

The
NEW IRELAND
Fund

Annual Report
October 31, 2021

Letter to Shareholders

Dear Stockholder,

We are pleased to provide the Annual Report for The New Ireland Fund, Inc. (the “Fund”) for the fiscal year ended October 31, 2021.

It was a very strong period for the equity market, with the first half of the year in particular seeing a rebound from the COVID driven fears of 2020. The second half of the year however has been somewhat muted due mainly to the resurgence of the COVID pandemic and particularly during the last three months of the period under review when we saw some uncertainties beginning to emanate pertaining to supply chain bottlenecks, labor shortages and raw material price increases.

All markets experienced strong positive returns over the 12-month period with the broad S&P 500 in the US and the Eurostoxx 50 index returning 42.9% and 46.3%, respectively. Despite giving up some relative performance over the final six months of the period the Fund’s benchmark, the MSCI All Ireland Capped Index outperformed the S&P 500 Index by 2.1%¹ over the 12 months to October 31, 2021. Ireland did fare much better than the UK’s large cap FTSE100 or mid-cap FTSE250 indices against which many Irish companies compete. The US dollar was relatively flat versus the euro over the 12 months.

Brexit did create a significant increase in paperwork and administrative requirements for trade, which has had a negative impact on Irish exports to the UK, and some limited disruption to supply chains, although far less so than if a trade deal had not been agreed. However, a further complication has emerged in recent months, whereby a dispute over the unique treatment of Northern Ireland in the EU/UK trade agreement has led the UK to threaten to suspend those provisions of that agreement. A “trade war” between the UK and the EU still seems unlikely, but cannot be ruled out, and would have negative implications for the Irish economy if it materialized.

For the 12 months ended October 31, 2021, the Fund’s net asset value (“NAV”) increased 44.27%, slightly underperforming the MSCI All Ireland Capped Index, which increased by 45.02%. The Fund’s market price increased 64.58% over the same period.

For the Irish economy, despite the COVID pandemic there is a continued positive outlook which is reflected in the forecast GDP growth rates. With this in mind the Fund is much less defensively positioned than in prior periods and over the past 12-18 months it has been re-positioned from more expensive growth type stocks towards cheaper more value-oriented and cyclical names, which reflects attractive valuations.

The Fund continues to review various discount management options and as highlighted in its semi-annual update it had a cash tender offer in April/May where it accepted 1,213,300 shares for payment at a price of \$14.78 per share. On the 12th of November it announced the renewal of its Share Repurchase Program.

¹ All returns are in US dollars unless stated otherwise

In December, the Fund's Board of Directors declared an annual distribution in the amount of \$2.2819 per share consisting of net investment income, short term capital gains, and long term capital gains. The distributions will be paid by way of a cash dividend under the date of January 4, 2022, to all shareholders of record on December 24, 2021.

Our detailed comments regarding the Irish economy, market and Fund performance follows in our Management's Discussion of Fund Performance. Please do not hesitate to let us know if you have questions or concerns. We would encourage you to visit our website at www.newirelandfund.com for daily price information, fund documents as well as investment updates. We thank you for investing with us and we look forward to our continued relationship.

Sincerely,

David Dempsey
Chair of the Board

Important Information Concerning Management’s Discussion of Fund Performance

Except as otherwise specifically stated, all information and investment team commentary, including portfolio security positions, is as of October 31, 2021. The views expressed in the Management’s Discussion of Fund Performance section (the “MDFP”) are those of the Fund’s portfolio manager and are subject to change without notice. They do not necessarily represent the views of KBI Global Investors (North America) Ltd. The MDFP contains some forward-looking statements providing current expectations or forecasts of future events; they do not necessarily relate to historical or current facts. There can be no guarantee that any forward-looking statement will be realized. We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events, or otherwise. Any discussions of specific securities should not be considered a recommendation to buy or sell those securities. The Fund may buy, sell, or hold any security discussed herein, on the basis of factors described herein or the basis of other factors or other considerations. Fund holdings will change.

Performance quoted represents past performance and does not guarantee or predict future results.

Management’s Discussion of Fund Performance (as of October 31, 2021)

Over the most recent fiscal six months, the Fund’s net asset value (“NAV”) per share increased by 1.13% in U.S. Dollar terms¹ to \$15.17 per share, as compared to the MSCI Ireland All Capped Index (“MSCI”) which increased by 3.45% over the period. For the 12 months ended October 31, 2021, the Fund’s NAV returned 44.27%, slightly underperforming the comparable MSCI return of 45.02%.

The exceptionally strong fiscal year Fund return was driven by positive fundamentals such as COVID vaccine rollouts, reopening of economies and the subsequent reacceleration of global economic growth and company earnings.

Economic Growth

Growth is expected to be very strong again for the calendar year 2021, following on from the strong growth of the economy, as measured by GDP in 2020. The Central Bank of Ireland expects a GDP growth rate of 15.6%, with Davy stockbrokers forecasting 15% (up from 3.5% some months ago). In addition, Goodbody’s stockbrokers has also revised upwards their forecast to +16.7%. GDP is an imperfect measure of economic activity in Ireland therefore it is more appropriate to focus on an alternative measure of activity such as the +5.25% forecast for the domestic economy itself as issued by the Central Bank of Ireland.

¹ All returns are in US dollars unless stated otherwise

Coronavirus

As the vaccination rate in Ireland reached very high levels towards the end of the summer (well in excess of 90% for adults), the government removed almost all the remaining legal restrictions on economic and social activity, although a mask mandate remains in place for shops, public transport, and medical facilities. However, case numbers and (less so) hospitalizations have remained high, and while the government has stated that it strongly opposes reimposing restrictions on activity, rising case numbers mean that this cannot be completely ruled out and indeed some measures have recently been outlined.

Brexit

Following the UK's departure from the EU, a trade agreement was put in place to allow tariff-free trade between the UK and EU. But while tariffs were avoided, Brexit did create a significant increase in paperwork and administrative requirements for trade, which has had a negative impact on Irish exports to the UK, and some limited disruption to supply chains, although far less so than if a trade deal had not been agreed. Over time, these negative impacts should reduce, and as we are well through the final quarter of the year it does not appear as if the magnitude of the disruption is large enough to lead forecasters to materially change their forecasts for economic growth for 2021 or more importantly at this point in future years. However, a further complication has emerged in recent months, whereby a dispute over the unique treatment of Northern Ireland in the EU/UK trade agreement has led the UK to threaten to suspend those provisions of that agreement, with Article 16 being the specific reference point. In turn, the EU has signalled that it may suspend the trade deal in its entirety if the UK suspends the provisions relating to Northern Ireland. A "trade war" between the UK and the EU still seems unlikely, but cannot be ruled out, and would have negative implications for the Irish economy if it materialized.

Corporate Taxation Trends

Ireland is sometimes seen to be a tax haven of sorts, and while this is objectively untrue, it is the case that it has a low headline rate of corporation tax (12.5%) and that means that some large international companies use complex corporate structures to ensure that they pay tax in Ireland rather than in other countries where they carry out more of their actual activity. The recent international agreement to set a minimum corporate tax rate of 15% will force Ireland to raise its rate (from 12.5% to 15%), but other associated changes relating to where taxes should be paid will lead to a reduction in Irish tax revenues, on a net basis. Initial estimates indicate that the lost revenue could amount to approximately \$2.5bn – though given the many uncertainties this must be regarded as being a very tentative estimate. While this lost revenue would be an unwelcome development, it amounts to well under 1% of GDP, so it would amount to a problem rather than a crisis.

Equity Market Review

2021 was a very strong year for the equity market. Returns were generally frontloaded with a very strong first half of the year followed by a more pedestrian second half. For the first half there was a strong rebound from the COVID driven fears of 2020. The rollout of vaccination programs and subsequent reopening of economies and societies were the primary catalysts for the strong market rebound. Over the second half of the year, a battle played out between the pessimists and optimists on various topics from growth slowdown and inflation to the resurgence of the COVID pandemic particularly during the fourth quarter. From a micro company perspective, a further dynamic unfolded with uncertainties emanating from company-specific and industry-specific comments pertaining to supply chain bottlenecks, labor shortages and raw material price increases.

From the table below, while the Irish market's rebound was strong, it wasn't as strong as that experienced by the broad S&P 500 index in the US or the broad EuroStoxx 50 index in Europe. Ireland did fare much better than the UK's large cap FTSE100 or mid-cap FTSE250 indices against which many Irish companies compete. The US dollar was relatively flat versus the euro over the 12 months.

Major Fund stock capital moves over the 12 months to October 31, 2021 (in US dollar terms)

Strongest % move

Bank of Ireland Group Plc	+143.3%
AIB Group Plc	+141.5%
Grafton Group Plc	+118.8%
Uniphar Plc	+87.7%
Smurfit Kappa Group	+15.9%

Weakest % move

Amryt Pharma Plc	-18.6%
Origin Enterprises Plc	+2.6%
Greencoat Renewables Plc	+2.7%
Flutter Entertainment Plc	+9.2%
Enel	+9.9%

Highlights regarding some of the significant contributors to the Fund's performance over the 12-month period are detailed below:

Bank Of Ireland Plc: The shares performed strongly on the back of a significant improvement in the outlook for the Irish economy into 2021 from the COVID and Brexit related concerns of 2020. The bank was also involved in some corporate activity during the year with the purchase of a loan book from KBC Bank as well as the acquisition of Davy stockbrokers.

Allied Irish Banks Plc: As with Bank of Ireland, the stock rebounded strongly driven by a significant improvement in the outlook for the Irish economy into 2021 from the COVID and Brexit related concerns of 2020. The bank also was involved in some corporate activity during the year with the purchase of a loan book from Ulster Bank as well as the acquisition of Goodbody stockbrokers. It is worth noting that during the year that both KBC Bank and Ulster Bank both announced their withdrawal from the Irish market which also helped the two large domestic banks, Bank of Ireland and Allied Irish Banks.

Grafton Plc: The company, which is a specialist distributor of building materials to builders and consumers, performed very strongly on the back of very strong earnings, earnings upgrades and continued positive outlook commentary by its management.

Uniphar Plc: The company, which is a diversified healthcare services company, continued to grow strongly through the year and delivered strong earnings growth, announced some further bolt on acquisitions and maintained a positive outlook for the business operations and pipeline for future acquisitions.

Amryt Pharma Plc: The company is a relatively early-stage biotech specialty pharmaceutical company focused on developing and delivering innovative new treatments to help improve the lives of patients with rare and orphan diseases. There was relatively little news flow over the period other than the FDA requiring the company to extend a drug trial and requesting that it provide more patient data.

Origin Enterprises Plc: The stock price was relatively unchanged over the year with little by way of news flow to materially drive it. As an agronomy services provider to farmers, poor weather around planting season did cause concerns. Higher material prices such as fertilizer also weighed on sentiment.

Flutter Entertainment Plc: The company share price was up high single digits over the 12 months. A battle played out between strong fundamental growth as delivered in the earnings, offset by concerns around corporate changes, legal actions from some US corporate partners as well as some concerns surrounding gambling reform in markets such as the UK.

Greencoat Renewables Plc: The company which is a leading player in producing renewable energy in Ireland, delivered earnings in line with expectations throughout 2021. As a utility name, the stock underperformed

with macro items such as rising bond yields as well as the summer energy crisis across Europe weighing on the stock price. The company announced some additional acquisitions through the year.

Global Market Outlook

Looking forward, we believe that after a decade of central banks flooding the global system with liquidity to counter deflationary forces, a 'regime change' lies ahead and we should expect and plan for a reversal in those forces and for a period of central banks increasing short term interest rates and 'tapering' their bond purchases. It has already begun, with several countries already raising short term interest rates during the final quarter of 2021. We can expect that the US Federal Reserve will commence a material reduction in its bond purchase program while the UK may also be forced to raise interest rates. Our central scenario looking into 2022 is for both economic growth and inflation to remain above trend.

For equity markets such a transition period or regime change poses a real time to think and consider how we should invest. A decade of central banks driving asset class returns (that were in our view well beyond those merited by fundamentals) is most likely behind us. Bond and stock markets have benefitted from this environment in addition to large cap 'growth' sectors such as technology and the famed FAANG names.

Looking ahead, investment terms that have been almost forgotten about or overlooked such as lower beta, equity income and dividend growth, and downside protection could well be beneficiaries from the new regime. As ever, we continue to live in uncertain times including the path of the COVID pandemic, which is not yet over. While remaining ever vigilant we do see equities as the preferred asset class but expect more rotation within markets as well as more modest and volatile return patterns.

At an aggregate valuation level, equity markets remain expensive compared to history, but not aggressively so. For the first nine months of 2021, while we have seen strong equity market returns, they have slowed down of late and we can also note strong style rotation from value to growth and back again and more recently towards value again.

We believe that the rotation towards cyclical and value sectors is far from complete and that the expected transition towards higher rates and steepening bond yield curves will further drive this. While absolute market returns may be more muted, we do believe an environment that will reward stock picking lies ahead as M&A activity has been a positive.

We expect that the rotation towards cyclical and value sectors is far from complete as we soon enter 2022.

Irish Market Outlook

For Ireland, there is light at the end of the tunnel on the COVID pandemic but it certainly hasn't been defeated. At the time of writing, governments across Europe are again concerned with a further negative increase in COVID cases. Ireland in fact is currently at the vanguard of this and the government is again strongly cautioning society about limiting their social activities. On a positive note, given the extremely high vaccination rate there is a material disconnect when it comes to hospitalizations and ICU numbers and especially when compared to previous waves. It is not at this point impacting the stock market or economic outlook to any material extent.

Corporate activity over the quarter has been relatively quiet and the primary focus has been on H1 earnings updates and a sense of 'return to normal' for corporate management teams. They haven't however been willing to give much guidance into 2022, not least with lingering concerns surrounding COVID probably limiting their willingness to 'stick their necks' out at this point. I would expect this to arise at year end reporting and pre-close update statements which should bring a new wave of confidence and momentum into 2022.

The portfolio is much less defensively positioned than in prior periods and over the past 12-18 months we very much reduced positioning from more expensive growth type stocks and reinvested towards cheaper more value-oriented value and cyclical names. This is consistent with our continued positive outlook for the economy and stock market as well as reflecting the more attractive valuation of such names.

The New Ireland Fund, Inc.

Notes to Financial Statements

The New Ireland Fund, Inc. (the “Fund”) was incorporated under the laws of the State of Maryland on December 14, 1989 and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”). The Fund’s investment objective is long-term capital appreciation through investment primarily in equity securities of Irish companies. The Fund is designed for U.S. and other investors who wish to participate in the Irish securities markets. In order to take advantage of significant changes that have occurred in the Irish economy and to advance the Fund’s investment objective, the investment strategy has a bias towards Ireland’s growth companies.

The Fund is an investment company that follows the accounting and reporting guidance of Accounting Standards Codification Amendments to the Scope, Measurements, and Disclosure Requirements applicable to Investment Companies.

A. Significant Accounting Policies:

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements.

Security Valuation: Securities listed on a stock exchange for which market quotations are readily available are valued at the closing prices on the date of valuation, or if no such closing prices are available, at the last bid price quoted on such day. If there are no such quotations available for the date of valuation, the last available closing price will be used. The value of securities and other assets for which no market quotations are readily available, or whose values have been materially affected by events occurring before the Fund’s pricing time but after the close of the securities’ primary markets, are valued by methods deemed by the Board of Directors to represent fair value. Short-term securities that mature in 60 days or less may be valued at amortized cost.

Fair Value Measurements: As described above, the Fund utilizes various methods to measure the fair value of most of its investments on a recurring basis. U.S. Generally Accepted Accounting Principles (“GAAP”) establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of inputs are:

- Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.
- Level 2 – observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.
- Level 3 – unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund’s own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The New Ireland Fund, Inc.

Notes to Financial Statements (continued)

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

At the end of each fiscal quarter, management evaluates the Level 2 and Level 3 assets and liabilities, if any, for changes in liquidity, including but not limited to: whether a broker is willing to execute at the quoted price, the depth and consistency of prices from third party services, and the existence of contemporaneous, observable trades in the market. Additionally, management evaluates the Level 1 and Level 2 assets and liabilities on a quarterly basis for changes in listing or delistings on national exchanges.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of period. The summary of inputs used to value the Fund's net assets as of October 31, 2021 is as follows:

	Total Value at 10/31/2021	Level 1 Quoted Price	Level 2 Significant Observable Input	Level 3 Significant Unobservable Input
Investments in Securities				
Common Stocks*				
Life Sciences Tools & Services	\$ 1,659,198	\$ —	\$ 1,659,198	\$ —
Other Industries	53,352,187	53,352,187	—	—
Rights	—	—	—	—
Total Investments ^	<u>\$ 55,011,385</u>	<u>\$ 53,352,187</u>	<u>\$ 1,659,198</u>	<u>\$ —</u>

* See Portfolio Holdings detail for country breakout.

^ Investments are disclosed individually on the Portfolio Holdings.

There was no change in Level 3 securities.

Dividends and Distributions to Stockholders: Distributions from net realized gains on investment transactions and net realized foreign exchange gains, if any, are declared and paid annually and are recorded on the ex-dividend date. On December 8, 2020, the Board determined that the Fund was in a position to distribute short-term and long-term capital gains.

The New Ireland Fund, Inc.

Notes to Financial Statements (continued)

Distributions are reported on a tax basis and may differ from net investment income and realized capital gains for financial reporting purposes. Differences may be permanent or temporary. Permanent differences are reclassified among capital accounts in the financial statements to reflect their tax character. Temporary differences arise when certain items of income, expense, gain or loss are recognized in different periods for financial statement and tax purposes; these differences will reverse at some point in the future. Differences in classification may also result from the treatment of short-term gain as ordinary income for tax purposes.

U.S. Federal Income Taxes: It is the Fund's intention to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended, and distribute all of its taxable income within the prescribed time. It is also the intention of the Fund to make distributions in sufficient amounts to avoid Fund excise tax. Accordingly, no provision for U.S. federal income taxes is required.

Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years (October 31, 2021, 2020, 2019, and 2018), and has concluded that no provision for federal income tax is required in the Fund's financial statements. The Fund's federal and state income and federal excise tax return for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

For tax purposes at October 31, 2021 and October 31, 2020, the Fund distributed \$331,005 and \$0, respectively, of ordinary income. The Fund also distributed, for tax purposes at October 31, 2021 and October 31, 2020, \$1,165,631 and \$0, respectively, of long-term capital gains.

Permanent differences between book and tax basis reporting for the year ended October 31, 2021 have been identified and appropriately reclassified to reflect a decrease in distributable earnings of \$13 and an increase in paid-in-capital of \$13. Net assets were not affected by this reclassification.

Currency Translations: The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars at the spot rate of such currencies against U.S. dollars by obtaining from ICE Data Services each day the current 4:00 pm New York time spot rate and future rate (the future rates are quoted in 30-day increments) on foreign currency contracts. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions, and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amount actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gains and losses on security transactions.

Securities Transactions and Investment Income: Securities transactions are recorded based on their trade date. Realized gains and losses from securities sold are recorded on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recorded as soon as the Fund is informed of the ex-dividend date. Withholding taxes on foreign dividends have been

The New Ireland Fund, Inc.

Notes to Financial Statements (continued)

provided for in accordance with the Fund's understanding of the applicable country's tax rules and rates. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Interest income is recorded on the accrual basis. Withholding tax reclaims are filed in certain countries to recover a portion of the amounts previously withheld. The Fund records a reclaim receivable based on, among other things, a jurisdiction's legal obligation to pay reclaims as well as payment history and market convention.

Offering Costs: Offering costs are capitalized in conjunction with the shares issued in such offering. Offering costs can also be amortized through the expiration of the offering period depending on the likelihood of the occurrence of the offering.

Use of Estimates: The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

B. Management Services:

The Fund has entered into an investment advisory agreement (the "Investment Advisory Agreement") with KBI Global Investors (North America) Ltd. ("KBIGINA"). Under the Investment Advisory Agreement, the Fund pays a monthly fee at an annualized rate equal to 0.65% of the value of the average daily net assets of the Fund up to the first \$50 million, 0.60% of the value of the average daily net assets of the Fund over \$50 million and up to and including \$100 million and 0.50% of the value of the average daily net assets of the Fund on amounts in excess of \$100 million. In addition, KBIGINA provides investor services to existing and potential shareholders. See the effect of expenses on Statement of Operations.

The Fund has entered into an administration agreement (the "Administration Agreement") with U.S. Bancorp Fund Services, LLC, d/b/a U.S. Bank Global Fund Services ("Fund Services"). The Fund pays Fund Services an annual fee payable monthly. See the effect of expenses on Statement of Operations.

The Fund has entered into an agreement with U.S. Bank, N.A. to serve as the custodian for the Fund's assets. See the effect of expenses on Statement of Operations.

The Fund has entered into a transfer agency and registrar services agreement (the "Transfer Agency and Registrar Services Agreement") with American Stock Transfer & Trust Company, LLC ("AST") to serve as transfer agent for the Fund. See the effect of expenses on Statement of Operations.

The Fund has entered into an agreement with Vigilant Compliance, LLC for compliance services. See the effect of expenses on Statement of Operations.

C. Purchases and Sales of Securities:

The cost of purchases and proceeds from sales of securities for the year ended October 31, 2021, excluding U.S. government and short-term investments, aggregated to U.S. \$13,185,542 and U.S. \$34,141,981 respectively.

The New Ireland Fund, Inc.

Notes to Financial Statements (continued)

D. Components of Distributable Earnings:

At October 31, 2021, the components of distributable earnings on a tax basis were as follows:

<u>Qualified Late Year Losses Deferred</u>	<u>Undistributed Ordinary Income</u>	<u>Undistributed Long-Term Gains</u>	<u>Net Unrealized Appreciation</u>
\$—	\$920,157	\$7,355,607	\$21,075,058

As of October 31, 2021, the Fund had no capital loss carryforwards.

Under the Regulated Investment Company Modernization Act of 2010, net capital losses (those earned in taxable years beginning after December 22, 2010) may be carried forward indefinitely and must retain the character of the original loss.

The aggregate cost of investments and the composition of unrealized appreciation and depreciation on investments and appreciation, on assets and liabilities in foreign currencies on a tax basis as of October 31, 2021, were as follows:

<u>Total Cost of Investments</u>	<u>Gross Unrealized Appreciation on Investments</u>	<u>Gross Unrealized Depreciation on Investments</u>	<u>Net Unrealized Appreciation on Investments</u>
\$33,934,298	\$21,903,511	\$826,424	\$21,077,087

E. Common Stock

For the year ended October 31, 2021, the Fund redeemed 1,213,300 shares in connection with a Tender Offer on May 14, 2021. For the year ended October 31, 2020, the Fund did not issue or redeem any shares.

F. Share Repurchase Program:

In accordance with Section 23(c) of the 1940 Act, the Fund hereby gives notice that it may from time to time repurchase shares of the Fund in the open market at the option of the Board of Directors and upon such terms as the Directors shall determine.

For the year ended October 31, 2021, the Fund repurchased 65,606 (1.80% of the shares outstanding at October 31, 2021) of its shares for a total cost of \$693,584 at an average discount of 20% of net asset value. For the year ended October 31, 2020, the Fund repurchased 19,500 (0.40% of the shares outstanding at October 31, 2020) of its shares for a total cost of \$180,706 at an average discount of 17% of net asset value.

G. Market Concentration:

Because the Fund concentrates its investments in securities of Irish Companies, its portfolio may be subject to special risks and considerations typically not associated with investing in a broader range of domestic securities. In addition, the Fund is more susceptible to factors adversely affecting the Irish economy than a comparable fund not concentrated in these issuers to the same extent.

The New Ireland Fund, Inc.

Notes to Financial Statements *(continued)*

H. Risk Factors:

Investing in the Fund may involve certain risks including, but not limited to, those described below.

The prices of securities held by the Fund may decline in response to certain events, including those directly involving the companies whose securities are owned by the Fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations. The growth-oriented, equity-type securities generally purchased by the Fund may involve large price swings and potential for loss.

Investments in securities issued by entities based outside the United States may also be affected by currency controls; different accounting, auditing, financial reporting, and legal standards and practices; expropriation; changes in tax policy; greater market volatility; differing securities market structures; higher transactions costs; and various administrative difficulties, such as delays in clearing and settling portfolio transactions or in receiving payment of dividends. These risks may be heightened in connection with investments in developing countries.

The Fund may face risks associated with the potential uncertainty and consequences that may follow Brexit, including with respect to volatility in exchange rates and interest rates.

The COVID-19 pandemic has disrupted economic markets and the prolonged economic impact is uncertain. The operational and financial performance of the issuers of securities in which the Fund invests depends on future developments, including the duration and spread of the outbreak, and such uncertainty may in turn impact the value of the Fund's investments.

I. Subsequent Event:

Management has evaluated the impact of all subsequent events on the Fund through the date the financial statements were issued, and has determined that there was the following subsequent event:

On December 14, 2021, the Fund declared an annual distribution in the amount of \$2.2819 per share consisting of net investment income, short term capital gains, and long term capital gains. The distributions will be paid on January 4, 2022 to stockholders of record on December 24, 2021.

The New Ireland Fund, Inc.

Report Of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of The New Ireland Fund, Inc.

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of The New Ireland Fund, Inc. (the "Fund"), including the portfolio holdings, as of October 31, 2021, the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, financial highlights for each of the five years in the period then ended, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of October 31, 2021, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We have served as the Fund's auditor since 2007.

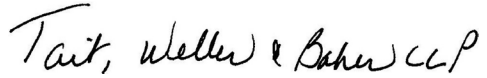

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of October 31, 2021 by

The New Ireland Fund, Inc.

Report Of Independent Registered Public Accounting Firm (continued)

correspondence with the custodian and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

Dividend Reinvestment and Cash Purchase Plan

Pursuant to the Dividend Reinvestment and Cash Purchase Plan (the “Plan”) approved by the Fund’s Board of Directors (the “Directors”), each shareholder will be deemed to have elected, unless American Stock Transfer & Trust Company LLC (the “Plan Agent”) is instructed otherwise by the shareholder in writing, to have all distributions automatically reinvested by the Plan Agent in Fund shares pursuant to the Plan. Distributions with respect to Fund shares registered in the name of a broker-dealer or other nominee (i.e., in “street name”) will be reinvested by the broker or nominee in additional Fund shares under the Plan, unless the service is not provided by the broker or nominee or the shareholder elects to receive distributions in cash. Investors who own Fund shares registered in street names may not be able to transfer those shares to another broker-dealer and continue to participate in the Plan. These shareholders should consult their broker-dealer for details. Shareholders who do not participate in the Plan will receive all distributions in cash paid by check in U.S. dollars mailed directly to the shareholder by the Plan Agent, as paying agent. Shareholders who do not wish to have distributions automatically reinvested should notify the Fund, in care of the Plan Agent for The New Ireland Fund, Inc.

The Plan Agent will serve as agent for the shareholders in administering the Plan. If the Directors of the Fund declare an income dividend or a capital gains distribution payable either in the Fund’s common stock or in cash, as shareholders may have elected, non-participants in the Plan will receive cash and participants in the Plan will receive common stock to be issued by the Fund. If the market price per share on the valuation date equals or exceeds net asset value per share on that date, the Fund will issue new shares to participants at net asset value or, if the net asset value is less than 95% of the market price on the valuation date, then at 95% of the market price. The valuation date will be the dividend or distribution payment date or, if that date is not a trading day on the New York Stock Exchange, Inc. (“NYSE”), the next preceding trading day. If the net asset value exceeds the market price of Fund shares at such time, participants in the Plan will be deemed to have elected to receive shares of stock from the Fund, valued at market price on the valuation date. If the Fund should declare a dividend or capital gains distribution payable only in cash, the Plan Agent as agent for the participants, will buy Fund shares in the open market, on the NYSE or elsewhere, with the cash in respect of such dividend or distribution, for the participants’ account on, or shortly after, the payment date.

Participants in the Plan have the option of making additional cash payments to the Plan Agent, monthly, in any amount from U.S. \$100 to U.S. \$3,000, for investment in the Fund’s common stock. The Plan Agent will use all funds received from participants to purchase Fund shares in the open market, at the prevailing market price, on the 15th of each month or the next business day shares are traded if the 15th is a Saturday, Sunday or holiday. Voluntary cash payments must be received by the Plan Agent at least two business days prior to such investment date. To avoid unnecessary cash accumulations and to allow ample time for receipt and processing of voluntary cash payments to the participant’s account, it is suggested that the participants send in voluntary cash payments to be received by the Plan Agent ten days prior to the investment date.

Additional Information (unaudited) (continued)

Interest will not be paid on any uninvested cash payments. A participant may withdraw a voluntary cash payment by written notice, if the notice is received by the Plan Agent not less than forty-eight hours before such payment is to be invested.

The Plan Agent maintains all shareholder accounts in the Plan and furnishes written confirmations of all transactions in the account, including information needed by shareholders for personal and U.S. federal tax records. Shares in the account of each Plan participant will be held by the Plan Agent in non-certificated form in the name of the participant, and each shareholder's proxy will include those shares purchased pursuant to the Plan.

In the case of shareholders such as banks, brokers or nominees who hold shares for beneficial owners, the Plan Agent will administer the Plan on the basis of the number of shares certified from time to time by the shareholder as representing the total amount registered in the shareholder's name and held for the account of beneficial owners who are participating in the Plan.

There is no charge to participants for reinvesting dividends or capital gains distributions. The Plan Agent's fee for the handling of the reinvestment of dividends and distributions will be paid by the Fund. However, each participant's account will be charged a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases in connection with the reinvestment of dividends or capital gains distributions. A participant will also pay brokerage commissions incurred in purchases in connection with the reinvestment of dividends or capital gains distributions. A participant will also pay brokerage commissions incurred in purchases from voluntary cash payments made by the participant and a transaction fee of \$2.50 (which will be deducted from the participant's voluntary cash payment investment). Brokerage charges for purchasing small amounts of stock of individual accounts through the Plan are expected to be less than the usual brokerage charges for such transactions, because the Plan Agent will be purchasing stock for all participants in blocks and prorating the lower commission thus attainable.

Participants may sell some or all their shares. This can be done either online at www.amstock.com, via telephone, toll free, at 1-800-243-4353 or by submitting the transaction request form at the bottom of the participant's statement. Requests received either via the Internet or telephone by 4:00 pm, Eastern time, or via the mail by 12:00 pm, Eastern time, will generally be sold the next business day shares are traded. There is a transaction fee of \$15 and \$0.10 per share commission on sales of shares.

Neither the Fund nor the Plan Agent will provide any advice, make any recommendations, or offer any opinion with respect to whether or not you should purchase or sell shares or otherwise participate under the Plan. You must make independent investment decisions based on your own judgment and research. The shares held in Plan accounts are not subject to protection under the Securities Investor Protection Act of 1970.

Neither the Fund nor the Plan Agent will be liable for any act performed in good faith or for any good faith omission to act or failure to act, including, without limitation, any claim of liability (i) arising out of failure to terminate a participant's account, sell stock held in the Plan, deposit certificates or direct registration shares, invest voluntary

Additional Information (unaudited) (continued)

cash payments or dividends; or (ii) with respect to the prices at which stock is purchased or sold for the participant's account and the time such purchases or sales are made. Without limiting the foregoing, the Plan Agent will not be liable for any claim made more than 30 days after any instruction to buy or sell stock was given to the Plan Agent.

The automatic reinvestment of dividends and distributions will not relieve participants of any U.S. Federal income tax which may be payable on such dividends or distributions.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan as applied to any voluntary cash payment made and any dividend or distribution paid subsequent to notice of the change sent to all shareholders at least thirty days before the record date for such dividend or distribution. The Plan also may be amended or terminated by the Plan Agent with at least thirty days written notice to all shareholders. All correspondence concerning the Plan should be directed to the Plan Agent for The New Ireland Fund, Inc. in care of American Stock Transfer & Trust Company LLC, P.O. Box 922, Wall Street Station, New York, New York, 10269-0560, telephone number (718) 921-8265.

Meeting of Shareholders

On June 8, 2021 the Fund held its Annual Meeting of Shareholders. The following Directors were elected by the following votes: Michael Pignataro 3,546,689 For; 294,105 Abstaining and Eleanor Hoagland 3,543,153 For; 297,641 Abstaining. Sean Hawkshaw and David Dempsey continue to serve in their capacities as Directors of the Fund.

Fund's Privacy Policy

The New Ireland Fund, Inc. appreciates the privacy concerns and expectations of its registered shareholders and safeguarding their nonpublic personal information ("Information") is of great importance to the Fund. The Fund collects Information pertaining to its registered shareholders, including matters such as name, address, phone number, tax I.D. number, Social Security number and instructions regarding the Fund's Dividend Reinvestment Plan. The Information is collected from the following sources:

- Directly from the registered shareholder through data provided on applications or other forms and through account inquiries by mail, telephone or e-mail.
- From the registered shareholder's broker as the shares are initially transferred into registered form.

Fund will not disclose the Information about registered shareholders who are individuals, except as permitted by law and for its everyday business purposes. Such disclosures may be made to the Fund's affiliates such as its investment manager, and with nonaffiliated third parties to process your transactions, maintain your account(s), respond to court orders and legal investigations. Nonaffiliated third parties the Fund can share with may include its accountants, attorneys, transfer agents, custodians and broker-dealers.

Additional Information (unaudited) (continued)

The Fund may also disclose your Information to its affiliates for marketing purposes, such as to offer the Fund's products and services to you. Further, the Fund may also disclose your Information as described above to nonaffiliated third parties that perform marketing services on the Fund's behalf. The Fund does not engage in joint marketing.

To protect this Information, the Fund permits access only by authorized employees who need access to that Information in order to perform their jobs. The Fund uses security measures that comply with applicable law. These measures include computer safeguards and secured files and buildings.

The Fund's privacy policy applies only to its individual registered shareholders. If you are the record holder of shares of the Fund through a third-party broker, bank or other financial institution, that institution's privacy policies will apply to you and the Fund's privacy policy will not.

If you have any questions, please call the Fund's transfer agent at 1-877-295-6932.

Dated June 15, 2021

Additional Information (unaudited) (continued)

Portfolio Information

The Fund files its complete schedule of portfolio holdings with the Securities and Exchange Commission (“SEC”) for the first and third quarters of each fiscal year on Form N-Q or Part F of Form N-PORT. The filings are available (1) by calling 1-800-468-6475 or by emailing investor.query@newirelandfund.com; (2) on the Fund’s website located at <http://www.newirelandfund.com>; (3) on the SEC’s website at <http://www.sec.gov>.

Proxy Voting Information

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities held by the Fund is available, without charge and upon request, by calling 1-800-468-6475 or by emailing investor.query@newirelandfund.com. This information is also available from the EDGAR database or the SEC’s website at <http://www.sec.gov>. Information regarding how the Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 is available, without charge and upon request, by calling 1-800-468-6475 or by emailing investor.query@newirelandfund.com, and at <http://www.sec.gov>.

Certifications

The Fund’s president has certified to the New York Stock Exchange (“NYSE”) that, as of July 1, 2021, he was not aware of any violation by the Fund of applicable NYSE corporate governance listing standards. The Fund’s reports to the SEC on Forms N-CSR and N-CSRS contain certifications by the Fund’s principal executive officer and principal financial officer that relate to the Fund’s disclosure in such reports and that are required by rule 30a2(a) under the Investment Company Act.

Tax Information

For the fiscal year ended October 31, 2021, the Fund has designated ordinary income and long-term capital gains of \$331,005 and \$1,165,631, respectively.

Fund Investment Objectives, Policies and Risks

Recent Changes

The following information is a summary of certain changes since October 31, 2020. This information may not reflect all of the changes that have occurred since you purchased the Fund.

During the Fund’s most recent fiscal year, there were no material changes in the Fund’s investment objective or policies that have not been approved by shareholders or in the principal risk factors associated with investment in the Fund.

Investment Objective and Policies

The Fund's investment objective is long-term capital appreciation through investment primarily in equity securities of Irish companies. The Fund's investment objective is fundamental and may not be changed without the approval of a majority of the Fund's outstanding voting securities.

Under normal circumstances, the Fund invests at least 80% of its total assets in Irish equity and fixed income securities. For purposes of this 80% investment policy, a security is considered to be an Irish security if: (i) it is issued by an issuer that is organized under the laws of, or has its principal office in, Ireland; (ii) its principal securities trading market is in Ireland; and/or (iii) it is issued by an issuer that alone or on a consolidated basis derives the majority of its annual revenue or earnings or assets from goods produced, sales made or services performed in Ireland. The Fund's 80% investment policy is a non-fundamental policy of the Fund and may be changed by the Fund's Board of Directors (the "Board") upon 60 days' prior written notice to shareholders.

As a matter of fundamental policy, the Fund will, under normal circumstances, invest at least 65% of its total assets in equity securities of issuers organized under the laws of Ireland ("Irish Companies"), including companies listed on the Irish Stock Exchange and companies not listed on any securities exchange, subject to the limitation described below. Fund assets not invested in Irish equity and fixed income securities may be invested in other types of securities, including equity and fixed income securities of issuers from throughout the world, including emerging markets, regardless of whether such issuers are or may be affected by developments in the Irish economy or Ireland's international economic relations. The Fund may invest up to 25% of its total assets in equity securities that are not listed on any securities exchange. Equity securities in which the Fund may invest are predominantly common stock, but may include preferred stock and convertible stock. Fixed-income securities in which Fund may invest include government securities and corporate bonds, notes and debentures.

The Fund may invest in companies of any market capitalization. Unless otherwise indicated, the fixed income securities in which the Fund will invest will be rated BBB- or better by Standard & Poor's Corporation or Baa3 or better by Moody's Investors Service, Inc. or, if not so rated, of equivalent investment quality as determined by KBI Global Investors (North America) Ltd, the Fund's investment adviser (the "Adviser"). The Fund may invest in fixed income securities of any maturity or duration. The credit quality of fixed income securities is measured at the time of purchase. If a fixed income security is downgraded, the Adviser will evaluate whether to sell the security.

The Adviser employs a fundamental bottom-up approach to seek to identify attractive investment opportunities. The Adviser considers a range of metrics, including price to equity ratio, earnings per share growth, price/book and dividend yield to screen and highlight investment opportunities which may be assessed through fundamental research. The Adviser believes, however, that a strong discipline of top down macro-economic analysis and input is also required as part of the process.

For temporary defensive purposes, the Fund may depart from its investment policies during periods in which changes in the Irish securities markets or other economic or political conditions in Ireland warrant. The Fund may reduce its position in

Additional Information (unaudited) (continued)

equity securities and increase its position in fixed income securities, which may include government securities, short-term indebtedness or cash equivalents denominated in euro, Sterling Pounds, U.S. Dollars or the currency of any other member country of the Organization for Economic Cooperation and Development. The Fund may also at any time temporarily invest funds in U.S. Dollar-denominated money market instruments as reserves for dividends and other distributions to shareholders.

It is the Fund's policy to sell any security whenever, in the judgment of the Adviser, its appreciation possibilities have been substantially realized or the business or market prospects for such security have deteriorated, irrespective of the length of time that such security has been held.

The Fund may employ various hedging and risk management techniques, primarily to protect against a decrease in the U.S. Dollar-equivalent value of its foreign currency portfolio securities or the payments thereon that may result from an adverse change in foreign currency exchange rates. Conditions in the securities, futures, options and foreign currency markets will determine whether and under what circumstances the Fund will employ certain techniques or strategies. The Fund's ability to pursue certain of these strategies may be limited by applicable regulations of the Commodity Futures Trading Commission and the federal tax requirements applicable to regulated investment companies.

The Fund's investment objective and policy of investing at least 65% of its total assets in equity securities of Irish Companies set forth above are fundamental policies that may not be changed without the approval of a majority of the Fund's outstanding voting securities. The Fund's investment policies that are not designated fundamental policies may be changed by the Board without shareholder approval.

Risk Factors

This section contains a discussion of the general risks of investing in the Fund. The value of the Fund's assets, as well as the market price of its shares, will fluctuate. You can lose money on your investment. Investing in the Fund involves other risks, including the following:

General. The Fund is a non-diversified, closed-end investment company designed primarily as a long-term investment and not as a trading tool. The Fund invests primarily in equity securities of Irish Companies. An investment in the Fund's Shares may be speculative and involves a high degree of risk. The Fund should not be considered a complete investment program. Due to the uncertainty in all investments, there can be no assurance that the Fund will achieve its investment objective.

Investment and Market Risk. An investment in the Fund's shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in shares represents an indirect investment in the securities owned by the Fund. The value of these securities, like other market investments, may move up or down, sometimes rapidly and unpredictably. The value of the securities in

Additional Information (unaudited) (continued)

which the Fund invests will affect the value of the shares. Your shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Equity Risk. The value of equity securities, including common stock, preferred stock and convertible stock, will fluctuate in response to factors affecting the particular company, as well as broader market and economic conditions. Moreover, in the event of the company's bankruptcy, claims of certain creditors, including bondholders, will have priority over claims of common stock holders such as the Fund and are likely to have varying types of priority over holders of preferred and convertible stock. In addition, the Fund's portfolio is subject to the risks associated with growth stocks. Growth stock prices may be more sensitive to changes in current or expected earnings than the prices of other stocks, and growth stocks may not perform as well as value stocks or the stock market in general.

Irish Securities Risk. Because the Fund's investments are primarily in Irish securities, the Fund is particularly vulnerable to loss in the event of adverse political, economic, financial and other developments that affect Ireland, including fluctuations of the euro versus the U.S. dollar. The Irish securities markets are relatively small, with the majority of market capitalization and trading volume concentrated in a limited number of Irish Companies representing a small number of industries. This may cause the Fund's investment portfolio to experience greater price volatility, lower liquidity and less diversity than a portfolio invested in equity securities of companies based in the United States. In addition, Ireland's economy is heavily dependent on exports to certain key trading partners, including the United States, the United Kingdom and other Western European countries. During the financial crisis (2008 – 2012), Ireland's financial institutions were severely under-capitalized and required government intervention to survive. The European financial markets experienced volatility and adverse trends for some years earlier this decade, due to concerns about economic downturns or rising government debt levels in several European countries. If these events recur, they could adversely affect the exchange rate of the euro and could significantly affect every country in Europe, including Ireland.

Foreign Securities Risk. In addition to foreign currency risks, investments in non-U.S. securities involve risk of loss in the event of tax increases or adverse political, economic or diplomatic developments in Ireland or other non-U.S. jurisdictions. The Irish securities market, as well as other non-U.S. securities markets, for both listed and unlisted securities may be more volatile and less liquid than the major U.S. markets, and investing in non-U.S. securities may involve greater costs plus more uncertainty regarding legal protections. Regulatory oversight of markets and custody facilities may differ from that in the U.S.

Currency Exchange Rate Fluctuations. The Fund invests substantially in instruments denominated in foreign currencies — primarily the euro. However, the Fund may also invest in securities denominated in other foreign currencies. Fluctuations in the value of these non-U.S. currencies relative to the U.S. dollar can adversely affect the U.S. dollar value of the Fund's assets. A decline in the value of such a foreign currency can require the Fund to liquidate portfolio securities to pay distributions previously

Additional Information (unaudited) (continued)

calculated in U.S. dollars and can increase the relevant foreign currency cost of expenses incurred in U.S. dollars. Currency exchange losses can reduce or eliminate the Fund's ability to make ordinary income distributions.

Foreign Custody Risk. The Fund's custodian generally holds the Fund's non-U.S. securities and cash in non-U.S. bank sub-custodians and securities depositories — generally in Ireland. Regulatory oversight of non-U.S. banks and securities depositories may differ from that in the U.S. Additionally, laws applicable to non-U.S. banks and securities depositories may limit the Fund's ability to recover its assets in the event the non-U.S. bank, securities depository or issuer of a security held by the Fund goes bankrupt.

European Economic Risk. The European financial markets experienced volatility and adverse trends for some years earlier this decade due to concerns about economic downturns in, or rising government debt levels of several European countries. If these events recur, they may affect the value and liquidity of certain of the Fund's investments.

In addition, the United Kingdom has withdrawn from the European Union (the "EU"), and one or more countries may withdraw from the EU and/or abandon the Euro, the common currency of the EU. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far reaching.

Emerging Market Risk. The Fund may invest in emerging market securities in accordance with its investment objective and policies. The term "emerging market" refers to an economy that is in the initial stages of industrialization and has been historically marked by low per capita income and lack of capital market transparency, but appears to be implementing political and/or market reforms resulting in greater capital market transparency, increased access for foreign investors and generally improved economic conditions. Emerging markets tend to be more volatile than mature markets, and as a result, the Fund's value could move sharply up or down. The risks that apply to foreign investments are magnified in emerging market investments. The registration and settlement arrangements for securities in emerging markets may be less developed than in more mature markets so the operational risks of investing are higher. Emerging market countries may have less stable governments, more volatile currencies and less established markets than do countries with more developed economies. Political risks and adverse economic circumstances are more likely to arise.

Unlisted Securities Risk. The Fund may invest up to 25% of its total assets in unlisted equity securities that are neither listed on a stock exchange nor traded over-the-counter. Because the market for unlisted securities is not liquid, it may be difficult for the Fund to sell these securities at a desirable price. Unlisted securities are not subject to the disclosure and other investor protection requirements of Irish law applicable to listed securities. Investing in unlisted securities may involve a high degree of business and financial risk that can result in substantial losses.

Small and Mid-Capitalization Company Risk. Companies with small or mid-size market capitalizations will normally have more limited product lines, markets and financial resources and will be dependent upon a more limited management group than larger capitalized companies. In addition, it is more difficult to get information on

Additional Information (unaudited) (continued)

smaller companies, which tend to be less well known, have shorter operating histories, do not have significant ownership by large investors and are followed by relatively few securities analysts.

Credit Risk. Investments in fixed income securities expose the Fund to credit risk. Credit risk is the risk that one or more of the Fund's investments in fixed income securities will decline in price, or fail to pay interest, liquidation value or principal when due, because the issuer of the obligation experiences an actual or perceived decline in its financial status. Credit risk is influenced by changes in general economic and political conditions and changes in the financial condition of the issuers.

Interest Rate Risk. Generally, when market interest rates rise, the prices of fixed income securities fall, and vice versa. Interest rate risk is the risk that fixed income securities in the Fund's portfolio will decline in value because of increases in market interest rates. This risk may be particularly acute because market interest rates are currently at historically low levels. The prices of long-term fixed income securities generally fluctuate more than prices of short-term fixed income securities as interest rates change. During periods of rising interest rates, the average life of certain types of securities may be extended due to slower than expected payments.

This may lock in a below market yield, increase the security's duration and reduce the security's value. Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security's price to changes in interest rates. The longer a security's duration, the more sensitive it will be to changes in interest rates.

Derivatives Risk. The Fund may invest in derivatives, such as options, futures and forward currency exchange contracts. The primary risk of derivatives is the same as the risk of the underlying asset, namely that the value of the underlying asset may increase or decrease. Adverse movements in the value of the underlying asset can expose the Fund to losses. In addition, risks in the use of derivatives include:

- an imperfect correlation between the price of derivatives and the movement of the securities prices, interest rates or currency exchange rates being hedged or replicated;
- the possible absence of a liquid secondary market for any particular derivative at any time;
- the potential loss if the counterparty to the transaction does not perform as promised;
- the possible need to defer closing out certain positions to avoid adverse tax consequences, as well as the possibility that derivative transactions may result in acceleration of gain, deferral of losses or a change in the character of gain realized;
- the risk that the financial intermediary "manufacturing" the over-the-counter derivative, being the most active market maker and offering the best price for repurchase, will not continue to create a credible market in the derivative;

Additional Information (unaudited) (continued)

- because certain derivatives are “manufactured” by financial institutions, the risk that the Fund may develop a substantial exposure to financial institution counterparties; and
- the risk that a full and complete appreciation of the complexity of derivatives and how future value is affected by various factors including changing interest rates, exchange rates and credit quality is not attained.

There is no guarantee that derivatives will provide successful results and any success in their use depends on a variety of factors including the ability of the Adviser to predict correctly the direction of interest rates, securities prices, currency exchange rates and other factors.

Management Risk. The Adviser’s judgment about the attractiveness, relative value or potential appreciation of a particular security or investment strategy may prove to be incorrect. To the extent the Fund invests in Irish Companies that have limited business activities in Ireland, or in non-Irish Companies that have no economic ties to Ireland, its performance may diverge, perhaps materially, from the performance of the Irish economy and securities markets, and the Fund may be exposed to the risks of countries in which these companies are located or have their principal business activities.

Conflicts of Interest Risk. The Adviser’s advisory fees are based on net assets. Consequently, the Adviser will benefit from an increase in the Fund’s net assets resulting from an offering. In addition, a Director who is an “interested person” (as such term is defined under the Investment Company Act of 1940) of the Fund or a portfolio manager of the Fund could benefit indirectly from an offering because of such affiliations.

Non-Diversified Status. As a “non-diversified” investment company, the Fund can invest more of its assets in fewer issuers than an investment company that is “diversified,” exposing the Fund to greater risk.

Share Repurchases. When the Fund repurchases its shares pursuant to the Fund’s share repurchase program, the resulting decrease in shares outstanding may increase the Fund’s expense ratio; any borrowing to finance repurchases would reduce net income; and any sales of portfolio securities to finance repurchases may not be at a preferred time from a portfolio management perspective and would increase portfolio turnover and related expenses.

Tax Risk. The Fund may invest in securities for which the federal income tax treatment may not be clear or may be subject to recharacterization by the Internal Revenue Service (the “IRS”). It could be more difficult for the Fund to comply with the United States tax requirements applicable to regulated investment companies, or with other tax requirements applicable to foreign investors, if the tax characterization of the Fund’s investments or the tax treatment of the income from such investments were successfully challenged by the IRS.
