

The Product Realization Company

2016 Annual Report

Plexus Profile

About Plexus Corp. – The Product Realization Company

Plexus (www.plexus.com) delivers optimized solutions to help our customers realize their go-to-market strategies by combining our expertise with their core competencies. Our unique Product Realization Value Stream is designed to help our customers succeed in their markets through the seamless integration of product conceptualization, design, commercialization, manufacturing, fulfillment and sustaining solutions.

Plexus delivers comprehensive end-to-end solutions for customers in the Americas, Europe, Middle East and Africa, and Asia-Pacific regions. We serve mid-to-low volume, higher complexity customer programs characterized by unique flexibility, technological, quality and regulatory requirements. We are an industry leader, providing award-winning customer service to over 140 branded product companies in the Healthcare/Life Sciences, Industrial/Commercial, Communications and Defense/Security/Aerospace market sectors.

Our commitment to our customers' success is deeply embedded in our culture. Established in 1979, Plexus has over 35 years of experience bringing our customers' products to market quickly and efficiently. We leverage our expertise to understand and support the unique needs of our customers and the markets in which they operate. We have designed our Product Realization Value Stream to support critical elements of our customers' go-to-market strategies by solving complex problems with our comprehensive suite of services. When customers leverage the full Plexus Product Realization Value Stream, we believe they gain a distinct competitive advantage in their markets.

| [Conceptualize](#) | [Design](#) | [Commercialize](#) | [Manufacture](#) | [Fulfill](#) | [Sustain](#) |

Conceptualize – Our engineers partner with our customers to create and evaluate new product ideas. We collaborate closely with our customers to capture each customer's vision for a new product and clarify functional requirements to drive concept evaluations and prototype development.

Design – We leverage the latest technology and utilize state-of-the-art design automation tools and methodologies to provide comprehensive new product development and value engineering solutions.

Commercialize – Our suite of design and manufacturing support services enables quick conversion of designs into viable manufactured products and facilitates a smooth ramp into full-scale production. These services can reduce costs by assuring designs account for unit cost, serviceability, reliability, testability and manufacturability.

Manufacture – Tailored supply chain solutions, customized focused factories and dedicated resources offer our customers flexibility and agility. Our scalable operational model and manufacturing footprint enable our customers to meet their market and service level needs on a global scale.

Fulfill – We provide unmatched flexibility and responsiveness when fulfilling our customers' orders. Through customized direct order fulfillment, build-to-order and configure-to-order services, the total cost of ownership is minimized and the needs of end customers are fulfilled.

Sustain – We sustain our customers' products after launch into the market by providing a range of Aftermarket Services, including complex repair, refurbishment and replacement processes. Our customized, flexible solutions extend the lives of our customers' products and optimize their supply chain investment.

Plexus is comprised of approximately 14,000 creative and talented employees who are committed to excellence. We have 22 facilities across the globe that are strategically located in the regions with strong engineering, manufacturing and supply chain competencies. These locations attract the best and brightest talent and provide convenience to our customers.

PLEXUS CORP.

(Exact Name of Registrant as Specified in its Charter)

Wisconsin
(State or other jurisdiction of
incorporation or organization)

**One Plexus Way
Neenah, Wisconsin 54957
(920) 969-6000**

39-1344447
(I.R.S. Employer Identification No.)

(Address, including zip code, of principal executive offices and Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Name of Each Exchange on Which Registered</u>
Common Stock, \$.01 par value	The NASDAQ Global Select Market
Preferred Share Purchase Rights	The NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of April 2, 2016, 33,267,319 shares of common stock were outstanding, and the aggregate market value of the shares of common stock (based upon the \$39.45 closing sale price on that date, as reported on the NASDAQ Global Select Market) held by non-affiliates (excludes 445,438 shares reported as beneficially owned by directors and executive officers – does not constitute an admission as to affiliate status) was approximately \$1.3 billion.

As of November 14, 2016, there were 33,514,710 shares of common stock outstanding.

“SAFE HARBOR” CAUTIONARY STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995:

The statements contained in this Form 10-K that are guidance or which are not historical facts (such as statements in the future tense and statements including believe, expect, intend, plan, anticipate, goal, target and similar terms and concepts), including all discussions of periods which are not yet completed, are forward-looking statements that involve risks and uncertainties. These risks and uncertainties include, but are not limited to: the risk of customer delays, changes, cancellations or forecast inaccuracies in both ongoing and new programs; the lack of visibility of future orders, particularly in view of changing economic conditions; the economic performance of the industries, sectors and customers we serve; the effects of the volume of revenue from certain sectors or programs on our margins in particular periods; our ability to secure new customers, maintain our current customer base and deliver product on a timely basis; the particular risks relative to new or recent customers, programs or services, which risks include customer and other delays, start-up costs, potential inability to execute, the establishment of appropriate terms of agreements, and the lack of a track record of order volume and timing; the risks of concentration of work for certain customers; the effect of start-up costs of new programs and facilities; possible unexpected costs and operating disruption in transitioning programs, including as a result of a facility closure; the risk that new program wins and/or customer demand may not result in the expected revenue or profitability; the fact that customer orders may not lead to long-term relationships; our ability to manage successfully and execute a complex business model characterized by high product mix, low volumes and demanding quality, regulatory, and other requirements; the ability to realize anticipated savings from restructuring or similar actions, as well as the adequacy of related charges as compared to actual expenses; increasing regulatory and compliance requirements; the potential effects of regional results on our taxes and ability to use deferred tax assets and net operating losses; risks related to information technology systems and data security; the effects of shortages and delays in obtaining components as a result of economic cycles or natural disasters; the risks associated with excess and obsolete inventory, including the risk that inventory purchased on behalf of our customers may not be consumed or otherwise paid for by the customer, resulting in an inventory write-off; the weakness of areas of the global economy; the effect of changes in the pricing and margins of products; raw materials and component cost fluctuations; the potential effect of fluctuations in the value of the currencies in which we transact business; potential economic weakness and other effects resulting from the June 2016 vote of the United Kingdom to exit the European Union; the potential effect of other world or local events or other events outside our control (such as changes in energy prices, terrorism and weather events); the impact of increased competition; changes in financial accounting standards; and other risks detailed herein and in our other Securities and Exchange Commission filings.

In addition, see Risk Factors in Part I, Item 1A and Management’s Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7 for a further discussion of some of the factors that could affect future results.

* * *

PART I

ITEM 1. BUSINESS

Overview

Plexus Corp. and its subsidiaries (together “Plexus,” the “Company,” or “we”) participate in the Electronic Manufacturing Services (“EMS”) industry. We deliver optimized solutions to our customers through our unique Product Realization Value Stream. Our customer-focused solutions model seamlessly integrates innovative product conceptualization, design, commercialization, manufacturing, fulfillment and sustaining solutions. Plexus delivers comprehensive end-to-end solutions for customers in the Americas (“AMER”), Europe, Middle East, and Africa (“EMEA”) and Asia-Pacific (“APAC”) regions.

We provide award-winning customer service to more than 140 branded product companies in the Healthcare/Life Sciences, Industrial/Commercial, Networking/Communications (renamed Communications beginning in fiscal 2017) and Defense/Security/Aerospace market sectors. Our customers have stringent quality, reliability and regulatory requirements, requiring exceptional production and supply chain agility. Their products require complex configuration management, direct order fulfillment (to end customers), global logistics management and Aftermarket Services. To service the complexities that our customers’ products demand, we utilize our Product Realization Value Stream, addressing our customers’ products from concept to end of life.

Plexus is passionate about being the leading EMS company in the world at servicing mid-to-low volume, higher complexity customer programs, characterized by unique flexibility, technology, quality and regulatory requirements. To deliver on our strategy, we align our operations, processes, workforce and financial metrics to create:

- A high performance, accountable organization with a talented workforce that is deeply passionate about driving growth through customer service excellence;
- Strategic growth by using customer driven, sector based go-to-market strategies; and
- Execution driven by a collaborative, customer centric culture that continuously evaluates and optimizes our business processes to strive to create shareholder value.

We operate flexible manufacturing facilities and design our processes to accommodate customers with multiple product lines and configurations. One or more uniquely configured “focus factories,” supported by a tailored supply chain and logistics solution, are designed to meet the flexibility and responsiveness needed to support customer fulfillment requirements.

We accomplish our go-to-market strategy through the four market sectors we serve. Each sector has a market sector vice president and a business development and customer management leader who together oversee and provide leadership to teams that include business development directors, customer directors or managers, supply chain and manufacturing subject matter experts, and market sector analysts. These teams maintain expertise related to each market sector and execute sector strategies aligned to that market’s unique quality and regulatory requirements.

Our market sector teams help define Plexus’ strategy for growth with a particular emphasis on expanding the value-added solutions we offer customers. Our sales and marketing efforts focus on targeting new customers and expanding business with existing customers. We believe our ability to provide a full range of product realization services gives us a business advantage.

Our financial model aligns with our business strategy. Our primary focus is to earn a return on invested capital (“ROIC”) 500 basis points over our weighted average cost of capital (“WACC”), which we refer to as “Economic Return.” We review our internal calculation of WACC annually; for fiscal 2016 our WACC was 11.0%. We believe economic profit is a fundamental driver of shareholder value. Plexus measures economic

profit by taking the difference between ROIC and WACC and multiplying it by invested capital. By exercising discipline to generate a ROIC in excess of our WACC, with focus on economic profit, our goal is to ensure that we create value for our shareholders. For more information regarding ROIC and Economic Return, non-GAAP financial measures, refer to “Management’s Discussion and Analysis of Financial Condition – Results of Operations – Return on Invested Capital (“ROIC”) and Economic Return” in Part II, Item 7. For a reconciliation of ROIC and Economic Return to our financial statements that were prepared using accounting principles generally accepted in the U.S. (“U.S. GAAP” or “GAAP”), see Exhibit 99.1 to this annual report on Form 10-K, which exhibit is incorporated herein by reference.

Relative to our competition, overriding factors such as lower manufacturing volumes, flexibility and fulfillment requirements, and complex regulatory requirements typically result in higher investments in inventory and selling and administrative costs. The cost variance from our competitors is especially evident relative to those that provide EMS services for high-volume, less complex products, with less stringent requirements (e.g., consumer electronics).

Plexus serves a diverse customer landscape that includes industry-leading, branded product companies, along with many other technology pioneering start-ups or emerging companies that may or may not maintain manufacturing capabilities. As a result of serving market sectors that rely on advanced electronics technology, our business is influenced by critical technological trends such as the level and rate of development of wired and wireless telecommunications infrastructure, communications data and data bandwidth growth, and internet usage. In addition to prime technology advancements, key government and policy trends impact our business, including the U.S. Food and Drug Administration’s (“FDA”) approval of new medical devices, defense procurement practices, and other government and regulatory processes. Plexus may benefit from increasing outsourcing trends. We provide most of our optimized solutions on a turnkey basis, and we procure some or all materials required for product assembly. We provide select services on a consignment basis, meaning the customer supplies the necessary materials and Plexus provides the labor and other services required for product assembly. In addition to manufacturing, turnkey service requires material procurement and warehousing and involves greater resource investments than consignment services. Other than certain test equipment, manufacturing equipment and software used for internal operations, we do not design or manufacture our own proprietary products.

Established in 1979 as a Wisconsin corporation, we have approximately 14,000 full-time employees, including approximately 3,100 engineers and technologists dedicated to product development and design, test equipment development and design, and manufacturing process development and control, all of whom operate from 22 active facilities, totaling approximately 3.3 million square feet. Plexus’ facilities are strategically located to support the global supply chain, engineering, manufacturing, and Aftermarket Service needs of customers in our targeted market sectors.

Plexus maintains a website at www.plexus.com. As soon as is reasonably practical, and after we electronically file or furnish all reports to the Securities and Exchange Commission (“SEC”), we provide online copies, free of charge. These reports include: Proxy Statements, Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Specialized Disclosure Reports on Form SD, and amendments to those reports. These reports are also accessible at the SEC’s website at www.sec.gov. Our Code of Conduct and Business Ethics is also posted on our website. You may access these SEC reports and the Code of Conduct and Business Ethics by following the links under “Investor Relations” at our website.

Solutions

As an integrated, fully accountable partner, we deliver optimized product realization solutions that carry our customers’ products from concept to end of life. Tailoring our Product Realization Value Stream to each product and program, Plexus provides unique solutions designed to meet the needs of each of our customers. As our partnerships grow and mature, we aim to engage our customers in full utilization of our Product Realization Value Stream.

Conceptualize. During the conceptualization phase, new product ideas are created and evaluated with both the customer's and Plexus' engineering teams. We closely collaborate with our customers to capture their new product vision and clarify requirements. Our industrial design team analyzes a product through the end user's eyes focusing on ergonomics, use case research, user interface, aesthetics and evaluation mockups. Upon completion of concept evaluations, the Plexus team prototypes what it believes to be the most promising designs, working concurrently with engineering, manufacturing and supply chain teams. Future phases ensure design intent is maintained, while realizing the final product solution.

Design. Plexus invests in the latest technology, design and automation tools to provide comprehensive design and value-engineering solutions. We engage with our customers in a variety of ways – from supporting a short-term expansion of their engineering design capabilities to collaborating on complex, turn-key product designs. Our disciplined approach and team structure enables significant project schedule flexibility via work-sharing across our organization. Product design includes, but is not limited to, the following solutions:

- Program management
- Feasibility studies
- Specification development for product features and functionality
- Circuit design (digital, microprocessor, power, analog, radio frequency (“RF”), optical and micro-electronics)
- Field programmable gate array design (“FPGA”)
- Printed circuit board layout
- Embedded software design
- Mechanical design (thermal analysis, fluidics, robotics, plastic components, sheet metal enclosures and castings)
- Test specifications development and product verification testing
- Automated (robotic) production solutions and complex automation design

Commercialize. The commercialize phase carries significant influence with respect to converting ideas into viable products. Commercialization starts early in the design phase and extends through manufacturing transition, often in tandem with Design for Excellence (“DFX”). Our DFX solutions encompass a wide collection of specific design solutions including design for test, design for manufacturability/assembly and design for fabrication. The goal of DFX is to facilitate an efficient transition from engineering to manufacturing. Commercialization also includes prototyping, new product introduction, design for supply chain, test development and transition management. We believe our commercialization solutions provide significant value by accelerating speed-to-market, reducing change activity and providing customers with a robust and manufacturable product.

Manufacture. Plexus applies an optimized manufacturing approach, not a one-size-fits-all model. Our scalable manufacturing solutions create flexibility for our customers through tailored supply chain solutions. Our focus-factory model provides a dedicated team designed to drive success that places the customer at the center of operations. Plexus focuses exclusively on mid-to-low volume, higher-complexity programs that range from lower-level assemblies to finished electro-mechanical products. Our manufactured products typically fall into one of the following categories in our assembly spectrum:

- Printed circuit board assembly – a printed circuit board (“PCB”) populated with electronic components
- Basic assembly – a sub-assembly that includes PCBs and other components

- System integration – a finished product or sub-system assembly that includes more complex components such as PCBs, basic assemblies, custom engineered components, displays, optics, metering and measurement or thermal management
- Mechatronic integration – more complex system integration that combines electronic controls with mechanical systems and processes such as motion control, robotics, drive systems, fluidics, hydraulics or pneumatics

System and mechatronic integration products may run larger in size than other assemblies; the products range from kiosks to finished healthcare devices and life sciences equipment to other complex electro-mechanical assemblies. These products often combine other integrated solutions we provide and may require unique facility configurations or supply chain solutions.

Fulfill. Plexus offers fulfillment and logistics solutions to our customers in the forms of Direct Order Fulfillment (“DOF”), Build to Order (“BTO”) and Configure to Order (“CTO”). Plexus receives DOF orders from our customers that provide the final specifications and configurations required by their end customers. Through BTO and CTO, Plexus delivers the product directly to the end customer. The DOF process relies on Enterprise Resource Planning (“ERP”) systems integrating the overall supply chain, from parts procurement through manufacturing and logistics.

Sustain. Plexus sustains our customers’ products by providing a range of Aftermarket Services, including complex repair, refurbishment and product support for products the Company manufactures. In addition, we also provide customized solutions for products we did not manufacture.

Our Aftermarket Services offerings include:

- | | | |
|--------------------------|------------------------|---|
| • Screening | • Loaner program | • Part harvesting |
| • In/Out warranty repair | • Advanced exchange | • Part repair |
| • Upgrade | • Demo unit management | • Warranty redemption |
| • Refurbishment | • Recycling | • Part fulfillment |
| • Decontamination | • Destruction | • Part fulfillment with warranty redemption |
| • Complaint handling | • Part sales | |

Regulatory requirements. All Plexus manufacturing and engineering facilities are certified to a baseline Quality Management System standard per ISO9001:2008, and currently are transitioning to the ISO9001:2015 version. We have capabilities to assemble finished medical devices meeting FDA Quality Systems Regulation requirements and similar regulatory requirements in other countries.

We have additional certifications and/or registrations held by certain facilities in the following regions:

	<u>AMER</u>	<u>APAC</u>	<u>EMEA</u>
Medical Standard ISO 13485:2003	X	X	X
21 CFR Part 820 (FDA) (Finished Medical)	X	X	X
JMGP accreditation	X	X	X
ANVISA accreditation	X		
Environmental Standard ISO - 14001	X	X	X
Environmental Standard OSHAS 18001		X	X
ANSI/ESD (Electrostatic Discharge Control Program) S20.20	X	X	
Telecommunications Standard TL 9000	X	X	
ITAR (International Traffic and Arms Regulation) self-declaration	X		
Aerospace Standard AS9100	X	X	X
NADCAP certification	X	X	X
FAR 145 certification (FAA repair station)	X		
ATEX/IECEX certification		X	X
IRIS certification (Railway)		X	

Customers and Market Sectors Served

Our customers range from large multinational companies to smaller emerging technology companies. During fiscal 2016, we served approximately 140 customers. We offer advanced design and production capabilities, allowing our customers to concentrate on their core competencies. Plexus helps accelerate our customers' time to market, reduce their investment in engineering and manufacturing capacity, and optimize total product cost.

General Electric Company ("GE"), Micron Technology, Inc. ("Micron") and ARRIS Group, Inc. ("Arris") accounted for 11.1%, 10.4%, and 10.1% respectively, of our net sales during fiscal 2016. Arris and GE accounted for 12.6% and 10.6%, respectively, of our net sales in fiscal 2015, and 12.5% and 11.2%, respectively, of our net sales in fiscal 2014. Other than Arris and GE, and Micron in fiscal 2016, no other customer accounted for 10.0% or more of our net sales in the last three fiscal years.

Net sales to our largest customers may vary from time to time depending on the size and timing of customer program commencements, terminations, delays, modifications and transitions. We generally do not obtain firm, long-term purchase commitments from our customers. Customers' forecasts can and do change as a result of changes in their end-market demand and other factors, including global economic conditions. Any material change in forecasts or orders from these major accounts, or other customers, could materially affect our results of operations. The loss of any major customer could have a significant negative impact on our financial results. In addition, as our percentage of net sales to customers in a specific sector becomes larger relative to other sectors, we will become increasingly dependent upon the economic and business conditions affecting that sector. Many of our large customers contract with us through multiple independent divisions, subsidiaries, production facilities or locations. We believe that in most cases our sales to any one such division, subsidiary, facility or location are independent of sales to others.

The distribution of our net sales by market sectors for the indicated fiscal years is shown in the following table:

<u>Industry</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
Healthcare/Life Sciences	31%	28%	29%
Industrial/Commercial	30%	26%	25%
Networking/Communications	23%	32%	32%
Defense/Security/Aerospace	16%	14%	14%
Total net sales	<u>100%</u>	<u>100%</u>	<u>100%</u>

Although our current business development focus is based on our targeted market sectors, we evaluate our financial performance and allocate our resources geographically (see Note 11 in Notes to Consolidated Financial Statements regarding our reportable segments). Plexus offers a uniform array of services for customers in each market sector and we do not dedicate operational equipment, personnel, facilities or other resources to particular market sectors, nor internally track our costs and resources per market sector.

Materials and Suppliers

We typically purchase raw materials, including PCBs and electronic components, from manufacturers and distributors. Under certain circumstances, we will purchase components from brokers, customers or competitors. The key electronic components we purchase include: specialized components (such as application-specific integrated circuits), semiconductors, interconnect products, electronic subassemblies (including memory modules, power supply modules and cable and wire harnesses), inductors, resistors and capacitors.

We also purchase non-electronic, typically custom engineered, components used in manufacturing and higher-level assembly. These components include molded/formed plastics, sheet metal fabrications, aluminum extrusions, robotics, motors, vision sensors, motion/actuation, fluidics, displays, die castings and various other hardware and fastener components. These components are sourced from both Plexus preferred suppliers and customer directed suppliers. Components range from standard to highly customized and vary widely in terms of market availability and price.

Component shortages and subsequent allocations by our suppliers are an inherent risk to the electronics industry, and have particularly been an issue for us and the industry from time to time. We discuss the causes of these shortages more fully in “Risk Factors” in Part I, Item 1A herein. We actively manage our business to minimize our exposure to material and component shortages.

The Plexus global supply chain management organization attempts to create strong supplier alliances and ensure a steady flow of components and products at competitive prices. We strive to achieve these goals through advanced supply chain solutions we develop in partnership with our customers, risk management tools and global expediting processes. Plexus can often influence the selection of new product components throughout the design phase of the Product Realization Value Stream.

Competition

Plexus operates in a highly competitive market, with a goal to be best-in-class at meeting the unique needs of our customers. We provide flexible solutions, timely order fulfillment, and strong engineering, testing and production capabilities. A number of competitors may provide electronics manufacturing and engineering services similar to Plexus. Others may be more established in certain industry sectors, or have greater financial, manufacturing or marketing resources. Smaller competitors compete mainly in specific sectors and within limited geographic areas. Plexus occasionally competes with in-house capabilities of current and potential customers. Plexus maintains awareness and knowledge of our competitors’ capabilities, in order to remain highly competitive within the broad scope of the EMS industry.

Intellectual Property

We own various service marks that we use in our business, which are registered in the trademark offices of the United States and other countries. Although we own certain patents, they are not currently material to our business. We do not have any material copyrights.

Information Technology

Our integrated ERP, warehouse management and shop floor control systems serve all of our manufacturing sites, providing a core set of consistent, global business applications. This consistency augments our other management

information systems, allowing us to standardize our ability to translate data from multiple production facilities into operational and financial information. The related software licenses are of a general commercial character on terms customary for these types of agreements.

Environmental Compliance

We are subject to a variety of environmental regulations relating to air emission standards and the use, storage, discharge and disposal of hazardous chemicals used during our manufacturing process. We believe that we are in compliance with all federal, state and foreign environmental laws and do not anticipate any significant expenditures in maintaining our compliance; however, there can be no assurance that violations will not occur which could have a material adverse effect on our financial results.

Social Responsibility

Plexus is committed to social responsibility throughout our global business operations. Our commitment to social responsibility extends to human rights, labor practices, the environment, worker health and safety, fair operating practices and the Company's social impact in the communities where we operate. We consider a variety of standards for socially responsible practices, including local and federal legal requirements in the jurisdictions where we operate, the International Organization for Standardization's "Guidance on Social Responsibility" (ISO 26000) and standards established by the Electronics Industry Citizenship Coalition (the "EICC"). Plexus is a member of the EICC. Information about our corporate social responsibility efforts is available on our website at www.plexus.com/about-us/social-responsibility.

Employees

We make a considerable effort to maintain a highly-qualified and engaged work force. We have been able to offer enhanced career opportunities to many of our employees. Our human resources department identifies career objectives and monitors specific skill development opportunities for employees with potential for advancement. We invest at all levels of the organization to ensure that employees are well trained and qualified for their positions. We have a policy of involvement and consultation with employees at every facility and strive for continuous improvement at all levels.

We employ approximately 14,000 full-time employees. Given the quick response times required by our customers, we seek to maintain flexibility to scale our operations as necessary to maximize efficiency. To do so we use skilled temporary labor in addition to our full-time employees. Approximately 230 and 650 of our employees are covered by union agreements in the United Kingdom and Mexico, respectively. These union agreements are typically renewed at the beginning of each year, although in a few cases these agreements may last two or more years. Our employees in China, Germany, Malaysia, Romania and the United States are not covered by union agreements. We have no history of labor disputes at any of our facilities, and we believe that our employee relationships are generally positive and stable.

ITEM 1A. RISK FACTORS

Our net sales and operating results may vary significantly from period to period.

Our quarterly and annual results may vary significantly depending on various factors, many of which are beyond our control. These factors include:

- the volume and timing of customer demand relative to our capacity
- the life-cycle of our customers' technology-dependent products
- customers' operating results and business conditions
- changes in our, and our customers', sales mix, as well as the volatility of these changes

- variations in sales and margins among geographic regions and market sectors
- varying gross margins among different programs, including as a result of pricing concessions to certain customers
- failure of our customers to pay amounts due to us
- claims alleging defective goods or services or breaches of contractual requirements
- challenges associated with the engagement of new customers or additional programs or services for existing customers
- customer disengagements
- the timing of our expenditures in anticipation of future orders
- our effectiveness in planning and executing production, and managing inventory, fixed assets and manufacturing processes
- changes in the cost and availability of labor and components
- changes in exchange rates, and
- changes in U.S. and global economic and political conditions and world events.

The majority of our net sales come from a relatively small number of customers and a limited number of market sectors; if we lose any of these customers or if there are challenges in those market sectors, our net sales and operating results could decline significantly.

Net sales to our ten largest customers have represented a majority of our net sales in recent periods. Our ten largest customers accounted for 58.8% of our net sales for the fiscal year ended October 1, 2016, and 56.1% of our net sales for the fiscal year ended October 3, 2015. During the fiscal years ended October 1, 2016 and October 3, 2015, there were three and two customers, respectively, that each represented 10.0% or more of our net sales.

Our major customers may vary from period to period, and our major customers may not continue to purchase services from us at current levels, or at all, particularly given the volatile nature of certain programs. We have experienced from time to time, and in the future may experience, significant customer or program disengagements and the end of life of significant programs. Especially given our discrete number of customers, significant reductions in net sales to any of our major customers, the loss of major customers or our failure to make appropriate choices as to the customers we serve could seriously harm our business and results of operations.

In addition, we focus our sales efforts on customers in only a few market sectors. Each of these sectors is subject to macroeconomic conditions as well as trends and conditions that are sector specific. Economic, business or regulatory conditions that affect the sector, or the Company's failure to choose appropriate sectors, can particularly impact Plexus. For instance, sales in the Healthcare/Life Sciences sector are substantially affected by trends in the healthcare industry, such as government reimbursement rates and uncertainties relating to the financial health of, and pending changes in the structure of, the U.S. health care sector generally, including as a result of the Patient Protection and Affordable Care Act (the "Affordable Care Act").

Further, potential reductions in U.S. government agency spending, including those due to budget cuts or other political developments or issues, could affect opportunities in all of our market sectors. Any weakness in our customers' end markets could affect our business and results of operations.

We rely on timely and regular payments from our customers; therefore, deterioration in the payment experience with or credit quality of our major customers could have a material adverse effect on our financial condition and

results of operations. The inability or failure of our major customers to meet their obligations to us or their bankruptcy, insolvency or liquidation may adversely affect our business, financial condition and results of operations.

From time to time, our customers, including formerly major customers, have been affected by merger and acquisition activity. While these transactions may present Plexus with opportunities to capture new business, they also create the risk that these customers will partially reduce their purchases or completely disengage from us as a result of transitioning such business to Plexus' competitors or deciding to manufacture the products internally.

Plexus is a multinational corporation and operating in multiple countries exposes us to increased risks, including adverse local developments and currency risks.

We have operations in many countries; operations outside of the U.S. in the aggregate represent a majority of our net sales and operating income, with a particular concentration in Malaysia. In addition, a significant amount of our cash balances are currently held outside of the U.S., with a particular concentration in Malaysia. We also purchase a significant number of components manufactured in various countries. These international aspects of our operations, which are likely to increase over time, subject us to the following risks that could materially impact our operations and operating results:

- economic, political or civil instability
- transportation delays or interruptions
- exchange rate fluctuations
- potential disruptions or restrictions on our ability to access cash amounts held outside of the U.S.
- changes in labor markets, such as government-mandated wage increases, limitations on immigration or restrictions on the use of migrant workers, and difficulties in appropriately staffing and managing personnel in diverse cultures
- compliance with laws, such as the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act and the E.U. General Data Protection Regulation, applicable to companies with global operations
- changes in the taxation of earnings both in the U.S. and in other countries
- reputational risks related to, among other factors, varying standards and practices among countries
- changes in duty rates
- significant natural disasters and other events or factors impacting local infrastructure
- the impact of the United Kingdom's decision to exit from the European Union ("Brexit")
- the effects of other international political developments, such as embargoes, sanctions, boycotts, energy disruptions, trade agreements (including the proposed Trans-Pacific Partnership) and changes in trade policies (including as a result of the 2016 U.S. presidential election), and
- regulatory requirements and potential changes to those requirements.

We continue to monitor our risk associated with foreign currency and have entered into limited forward contracts to address this risk. As our international operations expand, our failure to appropriately address foreign currency transactions or the currency exposures associated with assets and liabilities denominated in non-functional currencies could adversely affect our consolidated financial condition, results of operations and cash flows. In addition, developments affecting particular countries can adversely affect our ability to access cash or other assets held in such countries.

A significant portion of our operations currently occurs in, and cash balances are held in, the APAC region, particularly in Malaysia. The concentration of our operations, assets and profitability in that region exposes us to adverse developments, economic, political or otherwise, in those countries.

Changes in policies by the U.S. or other governments could negatively affect our operating results due to changes in duties, tariffs or taxes, or limitations on currency or fund transfers, as well as government-imposed restrictions on producing certain products in, or shipping them to, specific countries. For example, our facility in Mexico operates under the Mexican Maquiladora (“IMMEX”) program. This program provides for reduced tariffs and eased import regulations. We could be adversely affected by changes in the IMMEX program or our failure to comply with its requirements.

Our customers do not make long-term commitments and may cancel or change their production requirements.

Companies in our industry must respond quickly to the requirements of their customers in both design and production. We generally do not obtain firm, long-term purchase commitments from our customers, and frequently do not have visibility as to their future demand. Customers also cancel requirements, change engineering or other service requirements, change production quantities, delay production or revise their forecasts for a number of reasons that are beyond our control. The success of our customers’ products in the market and the strength of the markets themselves affect our business. Cancellations, reductions or delays by a significant customer, or by a group of customers, could seriously harm our operating results and negatively affect our working capital levels. Such cancellations, reductions or delays have occurred from time to time and may continue to occur in the future.

In addition, we make significant decisions based on our estimates of customers’ requirements, including determining the levels of business that we will seek and accept, production schedules, component procurement commitments, working capital management, facility and capacity requirements, personnel needs and other resource requirements. The short-term nature of our customers’ commitments and the possibility of rapid changes in demand for their products reduce our ability to accurately estimate their future requirements. Because certain of our operating expenses are fixed, a reduction in customer demand can harm our operating results. Moreover, because our margins vary across customers and specific programs, a reduction in demand with higher margin customers or programs will have a more significant adverse effect on our operating results.

Rapid increases in customer requirements may stress personnel and other capacity resources. We may not have sufficient resources at any given time to meet all of our customers’ demands or to meet the requirements of a specific program, which could result in a loss of business from such customers.

We have a complex business model, and our failure to properly manage or execute on that model, as well as an inability to maintain our engineering, technological and manufacturing process expertise, could adversely affect our operations, financial results and reputation.

Our business model focuses on products and services in the mid-to-lower-volume, higher-complexity segment of our industry. Our customers’ products typically require significant production and supply-chain flexibility, in some cases necessitating optimized demand-pull-based manufacturing and supply chain solutions across an integrated global platform. The products we manufacture are also typically complex, heavily regulated, and require complicated configuration management and direct order fulfillment capabilities to global end customers. In addition, we offer Aftermarket Services to our customers, which add to the complexity of our business model. Our business model requires a great degree of attention, flexibility and resources. These resources include working capital, management and technical personnel, and the development and maintenance of systems and procedures to manage diverse manufacturing, regulatory and service requirements for multiple programs of varying sizes simultaneously, including in multiple locations and geographies. We also depend on securing and ramping new customers and programs and on transitioning production for new customers and programs, which creates added complexities related to managing the start-up risks of such projects, especially for companies that did not previously outsource such activities.

The complexity of our service model, which encompasses a broad range of services including conceptualization, design, commercialization, manufacturing, fulfillment and Aftermarket Services, often results in complex and

challenging contractual obligations as well as commitments from us to our customers. If we fail to meet those obligations, it could result in claims against us or adversely affect our reputation and our ability to obtain future business, as well as impair our ability to enforce our rights (including those related to payment) under those contracts.

If we fail to effectively manage or execute our business model, we may lose customer confidence and our reputation may suffer. The Company's reputation is the foundation of our relationships with key stakeholders. If we are unable to effectively manage real or perceived issues, which could negatively impact sentiments toward the Company, our ability to maintain or expand business opportunities could be impaired and our financial results could suffer on a going-forward basis.

Many of the markets for our manufacturing, engineering, aftermarket and other services are characterized by rapidly changing technology and evolving process developments. Our internal processes are also subject to these factors. The continued success of our business will depend upon our continued ability to:

- retain our qualified engineering and technical personnel, and attract additional qualified personnel
- maintain and enhance our technological capabilities
- choose and maintain appropriate technological and service capabilities
- successfully manage the implementation and execution of information systems
- develop and market services that meet changing customer needs
- effectively execute our services and perform to our customers' expectations, and
- successfully anticipate, or respond to, technological changes on a cost-effective and timely basis.

Although we believe that our operations utilize the assembly and testing technologies, equipment and processes that are currently required by our customers, we cannot be certain that we will maintain or develop the capabilities required by our customers in the future. The emergence of new technologies, industry standards or customer requirements may render our equipment, inventory or processes obsolete or noncompetitive. In addition, we may have to acquire new design, assembly and testing technologies and equipment to remain competitive. The acquisition and implementation of new technologies and equipment, and the offering of new or additional services to our customers, may require significant expense or capital investment that could reduce our liquidity and negatively affect our operating results. Our failure to anticipate and adapt to our customers' changing technological needs and requirements, or to perform to their expectations or standards, as well as our need to maintain our personnel and other resources during times of fluctuating demand, could have an adverse effect on our business.

Our products and services are for end markets that require technologically advanced products.

Factors affecting the technology-dependent end markets that we serve could adversely affect our customers and, as a result, Plexus. These factors include:

- the inability of our customers to adapt to rapidly changing technologies and evolving industry standards that can result in short product life-cycles
- the inability of our customers to develop and market their products, some of which are new and untested
- the potential that our customers' products may become obsolete, and
- the potential failure of our customers' products to gain widespread commercial acceptance.

Even if our customers successfully respond to these market challenges, their responses, including any consequential changes we must make in our business relationships with them and our production for, or services offered to, them, can affect our production cycles, inventory management and results of operations.

Challenges associated with the engagement of new customers or programs, or the provision of new services, could affect our operations and financial results.

Our engagement with new customers, as well as the addition of new programs or types of services (including expansion of our Aftermarket Services capabilities) for existing customers, can present challenges in addition to opportunities. We must initially determine whether it would be in our interests from a business perspective to pursue a particular potential new customer, program or service, including evaluating the customer's, program's or service's fit with our value proposition as well as its potential end-market success. If we make the decision to proceed, we need to ensure that our terms of engagement, including our pricing and other contractual provisions, appropriately reflect the anticipated costs, risks and rewards. The failure to make prudent engagement decisions or to establish appropriate terms of engagement could adversely affect our profitability and margins.

Also, there are inherent risks associated with the timing and ultimate realization of a new program's or service's anticipated revenue; these factors can sometimes extend for a significant period. Some new programs or services require us to devote significant capital and personnel resources to new technologies and competencies. We may not meet customer expectations, which could damage our relationships with the affected customers and impact our ability to deliver conforming product or services on a timely basis. Further, the success of new programs may depend heavily on factors such as product reliability, market acceptance, regulatory approvals or economic conditions. The failure of a new program to meet expectations on these factors, or our inability to effectively execute on a new program's or service's requirements, could result in lost financial opportunities and adversely affect our results of operations.

Start-up costs and inefficiencies related to new, recent or transferred programs can adversely affect our operating results.

In recent years, our revenue growth has been more heavily dependent on ramping new program wins as compared to end-market growth of mature programs. The management of resources in connection with the establishment of new or recent programs and customer relationships, as well as program transfers between facilities and geographies, and the need to estimate required resources in advance of production can adversely affect our gross and operating margins and level of working capital. These factors are particularly evident in the early stages of the life-cycle of new programs, which typically lack a track record of order volume and timing as well as production efficiencies in the early stages. We typically manage multiple new programs at any given time; therefore, we are exposed to these factors in varying magnitudes. In addition, if any of these programs or customer relationships were terminated, our operating results could be negatively impacted, particularly in the short-term.

The effects of these start-up costs and inefficiencies can also occur when we transfer programs between locations and geographies. We conduct these transfers on a regular basis to meet customer needs, seek long-term efficiencies or respond to market conditions, as well as due to facility openings and closures. Although we try to minimize the potential losses arising from transitioning customer programs between our facilities and geographies, there are inherent risks that such transitions can result in operational inefficiencies and the disruption of programs and customer relationships.

While these factors tend to affect new, recent or transferred programs, they can also impact more mature, or maturing programs and customer relationships, especially programs where end-market demand can be somewhat volatile.

Changes in tax laws, potential tax disputes, negative or unforeseen tax consequences or further developments affecting our deferred tax assets could adversely affect our results.

The Company's effective tax rate is highly dependent upon the geographic mix of earnings across the jurisdictions where we operate. Changes in tax laws or tax rates in those jurisdictions could have a material impact on our operating results. The Company's effective tax rate may also be impacted by tax holidays and

other various tax credits granted by local taxing authorities. All incentives, including a tax holiday granted to our Malaysian subsidiary, are subject to certain terms and conditions. While we expect to comply with these conditions, we would experience adverse tax consequences if we are found to not be in compliance or if the terms and conditions of the tax holiday are unfavorably altered by the local taxing authorities.

The Company's taxable income in any jurisdiction is dependent upon the local taxing authority's acceptance of our operational and intercompany transfer pricing practices as being at "arm's length." Due to inconsistencies among jurisdictions in the application of the arm's length standard, the Company's transfer pricing methods may be challenged and, if not upheld, could increase our income tax expense. Risks associated with transfer pricing adjustments are further highlighted by the global initiative from the Organisation for Economic Cooperation and Development ("OECD") called the Base Erosion and Profit Shifting ("BEPS") project. The BEPS project is challenging longstanding international tax norms regarding the taxation of profits from cross-border business. Given the scope of the Company's international operations and the fluid and uncertain nature of how the BEPS project might ultimately lead to future legislation, it is difficult to assess how any changes in tax laws would impact the Company's income tax expense.

The Company reviews the probability of the realization of our net deferred tax assets each period based on forecasts of taxable income by jurisdiction. This review uses historical results, projected future operating results based upon approved business plans, eligible carryforward periods, tax planning opportunities and other relevant considerations. Adverse changes in the profitability and financial outlook in each of our jurisdictions may require the creation of an additional valuation allowance to reduce our net deferred tax assets. Such changes could result in material non-cash expenses in the period in which the changes are made.

Failure to manage periods of growth or contraction may seriously harm our business.

Our industry frequently sees periods of expansion and contraction to adjust to customers' needs and market demands. We regularly contend with these issues and must carefully manage our business to meet customer and market requirements. If we fail to manage these growth and contraction decisions effectively, as well as fail to realize the anticipated benefits of these decisions, we can find ourselves with either excess or insufficient resources and our business, as well as our profitability, may suffer.

Expansion and consolidation, including the transfer of operations to larger facilities or acquisitions, can inherently include additional costs and start-up inefficiencies. In fiscal 2016, we ceased volume manufacturing at a facility in Livingston, Scotland and closed our Fremont, California facility, moving customer programs from those sites to other Plexus facilities. If we are unable to effectively manage our recent or future expansions and consolidations, or related anticipated net sales are not realized, our operating results could be adversely affected. In addition, we may expand our operations in new geographical areas where currently we do not operate. Other risks of current or future expansions, acquisitions and consolidations include:

- the inability to successfully integrate additional facilities or incremental capacity and to realize anticipated efficiencies, economies of scale or other value
- challenges faced as a result of transitioning programs
- incurrence of restructuring or other charges that may be insufficient or may not have their intended effects
- additional fixed or other costs, or selling, general and administrative ("SG&A") expenses, which may not be fully absorbed by new business
- a reduction of our return on invested capital, including as a result of excess inventory or excess capacity at new facilities, as well as the increased costs associated with opening new facilities
- difficulties in the timing of expansions, including delays in the implementation of construction and manufacturing plans

- diversion of management's attention from other business areas during the planning and implementation of expansions
- strain placed on our operational, financial and other systems and resources, and
- inability to locate sufficient customers, employees or management talent to support the expansion.

Periods of contraction or reduced net sales, or other factors affecting particular sites, create other challenges. We must determine whether facilities remain viable, whether staffing levels need to be reduced, and how to respond to changing levels of customer demand. While maintaining excess capacity or higher levels of employment entail short-term costs, reductions in capacity or employment could impair our ability to respond to new opportunities and programs, market improvements or to maintain customer relationships. Our decisions to reduce costs and capacity can affect our short-term and long-term results. When we make decisions to reduce capacity or to close facilities, we frequently incur restructuring charges, as we did in fiscal 2016 related to the actions discussed above and in fiscal 2015 and fiscal 2014 in connection with the replacement of facilities in the U.S. and Mexico.

In addition, to meet our customers' needs, particularly when the production requirements of certain products are site-specific, or to achieve increased efficiencies, we sometimes require additional capacity in one location while reducing capacity in another. Since customers' needs and market conditions can vary and change rapidly, we may find ourselves in a situation where we simultaneously experience the effects of contraction in one location and expansion in another location. We may also encounter situations where our lack of a physical presence in certain locations may limit or foreclose opportunities.

An inability to successfully manage the procurement, development, implementation or execution of information systems, or to adequately maintain these systems and their security, as well as to protect data and other confidential information, may adversely affect our business and reputation.

As a global company with a complex business model, we are heavily dependent on our information systems to support our customers' requirements and to successfully manage our business. Any inability to successfully manage the procurement, development, implementation, execution or maintenance of our information systems, including matters related to system and data security, privacy, reliability, compliance, performance and access, as well as any inability of these systems to fulfill their intended purpose within our business, could have an adverse effect on our business.

In the ordinary course of business, we collect and store sensitive data and information, including our proprietary and regulated business information and that of our customers, suppliers and business partners, as well as personally identifiable information about our employees. Our information systems, like those of other companies, are susceptible to malicious damage, intrusions and outages due to, among other events, viruses, cyber threats, industrial espionage (internal or external), hacking, break-ins and similar events, other breaches of security, natural disasters, power loss or telecommunications failures. We have taken steps to maintain adequate data security and address these risks and uncertainties by implementing security technologies, internal controls, network and data center resiliency, redundancy and recovery processes, as well as by purchasing insurance; however, these measures may be inadequate. Any operational failure or breach of security from increasingly sophisticated cyber threats could lead to the loss or disclosure of our or our customers' financial, product or other confidential information, result in adverse regulatory or other legal actions and have a material adverse effect on our business and reputation.

Brexit and related negative developments in the European Union could adversely affect our business and financial results.

In June 2016, the United Kingdom voted to exit the European Union, which resulted in significant currency exchange rate fluctuations and volatility late in fiscal 2016. The British government is expected to commence negotiations related to the terms of Brexit. Given the lack of comparable precedent, the implications of Brexit, or how such implications might affect the Company, are unclear at this time. Brexit could, among other impacts,

disrupt trade and the movement of goods, services and people between the United Kingdom and the European Union or other countries, disrupt the stability of the European Union generally, as well as create legal and global economic uncertainty. These and other potential implications could adversely affect the Company's business and financial results.

In the Brexit referendum, Scotland voted to remain in the European Union, while England and Wales voted to exit. The disparity may renew the Scottish independence movement. Political issues and a potential breakup of the United Kingdom could create legal and economic uncertainty in the region and have a material adverse effect on the Company, which has operations in Scotland.

We and our customers are subject to increasingly extensive government regulations and industry standards; a failure to comply with current and future regulations and standards could have an adverse effect on our business, customer relationships, reputation and profitability.

We are subject to extensive government regulation and industry standards (as well as customer-specific standards) relating to the products we design and manufacture as well as how we conduct our business, including regulations and standards relating to labor and employment practices, workplace health and safety, the environment, sourcing and import/export practices, the market sectors we support and many other facets of our operations. The regulatory climate in the U.S. and other countries has become increasingly complex and fragmented, and regulatory activity has increased in recent periods. A failure to comply with such regulations or standards could have an adverse effect on our reputation, customer relationships, profitability and results of operations.

As a publicly-held company, we are subject to increasingly stringent laws, regulations and other requirements, including those affecting, among other areas, our accounting, internal controls, data protection, corporate governance practices, securities disclosures and reporting.

Governments worldwide are becoming increasingly aggressive in adopting and enforcing anti-corruption laws. The U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act, among others, apply to us and our operations.

The Affordable Care Act significantly affects the provision of both health care services and benefits in the U.S. and is expected to impact our cost of providing our employees and retirees with health insurance or benefits, and may also impact various other aspects of our business.

Our Healthcare/Life Sciences sector is subject to statutes and regulations covering the design, development, testing, manufacturing and labeling of medical devices and the reporting of certain information regarding their safety, including Food and Drug Administration ("FDA") regulations and similar regulations in other countries. Failure to comply with these regulations can result in, among other things, fines, injunctions, civil penalties, criminal prosecution, recall or seizure of devices, or total or partial suspension of production.

We also design and manufacture products for customers in the defense, security and aerospace industries. Companies that design and manufacture products for these industries face significant regulation by the Department of Defense, Department of State, Department of Commerce, Federal Aviation Authority, and other governmental agencies in the U.S. as well as in other countries, and also under the Federal Acquisition Regulation.

In addition, whenever we pursue business in new sectors and subsectors, or our customers pursue new technologies or markets, we need to navigate the potentially heavy regulatory and legislative burdens of such sectors, technologies or markets.

The regulatory climate can itself affect the demand for our services. For example, government reimbursement rates and other regulations, as well as the financial health of health care providers, and pending changes in how health care in the U.S. is structured, including as a result of the Affordable Care Act, and how medical devices

are taxed, could affect the willingness and ability of end customers to purchase the products of our customers in this sector as well as impact our margins.

Our customers are also required to comply with various government regulations, legal requirements and industry standards, including many of the industry-specific regulations discussed above. Our customers' failure to comply could affect their businesses, which in turn would affect our sales to them. In addition, if our customers are required by regulation or other requirements to make changes in their product lines, these changes could significantly disrupt particular programs for these customers and create inefficiencies in our business.

A failure to comply with customer-driven policies and standards, and third party certification requirements or standards, including those related to social responsibility, could adversely affect our business and reputation.

In addition to government regulations and industry standards, our customers may require us to comply with their own social responsibility, conflict minerals, quality or other business policies or standards, which may be more restrictive than current laws and regulations as well as our pre-existing policies, before they commence, or continue, doing business with us. Such policies or standards may be customer-driven, established by the industry sectors in which we operate or imposed by third party organizations. The Company is a member of the EICC. The EICC is a non-profit coalition of electronics companies and establishes standards for its members in responsible and ethical practices in the areas of labor, environmental compliance, employee health and safety, ethics and social responsibility.

Our compliance with these policies, standards and third party certification requirements could be costly, and our failure to comply could adversely affect our operations, customer relationships, reputation and profitability. In addition, our adoption of these standards could adversely affect our cost competitiveness, ability to provide customers with required service levels and ability to attract and retain employees in jurisdictions where these standards vary from prevailing local customs and practices.

There may be problems with the products we design or manufacture that could result in liability claims against us, reduced demand for our services and damage to our reputation.

The products that we design or manufacture may be subject to liability or claims in the event that defects are discovered or alleged. We design and manufacture products to our customers' specifications, many of which are highly complex, and produce products for industries, such as health care, defense and aerospace, that tend to have higher risk profiles. Despite our quality control and quality assurance efforts, problems may occur, or may be alleged, in the design or manufacturing of these products, including as a result of business continuity issues. Whether or not we are responsible, problems in the products we manufacture, whether real or alleged, whether caused by faulty customer specifications, the design or manufacturing processes or a component defect, may result in delayed shipments to customers or reduced or canceled customer orders. If these problems were to occur in large quantities or too frequently, our business reputation may also be tarnished. In addition, such problems may result in liability claims against us, whether or not we are responsible. These potential claims may include damages for the recall of a product or injury to person or property.

Even if customers or third parties, such as component suppliers, are responsible for defects, they may not, or may not be able to, assume responsibility for any such costs or required payments to us. While we seek to insure against many of these risks, insurance coverage may be inadequate, not cost effective or unavailable, either in general or for particular types of products or issues. We occasionally incur costs defending claims, and any such disputes could adversely affect our business relationships.

Intellectual property infringement claims against our customers or us could harm our business.

Our design and manufacturing services and the products offered by our customers involve the creation and use of intellectual property rights, which subject us and our customers to the risk of claims of intellectual property

infringement from third parties. In addition, our customers may require that we indemnify them against the risk of intellectual property infringement. If any claims are brought against us or our customers for infringement, whether or not these have merit, we could be required to expend significant resources in defense of those claims. In the event of an infringement claim, we may be required to spend a significant amount of money to develop non-infringing alternatives or obtain licenses. We may not be successful in developing alternatives or obtaining licenses on reasonable terms or at all. Infringement by our customers could cause them to discontinue production of some of their products, potentially with little or no notice, which may reduce our net sales to them and disrupt our production.

Additionally, if third parties on whom we rely for products or services, such as component suppliers, are responsible for an infringement (including through the supply of counterfeit parts), we may or may not be able to hold them responsible and we may incur costs in defending claims or providing remedies. Such infringements may also cause our customers to abruptly discontinue selling the impacted products, which would adversely affect our net sales of those products, and could affect our customer relationships more broadly. Similarly, claims affecting our suppliers could cause those suppliers to discontinue selling materials and components upon which we rely.

Increased competition may result in reduced demand or reduced prices for our services.

Our industry is highly competitive. We compete against numerous providers with global operations, as well as those which operate on only a local or regional basis. In addition, current and prospective customers continually evaluate the merits of designing and manufacturing products internally and may choose to design or manufacture products themselves rather than outsource such activities. Consolidations and other changes in our industry may result in a changing competitive landscape.

Our competitors may:

- respond more quickly than us to new or emerging technologies
- have greater name recognition, critical mass and geographic and market presence
- be better able to take advantage of acquisition opportunities
- adapt more quickly to changes in customer requirements
- have lower internal cost structures
- have greater direct buying power with component suppliers, distributors and raw material suppliers
- devote greater resources to the development, promotion and sale of their services and execution of their strategy, and
- be better positioned to compete on price for their services.

Our manufacturing processes are generally not subject to significant proprietary protection, and companies with greater resources or a greater market presence may enter our market or otherwise become increasingly competitive. Increased competition could result in significant price reductions, reduced sales and margins, or loss of market share.

Our services involve inventory risk.

Most of our services are provided on a turnkey basis, under which we purchase some, or all, of the required materials and components based on customer forecasts or orders. Suppliers may require us to purchase materials and components in minimum order quantities that may exceed customer requirements. A customer's cancellation, delay or reduction of forecasts or orders can also result in excess inventory or additional expense to us. Engineering changes by a customer may result in obsolete materials or components. While we attempt to cancel, return or otherwise mitigate excess and obsolete inventory and require customers to reimburse us for

these items, we may not actually be reimbursed timely or be able to collect on these obligations. Excess or obsolete inventory, or other failures to manage our working capital, could adversely affect our operating results, including our return on invested capital.

In addition, we provide managed inventory programs for some of our customers under which we hold and manage finished goods or work-in-process inventories. These managed inventory programs result in higher inventory levels, further reduce our inventory turns and increase our financial exposure with such customers. Even though our customers generally have contractual obligations to purchase such inventories from us, we remain subject to the risk of enforcing those obligations.

We may experience raw material and component shortages and price fluctuations.

We generally do not have long-term supply agreements. We have experienced, and in the future may experience, raw material and component shortages due to supplier capacity constraints or their failure to deliver. We also could experience disruptions in energy supplies. Such constraints can also be caused by world events, such as government policies, terrorism, armed conflict, natural disasters, economic recession and other localized events. We rely on a limited number of suppliers for many of the raw materials and components used in the assembly process and, in some cases, may be required to use suppliers that are the sole provider of a particular raw material or component. Such suppliers may encounter quality problems, labor disputes, financial difficulties or business continuity issues that could preclude them from delivering raw materials or components timely or at all. Supply shortages and delays in deliveries of raw materials or components have in some cases resulted in delayed production of assemblies, which have increased our inventory levels and adversely affected our operating results in certain periods. An inability to obtain sufficient inventory on a timely basis could also harm relationships with our customers.

In addition, raw materials and components that are delivered to us may not meet our specifications or other quality criteria. Certain materials provided to us may be counterfeit or violate the intellectual property rights of others. The need to obtain replacement materials and parts may negatively affect our manufacturing operations. The inadvertent use of any such parts or products may also give rise to liability claims.

Raw material and component supply shortages and delays in deliveries can also result in increased pricing. While many of our customers permit quarterly or other periodic adjustments to pricing based on changes in raw material or component prices and other factors, we may bear the risk of price increases that occur between any such repricing or, if such repricing is not permitted, during the balance of the term of the particular customer contract. Conversely, as a result of our pricing strategies and practices, raw material and component price reductions have contributed positively to our operating results in the past. Our inability to continue to benefit from such reductions in the future could adversely affect our operating results.

We depend on our workforce, including certain key personnel, and the loss of key personnel or other personnel disruptions, including the inability to hire and retain sufficient personnel, may harm our business.

Our success depends in large part on the continued services of our key management and technical personnel, and on our ability to attract, develop and retain qualified employees, particularly highly skilled design, process and test engineers involved in the development of new products and processes and the manufacture of products. The competition for these individuals is significant, and the loss of key employees could harm our business.

From time to time, there are changes and developments, such as retirements, promotions, transitions, disability, death and other terminations of service that affect our executive officers and other key employees. For example, in September 2016, our Chief Executive Officer retired and was succeeded by our former Chief Operating Officer pursuant to a previously announced succession plan, and in October 2016, we appointed a new Chief Operating Officer. Transitions or other changes in responsibilities among officers and key employees,

particularly those that are unplanned, inherently can cause disruptions to our business and operations, which could have an effect on our results.

We also depend on good relationships with our workforce generally. Any disruption in our relationships with our personnel, including as a result of potential union organizing activities, work actions or other labor issues, could substantially affect our operations and results.

In addition, when we expand operations in either existing areas or new locations, including internationally, we need to attract and retain the services of sufficient qualified personnel to conduct those operations. If we fail to retain and maintain sufficient qualified personnel, the operations at those locations, and consequently our financial results, could be adversely affected. In new or existing facilities we may be subject to local labor practices or union activities, wage pressure and changing wage requirements, increasing health care costs, differing employment laws and regulations in various countries, local competition for employees, restrictions on labor mobility as well as high turnover, and other issues affecting our workforce, all of which could affect operations at particular locations, which also could have adverse effects on our operational results. As noted above, our adoption of certain third-party standards could adversely affect our ability to attract and retain employees in jurisdictions where these standards vary from prevailing local customs and practices.

Natural disasters, breaches of security and other events outside our control, and the ineffective management of such events, may harm our business.

Some of our facilities are located in areas that may be impacted by natural disasters, including tornadoes, hurricanes, earthquakes, water shortages, tsunamis and floods. For example, in late 2016, we suffered losses, primarily inventory-related, at our facility in Xiamen, China as a result of a typhoon. All facilities are subject to other natural or man-made disasters such as those related to global climate change, fires, acts of terrorism or war, breaches of security, theft or espionage, and failures of utilities. If such an event was to occur, our business could be harmed due to the event itself or due to our inability to effectively manage the effects of the particular event. Potential harms include the loss of business continuity, the loss of business data and damage to infrastructure.

In addition, some of our facilities possess certifications necessary to work on specialized products that our other locations lack. If work is disrupted at one of these facilities, it may be impractical or we may be unable to transfer such specialized work to another facility without significant costs and delays. Thus, any disruption in operations at a facility possessing specialized certifications could adversely affect our ability to provide products and services to our customers, and thus negatively affect our relationships and financial results.

Although we have implemented policies and procedures with respect to physical security, we remain at risk of unauthorized access to our facilities and the possible unauthorized use or theft of inventory, information or other physical assets. If unauthorized persons gain physical access to our facilities, or our physical assets or information are stolen or used in an unauthorized manner (whether through outside theft or industrial espionage), we could be subject to, among other consequences, negative publicity, governmental inquiry and oversight, loss of government contracts, litigation by affected parties or other future financial obligations related to the loss, misuse or theft of our or our customers' data, inventory or physical assets, any of which could have a material adverse effect on our reputation and results of operations.

We may fail to secure or maintain necessary additional financing or capital.

We cannot be certain that our existing credit facilities will provide all of the financing capacity that we will need in the future or that we will be able to change the credit facilities or revise covenants, if necessary, to accommodate changes or developments in our business and operations. In addition, if we do not comply with the covenants under our credit agreement, our ability to borrow under that facility would be adversely affected. In addition, it is possible that counterparties to our financial agreements, including our credit agreement and our interest rate swap agreements, may not be willing or able to meet their obligations, either due to instability in the global financial markets or otherwise.

Our future success may depend on our ability to obtain additional financing and capital to support possible future growth and future initiatives. In fiscal 2016, we amended our revolving credit facility to increase its capacity by \$35 million to \$300 million, with the potential to increase capacity to \$500 million with the approval of the lenders. In addition, we also have a receivables factoring program. Many of our borrowings are at variable interest rates and therefore our interest expense is subject to increase if rates, including LIBOR, increase. We may seek to raise capital by issuing additional common stock, other equity securities or debt securities, modifying our existing credit facilities or obtaining new facilities, or through a combination of these methods.

We may not be able to obtain capital when we want or need it, and capital may not be available on satisfactory terms. If we issue additional equity securities or convertible securities to raise capital, it may be dilutive to shareholders' ownership interests; we may not be able to offer our securities on attractive or acceptable terms in the event of volatility or weakness in our stock price. Furthermore, any additional financing may have terms and conditions that adversely affect our business, such as restrictive financial or operating covenants, and our ability to meet any current or future financing covenants will largely depend on our financial performance, which in turn will be subject to general economic conditions and financial, business and other factors.

We may fail to successfully complete future acquisitions, as well as strategic arrangements, and may not successfully integrate acquired businesses or recognize the anticipated benefits, which could adversely affect our operating results.

We have previously grown, in part, through acquisitions and strategic arrangements. If we were to pursue future growth through acquisitions or similar transactions, this would involve significant risks that could have a material adverse effect on us. These risks include:

Operating risks, such as:

- the inability to integrate successfully our acquired operations' businesses, systems and personnel
- the inability to realize anticipated synergies, economies of scale or other value
- the difficulties in scaling up production and coordinating management of operations at new sites
- the strain placed on our personnel, systems and resources
- the possible modification or termination of an acquired business' customer programs, including the loss of customers and the cancellation of current or anticipated programs, and
- the loss of key employees of acquired businesses.

Financial risks, such as:

- the use of cash resources, or incurrence of additional debt and related interest expense
- the dilutive effect of the issuance of additional equity securities
- the effect of potential volatility or weakness in our stock price on its use as consideration for acquisitions
- the inability to achieve expected operating margins to offset the increased fixed costs associated with acquisitions, or inability to increase margins of acquired businesses to our desired levels
- the incurrence of large write-offs or write-downs
- the impairment of goodwill and other intangible assets, and
- the unforeseen liabilities of the acquired businesses.

Changes in financial accounting standards may significantly effect our financial condition or the way we conduct business.

We prepare our financial statements in conformity with U.S. GAAP. These principles are subject to interpretation by the Financial Accounting Standards Board (“FASB”), the SEC and various bodies formed to interpret and create accounting policies. From time to time, we are required to adopt new or revised accounting standards issued by recognized authoritative bodies, including the FASB and the SEC. For example, significant changes to revenue recognition rules have been enacted and under current proposals will begin to apply to us in fiscal 2019. Changes to accounting rules or challenges to our interpretation or application of the rules by regulators may have a material effect on our reported financial results or on the way we conduct business.

ITEM 1B. UNRESOLVED SEC STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our facilities comprise an integrated network of engineering and manufacturing centers with our corporate headquarters located in Neenah, Wisconsin. We own or lease active facilities with approximately 3.3 million square feet of capacity. This includes approximately 1.5 million square feet in AMER, approximately 1.4 million square feet in APAC and approximately 0.4 million square feet in EMEA. Our facilities as of October 1, 2016, are described in the following table:

<u>Location</u>	<u>Type</u>	<u>Size (sq. ft.)</u>	<u>Owned/Leased</u>
AMER			
Neenah, Wisconsin	Manufacturing	418,000	Owned
Guadalajara, Mexico	Manufacturing	265,000	Leased
Nampa, Idaho	Manufacturing	216,000	Owned
Appleton, Wisconsin	Manufacturing	205,000	Owned
Buffalo Grove, Illinois (1)	Manufacturing	189,000	Leased
Neenah, Wisconsin (2)	Engineering	105,000	Leased
Neenah, Wisconsin	Global Headquarters	104,000	Owned
Raleigh, North Carolina	Engineering	25,000	Leased
Louisville, Colorado	Engineering	24,000	Leased
APAC			
Penang, Malaysia (1)	Manufacturing/Engineering	1,048,000	Owned
Xiamen, China (1)	Manufacturing	193,000	Leased
Hangzhou, China	Manufacturing	117,000	Leased
EMEA			
Oradea, Romania	Manufacturing/Engineering	296,000	Owned
Livingston, Scotland	Manufacturing/Engineering	62,000	Leased
Kelso, Scotland	Manufacturing	57,000	Owned
Darmstadt, Germany	Engineering	16,000	Leased
Other			
Fremont, California (3)	Inactive	46,000	Leased

- (1) The facilities in Penang, Malaysia; Xiamen, China; and Buffalo Grove, Illinois include more than one building.
- (2) As previously announced, construction of a new Neenah Design Center, located across the street from Plexus' Global Headquarters, is expected to be completed in fiscal 2017. During the fiscal 2016 fourth quarter, the current Neenah Design Center was sold and subsequently leased through the completion of construction of the new building.
- (3) In August 2016, Plexus closed the Fremont, California facility and transitioned customer programs to other facilities. The facility in Fremont, California is subleased and is no longer used in operations. The lease on this facility expires in fiscal 2020.

ITEM 3. LEGAL PROCEEDINGS

The Company is party to certain lawsuits and legal proceedings in the ordinary course of business. Management does not believe that these proceedings, individually or in the aggregate, will have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Executive Officers

See Part III, Item 10, "Directors, Executive Officers and Corporate Governance," of this Form 10-K for information regarding the Company's executive officers.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Price per Share

The Company's common stock trades on the NASDAQ Stock Market in the NASDAQ Global Select Market tier (symbol: PLXS). The price information below represents high and low sale prices of our common stock for each quarterly period during fiscal 2016 and 2015:

	Fiscal Year Ended October 1, 2016			Fiscal Year Ended October 3, 2015	
	High	Low		High	Low
First Quarter	\$41.62	\$32.23	First Quarter	\$42.79	\$34.43
Second Quarter	\$39.62	\$28.72	Second Quarter	\$42.27	\$37.89
Third Quarter	\$45.45	\$37.73	Third Quarter	\$46.14	\$41.59
Fourth Quarter	\$47.94	\$41.55	Fourth Quarter	\$43.20	\$35.55

Performance Graph

The following graph compares the cumulative total return on Plexus common stock with the NASDAQ Stock Market Index for U.S. Companies and the NASDAQ Stock Market Index for Electronic Components Companies, both of which include Plexus. The values on the graph show the relative performance of an investment of \$100 made on September 30, 2011, in Plexus common stock and in each of the indices as of the last business day of the respective fiscal year.

	2011	2012	2013	2014	2015	2016
Plexus	\$100	\$134	\$163	\$167	\$168	\$207
NASDAQ-US	100	130	159	188	188	213
NASDAQ-Electronics	100	125	174	191	181	211

Shareholders of Record; Dividends

As of November 14, 2016, we had 478 shareholders of record. We have not paid any cash dividends in the past. We currently anticipate that in the foreseeable future the majority of earnings will be retained to finance the development of our business and our authorized share repurchases. However, the Company evaluates from time to time potential uses of excess cash, which in the future may include additional share repurchases, a special dividend or recurring dividends. See also Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources,” for a discussion of the Company’s intentions regarding dividends, and loan covenants which could restrict dividend payments.

Issuer Purchases of Equity Securities

The following table provides the specified information about the repurchases of shares by the Company during the three months ended October 1, 2016:

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum approximate dollar value of shares that may yet be purchased under the plans or programs (1)
July 3, 2016 to July 30, 2016	43,579	\$44.66	43,579	\$155,139,432
July 31, 2016 to August 27, 2016	53,017	46.07	53,017	\$152,697,072
August 28, 2016 to October 1, 2016	58,071	46.44	58,071	\$150,000,000
	<u>154,667</u>	<u>\$45.81</u>	<u>154,667</u>	

(1) On August 20, 2015, the Board of Directors approved a stock repurchase program under which the Company is authorized to repurchase up to \$30.0 million of its common stock during fiscal 2016. The Company repurchased 760,903 shares under this program for \$30.0 million at an average price of \$39.43 per share. These shares were recorded as treasury stock.

On June 6, 2016, the Board of Directors approved a multi-year stock repurchase program under which the Company is authorized to repurchase up to \$150.0 million of its common stock beginning in fiscal 2017.

ITEM 6. SELECTED FINANCIAL DATA

Financial Highlights (dollars in thousands, except per share amounts)

	Fiscal Years Ended				
	October 1, 2016	October 3, 2015 (5)	September 27, 2014	September 28, 2013	September 29, 2012
Income Statement Data					
Net sales	\$2,556,004	\$2,654,290	\$2,378,249	\$2,228,031	\$2,306,732

Shareholders' equity	916,797	842,272	781,133	699,301	649,022
Return on invested capital ⁽³⁾	13.8%	14.0%	15.2%	14.0%	15.5% ⁽⁴⁾
Inventory turnover ratio	4.2x	4.3x	4.6x	5.1x	4.6x

- (1) During fiscal 2016, the Company recorded \$7.0 million in restructuring and other charges and \$5.2 million in selling and administrative expenses, which are included in operating income. The \$7.0 million was largely related to the Company's closure of its manufacturing facility in Fremont, California, and the partial closure of its Livingston, Scotland facility. The \$5.2 million was related to accelerated stock-based compensation expense recorded pursuant to the previously announced retirement agreement with the Company's former Chief Executive Officer. During fiscal 2015 and 2014 the Company recorded \$1.7 million and \$11.3 million, respectively, of restructuring and other charges, largely related to the Company's consolidation of its manufacturing facilities in Wisconsin, as well as its relocation of manufacturing operations from Juarez, Mexico to Guadalajara, Mexico.
- (2) Prior year amounts have been updated to reflect the adoption of Accounting Standards Update ("ASU") No. 2015-17, which requires all deferred tax assets and deferred tax liabilities to be classified as non-current and ASU No. 2015-03, which requires unamortized debt issuance costs to be presented as a contra liability. The adoptions resulted in decreased total assets of \$10.6 million, \$7.1 million, \$3.5 million and \$5.0 million for fiscal 2015, 2014, 2013 and 2012, respectively. Refer to New Accounting Pronouncements in Note 1–Description of Business and Significant Accounting Policies in the accompanying Notes to the Consolidated Financial Statements for further information.
- (3) The Company defines return on invested capital ("ROIC"), a non-GAAP financial measure, as tax-effected operating income divided by average invested capital over a rolling five-quarter period. Invested capital is defined as equity plus debt, less cash and cash equivalents, as discussed in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations—Return on Invested Capital ("ROIC") and Economic Return." For a reconciliation of ROIC and Economic Return to our financial statements that were prepared in accordance with GAAP, see Exhibit 99.1 to this annual report on Form 10-K.
- (4) In fiscal 2012, the Company established a valuation allowance against its U.S. deferred tax assets resulting in an additional tax provision of approximately \$20.6 million (\$22.8 million provision, offset by \$2.2 million recorded to other comprehensive income) and a decrease in diluted earnings per share of \$0.64. Return on invested capital excludes the \$20.6 million net deferred tax asset reduction. An additional \$1.3 million of valuation allowance established for fiscal 2012 relates to operating losses in Germany and Romania, making the total valuation allowance for that year \$24.1 million.
- (5) Fiscal 2015 included 53 weeks. All other periods presented included 52 weeks.

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

Plexus Corp. and its subsidiaries (together “Plexus,” the “Company,” or “we”) participate in the Electronic Manufacturing Services (“EMS”) industry. We deliver optimized solutions to our customers through our unique Product Realization Value Stream. Our customer-focused solutions model seamlessly integrates innovative product conceptualization, design, commercialization, manufacturing, fulfillment and sustaining solutions. Plexus delivers comprehensive end-to-end solutions for customers in the Americas (“AMER”), Europe, Middle East, and Africa (“EMEA”) and Asia-Pacific (“APAC”) regions.

We provide award-winning customer service to more than 140 branded product companies in the Healthcare/Life Sciences, Industrial/Commercial, Networking/Communications and Defense/Security/Aerospace market sectors. Our customers have stringent quality, reliability and regulatory requirements, requiring exceptional production and supply chain agility. Their products require complex configuration management, direct order fulfillment (to end customers) and global logistics management and Aftermarket Services. To service the complexities that our customers’ products demand, we utilize our Product Realization Value Stream, addressing our customers’ products from concept to end of life.

The following information should be read in conjunction with our consolidated financial statements included herein and “Risk Factors” included in Part I, Item 1A herein.

RESULTS OF OPERATIONS

Consolidated Performance Summary. The following table presents selected consolidated financial data for fiscal 2016, 2015 and 2014 (dollars in millions, except per share data):

	2016	2015*	2014
Net sales	\$2,556.0	\$2,654.3	\$2,378.2
Cost of sales	2,328.6	2,414.7	2,152.7
Gross profit	227.4	239.6	225.6
Gross margin	8.9%	9.0%	9.5%
Operating income	99.4	115.4	100.6
Operating margin	3.9%	4.3%	4.2%
Net income	76.4	94.3	87.2
Diluted earnings per share	\$ 2.24	\$ 2.74	\$ 2.52
Return on invested capital**	13.8%	14.0%	15.2%
Economic return**	2.8%	3.0%	4.2%

* Fiscal 2015 included 53 weeks, while all other periods presented included 52 weeks.

** Non-GAAP metric; refer to “Return on Invested Capital (“ROIC”) and Economic Return” below for more information and Exhibit 99.1 for a reconciliation.

Net sales. Net sales for fiscal 2016 decreased \$98.3 million, or 3.7%, as compared to fiscal 2015. The net sales decrease was primarily the result of a \$247.4 million decrease in net sales in the Networking/Communications sector, which was partially offset by increased net sales of \$88.7 million, \$30.3 million and \$30.1 million in the Industrial/Commercial, Defense/Security/Aerospace and Healthcare/Life Sciences sectors, respectively.

Net sales for fiscal 2015 increased \$276.0 million, or 11.6%, as compared to fiscal 2014. The net sales increase was primarily the result of increases across all market sectors. The most significant net sales increases were from the Industrial/Commercial and Networking/Communications sectors, which increased by \$102.0 million and \$82.0 million, respectively.

Our net sales by market sector for fiscal 2016, 2015 and 2014 were as follows (in millions):

Market Sector	2016	2015	2014
Healthcare/Life Sciences	\$ 780.3	\$ 750.2	\$ 697.3
Industrial/Commercial	774.2	685.5	583.5
Networking/Communications	597.1	844.5	762.5
Defense/Security/Aerospace	404.4	374.1	334.9
Total net sales	\$2,556.0	\$2,654.3	\$2,378.2

Healthcare/Life Sciences. Net sales for fiscal 2016 in the Healthcare/Life Sciences sector increased \$30.1 million, or 4.0%, as compared to fiscal 2015. The increase was primarily due to a \$41.9 million increase in net sales due to the ramp of various new programs for several existing customers, \$26.4 million from the ramp of production for three new customers and a net increase in end-market demand. Partially offsetting the increases were decreases in net sales of \$20.3 million due to three customers bringing the manufacturing process for four programs in house, \$7.0 million due to two customer disengagements and \$5.5 million due to a product disengagement with a customer.

Net sales for fiscal 2015 in the Healthcare/Life Sciences sector increased \$52.9 million, or 7.6%, as compared to fiscal 2014. The increase was primarily due to \$39.6 million of new program ramps for one customer, increased end-market demand and new program ramps across several other customers in this sector. The increase was partially offset by a program loss for one customer, which resulted in a decrease of \$14.6 million, and decreased net sales to several other customers as a result of program ramp downs and decreased end-market demand.

Industrial/Commercial. Net sales for fiscal 2016 in the Industrial/Commercial sector increased \$88.7 million, or 12.9%, as compared to fiscal 2015. The increase was primarily due to ramps of production for a major customer, which resulted in increased net sales of \$221.2 million. Partially offsetting the increase were decreases of \$42.7 million related to the previously announced disengagement of a customer, \$30.2 million that resulted from two customers revising their business models as a result of decreased end-market demand and \$12.4 million due to pilot programs for three customers not transitioning into the production stage. The remaining decrease was due to decreased customer end-market demand, due in part to the downturn in the oil and gas markets.

Net sales for fiscal 2015 in the Industrial/Commercial sector increased \$102.0 million, or 17.5%, as compared to fiscal 2014. The increase was primarily due to a \$45.6 million increase in net sales to a new customer in fiscal 2015, a \$36.8 million increase related to new programs with existing customers, a \$24.4 million increase related to new customers secured in fiscal 2014 that ramped in fiscal 2015, and several other customers with increased end-market demand. These increases were partially offset by a \$22.1 million decrease due to the disengagement of a customer as a result of the inability to reach contractual terms, and several other customers with decreased end-market demand.

Networking/Communications. Net sales for fiscal 2016 in the Networking/Communications sector decreased \$247.4 million, or 29.3%, as compared to fiscal 2015. The reduction in net sales was primarily driven by a \$90.7 million decrease in net sales due to a previously announced program disengagement, a \$75.8 million decrease in net sales to another customer that resulted from decreased end-market demand for one of its products and a \$29.2 million decrease due to the disengagement of a customer. Overall decreased end-market demand drove the remaining reduction in net sales during the year. Partially offsetting the decreases was a \$10.2 million increase in net sales due to the ramp of production of new programs for two existing customers.

Net sales for fiscal 2015 in the Networking/Communications sector increased \$82.0 million, or 10.8%, as compared to fiscal 2014. The change was primarily the result of a \$50.1 million increase in net sales to a key customer as a result of increased end-market demand, a \$36.1 million increase in net sales from one of our largest customers as a result of new product ramps and expansion of its end-market demand, and a \$16.0 million increase related to a new customer. Additionally, five customers' net sales increased \$37.5 million, in aggregate, primarily as a result of increased end-market demand as well as new program ramps. These increases were partially offset by a \$19.8 million decrease due to a customer that experienced softening in its end-market demand, a \$10.6 million decrease related to a customer disengagement and several other customers with decreased end-market demand.

Defense/Security/Aerospace. Net sales for fiscal 2016 in the Defense/Security/Aerospace sector increased \$30.3 million, or 8.1%, as compared to fiscal 2015. The improvement was primarily attributable to increased net sales of \$43.2 million that resulted from the ramp of production of new programs for several existing customers. These increases were partially offset by a decrease of \$6.9 million due to program disengagements with two customers as well as a net decrease in customer end-market demand.

Net sales for fiscal 2015 in the Defense/Security/Aerospace sector increased \$39.2 million, or 11.7%, as compared to fiscal 2014. The increase was primarily driven by new program ramps and increased end-market demand spread among multiple customers.

As a percentage of consolidated net sales, net sales attributable to customers representing 10% or more of consolidated net sales as well as the percentage of net sales attributable to our ten largest customers for fiscal 2016, 2015 and 2014, were as follows:

	2016	2015	2014
General Electric Company ("GE")	11.1%	10.6%	11.2%
Micron Technology, Inc. ("Micron")	10.4%	*	*
ARRIS Group, Inc. ("Arris")	10.1%	12.6%	12.5%
Top 10 customers	58.8%	56.1%	55.1%
* Net sales attributable to the customer were less than 10.0% of consolidated net sales for the period.			

Cost of sales. Cost of sales for fiscal 2016 decreased \$86.1 million, or 3.6%, as compared to fiscal 2015. Cost of sales is comprised primarily of material and component costs, labor costs, and overhead. During fiscal 2016 and 2015, approximately 90.0% of the total cost of sales was variable in nature and fluctuated with sales volumes. Of this amount, approximately 88.0% of these costs were related to material and component costs. As a result of using a cost-plus markup pricing arrangement with our customers, changes in costs typically result in corresponding changes in price, which generally results in an immaterial impact on gross profit. Therefore, as expected, the decrease in cost of sales of 3.6% as compared to fiscal 2015 was generally in line with the 3.7% decrease in net sales. Cost of sales decreased slightly less than the decrease in net sales primarily due to a \$2.9 million increase in cost of sales that resulted from losses sustained from a typhoon that impacted the Company's manufacturing facilities in Xiamen, China during the fiscal 2016 fourth quarter.

Cost of sales for fiscal 2015 increased \$262.1 million, or 12.2%, as compared to fiscal 2014. The increase in cost of sales of 12.2% was generally in line with the 11.6% increase in net sales. The increase in cost of sales as compared to the net sales increase in fiscal 2015 was primarily due to increased salary and wages expense in a Defense/Security/Aerospace focus factory resulting from additional direct and fixed labor resources in our cost structure to improve quality and delivery for some of our customers. Direct labor costs increased by \$1.8 million in fiscal 2015 due in large part to the employee mix shifting from temporary to permanent labor resources. In fiscal 2015, we also incurred an additional \$1.7 million in consulting fees to bring temporary, experienced quality inspectors in to enhance our manufacturing processes. Finally, an additional \$4.5 million of fixed labor resources were added throughout fiscal 2015 to provide support for manufacturing and quality control for the more complex assemblies and processes in the sector.

Gross profit. Gross profit for fiscal 2016 decreased \$12.2 million, or 5.1%, as compared to fiscal 2015. Gross margin decreased 10 basis points as compared to fiscal 2015. The primary driver of the decreases in gross profit and gross margin as compared to fiscal 2015 was the decrease in net sales and the \$2.9 million increase in cost of sales due to the typhoon-related losses previously discussed.

Gross profit for fiscal 2015 increased \$14.0 million, or 6.2%, as compared to fiscal 2014. Gross profit increased \$28.4 million primarily as a result of increased sales. This was partially offset by a \$14.4 million increase in fixed costs primarily in the AMER region as a result of continued investments in our then-new manufacturing facilities in Neenah, Wisconsin and Guadalajara, Mexico and costs incurred related to production process constraints in a Defense/Security/Aerospace focus factory. Gross margin decreased to 9.0% from 9.5%. The largest driver of the decrease in gross margin percentage from fiscal 2014 to fiscal 2015 was a lower net parts contribution margin and lower labor contribution margin due to increased labor expenses previously discussed. These decreases were partially offset by lower fixed costs as a percentage of net sales that resulted primarily from better leveraged fixed costs.

Operating income. Operating income for fiscal 2016 decreased \$16.0 million as compared to fiscal 2015 as a result of the decrease in gross profit previously discussed and a \$5.3 million increase in restructuring and other charges, partially offset by a \$1.5 million reduction in selling and administrative expenses (“S&A”). Restructuring and other charges were higher in fiscal 2016 largely due to the closure of our manufacturing facility in Fremont, California and the partial closure of our Livingston, Scotland facility to align with reduced end-market demand. The reduction in S&A resulted from a \$6.4 million decrease in variable compensation expense, which was partially offset by a \$5.4 million increase in stock-based compensation expense primarily due to \$5.2 million of accelerated stock-based compensation expense related to modifications of awards held by the Company’s former President and Chief Executive Officer in connection with his retirement. Operating margin decreased to 3.9% in fiscal 2016 from 4.3% in fiscal 2015.

Operating income for fiscal 2015 increased \$14.8 million as compared to fiscal 2014 as a result of the increase in gross profit previously discussed and a \$9.6 million decrease in restructuring and other charges, which were higher in fiscal 2014 because they largely related to the consolidation of manufacturing facilities in Wisconsin, and the relocation of manufacturing operations from Juarez, Mexico to Guadalajara. This was partially offset by an \$8.7 million increase in S&A primarily due to increased variable compensation expense, higher compensation expense due to increased headcount and an increase in professional services expense. Operating margin increased to 4.3% for fiscal 2015 from 4.2% for fiscal 2014.

Other income (expense). Other expense for fiscal 2016 increased \$2.9 million as compared to fiscal 2015. The increase in other expense for fiscal 2016 was primarily the result of a \$3.0 million increase in foreign exchange losses that resulted from foreign exchange volatility.

Other expense for fiscal 2015 increased \$1.9 million as compared to fiscal 2014. The increase in other expense for fiscal 2015 was primarily the result of a \$1.7 million increase in interest expense due to higher average borrowings, a \$0.8 million increase in miscellaneous expense due to fiscal 2014 having benefited from a favorable non-recurring accrual related to the termination of an agreement for additional land in Hangzhou, China, and an additional \$1.4 million increase in other miscellaneous expenses. This was partially offset by a \$1.4 million increase in foreign exchange gains and a \$0.6 million increase in interest income due to an increase of cash and cash equivalents.

Income taxes. Income tax expense and effective annual income tax rates for fiscal 2016, 2015 and 2014 were as follows (dollars in millions):

	2016	2015	2014
Income tax expense	\$11.0	\$12.0	\$6.1
Effective annual tax rate	12.6%	11.3%	6.5%

Income tax expense for fiscal 2016 was \$11.0 million compared to \$12.0 million for fiscal 2015 and \$6.1 million for fiscal 2014. The Company's annual effective tax rates vary from the U.S. statutory rate of 35.0% primarily as a result of the mix of earnings from U.S. and foreign jurisdictions and a tax holiday granted to a subsidiary located in the APAC region where the Company derives a significant portion of its earnings. The effective tax rate for fiscal 2016 was higher than the effective tax rate for fiscal 2015 primarily as a result of the overall decrease in income before taxes in jurisdictions where the Company does not pay taxes. The effective tax rate for fiscal 2015 was higher than the effective rate for fiscal 2014 primarily as a result of the geographic distribution of worldwide earnings and tax benefits of \$3.8 million primarily due to the lapse of statute of limitations related to certain U.S. tax examinations during fiscal 2014.

During fiscal 2016, the Company repatriated \$100.0 million of current year foreign earnings from the APAC region to the U.S., which had no income statement impact due to U.S. net operating losses, the use of U.S. tax credits and the reversal of the related valuation allowance. The repatriation does not impact the permanently reinvested assertions made by the Company regarding prior period foreign earnings as the remittance was distributed exclusively from current year foreign earnings. The Company does not have a history of repatriating foreign earnings by way of a taxable dividend and considers the fiscal 2016 remittance to be an isolated occurrence. The Company does not anticipate a similar repatriation in the foreseeable future.

The Company has been granted a tax holiday for a foreign subsidiary operating in the APAC region. This tax holiday will expire on December 31, 2024, and is subject to certain conditions with which the Company expects to comply. The Company benefited from a second tax holiday within the APAC region until December 31, 2013, when it expired under the terms of the Company's agreement with the local taxing authority. In fiscal 2016, 2015 and 2014, these holidays resulted in tax reductions of approximately \$27.1 million (\$0.81 per basic share), \$29.9 million (\$0.89 per basic share), and \$24.1 million (\$0.71 per basic share), respectively.

See also Note 6, "Income Taxes," in Notes to Consolidated Financial Statements for additional information regarding the Company's tax rate.

The annual effective tax rate for fiscal 2017 is expected to be approximately 9.0% to 11.0%.

Net Income. Net income for fiscal 2016 decreased \$17.9 million, or 19.0%, to \$76.4 million from fiscal 2015. Net income decreased primarily as a result of decreased gross profit, increased restructuring and other charges and increased foreign exchange losses, partially offset by decreases in S&A and income tax expense, as discussed previously.

Net income for fiscal 2015 increased \$7.1 million, or 8.2%, to \$94.3 million from fiscal 2014. Net income increased primarily as a result of increased gross profit and lower restructuring and other charges, partially offset by increases in S&A, interest expense and income tax expense, as discussed previously.

Diluted earnings per share. Diluted earnings per share decreased to \$2.24 in fiscal 2016 from \$2.74 in fiscal 2015 primarily as a result of decreased net income. This was partially offset by the positive impact of fewer weighted average outstanding shares in fiscal 2016 due to our common stock repurchase program. See Note 13, "Shareholders' Equity," in Notes to the Consolidated Financial Statements for information regarding the Company's stock repurchase programs.

Diluted earnings per share increased to \$2.74 for fiscal 2015 from \$2.52 for fiscal 2014 primarily as a result of increased net income. Further improvement was attributable to the positive impact of fewer weighted average outstanding shares in fiscal 2015 due to our common stock repurchase program.

Return on Invested Capital ("ROIC") and Economic Return. We use a financial model that is aligned with our business strategy and includes a ROIC goal of 500 basis points over our weighted average cost of capital ("WACC"), which we refer to as "Economic Return," and a 4.7% to 5.0% operating margin target. Our primary

focus is on our Economic Return goal of 5.0%, which is designed to create shareholder value and generate sufficient cash to self-fund our targeted organic revenue growth rate of 12.0%. ROIC and Economic Return are non-GAAP financial measures.

Non-GAAP financial measures, including ROIC and Economic Return, are used for internal management goals and decision making because such measures provide management and investors additional insight into financial performance. In particular, we provide ROIC and Economic Return because we believe they offer insight into the metrics that are driving management decisions because we view ROIC and Economic Return as important measures in evaluating the efficiency and effectiveness of our long-term capital requirements. We also use a derivative measure of ROIC as a performance criteria in determining certain elements of compensation.

We define ROIC as tax-effected operating income before restructuring and other special items divided by average invested capital over a rolling five-quarter period for the fiscal year. Invested capital is defined as equity plus debt, less cash and cash equivalents. Other companies may not define or calculate ROIC in the same way. ROIC and other non-GAAP financial measures should be considered in addition to, not as a substitute for, measures of our financial performance prepared in accordance with U.S. generally accepted accounting principles (“GAAP”).

We review our internal calculation of WACC annually. Our WACC was 11.0% for fiscal years 2016, 2015 and 2014. By exercising discipline to generate ROIC in excess of our WACC, our goal is to create value for our shareholders. ROIC was 13.8%, 14.0%, and 15.2% for fiscal 2016, 2015 and 2014, respectively, and was calculated excluding special items of \$15.1 million for fiscal 2016 related to accelerated stock-based compensation expense due to the retirement of our former President and Chief Executive Officer, typhoon-related losses and restructuring and other charges. Fiscal 2015 and 2014 ROIC was calculated excluding \$1.7 million and \$11.3 million of restructuring and other charges, respectively. Fiscal 2016 ROIC of 13.8% reflects an Economic Return of 2.8%, based on our weighted average cost of capital of 11.0%.

For a reconciliation of ROIC, Economic Return and adjusted operating income (tax effected) to our financial statements that were prepared using GAAP, see Exhibit 99.1 to this annual report on Form 10-K, which exhibit is incorporated herein by reference.

Refer to the table below, which includes the calculation of ROIC and Economic Return (dollars in millions) for the indicated periods:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Adjusted operating income (tax effected)	\$102.0	\$104.2	\$101.8
Average invested capital	740.0	745.6	669.7
After-tax ROIC	13.8%	14.0%	15.2%
WACC	11.0%	11.0%	11.0%
Economic Return	2.8%	3.0%	4.2%

REPORTABLE SEGMENTS

A further discussion of our fiscal 2016, 2015 and 2014 financial performance by reportable segment is presented below (in millions):

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Net sales:			
AMER	\$1,328.8	\$1,389.0	\$1,238.2
APAC	1,161.9	1,285.9	1,132.5
EMEA	170.4	140.3	115.9
Elimination of inter-segment sales	<u>(105.1)</u>	<u>(160.9)</u>	<u>(108.4)</u>
Total net sales	<u>\$2,556.0</u>	<u>\$2,654.3</u>	<u>\$2,378.2</u>
Operating income (loss):			
AMER	\$ 64.9	\$ 68.6	\$ 79.2
APAC	155.5	160.2	135.5
EMEA	(3.7)	(8.1)	(11.9)
Corporate and other costs	<u>(117.3)</u>	<u>(105.3)</u>	<u>(102.2)</u>
Total operating income	<u>\$ 99.4</u>	<u>\$ 115.4</u>	<u>\$ 100.6</u>

AMER. Net sales for fiscal 2016 in the AMER segment decreased \$60.2 million, or 4.3%, as compared to fiscal 2015, primarily due to decreased net sales of \$75.8 million with a customer that resulted from decreased end-market demand for one of its products, \$42.7 million due to a previously announced customer disengagement and \$29.2 million due to the disengagement of a customer. The remaining reduction in net sales resulted from decreases of: \$17.4 million due to two customers bringing the manufacturing process of three programs in house; \$12.4 million due to pilot programs for three customers not transitioning into the production stage; \$5.5 million due to a product disengagement with one customer; and a net overall decrease in customer end-market demand. Partially offsetting these decreases were increased net sales of \$187.3 million due to the ramp of production for a major customer, \$59.8 million from the ramp of various new programs for several existing customers and \$10.4 million due to the ramp of production for a new customer. Operating income for fiscal 2016 decreased \$3.7 million, or 5.4%, as compared to fiscal 2015, driven primarily by decreased net sales. The impact of the net sales decrease was partially offset by a positive change in customer mix due in part to decreased net sales to lower margin customers that resulted from two customer disengagements.

Net sales for fiscal 2015 in the AMER segment increased \$150.8 million, or 12.2%, as compared to fiscal 2014, primarily due to a then-new Industrial/Commercial sector customer that ramped during fiscal 2015, which contributed \$45.6 million in sales, and a \$37.2 million increase in net sales from a customer in the Networking/Communications sector as a result of new product ramps and expansion of its end-market demand. The remainder of the increase was a result of increased end-market demand and new product ramps for several of our larger customers across the Industrial/Commercial and Healthcare/Life Sciences sectors. These increases were partially offset by the disengagement of a customer due to the inability to reach contractual terms, which resulted in a \$22.1 million decrease. There was also a \$19.8 million decrease due to a customer that experienced softening in its end-market demand, a \$14.6 million decrease due to the loss of a customer program, and softening end-market demand for several customers, particularly in the Networking/Communications sector. During fiscal 2015, production of a Healthcare/Life Sciences customer was transferred from the AMER segment to the APAC segment, which resulted in a decrease of \$8.4 million (sales to this customer increased by \$47.0 million in the APAC segment, as noted below). Operating income for fiscal 2015 decreased \$10.6 million from fiscal 2014 primarily due to continued investments in our new manufacturing facilities in Neenah and Guadalajara and costs related to production process constraints in a focus factory for our Defense/Security/Aerospace sector, partially offset by the impact of the increase in net sales.

APAC. Net sales for fiscal 2016 in the APAC segment decreased \$124.0 million, or 9.6%, as compared to fiscal 2015. The reduction in net sales was primarily driven by a \$90.7 million decrease in net sales due to a previously announced program disengagement. Net sales also declined by \$30.2 million due to two customers revising their business models as a result of decreased end-market demand and \$7.0 million due to two customer disengagements. The remaining decrease in net sales was due to a net decrease in customer end-market demand. These decreases were partially offset by increased net sales of \$76.5 million from the ramp of new programs for three existing customers and \$19.4 million from the ramp of production for two new customers. Operating income decreased \$4.7 million in fiscal 2016 as compared to fiscal 2015, primarily as a result of the decrease in net sales. The impact of the decrease in net sales was partially offset by a positive shift in net sales mix, partially due to a previously announced program disengagement, and a \$4.7 million decrease in fixed manufacturing expenses due to cost saving initiatives.

Net sales for fiscal 2015 in the APAC segment increased \$153.4 million, or 13.5%, as compared to fiscal 2014. Net sales increased in all market sectors with the most significant increase in the Networking/Communications sector, including a combined \$62.8 million increase for three customers as a result of increased end-market demand and an aggregate \$23.9 million increase related to program ramps for two customers. In addition, net sales to one of our largest customers in the Healthcare/Life Sciences sector increased by \$47.0 million. Operating income increased \$24.7 million in fiscal 2015 as compared to fiscal 2014, primarily as a result of the increase in net sales as fixed manufacturing expenses and S&A for the segment were relatively stable in fiscal 2015 as compared to 2014.

EMEA. Net sales for fiscal 2016 in the EMEA segment increased \$30.1 million, or 21.5%, as compared to fiscal 2015, primarily due to a \$30.3 million increase in net sales due to the ramp of production of various new programs with several existing customers and \$5.0 million from the ramp of production for a new customer. This was partially offset by a \$3.8 million decrease as a result of a customer bringing the manufacturing of a program in house. The remaining decrease in net sales was due to a net decrease in customer end-market demand. Operating loss decreased \$4.4 million in fiscal 2016 as compared to fiscal 2015 primarily due to the impact of the net sales increase, while fixed costs remained relatively flat.

Net sales for fiscal 2015 in the EMEA segment increased \$24.4 million, or 21.1%, as compared to fiscal 2014, primarily due to a combined increase of \$18.7 million from three new customers, a \$7.3 million increase to a Networking/Communications customer due to improved end-market demand and new product ramps, and increased end-market demand for several other customers. This was partially offset by a \$7.2 million decrease as a result of end of life products along with the effects of decreased end-market demand for several other customers. Operating loss decreased \$3.8 million in fiscal 2015 as compared to fiscal 2014 primarily due to the increase in net sales and improved profitability for engineering-related services.

LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents were \$433.0 million as of October 1, 2016 as compared to \$357.1 million as of October 3, 2015.

As of October 1, 2016, 95.7% of our cash and cash equivalents balances were held outside of the U.S. by our foreign subsidiaries. Certain foreign countries impose taxes and overall penalties on transfers of cash. While our intent has been to permanently reinvest the funds held in these countries, from time to time we review and evaluate that strategy, particularly as the percentage of our cash balance held outside the U.S. has increased. During fiscal 2016, the Company repatriated \$100.0 million of current year foreign earnings from the APAC region to the U.S., which had no income statement impact due to U.S. net operating losses, the use of U.S. tax credits and the reversal of the related valuation allowance. The repatriation does not impact the permanently reinvested assertions made by the Company regarding prior period foreign earnings as the remittance was distributed exclusively from current year foreign earnings. The Company does not have a history of repatriating foreign earnings by way of a taxable dividend and considers the fiscal 2016 remittance to be an isolated

occurrence. The Company does not anticipate a similar repatriation in the foreseeable future. Currently, we believe that cash held in the U.S., together with cash available under our Credit Facility, will be sufficient to meet our U.S. liquidity needs for the next twelve months and for the foreseeable future.

Cash Flows. The following table provides a summary of cash flows for fiscal 2016, 2015 and 2014, excluding the effect of exchange rates on cash and cash equivalents (in millions):

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Cash provided by operating activities	\$127.7	\$ 76.6	\$ 88.4
Cash used in investing activities	\$ (26.5)	\$ (34.7)	\$ (62.6)
Cash used in financing activities	\$ (21.3)	\$ (26.2)	\$ (21.0)

Operating Activities. Cash flows provided by operating activities were \$127.7 million for fiscal 2016, as compared to \$76.6 million for fiscal 2015. The improvement was primarily due to increased working capital requirements in fiscal 2015 due to the increase in net sales. This was partially offset by the larger increase in cash flows received for customer deposits in fiscal 2015 (discussed below) and the decrease in earnings in fiscal 2016.

Cash flows provided by operating activities were \$76.6 million for fiscal 2015, as compared to cash flows provided by operating activities of \$88.4 million for fiscal 2014. The decrease was primarily attributable to a significant increase in accounts payable for fiscal 2014 and an increase in net sales to customers with longer payment terms, which resulted in higher accounts receivable balances at the end of fiscal 2015. This was partially offset by improvement in cash flows used for inventory as fiscal 2014 had a significant inventory increase due to the timing of our inventory build to support forecasted sales in the first quarter of fiscal 2015, coupled with an increase in customer deposits and improved earnings in fiscal 2015.

The following table provides a summary of cash cycle days for the periods indicated (in days):

	Three months ended		
	October 1, 2016	October 3, 2015	September 27, 2014
Days in accounts receivable	58	53	44
Days in inventory	87	85	80
Days in accounts payable	(61)	(60)	(60)
Days in cash deposits	(13)	(12)	(8)
Annualized cash cycle	<u>71</u>	<u>66</u>	<u>56</u>

We calculate days in accounts receivable as accounts receivable for the respective quarter divided by annualized sales for the respective quarter by day. We calculate days in inventory, accounts payable, and cash deposits as each balance sheet line item for the respective quarter divided by annualized cost of sales for the respective quarter by day. We calculate annualized cash cycle as the sum of days in accounts receivable and days in inventory, less days in accounts payable and days in cash deposits.

Days in accounts receivable for the three months ended October 1, 2016 increased five days compared to the three months ended October 3, 2015. The increase is primarily attributable to increased net sales to customers with longer payment terms and the timing of payments.

Days in inventory for the three months ended October 1, 2016 increased two days compared to the three months ended October 3, 2015. The increase is primarily driven by the decrease in annualized cost of sales due primarily to the decrease in net sales and relatively flat inventory levels as a result of demand reductions late in the fourth quarter, which did not allow inventory to decrease by year end in line with the net sales decrease.

Days in accounts payable for the three months ended October 1, 2016 increased one day compared to the three months ended October 3, 2015. The increase is primarily driven by the decrease in annualized cost of sales due primarily to the decrease in net sales and the timing of purchases.

Days in cash deposits for the three months ended October 1, 2016 increased one day compared to the three months ended October 3, 2015. The increase was primarily attributable to an increase in customer deposits primarily due to a deposit received from one customer to offset on-hand inventory.

As of October 1, 2016 annualized cash cycle days increased five days compared to October 3, 2015 due to the factors discussed above.

Free Cash Flow. We define free cash flow (“FCF”), a non-GAAP financial measure, as cash flow provided by operations less capital expenditures. FCF was \$96.6 million for fiscal 2016 compared to \$41.5 million for fiscal 2015. The increase of \$55.1 million was primarily attributable to the increase in cash provided by operating activities described above and the reduction in capital expenditures.

Non-GAAP financial measures, including FCF, are used for internal management assessments because such measures provide additional insight to investors into ongoing financial performance. In particular, we provide FCF because we believe it offers insight into the metrics that are driving management decisions. We view FCF as an important financial metric as it demonstrates our ability to generate cash and can allow us to pursue opportunities that enhance shareholder value. FCF is a non-GAAP financial measure that should be considered in addition to, not as a substitute for, measures of our financial performance prepared in accordance with GAAP.

A reconciliation of FCF to our financial statements that were prepared using GAAP follows (in millions):

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Cash flows provided by operating activities	\$127.7	\$ 76.6	\$ 88.4
Payments for property, plant and equipment	<u>(31.1)</u>	<u>(35.1)</u>	<u>(65.3)</u>
Free cash flow	<u>\$ 96.6</u>	<u>\$ 41.5</u>	<u>\$ 23.1</u>

Investing Activities. Cash flows used in investing activities were \$26.5 million for fiscal 2016 compared to \$34.7 million for fiscal 2015. The reduction was due to a \$4.0 million decrease in capital expenditures and a \$4.2 million increase in proceeds received from the sale of property, plant and equipment, primarily related to the sale of our engineering facility in Neenah, Wisconsin.

Cash flows used in investing activities were \$34.7 million for fiscal 2015 compared to \$62.6 million for fiscal 2014. The reduction was due to a \$30.2 million decrease in capital expenditures primarily related to our facility investment for Guadalajara during fiscal 2014.

We utilized available cash and operating cash flows as the sources for funding our operating requirements during fiscal 2016. We currently estimate capital expenditures for fiscal 2017 will be approximately \$50 million to \$60 million.

Financing Activities. Cash flows used in financing activities were \$21.3 million for fiscal 2016 compared to \$26.2 million for fiscal 2015. The decrease was primarily attributable to the \$5.0 million increase in proceeds received from increased stock option exercise activity during fiscal 2016.

Cash flows used in financing activities were \$26.2 million for fiscal 2015 compared to \$21.0 million for fiscal 2014. The increase was primarily attributable to reduced proceeds from stock option exercises during fiscal 2015.

On June 6, 2016, the Board of Directors approved a multi-year stock repurchase program under which the Company is authorized to repurchase up to \$150.0 million of its common stock beginning in fiscal 2017. We will repurchase shares subject to market conditions.

On August 20, 2015, the Board of Directors authorized a stock repurchase program under which the Company was authorized to repurchase up to \$30.0 million of its common stock during fiscal 2016. The Company repurchased 760,903 shares under this program for \$30.0 million, at an average price of \$39.43 per share, during fiscal 2016. These shares were recorded as treasury stock.

On August 13, 2014, the Board of Directors authorized a stock repurchase program under which the Company was authorized to repurchase up to \$30.0 million of its common stock during fiscal 2015. During fiscal 2015, the Company repurchased 745,227 shares under this program for \$30.0 million, at an average price of \$40.26 per share. These shares were recorded as treasury stock.

On July 5, 2016, the Company entered into an amendment to the credit agreement (the "Credit Agreement") related to its senior unsecured credit facility (the "Credit Facility"). The amendment increased the maximum commitment under the Credit Facility from \$265 million to \$300 million, provides a potential additional \$200 million increase in borrowing capacity to \$500 million with the approval of the lenders, and extended the termination date of the facility from May 15, 2019, to July 5, 2021.

Consistent with the terms of the Credit Facility prior to its amendment, borrowings under the Credit Facility as amended bear interest, at the Company's option, at a eurocurrency or base rate plus, in each case, an applicable interest rate margin based on the Company's then-current leverage ratio (as defined in the Credit Agreement). As of October 1, 2016, the borrowing rate under the Credit Agreement was LIBOR plus 1.125% (or 1.648%). As of October 1, 2016, the \$75.0 million of outstanding debt under the Credit Facility is effectively at a fixed interest rate as a result of a \$75.0 million notional amount of interest rate swap contracts discussed in Note 5, "Derivatives and Fair Value Measurements." The Company is required to pay an annual commitment fee on the unused revolver credit commitment based on the Company's leverage ratio; the fee was 0.175% as of October 1, 2016. During fiscal 2016, the highest daily borrowing was \$232.0 million, the average daily borrowings were \$188.6 million, and the Company borrowed and repaid \$625.0 million of revolving borrowings under the Credit Facility.

The financial covenants (as defined under the Credit Agreement) require, among other covenants, that the Company maintain, as of each fiscal quarter end, a maximum total leverage ratio and a minimum interest coverage ratio. As of October 1, 2016, the Company was in compliance with all financial covenants of the Credit Agreement.

In fiscal 2011, Plexus issued \$175.0 million in principal amount of 5.20% Senior Notes, due on June 15, 2018 (the "Notes"). The related Note Purchase Agreement contains certain financial covenants, which include a maximum total leverage ratio, a minimum interest coverage ratio and a minimum net worth test, all as defined in the agreement. As of October 1, 2016, the Company was in compliance with all such covenants relating to the Notes and the Note Purchase Agreement.

The Credit Agreement and the Note Purchase Agreement allow for the future payment of cash dividends or the repurchase of shares provided that no event of default (including any failure to comply with a financial covenant) exists at the time of, or would be caused by, the dividend payment or the share repurchases. We have not paid cash dividends in the past and do not currently anticipate paying them in the future. However, we evaluate from time to time potential uses of excess cash, which in the future may include share repurchases above those already authorized, a special dividend or recurring dividends.

On October 4, 2016, the Company entered into a Master Accounts Receivable Purchase Agreement (the "RPA") with The Bank of Tokyo-Mitsubishi UFJ, Ltd., New York Branch (the "Purchaser"). Pursuant to the RPA, the Company, Plexus Malaysia and one or more additional Plexus subsidiaries that may be designed in the future (each, a "Seller") may sell to the Purchaser up to an aggregate of \$100.0 million in accounts receivable owed to such Sellers by specified customers. In exchange, the Purchaser pays a purchase price for each purchased receivable equal to the net face value of the receivable less an agreed upon discount. The facility represented by

the RPA is non-committed, meaning that the Company and each other Seller acknowledge that they have not paid a commitment or comparable fee to the Purchaser, and that the Purchaser does not have a continuing obligation to purchase any receivable from any Seller. The Purchaser will pay an agreed-upon servicing fee to each Seller with respect to each purchased receivable sold by such Seller, consistent with common market practices. The RPA contains representations, warranties, covenants, and termination events that are customary for factoring transactions of this type.

Based on current expectations, we believe that our projected cash flows provided by operations, available cash and cash equivalents, potential borrowings under the Credit Facility, and our leasing capabilities, should be sufficient to meet our working capital and fixed capital requirements for the next twelve months. If our future financing needs increase, we may need to arrange additional debt or equity financing. Accordingly, we evaluate and consider from time to time various financing alternatives to supplement our financial resources. However, we cannot be assured that we will be able to make any such arrangements on acceptable terms.

CONTRACTUAL OBLIGATIONS, COMMITMENTS AND OFF-BALANCE SHEET OBLIGATIONS

Our disclosures regarding contractual obligations and commercial commitments are located in various parts of our regulatory filings. Information in the following table provides a summary of our contractual obligations and commercial commitments as of October 1, 2016 (dollars in millions):

Contractual Obligations	Payments Due by Fiscal Year				
	Total	2017	2018-2019	2020-2021	2022 and thereafter
Long-Term Debt Obligations (1,2)	\$266.0	\$ 84.8	\$181.2	\$ —	\$ —
Capital Lease and Other Short-Term Debt Obligations	5.2	3.5	1.4	0.3	—
Operating Lease Obligations	29.3	8.5	12.1	7.9	0.8
Purchase Obligations (3)	482.1	473.2	7.7	1.2	—
Other Long-Term Liabilities on the Balance Sheet (4)	11.5	0.5	0.3	—	10.7
Other Long-Term Liabilities not on the Balance Sheet (5)	7.6	3.5	0.2	1.1	2.8
Other financing obligations (6)	12.9	1.5	3.1	3.2	5.1
Total Contractual Cash Obligations	<u>\$814.6</u>	<u>\$575.5</u>	<u>\$206.0</u>	<u>\$13.7</u>	<u>\$19.4</u>

- 1) Includes amounts outstanding under the Credit Facility. As of October 1, 2016, the outstanding balance was \$75.0 million. The amounts listed above include interest; see Note 4 in Notes to Consolidated Financial Statements for further information.
- 2) Includes \$175.0 million in principal amount of Notes. The amounts listed above include interest; see Note 4 in Notes to Consolidated Financial Statements for further information.
- 3) As of October 1, 2016, purchase obligations consist primarily of purchases of inventory and equipment in the ordinary course of business.
- 4) As of October 1, 2016, other long-term obligations on the balance sheet included deferred compensation obligations to certain of our former and current executive officers, as well as other key employees, and an asset retirement obligation. We have excluded from the above table the impact of approximately \$2.8 million, as of October 1, 2016, related to unrecognized income tax benefits. The Company cannot make reliable estimates of the future cash flows by period related to these obligations.
- 5) As of October 1, 2016, other long-term obligations not on the balance sheet consisted of guarantees and a commitment for salary continuation and certain benefits in the event employment of one executive officer of the Company is terminated without cause. Excluded from the amounts disclosed are certain bonus and incentive compensation amounts, which would be paid on a prorated basis in the year of termination.
- 6) Includes future minimum payments under the base lease agreement in Guadalajara, Mexico. Excludes \$20.3 million of future minimum payments under renewal options from 2025 through 2034. See Note 3 in Notes to Consolidated Financial Statements for further information.

DISCLOSURE ABOUT CRITICAL ACCOUNTING ESTIMATES

Our accounting policies are disclosed in Note 1 of Notes to the Consolidated Financial Statements. During fiscal 2016, there were no material changes to these policies. Our more critical accounting estimates are described below:

Revenue – Net sales from manufacturing services are recognized when the product has been shipped, the risk of ownership has transferred to the customer, the price to the buyer is fixed or determinable, and recoverability is reasonably assured. This point depends on contractual terms and generally occurs upon shipment of the goods from Plexus. Generally, there are no formal customer acceptance requirements or further obligations related to manufacturing services; if such requirements or obligations exist, then a sale is recognized at the time when such requirements are completed and such obligations fulfilled.

Sales are recorded net of estimated returns of manufactured product based on management's analysis of historical rates of returns, current economic trends and changes in customer demand. Net sales also include amounts billed to customers for shipping and handling, if applicable. The corresponding shipping and handling costs are included in cost of sales.

Net sales from engineering design and development services, which are generally performed under contracts with durations of twelve months or less, are typically recognized as costs are incurred utilizing the proportional performance model. The completed performance model is used if certain customer acceptance criteria exist. Any losses are recognized when anticipated.

Income Taxes – The Company accounts for income taxes in accordance with ASC 740. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The Company does not currently provide for additional U.S. and foreign income taxes which would become payable upon repatriation of undistributed earnings of certain foreign subsidiaries. The Company maintains valuation allowances when it is more likely than not that all or a portion of a deferred tax asset will not be realized. In determining whether a valuation allowance is required, the Company takes into account such factors as prior earnings history, expected future earnings, carryback and carryforward periods, and tax strategies that could potentially enhance the likelihood of realization of a deferred tax asset.

Stock-Based Compensation – The Financial Accounting Standard Board ("FASB") requires all share-based payments to employees, including grants of employee stock options, to be measured at fair value and expensed in the consolidated statements of comprehensive income over the service period (generally the vesting period) of the grant. We used the modified prospective application, under which compensation expense is only recognized in the consolidated statements of comprehensive income beginning with the first period that we adopted the FASB regulation and continuing to be expensed thereafter. We use the Black-Scholes valuation model to value stock options and the Monte Carlo valuation model to value performance stock units. See Note 9, "Benefit Plans," in Notes to Consolidated Financial Statements for further information.

NEW ACCOUNTING PRONOUNCEMENTS

See Note 1, "Description of Business and Significant Accounting Policies," in Notes to Consolidated Financial Statements regarding recent accounting pronouncements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk from changes in foreign exchange and interest rates. We selectively use financial instruments to reduce such risks.

Foreign Currency Risk

We do not use derivative financial instruments for speculative purposes. Our policy is to selectively hedge our foreign currency denominated transactions in a manner that partially offsets the effects of changes in foreign currency exchange rates. We typically use foreign currency contracts to hedge only those currency exposures associated with certain assets and liabilities denominated in non-functional currencies. Corresponding gains and losses on the underlying transaction generally offset the gains and losses on these foreign currency hedges. Our international operations create potential foreign exchange risk.

Our percentages of transactions denominated in currencies other than the U.S. dollar for the indicated fiscal years were as follows:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Net Sales	8%	7%	7%
Total Costs	13%	12%	13%

The Company has evaluated the potential foreign currency exchange rate risk on transactions denominated in currencies other than the U.S. dollar for the periods presented above. Based on the Company's overall currency exposure, as of October 1, 2016, a 10.0 percent change in the value of the U.S. dollar relative to our other transactional currencies would not have a material effect on the Company's financial position, results of operations, or cash flows.

Interest Rate Risk

We have financial instruments, including cash equivalents, which are sensitive to changes in interest rates. We consider the use of interest rate swaps based on existing market conditions and have entered into interest rate swaps related to borrowings under our Credit Facility. For more information, refer to Note 5, "Derivatives and Fair Value Measurements," in Notes to Consolidated Financial Statements. Interest rate swap agreements are subject to the further risk that the counterparties to these agreements may fail to comply with their obligations thereunder.

The primary objective of our investment activities is to preserve principal, while maximizing yields without significantly increasing market risk. To achieve this, we maintain our portfolio of cash equivalents in a variety of highly rated securities, money market funds and certificates of deposit, and limit the amount of principal exposure to any one issuer.

As of October 1, 2016, our only material interest rate risk is associated with our Credit Facility, which had an outstanding balance of \$75 million. As of the end of fiscal 2016, through the use of interest rate swaps, as described above, we fixed the basis on which we pay interest with a \$75 million notional amount of interest rate swap contracts, and the borrowings under the Notes are based on a fixed interest rate, thus eliminating much of our interest rate risk.

Report of Independent Registered Public Accounting Firm

To the Shareholders
and Board of Directors
of Plexus Corp.:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Plexus Corp. and its subsidiaries at October 1, 2016 and October 3, 2015, and the results of their operations and their cash flows for each of the three years in the period ended October 1, 2016 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of October 1, 2016, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it classifies deferred taxes in 2016.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accompanying notes are an integral part of these consolidated financial statements.

Plexus Corp.

Notes to Consolidated Financial Statements

1. Description of Business and Significant Accounting Policies

Description of Business: Plexus Corp. and its subsidiaries (together “Plexus” or the “Company,”) participate in the Electronic Manufacturing Services (“EMS”) industry. Plexus provides integrated product conceptualization, design, commercialization, manufacturing, fulfillment and sustaining solutions to customers in the Healthcare/ Life Sciences, Industrial/Commercial, Networking/Communications and Defense/Security/Aerospace market sectors. Plexus is headquartered in Neenah, Wisconsin and has operations in the Americas (“AMER”), Europe, Middle East, and Africa (“EMEA”) and Asia-Pacific (“APAC”) regions.

Significant Accounting Policies

Consolidation Principles and Basis of Presentation: The consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) and include the accounts of Plexus Corp. and its subsidiaries. All significant intercompany transactions have been eliminated.

Certain prior period amounts have been reclassified to conform to the current period presentation.

The Company’s fiscal year ends on the Saturday closest to September 30. The Company also uses a “4-4-5” weekly accounting system for the interim periods in each quarter. Each quarter, therefore, ends on a Saturday at the end of the 4-4-5 period. Periodically, an additional week must be added to the fiscal year to re-align with the Saturday closest to September 30. Fiscal 2016 and fiscal 2014 included 52 weeks; fiscal 2015 included 53 weeks. The first quarter of fiscal 2015 included 14 weeks and all other fiscal quarters presented included 13 weeks.

Cash and Cash Equivalents: Cash equivalents include short-term highly liquid investments and are classified as Level 1 in the fair level hierarchy described below. As of October 1, 2016 and October 3, 2015, cash and cash equivalents consisted of the following (in thousands):

	2016	2015
Cash	\$175,396	\$179,339
Money market funds and other	257,568	177,767
Total cash and cash equivalents	<u>\$432,964</u>	<u>\$357,106</u>

Inventories: Inventories are valued at the lower of cost or market. Cost is determined by the first-in, first-out (“FIFO”) method. Valuing inventories at the lower of cost or market requires the use of estimates and judgment. Customers may cancel their orders, change production quantities or delay production for a number of reasons that are beyond the Company’s control. Any of these, or certain additional actions, could impact the valuation of inventory. Any actions taken by the Company’s customers that could impact the value of its inventory are considered when determining the lower of cost or market valuations.

In certain instances, in accordance with contractual terms, the Company receives customer deposits to offset obsolete and excess inventory risks.

Property, Plant and Equipment and Depreciation: Property, plant and equipment is stated at cost and depreciated using the straight-line method over the estimated useful lives of the respective assets. Estimated useful lives for major classes of depreciable assets are as follows:

Buildings and improvements	5-50 years
Machinery and equipment	3-7 years
Computer hardware and software	3-10 years

Plexus Corp.

Notes to Consolidated Financial Statements

Certain facilities and equipment held under capital leases are classified as property, plant and equipment and amortized using the straight-line method over the term of the lease and the related obligations are recorded as liabilities. Amortization of assets held under capital leases is included in depreciation expense (see Note 3, "Property, Plant and Equipment") and the financing component of the lease payments is classified as interest expense. Maintenance and repairs are expensed as incurred.

The Company capitalizes significant costs incurred in the acquisition or development of software for internal use. This includes costs of the software, consulting services and compensation costs for employees directly involved in developing internal use computer software.

Impairment of Long-Lived Assets: Long-lived assets, including property, plant and equipment and intangible assets with finite lives are reviewed for impairment and written down to fair value when facts and circumstances indicate that the carrying value of long-lived assets or asset groups may not be recoverable through estimated future undiscounted cash flows. If an impairment has occurred, a write-down to estimated fair value is made and the impairment loss is recognized as a charge against current operations. The impairment analysis is based on management's assumptions, including future revenue and cash flow projections. Circumstances that may lead to impairment of property, plant and equipment and intangible assets with finite lives include reduced expectations for future performance or industry demand and possible further restructurings, among others.

Revenue Recognition: Net sales from manufacturing services are recognized when the product has been shipped, the risk of ownership has transferred to the customer, the price to the buyer is fixed or determinable, and recoverability is reasonably assured. This point depends on contractual terms and generally occurs upon shipment of the goods from Plexus. Generally, there are no formal customer acceptance requirements or further obligations related to manufacturing services; if such requirements or obligations exist, then a sale is recognized at the time when such requirements are completed and such obligations are fulfilled.

Sales are recorded net of estimated returns of manufactured products based on management's analysis of historical returns, current economic trends and changes in customer demand. Net sales also include amounts billed to customers for shipping and handling. The corresponding shipping and handling costs are included in cost of sales.

Net sales from engineering design and development services, which are generally performed under contracts with a duration of twelve months or less, are typically recognized as program costs are incurred utilizing the proportional performance model. The completed performance model is used if certain customer acceptance criteria exist. Any losses are recognized when anticipated. Net sales from engineering design and development services were less than 5.0% of consolidated net sales for each of fiscal 2016, 2015 and 2014.

Income Taxes: The Company accounts for income taxes in accordance with ASC Topic 740, "Income Taxes" ("ASC 740"). Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The Company does not currently provide for additional U.S. and foreign income taxes that would become payable upon the repatriation of undistributed earnings of certain foreign subsidiaries. The Company maintains valuation allowances when it is more likely than not that all or a portion of a deferred tax asset will not be realized. In determining whether a valuation allowance is required, the Company takes into account such factors as prior earnings history, expected future earnings, carryback and carryforward periods, and tax strategies that could potentially enhance the likelihood of the realization of a deferred tax asset.

Foreign Currency Translation: The Company translates assets and liabilities of subsidiaries operating outside of the U.S. with a functional currency other than the U.S. dollar into U.S. dollars using exchange rates in effect at

Plexus Corp.**Notes to Consolidated Financial Statements**

the relevant balance sheet date and net sales, expenses and cash flows at the average exchange rates during the respective periods. Adjustments resulting from translation of the financial statements are recorded as a component of "Accumulated other comprehensive loss." Exchange gains and losses arising from transactions denominated in a currency other than the functional currency of the entity involved and remeasurement adjustments for foreign operations where the U.S. dollar is the functional currency are included in our Consolidated Statements of Comprehensive Income as a component "Other income (expense)." Exchange gains (losses) on foreign currency transactions were \$(1.7) million, \$1.3 million, and \$(0.1) million for fiscal 2016, 2015 and 2014, respectively. These amounts include the amount of gain (loss) recognized in income during each fiscal year due to non-designated forward currency exchange contracts the Company entered into during each respective year. Refer to Note 5, "Derivatives and Fair Value Measurements," for further details on derivatives.

Derivatives: All derivatives are recognized on the balance sheet at fair value. The Company periodically enters into forward currency exchange contracts and interest rate swaps. On the date a derivative contract is entered into, the Company designates the derivative as a hedge of a recognized asset or liability (a "non-designated" hedge), a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability (a "cash flow" hedge), or a hedge of the net investment in a foreign operation. The Company does not enter into derivatives for speculative purposes. Changes in the fair value of a derivative that qualifies as a non-designated hedge are recorded in earnings as are the gains or losses related to the hedged asset or liability. Changes in the fair value of a derivative that qualifies as a cash flow hedge are recorded in "Accumulated other comprehensive loss" within shareholders' equity, until earnings are affected by the variability of cash flows. Changes in the fair value of a derivative used to hedge the net investment in a foreign operation are recorded in "Accumulated other comprehensive loss" within shareholders' equity. The Company's interest rate swaps and certain forward currency exchange contracts are treated as cash flow hedges and, therefore, \$9.0 million, \$(11.2) million and \$1.6 million was recorded in "Accumulated other comprehensive loss" for fiscal 2016, 2015 and 2014, respectively.

Grants from Government Authorities: Grants from governments are recognized at their fair value where there is reasonable assurance that the grant funds will be received and the Company will comply with all attached conditions to the grant. Government grants relating to property, plant and equipment are recorded as an offset to the carrying value of the related assets at the time of capitalization. Government grants relating to other costs incurred are recognized as an offset to those related costs, for which the grants are intended to compensate for, at the time they are recognized.

Earnings Per Share: The computation of basic earnings per common share is based upon the weighted average number of common shares outstanding and net income. The computation of diluted earnings per common share reflects additional dilution from share-based awards, excluding any with an antidilutive effect.

Stock-based Compensation: The Company measures all share-based payments to employees, including grants of employee stock options, at fair value and expenses them in the Consolidated Statements of Comprehensive Income over the service period (generally the vesting period) of the grant.

Comprehensive (Loss) Income: The Company follows the established standards for reporting comprehensive (loss) income, which is defined as the changes in equity of an enterprise except those resulting from shareholder transactions.

Plexus Corp.**Notes to Consolidated Financial Statements**

Accumulated other comprehensive loss consists of the following as of October 1, 2016 and October 3, 2015 (in thousands):

	<u>2016</u>	<u>2015</u>
Foreign currency translation adjustments	\$(11,637)	\$ 2,398
Cumulative change in fair value of derivative instruments	<u>98</u>	<u>(8,869)</u>
Accumulated other comprehensive loss	<u><u>\$(11,539)</u></u>	<u><u>\$(6,471)</u></u>

Refer to Note 5, “Derivatives and Fair Value Measurements,” for further explanation regarding the change in fair value of derivative instruments, net of tax adjustments, that is recorded to “Accumulated other comprehensive loss.”

Use of Estimates: The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Fair Value of Financial Instruments: The Company holds financial instruments consisting of cash and cash equivalents, accounts receivable, certain deferred compensation assets held under trust arrangements, accounts payable, debt, and derivatives. The carrying values of cash and cash equivalents, accounts receivable, accounts payable, and capital lease obligations as reported in the consolidated financial statements approximate fair value. Derivatives and certain deferred compensation assets held under a trust and a rabbi trust arrangement are recorded at fair value. Accounts receivable are reflected at net realizable value based on anticipated losses due to potentially uncollectible balances. Anticipated losses are based on management’s analysis of historical losses and changes in customers’ credit status. The fair value of the Company’s long-term debt was \$251.4 million and \$250.2 million as of October 1, 2016 and October 3, 2015, respectively. The Company uses quoted market prices when available or discounted cash flows to calculate fair value. If measured at fair value in the financial statements, long-term debt (including the current portion) would be classified as Level 2 in the fair value hierarchy described below. The fair values of the Company’s derivatives are disclosed in Note 5, “Derivatives and Fair Value Measurements.” The fair values of the deferred compensation assets held under a trust and a rabbi trust arrangement are discussed in Note 9, “Benefit Plans.”

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (or exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The accounting guidance establishes a fair value hierarchy based on three levels of inputs that may be used to measure fair value. The input levels are:

Level 1: Quoted (observable) market prices in active markets for identical assets or liabilities.

Level 2: Inputs other than Level 1 that are observable, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the asset or liability.

Business and Credit Concentrations: Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash, cash equivalents, trade accounts receivable and derivative instruments, specifically related to counterparties. In accordance with the Company’s investment policy, the Company’s cash, cash equivalents and derivative instruments were placed with recognized financial institutions.

Plexus Corp.

Notes to Consolidated Financial Statements

The Company's investment policy limits the amount of credit exposure in any one issue and the maturity date of the investment securities that typically comprise investment grade short-term debt instruments. Concentrations of credit risk in accounts receivable resulting from sales to major customers are discussed in Note 11, "Reportable Segments, Geographic Information and Major Customers." The Company, at times, requires cash deposits for services performed. The Company also closely monitors extensions of credit.

New Accounting Pronouncements: In March 2016, the Financial Accounting Standards Board ("FASB") issued guidance that changes the accounting for certain aspects of share-based payments to employees. The guidance requires the recognition of the income tax effects of awards in the income statement when the awards vest or are settled, thus eliminating additional paid-in capital pools. The guidance also allows for the employer to repurchase more of an employee's shares for tax withholding purposes without triggering liability accounting. In addition, the guidance allows for a policy election to account for forfeitures as they occur rather than on an estimated basis. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. Early adoption is permitted. The adoption of the new standard is not expected to have a material impact on the Company's Consolidated Financial Statements.

In February 2016, the FASB issued guidance that primarily requires lessees to recognize most leases on their balance sheets but record expenses on their income statements in a manner similar to current accounting. For lessors, the guidance modifies the classification criteria and the accounting for sales-type and direct financing leases. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early adoption is permitted. The Company is currently in the process of assessing the impact of the adoption of the new standard on its Consolidated Financial Statements and the timing of adoption.

In November 2015, the FASB issued an accounting standard to simplify the presentation of deferred taxes. The new guidance requires that all deferred tax assets and liabilities, along with any related valuation allowance, be classified as noncurrent on the balance sheet, as opposed to being presented as current and non-current. This guidance is required to be adopted for annual periods beginning after December 15, 2016, and interim periods within those annual periods. In the fourth quarter of fiscal 2016, the Company elected to early adopt the guidance retrospectively. The adoption resulted in a reclassification of \$10.7 million of current deferred income tax assets and \$9.7 million of non-current deferred income tax liabilities to non-current deferred income tax assets in the Company's consolidated balance sheet as of October 3, 2015.

In April 2015, the FASB issued an amendment that requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. Under the new guidance, the recognition and measurement of debt issuance costs is not affected. This guidance is effective for annual periods beginning on or after December 15, 2015. In the fourth quarter of fiscal 2016, the Company elected to early adopt the guidance retrospectively. The adoption resulted in a reclassification of \$1.0 million of deferred financing costs from other non-current assets to long-term debt and capital lease obligations, net of current portion in the Company's consolidated balance sheet as of October 3, 2015.

In May 2014, the FASB issued amended guidance for revenue recognition. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under current guidance. This may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In July 2015 the FASB approved a one-year deferral of the standard. The new standard will become effective retrospectively for the Company for the fiscal first quarter of 2019, with early adoption permitted, but not before the original effective date (fiscal first quarter of 2018). The Company is currently in the process of evaluating the impact of the adoption of this guidance on its Consolidated Financial Statements.

Plexus Corp.**Notes to Consolidated Financial Statements**

The Company has determined that no other recently issued accounting standards will have a material impact on its Consolidated Financial Statements, or will not apply to its operations.

2. Inventories

Inventories as of October 1, 2016 and October 3, 2015 consisted of the following (in thousands):

	<u>2016</u>	<u>2015</u>
Raw materials	\$414,303	\$407,637
Work-in-process	69,423	84,472
Finished goods	<u>80,405</u>	<u>77,262</u>
Total inventories	<u>\$564,131</u>	<u>\$569,371</u>

In certain circumstances, per contractual terms, customer deposits are received by the Company to offset obsolete and excess inventory risks. The total amount of customer deposits related to inventory and included within current liabilities on the accompanying Consolidated Balance Sheets as of October 1, 2016 and October 3, 2015 was \$74.6 million and \$64.3 million, respectively.

3. Property, Plant and Equipment

Property, plant and equipment as of October 1, 2016 and October 3, 2015 consisted of the following (in thousands):

	<u>2016</u>	<u>2015</u>
Land, buildings and improvements	\$ 247,806	\$ 278,637
Machinery and equipment	336,378	334,257
Computer hardware and software	107,239	102,763
Construction in progress	<u>4,298</u>	<u>9,175</u>
Total property, plant and equipment, gross	695,721	724,832
Less: accumulated depreciation	<u>(404,496)</u>	<u>(407,481)</u>
Total property, plant and equipment, net	<u>\$ 291,225</u>	<u>\$ 317,351</u>

Assets held under capital leases and included in property, plant and equipment as of October 1, 2016 and October 3, 2015 consisted of the following (in thousands):

	<u>2016</u>	<u>2015</u>
Buildings and improvements	\$ 4,801	\$ 22,953
Machinery and equipment	<u>6,070</u>	<u>3,757</u>
Total property, plant and equipment held under capital leases, gross	10,871	26,710
Less: accumulated amortization	<u>(7,375)</u>	<u>(22,201)</u>
Total property, plant and equipment held under capital leases, net	<u>\$ 3,496</u>	<u>\$ 4,509</u>

As of October 3, 2015, the building and improvements category in the table above included a subleased manufacturing facility in San Diego, California recorded at a gross and net book value of approximately \$17.9 million and \$1.9 million, respectively. The lease expired during the year and the related asset had no value at the end of fiscal 2016.

Plexus Corp.**Notes to Consolidated Financial Statements**

Amortization of assets held under capital leases totaled \$1.9 million, \$0.5 million and \$0.6 million for fiscal 2016, 2015 and 2014, respectively. Capital lease additions totaled \$2.9 million, \$1.2 million, and \$1.4 million for fiscal 2016, 2015 and 2014, respectively.

As of October 1, 2016, October 3, 2015 and September 27, 2014, accounts payable included approximately \$3.5 million, \$2.7 million and \$7.0 million, respectively, related to the purchase of property, plant and equipment, which have been treated as non-cash transactions for purposes of the Consolidated Statements of Cash Flows.

The Company's lease agreement for the building shell and land of its facility in Guadalajara, Mexico, includes a 10-year base lease term that commenced upon the completion of construction during the fourth quarter of fiscal 2014, with two 5-year renewal options. This lease did not qualify as a sale-leaseback transaction, and was accounted for as a non-cash financing transaction. Since the Company believes that it will exercise both renewal options, the lease is being accounted for using a 20 year lease term.

During the third quarter of fiscal 2014, the Company capitalized the building shell in Guadalajara as a non-cash financing obligation of approximately \$8.0 million, which will be increased by interest expense and land rent expense, and reduced by contractual payments. As of October 1, 2016 and October 3, 2015, the balance of the related financing obligation totaled \$8.4 million and \$8.2 million, respectively. The Company capitalized related leasehold improvements of \$1.4 million during fiscal 2015, which are included in "Property, plant and equipment" in the Consolidated Balance Sheets, and depreciated accordingly; no leasehold improvements were capitalized during fiscal 2016. At the end of the 20-year lease term, the net book value of the assets will approximate the balance of the financing obligation. If the Company does not exercise both renewal options or exercises the first but not the second, it would record a loss related to the disposal of the underlying assets in operating results of \$4.1 million in fiscal 2024 or \$0.8 million in fiscal 2029.

The future minimum payments under the remainder of the ten-year base lease agreement, as well as the two five-year renewal options, are as follows (in thousands):

2017	\$ 1,476
2018	1,513
2019	1,550
2020	1,589
2021	1,629
2022 through 2024	5,135
	<u>\$12,892</u>
2025 through 2029	\$ 9,451
2030 through 2034	<u>\$10,870</u>

Plexus Corp.**Notes to Consolidated Financial Statements****4. Debt, Capital Lease Obligations and Other Financing**

Debt and capital lease obligations as of October 1, 2016 and October 3, 2015, consisted of the following (in thousands):

	<u>2016</u>	<u>2015</u>
Borrowings under the credit facility	\$ 75,000	\$ 75,000
5.20% Senior notes, due June 15, 2018	175,000	175,000
Capital lease, non-cash financing of leased facility and other obligations	13,614	12,770
Unamortized deferred financing fees	<u>(1,105)</u>	<u>(964)</u>
Total obligations	262,509	261,806
Less: current portion	<u>(78,507)</u>	<u>(3,513)</u>
Long-term debt and capital lease obligations, net of current portion	<u>\$184,002</u>	<u>\$258,293</u>

The Company's weighted average interest rate on capital lease obligations was 5.58% and 7.59% as of October 1, 2016 and October 3, 2015, respectively.

The aggregate scheduled maturities of the Company's debt obligations as of October 1, 2016, are as follows (in thousands):

2017	\$ 75,000
2018	175,000
2019	—
2020	—
2021	—
Thereafter	<u>—</u>
Total	<u>\$250,000</u>

The aggregate scheduled maturities of the Company's obligations under capital leases and other short-term borrowings (excluding capital lease payments related to the Guadalajara plant disclosed in Note 3, "Property, Plant and Equipment") as of October 1, 2016, are as follows (in thousands):

2017	\$3,507
2018	927
2019	482
2020	183
2021	143
Thereafter	<u>—</u>
Total	<u>\$5,242</u>

The Company has a senior unsecured revolving credit facility (the "Credit Facility"), which was amended on July 5, 2016, to, among other changes, extend its expiration from May 15, 2019, to July 5, 2021, and increase the maximum commitment from \$265.0 million to \$300.0 million. The Credit Facility, as amended, may be further increased to \$500.0 million, generally by mutual agreement of the Company and the lenders, subject to certain customary conditions. During fiscal 2016, the highest daily borrowing was \$232.0 million, the average daily borrowings were \$188.6 million, and the Company borrowed and repaid \$625.0 million of revolving borrowings under the Credit Facility.

Plexus Corp.

Notes to Consolidated Financial Statements

The financial covenants (as defined under the related Credit Agreement) require that the Company maintain, as of each fiscal quarter end, a maximum total leverage ratio and a minimum interest coverage ratio. As of October 1, 2016, the Company was in compliance with all financial covenants of the Credit Agreement. Borrowings under the Credit Facility bear interest, at the Company's option, at a eurocurrency or base rate plus, in each case, an applicable interest rate margin based on the Company's then-current leverage ratio (as defined in the Credit Agreement). As of October 1, 2016, the borrowing rate under the Credit Agreement was LIBOR plus 1.125% (or 1.648%). As of October 1, 2016, the \$75.0 million of outstanding debt under the Credit Facility is effectively at a fixed interest rate as a result of a \$75.0 million notional amount of interest rate swap contracts discussed in Note 5, "Derivatives and Fair Value Measurements." The Company is required to pay an annual commitment fee on the unused revolver credit commitment based on the Company's leverage ratio; the fee was 0.175% as of October 1, 2016.

The Company also has outstanding 5.20% Senior Notes, due on June 15, 2018 (the "Notes"). As of October 1, 2016 and October 3, 2015, \$175.0 million was outstanding, and the Company was in compliance with all financial covenants relating to the Notes, which are generally consistent with those in the Credit Agreement discussed above.

5. Derivatives and Fair Value Measurements

All derivatives are recognized in the accompanying Consolidated Balance Sheets at their estimated fair value. The Company uses derivatives to manage the variability of foreign currency obligations and interest rates. The Company has cash flow hedges related to variable rate debt and forecasted foreign currency obligations, in addition to non-designated hedges to manage foreign currency exposures associated with certain foreign currency denominated assets and liabilities. The Company does not enter into derivatives for speculative purposes.

ASC Topic 815-10, "Derivatives and Hedging," requires companies to recognize all derivative instruments as either assets or liabilities at fair value in the statement of financial position. In accordance with ASC Topic 815-10, the Company designates some foreign currency exchange contracts and float-to-fixed interest rate derivative contracts as cash flow hedges of forecasted foreign currency expenses and of variable rate interest payments, respectively.

Changes in the fair value of the derivatives that qualify as cash flow hedges are recorded in "Accumulated other comprehensive loss" in the accompanying Consolidated Balance Sheets until earnings are affected by the variability of the cash flows. In the next twelve months, the Company estimates that \$0.6 million of unrealized losses, net of tax, related to cash flow hedges will be reclassified from other comprehensive loss into earnings. Changes in the fair value of the non-designated derivatives related to recognized foreign currency denominated assets and liabilities are recorded in "Miscellaneous income (expense)" in the accompanying Consolidated Statements of Comprehensive Income.

The Company enters into forward currency exchange contracts for its Malaysian operations on a rolling basis. The Company had cash flow hedges outstanding with a notional value of \$73.7 million as of October 1, 2016 and a notional value of \$67.0 million as of October 3, 2015. These forward currency contracts fix the exchange rates for the settlement of future foreign currency obligations that have yet to be realized. The total fair value of the forward currency exchange contracts was a \$0.5 million liability as of October 1, 2016 and an \$9.4 million liability as of October 3, 2015.

The Company had additional forward currency exchange contracts outstanding as of October 1, 2016, with a notional value of \$109.6 million; there were no such contracts outstanding as of October 3, 2015. The Company did not designate these derivative instruments as hedging instruments. In accordance with ASC Topic 815-10, the

Plexus Corp.

Notes to Consolidated Financial Statements

net settlement amount (fair value) related to these contracts is recorded on the Consolidated Balance Sheets as either a current or long-term asset or liability, depending on the term, and as an element of “Other income (expense).” The total fair value of these derivatives was a \$0.1 million asset as of October 1, 2016.

In 2013, the Company entered into a \$75.0 million notional amount interest rate swap contract, which expires on May 5, 2017, related to \$75.0 million of borrowings outstanding under the Credit Facility. This interest rate swap pays the Company variable interest at the one month LIBOR rate, and the Company pays the counterparty a fixed interest rate. The fixed interest rate for the contract is 0.875%. Based on the terms of the interest rate swap contract and the underlying borrowings outstanding under the Credit Facility, the interest rate contract was determined to be effective, and thus qualifies as a cash flow hedge. As such, any changes in the fair value of the interest rate swap are recorded in “Accumulated other comprehensive loss” on the accompanying Consolidated Balance Sheets until earnings are affected by the variability of cash flows. The total fair value of the interest rate swap contract as of October 1, 2016, was a \$0.1 million liability and a \$0.5 million liability as of October 3, 2015. The notional amount of the Company’s interest rate swap was \$75.0 million as of both October 1, 2016 and October 3, 2015.

The tables below present information regarding the fair values of derivative instruments (as defined in Note 1, “Description of Business and Significant Accounting Policies”) and the effects of derivative instruments on the Company’s Consolidated Financial Statements:

Fair Values of Derivative Instruments						
<i>In thousands of dollars</i>

Notes to Consolidated Financial Statements

Derivative Impact on Gain (Loss) Recognized in Income for the Twelve Months Ended

In thousands of dollars

Derivatives in Cash Flow Hedging Relationships	Classification of Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)	Amount of Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)		
		October 1, 2016	October 3, 2015	September 27, 2014
Interest rate swaps	Interest expense	\$ (381)	\$ (579)	\$(542)
Forward currency forward contracts	Selling and administrative expenses	\$ (350)	\$ (597)	\$(106)
Forward currency forward contracts	Cost of goods sold	\$(3,261)	\$(4,843)	\$(503)
Treasury Rate Locks	Interest expense	\$ 320	\$ 324	\$ 321
Treasury Rate Locks	Income tax expense	\$ —	\$ —	\$ 70

Derivatives Not Designated as Hedging Instruments	Location of Gain (Loss) Recognized on Derivatives in Income	Amount of Gain (Loss) on Derivatives Recognized in Income		
		October 1, 2016	October 3, 2015	September 27, 2014
Forward currency forward contracts	Miscellaneous income (expense)	\$121	\$164	\$—

There were no gains or losses recognized in income for derivatives related to ineffective portions and amounts excluded from effectiveness testing for fiscal years 2016, 2015 and 2014.

The following table lists the fair values of liabilities of the Company's derivatives as of October 1, 2016, by input level as defined in Note 1, "Description of Business and Significant Accounting Policies":

Fair Value Measurements Using Input Levels Asset/(Liability)

In thousands of dollars

Fiscal year ended October 1, 2016	Level 1	Level 2	Level 3	Total
Derivatives				
Interest rate swaps	\$—	\$ (132)	\$—	\$ (132)
Forward currency forward contracts	\$—	\$ (434)	\$—	\$ (434)
Fiscal year ended October 3, 2015				
Derivatives				
Interest rate swaps	\$—	\$ (497)	\$—	\$ (497)
Forward currency forward contracts	\$—	\$(9,408)	\$—	\$(9,408)

The fair value of interest rate swaps and foreign currency forward contracts is determined using a market approach, which includes obtaining directly or indirectly observable values from third parties active in the relevant markets. The primary input in the fair value of the interest rate swaps is the relevant LIBOR forward curve. Inputs in the fair value of the foreign currency forward contracts include prevailing forward and spot prices for currency and interest rate forward curves.

Plexus Corp.
Notes to Consolidated Financial Statements

6. Income Taxes

The domestic and foreign components of income (loss) before income tax expense for fiscal 2016, 2015 and 2014 were as follows (in thousands):

	<u>2016</u>	<u>2015</u>	<u>2014</u>
U.S.	\$ (26,796)	\$ (32,480)	\$ (12,473)
Foreign	<u>114,190</u>	<u>138,775</u>	<u>105,798</u>
	<u>\$ 87,394</u>	<u>\$106,295</u>	<u>\$ 93,325</u>

Income tax expense (benefit) for fiscal 2016, 2015 and 2014 were as follows (in thousands):

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Current:			
Federal	\$ —	\$ —	\$ (2,050)
State	(15)	(397)	(332)
Foreign	<u>11,312</u>	<u>12,957</u>	<u>10,147</u>
	<u>11,297</u>	<u>12,560</u>	<u>7,765</u>
Deferred:			
Federal	—	—	(1,506)
State	24	(399)	—
Foreign	<u>(354)</u>	<u>(198)</u>	<u>(147)</u>
	<u>(330)</u>	<u>(597)</u>	<u>(1,653)</u>
	<u>\$10,967</u>	<u>\$11,963</u>	<u>\$ 6,112</u>

The following is a reconciliation of the federal statutory income tax rate to the effective income tax rates reflected in the Consolidated Statements of Comprehensive Income for fiscal 2016, 2015 and 2014:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Federal statutory income tax rate	35.0%	35.0%	35.0%
Increase (decrease) resulting from:			
Permanent differences	1.6	1.3	1.8
Foreign tax rate differences	(36.3)	(38.0)	(33.2)
Disregarded entity benefit	(1.8)	(1.2)	(1.8)
Dividend repatriation	32.9	—	—
Valuation allowances	(18.7)	16.5	8.4
Other, net	<u>(0.1)</u>	<u>(2.3)</u>	<u>(3.7)</u>
Effective income tax rate	<u>12.6%</u>	<u>11.3%</u>	<u>6.5%</u>

The Company recorded income tax expense of \$11.0 million, \$12.0 million and \$6.1 million for fiscal 2016, 2015 and 2014, respectively.

The effective tax rate for fiscal 2016 was higher than the effective tax rate for fiscal 2015 primarily as a result of the overall decrease in income before taxes in jurisdictions where the Company does not pay taxes. The effective tax rate for fiscal 2015 is higher than that of fiscal 2014 primarily as a result of the geographic distribution of worldwide earnings and tax benefits recorded in fiscal 2014 due to the lapse of statute of limitations related to certain U.S. tax examinations.

Plexus Corp.**Notes to Consolidated Financial Statements**

During fiscal 2016, the Company repatriated \$100.0 million of current year foreign earnings from the APAC region to the U.S., which had no income statement impact due to U.S. net operating losses, the use of U.S. tax credits and the reversal of the related valuation allowance. The repatriation does not impact the permanently reinvested assertions made by the Company regarding prior period foreign earnings as the remittance was distributed exclusively from current year foreign earnings. The Company does not have a history of repatriating foreign earnings by way of a taxable dividend and considers the fiscal 2016 remittance to be an isolated occurrence. The Company does not anticipate a similar repatriation in the foreseeable future.

During fiscal 2015, the Company recorded a \$17.5 million addition to its valuation allowance relating to continuing losses in certain jurisdictions within the AMER and EMEA regions.

During fiscal 2014, the Company recorded a \$7.9 million addition to its valuation allowance related to continuing losses in certain jurisdictions within the AMER and EMEA regions. During fiscal 2014, the Company also recorded tax benefits of \$3.8 million primarily due to the lapse of statute of limitations related to certain U.S. tax examinations during the fiscal year.

The components of the net deferred income tax assets as of October 1, 2016 and October 3, 2015, were as follows (in thousands):

	<u>2016</u>	<u>2015</u>
Deferred income tax assets:		
Loss/credit carryforwards	\$ 24,017	\$ 39,380
Inventories	7,527	7,799
Accrued benefits	25,493	25,180
Allowance for bad debts	461	321
Other	<u>2,822</u>	<u>3,724</u>
Total gross deferred income tax assets	60,320	76,404
Less valuation allowances	<u>(41,002)</u>	<u>(58,343)</u>
Deferred income tax assets	<u>19,318</u>	<u>18,061</u>
Deferred income tax liabilities:		
Property, plant and equipment	14,400	13,320
Other	<u>84</u>	<u>84</u>
Deferred income tax liabilities	<u>14,484</u>	<u>13,404</u>
Net deferred income tax assets	<u>\$ 4,834</u>	<u>\$ 4,657</u>

During fiscal 2016, the Company's valuation allowance decreased by \$17.3 million. This decrease is primarily the result of the dividend remitted from current year foreign earnings discussed above.

As of October 1, 2016, the Company had approximately \$148.0 million of pre-tax state net operating loss carryforwards that expire between fiscal 2017 and 2037. These state net operating losses have a full valuation allowance against them.

As a result of using the with-and-without method under the requirements for accounting for stock-based compensation, the Company has an unrecognized net operating loss carryforward of \$4.9 million related to tax deductions in excess of compensation expense for stock options. This deduction will remain unrecognized until the related deductions result in a reduction to income taxes payable.

During fiscal 2016, tax legislation was adopted in various jurisdictions. None of these changes are expected to have a material impact on the Company's consolidated financial condition, results of operations or cash flows.

Plexus Corp.**Notes to Consolidated Financial Statements**

The Company has been granted a tax holiday for a foreign subsidiary in the APAC region. This tax holiday will expire on December 31, 2024, and is subject to certain conditions with which the Company expects to comply. The Company benefited from a second tax holiday within the APAC region, which under the terms of the Company's agreement with the local taxing authority expired on December 31, 2013. During fiscal 2016, 2015 and 2014, these tax holidays resulted in tax reductions of approximately \$27.1 million (\$0.81 per basic share), \$29.9 million (\$0.89 per basic share) and \$24.1 million (\$0.71 per basic share), respectively.

The Company does not provide for taxes that would be payable if undistributed earnings of foreign subsidiaries were remitted because the Company considers these earnings to be permanently reinvested. The aggregate undistributed earnings of the Company's foreign subsidiaries for which a deferred income tax liability has not been recorded was approximately \$836.6 million as of October 1, 2016. If such earnings were repatriated, additional tax expense may result, although the calculation of such additional taxes is not practicable at this time.

The Company has approximately \$2.8 million of uncertain tax benefits as of October 1, 2016. The Company has classified these amounts in the Consolidated Balance Sheets as "Other liabilities" (noncurrent) in the amount of \$0.6 million and an offset to "Deferred income taxes" (noncurrent asset) in the amount of \$2.2 million. The Company has classified these amounts as "Other liabilities" (noncurrent) and "Deferred income taxes" (noncurrent asset) to the extent that payment is not anticipated within one year.

The following is a reconciliation of the beginning and ending amounts of unrecognized income tax benefits (in thousands):

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Balance at beginning of fiscal year	\$2,353	\$2,368	\$ 7,436
Gross increases for tax positions of prior years	534	73	324
Gross increases for tax positions of the current year	—	—	—
Gross decreases for tax positions of prior years	(88)	(88)	(1,582)
Lapse of applicable statute of limitations	—	—	(3,810)
Settlements	—	—	—
Balance at end of fiscal year	<u>\$2,799</u>	<u>\$2,353</u>	<u>\$ 2,368</u>

The amount of unrecognized tax benefits that, if recognized, would impact the effective tax rate is \$0.6 million for each of the fiscal years ended October 1, 2016 and October 3, 2015.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in income tax expense. The total accrued penalties and net accrued interest with respect to income taxes was approximately \$0.2 million for each of the fiscal years ended October 1, 2016, October 3, 2015 and September 27, 2014. The Company recognized \$0.1 million of expense for accrued penalties and net accrued interest in the Consolidated Statements of Comprehensive Income for each of the fiscal years ended October 1, 2016, October 3, 2015 and September 27, 2014.

It is possible that a number of uncertain tax positions related to federal and state tax positions may be settled within the next 12 months. Settlement of these matters is not expected to have a material effect on the Company's consolidated results of operations, financial position and cash flows. The Company is not currently

Plexus Corp.**Notes to Consolidated Financial Statements**

under examination by taxing authorities in the U.S. or foreign jurisdictions in which the Company operates. The Company is not aware of any material proposed adjustment that has not been reflected in the current financial statements.

The Company files income tax returns, including returns for its subsidiaries, with federal, state, local and foreign taxing jurisdictions. The following tax years remain subject to examination by the respective major tax jurisdictions:

<u>Jurisdiction</u>	<u>Fiscal Years</u>
China	2011-2016
Germany	2011-2016
Mexico	2011-2016
Romania	2010-2016
United Kingdom	2013-2016
United States	
Federal	2011, 2013-2016
State	2003-2016

7. Earnings Per Share

The following is a reconciliation of the amounts utilized in the computation of basic and diluted earnings per share for fiscal 2016, 2015 and 2014 (in thousands, except per share amounts):

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Net income	\$ 76,427	\$ 94,332	\$ 87,213
Basic weighted average common shares outstanding	33,374	33,618	33,785
Dilutive effect of share-based awards outstanding	724	761	870
Diluted weighted average shares outstanding	<u>34,098</u>	<u>34,379</u>	<u>34,655</u>
Earnings per share:			
Basic	<u>\$ 2.29</u>	<u>\$ 2.81</u>	<u>\$ 2.58</u>
Diluted	<u>\$ 2.24</u>	<u>\$ 2.74</u>	<u>\$ 2.52</u>

In fiscal 2016, 2015 and 2014, share-based awards for approximately 0.8 million, 0.7 million and 0.5 million shares, respectively, were not included in the computation of diluted earnings per share as they were antidilutive.

Outstanding shares have decreased in recent years as a result of the Company's stock repurchase programs. Refer to Note 13, "Shareholders' Equity" for further information on the Company's stock repurchase programs.

8. Operating Lease Commitments

The Company has a number of operating lease agreements primarily involving manufacturing facilities, manufacturing equipment and computerized design equipment. These leases are non-cancelable and expire on various dates through 2022, and many contain renewal and/or purchase options. Rent expense under all operating leases for fiscal 2016, 2015 and 2014 was approximately \$13.6 million, \$14.4 million and \$15.1 million, respectively.

Plexus Corp.**Notes to Consolidated Financial Statements**

Future minimum annual payments on operating leases are as follows (in thousands):

2017	\$ 8,500
2018	6,634
2019	5,455
2020	5,130
2021	2,795
Thereafter	<u>751</u>
Total future minimum operating lease payments	<u>\$29,265</u>

9. Benefit Plans

401(k) Savings Plan: The Company's 401(k) Retirement Plan covers all eligible U.S. employees. The Company matches employee contributions up to 4.0% of eligible earnings. The Company's contributions for fiscal 2016, 2015 and 2014 totaled \$7.4 million, \$7.2 million and \$7.2 million, respectively.

Stock-based Compensation Plans: During fiscal 2016 the Company's shareholders approved the Plexus Corp. 2016 Omnibus Incentive Plan (the "2016 Plan"). The 2016 Plan is a stock and cash-based incentive plan, and includes provisions by which the Company may grant executive officers, employees and directors stock options, stock appreciation rights ("SARs"), restricted stock (including restricted stock units ("RSUs"), performance stock awards (including performance stock units ("PSUs"), other stock awards and cash incentive awards. Similar awards were offered under its predecessor, the 2008 Long-Term Incentive Plan (the "2008 Plan"), which is no longer being used for grants; however, outstanding awards granted under the 2008 Plan and its predecessors continue until vesting, exercise, forfeiture or expiration.

The maximum number of shares of Plexus common stock that may be issued pursuant to the 2016 Plan is 3.2 million shares; in addition, cash incentive awards of up to \$4.0 million per employee may be granted annually. The exercise price of each stock option and SAR granted must not be less than the fair market value on the date of grant. The Compensation and Leadership Development Committee (the "Committee") of the Board of Directors may establish a term and vesting period for awards under the 2016 Plan as well as accelerate the vesting of such awards. Generally, stock options vest in two annual installments and have a term of ten years. SARs vest in two annual installments and have a term of seven years. RSUs granted to executive officers, other officers and key employees generally vest on the third anniversary of the grant date (assuming continued employment), which is also the date as of which the underlying shares will be issued. Vesting of PSUs is dependent on performance related to pre-defined metrics, including the relative performance of the Company's stock price as compared to the companies in the Russell 3000 Index during the three-year performance period. The Committee also grants RSUs to non-employee directors, which generally fully vest on the first anniversary of the grant date, which is also the date the underlying shares are issued (unless further deferred).

Individual stock option and SARs grants are determined annually, but granted on a quarterly basis. Grants of RSUs and PSUs are generally made only on an annual basis.

In fiscal 2016, the Company granted options to purchase 0.2 million shares of the Company's common stock. Additionally, the Company granted RSUs for 0.4 million shares of common stock and PSUs for 0.1 million shares (at target).

In fiscal 2015, the Company granted options to purchase 0.1 million shares of the Company's common stock and 0.1 million stock-settled SARs. Additionally, the Company granted RSUs for 0.2 million shares of common stock and awards of PSUs for 0.1 million shares (at target).

Plexus Corp.

Notes to Consolidated Financial Statements

In fiscal 2014, the Company granted options to purchase 0.2 million shares of the Company's common stock and 0.1 million stock-settled SARs. Additionally, the Company granted RSUs for 0.2 million shares of common stock and awards of PSUs for 0.1 million shares (at target).

The Company recognized \$19.3 million, \$13.3 million and \$13.0 million of compensation expense associated with stock-based awards in fiscal 2016, 2015 and 2014, respectively. No deferred tax benefits related to equity awards were recognized in fiscal 2016, 2015 or 2014. Included in the \$19.3 million of total stock-based compensation expense for the year ended October 1, 2016, was \$5.2 million related to modifications of awards held by the Company's former President and Chief Executive Officer. The award modifications were the result of accelerated vesting of previously unvested awards upon his retirement.

A summary of the Company's stock option and SAR activity follows:

	Number of Options/SARs (in thousands)	Weighted Average Exercise Price	Aggregate Intrinsic Value (in thousands)
Outstanding as of September 28, 2013	3,065	\$29.27	
Granted	318	41.39	
Canceled	(105)	32.44	
Exercised	<u>(1,008)</u>	27.41	
Outstanding as of September 27, 2014	2,270	\$31.65	
Granted	221	39.53	
Canceled	(25)	36.50	
Exercised	<u>(549)</u>	28.93	
Outstanding as of October 3, 2015	1,917	\$33.27	
Granted	229	39.52	
Canceled	(66)	41.48	
Exercised	<u>(619)</u>	31.59	
Outstanding as of October 1, 2016	<u>1,461</u>	<u>\$34.59</u>	<u>\$17,809</u>

	Number of Options/SARs (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Life (years)	Aggregate Intrinsic Value (in thousands)
Exercisable as of:				
September 27, 2014	<u>1,772</u>	<u>\$30.45</u>		
October 3, 2015	<u>1,560</u>	<u>\$31.67</u>		
October 1, 2016	<u>1,125</u>	<u>\$33.11</u>	<u>5.24</u>	<u>\$15,375</u>

The following table summarizes outstanding stock option and SAR information as of October 1, 2016 (Options/SARs in thousands):

Range of Exercise Prices	Number of Options/ SARs Outstanding (in thousands)	Weighted Average Exercise Price	Weighted Average Remaining Life (years)	Number of Options/ SARs Exercisable (in thousands)	Weighted Average Exercise Price
\$14.17 - \$29.80	390	\$25.80	4.29	390	\$25.80
\$29.81 - \$36.79	419	\$33.20	5.98	313	\$32.77
\$36.80 - \$40.64	374	\$38.65	6.45	293	\$38.83
\$40.65 - \$45.35	<u>277</u>	<u>\$43.55</u>	<u>8.47</u>	<u>128</u>	<u>\$43.10</u>
\$14.17 - \$45.35	1,461	\$34.59	6.12	1,125	\$33.11

Plexus Corp.**Notes to Consolidated Financial Statements**

The Company uses the Black-Scholes valuation model to value options and SARs. The Company used its historical stock prices as the basis for its volatility assumptions. The assumed risk-free rates were based on U.S. Treasury rates in effect at the time of grant with a term consistent with the expected option and SAR lives. The expected options and SARs lives represent the period of time that the options and SARs granted are expected to be outstanding and were based on historical experience.

The weighted average fair value per share of options and SARs granted for fiscal 2016, 2015 and 2014 were \$12.82, \$14.55 and \$15.78, respectively. The fair value of each option and SAR grant was estimated at the date of grant using the Black-Scholes option-pricing model based on the assumption ranges below:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Expected life (years)	5.70	4.50 - 5.70	4.50 - 5.00
Risk-free interest rate	1.23 - 1.87%	1.52 - 1.64%	1.24 - 1.86%
Expected volatility	35 - 37%	37 - 38%	38 - 47%
Dividend yield	—	—	—

The fair value of options and SARs vested for fiscal 2016, 2015 and 2014 was \$3.6 million, \$5.5 million and \$6.1 million, respectively.

For fiscal 2016, 2015 and 2014, the total intrinsic value of options and SARs exercised was \$7.4 million, \$7.7 million and \$13.5 million, respectively.

As of October 1, 2016, there was \$2.6 million of unrecognized compensation cost related to non-vested options and SARs that is expected to be recognized over a weighted average period of 1.1 years.

A summary of the Company's PSU and RSU activity follows:

	<u>Number of Shares (in thousands)</u>	<u>Weighted Average Fair Value at Date of Grant</u>	<u>Aggregate Intrinsic Value (in thousands)</u>
Units outstanding as of September 28, 2013	654	\$29.73	
Granted	302	40.76	
Canceled	(92)	31.89	
Vested	(134)	41.06	
Units outstanding as of September 27, 2014	730	\$31.97	
Granted	325	41.46	
Canceled	(43)	35.15	
Vested	(216)	37.52	
Units outstanding as of October 3, 2015	796	\$38.18	
Granted	499	39.68	
Canceled	(29)	36.84	
Vested	(244)	27.77	
Units outstanding as of October 1, 2016	<u>1,022</u>	<u>\$41.49</u>	<u>\$47,796</u>

The Company uses the fair value at the date of grant to value RSUs. As of October 1, 2016, there was \$15.8 million of unrecognized compensation cost related to RSUs that is expected to be recognized over a weighted average period of 1.8 years.

Plexus Corp.

Notes to Consolidated Financial Statements

The Company uses the Monte Carlo valuation model to determine the fair value of PSUs at the date of grant. The PSUs granted in fiscal 2016 and prior years are payable in shares and vest based on the relative total shareholder return of the Company's common stock as compared to the Russell 3000 Index over a three year performance period. The number of shares that may be issued pursuant to PSUs ranges from zero to 0.3 million. The Company recognizes stock-based compensation expense over the PSUs' vesting period. No PSUs vested during the fiscal year ended October 1, 2016. There were 0.1 million PSUs granted during fiscal 2016, 2015 and 2014.

As of October 1, 2016, there was \$2.4 million of unrecognized compensation cost related to PSUs that is expected to be recognized over a weighted average period of 1.9 years.

Deferred Compensation Arrangements: The Company has agreements with certain former executive officers to provide nonqualified deferred compensation. Under these agreements, the Company agrees to pay these former executives, or their designated beneficiaries upon such executives' deaths, certain amounts annually for the first 15 years subsequent to their retirement. As of October 1, 2016 and October 3, 2015, the related deferred compensation liability associated with these arrangements totaled \$0.6 million and \$1.3 million, respectively.

The Company maintains investments in a trust account to fund required payments under the deferred compensation plan. As of October 1, 2016 and October 3, 2015, the total value of the assets held by the trust totaled \$9.3 million and \$8.9 million, respectively, and was recorded at fair value on a recurring basis. These assets were classified as Level 2 in the fair value hierarchy discussed in Note 1, "Description of Business and Significant Accounting Policies." During fiscal 2016, 2015 and 2014, the Company made payments to the participants in the amount of \$0.8 million, \$0.9 million and \$0.8 million, respectively.

Supplemental Executive Retirement Plan: The Company also maintains a supplemental executive retirement plan (the "SERP") as an additional deferred compensation plan for executive officers. Under the SERP, a covered executive may elect to defer some or all of the participant's compensation into the plan, and the Company may credit the participant's account with a discretionary employer contribution. Participants are entitled to payment of deferred amounts and any related earnings upon termination or retirement from Plexus.

The SERP operates under a rabbi trust arrangement (the "Trust"). The Trust allows investment of deferred compensation held on behalf of the participants into individual accounts and, within these accounts, into one or more designated investments. Investment choices do not include Plexus stock. During fiscal 2016, 2015 and 2014, the Company made contributions to the participants' SERP accounts in the amount of \$0.5 million, \$0.5 million and \$0.7 million, respectively.

As of October 1, 2016 and October 3, 2015, the SERP assets held in the Trust totaled \$9.5 million and \$8.3 million, respectively, and the related liability to the participants totaled approximately \$9.8 million and \$6.9 million as of October 1, 2016 and October 3, 2015, respectively. As of October 1, 2016 and October 3, 2015, the SERP assets held in the Trust were recorded at fair value on a recurring basis, and were classified as Level 2 in the fair value hierarchy discussed in Note 1, "Description of Business and Significant Accounting Policies."

The Trust assets are subject to the claims of the Company's creditors. The deferred compensation and Trust assets and the related liabilities to the participants are included in non-current "Other assets" and non-current "Other liabilities," respectively, in the accompanying Consolidated Balance Sheets.

Other: The Company currently does not, and is not obligated to, provide any postretirement medical or life insurance benefits to employees.

Plexus Corp.**Notes to Consolidated Financial Statements****10. Litigation**

The Company is party to lawsuits in the ordinary course of business. Management does not believe that these proceedings, individually or in the aggregate, will have a material positive or adverse effect on the Company's consolidated financial position, results of operations or cash flows.

11. Reportable Segments, Geographic Information and Major Customers

Reportable segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or group, in assessing performance and allocating resources. The Company uses an internal management reporting system, which provides important financial data to evaluate performance and allocate the Company's resources on a regional basis. Net sales for the segments are attributed to the region in which the product is manufactured or the service is performed. The services provided, manufacturing processes used, class of customers serviced and order fulfillment processes used are similar and generally interchangeable across the segments. A segment's performance is evaluated based upon its operating income (loss). A segment's operating income (loss) includes its net sales less cost of sales and selling and administrative expenses, but excludes corporate and other expenses. Corporate and other expenses primarily represent corporate selling and administrative expenses, and restructuring and other charges, if any. Losses incurred from a typhoon that impacted APAC in fiscal 2016 are excluded from the segment results and included within corporate and other expenses. These costs are not allocated to the segments, as management excludes such costs when assessing the performance of the segments. Inter-segment transactions are generally recorded at amounts that approximate arm's length transactions. The accounting policies for the segments are the same as for the Company taken as a whole.

Plexus Corp.
Notes to Consolidated Financial Statements

Information about the Company's three reportable segments for fiscal 2016, 2015 and 2014 is as follows (in thousands):

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Net sales:			
AMER	\$1,328,760	\$1,389,017	\$1,238,225

Plexus Corp.**Notes to Consolidated Financial Statements**

The following information is provided in accordance with the required segment disclosures for fiscal 2016, 2015 and 2014. Net sales were based on the Company's location providing the product or service (in thousands):

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Net sales:			
United States	\$1,134,342	\$1,303,106	\$1,188,068
Malaysia	844,501	926,059	798,447
China	317,350	359,846	334,056
Mexico	194,418	85,911	50,157
United Kingdom	81,894	70,335	72,443
Romania	83,712	65,338	39,030
Germany	4,844	4,619	4,420
Elimination of inter-segment sales	<u>(105,057)</u>	<u>(160,924)</u>	<u>(108,372)</u>
	<u>\$2,556,004</u>	<u>\$2,654,290</u>	<u>\$2,378,249</u>
	<u>October 1, 2016</u>	<u>October 3, 2015</u>	
Long-lived assets:			
United States	\$ 92,152	\$101,712	
Malaysia	71,596	72,327	
China	19,197	24,236	
Mexico	39,155	39,002	
United Kingdom	6,594	11,506	
Romania	30,408	30,553	
Germany	307	405	
Other Foreign	4,940	4,689	
Corporate	<u>26,876</u>	<u>32,921</u>	
	<u>\$291,225</u>	<u>\$317,351</u>	

As the Company operates flexible manufacturing facilities and processes designed to accommodate customers with multiple product lines and configurations, it is impracticable to report net sales for individual products or services or groups of similar products and services.

Long-lived assets as of October 1, 2016 and October 3, 2015 exclude other long-term assets and deferred income tax assets, which totaled \$41.2 million and \$40.4 million, respectively.

As a percentage of consolidated net sales, net sales attributable to customers representing 10.0% or more of consolidated net sales for fiscal 2016, 2015 and 2014 were as follows:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
General Electric Company ("GE")	11.1%	10.6%	11.2%
Micron Technology, Inc. ("Micron")	10.4%	*	*
ARRIS Group, Inc. ("Arris")	10.1%	12.6%	12.5%

* Net sales attributable to the customer were less than 10.0% of consolidated net sales for the period.

During fiscal 2016, 2015, and 2014, net sales attributable to GE were reported in the all three segments and net sales attributable to Arris were reported in the AMER and APAC segments. During fiscal 2016, net sales attributable to Micron were reported in the AMER and APAC segments.

Plexus Corp.**Notes to Consolidated Financial Statements**

As of October 1, 2016, Micron represented 18.9% of total accounts receivable. No customer represented 10.0% or more of total accounts receivable as of October 3, 2015.

12. Guarantees

The Company offers certain indemnifications under its customer manufacturing agreements. In the normal course of business, the Company may from time to time be obligated to indemnify its customers or its customers' customers against damages or liabilities arising out of the Company's negligence, misconduct, breach of contract, or infringement of third party intellectual property rights. Certain agreements have extended broader indemnification, and while most agreements have contractual limits, some do not. However, the Company generally does not provide for such indemnities and seeks indemnification from its customers for damages or liabilities arising out of the Company's adherence to customers' specifications or designs or use of materials furnished, or directed to be used, by its customers. The Company does not believe its obligations under such indemnities are material.

In the normal course of business, the Company also provides its customers a limited warranty covering workmanship, and in some cases materials, on products manufactured by the Company. Such warranty generally provides that products will be free from defects in the Company's workmanship and meet mutually agreed-upon specifications for periods generally ranging from 12 months to 24 months. If a product fails to comply with the Company's limited warranty, the Company's obligation is generally limited to correcting, at its expense, any defect by repairing or replacing such defective product. The Company's warranty generally excludes defects resulting from faulty customer-supplied components, design defects or damage caused by any party or cause other than the Company.

The Company provides for an estimate of costs that may be incurred under its limited warranty at the time product revenue is recognized and establishes additional reserves for specifically identified product issues. These costs primarily include labor and materials, as necessary, associated with repair or replacement and are included in the Company's accompanying Consolidated Balance Sheets in "other current accrued liabilities." The primary factors that affect the Company's warranty liability include the value and the number of shipped units and historical and anticipated rates of warranty claims. As these factors are impacted by actual experience and future expectations, the Company assesses the adequacy of its recorded warranty liabilities and adjusts the amounts as necessary.

Below is a table summarizing the activity related to the Company's limited warranty liability for the last three fiscal years 2016, 2015 and 2014 (in thousands):

Limited warranty liability, as of September 28, 2013	\$ 5,942
Accruals for warranties issued during the period	4,331
Settlements (in cash or in kind) during the period	<u>(3,470)</u>
Limited warranty liability, as of September 27, 2014	6,803
Accruals for warranties issued during the period	1,742
Settlements (in cash or in kind) during the period	<u>(2,698)</u>
Limited warranty liability, as of October 3, 2015	5,847
Accruals for warranties issued during the period	1,777
Settlements (in cash or in kind) during the period	<u>(1,515)</u>
Limited warranty liability, as of October 1, 2016	<u><u>\$ 6,109</u></u>

Plexus Corp.**Notes to Consolidated Financial Statements****13. Shareholders' Equity**

On June 6, 2016, the Board of Directors authorized a multi-year stock repurchase program under which the Company is authorized to repurchase up to \$150.0 million of its common stock beginning in fiscal 2017. The Company expects to repurchase shares subject to market conditions.

On August 20, 2015, the Board of Directors authorized a stock repurchase program under which the Company was authorized to repurchase up to \$30.0 million of its common stock during fiscal 2016. The Company repurchased 760,903 shares under this program for \$30.0 million, at an average price of \$39.43 per share, during fiscal 2016. These shares were recorded as treasury stock.

On August 13, 2014, the Board of Directors approved a stock repurchase program under which the Company was authorized to repurchase up to \$30.0 million of its common stock during fiscal 2015. The Company repurchased 745,227 shares under this program for \$30.0 million, at an average price of \$40.26 per share, during fiscal 2015. These shares were recorded as treasury stock.

Pursuant to the Company's Rights Agreement, each preferred share purchase right (a "Right") entitles the registered holder to purchase from the Company one one-hundredth of a share of the Company's Series B Junior Participating Preferred Stock, \$0.01 par value per share ("Preferred Share"), at a price of \$125.00 per one one-hundredth of a Preferred Share, subject to adjustment. The Rights are exercisable only if a person or group acquires beneficial ownership of more than 20.0% of the Company's outstanding common stock or commences, or announces an intention to make, a tender offer or exchange offer that would result in such person or group acquiring the beneficial ownership of more than 20.0% of the Company's common stock. The Rights expire on August 28, 2018, subject to extension.

14. Restructuring and Other Charges

During fiscal 2016 the Company recorded \$7.0 million of restructuring and other charges related largely to the Company's closure of its manufacturing facility in Fremont, California as a result of the Company's optimization of its capacity to better reflect customer demand. The Company also recorded restructuring costs in the EMEA segment related to the partial closure of its Livingston, Scotland facility to align with reduced end-market demand.

During fiscal 2015 and 2014 the Company recorded \$1.7 million and \$11.3 million of restructuring and other charges. The charges were incurred in the AMER segment and largely related to the consolidation of the Company's manufacturing facilities in Wisconsin and the relocation of manufacturing operations from Juarez to Guadalajara, Mexico.

These charges are recorded within "Restructuring and other charges" on the Condensed Consolidated Statements of Comprehensive Income. Restructuring liabilities are recorded within "Other accrued liabilities" in the Condensed Consolidated Balance Sheets.

For the year ended October 1, 2016, the Company incurred restructuring and other charges of \$7.0 million, which consisted of the following:

- \$5.3 million of employee termination and severance costs from the closure of the Company's facility in Fremont and the partial closure of the Company's Livingston facility;
- \$1.0 million of moving and transition costs resulting primarily from the relocation of machinery and equipment from the Fremont facility to various other facilities; and

Plexus Corp.**Notes to Consolidated Financial Statements**

- \$0.8 million loss recorded upon the sale leaseback of the Company's engineering facility in Neenah, Wisconsin.

For the year ended October 3, 2015, the Company incurred restructuring charges of \$1.7 million, which consisted of the following:

- \$1.5 million of moving and transition costs resulting from the relocation of manufacturing operations from Juarez to Guadalajara; and
- \$0.1 million of employee termination and severance costs from the closure of the Company's facility in Juarez.

For the year ended September 27, 2014, the Company incurred restructuring and other charges of \$11.3 million, which consisted of the following:

- \$3.2 million of fixed asset impairment related to the Company's facility in Juarez;
- \$3.2 million of severance from the reduction of the Company's workforce in Juarez; and
- \$4.9 million of rent, moving and associated costs resulting from the early exit of operating leases for two existing facilities and the consolidation of three existing facilities in Wisconsin into the new manufacturing facility in Neenah, as well as moving and transition costs resulting from the relocation of manufacturing operations from Juarez to Guadalajara.

As part of the relocation of manufacturing operations from Juarez to Guadalajara, the Company evaluated the ongoing fair value of the long-lived assets associated with the Juarez facility. Based on this evaluation, the Company determined that long-lived assets were impaired and therefore recorded \$3.2 million of fixed asset impairment for the year ended September 27, 2014. Fair value was evaluated using Level 3 inputs, as defined in Note 1, "Description of Business and Significant Accounting Policies."

No income tax benefit for these restructuring and other charges was recognized due to tax losses in these jurisdictions.

The Company's restructuring accrual activity for the years ended October 1, 2016 and October 3, 2015 is included in the table below (in thousands):

	Fixed Asset Impairment	Employee Termination and Severance Costs	Lease Obligations and Other Exit Costs	Total
Accrual balance, September 28, 2013	\$ —	\$ —	\$ —	\$ —
Restructuring and other charges	3,160	3,180	4,940	11,280
Amounts utilized	<u>(3,160)</u>	<u>(3,038)</u>	<u>(4,940)</u>	<u>(11,138)</u>
Accrual balance, September 27, 2014	<u>—</u>	<u>142</u>	<u>—</u>	<u>142</u>
Restructuring and other charges	—	144	1,547	1,691
Amounts utilized	<u>—</u>	<u>(286)</u>	<u>(1,547)</u>	<u>(1,833)</u>
Accrual balance, October 3, 2015	<u>—</u>	<u>—</u>	<u>—</u>	<u>—</u>
Restructuring and other charges	—	5,255	1,779	7,034
Amounts utilized	<u>—</u>	<u>(4,571)</u>	<u>(1,621)</u>	<u>(6,192)</u>
Accrual balance, October 1, 2016	<u>\$ —</u>	<u>\$ 684</u>	<u>\$ 158</u>	<u>\$ 842</u>

The restructuring accrual balance is expected to be utilized by the end of the second fiscal quarter of 2017.

Plexus Corp.
Notes to Consolidated Financial Statements

15. Quarterly Financial Data (Unaudited)

The following is summarized quarterly financial data for fiscal 2016 and 2015 (in thousands, except per share amounts):

2016	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
Net sales	\$616,664	\$618,660	\$667,616	\$653,064	\$2,556,004
Gross profit	50,059	53,272	62,498	61,530	227,359
Net income	14,448	16,787	26,099	19,093	76,427
Earnings per share (1):					
Basic	\$ 0.43	\$ 0.50	\$ 0.78	\$ 0.57	\$ 2.29
Diluted	\$ 0.42	\$ 0.50	\$ 0.76	\$ 0.56	\$ 2.24
2015	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total
Net sales	\$664,690	\$651,285	\$669,585	\$668,730	\$2,654,290
Gross profit	61,414	59,777	59,087	59,272	239,550
Net income	23,079	23,594	23,794	23,865	94,332
Earnings per share (1):					
Basic	\$ 0.69	\$ 0.70	\$ 0.71	\$ 0.71	\$ 2.81
Diluted	\$ 0.67	\$ 0.69	\$ 0.69	\$ 0.70	\$ 2.74

- (1) The annual total amounts may not equal the sum of the quarterly amounts due to rounding. Earnings per share is computed independently for each quarter.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures designed to ensure that the information the Company must disclose in its filings with the Securities and Exchange Commission (“SEC”) is recorded, processed, summarized and reported on a timely basis. The Company’s Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”) have reviewed and evaluated, with the participation of the Company’s management, the Company’s disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) as of the end of the period covered by this report (the “Evaluation Date”). Based on such evaluation, the CEO and CFO have concluded that, as of the Evaluation Date, the Company’s disclosure controls and procedures are effective, at the reasonable assurance level, (a) in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports the Company files or submits under the Exchange Act, and (b) in assuring that information is accumulated and communicated to the Company’s management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Management’s Annual Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Management of the Company, including its CEO and CFO, has assessed the effectiveness of its internal control over financial reporting as of October 1, 2016, based on the criteria established in “Internal Control – Integrated Framework” issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) (2013). Based on its assessment and those criteria, management has reached the conclusion that the Company’s disclosure controls and procedures and internal control over financial reporting are effective at the reasonable assurance level.

The independent registered public accounting firm of PricewaterhouseCoopers LLP has audited the Company’s internal control over financial reporting as of October 1, 2016, as stated in its report included herein.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company’s internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the Company’s most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

Limitations on the Effectiveness of Controls

Our management, including our CEO and CFO, does not expect that our disclosure controls and internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management

override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Notwithstanding the foregoing limitations on the effectiveness of controls, we have nonetheless reached the conclusion that the Company's disclosure controls and procedures and internal control over financial reporting are effective at the reasonable assurance level.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information in response to this item is incorporated herein by reference to “Election of Directors” and “Corporate Governance” in the Company’s Proxy Statement for its 2017 Annual Meeting of Shareholders (“2017 Proxy Statement”).

Our Code of Conduct and Business Ethics is posted on our website at www.plexus.com. You may access the Code of Conduct and Business Ethics by following the links under “Investor Relations, Corporate Governance” at our website. Plexus’ Code of Conduct and Business Ethics applies to all members of the board of directors, officers and employees; and includes provisions related to accounting and financial matters that apply to the Principal Executive Officer, Principal Financial Officer, Principal Accounting Officer and Controller.

Executive Officers of the Registrant

The following table sets forth our executive officers, their ages and the positions currently held by each person:

Name	Age	Position
Todd P. Kelsey	51	President and Chief Executive Officer
Steven J. Frisch	50	Executive Vice President and Chief Operating Officer
Patrick J. Jermain	50	Senior Vice President and Chief Financial Officer
Angelo M. Ninivaggi	49	Senior Vice President, Chief Administrative Officer, General Counsel and Secretary
Ronnie Darroch	51	Executive Vice President – Global Manufacturing Solutions and Regional President-AMER
Yong Jin Lim	56	Regional President – Plexus APAC
Oliver K. Mihm	44	Regional President – Plexus EMEA

Todd P. Kelsey joined Plexus in 1994 and has served as President and Chief Executive Officer since September 2016; prior thereto, he served as Executive Vice President and Chief Operating Officer since 2013. Previously, Mr. Kelsey served as Executive Vice President – Global Customer Services since 2011 and as Senior Vice President prior thereto.

Steven J. Frisch joined Plexus in 1990 and has served as Executive Vice President and Chief Operating Officer since October 2016. Prior thereto, he served as Executive Vice President and Chief Customer Officer since 2014. Previously, Mr. Frisch served as Executive Vice President – Global Customer Services from 2013 to 2014. Mr. Frisch was Regional President – Plexus EMEA from 2010 to 2013. Mr. Frisch also served as Senior Vice President – Global Engineering Solutions from 2007 to 2013.

Patrick J. Jermain joined Plexus in 2010 and has served as Chief Financial Officer since 2014; he was named a Vice President in 2014 and a Senior Vice President in 2015. Previously, Mr. Jermain served as Treasurer and Vice President of Finance since 2013 and as Corporate Controller since 2010. Prior to joining Plexus, Mr. Jermain served in various positions at Appvion, Inc., formerly Appleton Papers, Inc., since 2006.

Angelo M. Ninivaggi joined Plexus in 2002 and has served as Chief Administrative Officer since 2013. Mr. Ninivaggi has also served as Vice President, General Counsel and Secretary since 2006 and was named Senior Vice President in 2011. Mr. Ninivaggi also served as Corporate Compliance Officer from 2007 to 2013.

Ronnie Darroch joined Plexus in 2012 and has served as Senior Vice President – Global Manufacturing Solutions since 2014, Mr. Darroch was named Regional President-AMER in July 2016 and was named Executive Vice President in October 2016. Previously, Mr. Darroch served as Regional President – Plexus EMEA since 2013 and Vice President of Operations – EMEA since 2012. Prior to joining Plexus, Mr. Darroch served in various positions at Jabil Circuit, Inc., an EMS provider, since 1995.

Yong Jin Lim joined Plexus in 2002 and has served as Regional President – Plexus APAC since 2007.

Oliver K. Mihm joined Plexus in 2000 and has served as Regional President – Plexus EMEA since 2015. Previously, Mr. Mihm served as Market Sector Vice President – Industrial/Commercial from 2014 to 2015, Senior Vice President – Global Engineering Solutions from 2013 to 2015, Vice President – Global Engineering Solutions from 2011 to 2013 and as Vice President of Plexus’ Raleigh, North Carolina Design Center prior thereto.

ITEM 11. EXECUTIVE COMPENSATION

Incorporated herein by reference to “Corporate Governance – Board Committees – Compensation and Leadership Development Committee,” “Corporate Governance – Directors’ Compensation,” “Compensation Discussion and Analysis,” “Executive Compensation” and “Compensation Committee Report” in the 2017 Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Incorporated herein by reference to “Security Ownership of Certain Beneficial Owners and Management” in the 2017 Proxy Statement.

Equity Compensation Plan Information

The following table chart gives aggregate information regarding grants under all Plexus equity compensation plans through October 1, 2016:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (1)	Weighted-average exercise price of outstanding options, warrants and rights (2)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in 1 st column)
Equity compensation plans approved by securityholders	2,482,357	\$34.59	2,951,435
Equity compensation plans not approved by securityholders	—	n/a	—
Total	2,482,357	\$34.59	2,951,435

(1) Represents options, stock-settled SARs, PSUs and RSUs granted under the 2016 Omnibus Incentive Plan, the 2008 Long-Term Incentive Plan and the 2005 Equity Incentive Plan, all of which were approved by shareholders. No further awards may be made under the 2008 Long-Term Incentive Plan and the 2005 Equity Incentive Plan.

(2) The weighted average exercise prices exclude PSUs and RSUs.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Incorporated herein by reference to “Corporate Governance – Director Independence” and “Certain Transactions” in the 2017 Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Incorporated herein by reference to the subheading “Auditors – Fees and Services” in the 2017 Proxy Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) Documents filed

Financial Statements and Financial Statement Schedule. See the list of Financial Statements and Financial Statement Schedule in Item 8.

(b) Exhibits. See Exhibit Index included as the last page of this report, which index is incorporated herein by reference.

ITEM 16. FORM 10-K SUMMARY

None.

Plexus Corp. and Subsidiaries
Schedule II – Valuation and Qualifying Accounts

For the fiscal years ended October 1, 2016, October 3, 2015 and September 27, 2014 (in thousands):

<u>Descriptions</u>	<u>Balance at beginning of period</u>	<u>Additions charged to costs and expenses</u>	<u>Additions charged to other accounts</u>	<u>Deductions</u>	<u>Balance at end of period</u>
Fiscal Year 2016:					
Allowance for losses on accounts receivable (deducted from the asset to which it relates)	\$ 879	\$ 1,492	\$—	\$ 3*	\$ 2,368
Valuation allowance on deferred income tax assets (deducted from the asset to which it relates)	\$58,343	\$ 1,121	\$—	\$18,462	\$41,002
