SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2020
or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission file number 1-4347

ROGERS CORPORATION

(Exact name of registrant as specified in its charter)

Massachusetts

06-0513860

(State or other jurisdiction of incorporation or organization)

(I. R. S. Employer Identification No.)

2225 W. Chandler Blvd., Chandler, Arizona 85224-6155

(Address of Principal Executive Offices) (Zip Code)

Registrant's telephone number, including area code: **(480) 917-6000**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value \$1.00 per share	ROG	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer", "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act) Yes No

The aggregate market value of the voting common equity held by non-affiliates as of June 30, 2020, the last business day of the registrant's most recently completed second fiscal quarter, was approximately \$2,301,662,539. Rogers has no non-voting common equity. The number of shares outstanding of common stock as of February 12, 2021 was 18,699,801.

Documents Incorporated by Reference:

Portions of Rogers' Definitive Proxy Statement for its 2020 Annual Meeting of Shareholders, currently scheduled for May 5, 2021, are incorporated by reference into Part III of this Form 10-K.

Part I

Item 1. Business

As used herein, the “Company,” “Rogers,” “we,” “us,” “our” and similar terms include Rogers Corporation and its subsidiaries, unless the context indicates otherwise.

Forward-Looking Statements

This Annual Report on Form 10-K includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). Such statements are generally accompanied by words such as “anticipate,” “assume,” “believe,” “could,” “estimate,” “expect,” “foresee,” “goal,” “intend,” “may,” “might,” “plan,” “potential,” “predict,” “project,” “should,” “seek,” “target” or similar expressions that convey uncertainty as to future events or outcomes. Forward-looking statements are based on assumptions and beliefs that we believe to be reasonable; however, assumed facts almost always vary from actual results, and the differences between assumed facts and actual results could be material depending upon the circumstances. Where we express an expectation or belief as to future results, that expectation or belief is expressed in good faith and based on assumptions believed to have a reasonable basis. We cannot assure you, however, that the stated expectation or belief will occur or be achieved or accomplished. Among the factors that could cause our results to differ materially from those indicated by forward-looking statements are risks and uncertainties inherent in our business including, without limitation:

- the duration and impacts of the novel coronavirus (COVID-19) global pandemic and efforts to contain its transmission and distribute vaccines, including the effect of these factors on our business, suppliers, customers, end users and economic conditions generally;
- failure to capitalize on, volatility within, or other adverse changes with respect to the Company’s growth drivers, including advanced mobility and advanced connectivity, such as delays in adoption or implementation of new technologies;
- uncertain business, economic and political conditions in the United States (U.S.) and abroad, particularly in China, South Korea, Germany, Hungary and Belgium, where we maintain significant manufacturing, sales or administrative operations;
- the trade policy dynamics between the U.S. and China reflected in trade agreement negotiations and the imposition of tariffs and other trade restrictions, including trade restrictions on Huawei Technologies Co., Ltd. (Huawei);
- fluctuations in foreign currency exchange rates;
- our ability to develop innovative products and the extent to which they are incorporated into end-user products and systems;
- the extent to which end-user products and systems incorporating our products achieve commercial success;
- the ability of our sole or limited source suppliers to deliver certain key raw materials, including commodities, to us in a timely and cost-effective manner;
- intense global competition affecting both our existing products and products currently under development;
- business interruptions due to catastrophes or other similar events, such as natural disasters, war, terrorism or public health crises;
- failure to realize, or delays in the realization of, anticipated benefits of acquisitions and divestitures due to, among other things, the existence of unknown liabilities or difficulty integrating acquired businesses;
- our ability to attract and retain management and skilled technical personnel;
- our ability to protect our proprietary technology from infringement by third parties and/or allegations that our technology infringes third party rights;
- changes in effective tax rates or tax laws and regulations in the jurisdictions in which we operate;
- failure to comply with financial and restrictive covenants in our credit agreement or restrictions on our operational and financial flexibility due to such covenants;
- the outcome of ongoing and future litigation, including our asbestos-related product liability litigation;
- changes in environmental laws and regulations applicable to our business; and
- disruptions in, or breaches of, our information technology systems.

Our forward-looking statements are expressly qualified by these cautionary statements, which you should consider carefully, along with the risks discussed under the headings “Item 1A. Risk Factors” and “Item 7. Management’s Discussion and Analysis of Results of Operations and Financial Position” and elsewhere in this report, any of which could cause actual results to differ materially from historical results or anticipated results. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by law.

Company Background and Strategy

Rogers Corporation designs, develops, manufactures and sells high-performance and high-reliability engineered materials and components to meet our customers' demanding challenges. We operate three strategic operating segments: Advanced Connectivity Solutions (ACS), Elastomeric Material Solutions (EMS) and Power Electronics Solutions (PES). The remaining operations, which represent our non-core businesses, are reported in the Other operating segment. We have a history of innovation and have established Innovation Centers for our research and development (R&D) activities in Chandler, Arizona; Burlington, Massachusetts; Eschenbach, Germany; and Suzhou, China. We are headquartered in Chandler, Arizona.

Our growth strategy is based upon the following principles: (1) market-driven organization, (2) innovation leadership, (3) synergistic mergers and acquisitions, and (4) operational excellence. As a market-driven organization, we are focused on growth drivers, including advanced mobility and advanced connectivity. More specifically, in addition to the impact COVID-19 discussed below, the key medium- to long-term trends currently affecting our business include the increasing use of advanced driver assistance systems (ADAS) and increasing electrification of vehicles, including electric and hybrid electric vehicles (EV/HEV), in the automotive industry and the growth of 5G smartphones in the portable electronics industry. In addition to our focus on advanced mobility and advanced connectivity in the automotive, portable electronics and telecommunications industries, we sell into a variety of other markets including general industrial, aerospace and defense, mass transit, renewable energy and connected devices.

Our sales and marketing approach is based on addressing these trends, while our strategy focuses on factors for success as a manufacturer of engineered materials and components: performance, quality, service, cost, efficiency, innovation and technology. We have expanded our capabilities through organic investment and acquisitions and strive to ensure high quality solutions for our customers. We continue to review and re-align our manufacturing and engineering footprint in an effort to maintain a leading competitive position globally. We have established or expanded our capabilities in various locations in support of our customers' growth initiatives.

We seek to enhance our operational and financial performance by investing in research and development, manufacturing and materials efficiencies, and new product initiatives that respond to the needs of our customers. We strive to evaluate operational and strategic alternatives to improve our business structure and align our business with the changing needs of our customers and major industry trends affecting our business.

COVID-19 Update

The global COVID-19 pandemic has affected and continues to affect Rogers' business and operations, although to a lesser extent than the first half of 2020. In response to the outbreak, Rogers prioritized the safety and well-being of its employees—including implementing social distancing initiatives in its facilities, providing remote working arrangements for certain employees, expanding personal protective equipment usage, enhancing plant hygiene processes, and extending employee benefits, which increased our expenses in 2020—while at the same time taking actions to preserve business continuity. Our non-manufacturing employees transitioned seamlessly to remote working arrangements and are maintaining effective collaboration, both internally and with our customers. In some cases, based on local conditions, non-manufacturing employees have returned to their worksites.

Our China business and operations were the first to be impacted by the virus, with the government temporarily suspending our operations, as well as the operations of most Chinese business, including our Chinese customers and suppliers, at the beginning of February. We resumed production in mid-February and reached full production capacity by early-March.

Our U.S. and European businesses were first impacted later in the first quarter, and the impact continued through the rest of the fiscal year and through the date of this filing. In both the U.S. and Europe, we generally maintained operations at close to normal levels, with the additional employee safety precautions implemented at our facilities. We do not believe these additional precautions, in the aggregate, had a material impact on our financial performance in 2020. In the U.S., exemptions from state-level "shelter in place" directives with respect to numerous sectors, including the Communications, Healthcare and Public Health, Defense Industrial Base, Critical Manufacturing and Information Technology sectors, have largely enabled us to continue our operations while those directives were in place through the date of this filing.

Our operations were not affected by any material shortages, as our inventory and supply chain met our manufacturing requirements. Global demand continued to be impacted in the fourth quarter by the COVID-19 pandemic, although to a lesser extent than prior quarters. General industrial and mass transit market demand continued to be the most impacted. Demand improved in some markets in the second half of 2020, such as portable electronics, EV/HEV, aerospace and defense and automotive relative to the first half of 2020. We expect that the COVID-19 pandemic will have a continuing but uncertain impact on our business and operations in the short- and medium-term.

Operating Segments

Advanced Connectivity Solutions

Our ACS operating segment designs, develops, manufactures and sells circuit materials and solutions enabling high-performance and high-reliability connectivity for applications in wireless infrastructure (e.g., power amplifiers, antennas and small cells), automotive (e.g., ADAS, telematics and thermal solutions), aerospace and defense (e.g. antenna systems, communication systems and phased array radar systems), connected devices (e.g., mobile internet devices and thermal solutions) and wired infrastructure (e.g., computing and IP infrastructure) markets. We believe these products have characteristics that offer performance and other functional advantages in many market applications that serve to differentiate our products from other commonly available materials. ACS products are sold principally to independent and captive printed circuit board fabricators that convert our laminates to custom printed circuits. Trade names for our ACS products include: RO4000[®] Series, RO3000[®] Series, RT/duroid[®], CLTE Series[®], TMM[®], AD Series[®], DiClad[®] Series, CuClad[®] Series, Kappa[®], COOLSPAN[®], TC Series[®], 92ML[™], IsoClad[®] Series, MAGTREX[™], XTremeSpeed RO1200[™] Laminates, IM Series[™], 2929 Bondply, 3001 Bondply Film and SpeedWave[™] Prepreg. As of December 31, 2020, our ACS operating segment had manufacturing and administrative facilities in Chandler, Arizona; Rogers, Connecticut; Bear, Delaware; Evergem, Belgium; and Suzhou, China.

Elastomeric Material Solutions

Our EMS operating segment designs, develops, manufactures and sells engineered material solutions for a wide variety of applications and markets. These include polyurethane and silicone materials used in cushioning, gasketing and sealing, and vibration management applications for general industrial, portable electronics, automotive, mass transit, aerospace and defense, footwear and impact mitigation and printing markets; customized silicones used in flex heater and semiconductor thermal applications for general industrial, portable electronics, automotive, mass transit, aerospace and defense and medical markets; polytetrafluoroethylene and ultra-high molecular weight polyethylene materials used in wire and cable protection, electrical insulation, conduction and shielding, hose and belt protection, vibration management, cushioning, gasketing and sealing, and venting applications for general industrial, automotive and aerospace and defense markets. We believe these materials have characteristics that offer functional advantages in many market applications which serve to differentiate Rogers' products from other commonly available materials. EMS products are sold globally to converters, fabricators, distributors and original equipment manufacturers (OEMs). Trade names for our EMS products include: PORON[®], BISCO[®], DeWAL[®], ARLON[®], eSorba[®], Griswold[®], XRD[®], R/bak[®] and HeatSORB[™].

As of December 31, 2020, our EMS operating segment had administrative and manufacturing facilities in Moosup, Connecticut; Rogers, Connecticut; Woodstock, Connecticut; Bear, Delaware; Carol Stream, Illinois; Narragansett, Rhode Island; Ansan, South Korea; and Suzhou, China. We also own 50% of two unconsolidated joint ventures: (1) Rogers Inoac Corporation (RIC), a joint venture established in Japan to design, develop, manufacture and sell PORON[®] products predominantly for the Japanese market and (2) Rogers INOAC Suzhou Corporation (RIS), a joint venture established in China to design, develop, manufacture and sell PORON[®] products primarily for RIC customers in various Asian countries. INOAC Corporation owns the remaining 50% of both RIC and RIS. RIC has manufacturing facilities at the INOAC facilities in Nagoya and Mie, Japan, and RIS has manufacturing facilities at Rogers' facilities in Suzhou, China.

Power Electronics Solutions

Our PES operating segment designs, develops, manufactures and sells ceramic substrate materials, busbars and cooling solutions for a variety of applications in EV/HEV, general industrial, mass transit, renewable energy, aerospace and defense and wired infrastructure markets. We sell our ceramic substrate materials and cooling solutions under the curamik[®] trade name and our busbars under the ROLINX[®] trade name. As of December 31, 2020, our PES operating segment had manufacturing and administrative facilities in Evergem, Belgium; Eschenbach, Germany; Budapest, Hungary; and Suzhou, China.

Other

Our Other operating segment consists of elastomer components for applications in general industrial market, as well as elastomer floats for level sensing in fuel tanks, motors, and storage tanks applications in the general industrial and automotive markets. We sell our elastomer components under our ENDUR[®] trade name and our floats under our NITROPHYL[®] trade name.

Sales and Competition

We sell our materials and components primarily through direct sales channels positioned near major concentrations of our customers in North America, Europe and Asia. We sold to approximately 3,600 customers worldwide in 2020, primarily OEMs and component suppliers. No individual customer represented more than 10% of our total net sales for 2020; however, there are concentrations of OEM customers in our ACS (Chinese telecommunications equipment manufacturers) and PES (semiconductor and automotive manufacturers) operating segments. Although the loss of any one of our larger customers would

require a period of adjustment, during which the results of operations could be materially adversely impacted, we believe that such events could be successfully mitigated over a period of time due to the diversity of our customer base.

We employ a technical sales and marketing approach pursuant to which we work collaboratively to provide design engineering, testing, product development and other technical support services to OEMs that incorporate our engineered materials and components in their products. Component suppliers convert, modify or otherwise incorporate our engineered materials and components into their components for these OEMs in accordance with their specifications. Accordingly, we provide similar technical support services to component suppliers.

We compete primarily with manufacturers of high-end materials, some of which are large, multi-national companies, principally on the basis of innovation, historical customer relationships, product quality, reliability, performance and price, technical and engineering service and support, breadth of product line, and manufacturing capabilities. We also compete with manufacturers of commodity materials, including smaller regional producers with lower overhead costs and profit requirements located in Asia that attempt to upsell their products based principally upon price, particularly for products that have matured in their life cycle. We believe that we have a competitive advantage because of our reputation for innovation, the performance, quality and reliability of our materials and components, and our commitment to technical support and customer service.

Research and Development

We have a history of innovation, and innovation leadership is a key component of our overall business strategy. The markets we serve are typically characterized by rapid technological changes and advances. Accordingly, the success of our strategy is in part dependent on our ability to develop market-leading products, which is primarily driven by efforts in R&D. We are focused on identifying technologies and innovations related to both our current product portfolio as well as initiatives targeted at further diversifying and growing our business. As part of this technology commitment, we have a Rogers Innovation Center co-located at Northeastern University in Burlington, Massachusetts, as well as Rogers Innovation Centers at our facilities in Chandler, Arizona, Eschenbach, Germany and Suzhou, China. Our Innovation Centers focus on early stages of technical and commercial development of new high-tech materials solutions in an effort to align with market direction and needs.

Patents and Other Intellectual Property

We have many domestic and foreign patents, licenses and additional patent applications pending related to technology in each of our operating segments. These patents and licenses vary in duration and provide some protection from competition. We also own a number of registered and unregistered trademarks and have acquired and developed certain confidential and proprietary technologies, including trade secrets that we believe to be of some importance to our business.

While we believe our patents and other intellectual property provide a competitive advantage to our operating segments, we believe that a significant part of our competitive position and future success will be determined by factors such as the innovative skills, systems and process knowledge, and technological expertise of our personnel; the range of new products we develop; and our customer service and support.

Manufacturing and Raw Materials

The key raw materials used in our business are as follows: for our ACS operating segment, copper, polymer, polytetrafluoroethylene and fiberglass materials; for our EMS operating segment, polyol, isocyanates, polytetrafluoroethylene, ultra-high molecular weight polyethylene materials, silicone and natural rubber materials; and for our PES operating segment, copper, ceramic and brazing paste materials, including silver.

Some of the raw materials used in our business are available through sole or limited-source suppliers. While we have undertaken strategies to mitigate the risks associated with sole or limited source suppliers, these strategies may not be effective in all cases, and price increases or disruptions in our supply of raw materials could have a material adverse impact on our business. For additional information, refer to “Item 1A. Risk Factors.”

Seasonality

Except for some minor seasonality for consumer products, which often aligns with year-end holidays and product launch cycles, the operations of our segments have not been seasonal.

Human Capital Management

The Company’s continuing success derives from our talented and dedicated employees globally, who are responsible for the innovation, operations and ethics foundational to our business and its future. In 2020, our employees navigated the challenges from COVID-19, and, with an overarching commitment to health and safety, maintained a steady flow of materials for our customers, including for critical infrastructure and health applications.

As of December 31, 2020, we employed approximately 3,350 people, of whom approximately 1,250 were employed in the U.S., 1,150 in Europe and 950 in China. Approximately 375 of our domestic employees are covered by collective bargaining

agreements or by specific labor agreements and approximately 750 of our European employees are covered by work council arrangements.

Our approach to human capital management is based on our culture of respect, which is built on the ethical foundation of our Code of Business Ethics and our commitment to making choices that are based on what is ethically sound and not just what is easy or expedient. Additionally, we connect our day-to-day work with our organizational objectives through our Cultural Behaviors: Live Safely, Trust, Just Decide, Speak Openly, Simply Improve, Innovate and Deliver Results. Management's principal objectives, with oversight from our Board of Directors, are Health and Safety, Employee Experience and Diversity and Inclusion.

Health and Safety

The health and safety of our employees is a paramount objective. We strive to minimize lost workdays and recordable incidents. To promote awareness and accountability, safety performance data is shared throughout the company and executive compensation includes safety performance factors.

Employment Experience

We take a comprehensive approach to the employment experience, striving to use a fair and inclusive recruiting process to select talented individuals. Once we hire, we endeavor to provide our employees a safe and ethical work environment that includes fair compensation, opportunities for career development and employee engagement. We are proud to invest in our employees' futures through a variety of technical and other training opportunities internally, as well as education reimbursement programs globally.

Diversity and Inclusion

We continue to advance efforts to improve diversity and inclusion within the Company, focusing on attracting and maintaining diverse talent within the organization and promoting awareness and acceptance globally. We believe that our diversity and inclusion will make the Company a more desirable workplace and will lead to improved business performance.

Backlog

Our sales are generally pursuant to short-term purchase orders. These purchase orders are made without deposits and may be rescheduled, canceled or modified on relatively short notice, without substantial penalty. Therefore, even though we may have a large backlog from time to time, we believe the purchase orders or backlog are not necessarily a reliable indicator of future sales.

Information About Our Executive Officers

Our executive officers as of February 18, 2021 were as follows:

Name	Age	Present Position	Year Appointed to Present Position	Other Relevant Positions Held
Bruce D. Hoechner	61	President and Chief Executive Officer, Director, Principal Executive Officer	2011	
Michael M. Ludwig	59	Senior Vice President, Chief Financial Officer and Treasurer, Principal Financial Officer	2018	Senior Vice President and Chief Financial Officer, FormFactor, Inc., from May 2011 to March 2018.
Jonathan J. Rowntree	49	Senior Vice President and General Manager, Advanced Connectivity Solutions	2019	Senior Vice President and Global Head of Industrial Electronics, Henkel Electronic Materials, from January 2017 to May 2019; Senior Vice President and General Manager, Henkel Electronic Materials, from July 2015 to December 2016.
R. Colin Gouveia	57	Senior Vice President and General Manager, Elastomeric Material Solutions	2019	Vice President and General Manager, Eastman Chemical Co., from December 2014 to June 2019.
Peter B. Williams	58	Senior Vice President, Global Operations and Supply Chain	2019	Vice President of Global Operations, MKS Instruments, 2011 to July 2019.
Robert C. Daigle	57	Senior Vice President and Chief Technology Officer	2009	
Jay B. Knoll	57	Senior Vice President, Corporate Development, General Counsel and Secretary	2017	Vice President and General Counsel, Rogers Corporation, from November 2014 to February 2017.
Benjamin M. Buckley	48	Vice President and Chief Human Resources Officer	2019	Associate General Counsel and Director of Global Compliance and Integrity, Rogers Corporation, from October 2014 to January 2019.

Available Information

We make available on our website (<http://www.rogerscorp.com>), or through a link posted on our website, free of charge, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, reports filed by our executive officers and directors pursuant to Section 16 of the Exchange Act, and amendments to those reports filed pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission (SEC). In addition, the SEC maintains an internet site that contains these reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC (<http://www.sec.gov>).

We also make available on our website the charters for our Audit Committee, Compensation and Organization Committee, and Nominating and Governance Committee, in addition to our Corporate Governance Guidelines, Bylaws, Code of Business Ethics, and Compensation Recovery Policy. Our website is not incorporated into or a part of this Form 10-K.

Item 1A. Risk Factors

Our business, results of operations and financial position are subject to various risks, including those discussed below, which may affect the value of our capital stock. The following risk factors, which we believe represent the most significant factors that may make an investment in our capital stock risky, may cause our actual results to differ materially from those projected in any forward-looking statement. You should carefully consider these factors, as well as the other information contained in this Annual Report on Form 10-K, including the information set forth in “Item 1. Business - Forward-Looking Statements” and “Item 7. Management’s Discussion and Analysis of Results of Operations and Financial Position,” when evaluating an investment in our capital stock.

Risks Relating to the COVID-19 Pandemic

The COVID-19 pandemic and global responsive measures have impacted our business and results of operations and could materially adversely affect our business, results of operations and financial position in future periods.

The COVID-19 pandemic has spread globally and resulted in governmental authorities implementing numerous responsive measures, such as travel bans and other restrictions, including quarantines, shelter-in-place and stay-home orders, transportation disruptions, closures and shutdowns. We maintain significant manufacturing and administrative operations in the U.S., China, Belgium, Germany, South Korea and Hungary, and each of these countries has been significantly affected by the outbreak and taken measures to try to contain it and to distribute vaccines as they are approved. We have also modified our business practices in an effort to ensure business continuity while promoting continued employee health and well-being. Collectively, these measures have impacted and are likely to continue to impact our workforce and operations. In addition, the outbreak and associated responsive measures have resulted in significant disruption of the global economy, leading to steep declines and increased volatility in the financial markets, and it is possible that a potentially severe global recession will follow.

There is considerable uncertainty regarding the effect of COVID-19 as well as current and future responsive measures on our business, including on our workforce and operations. We may experience sustained demand reductions for our products in certain end markets, be unable to satisfy customer demand and face increased operating costs, asset impairments and cash flow reductions, all of which could have a material adverse effect on our business, results of operations and financial position.

Risks Relating to Our Business, Strategy and Operations

Failure to capitalize on, volatility within, or other adverse changes with respect to the Company’s growth drivers, including advanced mobility and advanced connectivity, may adversely affect our business.

We derived approximately 25% and 24% of our net sales for the year ended December 31, 2020 from sales relating to the key market growth drivers of advanced mobility and advanced connectivity, respectively. These growth drivers are served by our direct and indirect customers in a variety of markets, including automotive (i.e., ADAS) and EV/HEV, wireless infrastructure and portable electronics. These growth drivers, as well as specific market and industry trends within them, may be volatile, cyclical and sensitive to a variety of factors, including general economic conditions, technology disruptions, consumer preferences and political priorities. Adverse or cyclical changes to and within these growth drivers, such as delays in adoption or implementation of new technologies, has resulted in, and may continue to result in, reduced demand for certain of our products, production overcapacity, increased inventory levels and related risks of obsolescence, as well as price erosion, ultimately leading to a decline in our operating results. Acceleration within these growth drivers and corresponding rapid increases in demand for certain products may also require us to make significant capital investments or acquisitions in order to increase production levels and to maintain customer relationships and market positions. However, we may not be able to increase our production levels with sufficient speed or efficiency to capitalize on such increases in demand.

We have extensive international operations, and events and circumstances that have general international consequence or specific impact in the countries in which we operate may materially adversely affect our business.

For the year ended December 31, 2020, approximately 72% of our net sales resulted from sales in foreign markets, with approximately 47% and 23% of such net sales occurring in Asia and Europe, respectively. We expect our net sales in foreign markets to continue to represent a substantial majority of our consolidated net sales. We maintain significant manufacturing and administrative operations in China, Belgium, Germany, South Korea and Hungary, and approximately 60% of our employees were located outside the U.S. as of December 31, 2020. Risks related to our extensive international operations include the following:

- foreign currency fluctuations, particularly in the value of the euro, the Chinese renminbi, the South Korean won, the Japanese yen and the Hungarian forint against the U.S. dollar;
- economic and political instability due to regional or country-specific events or changes in relations between the U.S. and the countries in which we operate;
- accounts receivable practices across countries, including longer payment cycles;
- export control or customs matters, including tariffs and trade restrictions;
- changes in multilateral and bilateral trade relations

- complications in complying, and failure to comply, with a variety of laws and regulations applicable to our foreign operations, including due to unexpected changes in the laws or regulations of the countries in which we operate;
- failure to comply with the Foreign Corrupt Practices Act or other applicable anti-corruption laws;
- greater difficulty protecting our intellectual property;
- compliance with foreign employment regulations, as well as work stoppages and labor and union disputes.

The foregoing risks may be particularly acute in emerging markets such as China and India, where our operations are subject to greater uncertainty due to increased volatility associated with the developing nature of the economic, legal and governmental systems of these countries, changes in bilateral and multilateral arrangements with the U.S. and other governments, and challenges that some multinational customers that are headquartered in emerging markets may have complying fully with U.S. and other developed market extraterritorial regulations. In addition, our business has been, and may continue to be, adversely affected by the lack of development, or disruptions, of transportation or other critical infrastructure, including wireless infrastructure, in emerging markets. If we are unable to successfully manage the risks associated with expanding our global business, or to adequately manage operational fluctuations, it may materially adversely affect our business, results of operations and financial position.

Deteriorating trade relations between the U.S. and China, other trade conflicts and barriers, economic sanctions, and Chinese policies to decrease dependence on foreign suppliers could limit or prevent certain existing or potential customers from doing business with us and materially adversely affect our business.

The increased trade conflicts between the U.S. and its major trading partners, evidenced by trade restrictions such as tariffs, taxes, export controls, economic sanctions, and enhanced policies designed to protect national security, could adversely impact our business. In particular, we have experienced and expect that we may in the future experience impacts on our business due to the increase in trade conflicts between the U.S. and China. The May 2019 U.S. Department of Commerce addition of Huawei to its “entity list,” and subsequently implemented Foreign Direct Products Rules, limits the ability of U.S. and foreign companies to export products and license technologies to Huawei. Although we have been able to continue supplying Huawei’s fabricators while in compliance with all restrictions, the ongoing impact of the Huawei export controls on 5G demand and the demand for our products is currently uncertain. Such export controls, as well as retaliatory controls and tariffs that China has imposed and which remain in place to a certain extent under the Phase 1 agreement reached between the U.S. and China on January 15, 2020, could continue to restrict our ability to do business with Huawei and other Chinese customers. Further U.S. government actions to protect domestic economic and security interests could lead to further restrictions. China continues to be a fast-developing market, and an area of potential growth for us. Sales to customers located in China and the Asia Pacific region have typically accounted for nearly half of our total sales and a substantial majority of our overall sales to customers located outside the U.S. In addition, certain of the end products created in China that incorporate our products are ultimately sold outside of the Asia Pacific region. We expect that revenue from these sales generally, and sales to China and the Asia Pacific region specifically, will continue to be a material component of our total revenue. Therefore, any financial crisis, trade war or dispute or other major event causing business disruption in international jurisdictions generally, and China and the Asia Pacific region in particular, could negatively affect our business, results of operations and financial position.

China’s stated policy of reducing its dependence on foreign manufacturers and technology companies has resulted and may continue to result in reduced demand for our products in China. These trends could have a material adverse impact on our business, results of operations and financial position. In addition, there are risks that the Chinese government may, among other things, require the use of local suppliers, compel companies that do business in China to partner with local companies to conduct business, or provide incentives to government-backed local customers to buy from local suppliers rather than companies like ours, all of which could adversely impact our business, results of operations and financial position.

Our business is dependent upon our development of innovative products and our customers’ incorporation of those products into end user products and systems that achieve commercial success.

As a manufacturer and supplier of engineered materials and components, our business depends upon our ability to innovate and sell our materials and components for inclusion in other products that are developed, manufactured and sold by our customers. We strive to differentiate our products and secure long-term demand through our engagement with our customers to design in our materials and components as part of their product development processes. The value of any design-in largely depends upon the decision of our customers to manufacture their products or systems in sufficient production quantities, the commercial success of the end product and the extent to which the design of our customers’ products or systems could accommodate substitution of competitor products. A consistent failure to introduce new products in a timely manner, achieve design-ins or achieve market acceptance on commercially reasonable terms could materially adversely affect our business, results of operations and financial position. The introduction of new products presents particularly significant business challenges in our business because product development commitments and expenditures must be made well in advance of product sales.

Our dependence on sole or limited source suppliers for certain of our raw materials could materially adversely affect our ability to manufacture products and materially increase our costs.

We rely on sole and limited source suppliers for certain of the raw materials that are critical to the manufacturing of our products. This reliance subjects us to risks related to our potential inability to obtain an adequate supply of required raw materials, particularly given our use of lean manufacturing and just-in-time inventory techniques, and our reduced control over pricing and timing of delivery of raw materials. Our operating results could be materially adversely affected if we were unable to obtain adequate supplies of these materials in a timely manner or if their cost increased significantly.

While we believe we could obtain and qualify alternative sources for most sole and limited source supplier materials if necessary, the transition time could be long, particularly if the change requires us to redesign our systems. Ultimately, we may be unable to redesign our systems, which could further increase delays or prevent us from manufacturing our products at all. Even if a system redesign is feasible, increased costs associated with such a redesign would decrease our profit margins, perhaps materially, if we could not effectively pass such costs along to our customers. Further, it would likely result in production and delivery delays, which could lead to lost sales and damage to our relationships with current and potential customers.

We face intense global competition, which could reduce demand for our products or create additional pricing pressure on our products.

We operate in a highly competitive global environment and compete with domestic and international companies principally on the basis of the following:

- innovation;
- historical customer relationships;
- product quality, reliability, performance and price;
- technical and engineering service and support;
- breadth of product line; and
- manufacturing capabilities.

Our competitors include commodity materials suppliers, which offer product substitutions based mostly on price, and suppliers of alternate solutions, which offer product substitutions or eliminations based mostly on disruptive technology. Certain of these competitors have greater financial and other resources than we have and, in some cases, these competitors are well established in specific product niches. We expect that our competitors will continue to improve the design and performance of their products, which could result in the development of products that offer price or performance features superior to our products. Furthermore, our customers may engage in internal manufacturing of products that may result in reduced demand for our products. If we are unable to maintain our competitive advantage for any reason, demand for our products may be materially reduced, which may adversely affect our business, results of operations and financial position.

We have engaged in transactions in the past and may in the future acquire or dispose of businesses, or engage in other transactions, which expose us to a variety of risks that could materially adversely affect our business operating results and financial position.

From time to time, we have explored and pursued transaction opportunities that we believe complement our core businesses, and we expect to do so again in the future. We have also divested and may again consider divesting businesses or assets that we do not regard as part of our core businesses. These transaction opportunities may come in the form of acquisitions, joint ventures, investments, divestitures or other structures. There are risks associated with such transactions, including, without limitation, general business risk, technology risk, market acceptance risk, litigation risk, environmental risk, regulatory approval risk and risks associated with the failure to complete announced transactions. In the case of acquisitions, we may not be able to discover, during the due diligence process or otherwise, all known and unknown risks associated with the business we are acquiring, including the existence of liabilities. We may spend a significant portion of available cash, incur substantial debt or issue equity securities, which would dilute current shareholders' equity ownership, to pay for the acquisitions. In addition, if we are unsuccessful in integrating any acquired company or business into our operations or if integration is more difficult than anticipated, we may experience disruptions that could harm our business and result in our failure to realize the anticipated benefits of the acquisitions. In the case of divestitures, we may agree to indemnify acquiring parties for known or unknown liabilities arising from the businesses we are divesting. We have incurred, and may in the future incur, significant costs in the pursuit and evaluation of transactions that we do not consummate for a variety of reasons.

As a result, these transactions may not ultimately create value for us or our shareholders and may harm our reputation and materially adversely affect our business, results of operations and financial position.

The failure to attract and retain specialized technical and management personnel could impair our expected growth and future success.

We depend upon the continued services and performance of key executives, senior management and skilled technical personnel, particularly our sales engineers and other professionals with significant experience in the key industries we serve. Competition for these personnel from other companies, academic institutions and government entities is intense, and our expected growth and future success will depend, in large part, upon our ability to attract and retain these individuals.

If we suffer loss or disruption to our facilities, supply chains, distribution systems or information technology systems due to catastrophe or other events, our business could be seriously harmed.

Our facilities, supply chains, distribution systems and information technology systems are subject to catastrophic loss or disruption due to fire, flood, earthquake, hurricane, public health crisis, war, terrorism or other natural or man-made disasters or events. If any of these facilities, supply chains or systems were to experience a catastrophic loss or disruption, it could disrupt our operations, delay production and shipments, result in defective products or services, damage customer relationships and our reputation and result in legal exposure and large repair or replacement expenses. For instance, the COVID-19 pandemic and related quarantines and work and travel restrictions have disrupted, and may continue to disrupt, production of and demand for certain of our products. Additionally, there was a fire at our UTIS manufacturing facility in Ansan, South Korea in early February 2021, which resulted in extensive damage to the manufacturing site. The extent to which these events will affect our results of operations and financial position remains uncertain. The third-party insurance coverage that we maintain will vary from time to time in both type and amount depending on cost, availability and our decisions regarding risk retention, and may be unavailable or insufficient to protect us against losses or disruptions.

A significant disruption in, or breach in security of, our information technology systems or violations of data protection laws could materially adversely affect our business and reputation.

In the ordinary course of business, we collect and store confidential information, including proprietary business information belonging to us, our customers, suppliers, business partners and other third parties and personally identifiable information of our employees. We rely on information technology systems to protect this information and to keep financial records, process orders, manage inventory, coordinate shipments to customers, and operate other critical functions. Our information technology systems are susceptible to damage, disruptions or shutdowns due to power outages, hardware failures, telecommunication failures, systems upgrades (including the planned implementation of a new enterprise resource planning system) and user errors. If we experience a disruption in our information technology systems, it could result in the loss of sales and customers and significant incremental costs, which could materially adversely affect our business.

We are also subject to security breaches caused by computer viruses, illegal break-ins or hacking, sabotage, or acts of vandalism by disgruntled employees or third parties. The risk of a security breach or disruption, particularly through cyberattack or cyber intrusion, including by computer hackers, foreign governments and cyber terrorists, has increased as the number, intensity and sophistication of attempted attacks and intrusions from around the world have increased, in part because of evolving technologies, the ubiquitous use of the Internet and telecommunications technologies (including mobile devices) to conduct business transactions. Our information technology network and systems have been and, we believe, continue to be under constant attack. Accordingly, despite our security measures or those of our third-party service providers, we have experienced and may in the future experience security breaches, including breaches that we may not be able to detect. Security breaches of our information technology systems, including through mobile devices, could result in the misappropriation or unauthorized disclosure of confidential information belonging to us or to our customers, suppliers, business partners, employees or other third parties, which could result in our suffering significant financial and reputational damage. If we are unable to protect sensitive information, our customers or governmental authorities could question the adequacy of our security processes and procedures and our compliance with applicable laws and regulations, including evolving government cyber security requirements for government contractors.

In addition, the processing and storage of certain information is increasingly subject to privacy and data security regulations, and many such regulations are country-specific. The interpretation and application of data protection laws in the U.S., Europe, and elsewhere, including the EU General Data Protection Regulation and the California Consumer Privacy Act, are uncertain, evolving and may be inconsistent among jurisdictions. Compliance with these various laws may be onerous and require us to incur substantial costs or to change our business practices in a manner that adversely affects our business, while failure to comply with such laws may subject us to substantial penalties.

Employee benefit cost increases could reduce our profitability.

Our profitability is affected by employee benefit costs, particularly medical and other employee benefits. In recent years, employee medical costs have increased due to factors such as the increase in health care costs in the U.S. These factors will continue to put pressure on our business and financial performance, as employee benefit costs continue to escalate. We may not succeed in limiting future cost increases. Continued employee benefit cost increases could have an adverse effect on our results of operations, cash flows and financial position.

We also sponsor one material defined benefit pension plan that covers certain union employees. Our costs of providing this plan are dependent upon a number of factors and assumptions that drive the plan's funding status and projected annual expenses, such as discount rates, the actual and projected rates of return on the plans' assets, governmental regulation, global equity prices, portfolio composition, mortality rates and required or voluntary contributions to the plan. Changes in these factors and assumptions could have a negative impact on our defined benefit pension plan, which could result in unfavorable changes in the net assets and funded status of the plan and increases in annual net periodic benefit costs. Unfavorable changes in the plan's net assets and funded status could result in increased funding requirements. All of these potential changes could negatively impact our results of operations, cash flows and financial position.

Legal, Compliance and Regulatory Risks

Our business may be materially adversely affected if we cannot protect our proprietary technology or if we infringe the proprietary rights of others.

Our proprietary technology supports our ability to compete effectively with other companies, and we seek to protect our intellectual property rights by obtaining domestic and foreign patents, trademarks and copyrights, and maintaining trade secrets for our manufacturing processes. It is possible, however, that our efforts to obtain such protection in the U.S. and abroad will be unsuccessful or that the protection afforded will not be sufficiently broad to protect our technology.

Even if domestic and foreign laws do grant initial protection to our technology, our competitors or other third parties may subsequently obtain and unlawfully copy, use or disclose our technologies, products, and processes. We believe that the risk of piracy of our technology is particularly acute in the foreign countries in which we operate. In circumstances in which we conclude that our proprietary technology has been infringed, we have pursued, and may again pursue, litigation to enforce our rights. The defense and prosecution of intellectual property infringement suits are both costly and time consuming, even if the outcome is favorable to us. If we are not successful in protecting our proprietary technology or if the protection afforded to us is not sufficiently broad, our competitors may be able to manufacture and offer products substantially similar to our own, thereby reducing demand for our products and adversely affecting our results of operations and financial position. We may also be adversely affected by, and subject to increased competition as a result of, the normal expiration of our issued patents.

Our competitors or other third parties may also assert infringement or invalidity claims against us in the future. In addition to the significant costs associated with such suits, as noted above, an adverse outcome could subject us to significant liabilities to third parties and require us to license rights from third parties or cease selling our products. Any of these events may have a material adverse effect on our business, results of operations and financial position.

As a multinational corporation doing business in the U.S. and various foreign jurisdictions, changes in tax laws or exposures to additional tax liability could negatively impact our operating results.

As a result of the variability and uncertainty in global taxation, we are subject to a wide variety of tax-related risks, any of which could provoke changes in our global structure, international operations or intercompany agreements, which could materially reduce our net income in future periods or result in restructuring costs, increased effective tax rates and other expenses. Given the global nature of our business, a number of factors may increase our effective tax rates or otherwise subject us to additional tax liability, including:

- decisions to redeploy foreign earnings outside of their country of origin for which we have not previously provided for income taxes;
- increased scrutiny of our transactions by taxing authorities;
- changes in the geographic mix of our profits among jurisdictions with differing statutory income tax rates;
- ability to utilize, or changes in the valuation of, deferred tax assets; and
- changes in tax laws, regulations and interpretations thereof or issuance of new interpretations of laws or regulations applicable to us.

For instance, many foreign jurisdictions are actively considering changes to existing tax laws as a result of the base erosion and profit shifting project undertaken by the Organization for Economic Co-operation and Development (OECD). If these changes are enacted, our tax obligations could increase in countries where we do business or sell our products.

The terms of our credit agreement subject us to risks, including potential acceleration of our outstanding indebtedness if we fail to satisfy financial ratios and comply with numerous covenants.

Our credit agreement contains, and any future debt agreements into which we enter may contain, certain financial ratios and certain restrictive covenants that, among other things, limit our ability to incur indebtedness or liens, acquire other businesses, dispose of assets, or make investments. Our ability to make scheduled payments on these borrowings and to satisfy financial ratios may be adversely affected by changes in economic or business conditions beyond our control, while the restrictive covenants to which we are subject may limit our ability to take advantage of potential business opportunities as they arise. Failure to satisfy these financial ratios or to comply with the covenants in our credit agreement would constitute a default. An uncured default with respect to one or more of our covenants could result in outstanding borrowings thereunder being declared

immediately due and payable, which may also trigger an obligation to repay other outstanding indebtedness. Any such acceleration of our indebtedness would have a material adverse effect on our cash flows, financial position and results of operations.

Our credit agreement currently permits us to borrow euro-currency loans that bear interest based on the London interbank offered rate (LIBOR), plus a specified spread. In July 2017, the United Kingdom's Financial Conduct Authority, which regulates LIBOR, announced that it intends to phase out LIBOR by the end of 2021. However, LIBOR borrowings may become unavailable before that date. When LIBOR becomes unavailable, our credit agreement provides for a new reference rate for borrowings thereunder, dependent upon certain facts and circumstances. There is a risk that this new reference rate may be higher than our projected future LIBOR interest rates, thereby causing the cost of our borrowings to increase.

We may be adversely affected by litigation stemming from product liability and other claims.

Our products may contain defects that we do not detect before sale, which may lead to warranty or damage claims against us or product recalls. We are involved in various unresolved legal matters that arise in the ordinary course of our operations or otherwise, including asbestos-related product liability claims related to our operations before the 1990s. For additional information, refer to "Item 3. Legal Proceedings" and "Note 12 – Commitments and Contingencies" to "Item 8. Financial Statements and Supplementary Data." We maintain insurance coverage with respect to certain claims, but the policy coverage limits may not be adequate or cover a particular loss. Costs associated with, among other things, the defense of, or settlements or judgments relating to, claims against us that are not covered by insurance or that result in recoveries in excess of insurance coverage may adversely affect our business, results of operations and financial position. Irrespective of insurance coverage, claims against us could divert the attention of our senior management and/or result in reputational damage, thereby adversely affecting our business.

Our projections on the potential exposure and expected insurance coverage relating to our asbestos-related product liability claims are based on a number of assumptions, including the number of new claims to be filed each year, the average cost of disposing of such claims, the length of time it takes to dispose of such claims, coverage issues among insurers and the continuing solvency of various insurance companies, as well as the numerous uncertainties surrounding asbestos litigation in the U.S. To the extent such assumptions are inaccurate, the net liabilities that we have recorded in our financial statements may fail to approximate the losses we could suffer in connection with such claims.

We are subject to many environmental laws and regulations as well as potential environmental liabilities that could adversely affect our business.

We are subject to a variety of federal, state, local and foreign laws, rules and regulations related to the use, storage, handling, discharge or disposal of certain toxic, volatile or otherwise hazardous chemicals, gases and other substances used in manufacturing our products. Some of these laws in the U.S. include the Federal Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, Toxic Substances Control Act, and similar state statutes and regulations. In the European Union (EU), we are subject to the EU regulations (and their related national implementing legislation) including the Registration, Evaluation, Authorization and Restriction of Chemicals, the Regulation on the Classification, Labelling and Packaging of Substances and Mixtures and the Industrial Emissions Directive. Compliance with these laws and regulations could require us to incur substantial expenses, including in connection with the acquisition of new equipment. Any failure to comply with present or future environmental laws, rules and regulations could result in criminal and civil liabilities, fines, suspension of production or cessation of certain operations, any of which could have a material adverse effect on our business, results of operations and financial position.

In addition, some environmental laws impose liability, sometimes without fault, for investigating and/or cleaning up contamination on, or emanating from, properties currently or formerly owned, leased or operated by us, as well as for damages to property or natural resources and for personal injury arising out of such contamination. Such liability may be joint and several, meaning that we could be held responsible for more than our share of the liability involved, or even the entire liability. For additional information regarding our material legal proceedings, refer to "Note 12 – Commitments and Contingencies" to "Item 8. Financial Statements and Supplementary Data."

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We operate various general offices and manufacturing facilities throughout the U.S., Europe and Asia. The following table provides certain information about the material general offices and manufacturing facilities used by our operating segments:

<u>Location</u>	<u>Floor Space (Square Feet)</u>	<u>Type of Facility</u>	<u>Leased / Owned</u>	<u>Operating Segment</u>
<i>United States</i>				
Chandler, Arizona	147,000	Manufacturing	Owned	ACS
Chandler, Arizona	105,100	Manufacturing	Owned	ACS
Chandler, Arizona	100,000	Manufacturing	Owned	ACS
Chandler, Arizona	75,000	Administrative Offices	Owned	All
Rogers, Connecticut	388,100	Manufacturing / Administrative Offices	Owned	All
Moosup, Connecticut	185,500	Manufacturing	Owned	EMS
Woodstock, Connecticut	150,600	Manufacturing	Owned	EMS
Carol Stream, Illinois	216,600	Manufacturing	Owned	EMS
Bear, Delaware	125,000	Manufacturing / Administrative Offices	Owned	ACS & EMS
Burlington, Massachusetts	6,000	R&D Lab / Administrative Offices	Leased through 2/2024	All
Narragansett, Rhode Island	84,600	Manufacturing	Owned	EMS
<i>Europe</i>				
Eschenbach, Germany	149,000	Manufacturing / Administrative Offices	Leased through 6/2021	PES
Eschenbach, Germany	51,000	Warehouse / Administrative Offices	Leased through 12/2024	PES
Eschenbach, Germany	24,100	Warehouse / Administrative Offices	Leased through 12/2021	PES
Evergem, Belgium	122,000	Manufacturing / Administrative Offices	Owned	ACS & PES
Evergem, Belgium	55,700	Warehouse / Administrative Offices	Leased through 5/2021	ACS & PES
Ghent, Belgium	45,000	Warehouse	Leased through 3/2022	ACS & EMS
Budapest, Hungary	64,000	Manufacturing	Leased through 2/2023	PES
<i>Asia</i>				
Suzhou, China	821,000	Manufacturing / Administrative Offices	Owned	All
Ansan, South Korea ⁽¹⁾	40,000	Manufacturing	Leased through 10/2021	EMS

⁽¹⁾ Our Ansan, South Korea facility, which we utilize to manufacture our eSorba[®] polyurethane foams, suffered extensive damage due to a fire in early February 2021.

Item 3. Legal Proceedings

Asbestos Products Litigation

We, like many other industrial companies, have been named as a defendant in a number of lawsuits filed in courts across the country by persons alleging personal injury from exposure to products containing asbestos. We were a defendant in 561 asbestos-related product liability cases as of December 31, 2020, compared to 592 cases as of December 31, 2019, with the change reflecting new cases, dismissals, settlements and other dispositions. We have never mined, milled, manufactured or marketed asbestos; rather, we made and provided to industrial users a limited number of products that contained encapsulated asbestos, but we stopped manufacturing these products in the late 1980s. In virtually all of the cases against us, the plaintiffs are seeking unspecified damages above a jurisdictional minimum against multiple defendants who may have manufactured, sold or used asbestos-containing products to which the plaintiffs were allegedly exposed and from which they purportedly suffered injury. Most of these cases are being litigated in Maryland, Illinois, Missouri and New York; however, we are also defending cases in other states. We intend to vigorously defend these cases, primarily on the basis of the plaintiffs' inability to establish compensable loss as a result of exposure to our products. As of December 31, 2020, the estimated liability and estimated insurance recovery for all current and future indemnity and defense costs projected through 2064 was \$73.2 million and \$66.8 million, respectively.

The indemnity and defense costs of our asbestos-related product liability litigation to date have been substantially covered by insurance. As of December 31, 2020, our consolidated statements of financial position include \$6.4 million of estimated asbestos-related expenses that exceed asbestos-related insurance coverage for all current and future indemnity and defense costs projected through 2064. For additional information regarding our asbestos-related product liability litigation, refer to "Note 12 – Commitments and Contingencies" to "Item 8. Financial Statements and Supplementary Data."

Other Matters

We are currently involved in a variety of other legal proceedings that we view as ordinary, routine litigation incidental to our business, including commercial disputes, intellectual property matters, personal injury claims, tax claims and employment matters. Although the outcome of no legal matter can be predicted with certainty, we do not believe that the outcome of any of these legal proceedings, either individually or in the aggregate, will have a material adverse effect on our business, results of operations, cash flows or financial position. In addition, we are involved in certain environmental matters, which we do not view as material legal proceedings, either pending or known to be contemplated. For additional information regarding certain of these matters, refer to “Note 12 – Commitments and Contingencies” to “Item 8. Financial Statements and Supplementary Data.”

Item 4. Mine Safety Disclosures

Not applicable.

Part II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

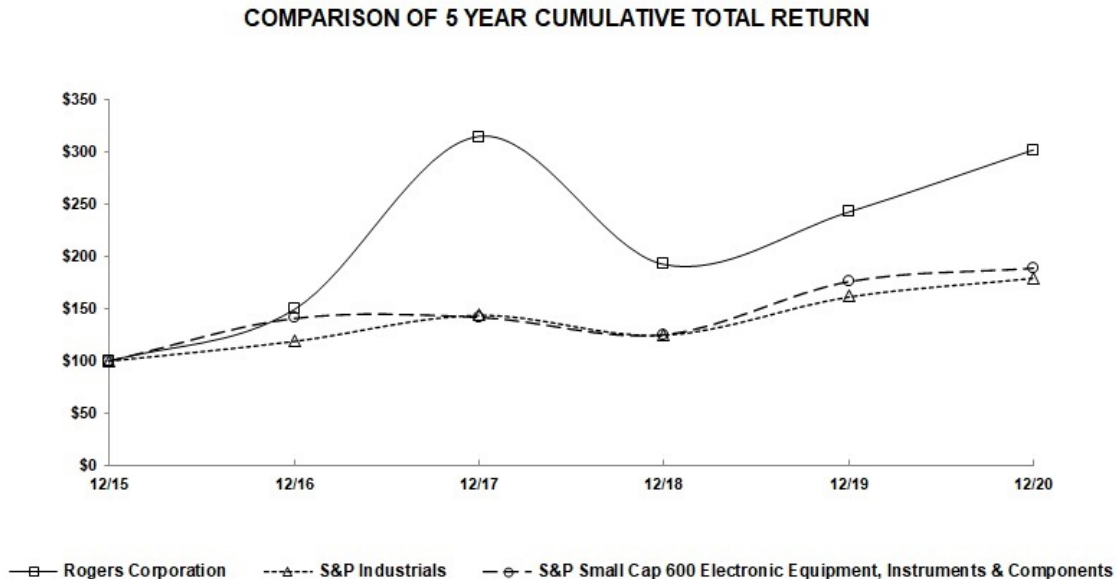

Capital Stock Market Prices and Dividend Policy

Our capital stock is traded on the New York Stock Exchange under the symbol “ROG”. As of the end of business on February 12, 2021, we had 327 shareholders of record.

We currently retain all of our earnings for use in the operation and expansion of our business, to repurchase or redeem capital stock, and in the repayment of our debt. We have never declared or paid any cash dividends on our capital stock and may not pay any cash dividends in the foreseeable future. Whether or not dividends will be paid in the future will depend on, among other things, our results of operations, financial condition, level of indebtedness, cash requirements, covenants in our financings, contractual restrictions and other factors that our board of directors and our shareholders may deem relevant.

Performance Graph

The following graph compares the cumulative total return on Rogers’ capital stock over the past five fiscal years with the cumulative total return on the Standard & Poor’s Industrials Index (S&P Industrials) and the S&P Small Cap 600 Electronic Equipment, Instruments & Components Index. The graph tracks the performance of a \$100 investment in the Company’s common stock and in each of the indexes (with the reinvestment of all dividends) on the date specified.

Issuer Purchases of Equity Securities

In 2015, we initiated a share repurchase program (the Program) of up to \$100.0 million of the Company’s capital stock. We initiated the Program to mitigate the dilutive effects of stock option exercises and vesting of restricted stock units granted by the Company, in addition to enhancing shareholder value. The Program has no expiration date and may be suspended or discontinued at any time without notice. There were no share repurchases in 2020. As of December 31, 2020, \$49.0 million remained available to purchase under the Program. For additional information regarding share repurchases, refer to “Note 18 – Share Repurchases” to “Item 8. Financial Statements and Supplementary Data.”

Item 6. Selected Financial Data

<i>(Dollars in thousands, except per share amounts)</i>	2020	2019	2018	2017	2016
Financial Results					
Net sales	\$ 802,583	\$ 898,260	\$ 879,091	\$ 821,043	\$ 656,314
Income before income tax expense	\$ 68,534	\$ 55,126	\$ 110,589	\$ 132,925	\$ 82,280

Net sales per employee	\$ 240	\$ 250	\$ 238	\$ 241	\$ 212
Number of shares outstanding as of December 31	18,677	18,577	18,395	18,255	18,021

The financial data included within the preceding table should be read in conjunction with our Management's Discussion and Analysis of Results of Operations and Financial Position as well as the Financial Statements and Supplementary Data included in Items 7 and 8, respectively, of this Form 10-K, and with our previously filed Forms 10-K.

Item 7. Management's Discussion and Analysis of Results of Operations and Financial Position

The following discussion and analysis of our results of operations and financial position should be read together with our consolidated financial statements and accompanying notes, which are contained in "Item 8. Financial Statements and Supplementary Data," as well as "Item 6. Selected Financial Data."

The discussion of the comparison of our 2019 and 2018 results was previously presented in the [Management's Discussion & Analysis in Part II, Item 7 of the Company's Annual Report on Form 10-K filed with the SEC on February 21, 2020](#), and has been omitted from this section pursuant to Instruction 1 to Item 303(a) of Regulation S-K.

Company Background and Strategy

Rogers Corporation designs, develops, manufactures and sells high-performance and high-reliability engineered materials and components to meet our customers' demanding challenges. We operate three strategic operating segments: Advanced Connectivity Solutions (ACS), Elastomeric Material Solutions (EMS) and Power Electronics Solutions (PES). The remaining operations, which represent our non-core businesses, are reported in the Other operating segment.

During the first quarter of 2021, we completed the realignment of our strategic business segments to reflect the combination of our ACS and PES businesses resulting in a new strategic business segment, Advanced Electronics Solutions (AES). The combination of these two complementary businesses with capabilities in both high power and high frequency applications is expected to enhance our overall value proposition to customers in multiple high-growth markets.

We have a history of innovation and have established Innovation Centers for our research and development (R&D) activities in Chandler, Arizona; Burlington, Massachusetts; Eschenbach, Germany; and Suzhou, China. We are headquartered in Chandler, Arizona.

Our growth strategy is based upon the following principles: (1) market-driven organization, (2) innovation leadership, (3) synergistic mergers and acquisitions, and (4) operational excellence. As a market-driven organization, we are focused on growth drivers, including advanced mobility and advanced connectivity. More specifically, in addition to the impact COVID-19 discussed below, the key medium- to long-term trends currently affecting our business include the increasing use of advanced driver assistance systems (ADAS) and increasing electrification of vehicles, including electric and hybrid electric vehicles (EV/HEV), in the automotive industry and the growth of 5G smartphones in the portable electronics industry. In addition to our focus on advanced mobility and advanced connectivity in the automotive, portable electronics and telecommunications industries, we sell into a variety of other markets including general industrial, aerospace and defense, mass transit, renewable energy and connected devices.

Our sales and marketing approach is based on addressing these trends, while our strategy focuses on factors for success as a manufacturer of engineered materials and components: performance, quality, service, cost, efficiency, innovation and technology. We have expanded our capabilities through organic investment and strive to ensure high quality solutions for our customers. We continue to review and re-align our manufacturing and engineering footprint in an effort to attain a leading competitive position globally. We have established or expanded our capabilities in various locations in support of our customers' growth initiatives.

We seek to enhance our operational and financial performance by investing in research and development, manufacturing and materials efficiencies, and new product initiatives that respond to the needs of our customers. We strive to evaluate operational and strategic alternatives to improve our business structure and align our business with the changing needs of our customers and major industry trends affecting our business.

Executive Summary

The following key highlights and factors should be considered when reviewing our results of operations, financial position and liquidity:

- In 2020 as compared to 2019, our net sales decreased by 10.7% to \$802.6 million, our gross margin increased 140 basis points to 36.4% from 35.0%, and operating income as a percentage of net sales decreased 390 basis points to 8.4% from 12.3%.
- We made \$248.0 million of discretionary principal payments on our revolving credit facility during the second, third and fourth quarters of 2020, partially offset by \$150.0 million in borrowings under our revolving credit facility during the first quarter of 2020 as a precautionary measure in order to increase our cash position and preserve financial flexibility given current uncertainty in the global markets resulting from the COVID-19 pandemic.
- We terminated the interest rate swap on September 30, 2020. As a result, we settled the interest rate swap for \$2.4 million on October 2, 2020, representing the fair value of the interest rate swap on the date of termination. Both Rogers and the counterparties released each other from all obligation under the interest rate swap agreement, including

the obligation to exchange, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to the agreed upon notional principal amount of \$75.0 million.

- We commenced manufacturing footprint optimization plans involving certain Europe and Asia manufacturing locations, primarily impacting our PES and ACS operating segments, and we recognized \$12.3 million of restructuring charges in 2020 related to this project.
- We incurred incremental direct costs of \$4.9 million in 2020, due to the COVID-19 pandemic. These costs primarily consist of temporary additional benefits established under our dependent care, premium pay and sick pay programs in response to the COVID-19 pandemic, as well as additional safety supplies. A substantial portion of the additional benefits under these programs expired in mid-June.
- We recognized an additional \$27.4 million of amortization expense in 2020 due to the acceleration of amortization expense related to our Diversified Silicone Products, Inc. (DSP) customer relationships and trademarks and trade names definite-lived other intangible assets, which were both accelerated to be fully amortized by December 31, 2020.
- In early February 2021, there was a fire at our UTIS manufacturing facility in Ansan, South Korea. This facility manufactures eSorba® polyurethane foams used in portable electronics and display applications. These operations will be disrupted, but it is too early to determine the expected duration of the disruption. The UTIS business represented less than 4% of our annual net sales in 2020.

Results of Operations

The following table sets forth, for the periods indicated, selected operations data expressed as a percentage of net sales.

	2020	2019
Net sales	100.0 %	100.0 %
Gross margin	36.4 %	35.0 %
Selling, general and administrative expenses	22.7 %	18.8 %
Research and development expenses	3.7 %	3.5 %
Restructuring and impairment charges	1.6 %	0.3 %
Other operating (income) expense, net	— %	0.1 %
Operating income	8.4 %	12.3 %
Equity income in unconsolidated joint ventures	0.6 %	0.6 %
Pension settlement charges	— %	(5.9)%
Other income (expense), net	0.4 %	(0.1)%
Interest expense, net	(0.9)%	(0.8)%
Income before income tax expense	8.5 %	6.1 %
Income tax expense	2.3 %	0.8 %
Net income	6.2 %	5.3 %

Net Sales and Gross Margin

<i>(Dollars in thousands)</i>	2020	2019
Net sales	\$ 802,583	\$ 898,260
Gross margin	\$ 291,820	\$ 314,292
Percentage of net sales	36.4 %	35.0 %

Net sales decreased by 10.7% in 2020 compared to 2019. Our ACS, EMS and PES operating segments had net sales decreases of 15.1%, 9.2% and 4.3%, respectively. The decrease in net sales was primarily driven by significantly lower net sales in the 4G and 5G wireless infrastructure markets in our ACS operating segment, as well as lower net sales in the automotive market in our ACS operating segment, lower net sales in the general industrial, mass transit, consumer and automotive markets in our EMS operating segment and lower net sales in the mass transit, industrial power and vehicle electrification markets in our PES operating segment. The decrease in net sales was partially offset by higher net sales in the aerospace and defense market in our ACS operating segment, higher net sales in the EV/HEV and portable electronics markets in our EMS operating segment and higher net sales in the EV/HEV and renewable energy markets in our PES operating segment. Net sales were not materially impacted by changes in foreign currencies.

The lower net sales in the 4G and 5G wireless infrastructure markets in our ACS operating segment reflected the waning of 4G infrastructure spending by telecommunications companies in anticipation of 5G, as well as the impacts of trade tensions, increased competition and design changes by telecommunications equipment original equipment manufacturers (OEMs), which reduced our materials content in 5G base stations. The lower net sales in the automotive, mass transit and general industrial markets was largely due to the impacts of the COVID-19 pandemic.

The lower net sales in industrial power market in our PES operating segment was due to a slowdown in industrial automation demand due to the impacts of the COVID-19 pandemic combined with customer inventory rebalancing, which began in mid-2019 and continued through most of the first half of 2020. The lower net sales in the vehicle electrification market in our PES operating segment was due to the COVID-19 impacts on the automotive sector in the first half of 2020, partially offset by a recovery in the second half of 2020.

In our PES and EMS operating segments, we anticipate higher net sales in the EV/HEV market in 2021 driven by continued strong demand. In our ACS and EMS operating segments, we anticipate a strong recovery in the automotive market in 2021 following industry disruptions that occurred in the first half of 2020 due to the COVID-19 pandemic. In particular, we anticipate higher net sales for ADAS applications in 2021 driven by increased adoption of safety features in newer vehicles. In our EMS operating segment, we anticipate higher net sales in the portable electronics market in 2021 due to anticipated continuation of strong demand for 5G smartphones, tempered by the uncertain impacts from the fire at our UTIS manufacturing facility in early February 2021. In our ACS operating segment, we anticipate higher net sales in the aerospace and defense market in 2021 driven by funding of technology programs such as advanced defense and radar systems.

Gross margin as a percentage of net sales increased 140 basis points to 36.4% in 2020 compared to 35.0% in 2019. Gross margin in 2020 was favorably impacted by lower freight, duties and tariffs costs in our ACS operating segment, including the recognition of a \$3.3 million recovery of previous duty taxes paid due to a change in Chinese tariff regulations, favorable product mix in our EMS operating segment, lower fixed overhead costs and yield improvements in our ACS, EMS and PES operating segments, as well as favorable productivity performance and favorable absorption of fixed overhead costs in our PES operating segment. This was partially offset by lower volume in our ACS, EMS and PES operating segments, unfavorable absorption of fixed overhead costs in our ACS and EMS operating segments, an increase in inventory reserve provisions in our PES operating segment, as well as unfavorable product mix in our PES operating segment.

We incurred incremental direct costs associated with the temporary additional benefits established under our dependent care, premium pay and sick pay programs in response to the COVID-19 pandemic, as well as additional safety supplies. These costs impacted our gross margin by approximately \$4.5 million in 2020. A substantial portion of the additional benefits under these programs expired in June 2020.

Selling, General and Administrative Expenses

<i>(Dollars in thousands)</i>	2020	2019
Selling, general and administrative expenses	\$ 182,283	\$ 168,682
Percentage of net sales	22.7 %	18.8 %

Selling, general and administrative (SG&A) expenses increased 8.1% in 2020 from 2019, primarily due to a \$24.4 million increase in other intangible assets amortization, a \$2.3 million increase in professional services and a \$1.4 million increase in total compensation and benefits, partially offset by a \$4.8 million decrease in travel and entertainment expenses, a \$1.4 million decrease in depreciation, a \$1.3 million decrease in advertising expenses, a \$1.2 million decrease in recruiting/relocation/training expenses, a \$1.1 million decrease in commissions expense and a \$1.0 million decrease in environmental charges.

The increase in amortization expense in 2020 from 2019 was due to the acceleration of amortization expense related to our DSP customer relationships and trademarks and trade names definite-lived other intangible assets, which were both accelerated to be fully amortized by December 31, 2020 due to an adjustment to their remaining useful lives. We recognized an additional \$27.4 million of amortization expense in 2020 due to this acceleration. For additional information, refer to “Note 6 – Goodwill and Other Intangible Assets” to “Item 8. Financial Statements and Supplementary Data.”

The decreases in travel and entertainment and recruiting/relocation/training expenses were primarily driven by the impacts of COVID-19.

Research and Development Expenses

<i>(Dollars in thousands)</i>	2020	2019
Research and development expenses	\$ 29,320	\$ 31,685
Percentage of net sales	3.7 %	3.5 %

R&D expenses decreased 7.5% in 2020 from 2019, primarily due to decreases in laboratory expenses as well as travel and entertainment expenses, partially offset by increases in total compensation and benefits.

Restructuring and Impairment Charges and Other Operating (Income) Expense, Net

<i>(Dollars in thousands)</i>	2020	2019
Restructuring and impairment charges	\$ 12,987	\$ 2,485
Other operating (income) expense, net	\$ (104)	\$ 959

We incurred restructuring charges associated with our manufacturing footprint optimization plans involving certain Europe and Asia manufacturing locations. We recognized \$12.3 million of restructuring charges related to this restructuring project in 2020.

We incurred restructuring charges associated with the consolidation of our Santa Fe Springs, California operations with the Company's facilities in Carol Stream, Illinois and Bear, Delaware. We recognized \$0.9 million of restructuring charges related to our facility consolidation in 2019.

We recognized \$0.6 million of impairment charges in 2020 primarily related to certain fixed assets in Belgium and Hungary. We recognized \$1.5 million of impairment charges in 2019 primarily related to certain fixed assets in connection with the Isola USA Corp. (Isola) asset acquisition.

In connection with the transitional leaseback of a portion of the facility and certain machinery and equipment acquired from Isola, we recognized lease income and related depreciation on leased assets of \$1.0 million and \$1.9 million, respectively, in 2019. Additionally, we recorded a gain of \$0.7 million for the settlement of indemnity claims related to the Isola asset acquisition in 2019.

Equity Income in Unconsolidated Joint Ventures

<i>(Dollars in thousands)</i>	2020	2019
Equity income in unconsolidated joint ventures	\$ 4,877	\$ 5,319

As of December 31, 2020, we had two unconsolidated joint ventures, each 50% owned: Rogers INOAC Corporation (RIC) and Rogers INOAC Suzhou Corporation (RIS). Equity income in those unconsolidated joint ventures decreased 8.3% in 2020 from 2019 due to lower net sales as a result of the COVID-19 pandemic and declines in operational performance, for both RIS and RIC.

Pension Settlement Charges and Other Income (Expense), Net

<i>(Dollars in thousands)</i>	2020	2019
Pension settlement charges	\$ (55)	\$ (53,213)
Other income (expense), net	\$ 3,513	\$ (592)

In 2020 and 2019, we recorded \$0.1 million and \$53.2 million of pre-tax settlement charges in connection with the termination of the Rogers Corporation Defined Benefit Pension Plan (following its merger with the Hourly Employees Pension Plan of Arlon LLC, Microwave Material and Silicone Technologies Divisions, Bear, Delaware (collectively, the Merged Plan)). For additional information, refer to "Note 11 – Pension Benefits, Other Postretirement Benefits and Employee Savings and Investment Plan" to "Item 8. Financial Statements and Supplementary Data."

Other income (expense), net improved to a net income of \$3.5 million in 2020 compared to a net expense of \$0.6 million in 2019 due to favorable impacts from our copper derivatives contracts and favorable impacts from our foreign currency transactions, including foreign currency derivatives, partially offset by higher costs associated with our defined benefit plans.

Interest Expense, Net

<i>(Dollars in thousands)</i>	2020	2019
Interest expense, net	\$ (7,135)	\$ (6,869)

Interest expense, net, increased by 3.9% in 2020 from 2019, primarily due to the \$2.4 million acceleration of interest expense as a result of the termination of the interest rate swap on September 30, 2020, partially offset by lower interest expense on borrowings under our revolving credit facility, which was mainly attributable to a lower weighted-average interest rate year-over-year as well as a lower weighted-average outstanding balance for our borrowings under our revolving credit facility.

Income Tax Expense

<i>(Dollars in thousands)</i>	2020	2019
Income tax expense	\$ 18,544	\$ 7,807
Effective tax rate	27.1 %	14.2 %

Our effective income tax rate for 2020 was 27.1% compared to 14.2% for 2019. The increase from 2019 was primarily due to the increase in current year accruals of reserves for uncertain tax positions, the decrease in foreign tax credits available to offset foreign source income, the decrease in excess tax deductions on stock-based compensation and higher tax impact on unremitted foreign earnings and profits, partially offset by the beneficial impact of changes in valuation allowance related to R&D credits and pre-tax mix across jurisdictions with disparate tax rates.

Operating Segment Net Sales and Operating Income

Advanced Connectivity Solutions

(Dollars in thousands)

	2020	2019
Net sales	\$ 268,699	\$ 316,592
Operating income	\$ 38,202	\$ 48,654

ACS net sales decreased by 15.1% in 2020 compared to 2019. The decrease in net sales was primarily driven by significantly lower net sales in the 4G and 5G wireless infrastructure markets, as well as the lower net sales in the automotive market, partially offset by higher net sales in the aerospace and defense market. Net sales were not materially impacted by changes in foreign currencies.

The lower net sales in the 4G and 5G wireless infrastructure markets in our ACS operating segment reflected the waning of 4G infrastructure spending by telecommunications companies in anticipation of 5G, as well as the impacts of trade tensions, increased competition and design changes by telecommunications equipment original equipment manufacturers (OEMs), which reduced our materials content in 5G base stations. The lower net sales in the automotive market was largely due to the impacts of the COVID-19 pandemic.

We anticipate a strong recovery in the automotive market in 2021 following industry disruptions that occurred in the first half of 2020 due to the COVID-19 pandemic. In particular, we anticipate higher net sales for ADAS applications in 2021 driven by increased adoption of safety features in newer vehicles. Additionally, we anticipate higher net sales in the aerospace and defense market in 2021 driven by funding of technology programs such as advanced defense and radar systems.

Operating income decreased by 21.5% in 2020 from 2019. The decrease in operating income was primarily due to lower volume and unfavorable absorption of fixed overhead costs, partially offset by lower freight, duties and tariffs costs, including the recognition of a \$3.3 million recovery of previous duty taxes paid due to a change in Chinese tariff regulations, yield improvements and lower fixed overhead costs. Additionally, our ACS operating segment incurred \$4.6 million of restructuring and impairment charges in 2020. As a percentage of net sales, operating income in 2020 was 14.2%, an approximately 120 basis point decrease as compared to 15.4% in 2019.

The incremental direct costs associated with the temporary additional benefits established under our dependent care, premium pay and sick pay programs in response to the COVID-19 pandemic, as well as the additional safety supplies, impacted ACS operating income by approximately \$1.9 million in 2020.

Elastomeric Material Solutions

(Dollars in thousands)

	2020	2019
Net sales	\$ 328,177	\$ 361,603
Operating income	\$ 30,817	\$ 57,080

EMS net sales decreased by 9.2% in 2020 compared to 2019. The decrease in net sales was primarily driven by lower net sales in the general industrial, mass transit, consumer and automotive markets, partially offset by higher net sales in the EV/HEV and portable electronics markets. Net sales were not materially impacted by changes in foreign currencies.

The lower net sales in the automotive, mass transit and general industrial markets was largely due to the impacts of the COVID-19 pandemic.

We anticipate higher net sales in the EV/HEV market in 2021 driven by continued strong demand. Additionally, we anticipate a strong recovery in the automotive market in 2021 following industry disruptions that occurred in the first half of 2020 due to the COVID-19 pandemic. Lastly, we anticipate higher net sales in the portable electronics market in 2021 due to anticipated continuation of strong demand for 5G smartphones, tempered by the uncertain impacts from the fire at our UTIS manufacturing facility in early February 2021.

Operating income decreased by 46.0% in 2020 from 2019. As a result of the acceleration of amortization expense related to the DSP customer relationships and trademarks and trade names definite-lived other intangible assets, we recognized an additional \$27.4 million of amortization expense in 2020. The decrease in operating income was also due to lower volume and unfavorable absorption of fixed overhead costs, offset by favorable product mix and lower fixed overhead costs. As a percentage of net sales, operating income in 2020 was 9.4%, an approximately 640 basis point decrease as compared to 15.8% in 2019.

The incremental direct costs associated with the temporary additional benefits established under our dependent care, premium pay and sick pay programs in response to the COVID-19 pandemic, as well as the additional safety supplies, impacted EMS operating income by approximately \$1.9 million in 2020.

The increase in amortization expense in 2020 from 2019 was due to the acceleration of amortization expense related to our DSP customer relationships and trademarks and trade names definite-lived other intangible assets, which were both accelerated to be fully amortized by December 31, 2020 due to an adjustment to their remaining useful lives. We recognized an additional \$27.4 million of amortization expense in 2020 due to this acceleration. The increase in amortization expense in 2020 is offset by a decrease in forecasted amortization expense in future years. For additional information, refer to “Note 6 – Goodwill and Other Intangible Assets” to “Item 8. Financial Statements and Supplementary Data.”

Power Electronics Solutions

(Dollars in thousands)

	2020	2019
Net sales	\$ 189,980	\$ 198,535
Operating income (loss)	\$ (6,179)	\$ (1,437)

PES net sales decreased by 4.3% in 2020 compared to 2019. The decrease in net sales was primarily driven by lower net sales in the mass transit, industrial power and vehicle electrification markets, partially offset by higher net sales in the EV/HEV and renewable energy markets. Net sales were favorably impacted by foreign currency fluctuations of \$1.0 million, or 0.5%, due to the appreciation in value of the euro relative to the U.S. dollar.

The lower net sales in industrial power market in our PES operating segment was due to a slowdown in industrial automation demand due to the impacts of the COVID-19 pandemic combined with customer inventory rebalancing, which began in mid-2019 and continued through most of the first half of 2020. The lower net sales in the vehicle electrification market in our PES operating segment was due to the COVID-19 impacts on the automotive sector in the first half of 2020, partially offset by a recovery in the second half of 2020. We anticipate higher net sales in 2021 in the EV/HEV market driven by continued strong demand.

Operating loss increased by 330.0% in 2020 from 2019. The increase in operating loss was primarily due to \$7.9 million of restructuring and impairment charges incurred in 2020, in addition to unfavorable product mix and lower volume, partially offset by favorable productivity performance, yield improvements, lower fixed overhead costs and favorable absorption of fixed overhead costs. As a percentage of net sales, operating loss in 2020 was 3.3%, an approximately 260 basis point increase as compared to 0.7% in 2019.

The incremental direct costs associated with the temporary additional benefits established under our dependent care, premium pay and sick pay programs in response to the COVID-19 pandemic, as well as the additional safety supplies, impacted PES operating loss by approximately \$1.0 million in 2020.

Other

(Dollars in thousands)

	2020	2019
Net sales	\$ 15,727	\$ 21,530
Operating income	\$ 4,494	\$ 6,184

Net sales in this segment decreased by 27.0% in 2020 from 2019. The decrease in net sales was primarily driven by a non-recurring last time buy in the Durel business in the first quarter of 2019, as well as lower demand in the automotive market partially resulting from the COVID-19 pandemic. Net sales were not materially impacted by changes in foreign currencies.

Operating income decreased by 27.3% in 2020 from 2019. The decrease in operating income was primarily due to lower volume and unfavorable absorption of fixed overhead costs, partially offset by lower fixed overhead costs. As a percentage of net sales, operating income in 2020 was 28.6%, an approximately 10 basis point decrease as compared to 28.7% in 2019.

Product and Market Development

Our research and development team is dedicated to growing our business by developing cost effective solutions that improve the performance of customers’ products and by identifying business and technology acquisition or development opportunities to expand our market presence.

Liquidity, Capital Resources and Financial Position

We believe that our existing sources of liquidity and cash flows that are expected to be generated from our operations, together with our available credit facilities, will be sufficient to fund our operations, currently planned capital expenditures, research and development efforts and our debt service commitments, for at least the next 12 months. We regularly review and evaluate the adequacy of our cash flows, borrowing facilities and banking relationships, seeking to ensure that we have the appropriate access to cash to fund both our near-term operating needs and our long-term strategic initiatives. The following table illustrates the location of our cash and cash equivalents by our three major geographic areas:

<i>(Dollars in thousands)</i>	As of December 31,	
	2020	2019
United States	\$ 21,657	\$ 39,354
Europe	55,449	31,166
Asia	114,679	96,329
Total cash and cash equivalents	<u>\$ 191,785</u>	<u>\$ 166,849</u>

Approximately \$170.1 million of our cash and cash equivalents were held by non-U.S. subsidiaries as of December 31, 2020. We did not make any changes in 2020 to our position on the permanent reinvestment of our historical earnings from foreign operations. With the exception of certain of our Chinese subsidiaries, where a substantial portion of our Asia cash and cash equivalents are held, we continue to assert that historical foreign earnings are indefinitely reinvested.

Net working capital was \$362.7 million and \$363.9 million as of December 31, 2020 and 2019, respectively.

<i>(Dollars in thousands)</i>	As of December 31,	
	2020	2019
<i>Key Financial Position Accounts:</i>		
Cash and cash equivalents	\$ 191,785	\$ 166,849
Accounts receivable, net	134,421	122,285
Inventories	102,360	132,859
Borrowings under revolving credit facility	25,000	123,000

Significant changes in our statement of financial position accounts from December 31, 2019 to December 31, 2020 were as follows:

- Accounts receivable, net increased 9.9% to \$134.4 million as of December 31, 2020, from \$122.3 million as of December 31, 2019. The increase from year-end was primarily due to higher net sales at the end of 2020 compared to at the end of 2019, as well as an increase in our income taxes receivable.
- Inventories decreased 23.0% to \$102.4 million as of December 31, 2020, from \$132.9 million as of December 31, 2019, primarily driven by a decline in inventory levels to align with our lower net sales volumes, as well as an increase in inventory reserve provision within the ACS and EMS operating segments and a reduction of capitalized variances associated with the timing of volumes produced versus sold relative to the end of 2019.
- Borrowings under revolving credit facility decreased 79.7% to \$25.0 million as of December 31, 2020, from \$123.0 million as of December 31, 2019. This was as a result of \$248.0 million of discretionary principal payments on our revolving credit facility during the second, third and fourth quarters of 2020, partially offset by \$150.0 million in borrowings under our revolving credit facility during the first quarter of 2020 as a precautionary measure in order to increase our cash position and preserve financial flexibility given current uncertainty in the global markets resulting from the COVID-19 pandemic. For additional information regarding this facility, as well as the Third Amended Credit Agreement and the Fourth Amended Credit Agreement, refer to “Note 9 – Debt” to “Item 8. Financial Statements and Supplementary Data.”

<i>(Dollars in thousands)</i>	Year Ended December 31,	
	2020	2019
<i>Key Cash Flow Measures:</i>		
Net cash provided by operating activities	\$ 165,056	\$ 161,323
Net cash used in investing activities	(40,385)	(48,963)
Net cash (used in) provided by financing activities	(104,189)	(111,843)

In 2020, cash and cash equivalents increased \$24.9 million, primarily due to the \$150.0 million in borrowings under our revolving credit facility and cash flows generated by operations, partially offset by \$248.0 million of principal payments made on our outstanding borrowings on our revolving credit facility, \$40.4 million in capital expenditures, as well as \$5.4 million in tax payments related to net share settlement of equity awards.

In 2019, cash and cash equivalents decreased \$0.9 million, primarily due to \$105.5 million of principal payments made on our outstanding borrowings on our revolving credit facility, \$51.6 million in capital expenditures, as well as \$7.6 million in tax payments related to net share settlement of equity awards, almost entirely offset by cash flows generated by operations.

In 2021, we expect capital spending to be in the range of approximately \$70.0 million to \$80.0 million, which we plan to fund with cash from operations. This range does not incorporate any capital spending that may occur as a result of the fire that extensively damaged our UTIS manufacturing facility located in Ansan, South Korea, in early February 2021.

Restriction on Payment of Dividends

The Fourth Amended Credit Agreement generally permits us to pay cash dividends to our shareholders, provided that (i) no default or event of default has occurred and is continuing or would result from the dividend payment and (ii) our total net leverage ratio does not exceed 2.75 to 1.00. If our total net leverage ratio exceeds 2.75 to 1.00, we may nonetheless make up to \$20.0 million in restricted payments, including cash dividends, during the fiscal year, provided that no default or event of default has occurred and is continuing or would result from the payments. Our total net leverage ratio did not exceed 2.75 to 1.00 as of December 31, 2020. For additional information regarding the Fourth Amended Credit Agreement, refer to “Note 9 – Debt” to “Item 8. Financial Statements and Supplementary Data.”

Contractual Obligations

The following table summarizes our contractual obligations as of December 31, 2020.

	Payments Due by Period				
	Total	Less than 1 Year	1 - 3 Years	3 - 5 Years	More than 5 Years
Operating lease obligations	\$ 4,741	\$ 2,342	\$ 2,394	\$ 5	\$ —
Finance lease obligations	5,077	4,713	364	—	—
Interest payments on finance lease obligations	91	74	17	—	—
Inventory purchase obligations	60	60	—	—	—
Capital commitments ⁽¹⁾	5,330	5,330	—	—	—
Borrowings under revolving credit facility ⁽²⁾	25,000	—	—	25,000	—
Interest payments on borrowings under revolving credit facility ⁽³⁾	1,500	445	927	128	—
Other postretirement benefits	1,503	148	244	272	839
Total contractual obligations	\$ 43,302	\$ 13,112	\$ 3,946	\$ 25,405	\$ 839

⁽¹⁾ This amount represents non-cancelable vendor purchase commitments.

⁽²⁾ All outstanding borrowings under our revolving credit facility are due on March 31, 2024.

⁽³⁾ Estimated future interest payments are based on a leverage ratio based spread that ranges from 1.625% to 2.000%, plus projected forward 1-month LIBOR rates. Actual future interest payments could differ from those set forth here due to the expected phase-out of LIBOR by the end of 2021.

Other postretirement benefits, which amount to \$1.5 million, are expected to be paid from operating cash flows. Other long-term liabilities, such as deferred taxes, unrecognized tax benefits and asbestos-related product liability reserves, have been excluded from the table due to the uncertainty of the timing of payments combined with the absence of historical trends to be used as a predictor for such payments.

Effects of Inflation

We do not believe that inflation had a material impact on our business, net sales, or operating results during the periods presented.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have, or are, in the opinion of management, reasonably likely to have, a current or future material effect on our results of operations or financial position.

Critical Accounting Estimates

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles, which require management to make estimates, judgments and assumptions that affect the amounts reported in the financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances and believe that appropriate reserves have been established using on reasonable methodologies and appropriate assumptions based on facts and circumstances that are known; however, actual results may differ from these estimates under different assumptions or conditions. Certain accounting policies may require a choice between acceptable accounting methods or may require substantial judgment or estimation in their application. A summary of our critical accounting estimates is presented below:

Goodwill and Other Intangible Assets

We have made acquisitions over the years that included the recognition of intangible assets. Intangible assets are classified into three categories: (1) goodwill; (2) other intangible assets with definite lives subject to amortization; and (3) other intangible assets with indefinite lives not subject to amortization. Other intangible assets can include items such as trademarks and trade names, licensed technology, customer relationships and covenants not to compete, among other things. Each definite-lived other intangible asset is amortized over its respective economic useful life using the economic attribution method.

Goodwill is tested for impairment annually and between annual impairment tests if events or changes in circumstances indicate the carrying value may be impaired. If it is more likely than not that our goodwill is impaired, then we compare the estimated fair value of each of our reporting units to its respective carrying value. If a reporting unit's carrying value is greater than its fair value, then an impairment is recognized for the excess and charged to operations. We currently have four reporting units with goodwill: ACS, EMS, curamik[®] and Elastomer Components Division (ECD). Consistent with historical practice, the annual impairment test on these reporting units was performed as of November 30, 2020.

The application of the annual goodwill impairment test requires significant judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units and determination of the fair value of each reporting unit. Determining the fair value is subjective and requires the use of significant estimates and assumptions, including financial projections for net sales, gross margin and operating margin, discount rates, terminal growth rates and future market conditions, among others. We estimated the fair value of our reporting units using an income approach based on the present value of future cash flows through a five-year discounted cash flow analysis. The discounted cash flow analysis utilized the discount rates for each of the reporting units ranging from 10.5% for EMS to 13.1% for ECD, and terminal growth rates ranging from 3.4% for curamik[®] to 4.2% for ACS. We believe this approach yields the most appropriate evidence of fair value as our reporting units are not easily compared to other corporations involved in similar businesses. We further believe that the assumptions and rates used in our annual goodwill impairment test are reasonable, but inherently uncertain. There were no impairment charges resulting from our goodwill impairment analysis for the year ended December 31, 2020. Our ACS, EMS, curamik[®] and ECD reporting units had allocated goodwill of \$51.7 million, \$143.0 million, \$73.2 million and \$2.2 million respectively, as of December 31, 2020.

Indefinite-lived other intangible assets are tested for impairment annually and between annual impairment tests if events or changes in circumstances indicate the carrying value may be impaired. If it is more likely than not that an indefinite-lived other intangible asset is impaired, then we compare the estimated fair value of that indefinite-lived other intangible asset to its respective carrying value. If an indefinite-lived other intangible asset's carrying value is greater than its fair value, then an impairment charge is recognized for the excess and charged to operations. Consistent with historical practice, the annual impairment test on these reporting units was performed as of November 30, 2020. The application of the annual indefinite-lived other intangible asset impairment test requires significant judgment, including the determination of fair value of each indefinite-lived other intangible asset. Fair value is primarily based on income approaches using discounted cash flow models, which have significant assumptions. Such assumptions are subject to variability from year to year and are directly impacted by global market conditions. There were no impairment charges resulting from our indefinite-lived other intangible assets impairment analysis for the year ended December 31, 2020. Our curamik[®] reporting unit had an indefinite-lived other intangible asset of \$4.8 million as of December 31, 2020.

Definite-lived other intangible assets are tested for recoverability whenever events or changes in circumstances indicate the carrying value may not be recoverable. The recoverability test involves comparing the estimated sum of the undiscounted cash flows for each definite-lived other intangible asset to its respective carrying value. If a definite-lived other intangible asset's carrying value is greater than the sum of its undiscounted cash flows, then the definite-lived other intangible asset's carrying value is compared to its estimated fair value and an impairment charge is recognized for the excess and charged to operations. The application of the recoverability test requires significant judgment, including the identification of the asset group and determination of undiscounted cash flows and fair value of the underlying definite-lived other intangible asset. Determination of undiscounted cash flows requires the use of significant estimates and assumptions, including certain financial projections. Fair value is primarily based on income approaches using discounted cash flow models, which have significant assumptions. Such assumptions are subject to variability from year to year and are directly impacted by global market conditions. There were immaterial impairment charges resulting from our definite-lived other intangible assets impairment analysis for the year ended December 31, 2020. Our ACS, EMS and curamik[®] reporting units had definite-lived other intangible assets of \$3.7 million, \$101.2 million and \$8.2 million, respectively, as of December 31, 2020.

The useful life determination for each indefinite-lived other intangible asset is evaluated each reporting period to determine whether events and circumstances support an indefinite useful life. The useful life determination for each definite-lived other intangible asset is evaluated each reporting period to determine whether events and circumstances warrant a revision to the remaining period of amortization.

Product Liabilities

We endeavor to maintain insurance coverage with reasonable deductible levels to protect us from potential exposures to product liability claims. Any liability associated with such claims is based on management's best estimate of the potential claim value, while insurance receivables associated with related claims are not recorded until verified by the insurance carrier.

For asbestos-related claims, we recognize projected asbestos liabilities and related insurance receivables, with any difference between the liability and related insurance receivable recognized as an expense in the consolidated statements of operations. Our estimates of asbestos-related contingent liabilities and related insurance receivables are based on an independent actuarial analysis and an independent insurance usage analysis prepared annually by third parties. The actuarial analysis contains

numerous assumptions, including number of claims that might be received, the type and severity of the disease alleged by each claimant, the long latency period associated with asbestos exposure, dismissal rates, average indemnity costs, average defense costs, costs of medical treatment, the financial resources of other companies that are co-defendants in claims, uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, and the impact of potential changes in legislative or judicial standards, including potential tort reform. Furthermore, any predictions with respect to these assumptions are subject to even greater uncertainty as the projection period lengthens. The insurance usage analysis considers, among other things, applicable deductibles, retentions and policy limits, the solvency and historical payment experience of various insurance carriers, the likelihood of recovery as estimated by external legal counsel and existing insurance settlements.

The liability projection period covers all current and future indemnity and defense costs through 2064, which represents the expected end of our asbestos liability exposure with no further ongoing claims expected beyond that date. This conclusion was based on our history and experience with the claims data, the diminished volatility and consistency of observable claims data, the period of time that has elapsed since we stopped manufacturing products that contained encapsulated asbestos and an expected downward trend in claims due to the average age of our claimants, which is approaching the average life expectancy.

Our accrued asbestos liabilities may not approximate our actual asbestos-related indemnity and defense costs, and our accrued insurance recoveries may not be realized. We believe it is reasonably possible that we may incur additional charges for our asbestos liabilities and defense costs in the future that could exceed existing reserves and insurance recoveries. We plan to continue to vigorously defend ourselves and believe we have substantial unutilized insurance coverage to mitigate future costs related to this matter.

We review our asbestos-related projections annually in the fourth quarter of each year unless facts and circumstances materially change during the year, at which time we would analyze these projections. We believe the assumptions made on the potential exposure and expected insurance coverage are reasonable at the present time, but are subject to uncertainty based on the actual future outcome of our asbestos litigation.

As of December 31, 2020, the estimated liabilities and estimated insurance recoveries for all current and future indemnity and defense costs projected through 2064 were \$73.2 million and \$66.8 million, respectively.

Revenue Recognition

Recognition of revenue occurs when a customer obtains control of promised goods or services in an amount that reflects the consideration to which the providing entity expects to be entitled in exchange for those goods or services. We recognize revenue when all of the following criteria are met: (1) we have entered into a binding agreement, (2) the performance obligations have been identified, (3) the transaction price to the customer has been determined, (4) the transaction price has been allocated to the performance obligations in the contract, and (5) the performance obligations have been satisfied. The majority of our shipping terms permit us to recognize revenue at point of shipment. Some shipping terms require the goods to be cleared through customs or be received by the customer before title passes. In those instances, revenue is not recognized until either the customer has received the goods or they have passed through customs, depending on the circumstances. Shipping and handling costs are treated as fulfillment costs. Sales tax or value added tax (VAT) are excluded from the measurement of the transaction price.

We manufacture some products to customer specifications which are customized to such a degree that it is unlikely that another entity would purchase these products or that we could modify these products for another customer. These products are deemed to have no alternative use to the Company whereby we have an enforceable right to payment evidenced by contractual termination clauses. In accordance with ASC 606, for those circumstances we recognize revenue on an over-time basis. Revenue recognition does not occur until the product meets the definition of “no alternative use” and therefore, items that have not yet reached that point in the production process are not included in the population of items with over-time revenue recognition.

As appropriate, we record estimated reductions to revenue for customer returns, allowances, and warranty claims. Provisions for such reductions are made at the time of sale and are typically derived from historical trends and other relevant information.

Pension and Other Postretirement Benefits

We sponsor one material defined benefit pension plan that covers certain union employees and we sponsor multiple fully insured or self-funded medical plans and fully insured life insurance plans for retirees. The costs and obligations associated with these plans are dependent upon various actuarial assumptions used in calculating such amounts. These assumptions include discount rates, long-term rates of return on plan assets, mortality rates and other factors. The assumptions used were determined as follows: (i) the discount rate used is based on the PruCurve bond index, with comparisons against other similar indices; and (ii) the long-term rate of return on plan assets is determined based on historical portfolio results, market conditions and our expectations of future returns. We determine these assumptions based on consultation with outside actuaries and investment advisors. Any changes in these assumptions could have a significant impact on future recognized pension costs, assets and liabilities.

The rates used to determine our costs and obligations under our pension and postretirement plans are disclosed in “Note 11 – Pension Benefits, Other Postretirement Benefits and Employee Savings and Investment Plan” to “Item 8. Financial Statements and Supplementary Data.” Each assumption has different sensitivity characteristics. For the year ended December 31, 2020, a 25 basis point decrease in the discount rate would have increased our pension expense for Rogers Corporation Employees’ Pension Plan (the Union Plan) by a de minimis amount. A 25 basis point decrease in the discount rate would have increased the other postretirement benefits expense by a de minimis amount. A 25 basis point decrease in the expected return on assets would have increased the total 2020 pension expense for the Union Plan by a de minimis amount. As the other postretirement benefit plans are unfunded, they would not be impacted by this assumption change.

Inventory Valuation

Inventories are stated at the lower of cost or net realizable value with costs determined primarily on a first-in first-out basis. We also maintain a reserve for excess, obsolete and slow-moving inventory that is primarily developed by utilizing both specific product identification and historical product demand as the basis for our analysis. Products and materials that are specifically identified as obsolete are fully reserved. In general, most products that have been held in inventory greater than one year are fully reserved unless there are mitigating circumstances, including forecasted sales or current orders for the product. The remainder of the allowance is based on our estimates and fluctuates with market conditions, design cycles and other economic factors. Risks associated with this allowance include unforeseen changes in business cycles that could affect the marketability of certain products and an unexpected decline in current production. We closely monitor the marketplace and related inventory levels and have historically maintained reasonably accurate allowance levels. Our obsolescence reserve has ranged from 9% to 18% of gross inventory over the last three fiscal years.

Equity Compensation

Determining the amount of equity compensation expense to be recorded requires us to develop estimates to be used in calculating the grant-date fair value of performance-based restricted stock units.

Performance-Based Restricted Stock Units

As of December 31, 2020, we had performance-based restricted stock units from 2020, 2019 and 2018 outstanding. These awards generally cliff vest at the end of a three-year measurement period. However, employees whose employment terminates during the measurement period due to death, disability, or, in certain cases, retirement may receive a pro-rata payout based on the number of days they were employed during the measurement period. Participants are eligible to be awarded shares ranging from 0% to 200% of the original award amount, based on certain defined performance measures.

The 2020, 2019 and 2018 awards have one measurement criteria: the three-year total shareholder return (TSR) on the performance of our capital stock as compared to that of a specified group of peer companies. The TSR measurement criteria of the awards is considered a market condition. As such, the fair value of this measurement criteria was determined on the grant date using a Monte Carlo simulation valuation model. We recognize compensation expense on all of these awards on a straight-line basis over the vesting period with no changes for final projected payout of the awards. We account for forfeitures as they occur.

Below were the assumptions used in the Monte Carlo calculation for each material award granted in 2020, 2019 and 2018:

	February 12, 2020	June 3, 2019	February 7, 2019	September 17, 2018	February 8, 2018
Expected volatility	41.0%	39.7%	36.7%	36.6%	34.8%
Expected term (in years)	2.9	2.6	2.9	3.0	3.0
Risk-free interest rate	1.41%	1.78%	2.43%	2.85%	2.28%

Expected volatility – In determining expected volatility, we have considered a number of factors, including historical volatility.

Expected term – We use the measurement period of the award to determine the expected term assumption for the Monte Carlo simulation valuation model.

Risk-free interest rate – We use an implied “spot rate” yield on U.S. Treasury Constant Maturity rates as of the grant date for our assumption of the risk-free interest rate.

Expected dividend yield – We do not currently pay dividends on our capital stock; therefore, a dividend yield of 0% was used in the Monte Carlo simulation valuation model.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market Risk

- *Foreign Currency Risk*

Our financial results are affected by changes in foreign exchange rates and economic conditions in foreign countries in which we operate. Our primary overseas markets are in Europe and Asia, thus exposing us to exchange rate risk from fluctuations in the euro, the Chinese renminbi and certain other currencies used in Asia. We seek to mitigate exposure to variability in currency exchange rates, when possible, through the use of natural hedges, whereby purchases and sales in the same foreign currency and with similar maturity dates offset one another. We further seek to mitigate this exposure through hedging activities by entering into foreign exchange forward contracts with third parties when the use of natural hedges is not possible or desirable. We currently do not use derivative instruments for trading or speculative purposes. We monitor foreign exchange risks and at times manage such risks on specific transactions. Our risk management process primarily uses analytical techniques and sensitivity analysis. In 2020, a 10% strengthening of the U.S. dollar relative to other currencies would have resulted in a decrease to net sales and net income of approximately \$32 million and \$7 million, respectively, while a 10% weakening of the U.S. dollar relative to other currencies would have resulted in an increase to net sales and net income of approximately \$39 million and \$7 million, respectively.

- *Interest Rate Risk*

As of December 31, 2020, we had \$25.0 million in borrowings outstanding under our revolving credit facility. The interest charged on these borrowings fluctuates with movements in the benchmark LIBOR. As of December 31, 2020, the effective all-in rate of interest on our revolving credit facility was 1.77%, and a 100 basis point increase in LIBOR would have increased the amount of interest expense by approximately \$1.0 million for the year ended December 31, 2020.

- *Commodity Risk*

We are subject to fluctuations in the cost of raw materials used to manufacture our materials and products. In particular, we are exposed to market fluctuations in commodity pricing as we utilize certain materials, such as copper and ceramic, which are key materials in certain of our products. In order to minimize the risk of market driven price changes in these commodities, we utilize hedging strategies to insulate us against price fluctuations of copper, the most frequently used commodity in our manufacturing processes. We currently do not use hedging strategies to minimize the risk of price fluctuations on other commodity-based raw materials; however, we regularly review such strategies to hedge market risk on an ongoing basis.

For additional discussion, refer to “Note 2 – Fair Value Measurements” and “Note 3 – Hedging Transactions and Derivative Financial Instruments” to “Item 8. Financial Statements and Supplementary Data.”

Item 8. Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Rogers Corporation

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statements of financial position of Rogers Corporation and its subsidiaries (the “Company”) as of December 31, 2020 and 2019, and the related consolidated statements of operations, comprehensive income, shareholders’ equity and cash flows for each of the three years in the period ended December 31, 2020, including the related notes and schedule of valuation and qualifying accounts for each of the three years in the period ended December 31, 2020 appearing under Item 8 (collectively referred to as the “consolidated financial statements”). We also have audited the Company’s internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2020 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company’s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management’s Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company’s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Goodwill Impairment Assessment - curamik® Reporting Unit

As described in Notes 1 and 6 to the consolidated financial statements, the Company's consolidated goodwill balance was \$270.2 million as of December 31, 2020, and the goodwill associated with the curamik® reporting unit was \$73.2 million. Goodwill is tested for impairment annually as of November 30 and between annual impairment tests if events or changes in circumstances indicate the carrying value may be impaired. If a reporting unit's carrying value is greater than its fair value, then an impairment is recognized for the excess and charged to operations. Management estimated the fair value of the curamik® reporting unit using an income approach based on the present value of future cash flows through a five year discounted cash flow analysis. Determining the fair value is subjective and requires the use of significant estimates and assumptions, including financial projections for net sales, gross margin and operating margin, discount rate, terminal growth rate and future market conditions, among others.

The principal considerations for our determination that performing procedures relating to the goodwill impairment assessment of the curamik® reporting unit is a critical audit matter are (i) the significant judgment by management when determining the fair value measurement of the reporting unit; and (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating audit evidence related to management's significant assumptions related to financial projections for net sales and gross margin.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's goodwill impairment assessment, including controls over the valuation of the Company's reporting units. These procedures also included, among others (i) testing management's process for determining the fair value measurement of the curamik® reporting unit; (ii) evaluating the appropriateness of the discounted cash flow analysis; (iii) testing the completeness and accuracy of underlying data used in the analysis; and (iv) evaluating the reasonableness of significant assumptions used by management related to the financial projections for net sales and gross margin. Evaluating management's assumptions related to the financial projections for net sales and gross margin involved evaluating whether the assumptions used were reasonable considering (i) the current and past performance of the reporting unit, (ii) the consistency with external market and industry data, and (iii) whether these assumptions were consistent with evidence obtained in other areas of the audit.

Asbestos-Related Liabilities and Insurance Receivables

As described in Notes 1 and 12 to the consolidated financial statements, the Company's consolidated asbestos-related liabilities and asbestos-related insurance receivables balances were \$73.2 million and \$66.8 million, respectively, as of December 31, 2020. Management reviews the asbestos-related projections annually in the fourth quarter of each year unless facts and circumstances materially change during the year, at which time management would analyze these projections. Management recognizes a liability for asbestos-related contingencies that are probable of occurrence and reasonably estimable. In connection with the recognition of liabilities for asbestos related matters, management records asbestos-related insurance receivables that are deemed probable. Estimates of asbestos-related contingent liabilities and related insurance receivables are based on an independent actuarial analysis and an independent insurance usage analysis, respectively, prepared annually by third parties. The actuarial analysis contains numerous assumptions, including the number of claims that might be received, the type and severity of the disease alleged by each claimant, the long latency period associated with asbestos exposure, dismissal rates, average indemnity costs, average defense costs, costs of medical treatment, the financial resources of other companies that are co-defendants in claims, uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, and the impact of potential changes in legislative or judicial standards, including potential tort reform. The insurance usage analysis considers, among other things, applicable deductibles, retentions and policy limits, the solvency and historical payment experience of various insurance carriers, the likelihood of recovery as estimated by external legal counsel and existing insurance settlements.

The principal considerations for our determination that performing procedures relating to asbestos-related liabilities and insurance receivables is a critical audit matter are (i) the significant judgment by management when determining the asbestos-

related liabilities and insurance receivables; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to the number of claims that might be received, type and severity of the disease alleged by each claimant, average indemnity costs, average defense costs, and dismissal rates; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the analyses of the asbestos-related liabilities and insurance receivables. These procedures also included, among others (i) testing management's process for determining the asbestos-related liabilities and insurance receivables estimates; (ii) evaluating the appropriateness of the actuarial and insurance usage analyses; (iii) testing the completeness and accuracy of underlying data used in the analyses; and (iv) evaluating the reasonableness of significant assumptions used by management related to the number of claims that may be received, type and severity of the disease alleged by each claimant, average indemnity costs, average defense costs, and dismissal rates. Professionals with specialized skill and knowledge were used to assist in the evaluation of management's analyses and significant assumptions related to the number of claims that may be received, the type and severity of the disease alleged by each claimant, average indemnity costs, average defense costs, and dismissal rates.

The accompanying notes are an integral part of the consolidated financial statements.

ROGERS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Basis of Presentation, Organization and Summary of Significant Accounting Policies

As used herein, the terms “Company,” “Rogers,” “we,” “us,” “our” and similar terms mean Rogers Corporation and its consolidated subsidiaries, unless the context indicates otherwise.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and our wholly-owned subsidiaries, after elimination of intercompany balances and transactions. The preparation of financial statements, in conformity with accounting principles generally accepted in the United States (U.S. GAAP), requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Organization

Our reporting structure is comprised of three strategic operating segments: Advanced Connectivity Solutions (ACS), Elastomeric Material Solutions (EMS) and Power Electronics Solutions (PES). The remaining operations are accumulated and reported as our Other operating segment.

Advanced Connectivity Solutions

Our ACS operating segment designs, develops, manufactures and sells circuit materials and solutions enabling high-performance and high-reliability connectivity for applications in wireless infrastructure (e.g., power amplifiers, antennas and small cells), automotive (e.g., ADAS, telematics and thermal solutions), aerospace and defense (e.g. antenna systems, communication systems and phased array radar systems), connected devices (e.g., mobile internet devices and thermal solutions) and wired infrastructure (e.g., computing and IP infrastructure) markets. We believe these products have characteristics that offer performance and other functional advantages in many market applications that serve to differentiate our products from other commonly available materials. ACS products are sold principally to independent and captive printed circuit board fabricators that convert our laminates to custom printed circuits. Trade names for our ACS products include: RO4000[®] Series, RO3000[®] Series, RT/duroid[®], CLTE Series[®], TMM[®], AD Series[®], DiClad[®] Series, CuClad[®] Series, Kappa[®], COOLSPAN[®], TC Series[®], 92ML[™], IsoClad[®] Series, MAGTREX[™], XTremeSpeed RO1200[™] Laminates, IM Series[™], 2929 Bondply, 3001 Bondply Film and SpeedWave[™] Prepreg. As of December 31, 2020, our ACS operating segment had manufacturing and administrative facilities in Chandler, Arizona; Rogers, Connecticut; Bear, Delaware; Evergem, Belgium; and Suzhou, China.

Elastomeric Material Solutions

Our EMS operating segment designs, develops, manufactures and sells engineered material solutions for a wide variety of applications and markets. These include polyurethane and silicone materials used in cushioning, gasketing and sealing, and vibration management applications for general industrial, portable electronics, automotive, mass transit, aerospace and defense, footwear and impact mitigation and printing markets; customized silicones used in flex heater and semiconductor thermal applications for general industrial, portable electronics, automotive, mass transit, aerospace and defense and medical markets; polytetrafluoroethylene and ultra-high molecular weight polyethylene materials used in wire and cable protection, electrical insulation, conduction and shielding, hose and belt protection, vibration management, cushioning, gasketing and sealing, and venting applications for general industrial, automotive and aerospace and defense markets. We believe these materials have characteristics that offer functional advantages in many market applications which serve to differentiate Rogers’ products from other commonly available materials. EMS products are sold globally to converters, fabricators, distributors and original equipment manufacturers (OEMs). Trade names for our EMS products include: PORON[®], BISCO[®], DeWAL[®], ARLON[®], eSorba[®], Griswold[®], XRD[®], R/bak[®] and HeatSORB[™].

As of December 31, 2020, our EMS operating segment had administrative and manufacturing facilities in Moosup, Connecticut; Rogers, Connecticut; Woodstock, Connecticut; Bear, Delaware; Carol Stream, Illinois; Narragansett, Rhode Island; Ansan, South Korea; and Suzhou, China. We also own 50% of two unconsolidated joint ventures: (1) Rogers Inoac Corporation (RIC), a joint venture established in Japan to design, develop, manufacture and sell PORON[®] products predominantly for the Japanese market and (2) Rogers INOAC Suzhou Corporation (RIS), a joint venture established in China to design, develop, manufacture and sell PORON[®] products primarily for RIC customers in various Asian countries. INOAC Corporation owns the remaining 50% of both RIC and RIS. RIC has manufacturing facilities at the INOAC facilities in Nagoya and Mie, Japan, and RIS has manufacturing facilities at Rogers’ facilities in Suzhou, China.

Power Electronics Solutions

Our PES operating segment designs, develops, manufactures and sells ceramic substrate materials, busbars and cooling solutions for a variety of applications in EV/HEV, general industrial, mass transit, renewable energy, aerospace and defense and wired infrastructure markets. We sell our ceramic substrate materials and cooling solutions under the curamik[®] trade name and our busbars under the ROLINX[®] trade name. As of December 31, 2020, our PES operating segment had manufacturing and administrative facilities in Evergem, Belgium; Eschenbach, Germany; Budapest, Hungary; and Suzhou, China.

Other

Our Other operating segment consists of elastomer components for applications in general industrial market, as well as elastomer floats for level sensing in fuel tanks, motors, and storage tanks applications in the general industrial and automotive markets. We sell our elastomer components under our ENDUR[®] trade name and our floats under our NITROPHYL[®] trade name.

Summary of Significant Accounting Policies

Cash Equivalents

Highly liquid investments with original maturities of three months or less are considered cash equivalents. These investments are stated at cost, which approximates fair value.

Investments in Unconsolidated Joint Ventures

We account for our investments in and advances to unconsolidated joint ventures, both of which are 50% owned, using the equity method of accounting.

Foreign Currency

All balance sheet accounts of foreign subsidiaries are translated or remeasured at exchange rates in effect at each year end, and income statement items are translated using the average exchange rates for the year. Translation adjustments for those entities that operate under a local currency are recorded directly to a separate component of shareholders' equity, while remeasurement adjustments for those entities that operate under the parent's functional currency are recorded to the income statement as a component of "Other income (expense), net." Currency transaction gains and losses are reported as income or expense, respectively, in the consolidated statements of operations as a component of "Other income (expense), net." Such adjustments resulted in gains of \$0.9 million in 2020 and losses of \$0.9 million and \$0.7 million in 2019 and 2018, respectively.

Allowance for Credit Losses

In 2020, we adopted Accounting Standards Update No. 2016-13, *Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*, using the modified retrospective transition method. Upon adoption, we changed our impairment model to utilize a current expected credit losses (CECL) model in place of the incurred loss methodology for financial instruments measured at amortized cost, including our accounts receivable. CECL estimates on accounts receivable are recorded as selling, general and administrative expenses on our consolidated statements of operations. The cumulative effect adjustment from adoption was immaterial to our consolidated financial statements.

The allowance for credit losses is determined based on a variety of factors that affect the potential collectability of the related receivables, including the length of time receivables are past due, customer credit ratings, financial stability of customers, specific one-time events and past customer history. In addition, in circumstances where we are made aware of a specific customer's inability to meet its financial obligations, a specific allowance is established. The majority of accounts are individually evaluated on a regular basis and appropriate reserves are established as deemed appropriate based on the criteria previously mentioned. The remainder of the reserve is based on our estimates and takes into consideration historical trends, market conditions and the composition of our customer base.

Inventories

Inventories are stated at the lower of cost or net realizable value. The cost of inventories is determined using the first in, first out (FIFO) method. An allowance is made for estimated losses due to obsolescence. The allowance is determined for groups of products based on purchases in the recent past and/or expected future demand and market conditions. Abnormal amounts of idle facility expense and waste are not capitalized in inventory. The allocation of fixed production overheads to the inventory cost is based on the normal capacity of the production facilities.

Our “Inventories” line item in the consolidated statements of financial position consisted of the following:

<i>(Dollars in thousands)</i>	As of December 31,	
	2020	2019
Raw materials	\$ 44,976	\$ 61,338
Work-in-process	25,291	30,043
Finished goods	32,093	41,478
Total inventories	<u>\$ 102,360</u>	<u>\$ 132,859</u>

Property, Plant and Equipment

Property, plant and equipment are stated on the basis of cost. For financial reporting purposes, provisions for depreciation are calculated on a straight-line basis over the following estimated useful lives of the underlying assets:

Property, Plant and Equipment Classification	Estimated Useful Lives
Buildings and improvements	30-40 years
Machinery and equipment	5-15 years
Office equipment	3-10 years

Software Costs

We capitalize certain internal and external costs of computer software developed or obtained for internal use, principally related to software coding, software configuration, designing system interfaces and installation and testing of the software. We amortize capitalized internal use software costs using the straight-line method over the estimated useful lives of the software, generally from three to five years. Net capitalized software and development costs were \$0.3 million and \$0.2 million for the years ended December 31, 2020 and 2019, respectively. Capitalized software is included within “Property, plant and equipment, net of accumulated depreciation” in the consolidated statements of financial position.

Goodwill and Other Intangible Assets

We have made acquisitions over the years that included the recognition of intangible assets. Intangible assets are classified into three categories: (1) goodwill; (2) other intangible assets with definite lives subject to amortization; and (3) other intangible assets with indefinite lives not subject to amortization. Other intangible assets can include items such as trademarks and trade names, licensed technology, customer relationships and covenants not to compete, among other things. Each definite-lived other intangible asset is amortized over its respective economic useful life using the economic attribution method.

Goodwill is tested for impairment annually and between annual impairment tests if events or changes in circumstances indicate the carrying value may be impaired. If it is more likely than not that our goodwill is impaired, then we compare the estimated fair value of each of our reporting units to its respective carrying value. If a reporting unit’s carrying value is greater than its fair value, then an impairment is recognized for the excess and charged to operations. We currently have four reporting units with goodwill: ACS, EMS, curamik[®] and Elastomer Components Division (ECD). Consistent with historical practice, the annual impairment test on these reporting units was performed as of November 30, 2020.

The application of the annual goodwill impairment test requires significant judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units and determination of the fair value of each reporting unit. Determining the fair value is subjective and requires the use of significant estimates and assumptions, including financial projections for net sales, gross margin and operating margin, discount rates, terminal growth rates and future market conditions, among others. We estimated the fair value of our reporting units using an income approach based on the present value of future cash flows through a five-year discounted cash flow analysis. The discounted cash flow analysis utilized the discount rates for each of the reporting units ranging from 10.5% for EMS to 13.1% for ECD, and terminal growth rates ranging from 3.4% for curamik[®] to 4.2% for ACS. We believe this approach yields the most appropriate evidence of fair value as our reporting units are not easily compared to other corporations involved in similar businesses. We further believe that the assumptions and rates used in our annual goodwill impairment test are reasonable, but inherently uncertain. There were no impairment charges resulting from our goodwill impairment analysis for the year ended December 31, 2020. Our ACS, EMS, curamik[®] and ECD reporting units had allocated goodwill of \$51.7 million, \$143.0 million, \$73.2 million and \$2.2 million respectively, as of December 31, 2020.

Indefinite-lived other intangible assets are tested for impairment annually and between annual impairment tests if events or changes in circumstances indicate the carrying value may be impaired. If it is more likely than not that an indefinite-lived other intangible asset is impaired, then we compare the estimated fair value of that indefinite-lived other intangible asset to its respective carrying value. If an indefinite-lived other intangible asset’s carrying value is greater than its fair value, then an impairment charge is recognized for the excess and charged to operations. Consistent with historical practice, the annual impairment test on these reporting units was performed as of November 30, 2020. The application of the annual indefinite-lived

other intangible asset impairment test requires significant judgment, including the determination of fair value of each indefinite-lived other intangible asset. Fair value is primarily based on income approaches using discounted cash flow models, which have significant assumptions. Such assumptions are subject to variability from year to year and are directly impacted by global market conditions. There were no impairment charges resulting from our indefinite-lived other intangible assets impairment analysis for the year ended December 31, 2020. The curamik[®] reporting unit had an indefinite-lived other intangible asset of \$4.8 million as of December 31, 2020.

Definite-lived other intangible assets are tested for recoverability whenever events or changes in circumstances indicate the carrying value may not be recoverable. The recoverability test involves comparing the estimated sum of the undiscounted cash flows for each definite-lived other intangible asset to its respective carrying value. If a definite-lived other intangible asset's carrying value is greater than the sum of its undiscounted cash flows, then the definite-lived other intangible asset's carrying value is compared to its estimated fair value and an impairment charge is recognized for the excess and charged to operations. The application of the recoverability test requires significant judgment, including the identification of the asset group and determination of undiscounted cash flows and fair value of the underlying definite-lived other intangible asset. Determination of undiscounted cash flows requires the use of significant estimates and assumptions, including certain financial projections. Fair value is primarily based on income approaches using discounted cash flow models, which have significant assumptions. Such assumptions are subject to variability from year to year and are directly impacted by global market conditions. There were immaterial impairment charges resulting from our definite-lived other intangible assets impairment analysis for the year ended December 31, 2020. Our ACS, EMS and curamik[®] reporting units had definite-lived other intangible assets of \$3.7 million, \$101.2 million and \$8.2 million, respectively, as of December 31, 2020.

The useful life determination for each indefinite-lived other intangible asset is evaluated each reporting period to determine whether events and circumstances support an indefinite useful life. The useful life determination for each definite-lived other intangible asset is evaluated each reporting period to determine whether events and circumstances warrant a revision to the remaining period of amortization.

Environmental and Product Liabilities

We accrue for our environmental investigation, remediation, operating and maintenance costs when it is probable that a liability has been incurred and the amount can be reasonably estimated. For environmental matters, the most likely cost to be incurred is accrued based on an evaluation of currently available facts with respect to each individual site, including existing technology, current laws and regulations and prior remediation experience. For sites with multiple potential responsible parties (PRPs), we consider our likely proportionate share of the anticipated remediation costs and the ability of the other parties to fulfill their obligations in establishing a provision for those costs. When no amount within a range of estimates is more likely to occur than another, we accrue to the low end of the range and disclose the range. When future liabilities are determined to be reimbursable by insurance coverage, an accrual is recorded for the potential liability and a receivable is recorded for the estimated insurance reimbursement amount. We are exposed to the uncertain nature inherent in such remediation and the possibility that initial estimates will not reflect the final outcome of a matter.

We review our asbestos-related projections annually in the fourth quarter of each year unless facts and circumstances materially change during the year, at which time we would analyze these projections. We believe the assumptions made on the potential exposure and expected insurance coverage are reasonable at the present time, but are subject to uncertainty based on the actual future outcome of our asbestos litigation. Our estimates of asbestos-related contingent liabilities and related insurance receivables are based on an independent actuarial analysis and an independent insurance usage analysis prepared annually by third parties. The actuarial analysis contains numerous assumptions, including number of claims that might be received, the type and severity of the disease alleged by each claimant, the long latency period associated with asbestos exposure, dismissal rates, average indemnity costs, average defense costs, costs of medical treatment, the financial resources of other companies that are co-defendants in claims, uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, and the impact of potential changes in legislative or judicial standards, including potential tort reform. Furthermore, any predictions with respect to these assumptions are subject to even greater uncertainty as the projection period lengthens. The insurance usage analysis considers, among other things, applicable deductibles, retentions and policy limits, the solvency and historical payment experience of various insurance carriers, the likelihood of recovery as estimated by external legal counsel and existing insurance settlements.

We believe the assumptions used in our models for determining our potential exposure and related insurance coverage are reasonable at the present time, but such assumptions are inherently uncertain. Given the inherent uncertainty in making projections, we plan to re-examine periodically the assumptions used in the projections of current and future asbestos claims, and we will update them if needed based on our experience, changes in the assumptions underlying our models, and other relevant factors, such as changes in the tort system. Our accrued asbestos liabilities may not approximate our actual asbestos-related indemnity and defense costs, and our accrued insurance recoveries may not be realized. We believe that it is reasonably possible that we may incur additional charges for our asbestos liabilities and defense costs in the future that could exceed existing reserves and insurance recoveries.

Fair Value of Financial Instruments

Management believes that the carrying values of financial instruments, including cash and cash equivalents, short-term investments, accounts receivable, accounts payable and accrued liabilities approximate fair value based on the maturities of these instruments. The fair value of our borrowings under credit facility are determined using discounted cash flows based upon our estimated current interest cost for similar type borrowings or current market value, which falls under Level 2 of the fair value hierarchy. Based on our credit characteristics as of December 31, 2020, borrowings would generally bear interest at London interbank offered rate (LIBOR) plus 162.5 basis points. As the current borrowings under the Fourth Amended Credit Agreement bear interest at adjusted 1-month LIBOR plus 162.5 basis points, we believe the carrying value of our borrowings approximates fair value. For additional information on the calculation of fair value measurements, refer to “Note 2 – Fair Value Measurements.”

Hedging Transactions and Derivative Financial Instruments

From time to time, we use derivative instruments to manage commodity, interest rate and foreign currency exposures. Derivative instruments are viewed as risk management tools and are not used for trading or speculative purposes. To qualify for hedge accounting treatment, derivatives used for hedging purposes must be designated and deemed effective as a hedge of the identified underlying risk exposure at the inception of the contract. Accordingly, changes in fair value of the derivative contract must be highly correlated with changes in the fair value of the underlying hedged item at inception of the hedge and over the life of the hedge contract.

Derivatives used to hedge forecasted cash flows associated with interest rates, foreign currency commitments, or forecasted commodity purchases are accounted for as cash flow hedges. For those derivative instruments that qualify for hedge accounting treatment, if the hedge is highly effective, all changes in the fair value of the derivative hedging instrument are recorded in other comprehensive income (loss). The derivative hedging instrument will be reclassified to earnings when the hedged item impacts earnings. For those derivative instruments that do not qualify for hedge accounting treatment, any related gains and losses are recognized in the consolidated statements of operations as a component of “Other income (expense), net.” For additional information, refer to “Note 3 – Hedging Transactions and Derivative Financial Instruments.”

Concentration of Credit and Investment Risk

We extend credit on an uncollateralized basis to almost all customers. Concentration of credit and geographic risk with respect to accounts receivable is limited due to the large number and general dispersion of accounts that constitute our customer base. We routinely perform credit evaluations on our customers. As of December 31, 2020 and 2019, there were no customers that individually accounted for more than 10% of total accounts receivable. We did not experience significant credit losses on customers’ accounts in 2020, 2019 or 2018.

We are subject to credit and market risk by using derivative instruments. If a counterparty fails to fulfill its performance obligations under a derivative contract, our credit risk will equal the fair value of the derivative instrument. We seek to minimize counterparty credit (or repayment) risk by entering into derivative transactions with major financial institutions with investment grade credit ratings.

We invest excess cash principally in investment grade government securities and time deposits. We have established guidelines relative to diversification and maturities in order to maintain safety and liquidity. These guidelines are periodically reviewed and modified to reflect changes in market conditions.

Income Taxes

We are subject to income taxes in the U.S. and in numerous foreign jurisdictions. We account for income taxes following Accounting Standards Codification (ASC) 740, *Income Taxes*, recognizing deferred tax assets and liabilities using enacted tax rates for the effect of temporary differences between book and tax basis of recorded assets and liabilities. Deferred tax assets are reduced by a valuation allowance if it is more likely than not that some or all of a deferred tax asset will not be realized.

We did not make any changes in 2020 to our position on the permanent reinvestment of our historical earnings from foreign operations. With the exception of certain of our Chinese subsidiaries, we continue to assert that historical foreign earnings are indefinitely reinvested. As of December 31, 2020 and 2019, we recorded a deferred tax liability of \$2.4 million and \$1.6 million, respectively, for Chinese withholding tax on undistributed earnings that are not indefinitely reinvested. The other remaining foreign subsidiaries have both the intent and ability to indefinitely reinvest their undistributed earnings and we estimate that, if these undistributed earnings are distributed, they may give rise to an estimated \$3.8 million of additional tax liabilities. If circumstances change and it becomes apparent that some, or all of the undistributed earnings as of December 31, 2020 will not be indefinitely reinvested, the provision for the tax consequences, if any, will be recorded in the period when circumstances change. Distributions out of current and future earnings are permissible to fund discretionary activities such as business acquisitions. However, when distributions are made, this could result in a higher effective tax rate.

We record benefits for uncertain tax positions based on an assessment of whether it is more likely than not that the tax positions will be sustained by the taxing authorities. If this threshold is not met, no tax benefit of the uncertain position is recognized. If the threshold is met, we recognize the largest amount of the tax benefit that is greater than fifty percent likely to be realized upon ultimate settlement.

We recognize interest and penalties within the “Income tax expense” line item in the consolidated statements of operations. Accrued interest and penalties are included within the related tax liability line item in the consolidated statements of financial position.

Revenue Recognition

Recognition of revenue occurs when a customer obtains control of promised goods or services in an amount that reflects the consideration to which the providing entity expects to be entitled in exchange for those goods or services. We recognize revenue when all of the following criteria are met: (1) we have entered into a binding agreement, (2) the performance obligations have been identified, (3) the transaction price to the customer has been determined, (4) the transaction price has been allocated to the performance obligations in the contract, and (5) the performance obligations have been satisfied. The majority of our shipping terms permit us to recognize revenue at point of shipment. Some shipping terms require the goods to be cleared through customs or be received by the customer before title passes. In those instances, revenue is not recognized until either the customer has received the goods or they have passed through customs, depending on the circumstances. Shipping and handling costs are treated as fulfillment costs. Sales tax or VAT are excluded from the measurement of the transaction price.

Pension and Other Postretirement Benefits

We sponsor one material defined benefit pension plan, the Rogers Corporation Employees’ Pension Plan (the Union Plan), which covers certain union employees, and we sponsor multiple fully insured or self-funded medical plans and fully insured life insurance plans for retirees. The Union Plan was frozen in 2013 so that future benefits no longer accrue. The costs and obligations associated with these plans are dependent upon various actuarial assumptions used in calculating such amounts. These assumptions include discount rates, long-term rates of return on plan assets, mortality rates, and other factors. The assumptions used in these models are determined as follows: (i) the discount rate used is based on the PruCurve bond index; (ii) the long-term rate of return on plan assets is determined based on historical portfolio results, market conditions and our expectations of future returns; and (iii) the mortality rate is based on a mortality projection that estimates current longevity rates and their impact on the long-term plan obligations. We determine these assumptions based on consultation with outside actuaries and investment advisors. Any changes in these assumptions could have a significant impact on our assets and liabilities. We review these assumptions periodically throughout the year and update as necessary.

We are required, as an employer, to: (a) recognize in our consolidated statements of financial position an asset for a plan’s overfunded status or a liability for a plan’s underfunded status; (b) measure a plan’s assets and a plan’s obligations that determine our funded status as of the end of the year; and (c) recognize changes in the funded status of a defined benefit postretirement plan in the year in which the changes occur and report these changes in accumulated other comprehensive loss. Additionally, actuarial losses (gains) that are not immediately recognized as net periodic pension cost (credit) are recognized as a component of accumulated other comprehensive loss (income) and amortized into net periodic pension cost (credit) in future periods.

Investments were stated at fair value as of the dates reported. Securities traded on a national securities exchange were valued at the last reported sales price on the last business day of the plan year. Fixed-income bonds were valued using price evaluations provided by independent pricing services. The fair value of the guaranteed deposit account was determined through discounting expected future investment cash flow from both investment income and repayment of principal for each investment purchased. The estimated fair values of the participation units owned by the plan in pooled separate accounts were based on quoted redemption values and adjusted for management fees and asset charges, as determined by the recordkeeper, on the last business day of the relevant plan year. Pooled separate accounts are accounts established solely for the purpose of investing the assets of one or more plans. Funds in a separate account are not commingled with other Company assets for investment purposes.

Restructuring Activities

We record charges associated with restructuring activities, such as employee termination benefits, which represent a one-time benefit, when management approves and commits to a plan of termination, or over the future service period, if any. Other costs associated with restructuring activities may include contract termination costs, including costs related to leased facilities to be abandoned or subleased, and facility and employee relocation costs.

Advertising Costs

Advertising costs are expensed as incurred and amounted to \$2.2 million, \$3.6 million and \$3.8 million for the years ended December 31, 2020, 2019 and 2018, respectively.

Earnings Per Share

Basic earnings per share is based on the weighted average number of common shares outstanding. Diluted earnings per share is based on the weighted average number of common shares outstanding and all dilutive potential common shares outstanding.

Equity Compensation

Equity compensation mainly consists of expense related to restricted stock units and deferred stock units.

Performance-based restricted stock unit compensation expense is based on achievement of both market and service conditions. The fair value of these awards is determined based on a Monte Carlo simulation valuation model on the grant date. We recognize compensation expense on all of these awards on a straight-line basis over the vesting period with no changes for final projected payout of the awards.

Time-based restricted stock unit compensation expense is based on the achievement of only service conditions. The fair value of these awards is determined based on the market value of the underlying stock price on the grant date. We recognize compensation expense on all of these awards on a straight-line basis over the vesting period.

Deferred stock units, which are granted to non-management directors, are fully vested on the date of grant and the related shares are generally issued on the 13-month anniversary of the grant date unless the director elects to defer the receipt of those shares. The fair value of these awards is determined based on the market value of the underlying stock price on the grant date. The compensation related to these grants is expensed immediately on the date of grant.

Note 2 – Fair Value Measurements

The accounting guidance for fair value measurements establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value.

- Level 1 – Quoted prices in active markets for identical assets or liabilities.
- Level 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

As a result of our pension termination and settlement efforts in late 2019 and the first half of 2020, we have a pension surplus investment balance, which is now accounted for as an available-for-sale investment as of June 2020. For additional information regarding this balance, refer to “Note 11 – Pension Benefits and Other Postretirement Benefits.” Available-for-sale investments measured at fair value on a recurring basis, categorized by the level of inputs used in the valuation, were as follows:

<i>(Dollars in thousands)</i>	Available-for-Sale Investment at Fair Value as of December 31, 2020			
	Level 1	Level 2	Level 3	Total
Pension surplus investment ⁽¹⁾	\$ 6,706	\$ 2,400	\$ —	\$ 9,106

⁽¹⁾ This balance was invested in funds comprised of short-term cash and fixed income securities, and was recorded in the “Other long-term assets” line item in the condensed consolidated statements of financial position. As of December 31, 2020, the fair value of this investment approximated its carrying value.

From time to time we enter into various instruments that require fair value measurement, including foreign currency contracts, copper derivative contracts and interest rate swaps. Derivative instruments measured at fair value on a recurring basis, categorized by the level of inputs used in the valuation, include:

<i>(Dollars in thousands)</i>	Derivative Instruments at Fair Value as of December 31, 2020			
	Level 1	Level 2	Level 3	Total ⁽¹⁾
Foreign currency contracts	\$ —	\$ (130)	\$ —	\$ (130)
Copper derivative contracts	\$ —	\$ 4,785	\$ —	\$ 4,785
Interest rate swap contract	\$ —	\$ —	\$ —	\$ —

<i>(Dollars in thousands)</i>	Derivative Instruments at Fair Value as of December 31, 2019			
	Level 1	Level 2	Level 3	Total ⁽¹⁾
Foreign currency contracts	\$ —	\$ (6)	\$ —	\$ (6)
Copper derivative contracts	\$ —	\$ 1,147	\$ —	\$ 1,147
Interest rate swap contract	\$ —	\$ (1,254)	\$ —	\$ (1,254)

⁽¹⁾ All balances were recorded in the “Other current assets” or “Other accrued liabilities” line items in the consolidated statements of financial position, except the 2019 interest rate swap balance, which was recorded in the “Other long-term liabilities” line item.

For additional information on our derivative contracts, refer to “Note 3 – Hedging Transactions and Derivative Financial Instruments.”

Note 3 – Hedging Transactions and Derivative Financial Instruments

We are exposed to certain risks related to our ongoing business operations. The primary risks being managed through our use of derivative instruments are foreign currency exchange rate risk, commodity pricing risk (primarily related to copper) and interest rate risk. We do not use derivative financial instruments for trading or speculative purposes. The valuation of derivative contracts used to manage each of these risks is described below:

- *Foreign Currency* – The fair value of any foreign currency option derivative is based upon valuation models applied to current market information such as strike price, spot rate, maturity date and volatility, and by reference to market values resulting from an over-the-counter market or obtaining market data for similar instruments with similar characteristics.
- *Commodity* – The fair value of copper derivatives is computed using a combination of intrinsic and time value valuation models, which are collectively a function of five primary variables: price of the underlying instrument, time to expiration, strike price, interest rate and volatility. The intrinsic valuation model reflects the difference between the strike price of the underlying copper derivative instrument and the current prevailing copper prices in an over-the-counter market at period end. The time value valuation model incorporates changes in the price of the underlying copper derivative instrument, the time value of money, the underlying copper derivative instrument’s strike price and the remaining time to the underlying copper derivative instrument’s expiration date from the period end date.
- *Interest Rates* – The fair value of interest rate swap instruments is derived by comparing the present value of the interest rate forward curve against the present value of the swap rate, relative to the notional amount of the swap. The net value represents the estimated amount we would receive or pay to terminate the agreements. Settlement amounts for an “in the money” swap would be adjusted down to compensate the counterparty for cost of funds, and the adjustment is directly related to the counterparties’ credit ratings.

The guidance for the accounting and disclosure of derivatives and hedging transactions requires companies to recognize all of their derivative instruments as either assets or liabilities at fair value in the statements of financial position. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated and qualifies for hedge accounting treatment as defined under the applicable accounting guidance. For derivative instruments that are designated and qualify for hedge accounting treatment as cash flow hedges (i.e., hedging the exposure to variability in expected future cash flows that is attributable to a particular risk), the effective portion of the gain or loss on the derivative instrument is reported as a component of other comprehensive income (loss). This gain or loss is reclassified into earnings in the same line item of the consolidated statements of operations associated with the forecasted transaction and in the same period or periods during which the hedged transaction affects earnings. As of December 31, 2019, only our interest rate swap qualified for hedge accounting treatment as a cash flow hedge, and the hedge was highly effective.

Foreign Currency

In 2020, we entered into U.S. dollar, euro, Korean won and Japanese yen forward contracts. We entered into these foreign currency forward contracts to mitigate certain global transactional exposures. These contracts do not qualify for hedge accounting treatment. As a result, any fair value adjustments required on these contracts are recorded in “Other income (expense), net” in our consolidated statements of operations in the period in which the adjustment occurred.

As of December 31, 2020 the notional values of these foreign currency forward contracts were as follows:

Notional Values of Foreign Currency Derivatives

USD/CNH	\$	28,766,855
EUR/USD	€	8,151,124
KRW/USD	₩	10,893,500,000

Commodity

As of December 31, 2020, we had 18 outstanding contracts to hedge exposure related to the purchase of copper in our PES and ACS operating segments. These contracts are held with financial institutions and are intended to offset rising copper prices and do not qualify for hedge accounting treatment. As a result, any fair value adjustments required on these contracts are recorded in “Other income (expense), net” in our consolidated statements of operations in the period in which the adjustment occurred.

As of December 31, 2020, the volume of our copper contracts outstanding were as follows:

Volume of Copper Derivatives

January 2021 - March 2021	256 metric tons per month
April 2021 - June 2021	256 metric tons per month
July 2021 - September 2021	222 metric tons per month
October 2021 - December 2021	222 metric tons per month

Interest Rates

In March 2017, we entered into an interest rate swap to hedge the variable interest rate on \$75.0 million of our \$450.0 million revolving credit facility. We terminated the interest rate swap on September 30, 2020. As a result, we settled the interest rate swap for \$2.4 million on October 2, 2020, representing the fair value of the interest rate swap on the date of termination. Both Rogers and the counterparties released each other from all obligation under the interest rate swap agreement, including the obligation to exchange, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to the agreed upon notional principal amount of \$75.0 million. As a result of the termination of the interest rate swap, there is an offsetting decrease in the forecasted interest expense, net over the remaining term of the now-terminated interest rate swap, which was set to expire in February 2022. For additional information regarding our revolving credit facility, refer to “Note 9 – Debt.”

Effects on Financial Statements

The following table presents the impact from these instruments on the statement of operations and statements of comprehensive income:

(Dollars in thousands)	Financial Statement Line Item	Years Ended December 31,		
		2020	2019	2018
Foreign Currency Contracts				
Contracts not designated as hedging instruments	Other income (expense), net	\$ (1,981)	\$ (779)	\$ (333)
Copper Derivatives Contracts				
Contracts not designated as hedging instruments	Other income (expense), net	\$ 3,610	\$ (716)	\$ (2,101)
Interest Rate Swap Contract				
Contract designated as hedging instrument	Other comprehensive income (loss)	\$ 1,254	\$ (1,715)	\$ 420

Note 4 – Accumulated Other Comprehensive Loss

The changes in accumulated other comprehensive loss by component for each of the fiscal years in the two-year period ended December 31, 2020 were as follows:

<i>(Dollars and accompanying footnotes in thousands)</i>	Foreign Currency Translation Adjustments	Pension and Other Postretirement Benefits ⁽¹⁾	Derivative Instrument Designated as Cash Flow Hedge ⁽²⁾	Total
Balance as of December 31, 2018	\$ (30,488)	\$ (48,700)	\$ 354	\$ (78,834)
Other comprehensive income (loss) before reclassifications	(4,990)	(6,079)	(1,171)	(12,240)
Amounts reclassified to earnings	—	44,324	(155)	44,169
Net other comprehensive income (loss) for period	(4,990)	38,245	(1,326)	31,929
Balance as of December 31, 2019	(35,478)	(10,455)	(972)	(46,905)
Other comprehensive income (loss) before reclassifications	24,907	1,255	(1,504)	24,658
Amounts reclassified to earnings	—	196	2,476	2,672
Net other comprehensive income (loss) for period	24,907	1,451	972	27,330
Balance as of December 31, 2020	\$ (10,571)	\$ (9,004)	\$ —	\$ (19,575)

⁽¹⁾ Net of taxes of \$1,951, \$2,368 and \$9,984 for the years ended December 31, 2020, 2019 and 2018, respectively.

⁽²⁾ Net of taxes of \$0, \$282 and (\$106) for the years ended December 31, 2020, 2019 and 2018, respectively.

The impacts to the consolidated statements of operations related to items reclassified to earnings were as follows:

<i>(Dollars in thousands)</i>	Financial Statement Line Item	Years Ended December 31,	
		2020	2019
Amortization/settlement of pension and other postretirement benefits			
	Pension settlement charges	\$ 63	\$ (53,213)
	Other income (expense), net ⁽¹⁾	(315)	(504)
	Income tax (expense) benefit	56	9,393
	Net income	<u>\$ (196)</u>	<u>\$ (44,324)</u>
Unrealized gains (losses) on derivative instrument⁽²⁾			
	Other income (expense), net	\$ (3,191)	\$ 200
	Income tax (expense) benefit	715	(45)
	Net income	<u>\$ (2,476)</u>	<u>\$ 155</u>

⁽¹⁾ These accumulated other comprehensive loss components are included in the computation of net periodic pension cost. For additional details, refer to “Note 11 – Pension Benefits, Other Postretirement Benefits and Employee Savings and Investment Plan.”

⁽²⁾ This relates to the derivative instrument designated as a cash flow hedge and held as of the end of the year for each year presented.

Note 5 – Property, Plant and Equipment

Our “Property, plant and equipment, net” line item in the consolidated statements of financial position consisted of the following:

<i>(Dollars in thousands)</i>	As of December 31,	
	2020	2019
Land and improvements	\$ 22,589	\$ 21,697
Buildings and improvements	155,669	165,968
Machinery and equipment	324,773	281,771
Office equipment	59,001	68,349
Property plant and equipment, gross	562,032	537,785
Accumulated depreciation	(365,844)	(341,119)
Property, plant and equipment, net	196,188	196,666
Equipment in process	76,190	63,580
Total property, plant and equipment, net	\$ 272,378	\$ 260,246

Depreciation expense was \$29.3 million in 2020, \$31.4 million in 2019 and \$33.5 million in 2018.

Note 6 – Goodwill and Other Intangible Assets

Goodwill

The changes in the carrying amount of goodwill for the period ending December 31, 2020, by operating segment, were as follows:

<i>(Dollars in thousands)</i>	Advanced Connectivity Solutions	Elastomeric Material Solutions	Power Electronics Solutions	Other	Total
December 31, 2019	\$ 51,694	\$ 142,030	\$ 66,982	\$ 2,224	\$ 262,930
Foreign currency translation adjustment	—	991	6,251	—	7,242
December 31, 2020	\$ 51,694	\$ 143,021	\$ 73,233	\$ 2,224	\$ 270,172

Other Intangible Assets

The changes in the carrying amount of other intangible assets for the two-year period ending December 31, 2020, were as follows:

<i>(Dollars in thousands)</i>	December 31, 2020			December 31, 2019		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Customer relationships	\$ 150,863	\$ 72,014	\$ 78,849	\$ 149,317	\$ 39,018	\$ 110,299
Technology	83,469	53,540	29,929	80,938	45,190	35,748
Trademarks and trade names	12,039	8,149	3,890	11,994	4,361	7,633
Covenants not to compete	1,340	827	513	1,340	505	835
Total definite-lived other intangible assets	247,711	134,530	113,181	243,589	89,074	154,515
Indefinite-lived other intangible asset	4,845	—	4,845	4,432	—	4,432
Total other intangible assets	\$ 252,556	\$ 134,530	\$ 118,026	\$ 248,021	\$ 89,074	\$ 158,947

In the table above, gross carrying amounts and accumulated amortization may differ from prior periods due to foreign exchange rate fluctuations.

Amortization expense was \$42.1 million, \$17.8 million and \$16.5 million in 2020, 2019 and 2018, respectively. The estimated annual future amortization expense is \$12.4 million, \$11.9 million, \$11.3 million, \$10.0 million and \$8.5 million in 2021, 2022, 2023, 2024 and 2025, respectively. These amounts could vary based on changes in foreign currency exchange rates.

The increase in amortization expense in 2020, and decrease in forecasted amortization expense in future years, were due to the acceleration of amortization expense related to our Diversified Silicone Products, Inc. (DSP) customer relationships and trademarks and trade names definite-lived other intangible assets, which were both accelerated to be fully amortized by

December 31, 2020. As part of our ongoing assessment of the useful lives of our definite-lived other intangible assets, we reviewed the deterioration of our DSP business and identified significant customer attrition, a sustained substantial decrease in net sales, as well as the planned phase-out of the DSP trademark and trade name by December 2020. Based on these events and circumstances, we concluded an adjustment to the remaining useful lives of our DSP customer relationships and trademarks and trade names definite-lived other intangible assets was warranted.

The weighted average amortization period as of December 31, 2020, by definite-lived other intangible asset class, is presented in the table below:

Definite-Lived Other Intangible Asset Class	Weighted Average Remaining Amortization Period
Customer relationships	6.10
Technology	3.90
Trademarks and trade names	4.85
Covenants not to compete	1.27
Total definite-lived other intangible assets	5.45

Note 7 – Earnings Per Share

Basic earnings per share is based on the weighted average number of common shares outstanding. Diluted earnings per share is based on the weighted average number of common shares outstanding and all dilutive potential common shares outstanding.

The following table sets forth the computation of basic and diluted earnings per share:

<i>(Dollars and shares in thousands, except per share amounts)</i>	Years Ended December 31,		
	2020	2019	2018
Numerator:			
Net income	\$ 49,990	\$ 47,319	\$ 87,651
Denominator:			
Weighted average shares outstanding - basic	18,681	18,573	18,374
Effect of dilutive shares	25	140	285
Weighted average shares outstanding - diluted	18,706	18,713	18,659
Basic earnings per share	\$ 2.68	\$ 2.55	\$ 4.77
Diluted earnings per share	\$ 2.67	\$ 2.53	\$ 4.70

Dilutive shares are calculated using the treasury stock method and primarily include unvested restricted stock units. Anti-dilutive shares are excluded from the calculation of diluted shares and diluted earnings per share. For 2020, 2019, and 2018, 8,454, 20,520 and 36,642 shares were excluded, respectively.

Note 8 – Capital Stock and Equity Compensation

Capital Stock

Our 2019 Long-Term Equity Compensation Plan, which was approved by our shareholders in May 2019, permits the granting of restricted stock units and certain other forms of equity awards to officers and other key employees. Under this plan, we also grant each non-management director deferred stock units, which permit non-management directors to receive, at a later date, one share of Rogers capital stock for each deferred stock unit, with no payment of any consideration by the director at the time the shares were received.

Shares of capital stock reserved for possible future issuance were as follows:

	As of December 31,	
	2020	2019
Shares reserved for issuance under outstanding restricted stock unit awards	324,260	315,571
Deferred compensation to be paid in stock, including deferred stock units	12,715	7,681
Additional shares reserved for issuance under Rogers Corporation 2019 Long-Term Equity Compensation Plan	918,809	1,063,920
Shares reserved for issuance under the Rogers Corporation Global Stock Ownership Plan for Employees	78,678	91,670
Total	1,334,462	1,478,842

Equity Compensation

Performance-Based Restricted Stock Units

As of December 31, 2020, we had performance-based restricted stock units from 2020, 2019 and 2018 outstanding. These awards generally cliff vest at the end of a three-year measurement period. However, employees whose employment terminates during the measurement period due to death, disability, or, in certain cases, retirement may receive a pro-rata payout based on the number of days they were employed during the measurement period. Participants are eligible to be awarded shares ranging from 0% to 200% of the original award amount, based on certain defined performance measures.

The outstanding awards have one measurement criteria: the three-year total shareholder return (TSR) on our capital stock as compared to that of a specified group of peer companies. The TSR measurement criteria of the awards is considered a market condition. As such, the fair value of this measurement criteria is determined on the grant date using a Monte Carlo simulation valuation model. We recognize compensation expense on all of these awards on a straight-line basis over the vesting period with no changes for final projected payout of the awards. We account for forfeitures as they occur.

Below were the assumptions used in the Monte Carlo calculation for each material award granted in 2020, 2019 and 2018:

	February 12, 2020	June 3, 2019	February 7, 2019	September 17, 2018	February 8, 2018
Expected volatility	41.0%	39.7%	36.7%	36.6%	34.8%
Expected term (in years)	2.9	2.6	2.9	3.0	3.0
Risk-free interest rate	1.41%	1.78%	2.43%	2.85%	2.28%

Expected volatility – In determining expected volatility, we have considered a number of factors, including historical volatility.

Expected term – We use the vesting period of the award to determine the expected term assumption for the Monte Carlo simulation valuation model.

Risk-free interest rate – We use an implied “spot rate” yield on U.S. Treasury Constant Maturity rates as of the grant date for our assumption of the risk-free interest rate.

Expected dividend yield – We do not currently pay dividends on our capital stock; therefore, a dividend yield of 0% was used in the Monte Carlo simulation valuation model.

A summary of activity of the outstanding performance-based restricted stock units for 2020, 2019 and 2018 is presented below:

	2020		2019		2018	
	Awards Outstanding	Weighted-Average Grant Date Fair Value	Awards Outstanding	Weighted-Average Grant Date Fair Value	Awards Outstanding	Weighted-Average Grant Date Fair Value
Awards outstanding as of January 1	106,943	\$ 161.33	142,434	\$ 110.19	169,202	\$ 97.16
Awards granted	87,244	131.99	112,160	114.22	75,760	163.55
Stock issued	(75,486)	111.54	(135,032)	69.10	(81,230)	131.72
Awards forfeited	(7,642)	179.89	(12,619)	152.22	(21,298)	114.40
Awards outstanding as of December 31	<u>111,059</u>	<u>\$ 170.84</u>	<u>106,943</u>	<u>\$ 161.33</u>	<u>142,434</u>	<u>\$ 110.19</u>

We recognized \$5.8 million, \$5.0 million and \$4.4 million of compensation expense related to performance-based restricted stock units for the years ended December 31, 2020, 2019 and 2018, respectively. As of December 31, 2020, there was \$7.6 million of total unrecognized compensation cost related to unvested performance-based restricted stock units. That cost is expected to be recognized over a weighted average period of 0.8 years.

Time-Based Restricted Stock Units

As of December 31, 2020, we had time-based restricted stock unit awards from 2020, 2019 and 2018 outstanding. The outstanding awards all ratably vest on the first, second and third anniversaries of the original grant date. However, employees whose employment terminates during the measurement period due to death, disability, or, in certain cases, retirement may receive a pro-rata payout based on the number of days they were employed subsequent to the last grant anniversary date. Each time-based restricted stock unit represents a right to receive one share of the Rogers’ capital stock at the end of the vesting period. The fair value of the award is determined by the market value of the underlying stock price at the grant date. We recognize compensation expense on all of these awards on a straight-line basis over the vesting period. We account for forfeitures as they occur.

A summary of activity of the outstanding time-based restricted stock units for 2020, 2019 and 2018 is presented below:

	2020		2019		2018	
	Awards Outstanding	Weighted-Average Grant Date Fair Value	Awards Outstanding	Weighted-Average Grant Date Fair Value	Awards Outstanding	Weighted-Average Grant Date Fair Value
Awards outstanding as of January 1	101,685	\$ 122.68	117,476	\$ 116.10	173,331	\$ 69.10
Awards granted	58,807	116.87	62,115	126.92	46,810	143.93
Stock issued	(50,868)	111.16	(68,111)	81.53	(82,921)	84.92
Awards forfeited	(7,482)	122.87	(9,795)	116.52	(19,744)	112.06
Awards outstanding as of December 31	<u>102,142</u>	<u>\$ 120.16</u>	<u>101,685</u>	<u>\$ 122.68</u>	<u>117,476</u>	<u>\$ 116.10</u>

We recognized \$6.0 million, \$5.8 million and \$5.6 million of compensation expense related to time-based restricted stock units for the years ended December 31, 2020, 2019 and 2018, respectively. As of December 31, 2020, there was \$7.5 million of total unrecognized compensation cost related to unvested time-based restricted stock units. That cost is expected to be recognized over a weighted average period of 0.9 years.

Deferred Stock Units

We grant deferred stock units to non-management directors. These awards are fully vested on the date of grant and the related shares are generally issued on the 13-month anniversary of the grant date unless the individual elects to defer the receipt of those shares. Each deferred stock unit results in the issuance of one share of Rogers' capital stock. The grant of deferred stock units is typically done annually during the second quarter of each year. The fair value of the award is determined by the market value of the underlying stock price at the grant date.

A summary of activity of the outstanding deferred stock units for 2020, 2019 and 2018 is presented below:

	2020		2019		2018	
	Awards Outstanding	Weighted-Average Grant Date Fair Value	Awards Outstanding	Weighted-Average Grant Date Fair Value	Awards Outstanding	Weighted-Average Grant Date Fair Value
Awards outstanding as of January 1	7,150	\$ 170.89	8,400	\$ 108.86	9,250	\$ 109.48
Awards granted	10,400	108.88	5,950	183.40	8,400	108.86
Stock issued	(5,100)	183.40	(7,200)	108.86	(9,250)	109.48
Awards outstanding as of December 31	<u>12,450</u>	<u>\$ 113.96</u>	<u>7,150</u>	<u>\$ 170.89</u>	<u>8,400</u>	<u>\$ 108.86</u>

We recognized compensation expense related to deferred stock units of \$1.1 million, \$1.1 million and \$0.9 million, for the years ended December 31, 2020, 2019 and 2018, respectively.

Note 9 – Debt

In February 2017, we entered into a secured five-year credit agreement with JPMorgan Chase Bank, N.A., as administrative agent, and the lenders party thereto (the Third Amended Credit Agreement), which increased the principal amount of our revolving credit facility to up to \$450.0 million borrowing capacity, with sublimits for multicurrency borrowings, letters of credit and swing-line notes, and provided an additional \$175.0 million accordion feature. Borrowings may be used to finance working capital needs, for letters of credit and for general corporate purposes in the ordinary course of business, including the financing of permitted acquisitions (as defined in the Third Amended Credit Agreement).

All obligations under the Third Amended Credit Agreement were guaranteed by each of our existing and future material domestic subsidiaries, as defined in the Third Amended Credit Agreement (the Guarantors). The obligations were also secured by a Third Amended and Restated Pledge and Security Agreement, dated as of February 17, 2017, entered into by us and the Guarantors which grants to the administrative agent, for the benefit of the lenders, a security interest, subject to certain exceptions, in substantially all of the non-real estate assets of the Guarantors. These assets included, but were not limited to, receivables, equipment, intellectual property, inventory, and stock in certain subsidiaries. All revolving loans were due on the maturity date, February 17, 2022.

Borrowings under the Third Amended Credit Agreement could have been made as alternate base rate loans or euro-currency loans. Alternate base rate loans bore interest that included a base reference rate plus a spread of 37.5 to 75.0 basis points, depending on our leverage ratio. The base reference rate was the greatest of (a) the Prime Rate in effect on such day, (b) the Federal Reserve Bank of New York (NYFRB) Rate in effect on such day plus ½ of 1.0% and (c) the adjusted LIBOR for a one month interest period in dollars on such day (or if such day was not a business day, the immediately preceding business day)

plus 1.0%. Euro-currency loans bore interest based on adjusted LIBOR plus a spread of 137.5 to 175.0 basis points, depending on our leverage ratio.

In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Third Amended Credit Agreement, we were required to pay a quarterly fee of 20 to 30 basis points (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Third Amended Credit Agreement.

The Third Amended Credit Agreement contained customary representations, warranties, covenants, mandatory prepayments and events of default under which our payment obligations could have been accelerated. If an event of default occurred, the lenders could have, among other things, terminated their commitments and declared all outstanding borrowings to be immediately due and payable together with accrued interest and fees. The financial covenants included requirements to maintain (1) a leverage ratio of no more than 3.25 to 1.00, subject to an election to increase the maximum leverage ratio to 3.50 to 1.00 for three fiscal quarters in connection with a permitted acquisition, and (2) an interest coverage ratio of no less than 3.00 to 1.00.

The Third Amended Credit Agreement generally permitted us to pay cash dividends to our shareholders, provided that (i) no default or event of default had occurred and was continuing or would result from the dividend payment and (ii) our leverage ratio did not exceed 2.75 to 1.00. If our leverage ratio exceeded 2.75 to 1.00, we could nonetheless make up to \$20.0 million in restricted payments, including cash dividends, during the fiscal year, provided that no default or event of default had occurred and was continuing or would result from the payments.

On October 16, 2020, we entered into the Fourth Amended and Restated Credit Agreement with JPMorgan Chase Bank, N.A., as administrative agent, and the lenders party thereto (the Fourth Amended Credit Agreement). The Fourth Amended Credit Agreement amends and restates the Third Amended Credit Agreement, and provides for a revolving credit facility with up to a \$450.0 million borrowing capacity, with sublimits for multicurrency borrowings, letters of credit and swing-line notes, in addition to a \$175.0 million accordion feature. Borrowings may be used to finance working capital needs, for letters of credit and for general corporate purposes in the ordinary course of business, including the financing of permitted acquisitions (as defined in the Fourth Amended Credit Agreement). The Fourth Amended Credit Agreement extends the maturity, the date on which all amounts borrowed or outstanding under the Fourth Amended Credit Agreement are due, from February 17, 2022 to March 31, 2024.

All obligations under the Fourth Amended Credit Agreement are guaranteed by each of our existing and future material domestic subsidiaries, as defined in the Fourth Amended Credit Agreement (the Guarantors). The obligations are also secured by a Fourth Amended and Restated Pledge and Security Agreement, dated as of October 16, 2020, entered into by us and the Guarantors which grants to the administrative agent, for the benefit of the lenders, a security interest, subject to certain exceptions, in substantially all of our and the Guarantors' non-real estate assets. These assets include, but are not limited to, receivables, equipment, intellectual property, inventory, and stock in certain subsidiaries.

Borrowings under the Fourth Amended Credit Agreement can be made as alternate base rate loans or euro-currency loans. Alternate base rate loans bear interest at a base reference rate plus a spread of 62.5 to 100.0 basis points, depending on our leverage ratio. The base reference rate is the greatest of (a) the prime rate in effect on such day, (b) the NYFRB rate in effect on such day plus ½ of 1%, and (c) the adjusted LIBOR for a one month interest period in dollars on such day (or if such day is not a business day, the immediately preceding business day) plus 1%. Euro-currency loans bear interest based on adjusted LIBOR plus a spread of 162.5 to 200.0 basis points, depending on our leverage ratio. Based on our leverage ratio as of December 31, 2020, the spread was 162.5 basis points.

In addition to interest payable on the principal amount of indebtedness outstanding from time to time under the Fourth Amended Credit Agreement, we are required to pay a quarterly fee of 25 to 35 basis points (based upon our leverage ratio) of the unused amount of the lenders' commitments under the Fourth Amended Credit Agreement.

The Fourth Amended Credit Agreement contains customary representations and warranties, covenants, mandatory prepayments and events of default under which our payment obligations may be accelerated. If an event of default occurs, the lenders may, among other things, terminate their commitments and declare all outstanding borrowings to be immediately due and payable together with accrued interest and fees. The financial covenants include requirements to maintain (1) a total net leverage ratio of no more than 3.25 to 1.00, subject to a one-time election to increase the maximum total net leverage ratio to 3.50 to 1.00 for one fiscal year in connection with a permitted acquisition, and (2) an interest coverage ratio of no less than 3.00 to 1.00. We are permitted to net up to \$50.0 million of unrestricted domestic cash and cash equivalents against indebtedness in the calculation of the total net leverage ratio.

The Fourth Amended Credit Agreement generally permits us to pay cash dividends to our shareholders, provided that (i) no default or event of default has occurred and is continuing or would result from the dividend payment and (ii) our total net leverage ratio does not exceed 2.75 to 1.00. If our total net leverage ratio exceeds 2.75 to 1.00, we may nonetheless make up to \$20.0 million in restricted payments, including cash dividends, during the fiscal year, provided that no default or event of

default has occurred and is continuing or would result from the payments. Our total net leverage ratio did not exceed 2.75 to 1.00 as of December 31, 2020.

In March 2017, we entered into an interest rate swap to hedge the variable interest rate on \$75.0 million of our \$450.0 million revolving credit facility. This transaction was designated as a cash flow hedge and qualified for hedge accounting treatment. We terminated the interest rate swap on September 30, 2020. As a result, we settled the interest rate swap for \$2.4 million on October 2, 2020, representing the fair value of the interest rate swap on the date of termination. Both Rogers and the counterparties released each other from all obligation under the interest rate swap agreement, including the obligation to exchange, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to the agreed upon notional principal amount of \$75.0 million.

We borrowed \$150.0 million under our revolving credit facility as a precautionary measure in order to increase our cash position and preserve financial flexibility given current uncertainty in the global markets resulting from the COVID-19 pandemic, during the three months ended March 31, 2020. We did not borrow anything further under our revolving credit facility for the year ended December 31, 2020. We were not required to make any quarterly principal payments under the Third Amended Credit Agreement, nor are we required to make any quarterly principal payments under the Fourth Amended Credit Agreement, however, we made discretionary principal payments totaling \$248.0 million, \$105.5 million and \$5.0 million on our revolving credit facility in 2020, 2019 and 2018, respectively. We had \$25.0 million in outstanding borrowings under our revolving credit facility as of December 31, 2020.

We incurred interest expense on our outstanding debt, net of the impacts of our interest rate swap, of \$6.5 million, \$7.2 million, and \$6.1 million for the years ended December 31, 2020, 2019 and 2018, respectively. We incurred an unused commitment fee of \$0.7 million for the year ended December 31, 2020, and \$0.6 million for the years ended December 31, 2019 and 2018, respectively.

We had \$2.3 million and \$1.2 million of outstanding line of credit issuance costs as of December 31, 2020 and 2019, respectively, which will be amortized over the life of the Fourth Amended Credit Agreement. We recorded amortization expense of \$0.6 million, \$0.6 million and \$0.6 million for the years ended December 31, 2020, 2019 and 2018, respectively, related to these deferred costs.

Note 10 – Leases

Finance Leases

We have a finance lease obligation related to our manufacturing facility in Eschenbach, Germany. Under the terms of the lease agreement, we have an option to purchase the property upon the expiration of the lease in 2021 at a price which is the greater of (i) the then-current market value or (ii) the residual book value of the land including the buildings and installations thereon. Our finance lease obligation related to this facility was \$4.5 million as of both December 31, 2020 and 2019. The finance lease right-of-use asset balance for this facility was \$6.5 million and \$6.3 million as of December 31, 2020 and 2019, respectively. Accumulated amortization related to our finance lease right-of-use assets was \$4.5 million and \$3.8 million as of December 31, 2020 and 2019, respectively. All other finance lease obligations, finance lease right-of-use assets and accumulated amortization were cumulatively immaterial as of December 31, 2020 and 2019.

Amortization expense related to our finance lease right-of-use assets, which is primarily included in the “Cost of sales” line item of the consolidated statements of operations, was immaterial for each of the years ended December 31, 2020 and 2019. Interest expense related to our finance lease obligations, which is included in the “Interest expense, net” line item of the consolidated statements of operations, was immaterial for each of the years ended December 31, 2020 and 2019. Payments made on the principal portion of our finance lease obligations were immaterial for each of the years ended December 31, 2020 and 2019.

Operating Leases

We have operating leases primarily related to building space and vehicles. Renewal options are included in the lease term to the extent we are reasonably certain to exercise the option. The exercise of lease renewal options is at our sole discretion. We account for lease components separately from non-lease components. The incremental borrowing rate represents our ability to borrow on a collateralized basis over a similar lease term.

Our expenses and payments for operating leases were as follows:

<i>(Dollars in thousands)</i>	Year Ended December 31,		
	2020	2019	2018
Operating leases expense	\$ 3,257	\$ 3,119	\$ 3,850
Short-term leases expense	\$ 464	\$ 192	\$ 112
Payments on operating lease obligations	\$ 2,893	\$ 2,967	\$ 3,850

Our assets and liabilities balances related to finance and operating leases reflected in the consolidated statements of financial position, were as follows:

<i>(Dollars in thousands)</i>	Financial Statement Line Item	As of December 31,	
		2020	2019
Finance lease right-of-use assets	Property, plant and equipment, net	\$ 7,017	\$ 6,280
Operating lease right-of-use assets	Other long-term assets	\$ 4,216	\$ 4,656
Finance lease obligations, current portion	Other accrued liabilities	\$ 4,755	\$ 400
Finance lease obligations, non-current portion	Other long-term liabilities	\$ 322	\$ 4,140
Total finance lease obligations		\$ 5,077	\$ 4,540
Operating lease obligations, current portion	Other accrued liabilities	\$ 2,275	\$ 2,343
Operating lease obligations, non-current portion	Other long-term liabilities	\$ 2,219	\$ 2,334
Total operating lease obligations		\$ 4,494	\$ 4,677

Net Future Minimum Lease Payments

The following table includes future minimum lease payments under finance and operating leases together with the present value of the net future minimum lease payments as of December 31, 2020:

<i>(Dollars in thousands)</i>	Finance		Operating	
	Leases in Effect	Leases Signed	Less: Leases Not Yet Commenced	Leases in Effect
2021	4,787	2,435	(93)	2,342
2022	194	1,513	(101)	1,412
2023	187	788	(65)	723
2024	—	299	(40)	259
Thereafter	—	42	(37)	5
Total lease payments	5,168	5,077	(336)	4,741
Less: Interest	(91)	(259)	12	(247)
Present Value of Net Future Minimum Lease Payments	\$ 5,077	\$ 4,818	\$ (324)	\$ 4,494

The following table includes information regarding the lease term and discount rates utilized in the calculation of the present value of net future minimum lease payments:

	Finance Leases	Operating Leases
Weighted Average Remaining Lease Term	0.8 years	2.5 years
Weighted Average Discount Rate	3.07%	4.57%

Practical Expedients

We have elected to recognize lease payments in the consolidated statements of operations on a straight-line basis over the term of the lease for short-term leases. We also elected the package of practical expedients that allows us to carry forward the historical lease classification and accounting for indirect costs for any existing leases.

Note 11 – Pension Benefits, Other Postretirement Benefits and Employee Savings and Investment Plan

Pension and Other Postretirement Benefits

Pension and Other Postretirement Benefit Plans

As of December 31, 2019, we had two qualified noncontributory defined benefit pension plans. In June 2020, we completed the remaining settlement efforts for the Rogers Corporation Defined Benefit Pension Plan (following its merger with the Hourly Employees Pension Plan of Arlon LLC, Microwave Material and Silicone Technologies Divisions, Bear, Delaware (collectively, the Merged Plan)), which had been terminated and substantially settled in late 2019. As of December 31, 2020, only the Union Plan, which was frozen and ceased accruing benefits, remained. There are no plans to terminate the Union Plan.

Additionally, we sponsor other postretirement benefit plans including multiple fully insured or self-funded medical plans and life insurance plans for certain retirees. The measurement date for all plans is December 31st for each respective plan year.

Pension Plan Termination & Settlement

During the second quarter of 2019, following receipt of a determination letter from the Internal Revenue Service (IRS), the Company amended the Merged Plan to (a) terminate the Merged Plan (subject to discretionary approval by the Company's Chief Executive Officer) and (b) add a lump sum distribution option in connection with the termination of the Merged Plan, if approved. The Company subsequently provided participants of the Merged Plan an option to elect either a lump sum distribution or an annuity.

On October 17, 2019, the Chief Executive Officer approved the termination of the Merged Plan. A group annuity contract was purchased with an insurance company for all participants who did not elect a lump sum distribution, for \$123.3 million, with an initial cash settlement date of October 24, 2019, and a true-up cash settlement date of June 1, 2020. The insurance company became responsible for administering and paying pension benefit payments effective January 1, 2020.

The lump sum distributions of \$38.9 million, were all paid out prior to December 31, 2019. The Merged Plan paid an additional \$1.3 million of monthly pension benefit payments subsequent to the annuity purchase date during the transition period ending December 31, 2019.

In addition, we recorded a total non-cash pre-tax settlement charge in connection with the termination of the Merged Plan of \$53.2 million during the fourth quarter of 2019, as well as an immaterial non-cash pre-tax settlement benefit during the second quarter of 2020. This net settlement charge amount recognized included the immediate recognition into expense of the related unrecognized losses within "Accumulated other comprehensive loss" on the consolidated statements of financial position as of the plan termination date. The pension settlement charge during the fourth quarter of 2019 and the pension settlement benefit during the second quarter of 2020 were recognized in the "Pension settlement charges" line item in the consolidated statements of operations.

As of December 31, 2020, the remaining pension surplus investment balance was approximately \$9.1 million. We plan on using a portion of the funds to pay plan expenses, and moving the remainder funds from the pension trust to a defined contribution plan trust, where they will be used to fund certain employer contributions and pay plan expenses. On July 27, 2020, we transferred \$7.4 million of the pension surplus investment balance to a suspense account held within a trust for the Rogers Employee Savings and Investment Plan, a 401(k) plan for domestic employees.

Plan Assets and Plan Benefit Obligations

The following table summarizes the change in plan benefit obligations and changes in plan assets:

	Pension Benefits		Other Postretirement Benefits	
	2020	2019	2020	2019
<i>(Dollars in thousands)</i>				
Change in plan benefit obligations:				
Benefit obligation as of January 1	\$ 30,300	\$ 172,608	\$ 1,599	\$ 1,803
Service cost		—	56	61
Interest cost	908	5,641	40	59
Actuarial (gain) loss	491	23,797	—	(51)
Benefit payments	(1,647)	(9,262)	(192)	(273)
Pension settlements	237	(162,484)	—	—
Benefit obligation as of December 31	\$ 30,289	\$ 30,300	\$ 1,503	\$ 1,599
Change in plan assets:				
Fair value of plan assets as of January 1	\$ 42,835	\$ 191,652	\$ —	\$ —
Actual return on plan assets	3,615	22,888	—	—
Employer contributions	—	41	192	273
Benefit payments	(1,647)	(9,262)	(192)	(273)
Transfer related to plan termination	(9,744)	—	—	—
Pension settlements	237	(162,484)	—	—
Fair value of plan assets as of December 31	\$ 35,296	\$ 42,835	\$ —	\$ —
Amount overfunded (underfunded)	\$ 5,007	\$ 12,535	\$ (1,503)	\$ (1,599)

The decreases in our plan benefit obligations in 2020 and 2019 were primarily driven by benefit payments, partially offset by interest costs, actuarial losses and the termination and settlement of our Merged Plan benefit obligations.

Our pension-related balances reflected in the consolidated statements of financial position consisted of the following:

<i>(Dollars in thousands)</i>	Pension Benefits		Other Postretirement Benefits	
	As of December 31,		As of December 31,	
	2020	2019	2020	2019
Assets & Liabilities:				
Non-current assets	\$ 5,278	\$ 12,790	\$ —	\$ —
Current liabilities	(14)	(5)	(148)	(282)
Non-current liabilities	(257)	(250)	(1,355)	(1,317)
Net assets (liabilities)	\$ 5,007	\$ 12,535	\$ (1,503)	\$ (1,599)
Accumulated Other Comprehensive Loss:				
Net actuarial (loss) gain	\$ (11,171)	\$ (13,085)	\$ 119	\$ 54
Prior service benefit	—	—	97	209
Accumulated other comprehensive (loss) income	\$ (11,171)	\$ (13,085)	\$ 216	\$ 263

The projected benefit obligation (PBO), accumulated benefit obligation (ABO), and fair value of plan assets for the pension plan with a PBO or ABO in excess of its plan assets were immaterial as of December 31, 2020 and 2019.

The PBO, ABO, and fair value of plan assets for the pension plan with plan assets in excess of its PBO or ABO were \$30.0 million, \$30.0 million and \$35.3 million, respectively, as of December 31, 2020. The PBO, ABO, and fair value of plan assets for the pension plans with plan assets in excess of their PBO or ABO were \$30.0 million, \$30.0 million and \$42.8 million, respectively, as of December 31, 2019.

The PBO and ABO of plan assets for the other postretirement benefit plans with a PBO or ABO in excess of plan assets were both \$1.5 million as of December 31, 2020. The PBO and ABO of plan assets for the other postretirement benefit plans with a PBO or ABO in excess of plan assets were both \$1.6 million as of December 31, 2019. The other postretirement benefit plans did not have any plan assets as of December 31, 2020 or 2019.

Components of Net Periodic Benefit Cost (Credit)

The components of net periodic benefit cost (credit) were as follows:

<i>(Dollars in thousands)</i>	Pension Benefits			Other Postretirement Benefits		
	Years Ended December 31,			Years Ended December 31,		
	2020	2019	2018	2020	2019	2018
Service cost	\$ —	\$ —	\$ —	\$ 56	\$ 61	\$ 73
Interest cost	908	5,641	6,758	40	59	62
Expected return of plan assets	(1,574)	(6,932)	(8,662)	—	—	—
Amortization of prior service credit	—	—	—	(112)	(1,011)	(1,602)
Amortization of net loss (gain)	427	1,514	1,828	—	—	—
Settlement charge	(63)	53,213	—	—	—	—
Net periodic benefit cost (credit)	\$ (302)	\$ 53,436	\$ (76)	\$ (16)	\$ (891)	\$ (1,467)

Plan Assumptions

	Pension Benefits		Other Postretirement Benefits	
	2020	2019	2020	2019
Weighted average assumptions used in benefit obligations:				
Discount rate	2.50 %	3.25 %	1.75 %	2.75 %
Weighted average assumptions used in net periodic benefit costs:				
Discount rate	3.25 %	4.25 %	2.75 %	3.75 %
Expected long-term rate of return on assets	4.53 %	4.69 %	— %	— %

For measurement purposes as of December 31, 2020, we assumed an annual health care cost trend rate of 6.50% for covered health care benefits for retirees pre-age 65 or post-age 65. The rate was assumed to decrease gradually by 0.25% annually until

reaching 4.50% and remain at that level thereafter. For measurement purposes as of December 31, 2019, we assumed an annual health care cost trend rate of 6.75% for covered health care benefits for retirees pre-age 65 or post-age 65.

Our pension plan assets are invested with the objective of achieving a total rate of return over the long-term that is sufficient to fund future pension obligations. In managing these assets and our investment strategy, we consider future cash contributions to the plan as well as the potential of the portfolio underperforming the market. We set asset allocation target ranges based on current funding status and future projections in order to mitigate the portfolio performance risk while maintaining its funded status. Fixed income securities comprise a substantial percentage of our plan assets portfolio. As of December 31, 2020, we held approximately 90% fixed income and short-term cash securities and 10% equity securities in our portfolio, compared to December 31, 2019 when we held approximately 92% fixed income and short-term cash securities and 8% equity securities.

In determining our investment strategy and calculating the net benefit cost, we utilized an expected long-term rate of return on plan assets, which was developed based on several factors, including the plans' asset allocation targets, the historical and projected performance on those asset classes, as well as the plan's current asset composition. To justify our assumptions, we analyzed certain data points related to portfolio performance. Based on the historical returns and the projected future returns, we determined that a target return of 4.53% is appropriate for the current portfolio.

The following table presents the fair value of the pension plan net assets by asset category and level, within the fair value hierarchy, as of December 31, 2020 and 2019.

Fair Value of Plan Assets as of December 31, 2020				
<i>(Dollars in thousands)</i>	Level 1	Level 2	Level 3	Total
Fixed income bonds	\$ —	\$ 29,896	\$ —	\$ 29,896
Mutual funds	3,535	—	—	3,535
Pooled separate accounts	—	518	—	518
Guaranteed deposit account	—	—	1,347	1,347
Total plan assets at fair value	<u>\$ 3,535</u>	<u>\$ 30,414</u>	<u>\$ 1,347</u>	<u>\$ 35,296</u>

Fair Value of Plan Assets as of December 31, 2019				
<i>(Dollars in thousands)</i>	Level 1	Level 2	Level 3	Total
Fixed income bonds	\$ —	\$ 27,704	\$ —	\$ 27,704
Mutual funds	3,277	—	—	3,277
Pooled separate accounts	—	10,516	—	10,516
Guaranteed deposit account	—	—	1,338	1,338
Total plan assets at fair value	<u>\$ 3,277</u>	<u>\$ 38,220</u>	<u>\$ 1,338</u>	<u>\$ 42,835</u>

The following table presents a summary of changes in the fair value of the guaranteed deposit account's Level 3 assets for the year ended December 31, 2020:

	Guaranteed Deposit Account
Balance as of January 1, 2020	\$ 1,338
Change in unrealized gain (loss)	34
Purchases, sales, issuances and settlements (net)	(25)
Balance as of December 31, 2020	<u>\$ 1,347</u>

Cash Flows

We were not required to make any contributions to our qualified noncontributory defined benefit pension plans in 2020 and 2019. We made a voluntary contribution of \$25.0 million to the Merged Plan in 2018 as part of the proposed plan termination process. We made expected benefit payments for our defined benefit pension plans, as well as substantially settled the Merged Plan benefit obligations, through the utilization of plan assets for the funded pension plans in 2020 and 2019. As there is no funding requirement for the other postretirement benefit plans, we funded benefit payments, which were immaterial in 2020 and 2019, as incurred using cash from operations.

The benefit payments are based on the same assumptions used to measure our benefit obligations as of December 31, 2020. The following table sets forth the expected benefit payments to be paid for the pension plans and the other postretirement benefit plans:

	Pension Benefits	Other Postretirement Benefits
2021	\$ 1,808	\$ 148
2022	\$ 1,758	\$ 114
2023	\$ 1,778	\$ 130
2024	\$ 1,770	\$ 122
2025	\$ 1,801	\$ 150
2026-2030	\$ 8,570	\$ 763

Employee Savings and Investment Plan

We sponsor the Rogers Employee Savings and Investment Plan (RESIP), a 401(k) plan for domestic employees. Employees can defer an amount they choose, up to the annual IRS limit of \$19,000. Certain eligible participants are also allowed to contribute the maximum catch-up contribution per IRS regulations. We match each eligible employee's annual pre-tax contributions at a rate of 100% for the first 1% of the employee's salary and 50% for the next 5% of each employee's salary for a total match of 3.5%. Unless otherwise indicated by the participant, the matching dollars are invested in the same funds as the participant's contributions. RESIP related expense amounted to \$4.9 million in 2020, \$4.4 million in 2019 and \$5.6 million in 2018.

Note 12 – Commitments and Contingencies

Environmental & Legal

We are currently engaged in the following environmental and legal proceedings:

Voluntary Corrective Action Program

Our location in Rogers, Connecticut is part of the Connecticut Voluntary Corrective Action Program (VCAP). As part of this program, we partnered with the Connecticut Department of Energy and Environmental Protection (CT DEEP) to determine the corrective actions to be taken at the site related to contamination issues. We evaluated this matter and completed internal due diligence work related to the site in the fourth quarter of 2015. Remediation activities on the site are ongoing and are recorded as reductions to the accrual as they are incurred. We have incurred aggregate remediation costs of \$1.7 million through December 31, 2020, and the accrual for future remediation efforts is \$0.9 million.

Asbestos

Overview

We, like many other industrial companies, have been named as a defendant in a number of lawsuits filed in courts across the country by persons alleging personal injury from exposure to products containing asbestos. We have never mined, milled, manufactured or marketed asbestos; rather, we made and provided to industrial users a limited number of products that contained encapsulated asbestos, but we stopped manufacturing these products in the late 1980s. Most of the claims filed against us involve numerous defendants, sometimes as many as several hundred.

The following table summarizes the change in number of asbestos claims outstanding during 2020 and 2019:

	2020	2019
Claims outstanding as of January 1	592	745
New claims filed	115	251
Pending claims concluded*	(146)	(404)
Claims outstanding as of December 31	561	592

* For the year ended December 31, 2020, 126 claims were dismissed and 20 claims were settled. For the year ended December 31, 2019, 373 claims were dismissed and 31 claims were settled. Settlements totaled approximately \$5.4 million for the year ended December 31, 2020, compared to \$5.0 million for the year ended December 31, 2019.

Impacts on Financial Statements

We recognize a liability for asbestos-related contingencies that are probable of occurrence and reasonably estimable. In connection with the recognition of liabilities for asbestos-related matters, we record asbestos-related insurance receivables that are deemed probable.

The liability projection period covers all current and future indemnity and defense costs through 2064, which represents the expected end of our asbestos liability exposure with no further ongoing claims expected beyond that date. This conclusion was based on our history and experience with the claims data, the diminished volatility and consistency of observable claims data,

the period of time that has elapsed since we stopped manufacturing products that contained encapsulated asbestos and an expected downward trend in claims due to the average age of our claimants, which is approaching the average life expectancy.

To date, the indemnity and defense costs of our asbestos-related product liability litigation have been substantially covered by insurance. Although we have exhausted coverage under some of our insurance policies, we believe that we have applicable primary, excess and/or umbrella coverage for claims arising with respect to most of the years during which we manufactured and marketed asbestos-containing products. In addition, we have entered into a cost sharing agreement with most of our primary, excess and umbrella insurance carriers to facilitate the ongoing administration and payment of claims covered by the carriers. The cost sharing agreement may be terminated by any party, but will continue until a party elects to terminate it. As of the filing date for this report, the agreement has not been terminated, and no carrier had informed us it intended to terminate the agreement. We expect to continue to exhaust individual primary, excess and umbrella coverages over time, and there is no assurance that such exhaustion will not accelerate due to additional claims, damages and settlements or that coverage will be available as expected. We are responsible for uninsured indemnity and defense costs, and for the years ended December 31, 2020 and December 31, 2019, we paid \$0.4 million and \$0.7 million, respectively, related to such costs.

The amounts recorded for the asbestos-related liability and the related insurance receivables are based on facts known at the time and a number of assumptions. However, projecting future events, such as the number of new claims to be filed each year, the average cost of disposing of such claims, the length of time it takes to dispose of such claims, coverage issues among insurers and the continuing solvency of various insurance companies, as well as the numerous uncertainties surrounding asbestos litigation in the U.S., could cause the actual liability and insurance recoveries for us to be higher or lower than those projected or recorded.

Changes recorded in the estimated liability and estimated insurance recovery based on the projections of asbestos litigation and corresponding insurance coverage, result in the recognition of expense or income. For the year ended December 31, 2020, we recognized income of \$0.7 million, and for the years ended December 31, 2019 and 2018 expense of \$1.7 million and \$0.7 million, respectively. The benefit recognized in 2020 was primarily due to a favorable change in the defense cost assumptions. The expense recognized in 2019 was primarily due to an unfavorable change in the defense cost assumptions and the inclusion of non-mesothelioma cases in the cost projections, partially offset by a corresponding favorable change in our insurance recovery expectations. The expense recognized in 2018 was primarily due to an unfavorable change in the defense cost assumptions.

Our projected asbestos-related claims and insurance receivables were as follows:

<i>(Dollars in millions)</i>	As of December 31,	
	2020	2019
Asbestos-related liabilities	\$ 73.2	\$ 85.9
Asbestos-related insurance receivables	\$ 66.8	\$ 78.3

General

In addition to the above issues, the nature and scope of our business brings us in regular contact with the general public and a variety of businesses and government agencies. Such activities inherently subject us to the possibility of litigation, including environmental and product liability matters that are defended and handled in the ordinary course of business. We have established accruals for matters for which management considers a loss to be probable and reasonably estimable. It is the opinion of management that facts known at the present time do not indicate that such litigation will have a material adverse impact on our results of operations, financial position or cash flows.

Note 13 – Income Taxes

The “Income before income tax expense” line item in the consolidated statements of operations consisted of:

<i>(Dollars in thousands)</i>	2020	2019	2018
Domestic	\$ (4,371)	\$ (18,711)	\$ 14,381
International	72,905	73,837	96,208
Total	\$ 68,534	\$ 55,126	\$ 110,589

The “Income tax expense” line item in the consolidated statements of operations consisted of:

<i>(Dollars in thousands)</i>	<u>Current</u>	<u>Deferred</u>	<u>Total</u>
<i>2020</i>			
Domestic	\$ 5,340	\$ (11,012)	\$ (5,672)
International	26,610	(2,394)	24,216
Total	<u>\$ 31,950</u>	<u>\$ (13,406)</u>	<u>\$ 18,544</u>
<i>2019</i>			
Domestic	\$ 3,372	\$ (16,827)	\$ (13,455)
International	21,984	(722)	21,262
Total	<u>\$ 25,356</u>	<u>\$ (17,549)</u>	<u>\$ 7,807</u>
<i>2018</i>			
Domestic	\$ (341)	\$ (3,007)	\$ (3,348)
International	26,604	(318)	26,286
Total	<u>\$ 26,263</u>	<u>\$ (3,325)</u>	<u>\$ 22,938</u>

Deferred tax assets and liabilities as of December 31, 2020 and 2019, were comprised of the following:

<i>(Dollars in thousands)</i>	<u>2020</u>	<u>2019</u>
Deferred tax assets		
Accrued employee benefits and compensation	\$ 6,199	\$ 5,730
Tax loss and credit carryforwards	17,644	17,761
Reserves and accruals	6,581	5,996
Operating leases	665	904
Capitalized research and development	14,167	11,343
Other	1,824	2,210
Total deferred tax assets	<u>47,080</u>	<u>43,944</u>
Less deferred tax asset valuation allowance	<u>(9,250)</u>	<u>(14,625)</u>
Total deferred tax assets, net of valuation allowance	<u>37,830</u>	<u>29,319</u>
Deferred tax liabilities		
Depreciation and amortization	10,282	15,368
Postretirement benefit obligations	2,001	1,719
Unremitted earnings	2,426	1,624
Operating leases	714	908
Other	2,115	1,803
Total deferred tax liabilities	<u>17,538</u>	<u>21,422</u>
Net deferred tax asset (liability)	<u>\$ 20,292</u>	<u>\$ 7,897</u>

As of December 31, 2020, we had state net operating loss carryforwards ranging from \$0.2 million to \$4.7 million in various state taxing jurisdictions, which expire between 2022 and 2039 and approximately \$8.4 million of credit carryforwards in Arizona, which will expire between 2021 and 2035. We also had \$5.8 million of federal research and development (R&D) credit carryforwards that begin to expire in 2031. We believe that it is more likely than not that the benefit from certain of the state net operating loss, state R&D credits carryforwards will not be realized. In recognition of this risk, we have provided a valuation allowance of \$8.0 million relating to these carryforwards. We currently have approximately \$2.2 million of foreign tax credits that begin to expire in 2030.

We had a valuation allowance of \$9.3 million as of December 31, 2020 and \$14.6 million as of December 31, 2019, against certain of our deferred tax assets, primarily carryforwards expected to expire unused and deferred tax assets that are capital in nature. No valuation allowance has been provided on our other deferred tax assets, as we believe it is more likely than not that all such assets will be realized in the applicable jurisdictions. In 2020, we released the valuation allowance of \$5.3 million previously established against our R&D credit carryforwards as a result of our updated analysis, including current year utilization and updated future utilization. We reached this conclusion after considering the availability of taxable income in prior carryback years, tax planning strategies, and the likelihood of future taxable income exclusive of reversing temporary differences and carryforwards in the respective jurisdictions or entities. Differences between forecasted and actual future

operating results or changes in carryforward periods could adversely impact the amount of deferred tax asset considered realizable.

Income tax expense differs from the amount computed by applying the U.S. federal statutory income tax rate to income before income taxes. The reasons for this difference were as follows:

<i>(Dollars in thousands)</i>	2020	2019	2018
Tax expense at Federal statutory income tax rate	\$ 14,392	\$ 11,576	\$ 23,224
Impact of foreign operations	1,193	107	826
Foreign source income, net of tax credits	1,050	(2,248)	(197)
State tax, net of federal	(313)	(690)	121
Unrecognized tax benefits	5,800	543	(869)
U.S. Tax Reform	—	—	209
Equity compensation excess tax deductions	(791)	(2,902)	(2,238)
General business credits	(931)	(656)	(2,172)
Distribution related foreign taxes	2,332	1,240	1,916
Executive compensation limitation	900	589	801
Valuation allowance change (excluding U.S. Tax Reform)	(5,375)	(2,527)	602
Disproportionate tax effect of pension settlement charges	—	2,510	—
Other	287	265	715
Income tax expense (benefit)	<u>\$ 18,544</u>	<u>\$ 7,807</u>	<u>\$ 22,938</u>

Our effective income tax rate for 2020 was 27.1% compared to 14.2% for 2019. The 2020 rate increase was primarily due to the increase in current year accruals of reserves for uncertain tax positions, the decrease in foreign tax credits available to offset foreign source income, the decrease in excess tax deductions on stock-based compensation and higher tax impact on unremitted foreign earnings and profits, partially offset by the beneficial impact of changes in valuation allowance related to R&D credits and pre-tax mix across jurisdictions with disparate tax rates.

We did not make any changes in 2020 to our position on the permanent reinvestment of our historical earnings from foreign operations. With the exception of certain Chinese subsidiaries, we continue to assert that historical foreign earnings are indefinitely reinvested. As of December 31, 2020 and 2019, we had recorded a deferred tax liability of \$2.4 million and \$1.6 million, respectively, for Chinese withholding tax on undistributed earnings that are not indefinitely reinvested. The other remaining foreign subsidiaries have both the intent and ability to indefinitely reinvest their undistributed earnings and we estimate that, if these undistributed earnings are distributed, they may give rise to an estimated \$3.8 million of additional tax liabilities. If circumstances change and it becomes apparent that some, or all of the undistributed earnings as of December 31, 2020 will not be indefinitely reinvested, the provision for the tax consequences, if any, will be recorded in the period when circumstances change. Distributions out of current and future earnings are permissible to fund discretionary activities such as business acquisitions. However, when distributions are made, this could result in a higher effective tax rate.

Unrecognized tax benefits, excluding potential interest and penalties, for the years ended December 31, 2020 and December 31, 2019, were as follows:

<i>(Dollars in thousands)</i>	2020	2019
Beginning balance as of January 1	\$ 10,217	\$ 9,801
Gross increases - current period tax positions	5,417	3,139
Gross increases - tax positions in prior periods	46	—
Gross decreases - tax positions in prior periods	—	—
Foreign currency exchange	8	—
Lapse of statute of limitations	—	(2,723)
Ending balance as of December 31	<u>\$ 15,688</u>	<u>\$ 10,217</u>

Included in the balance of unrecognized tax benefits as of December 31, 2020 were \$15.3 million of tax benefits that, if recognized, would impact the effective tax rate. Also included in the balance of unrecognized tax benefit as of December 31, 2020 were \$0.4 million of tax benefits that, if recognized, would result in adjustments to other tax accounts, primarily deferred taxes.

We recognized interest accrued related to unrecognized tax benefit as income tax expense. Related to the unrecognized tax benefits noted above, as of December 31, 2020 and 2019, we had accrued potential interest and penalties of approximately \$1.2

million and \$0.7 million, respectively. We have recorded a net income tax expense of \$0.5 million during December 31, 2020 and net income tax expense of \$0.2 million during 2019.

We are subject to taxation in the U.S. and various state and foreign jurisdictions. Our tax years from 2016 through 2020 are subject to examination by the tax authorities. With few exceptions, we are no longer subject to U.S. federal, state, local and foreign examinations by tax authorities for the years before 2016.

Note 14 – Operating Segment and Geographic Information

Our reporting structure is comprised of the following strategic operating segments: ACS, EMS and PES. The remaining operations, which represent our non-core businesses, are reported in the Other operating segment. We believe this structure aligns our external reporting presentation with how we currently manage and view our business internally.

Operating Segment Information

The following table presents a disaggregation of revenue from contracts with customers and other pertinent financial information, for the periods indicated; inter-segment sales have been eliminated from the net sales data:

<i>(Dollars in thousands)</i>	Advanced Connectivity Solutions	Elastomeric Material Solutions	Power Electronics Solutions	Other	Total

Revenue from Contracts with Customers

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, to achieve a consistent application of revenue recognition, resulting in a single revenue model to be applied by reporting companies under U.S. generally accepted accounting principles. Under the new model, recognition of revenue occurs when a customer obtains control of promised goods or services in an amount that reflects the consideration to which the providing entity expects to be entitled in exchange for those goods or services. In addition, the new standard requires that reporting companies disclose the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. On January 1, 2018, we adopted ASU 2014-09 retrospectively with the cumulative effect of applying the standard recognized at the date of implementation and without restatement of comparative periods. This application of the new standard resulted in an increase to the January 1, 2018 balance of retained earnings of approximately \$4.2 million, net of tax.

We manufacture some products to customer specifications which are customized to such a degree that it is unlikely that another entity would purchase these products or that we could modify these products for another customer. These products are deemed to have no alternative use to us whereby we have an enforceable right to payment evidenced by contractual termination clauses. In accordance with ASC 606, for those circumstances we recognize revenue on an over-time basis. Revenue recognition does not occur until the product meets the definition of “no alternative use” and therefore, items that have not yet reached that point in the production process are not included in the population of items with over-time revenue recognition.

As appropriate, we record estimated reductions to revenue for customer returns, allowances, and warranty claims. Provisions for such reductions are made at the time of sale and are typically derived from historical trends and other relevant information.

We had contract assets primarily related to unbilled revenue for revenue recognized related to products that are deemed to have no alternative use whereby we have the right to payment. Revenue is recognized in advance of billing to the customer in these circumstances as billing is typically performed at the time of shipment to the customer. The unbilled revenue is included in the contract assets on the consolidated statements of financial position.

Our contract assets by operating segment were as follows:

<i>(Dollars in thousands)</i>	As of December 31,	
	2020	2019
Advanced Connectivity Solutions	\$ 750	\$ —
Elastomeric Material Solutions	887	1,077
Power Electronics Solutions	23,449	19,471
Other	1,489	1,907
Total contract assets	<u>\$ 26,575</u>	<u>\$ 22,455</u>

We did not have any contract liabilities as of December 31, 2020 or 2019. No impairment losses were recognized for the years ended December 31, 2020 or 2019 on any receivables or contract assets arising from our contracts with customers.

Long-Lived Assets by Geographic Area

Our long-lived assets⁽¹⁾ by geographic area were as follows:

<i>(Dollars in thousands)</i>	As of December 31,	
	2020	2019
United States	\$ 432,497	\$ 469,234
China	48,850	55,078
Germany	133,168	120,869
Other	46,061	36,942
Total long-lived assets	<u>\$ 660,576</u>	<u>\$ 682,123</u>

⁽¹⁾ Long-lived assets are based on the location of the asset and are comprised of goodwill, other intangible assets and property, plant and equipment. Countries with 10% or more of long-lived assets have been disclosed.

Note 15 – Supplemental Financial Information

Restructuring and Impairment Charges

The components of “Restructuring and impairment charges” line item in the condensed consolidated statements of operations, were as follows:

(Dollars in thousands)	Years Ended December 31,		
	2020	2019	2018
Restructuring charges			
Manufacturing footprint optimization	\$ 12,348	\$ —	\$ —
Facility consolidation	—	948	1,982
Global headquarters relocation	—	—	550
Restructuring charges	12,348	948	2,532
Impairment charges			
Fixed assets impairment charges	587	1,537	1,506
Other impairment charges	52	—	—
Impairment charges	639	1,537	1,506
Total restructuring and impairment charges	\$ 12,987	\$ 2,485	\$ 4,038

Restructuring Charges - Manufacturing Footprint Optimization

During the third quarter of 2020, we commenced manufacturing footprint optimization plans involving certain Europe and Asia manufacturing locations, primarily impacting our PES and ACS operating segments, in order to achieve greater cost competitiveness as well as align capacity with end market demand. We expect the majority of the restructuring activities to be completed by the end of the first half of 2021. Severance and related benefits activity related to the manufacturing footprint optimization plan is presented in the table below for the year ended December 31, 2020:

(Dollars in thousands)	Manufacturing Footprint Optimization Restructuring Severance and Related Benefits
Balance as of December 31, 2019	\$ —
Provisions	11,451
Payments	(819)
Foreign currency translation adjustment	371
Balance as of December 31, 2020	\$ 11,003

Restructuring Charges - Facility Consolidation & Global Headquarters Relocation

In 2018, we made the decision to consolidate our Santa Fe Springs, California operations into our facilities in Carol Stream, Illinois and Bear, Delaware. We recorded \$0.9 million and \$2.0 million of restructuring charges in 2019 and 2018, respectively, related to the facility consolidation. In 2017, we relocated our global headquarters from Rogers, Connecticut to Chandler, Arizona. We recorded \$0.6 million of restructuring charges in 2018 related to the headquarters relocation.

Impairment Charges

We recognized \$0.6 million of impairment charges in 2020, primarily related to fixed assets in Belgium pertaining to our ACS operating segment and a building lease in Hungary pertaining to our PES operating segment. We recognized \$1.5 million of impairment charges in both 2019 and 2018 pertaining to our ACS operating segment, primarily on certain assets in connection with the Isola USA Corp. (Isola) asset acquisition.

Allocation of Restructuring and Impairment Charges to Operating Segments

The following table summarizes the allocation of restructuring and impairment charges to our operating segments:

<i>(Dollars in thousands)</i>	Years Ended December 31,		
	2020	2019	2018
<i>Advanced Connectivity Solutions</i>			
Allocated restructuring charges	\$ 4,288	\$ —	\$ 244
Allocated impairment charges	335	1,537	1,506
<i>Elastomeric Material Solutions</i>			
Allocated restructuring charges	401	948	2,152
Allocated impairment charges	52	—	—
<i>Power Electronics Solutions</i>			
Allocated restructuring charges	7,659	—	136
Allocated impairment charges	252	—	—
Total restructuring and impairment charges	<u>\$ 12,987</u>	<u>\$ 2,485</u>	<u>\$ 4,038</u>

Other Operating (Income) Expense, Net

The components of “Other operating (income) expense, net” were as follows:

<i>(Dollars in thousands)</i>	Years Ended December 31,		
	2020	2019	2018
Lease income	\$ —	\$ (989)	\$ (948)
Depreciation on leased assets	—	1,907	3,512
Loss (gain) on sale or disposal of property, plant and equipment	41	756	(164)
Gain from antitrust litigation settlement	—	—	(4,231)
Indemnity claim settlements from acquisitions	—	(715)	(700)
Economic incentive grants	(145)	—	(556)
Total other operating (income) expense, net	<u>\$ (104)</u>	<u>\$ 959</u>	<u>\$ (3,087)</u>

In connection with the transitional leaseback of a portion of the facility and certain machinery and equipment acquired from Isola in August 2018, we recognized lease income and related depreciation on leased assets of \$1.0 million and \$1.9 million, respectively, in 2019, and \$0.9 million and \$3.5 million, respectively, in 2018. In 2019, we recorded a gain of \$0.7 million for the settlement of indemnity claims related to the Isola asset acquisition.

In 2018, we recorded a gain from the settlement of antitrust litigation in the amount of \$4.2 million as a result of the settlement of a class action lawsuit, filed in 2005, which alleged that Dow Chemical Company and other urethane raw material suppliers unlawfully agreed to fix, raise, maintain or stabilize the prices of polyether polyol products sold in the U.S. from January 1, 1999 through December 31, 2004 in violation of the federal antitrust laws. We also recorded a gain of \$0.7 million for the settlement of indemnity claims related to the DSP acquisition and income of \$0.6 million from economic incentive grants related to the relocation of our global headquarters from Rogers, Connecticut to Chandler, Arizona.

Interest Expense, Net

The components of “Interest expense, net” were as follows:

<i>(Dollars in thousands)</i>	Years Ended December 31,		
	2020	2019	2018
Interest on revolving credit facility	\$ 3,294	\$ 7,378	\$ 6,304
Interest rate swap settlements	3,191	(200)	(247)
Line of credit fees	715	576	573
Debt issuance amortization costs	593	552	552
Interest on finance leases	134	127	172
Interest income	(939)	(1,610)	(804)
Other	147	46	79
Total interest expense, net	<u>\$ 7,135</u>	<u>\$ 6,869</u>	<u>\$ 6,629</u>

Note 16 – Recent Accounting Standards

Recently Issued Standards

In March 2020, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2020-04, *Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting*. This ASU applies only to contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate that is expected to be discontinued after reference rate reform. This ASU provides optional expedients and exceptions to accounting under GAAP for contract modifications that replace a reference rate affected by reference rate reform. The amendments in this update were effective as of March 12, 2020 and we may elect to apply the amendments to contract modifications or hedging relationships entered into through December 31, 2022. We adopted this ASU as of the effective date and will utilize the optional expedients to the extent they apply to us. Our revolving credit facility under the Fourth Amended Credit Agreement, which was entered into on October 16, 2020 and references LIBOR, contains certain provisions for alternative reference rates in the event LIBOR becomes unavailable. Additionally, we terminated our interest rate swap, which also referenced LIBOR, on September 30, 2020. As of December 31, 2020, we have no existing contracts or agreements that reference LIBOR, for which there is not an established alternative reference rate in anticipation of the phase out of LIBOR. As a result, we are unlikely to need to apply this guidance in the future.

In August 2020, the FASB issued ASU 2020-06, *Debt-Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging-Contracts in Entity’s Own Equity (Subtopic 815-40): Accounting for Convertible Instruments and Contracts in an Entity’s Own Equity*. Under ASU 2020-06, the embedded conversion features are no longer separated from the host contract for convertible instruments with conversion features that are not required to be accounted for as derivatives under Topic 815, or that do not result in substantial premiums accounted for as paid-in capital. Consequently, a convertible debt instrument will be accounted for as a single liability measured at its amortized cost, as long as no other features require bifurcation and recognition as derivatives. The new guidance also requires the if-converted method be applied for all convertible instruments. ASU 2020-06 is effective for fiscal years beginning after December 15, 2021, with early adoption permitted. Adoption of the standard requires using either the modified retrospective or the retrospective approach. We are currently evaluating the potential impact of adopting this guidance on our consolidated financial statements.

Recently Adopted Standards Reflected in Our 2020 Financial Statements

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*. This ASU replaces the incurred loss model with a new expected loss impairment model that applies to certain financial assets measured at amortized cost, including trade and other receivables and contract assets. We adopted this update in January 2020 using the modified-retrospective approach, and it did not have a material impact on our consolidated financial statements.

Note 17 – Quarterly Results of Operations (Unaudited)

<i>(Dollars in thousands, except per share amounts)</i>	2020			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Net sales	\$ 198,810	\$ 191,157	\$ 201,944	\$ 210,672
Gross margin	\$ 65,630	\$ 69,969	\$ 75,518	\$ 80,703
Net income	\$ 13,259	\$ 14,520	\$ 7,006	\$ 15,205
Net income per share:				
Basic	\$ 0.71	\$ 0.78	\$ 0.37	\$ 0.82
Diluted	\$ 0.71	\$ 0.78	\$ 0.37	\$ 0.81

<i>(Dollars in thousands, except per share amounts)</i>	2019			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Net sales	\$ 239,798	\$ 242,852	\$ 221,842	\$ 193,768
Gross margin	\$ 85,394	\$ 85,828	\$ 78,867	\$ 64,203
Net income (loss)	\$ 28,399	\$ 24,293	\$ 23,387	\$ (28,760)
Net income (loss) per share:				
Basic	\$ 1.53	\$ 1.31	\$ 1.26	\$ (1.55)
Diluted	\$ 1.52	\$ 1.30	\$ 1.25	\$ (1.55)

Note 18 – Share Repurchases

In 2015, we initiated a share repurchase program (the Program) of up to \$100.0 million of the Company's capital stock. We initiated the Program to mitigate potentially dilutive effects of stock options and shares of restricted stock granted by the Company, in addition to enhancing shareholder value. The share repurchase program has no expiration date and may be suspended or discontinued at any time without notice. As of December 31, 2020, \$49.0 million remained of our \$100.0 million share repurchase program. There were no share repurchases in 2020.

We repurchased the following shares of capital stock through the Program, using cash from operations and cash on hand, during the years presented below:

<i>(Dollars in thousands)</i>	Years Ended December 31,		
	2020	2019	2018
Shares of capital stock repurchased	—	—	23,138
Value of capital stock repurchased	\$ —	\$ —	\$ 2,999

Note 19 - Subsequent Event

In early February 2021, there was a fire at our UTIS manufacturing facility in Ansan, South Korea. The site was safely evacuated and there were no reported injuries; however, there is extensive damage to the manufacturing site. The source of the fire is currently under investigation.

This facility manufactures eSorba® polyurethane foams used in portable electronics and display applications. These operations will be disrupted, but it is too early to determine the expected duration of the disruption.

We acquired the UTIS business in 2010, and we employ approximately 50 people at this site. The UTIS business represented less than 4% of our annual net sales in 2020. The impacts of this event on our results of operations, financial position and cash flows are unknown at this time due to the continuing assessment of the extent of the damage to our manufacturing site, the extent of the disruption to our business and the amounts of potential insurance recoveries.

SCHEDULE II

(Dollars in thousands)

Allowance for Credit Losses

	Balance at Beginning of Period	Charged to (Reduction of) Costs and Expenses	Taken Against Allowance	Other (Deductions) Recoveries	Balance at End of Period

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

The Company, with the participation of our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as of December 31, 2020. The Company’s disclosure controls and procedures are designed (i) to ensure that information required to be disclosed by it in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and (ii) to ensure that information required to be disclosed in the reports the Company files or submits under the Exchange Act is accumulated and communicated to its management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Based on their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the Company’s disclosure controls and procedures were effective as of December 31, 2020.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes in the Company’s internal control over financial reporting during the fourth quarter of the fiscal year ended December 31, 2020 that have materially affected or are reasonably likely to materially affect its internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act.

MANAGEMENT’S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Exchange Act Rules 13a-15(f) and 15d-15(f). The Company’s internal control over financial reporting was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company’s financial statements for external purposes in accordance with accounting principles generally accepted in the United States. Our internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company’s internal control over financial reporting as of December 31, 2020. In making its assessment of internal control over financial reporting, management used the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework* (2013). Based on the results of this assessment, management, including our Chief Executive Officer and our Chief Financial Officer, has concluded that, as of December 31, 2020, our internal control over financial reporting was effective.

The Company’s independent registered public accounting firm, PricewaterhouseCoopers, LLP, has audited the effectiveness of the Company’s internal control over financial reporting as of December 31, 2020, as stated in their report included under “Item 8. Financial Statements and Supplementary Data.”

Item 9B. Other Information

None.

Part III

Item 10. Directors, Executive Officers and Corporate Governance

We are incorporating by reference the information with respect to the Directors, Executive Officers and Corporate Governance set forth under the captions “Nominees for Director: Qualifications and Experience” and “Board of Directors - Meetings of the Board and Committees” in our Definitive Proxy Statement for our 2021 Annual Meeting of Shareholders, which we intend to file within 120 days after the end of our fiscal year pursuant to Section 14(a) of the Exchange Act. Information with respect to our executive officers is presented in Part I, Item 1 of this report and is hereby incorporated into this Item 10 by reference.

Code of Ethics

We have adopted a code of business conduct and ethics policy, which applies to all employees, officers and directors of Rogers Corporation. The Rogers Corporation Code of Business Conduct and Ethics Policy is posted on our website at <http://www.rogerscorp.com>. We intend to satisfy the disclosure requirements regarding any amendment to, or waiver of, a provision of the Code of Business Conduct and Ethics Policy for our principal executive officer, principal financial officer or principal accounting officer (or others performing similar functions) by posting such information on our website. Our website is not incorporated into or a part of this Form 10-K.

Item 11. Executive Compensation

We are incorporating by reference the information with respect to Executive Compensation set forth under the captions “Board of Directors - Directors’ Compensation”, “Board of Directors - Meetings of the Board and Committees”, “Compensation Discussion and Analysis”, “Compensation Discussion and Analysis - Compensation and Organization Committee Report”, “Executive Compensation Tables” and “CEO Pay Ratio” in our Definitive Proxy Statement for our 2021 Annual Meeting of Shareholders, which we intend to file within 120 days after the end of our fiscal year pursuant to Section 14(a) of the Exchange Act.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The table and footnotes below describe those equity compensation plans approved and not approved by security holders of Rogers Corporation as of December 31, 2020.

Plan Category	(a)	(b)
	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Number of securities remaining available for future issuance under each equity compensation plan excluding securities referenced in column (a)
Equity Compensation Plans Approved by Security Holders		
Rogers Corporation 2009 Long-Term Equity Compensation Plan	160,952 ⁽¹⁾	— ⁽²⁾
Rogers Corporation 2019 Long-Term Equity Compensation Plan	175,758 ⁽³⁾	918,809
Rogers Corporation Global Stock Ownership Plan For Employees ⁽⁴⁾	—	78,678
Equity Compensation Plans Not Approved by Security Holders		
Rogers Corporation Stock Acquisition Program ⁽⁵⁾	265	—
Total	336,975	997,487

⁽¹⁾ Consists of 159,752 shares for restricted stock units and 1,200 shares for deferred stock units.

⁽²⁾ This plan expired in early February 2019.

⁽³⁾ Consists of 164,508 shares for restricted stock units and 11,250 shares for deferred stock units.

⁽⁴⁾ This is an employee stock purchase plan within the meaning of Section 432(b) of the Internal Revenue Code of 1986, as amended.

⁽⁵⁾ The purpose of the Stock Acquisition Program was to enable non-management directors to acquire shares of Rogers’ capital stock in lieu of cash compensation, on either a current or deferred basis at the then current fair market value of such capital stock. For the periods covered by this report, the Company no longer offered capital stock to its directors under the Stock Acquisition Program.

We are incorporating by reference the information with respect to Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters set forth under the caption “Stock Ownership” in our Definitive Proxy Statement for our 2021 Annual Meeting of Shareholders, which we intend to file within 120 days after the end of our fiscal year pursuant to Section 14(a) of the Exchange Act.

Item 13. Certain Relationships and Related Transactions, and Director Independence

We are incorporating by reference the information with respect to Certain Relationships and Related Transactions and Director Independence as set forth under the captions “Related Party Transactions” and “Board of Directors - Director Independence” in our Definitive Proxy Statement for our 2021 Annual Meeting of Shareholders, which we intend to file within 120 days after the end of our fiscal year pursuant to Section 14(a) of the Exchange Act.

Item 14. Principal Accountant Fees and Services

We are incorporating by reference the information with respect to accountant fees and services set forth under the caption “Fees of Independent Auditor” in our Definitive Proxy Statement for our 2021 Annual Meeting of Shareholders, which we intend to file within 120 days after the end of our fiscal year pursuant to Section 14(a) of the Exchange Act.

Part IV

Item 15. Exhibits, Financial Statement Schedules

(1) Financial Statements and Schedules.

The following consolidated financial statements of the Company are included in Item 8 of this Form 10-K:

- Report of Independent Registered Public Accounting Firm
- Consolidated Statements of Operations
- Consolidated Statements of Comprehensive Income
- Consolidated Statements of Financial Position
- Consolidated Statements of Shareholders’ Equity
- Consolidated Statements of Cash Flows
- Notes to Consolidated Financial Statements

(2) Financial Statement Schedules.

Schedule II - Valuation and Qualifying Accounts

Other than as set forth above, schedules are omitted because they are not applicable, or are not required, or because the information is included in the consolidated financial statements and notes thereto.

(3) Exhibits.

The following list of exhibits includes exhibits submitted with this Form 10-K as filed with the SEC and those incorporated by reference to other filings.

- 3.1 [Restated Articles of Organization of Rogers Corporation, as amended, incorporated by reference to Exhibit 3a to the Registrant’s Annual Report on Form 10-K for the fiscal year ended December 31, 2006.](#)
- 3.2 [Amended and Restated Bylaws of Rogers Corporation, effective February 11, 2016, incorporated by reference to Exhibit 3.1 to the Registrant’s Current Report on Form 8-K filed on February 26, 2016.](#)
- 4.1 [Description of Capital Stock, incorporated by reference to Exhibit 4.1 to the Registrant’s Annual Report on Form 10-K for the fiscal year ended December 31, 2019 \(the 2019 Form 10-K\).](#)
- 10.1 [The Amended and Restated Rogers Corporation Voluntary Deferred Compensation Plan for Non-Management Directors, incorporated by reference to Exhibit 10i to the Registrant’s Quarterly Report on Form 10-Q filed November 8, 2007.**](#)
- 10.1.1 [First Amendment to the Amended and Restated Rogers Corporation Voluntary Deferred Compensation Plan for Non-Management Directors, incorporated by reference to Exhibit 10.5 to the Registrant’s Quarterly Report on Form 10-Q filed November 3, 2009.**](#)
- 10.1.2 [Second Amendment to the Amended and Restated Rogers Corporation Voluntary Deferred Compensation Plan for Non-Management Directors, incorporated by reference to Exhibit 10.5 to the Registrant’s Annual Report on Form 10-K for the fiscal year ended December 31, 2010 \(the 2010 Form 10-K\).**](#)
- 10.2 [The Amended and Restated Rogers Corporation Voluntary Deferred Compensation Plan for Key Employees, incorporated by reference to Exhibit 10j to the Registrant’s Quarterly Report on Form 10-Q filed November 8, 2007.**](#)
