person for the role;
- the Board as a whole will consider the Board’s size, structure and composition and the scale and structure of the Directors’ fees, taking into account the interests of Shareholders and the performance of the Company;
- the Board does not comply with the provision of the Corporate Governance Code that at least half of the Board, excluding the Chairman, should comprise non-executive directors determined by the Board to be sufficiently independent;
- the Company has in place procedures ensuring compliance with the new Market Abuse Regulation and the Board will be responsible for taking all proper and reasonable steps to ensure compliance with the Market Abuse Regulation by the Directors; and
- the Company will not seek Shareholder approval at a general meeting in respect of any further acquisitions it may make, unless it is required to do so for the purposes of facilitating the financing arrangements or for other legal or regulatory reasons.

PENNPETRO ENERGY PLC
CORPORATE GOVERNANCE REPORT (continued)

Annual Report & Financial Statements
For the year ended 31 December 2020

The Board of Directors

As at 31 December 2020, the Board of Directors comprised four members: one Executive Director and three Non-Executive Directors. The Executive Director has a wealth of experience analytically covering the oil and gas industry. Similarly, the Non-Executive Directors together have extensive corporate and financial experience.

The Company has a policy of appraising Board performance annually and had adopted an internal policy of regular face to face meetings in which all Board members discuss any issues as and when they arise in relation to the Board or any individual member's performance.

Board Meetings

The Board ordinarily meets on a bi-monthly basis and as and when further required, providing effective leadership and overall management of the Group's affairs by reference to those matters reserved for its decision. This includes the approval of the budget and business plan, major capital expenditure, acquisitions and disposals, risk management policies and the approval of the financial statements. Formal agendas, papers and reports are sent to the Directors, in a timely manner, prior to the Board meetings.

	Number held and entitled to attend	Number attended
Keith Edelman	6	6
Thomas Evans	6	6
Olof Rapp	6	6
Philip Nash	6	6

Internal Controls

The Board recognises the importance of both financial and non-financial controls and has reviewed the Group's control environment and any related shortfalls during the year. Since the Group was established, the Directors are satisfied that, given the current size and activities of the Group, adequate internal controls have been implemented. Whilst they are aware that no system can provide absolute assurance against material misstatement or loss, in light of the current activity and proposed future developments of the Group, continuing reviews of internal controls will be undertaken to ensure that they are adequate and effective.

Relations with Shareholders

The Board is committed to providing effective communication with the shareholders of the Company. Significant developments are disseminated through stock exchange announcements and regular updates on the Company website. The Board views the Annual General Meeting as a forum for communication between the Group and its shareholders and encourages their participation in its agenda.

Olof Nils Anders Rapp

Non-Executive Director, Chairman
30 June 2021

PENNPETRO ENERGY PLC
DIRECTORS' REMUNERATION REPORT

Annual Report & Financial Statements
 For the year ended 31 December 2020

The Company's Remuneration Committee comprises two Non-Executive Directors: Keith Edelman (Chairman) and Olof Rapp.

Pennpetro's Remuneration Committee operates within the terms of reference approved by the Board. In the year to 31 December 2020, the two members of the Remuneration Committee have met once.

The items included in this report are unaudited unless otherwise stated.

Committee's main responsibilities

- The Remuneration Committee considers the remuneration policy, employment terms and remuneration of the Executive Director;
- The Remuneration Committee's role is advisory in nature and it makes recommendations to the Board on the overall remuneration package for the Executive Director in order to attract, retain and motivate high quality executives capable of achieving the Company's objectives;
- The Remuneration Committee also reviews proposals for any share option plans and other incentive plans, makes recommendations for the grant of awards under such plans as well as approving the terms of any performance-related pay schemes;
- The Board's policy is to remunerate the Company's executives fairly and in such a manner as to facilitate the recruitment, retention and motivation of suitably qualified personnel; and
- The Remuneration Committee, when considering the remuneration packages of the Company's executives, will review the policies of comparable companies in the industry.

Directors' remuneration (audited)

Fees and benefits of £530,672 were payable to Directors who held office during the year ended 31 December 2020 (2019: \$521,478).

Director Thomas Evans has received a loan of £10,000 which was outstanding as at 31 December 2020. The loan is repayable within 12 months.

	Salary \$	Valuation of options \$	Taxable benefits \$	Other receipts received \$	Pension benefits \$	2019 Total \$
Keith Edelman	47,026	90,682	-	-	-	137,708
Olof Rapp	40,306	90,682	-	-	-	130,988

PENNPETRO ENERGY PLC
DIRECTORS' REMUNERATION REPORT

Annual Report & Financial Statements
For the year ended 31 December 2020

The Director's remuneration is disclosed in full in the above table and is not linked to performance. Keith Edelman receives £5,000 for his services as Executive Chairman.

All Directors' service contracts are kept available for inspection at the Company's registered office.

All shares and interests held by the Directors are disclosed in the Directors' report.

None of the share options vested in the year.

Details of the share-based payments are included in note 19.

Total pension entitlements (audited)

The Company currently does not have any pension plans for any of the Directors and does not pay pension amounts in relation to their remuneration.

The Company has not paid out any excess retirement benefits to any Directors or past Directors.

Payments to past directors (audited)

The Company has not paid any compensation to past Directors.

Payments for loss of office (audited)

No payments were made for loss of office during the year.

Directors interests in share warrants (audited)

None of the Directors had interests in share warrants.

Directors' and Officers' indemnity insurance

The Company has made qualifying third-party indemnity provisions for the benefit of its Directors and Officers. These were made during the previous period and remain in force at the date of this report.

Consideration of shareholder views

The Remuneration Committee considers shareholder feedback received and guidance from shareholder bodies. This feedback, plus any additional feedback received from time to time, is considered as part of the Company's periodic reviews of its policy on remuneration.

Statement of policy on Directors' remuneration

The Company's policy is to maintain levels of remuneration so as to attract, motivate, and retain Directors and Senior Executives of the highest calibre who can contribute their experience to deliver industry leading performance with the Company's operations. Currently Director's remuneration is not subject to specific performance targets.

In future periods, the Company may implement a remuneration policy so that a meaningful proportion of Executive remuneration is structured so as to link rewards to corporate and individual performance, align their interests with those of shareholders and to incentivise them to perform at the highest levels. The Remuneration Committee considers remuneration policy and the employment terms and remuneration of the Directors and makes recommendations to the Board of Directors on the overall remuneration packages for Directors. No Director takes part in any decision directly affecting their own remuneration.

PENNPETRO ENERGY PLC
DIRECTORS' REMUNERATION REPORT (continued)

Annual Report & Financial Statements
For the year ended 31 December 2020

Policy for new appointments

Base salary levels will take into account market data for the relevant role, internal relativities, the individual's experience and their current base salary. Where an individual is recruited at below market norms, they may be re-aligned over time (e.g. two to three years), subject to performance in the role. Benefits will generally be in accordance with the approved policy.

For external and internal appointments, the Committee may agree that the Company will meet certain relocation and/or incidental expenses as appropriate.

Policy on payment for loss of office

Payment for loss of office would be determined by the Remuneration Committee, taking into account contractual obligations.

Other matters

The Company does not currently have any annual or long-term incentive schemes in place for any of the Directors and as such there are no disclosures in this respect.

Olof Nils Anders Rapp

Non-Executive Director, Chairman
30 June 2021

The Audit Committee comprises two Non-Executive Directors, Olof Rapp and Philip Nash. It oversees the Company's financial reporting and internal controls and provides a formal reporting link with the external auditors. The ultimate responsibility for reviewing and approving the annual report and accounts and the half-yearly report remains with the Board.

Main Responsibilities

The Audit Committee acts as a preparatory body for discharging the Board's responsibilities in a wide range of financial matters by:

- monitoring the integrity of the financial statements and formal announcements relating to the Company's financial performance;
- reviewing significant financial reporting issues, accounting policies and disclosures in financial reports, which are considered to be in accordance with the key audit matters identified by the external auditors;
- overseeing that an effective system of internal control and risk management systems are maintained;
- ensuring that an effective whistle-blowing, anti-fraud and bribery procedures are in place;
- overseeing the Board's relationship with the external auditor and, where appropriate, the selection of new external auditors;
- approving non-audit services provided by accounting firms; and
- ensuring compliance with legal requirements, accounting standards and the Listing Rules and the Disclosure and Transparency Rules.

Governance

The Code requires that at least one member of the Audit Committee has recent and relevant financial experience. Philip Nash, who was appointed to the Audit Committee in 2017 has been a qualified Chartered Accountant with extensive experience of high-level finance roles. As a result, the Board is satisfied that the Audit Committee has recent and relevant financial experience.

Members of the Audit Committee are appointed by the Board and whilst shareholders, the Company believes they are considered to be independent in both character and judgement.

The Company's external auditor is Crowe U.K. LLP, and the Audit Committee will closely monitor the level of audit services they provide to the Company.

The Audit Committee believes that the Company does not require an internal audit function due to the current size of the organisation and its operations.

Meetings

In the year to 31 December 2020 the two members of the Audit Committee have met twice.

The key work undertaken by the Audit Committee is as follows;

- interview of external auditors and recommendation to the Board;
- review of audit planning and update on relevant accounting developments;
- consideration and approval of the risk management framework, appropriateness of key performance indicators;
- consideration and review of full-year results;
- review of the effectiveness of the Audit Committee; and
- review of internal controls.

The Code states that the Audit Committee should have primary responsibility for making a recommendation on the appointment, reappointment or removal of the external auditor.

External auditor

The Audit Committee appointed Crowe U.K. LLP as auditors to the Company, commencing with the first audit of the year ended 31 December 2018. The external auditor has unrestricted access to the Audit Committee Chairman. The Committee is satisfied that Crowe U.K. LLP has adequate policies and safeguards in place to ensure that auditor objectivity and independence are maintained. The external auditors report to the Audit Committee annually on their independence from the Company. In accordance with professional standards, the partner responsible for the audit is changed every five years. The current auditor, Crowe U.K. LLP were first appointed by the Company in 2019 following a tender process and therefore the current partner is due to rotate off the engagement after completing the December 2022 audit. Having assessed the performance objectivity and independence of the auditors, the Committee will be recommending the reappointment of Crowe U.K. LLP as auditors to the Company at the 2020 Annual General Meeting.

Olof Rapp

Non-Executive Director, Chairman
30 June 2021

Opinion

We have audited the financial statements of Pennpetro Energy Plc (the “company”) and its subsidiaries (the ‘group’) for the year ended 31 December 2020 which comprise the consolidated statements of comprehensive income, the consolidated and parent company statements of and notes to the financial statements, including significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and International Accounting Standards in conformity with the requirements of the Companies Act 2006 and International Financial Reporting Standards adopted pursuant to Regulation (EC) No 1606/2002 as it applies in the European Union.

In our opinion:

- the financial statements give a true and fair view of the state of the group’s and of the company’s affairs as at 31 December 2020 and of the Group’s loss for the year then ended;
- the financial statements have been properly prepared in accordance with International Accounting Standards in conformity with the requirements of the Companies Act 2006 and International Financial Reporting Standards adopted pursuant to Regulation (EC) No. 1606/2002 as it applies in the European Union;
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006; and, as regards the group financial statements, Article 4 of the IAS Regulation.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor’s responsibilities for the audit of the financial statements section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC’s Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors’ use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the directors’ assessment of the entity’s ability to continue to adopt the going concern basis of accounting included obtaining management’s assessment of going concern and the Share Subscription Facility Agreement entered into in June 2021 and as disclosed in note 2.2. We considered the availability of funds under this Facility and whether these, together with other available resources, were sufficient to meet committed and expected expenditure for at least 12 months. In performing our evaluation we considered sensitivities, including around potential revenue sources.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group’s or the company’s ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Overview of our audit approach

Materiality

In planning and performing our audit we applied the concept of materiality. An item is considered material if it could reasonably be expected to change the economic decisions of a user of the financial statements. We used the concept of materiality to both focus our testing and to evaluate the impact of misstatements identified.

Based on our professional judgement, we determined overall materiality for the financial statements as a whole to be \$120,000, based on 2% of total assets (2019: \$120,000).

Overview of our audit approach (continued)

We use a different level of materiality ('performance materiality') to determine the extent of our testing for the audit of the financial statements. Performance materiality is set based on the audit materiality as adjusted for the judgements made as to the entity risk and our evaluation of the specific risk of each audit area having regard to the internal control environment.

Where considered appropriate performance materiality may be reduced to a lower level, such as, for related party transactions and directors' remuneration.

We agreed with the Audit Committee to report to it all identified errors in excess of \$3,600 (2019: \$3,600). Errors below that threshold would also be reported to it if, in our opinion as auditor, disclosure was required on qualitative grounds.

Overview of the scope of our audit

The Company and Group finance function is based in the United Kingdom and a full scope audit was carried out thereon from our office, and with discussions with management as required and information being requested from the US where appropriate. This provided us with sufficient evidence for our opinion on the Group and Company financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the conclusion related to going concern section, we have determined the matters described below to be the key audit matters to be communicated in our audit report. This is not a complete list of all risks identified by our audit.

Key audit matter	How our scope addressed the key audit matter
<p><i>Valuation of producing properties and capitalised drilled costs and equipment</i></p> <p>The group's primary focus is onshore oil and gas exploration and production in Texas, USA. As at 31 December 2020 assets totalling \$5.6m were recognised comprising Petroleum Leases within property, plant and equipment of \$1.4m (held under IAS 36) and Drilling Costs within intangible assets of \$4.2m (held under IFRS 6).</p> <p>We considered the risk that these assets are impaired.</p>	<p>We reviewed management's assessment which concluded that there are no facts or circumstances that suggest the recoverable amount of the asset does not exceed the carrying amount.</p> <p>In considering this assessment we reviewed the following sources of evidence:</p> <ul style="list-style-type: none"> • The primary lease agreements in place supporting the company's right of extraction; • The competent persons report that formed the basis of the valuation; • Discussing plans and intentions with management and reviewing supporting budgets; and • Assessing oil price assumptions used when assessing the commercial potential and likely recoverable amount <p>We are satisfied that there are no indicators of impairment in respect of the drilling costs and that the estimated recoverable amount in respect of the petroleum leases is in excess of the carrying value.</p>

Key audit matter	How our scope addressed the key audit matter
<p><i>Carrying value of investments on the parent company balance sheet</i></p> <p>Included in the parent company balance sheet is investments in subsidiaries with a value of \$7.1m. As part of our audit we considered the risk that the investments were impaired.</p>	<p>We considered whether there was any evidence of impairment. This included considering:</p> <ul style="list-style-type: none"> • Whether the current market capitalisation was below the carrying value of the investments. <p>Management's plans for the subsidiaries and how they would generate cash in the future to provide a return on the investment, this included management's plans and intentions for the oil and gas assets held within the subsidiaries.</p>

Our audit procedures in relation to these matters were designed in the context of our audit opinion as a whole. They were not designed to enable us to express an opinion on these matters individually and we express no such opinion.

Other information

The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion the part of the directors' remuneration report to be audited has been properly prepared in accordance with the Companies Act 2006.

In our opinion based on the work undertaken in the course of our audit

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report and strategic report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the group and the company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the company, or returns adequate for our audit have not been received from branches not visited by us; or
- the company financial statements and the part of the directors' remuneration report to be audited are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of the directors for the financial statements

As explained more fully in the directors' responsibilities statement page 19, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was consider capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below however the primary responsibility for the prevention and detection of fraud lies with management and those charged with governance of the Company.

- We gained an understanding of the legal and regulatory framework applicable to the Group and considered the risk of acts by the Group which were contrary to applicable laws and regulations, including fraud. The most significant identified was compliance with relevant regulations for oil and gas companies in the state of Texas, where the Group has the majority of its operations. Our work included enquiry of management, review of legal invoices and publicly available information on violations and inspections from the relevant authority in Texas.
- We designed audit procedures to respond to the risk, recognising that the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment. We considered the risk was greater in areas that involve significant management estimate or judgement and we designed our procedures accordingly to focus on such areas.

Owing to the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with the ISAs (UK). The potential effects of inherent limitations are particularly significant in the case of misstatement resulting from fraud because fraud may involve sophisticated and carefully organised schemes designed to conceal it, including deliberate failure to record transactions, collusion or intentional misrepresentations being made to us.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Other matters which we are required to address

We were appointed by the Board on 25 March 2019. Our total uninterrupted period of engagement is three years, covering the periods ending 31 December 2018 to 2020.

The non-audit services prohibited by the FRC's Ethical Standard were not provided to the group or the company and we remain independent of the group's and the company in conducting our audit.

Our audit opinion is consistent with the additional report to the audit committee.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

1. GENERAL INFORMATION

Pennpetro Energy plc (the “Company”) is a public limited company which is listed on the standard market of the London Stock Exchange and incorporated and domiciled in England and Wales. Its registered office address is First Floor, 88 Whitfield Street, London, W1T 4EZ.

The consolidated financial statements of the Company consist of the following companies (together “the Group”):

Pennpetro Energy plc	UK registered company
Pennpetro USA Corp	US registered company
Nobel Petroleum USA Inc	US registered company
Nobel Petroleum LLC	US registered company
Nobel Petroleum UK Limited	UK registered company
Pennpetro Greentec Limited	Cyprus registered company
Pennpetro Greentec UK Limited	UK registered company
Pennpetro Green Energy Limited	UK registered company

The Group is an oil and gas developer with assets in Texas, United States. The Company’s US-based subsidiaries own a portfolio of leasehold petroleum mineral interests centred on the City of Gonzalez, in southeast Texas, comprising the undeveloped central portion of the Gonzales Oil Field.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below.

These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of preparation

These consolidated financial statements have been prepared and approved by the Directors in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006 and international financial reporting standards adopted pursuant to Regulation (EC) No 1606/2002 as it applies in the European Union.

The financial statements have been prepared under the historical cost convention.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in note 4.

2.2 Basis of consolidation

The Group financial statements consolidate the financial statements of the Company and all its subsidiaries (the “Group”).

Subsidiaries include all entities over which the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are consolidated from the date on which control commences until the date that control ceases. Intra-group balances and any unrealised gains and losses on income or expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.2 Basis of consolidation (continued)

Acquisition

On 17 May 2017 Pennpetro Energy plc (“Pennpetro”) acquired 100% of the issued capital of Nobel Petroleum UK Limited (“Nobel UK”) in a share for share exchange with the shareholders of Nobel UK’s parent company at that time, Nobel Petroleum Ireland Limited (“Nobel Ireland”). Due to the relative size of the companies, Nobel Ireland’s shareholders became the majority shareholders in the enlarged share capital. Pennpetro’s shares were later listed on the London Stock Exchange in December 2017.

The transaction fell outside the scope of IFRS 3 (“Business Combinations”) and as such has been treated as a reverse merger and accounted for as a share-based payment transaction which should be accounted for in accordance with IFRS 2. On the basis of the guidance in paragraph B21 of IFRS 3, the reverse merger has been treated as a continuation of the Nobel Group into the Pennpetro Group. The consideration included the issue of new share capital and the issue of a convertible bond.

Pennpetro was incorporated with the intention of obtaining a listing on the LSE shortly after completing a reverse merger with Nobel UK by way of a share swap with Nobel UK’s parent company Nobel Ireland. Nobel Ireland’s shareholders retained a majority interest in the listed Pennpetro after the transaction.

2.3 Business combinations

The acquisition of the other subsidiaries is accounted for using the acquisition method of accounting. The acquisition method of accounting is used to account for business combinations. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued, and liabilities incurred or assumed at the date of exchange, and the equity interests issued. Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair value at the acquisition date. Acquisition related costs are expensed as incurred. Where necessary, amounts reported by subsidiaries have been adjusted to conform with the Group’s accounting policies.

2.4 Going concern

The Group’s business activities, together with the factors likely to affect its future development and performance are set out in the Executive Director’s Statement. In addition, notes 3 and 24 to the financial statements disclose the Group’s and Company’s objectives, policies and processes for managing financial risks and capital.

As a result of the Covid-19 pandemic, the Group temporarily closed down its operations in Gonzales and significantly reduced its operating costs. The ongoing COVID-19 pandemic means there is still some uncertainty around the potential timing of when the Company and Group will be able to recommence operations.

On 2 June 2021, the Company announced the execution of a three-year £20,000,000 Share Subscription Facility Agreement (“Facility”) with GEM Global Yield LLC SCS, Luxembourg, and GEM Yield Bahamas Limited (GEM Global). This new source of funds will enable the group to re-establish its operations in Texas and fund the Group’s ongoing cashflow needs.

The Group has prepared cashflow forecasts for 12 months from the date of signing the financial statements. The Directors have considered these forecasts and have a reasonable expectation that the Company and Group has adequate resources to continue in operational existence through to 30 June 2022 as projected.

This is subject to material adverse unforeseen events that may occur, including but not limited to oil and gas prices and further hinderances to operations as a result of the Covid-19 pandemic.

2.4 Going concern (continued)

The Directors continue to consider it appropriate to prepare the Group and Company financial statements on a going concern basis.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.5 New standards, amendments and interpretations adopted by the Group and Company

The following IFRS or IFRIC interpretations were effective for the first time for the financial year beginning 1 January 2020. Their adoption has not had any material impact on the disclosures or on the amounts reported in these financial statements:

Standards /interpretations	Application
IAS 1 & IAS 8 amendments	Definition of Material
IFRS 3 amendments	Business Combinations
Amendments to IFRS 9, IAS 39 & IFRS 17	Interest Rate Benchmark Reform
N/A	Amendments to References to the Conceptual Framework in IFRS Standards

2.6 New standards, amendments and interpretations not yet adopted

Standards /interpretations	Application
IAS 1 amendments	Presentation of Financial Statements: Classification of Liabilities as Current or Non-Current and Classification of Liabilities as Current or Non-current – Deferral of Effective Date: Effective 1 January 2023
IFRS 3 amendments	Business Combinations – Reference to the Conceptual Framework: Effective 1 January 2022*
IAS 16 amendments	Property, Plant and Equipment: Effective 1 January 2022*
IAS 37 amendments	Provisions, Contingent Liabilities and Contingent Assets: Effective 1 January 2022*
N/A	Annual Improvements to IFRS Standards 2018-2020 Cycle: Effective 1 January 2022*

There are no IFRS's or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Company or Group.

2.7 Investments in subsidiaries

Investments in subsidiaries are accounted for at cost less impairment.

2.8 Foreign Currency Translation

- *Functional and presentation currency*
Items included in each of the financial statements of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the 'functional currency'). The functional currency of the UK parent entity and Nobel UK Limited is pound sterling and the functional currency of the US subsidiaries is US dollars. The financial statements are presented in US Dollars, rounded to the nearest dollar, which is the Group's and Company's presentation currency.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.8 Foreign Currency Translation (continued)

- *Transactions and balances*
Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where such items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement Of Comprehensive Income.
- *Group companies*
The results and financial position of all the Group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
 - assets and liabilities for each Statement of Financial Position presented are translated at the closing rate at the date of that Statement of Financial Position;
 - income and expenses for each Statement of Comprehensive Income are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
 - all resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities, and of monetary items receivable from foreign subsidiaries for which settlement is neither planned nor likely to occur in the foreseeable future are taken to other comprehensive income. When a foreign operation is sold, such exchange differences are recognised in the Statement of Comprehensive Income as part of the gain or loss on sale.

2.9 Property, plant and equipment

Following evaluation of successful exploration of wells, if commercial reserves are established and the technical feasibility of extraction demonstrated, and once a project is sanctioned for commercial development, then the related capitalised exploration costs are transferred into a single field cost centre within 'producing properties' within property, plant and equipment after testing for impairment.

The net book values of 'producing properties' are depreciated on a unit of production basis at a rate calculated by reference to proven and probable reserves and incorporating the estimated future cost of developing and extracting those reserves once production has commenced.

The Petroleum (Mineral lease) expenditure to date is over land that has already had historical vertical drilled wells and has proven oil reserves. All these costs were therefore immediately capitalised within property, plant and equipment.

All costs incurred after the technical feasibility and commercial viability of producing hydrocarbons has been demonstrated, are capitalised within 'drilling costs and equipment' on a well-by-well basis. Subsequent expenditure is capitalised only where it either enhances the economic benefits of the development/producing asset or replaces part of the existing development/producing asset. Any costs remaining associated with the part replaced are expensed.

All property, plant and equipment other than oil and gas assets are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.9 Property, plant and equipment (continued)

All other repairs and maintenance are charged to the Statement of Comprehensive Income during the financial period in which they are incurred.

Depreciation is charged so as to allocate the cost of assets, over their estimated useful lives, on a straight-line basis as follows:

Office equipment – 4 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each financial year-end.

Gains and losses on disposal are determined by comparing proceeds with carrying amount. These are included in the Statement of Comprehensive Income.

2.10 Intangible assets

- **Development expenditure**

Expenditure on the drilling of development wells, including service, is capitalised initially within intangible fixed assets and when the well has formally commenced commercial production, then it is transferred to property, plant and equipment and is depreciated from the commencement of production as described in the accounting policy for property, plant and equipment

- **Drilling costs and Petroleum mineral leases**

The Group applies the successful efforts method of accounting for oil and gas assets, having regard to the requirements of IFRS 6 'Exploration for and Evaluation of Mineral Resources'. Costs incurred prior to obtaining the legal rights to explore an area are expensed immediately to the Statement of Comprehensive Income.

Exploration expenditure incurred in the process of determining exploration targets is capitalised initially within intangible assets as drilling costs. Drilling costs are initially capitalised on a well-by-well basis until the success or otherwise has been established. Drilling costs are written off on completion of a well unless the results indicate that hydrocarbon reserves exist and there is a reasonable prospect that these reserves are commercially viable. Drilling costs are subsequently transferred to 'Drilling expenditure' within property, plant and equipment and depreciated over their estimated useful economic life. All such costs are subject to regular technical, commercial and management review on at least an annual basis to confirm the continued intent to develop or otherwise extract value from the discovery. Where this is no longer the case, the costs are immediately expensed to the Statement of Comprehensive Income.

2.11 Impairment of Non-Financial Assets

Assets not ready for use are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation or depreciation are reviewed for impairment at each reporting date. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.12 Financial assets

Classification

Financial assets are recognised when the Group becomes a party to the contractual provisions of the instrument. At initial recognition, the Group measures its financial assets at amortised cost which comprise 'trade and other receivables' and 'cash and cash equivalents'.

A financial asset shall be measured at amortised cost if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition and measurement

At initial recognition, an entity shall measure a financial asset at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset.

At initial recognition, an entity shall measure trade receivables at their transaction price if the trade receivables do not contain a significant financing component.

Derecognition

The Group derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of the ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Group is recognised as a separate asset or liability.

Derecognition also takes place for certain assets when the Group writes-off balances pertaining to the assets deemed to be uncollectible.

Impairment of financial assets

IFRS 9 mandates the use of an expected credit loss model to calculate impairment losses rather than an incurred loss model, and therefore it is not necessary for a credit event to have occurred before credit losses are recognised. The new impairment model applies to the Group's financial assets and loan commitments. The Group recognises lifetime expected credit losses ("ECL") when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL.

The Group is satisfied that the credit risk of its financial assets has not significantly increased and no provision for losses is required. The Group has concluded this on the basis of ongoing monitoring of the credit status of bank counterparties and the long-term operating relationships that the Group has with the other debtor counterparties.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.13 Short term investments

Short term investments include amounts held in bank accounts and deposits by intermediaries that have been approved by the Directors.

2.14 Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and demand deposits with banks.

2.15 Trade and other payables

Trade and other payables are initially measured at fair value, net of transaction costs that are directly attributable to the issue of the financial liability and are subsequently measured at amortised cost using the effective interest method if the time value of money is significant.

2.16 Borrowings

Borrowings are recognised initially at fair value minus transaction costs that are directly attributable to the issue of the financial liability. Borrowings are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the Income Statement over the period of the borrowings, using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

2.17 Share capital

Ordinary shares are classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of equity instruments are shown in equity as a deduction from the proceeds, net of tax. Incremental costs directly attributable to the issue of equity instruments as consideration for the acquisition of a business are included in the cost of acquisition.

2.18 Reserves

The reverse merger as described in Accounting Policy 2.2; the acquisition has been accounted for as a share-based payment transaction which should be accounted for in accordance with IFRS 2. On the basis of the guidance in para 13A of IFRS 2, the reverse merger has been treated as a continuation of the Nobel Group into the Pennpetro Group. The consideration included the issue of new share capital and the issue of a convertible bond. The total consideration less the share capital in Nobel UK resulted in the creation of the reorganisation reserve.

The convertible reserve represents the principal value of a mandatory convertible note issued by Pennpetro Petroleum plc to Nobel Petroleum Ireland Limited in part consideration for the acquisition of Nobel Petroleum UK under an agreement dated 17 May 2017.

The translation reserve represents effects of currency translation in the year.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.19 Taxation

The tax expense or credit comprises current and deferred tax. It is calculated using tax rates that have been enacted or substantively enacted by the Statement of Financial Position date.

Deferred tax is accounted for using the balance sheet liability method in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax basis used in the computation of taxable profit. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill (or negative goodwill) or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction, which affects neither the tax profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised, or the liability is settled. Deferred tax is charged or credited in the Statement of Comprehensive Income, except when it relates to items credited or charged directly to equity, in which case the deferred tax is also dealt with in equity. Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

2.20 Segment Information

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker ("CODM"), who is responsible for allocating resources and assessing performance of the operating segments and making strategic decisions. The CODM is determined to be the board of Directors.

2.21 Share based payments

All services received in exchange for the grant of any share-based remuneration are measured at their fair values. These are indirectly determined by reference to the fair value of the share options/warrants awarded. Their value is appraised at the grant date and excludes the impact of any non-market vesting conditions (for example, profitability and sales growth targets).

Share based payments are ultimately recognised as an expense in the Statement of Comprehensive Income with a corresponding credit to other reserves in equity, net of deferred tax where applicable. If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options/warrants expected to vest. Non-market vesting conditions are included in assumptions about the number of options/warrants that are expected to become exercisable. Estimates are subsequently revised, if there is any indication that the number of share options/warrants expected to vest differs from previous estimates. No adjustment is made to the expense or share issue cost recognised in prior periods if fewer share options ultimately are exercised than originally estimated.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.21 Share based payments (continued)

Upon exercise of share options, the proceeds received net of any directly attributable transaction costs up to the nominal value of the shares issued are allocated to share capital with any excess being recorded as share premium.

Where share options are cancelled, this is treated as an acceleration of the vesting period of the options. The amount that otherwise would have been recognised for services received over the remainder of the vesting period is recognised immediately within the Statement of Comprehensive Income.

3. FINANCIAL RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks: market risk (including currency risk and cash flow and interest rate risk), credit risk and liquidity risk.

Market risk

The Group operates in an international market for hydrocarbons and is exposed to risk arising from variations in the demand for and price of the hydrocarbons. Oil and gas prices historically have fluctuated widely and are affected by numerous factors over which the Group has no control, including world production levels, international economic trends, exchange rate fluctuations, speculative activity and global or regional political events.

Currency risk

The majority of the Group's purchase transactions and expenditure are denominated in US dollars. The currencies are stable, and any exchange risk is managed by maintaining bank accounts denominated in those currencies.

Credit risk

The Group's principal financial assets are cash and cash equivalents, other receivables and short-term investments.

Credit risk represents the risk of loss the Group would incur if third party operators and counterparties fail to fulfil their credit obligations. The risk is concentrated between a relatively small group of operators given the small number of parties involved in oil and gas exploration and production activities. The Group seeks to mitigate this risk where possible by assessing the credit quality of the participants and by establishing ongoing and long-term relationships.

The initial credit risk on cash and cash equivalents and short-term investments is limited because it is the Group's policy to invest with banks that firstly offer the greatest degree of security in the view of the Group and, secondly the most competitive interest rates. The credit risk for short term investments and cash and cash equivalents is considered negligible since the counterparties are reputable banks.

Other receivables include amounts due from parties that have been involved in the Gonzales Project since its inception and continue to have an interest in the Group in their capacity as shareholders in Pennpetro or as lenders to the Group. Other receivables are therefore initially considered low credit risk.

Other receivables are considered in default if the entity or party has not settled its payment obligation by the due date set out in the underlying contracts and agreements.

A loss allowance is recognised for expected credit losses on all financial assets held at the balance sheet date. Given risk mitigation steps undertaken by the Directors, no provision has been made for losses.

The maximum exposure due to credit risk for the Group on financial assets during the year was \$359,424 (2019: \$425,313). All amounts are expected to be received in full and on time.

3. FINANCIAL RISK MANAGEMENT (continued)

Liquidity risk

Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group Finance. Group Finance monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs, while seeking to maintain sufficient headroom on its undrawn committed borrowing facilities (note 20) at all times, so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance, compliance with internal Statement of Financial Position ratio targets, and, if applicable, external regulatory or legal requirements (for example, currency restrictions).

The table below analyses the Group's non-derivative financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings, based on the remaining period at the Statement of Financial Position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

Liquidity risk (continued)

Group	Less than 1 year \$	Between 1 and 2 years \$	Between 2 and 3 years \$
At 31 December 2020			
Borrowings (undiscounted)	4,242,366	-	-
Trade and other payables	496,086	-	-
At 31 December 2019			
Borrowings (undiscounted)	6,791,993	-	-
Trade and other payables	265,972	-	-

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

4.1 Use of estimates and judgements

The preparation of Financial Statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are described below.

4.2 Critical accounting judgements

- ***Recoverability of non-producing mineral leases and capitalised drilling costs & equipment***

Management tests annually whether non-producing mineral leases have future economic value in accordance with the accounting policies. This assessment takes into consideration the likely commerciality of the asset, the future revenues and costs pertaining and the discount rates to be applied for the purposes of deriving a recoverable value. In the event that a lease does not represent an economic drilling target and results indicate that there is no additional upside, the mineral lease and drilling costs will be impaired. The Directors have reviewed the estimated value of the licences and have concluded that an impairment charge of \$Nil (2019: \$Nil) should be recognised. The Directors do not consider that there is a significant risk of material adjustment to the estimated value of the leases given the underlying value of proven reserves and the successful testing, trials and completion of the initial well.

- ***Impairment of investments***

The Directors have assessed at year end whether there is any indication that the carrying value of the Company's investment in its subsidiaries has been impaired. The Directors have determined that the value of the assets owned by its subsidiaries, namely the mineral leases, the proven oil and gas reserves and Net Revenue Interests are significantly higher than the Investment carried in the Company's books. The Directors therefore do not consider any impairment is necessary. The Directors do not consider that there is a significant risk of material downward adjustment to the estimated levels of proven and probable reserves in the next 12 months, but have disclosed this as an area of significant estimation based on the size of the balance.

- ***Going concern***

When assessing going concern the Directors considered whether there was a material uncertainty given that funding has yet to be received from the Share Subscription Facility Agreement disclosed in note 2.2. The Company is currently looking to draw down funds under the Facility however it is currently in a pricing period and hence there is some uncertainty over the final value that will be received. The Directors have considered the current share price and historic pricing movements and are satisfied, based on this, that adequate funds will be received that, in conjunction with existing sources of finance, will enable the Group to continue to operate as a going concern for at least 12 months from the date of signature. On this basis the Directors did not consider there to be a material uncertainty in respect of going concern.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

- ***Estimated impairment of producing properties and capitalised drilling costs & equipment***

At 31 December 2020, petroleum mineral leases and capitalised drilling costs & equipment on petroleum properties have a total carrying value of \$5,618,204 (2019: \$5,527,900), (notes 12 and 13). Management tests annually whether the assets have future economic value in accordance with the accounting policies and has placed reliance on the Competent Persons Report (“CPR”) prepared in December 2017.

All of the mineral leases were offered on an initial term of three years with an option to extend them by two years. All of the leases covering the initial permit area do not need renewing whilst there is any production from the permitted area.

The recoverable amount of each property has been determined based on a value in use calculation which requires the use of certain estimates and assumptions such as long-term commodity prices (i.e. oil and gas prices), pre-tax discount rates, operating costs, future capital requirements and mineral resource estimates. These estimates and assumptions are subject to risk and uncertainty and therefore a possibility that changes in circumstances will impact the recoverable amount.

The following information has been used by the Directors in determining the recoverability of the Company’s Petroleum properties. The Source for this information is the CPR prepared in December 2017.

- The Pennpetro Group owns approximately 1,000 leases on 2,500 acres in Gonzales, Texas.
- The Group’s Net Working Interests are 4,000 Mbbbl of oil and 2,000 MMcf of gas.
- Base case oil sold is assumed at \$33 per barrel and gas at \$3.20 per thousand cubic feet.
- WTI Oil initially for two years at \$33 then at \$45 and gas pricing held constant to depletion in 2031.
- The total proved future Net Revenue Interest after costs as at 1 June 2021: Undiscounted \$120m (2018: \$92m).

The Directors are comfortable in relying on the CPR for the following reasons:

- The oil sold price used by the Directors in their revised assessment of future Net Revenue of \$33, is lower than current and future forecast WTI prices. The WTI price as at 20 June 2021 was \$70.94 (source: Bloomberg markets).
- Operating costs remain unchanged.
- The Group increased its Working Interest to 100% during 2019 and consequently its Net Revenue Interest increased to 75%. This was as a result of taking legal ownership of the remaining participants interests in the Gonzales Project.
- The effect of the increase in the Group’s Net Revenue Interest counteracts the reduction in oil price used by the Directors in calculating the total proved future Net Revenue Interest after costs.

Based on the information provided in the CPR, updated for changes in Net Revenue Interest and oil price, the Directors have determined that the Company’s oil properties have not been impaired as at the 31 December 2020. The Directors also do not consider that there is a significant risk of material adjustment to the estimates used to assess impairment of producing properties and capitalised drilling costs & equipment in the next 12 months, but have disclosed this as an area of significant estimation based on the size of the balance.

5. SEGMENTAL INFORMATION

The Group operates in two geographical areas, the United Kingdom and the United States of America. Activities in the UK are mainly administrative in nature whilst the activities in the USA relate to exploration and production from oil and gas wells. The reports reviewed by the Board of Directors that are used to make strategic decisions are based on these geographical segments.

	Year ended 31 December 2020			
	USA	UK	Intra-segment balances	Total
	\$	\$	\$	\$
Revenue	66,798	-	-	66,798
Operating loss	(671,842)	(639,524)	-	(1,311,366)
Depreciation & amortisation	577	959	-	1,536
Capital expenditure	23,151	-	-	23,151
Development expenditure	67,153	-	-	67,153
Total assets	5,877,838	3,111,264	(3,011,474)	5,977,628
Total liabilities	6,686,644	548,910	(3,011,474)	4,224,080

	Year ended 31 December 2019			
	USA	UK	Intra-segment balances	Total
	\$	\$	\$	\$
Revenue	-	-	-	-
Operating profit/(loss)	(184,505)	(958,825)	-	(1,143,330)
Depreciation & amortisation	90,690	2,215	-	92,905
Capital expenditure	85,566	-	-	85,566
Development expenditure	184,963	-	-	184,963
Total assets	5,921,589	289,737	(181,447)	6,029,879
Total liabilities	6,278,607	247,713	(181,447)	6,344,873

5. SEGMENTAL INFORMATION (continued)

A reconciliation of the operating loss to loss before taxation is provided as follows:

	Year ended 31 December 2020 \$	Year ended 31 December 2019 \$
Operating loss for reportable segments	(1,311,366)	(1,143,330)
(Finance costs net of finance income)	264,854	(525,080)
Loss before tax	<u>(1,046,512)</u>	<u>(1,668,410)</u>

The amounts provided to the Board of Directors with respect to total assets are measured in a manner consistent with that of the financial statements. These assets are allocated based on the operations of the segment and physical location of the asset.

Reportable segments' assets are reconciled to total assets as follows:

	Year ended 31 December 2020 \$	Year ended 31 December 2019 \$
Segmental assets for reportable segments	5,977,628	6,029,879
Total assets per Statement of Financial Position	5,977,628	6,029,879

Information about major customers/operating partners

At 31 December 2020, Nobel USA held a 100% Working Interest (2019: 100%) in the leasehold petroleum interests which are centred on the City of Gonzales, southwest Texas, USA, comprising the undeveloped central portion of the Gonzales Oil Field.

6. EXPENSES BY NATURE

Group	Year ended 31 December 2020 \$	Year ended 31 December 2019 \$
Legal, professional and compliance costs	84,192	458,235
Depreciation and amortisation	76,630	92,905
Foreign exchange loss	743,679	-
Other costs	473,663	592,190
Total administrative expenses	<u>1,378,164</u>	<u>1,143,330</u>

7. AUDITOR REMUNERATION

Services provided by the Company's auditor and its associates

During the year, the Group (including its overseas subsidiaries) obtained the following services from the Company's auditor:

	Year ended 31 December 2020 \$	Year ended 31 December 2019 \$
Fees payable to the Company's auditor for the audit of the parent company and consolidated financial Statements	32,000	28,450

8. STAFF COSTS

Group and Company	2020 \$	2019 \$
Wages and salaries	160,000	159,617
Social security costs	12,146	12,204
Valuation of options	362,730	361,860
	534,876	533,681

Directors' Emoluments

		2020 \$	2019 \$
Keith Edelman	Emoluments	47,026	44,694
	Valuation of options	90,682	90,465
Olof Rapp	Emoluments	40,306	38,308
	Valuation of options	90,682	90,465
Philip Nash	Emoluments	40,306	38,308
	Valuation of options	90,682	90,465
Thomas Evans	Emoluments	40,306	38,308
	Valuation of options	90,682	90,465
		530,672	521,478

The Group does not employ any full-time employees at its US subsidiaries. Instead the Group uses specialist service providers to fulfil its well drilling and land management requirements.

The average monthly number of staff, including the Directors, during the financial year was as follows:

	2020	2019
Directors	4	4

9. FINANCE INCOME AND FINANCE COSTS

	2020 \$	2018 \$
Loan adjustment for effective interest and bank interest	2,058	944
Interest expense	262,796	(526,024)

10. INCOME TAX

The tax charge for the year is \$Nil (2019: \$Nil).

Factors affecting the tax charge for the period

The tax charge for each year is explained below:

	2020 \$	2019 \$
Loss for the year before taxation	(1,046,512)	(1,668,410)
UK Loss before tax multiplied by the UK tax rate 19% (2019: 19%)	(198,837)	(316,998)
Tax effect of:		
Expense not deductible for tax purposes	-	-
Unutilised tax losses carried forward	198,837	316,998
	-	-

The Group has UK tax losses of approximately \$663,895 (2019: \$465,058) to carry forward against future profits. The Directors have not recognised a deferred tax asset on the losses to date due to the uncertainty of recovery.

11. EARNINGS PER SHARE

The calculation of basic and diluted earnings per share is based on the following loss and number of shares:

	2020	2019
Group:		
Loss attributable to equity holders of the parent (\$)	1,046,512	1,668,410
Weighted average number of shares (number)	75,109,393	72,156,944
Loss per share (cents)	(1.39)	(2.31)

There is no difference between the basic and diluted earnings per share as the effect would be to increase the loss per share.

12. PROPERTY, PLANT AND EQUIPMENT

Group	Petroleum (Mineral Leases) \$	Office equipment \$	Total \$

At 31 December 2020	4,233,890	-	4,233,890

Drilling costs represents acquired exploration and evaluation assets with an undetermined useful life and are tested annually for impairment. Drilling costs are capitalised on a well by well basis if the results indicate the existence of a commercially viable level of reserves. No amounts are pledged as security for liabilities.

At 31 December 2020, the Company held, through its US based subsidiary entities, 100% in the leasehold petroleum interests centred on the City of Gonzales, southwest Texas.

Impairment review – Intangible assets

The Directors have undertaken a review to assess whether circumstances exist which could indicate the existence of impairment, considering the following indicators:

- The Group no longer has title to mineral leases.
- A decision has been taken by the Board to discontinue exploration due to the absence of a commercial level of reserves.
- Sufficient data exists to indicate that the costs incurred will not be fully recovered from future development and participation.

Following their assessment, the Directors recognised that no impairment charge is necessary. Further details regarding consideration of the carrying value is contained in note 4.

14. INVESTMENTS

Investments in subsidiaries

Company	2020	2019
	\$	\$
Shares in group undertakings		
At 1 January	6,899,108	6,622,720
Additions		-
Foreign exchange movements	205,716	276,388
At 31 December	7,104,824	6,899,108

The Group comprises of the following subsidiaries:

Pennpetro USA Corp

Registered Office:	8 The Green Ste A, Dover, Delaware 19901, USA
Nature of business:	Oil and Gas
Class of share:	Ordinary shares
% of equity shares held by Company:	100%

Nobel Petroleum USA Inc.

Registered Office:	198 West 13th Street, Wilmington, Delaware 19801, USA
Nature of business:	Oil and Gas
Class of share:	Ordinary shares
% of equity shares held by Company:	100% via Pennpetro USA Corp

Nobel Petroleum LLC

Registered Office:	3867 Plaza Tower DR Baton Rouge, Louisiana 70816-4378, USA
Nature of business:	Oil and Gas
Class of share:	Ordinary shares
% of equity shares held by Company:	100% via Pennpetro USA Corp

Nobel Petroleum UK Limited

Registered Office:	1/88 Whitfield St. London W1T 4EZ, UK
Nature of business:	Dormant
Class of share:	Ordinary shares (£100)
% of equity shares held by Company:	100%

Pennpetro Greentec UK Limited

Registered Office:	1/88 Whitfield St. London W1T 4EZ, UK
Nature of business:	Dormant
Class of share:	Ordinary shares (£100)
% of equity shares held by Company:	100%

Pennpetro Green Energy Limited

Registered Office:	1/88 Whitfield St. London W1T 4EZ, UK
Nature of business:	Dormant
Class of share:	Ordinary shares (£100)
% of equity shares held by Company:	100%

14. INVESTMENTS (continued)

Pennpetro Greentec Limited

Registered Office:	1 Kalymnou, Q MERITO, 4th Floor, Agios Nikolaos, 6037 Larnaca, Cyprus
Nature of business:	IP Holding
Class of share:	Ordinary shares (€1,000)
% of equity shares held by Company:	100%

These subsidiary undertakings are included in the consolidation. The proportion of the voting rights in the subsidiary undertaking held directly by the parent company does not differ from the proportion of ordinary shares held.

15. TRADE AND OTHER RECEIVABLES

	Group		Company	
	2020	2019	2020	2019
	\$	\$	\$	\$
Amounts owed from group undertakings	-	-	3,047,540	-
Other receivables	308,943	356,928	14,572	229,736
	308,943	356,928	3,062,112	229,736

The fair value of all receivables is the same as their carrying values stated above.

Group

The carrying amounts of the Group's trade and other receivables are denominated in the following currencies:

	2020	2019
	\$	\$
UK Pound Sterling	13,663	13,268
US Dollar	295,280	343,660
	308,943	356,928

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable mentioned above. With respect to amounts due from Development participants, each participant has provided a lien over its lease interests and a security interest over its interest in well assets. The Group does not hold any collateral as security for other receivables.

The impact of a 10% favourable movement in the US Dollar to UK Pound would increase the carrying value of other receivables denominated in UK Pounds by \$1,366 (2019: \$1,327). The impact of a 10% adverse movement in the US Dollar to UK Pound would reduce the carrying value of other receivables denominated in UK Pounds by \$1,366 (2019: \$1,327).

Company

The carrying amounts of the Company's trade and other receivables are denominated in UK Pound Sterling.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable mentioned above. The Company does not hold any collateral as security for other receivables.

The impact of a 10% favourable movement in the US Dollar to UK Pound would increase the carrying value of other receivables denominated in UK Pounds by \$306,211 (2019: \$22,974). The impact of a 10% adverse movement in the US Dollar to UK Pound would reduce the carrying value of other receivables denominated in UK Pounds by \$306,211 (2019: \$22,974).

16. SHORT-TERM INVESTMENTS

	Group		Company	
	2020	2019	2020	2019
	\$	\$	\$	\$
Short-term investments	49,152	60,001	49,152	60,001

Short term investments include \$49,152 (2019: \$60,001) of cash being held by FHF Corporate Finance Limited on behalf of Pennpetro. The amount is held in Pounds Sterling.

Group

The carrying amounts of the Group's short-term investments are denominated in the following currencies:

	2020	2019
	\$	\$
UK Pound Sterling	49,152	60,001
US Dollar	-	-
	49,152	60,001

The maximum exposure to credit risk at the reporting date is the carrying value of the short-term investment mentioned above. The Group does not hold any collateral as security.

The impact of a 10% favourable movement in the US Dollar to UK Pound would increase the carrying value of short-term investments denominated in UK Pounds by \$4,915 (2019: \$6,000). The impact of a 10% adverse movement in the US Dollar to UK Pound would reduce the carrying value of short-term investments denominated in UK Pounds by \$4,915 (2019: \$6,000).

Company

The carrying amounts of the Company's short-term investments are denominated in UK Pound Sterling.

17. CASH AND CASH EQUIVALENTS

	Group		Company	
	2020	2019	2020	2019
	\$	\$	\$	\$
Cash at bank	1,329	8,384	-	-

At 31 December 2020, the Group held cash of \$1,329 (2019: \$8,384) in banks with a Fitch credit rating of A (Stable).

18. SHARE CAPITAL AND PREMIUM

Group	Ordinary shares			Share premium		Total \$
	Number of shares	Value £	Value \$	Value £	Value \$	
At 1 January 2019	70,900,000	709,000	908,404	472,400	625,504	1,533,908
Share issue	1,433,702	14,337	18,307	774,198	988,599	1,006,906
Share issue costs	-	-	-	(59,100)	(75,467)	(75,467)
At 31 December 2019	72,333,702	723,337	926,711	1,187,098	1,538,636	2,465,347
Share issue	4,118,404	41,184	52,716	2,018,018	2,583,064	2,635,780
At 31 December 2020	76,452,106	764,521	979,427	3,205,116	4,121,700	5,101,127

Each ordinary share has a nominal value of 1 pence per share.

A convertible loan note which was issued by Pennpetro to Nobel Ireland in the Reverse merger of Nobel UK, may be converted into 19 million ordinary shares if certain conditions are met, at a fixed subscription price of 25 pence.

During the year, 4,118,404 shares were issued at a price of £0.50 per share. The shares were not issued for cash but were issued as settlement of the loan held with Pennpetro Bonds II.

19. SHARE BASED PAYMENTS

Share options

On 2nd November 2018 the Company granted options under the Pennpetro Energy Plc Option Share Plan with an exercise price of £0.35p per share over, in aggregate, 1,700,000 ordinary shares of £0.01 each to Directors Keith Edelman, Phillip Nash, Tom Evans and Olof Rapp, who will each receive 425,000 options. The share price of the options granted are linked to the price of shares issued on listing. Options are granted at 35p, which is a modest premium to the issue price of the listing share price of 25p.

	Weighted average exercise price £	Number of awards
At 1 January 2019	0.35	1,700,000
Awarded	-	-
Forfeited	-	-
Exercisable at 31 December 2019	0.35	1,700,000
Awarded	-	-
Forfeited	-	-
Exercisable at 31 December 2020	0.35	1,700,000

The options outstanding at 31 December 2020 have a weighted average remaining contractual life of 0.8 years (2019: 1.8 years).

At 31 December 2020, the following options were issued to Directors of the Company under the share option incentive scheme:

Date of grant	2 November 2018
Number granted	1,700,000
Contractual life	3 years
Exercise price	£0.35
Estimated fair value	£0.50

None of the share options vested in the year.

19. SHARE BASED PAYMENTS (continued)

The fair value of the options issued during the year was determined using the Black-Scholes valuation model. \$400,268 (2019: \$378,488) was recognised in the Statement of Comprehensive Income in relation to share based payment transactions.

Other significant inputs into the model are:

Issue date share price	£0.685
Risk free rate	0.8%
Expected volatility	75%

The average volatility has been calculated by using the average volatility for the Company and other similar companies.

20. BORROWINGS

	Group		Company	
	2020	2019	2020	2019
	\$	\$	\$	\$
Current liabilities				
Corporate borrowings	3,727,995	6,078,992	-	-

As at 31 December 2020, the Group had a \$5 million Loan Note arrangement with Petroquest Energy Limited, with a maturity date of 31 December 2021. In June 2021, Petroquest Energy Limited agreed to extend the maturity date to 31 December 2022.

The annual interest rate is set at 1% below Barclays Bank base rate, which has been less than 0.75% since the loan's inception and therefore no interest has been charged on the loan. The undiscounted balance drawn against this loan note as at 31 December 2020 was \$4,242,367 (2019: \$3,951,706). The borrowing facility is secured against certain petroleum leases owned by the Group. The discounted present value of the loan as at 31 December 2020 was \$3,661,045 (2019: \$3,387,951) and reflects an adjustment for effective interest calculated at 8% per annum over the remaining term of the loan.

As at 31 December 2020, Nobel Petroleum USA, Inc. had a Loan Agreement of £nil (2019: £1,822,455) with Pennpetro Bonds II Limited at an annual interest rate of 8% which was due for repayment on 31 October 2020. The balance outstanding on the loan as at 31 December 2020 was \$nil (2019: \$2,417,945). Arrangement costs of \$270,339 have been capitalized in Intangible assets and are being charged to the Statement of Comprehensive Income over the life of the Loan. The borrowing facility is secured against certain petroleum leases owned by the Group. An agreement was reached with the lender on 14 January 2020 to settle the loan by the issue of shares in Pennpetro Energy plc as follows:

- £2,000,000 to be converted into 4,000,000 ordinary shares at £0.50 per share.
- £50,202 in outstanding interest to be converted into 118,404 ordinary shares at £0.50 per share.

Pennpetro Bonds II Limited is not in the Pennpetro group.

20. BORROWINGS (continued)

The movement in total borrowings in the year was as follows

	Group		Company	
	2020	2019	2020	2019
	\$	\$	\$	\$
At 1 January	6,078,992	5,863,863	-	-
Advance	66,950	-	-	-
Interest charge	271,189	271,188	-	-
Net repayment	-	(151,005)	-	-
Loan settlement	(2,324,351)	-	-	-
Adjustment for effective interest	2,058	1,906	-	-
Loan term modification adjustment	(533,985)	-	-	-
Foreign currency exchange	167,142	93,040	-	-
At 31 December	3,727,995	6,078,992	-	-

The fair value of borrowings equals their carrying amount. Borrowings are denominated in US dollars.

The net debt position (total borrowings less cash on hand) as at 31 December 2020 is \$3,726,666 (2019: \$6,078,992).

Group

The carrying amounts of the Group's borrowings are denominated in the following currencies:

	2020	2019
	\$	\$
UK Pound Sterling	66,950	2,416,183
US Dollar	3,661,045	3,662,809
	3,727,995	6,078,992

The impact of a 10% favourable movement in the US Dollar to UK Pound would increase the carrying value of borrowings denominated in UK Pounds by \$6,695 (2019: \$241,618). The impact of a 10% adverse movement in the US Dollar to UK Pound would reduce the carrying value of the borrowings denominated in UK Pounds by \$6,695 (2019: \$241,618).

Company

The company does not carry any borrowings.

21. TRADE AND OTHER PAYABLES

	Group		Company	
	2020	2019	2020	2019
	\$	\$	\$	\$
Trade and other payables	291,412	106,333	308,171	55,803
Amounts owed to group undertakings	-	-	36,065	35,022
Accrued expenses	204,673	159,548	204,674	156,890
At 31 December	496,085	265,881	548,910	247,715

21. TRADE AND OTHER PAYABLES (continued)

Group

The carrying amounts of the Group's trade and other payables are denominated in the following currencies:

	2020 \$	2019 \$
UK Pound Sterling	446,086	212,601
US Dollar	50,000	53,280
	496,086	265,881

The impact of a 10% favourable movement in the US Dollar to UK Pound would increase the carrying value of trade and other payables denominated in UK Pounds by \$44,609 (2019: \$21,260). The impact of a 10% adverse movement in the US Dollar to UK Pound would reduce the carrying value of trade and other payables denominated in UK Pounds by \$44,609 (2019: \$21,260).

Company

The carrying amounts of the Company's trade and other payables are denominated in UK Pound sterling. The carrying amounts of the Company's US subsidiary companies are denominated in US Dollars.

22. FINANCIAL INSTRUMENTS BY CATEGORY

	Group		Company	
	2020 \$	2019 \$	2020 \$	2019 \$
Assets as per Statement of Financial Position				
Loans and receivables:				
Trade and other receivables (excluding prepayments)	308,943	356,928	3,062,112	229,736
Short-term investments	49,152	60,001	49,152	60,001
Cash and cash equivalents	1,329	8,384	-	-
	359,424	425,313	3,111,264	289,737
Liabilities per Statement of Financial Position				
Financial liabilities at amortised cost:				
Borrowings	3,727,995	5,804,132	66,950	-
Trade and other payables (excluding non-financial liabilities)	496,085	265,881	445,895	212,693
	4,224,080	6,070,013	512,845	212,693

Certain leases which have been capitalised in Property Plant and Equipment have been pledged as collateral against the loan from Pennpetro Bonds II Limited. No other financial assets are pledged as security. Pennpetro Bonds II Limited is not in the Pennpetro group.

23. TREASURY POLICY

The Company and Group operate informal treasury policies which include ongoing assessments of interest rate management and borrowing policy. The Board approves all decisions on treasury policy.

The Group has financed its activities by raising funds through borrowings set out in note 20 above. There are no material differences between the book value and fair value of the financial assets.

24. CAPITAL MANAGEMENT POLICIES

The Group and Company set the amount of capital in proportion to its overall financing structure and manage their capital structure and make adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

The Group considers its equity to be its capital.

The Group and Company's capital management objectives are:

- to ensure compliance with borrowing covenants;
- to ensure the Group's and Company's ability to continue as a going concern; and
- to provide an adequate return to shareholders.

In order to maintain or adjust the capital structure, the Group may issue new shares or sell assets to reduce debts. The Group will continue making interest payments in accordance with financial and non-financial loan covenants.

25. CAPITAL COMMITMENTS

As at 31 December 2020 and 2019, the Group had no capital commitments for drilling and equipment costs contracted but not provided for.

26. RELATED PARTY TRANSACTIONS

Transactions with Directors

An amount of £10,000 that was previously advanced to Thomas Evans remains outstanding as at 31 December 2020 (2019: £10,000). The amount is secured against shares held by him in the Company and is due for repayment within 12 months. No interest has been charged on the advance.

Thomas Evans is a Director of Pennpetro Bonds II Limited, which provided a £2m loan facility to the Group during the current reporting period. In his capacity as a Director of Pennpetro Bonds II Limited, Mr. Evans received director's fees of £Nil (2019: £Nil) from that Company. Pennpetro Bonds II Limited is not in the Pennpetro group.

Thomas Evans is a Director of the following companies which are considered as related parties:

- Pennpetro Bonds II Limited – the provider of a £2m loan facility to Nobel Petroleum USA, Inc.
- FHF Securities (A'Asia) Limited – a shareholder in Pennpetro with a 6.54% shareholding in the Company.
- Nobel Petroleum UK Limited which is a 100% subsidiary of Pennpetro.
- Nobel Petroleum LLC, which is a 100% directly owned subsidiary of Pennpetro USA Corp.

26. RELATED PARTY TRANSACTIONS (continued)

- Nobel Petroleum USA, Inc, which is a 100% owned subsidiary of Pennpetro USA Corp.
- Pennpetro USA Corp., which is a 100% owned subsidiary of Pennpetro.
- Pennpetro Greentec UK Limited, which is a 100% owned subsidiary of Pennpetro.
- Pennpetro Green Energy Limited, which is a 100% owned subsidiary of Pennpetro.
- Pennpetro Greentec Limited, which is a 100% owned subsidiary of Pennpetro.
