(I.R.S. Employer  
Identification No.)

555 Maryville University Drive  
Suite 400  
St. Louis, Missouri 63141  
(Address of principal executive offices, including zip code)  
(314) 216-2600  
(Registrant's telephone number, including area code)

**Securities registered pursuant to Section 12(b) of the Act:**

| Title of each class                | Trading Symbol(s) | Name of each exchange on which registered |
|------------------------------------|-------------------|---|
| Common, par value \$0.01 per share | HBP               | The NASDAQ Stock Market LLC               |

**Securities registered pursuant to Section 12(g) of the Act: None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See definition of "large accelerated filer", "accelerated filer", "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act: Large Accelerated Filer  Accelerated Filer  Non-Accelerated Filer  Smaller Reporting Company  Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The aggregate market value of the Common Stock held by non-affiliates of the registrant as of the last business day of the quarter ended June 30, 2019 was approximately \$63 million. For purposes of this calculation only, the registrant has excluded stock beneficially owned by the registrants' directors and officers. By doing so, the registrant does not admit that such persons are affiliates within the meaning of Rule 405 under the Securities Act of 1933 or for any other purposes.

The number of shares of Common Stock outstanding on February 18, 2020 was 26,823,683 shares.

**DOCUMENTS INCORPORATED HEREIN BY REFERENCE.**

Parts of the registrant's definitive proxy statement for the 2020 Annual Meeting of Stockholders are incorporated by reference in Part III of this Annual Report on Form 10-K.

**Cautionary Statement Relevant to Forward-Looking Information for the Purpose of “Safe Harbor” Provisions of the Private Securities Litigation Reform Act of 1995**

This annual report on Form 10-K (this “Annual Report”) and our annual report to stockholders contain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. The words or phrases “will likely result,” “are expected to,” “will continue,” “is anticipated,” “believe,” “estimate,” “project” or similar expressions may identify forward-looking statements, although not all forward-looking statements contain such words. Statements made in this Annual Report and our annual report to stockholders looking forward in time, including, but not limited to, statements regarding our current views with respect to financial performance, future growth in the housing market, distribution channels, sales, favorable supplier relationships, inventory levels, the ability to meet customer needs, enhanced competitive posture, strategic initiatives, financial impact from litigation or contingencies, including environmental proceedings, are included pursuant to the “safe harbor” provision of the Private Securities Litigation Reform Act of 1995.

These statements present management’s expectations, beliefs, plans and objectives regarding our future business and financial performance. We cannot guarantee that any forward-looking statements will be realized or achieved. These forward-looking statements are based on current projections, estimates, assumptions and judgments, and involve known and unknown risks and uncertainties. We disclaim any obligation to publicly update or revise any of these forward-looking statements, whether as a result of new information, future events or otherwise.

There are a number of factors, some of which are beyond our control that could cause our actual results to differ materially from those expressed or implied in the forward-looking statements. These factors include, but are not limited to: the success of our growth initiatives; expansion of the Huttig-Grip product line; the strength of new construction, home improvement and remodeling markets and the recovery of the homebuilding industry to levels consistent with the historical average total housing starts from 1959 to 2019 of approximately 1.4 million starts based on statistics tracked by the U.S. Census Bureau (“Historical Average”); the cyclical nature of our industry; our ability to comply with, and the restrictive effect of, the financial covenant applicable under our credit facility; risks of international suppliers; global health concerns; product liability claims and other legal proceedings; commodity prices; stock market volatility; stockholder activist disruption; current or future litigation; information technology failures, network disruptions, cybersecurity attacks or breaches in data security; termination of key supplier relationships; our failure to attract and retain key personnel; goodwill impairment; deterioration of our customers’ creditworthiness or our inability to forecast such deteriorations; the loss of a significant customer; the cost of environmental compliance, including actual expenses we may incur to resolve proceedings we are involved in arising out of a formerly owned facility in Montana; competition with existing or new industry participants; deterioration in our relationship with our unionized employees, including work stoppages or other disputes; funding requirements for multi-employer pension plans for our unionized employees; significant uninsured claims; the integration of any business we acquire and the liabilities of such businesses; the seasonality of our operations; federal and state transportation regulations; fuel cost increases; any limitations on our ability to utilize our deferred tax assets to reduce future taxable income and tax liabilities; risks associated with our private brands; uncertainties resulting from changes to United States and foreign laws, regulations and policies; the potential impact of changes in tariff costs, including tariffs on imported steel and aluminum, and potential anti-dumping or countervailing duties; and those factors set forth under Part I, Item 1A – “Risk Factors.” These factors may not constitute all factors that could cause actual results to differ from those discussed in any forward-looking statement. Accordingly, forward-looking statements should not be relied upon as a predictor of actual results.

**ITEM 1—BUSINESS**

**General**

In this Annual Report, when we refer to “Huttig,” the “Company,” “we” or “us,” we mean Huttig Building Products, Inc. and its subsidiary unless the context indicates otherwise.

Huttig Building Products, Inc., a Delaware corporation incorporated in 1913, was founded in 1885 and is a leading domestic distributor of millwork, building materials and wood products used principally in new residential construction and in-home improvement, remodeling and repair work. We purchase from leading manufacturers and distribute our products through 27 wholesale distribution centers serving 41 states. Our distribution centers sell principally to building materials dealers, national buying groups, home centers and industrial users, including makers of manufactured homes. For the year ended December 31, 2019, we generated net sales of \$812.0 million.

We conduct our business through a two-step distribution model. This means we purchase from manufacturers and resell the products to our customers, who then sell the products to end users, who are typically professional builders and independent contractors engaged in residential construction and remodeling projects, or consumers engaged in do-it-yourself remodeling projects.

Our products fall into three categories: (i) millwork, which includes doors, windows, moulding, stair parts and columns, (ii) general building products, which include connectors, fasteners, composite decking, housewrap, roofing products and insulation, and (iii) wood products, which include engineered wood products, such as flooring systems, as well as wood panels and lumber.

Doors and engineered wood products often require our value-added service before they are delivered to our customers. Such services include pre-finishing exterior door units, pre-hanging exterior and interior door units and cutting engineered wood products from standard lengths to job-specific requirements. In addition, with respect to the majority of our products, we have the capability to buy in bulk and disaggregate these large shipments to meet individual customer stocking requirements. For some products, we carry a depth and breadth of products that our customers and vendors cannot reasonably stock themselves. Likewise, our vendors benefit from our broad geographic footprint of distribution centers enabling them to supply a broader breadth of products and cost-effectively reach a greater number of end users. Many of the value-added services we provide are highly customized and cannot be provided effectively by our vendors. In addition, our sales force extends our vendors’ effective coverage area and knowledge of regional trends. Our customers benefit from our business capabilities because they do not need to invest capital in door hanging facilities or cutting equipment, nor do they need to incur the costs associated with maintaining large inventories of products. Our size, broad geographic presence, extensive fleet and logistical capabilities often enable us to purchase products in large volumes at favorable prices, stock a diverse range of products for rapid delivery and manage inventory in a reliable, efficient manner.

We serve our customers, whether they are a local dealer or national account, through our 27 wholesale distribution centers. Our broad geographic footprint enables us to work with our customers and suppliers to ensure that local inventory levels, merchandising, purchasing and pricing are tailored to the requirements of each market. Each distribution center also has access to our single-platform nationwide inventory management system. This provides the local manager with real-time inventory availability and pricing information. We support our distribution centers with credit and financial management, training and marketing programs and human resources expertise. We believe that these distribution capabilities and efficiencies provide a competitive advantage that allows us to deliver quality products in a timely manner and allow for the efficient operation of our customers’ and vendors’ supply chain, as compared to many local and regional competitors.

**Industry Characteristics and Trends**

The residential building materials distribution industry is characterized by its substantial size, a highly fragmented ownership structure and an increasingly competitive environment. The industry serves two market categories: (i) new residential construction and (ii) home improvement, repair and remodeling.

Residential construction activity in both categories is closely linked to a variety of factors directly affected by general economic conditions, including employment levels, job and household formation, interest rates, housing prices, housing inventory, tax policy, availability of mortgage financing, prices of commodity wood and steel products, immigration patterns, regional demographics and consumer confidence. We monitor a broad set of macroeconomic and regional indicators, including new housing starts and permit issuances, as indicators of our potential future sales volume.

New housing activity in the United States has shown modest improvement each year since 2009, the trough period of the housing downturn. However, 2019 activity was still below the Historical Average of total housing starts of approximately 1.4 million. Total new housing starts in the United States were approximately 1.3 million, 1.3 million and 1.2 million in 2019, 2018 and 2017, respectively. Total new single family housing starts were 0.9 million, 0.9 million and 0.8 million in 2019, 2018 and 2017, respectively, based on data from the U.S. Census Bureau.

We service large local, regional and national independent building products dealers, specialty dealers, and home centers who in turn sell to contractors, professional builders, and consumers. These large local, regional and national building products dealers, often referred to as “pro dealers,” continue to distribute a significant portion of the residential building materials sold in the United States. These pro dealers operate in an increasingly competitive environment. Consolidation among building products manufacturers favors distributors that can buy in bulk and break down large production runs to specific local requirements. In addition, increasing scale and sophistication among professional builders and contractors places a premium on pro dealers that can make a wide variety of building products readily available at competitive prices. In response to the increasingly competitive environment for building products, many pro dealers have either consolidated or formed buying groups in order to increase their purchasing power and/or service levels.

We service national home centers through special order programs of branded products in both millwork and building products. These programs continue to grow each year, as manufacturers develop special order programs for these retailers and utilize our value-added service model and broad distribution network to support the programs locally.

We believe the evolving characteristics of the residential building materials distribution industry, particularly the consolidation trend, favor companies like us that operate nationally and have significant infrastructure in place to accommodate the needs of customers across geographic regions. We believe we are the only national distributor of millwork products. Our wide geographic presence, size, purchasing power, material handling efficiencies and investment in millwork services position us well to serve the needs of the consolidating pro dealer community.

### **Strategic Initiatives**

Our strategy is to increase stockholder value through the growth and diversification of our business. To accomplish this, we have developed strategic initiatives that require investments in our infrastructure, our people and technology platform. Our goals are to accelerate our growth and diversify our business, which we believe will improve operating leverage over the intermediate term.

To accelerate our growth and diversification, we have made strategic capital and operating investments to execute our product line expansion and market segment penetration organic growth initiatives. The national expansion of our Huttig-Grip product line, which is sourced both domestically and internationally, expands the breadth and geographic coverage of our private label specialty building product lines. Through our investments in automated, high-capacity, pre-finish door lines and segment-focused sales resources, further penetration of the home improvement, repair and remodel market diversifies our business to be less dependent on new home construction, reinforces our position as the largest, value-add door fabricator to the professional residential construction market in the country, and accelerates our growth in higher value, and higher gross margin products.

In addition to the above initiatives, we continue to invest in our organization to attract the best talent to achieve our goal of creating a top-performing, disciplined organization with talented, engaged, and empowered people. We also continue to invest in our technology platform to achieve improved operating efficiencies in the

functional areas of the business while delivering advanced customer interface technology to make Huttig the clear supplier of choice for the products we sell.

## Products

We strive to offer products that allow us to provide value to our customers. We accomplish this by performing incremental services on the products before delivering them to customers, buying products in bulk and disaggregating them for individual customers, or carrying a depth and breadth of products that customers cannot reasonably stock themselves at each location. Our products can be classified into three main categories:

- Millwork, including exterior and interior doors, pre-hung and factory-finished door units, windows, patio doors, mouldings, frames, stair parts and columns. Key brands in this product category include Therma-Tru, Masonite, Woodgrain, HB&G, Simpson Door, Final Frame, BrasPine, Arauco, Windsor Windows and Rogue Valley Door;
- General building products, such as fasteners and connectors, roofing, siding, insulation, flashing, housewrap, decking, railing and other miscellaneous building products. Key brands in this product category include Huttig-Grip, Louisiana-Pacific, Simpson Strong-Tie, TimberTech, AZEK, RDI, GAF Roofing, Maibec, Knauf, GCP Technologies, Fiberon, Alpha Protech, MFM, Lomanco and Fortifiber; and
- Wood products, including engineered wood used in floor systems, wood panels and lumber. The engineered wood product line offers us the ability to provide our customers with value-added services, such as floor system take-offs, cut-to-length packages and just-in-time, cross-dock delivery capabilities. As such, engineered wood is our primary focus within this category. Key brands in this product category include Louisiana-Pacific and Rosboro.

The following table shows the percentage of our net sales represented by our three main product categories for each of the prior three years. Changes in commodity pricing, products and unit volumes could affect our product mix on a year-to-year basis.

|                   | 2019 | 2018 | 2017 |
|-------------------|------|------|------|
| Millwork          | 47%  | 48%  | 51%  |
| Building Products | 45%  | 43%  | 40%  |
| Wood Products     | 8%   | 9%   | 9%   |

## Customers

During 2019, we served approximately 3,500 customers, with one customer, Lumbermen's Merchandising Corporation ("LMC") accounting for 15% of our sales in 2019, and 14% of our sales in each of 2018 and 2017. LMC is a buying group representing multiple building material dealers. Our top 10 customers accounted for approximately 44% of our total sales in 2019.

Building materials pro dealers represent our single largest customer group. Within the pro dealer category, a large percentage of our sales are to national accounts, including buying groups. These are large pro dealers, or groups of pro dealers, that generally operate in more than one state or region. We also sell to short line specialty dealers that focus on specific segments of the building industry, national retail home centers, and manufactured housing. We believe that our size, which lets us purchase in bulk, achieve operating efficiencies, operate on a national scale, and offer competitive pricing, makes us well suited to service the various segments of the dealer community. Our sales to national accounts, including buying groups, were 48% in 2019 and 49% in both 2018 and 2017.

## Organization

Huttig operates on a nationwide basis. Customer sales are conducted through 27 distribution centers serving 41 states. Administrative and executive management functions are centralized at our headquarters located in

St. Louis, Missouri. We believe this structure allows us to serve our customers better through closer proximity to their operations, while being able to take advantage of certain efficiencies of scale that come from our size.

Headquarter functions include those activities that can be shared across our full distribution platform. These include financial management, information technology, human resources, legal, international procurement, internal audit and treasury, along with corporate operations, marketing and product management groups.

Operating responsibility resides with each distribution center's general manager. The general manager is responsible for daily operations, including sales, purchasing, personnel and logistics. Each distribution center generally maintains its own sales, warehouse and logistics personnel supported by a small administrative team.

## **Sales**

Sales responsibility principally lies with general managers at our distribution centers. The sales function is generally divided into two channels: outside sales and inside sales. Our outside field representatives make on-site calls to local and regional customers. Our inside sales people generally receive and enter orders from customers and support our outside sales function. In addition, we maintain a national account sales team to serve national customers. Our outside sales force is generally compensated by a base salary, or draw plus commissions determined primarily on profit margin.

## **Distribution Strategy and Operations**

While we believe a nationwide reach is critical, the local distribution center is still the principal focus of our operations, and we tailor our business to meet local demand and customer needs. We customize product selection, inventory levels, service offerings and prices to meet local market requirements. With the exception of one distribution center, we support this strategy through our single platform information technology system. This system provides real-time access to pricing, inventory availability, margin analysis and product information both by location and for our entire network of distribution centers. More broadly, our sales force, in conjunction with our product management teams, works with our suppliers and customers to determine the appropriate mix, quantity and pricing of products suited to each local market.

We purchased products from over 700 different suppliers in 2019. We generally negotiate with our major suppliers on a national basis to leverage our total volume purchasing power, which we believe provides us with an advantage over our locally-based competitors. The majority of our purchases are made from suppliers that offer payment discounts and volume-related incentive programs. Although we generally do not have exclusive distribution rights for our key products and we do not have long-term contracts with many of our suppliers, we believe our national footprint, buying power and distribution network make us an attractive distributor for many manufacturers. Moreover, our long operating history has allowed us to forge long-standing relationships with many of our key suppliers who rely on us as a critical part of their supply chain.

We regularly evaluate opportunities to introduce new products. This is primarily driven by opportunities created by customer demand or market requirements. We have found that customers generally welcome a greater breadth of product offering as it can improve their purchasing and operating efficiencies by providing "one stop" shopping. Similarly, selectively broadening our product offering enables us to drive additional products through our distribution system, thereby increasing the efficiency of our operations by better leveraging our existing infrastructure. The benefit created by this operating leverage may be offset by the cost to establish the new product line, expand our facilities and purchase the inventory. Beginning in 2017, we expanded the scope of our international sourcing activities for our private label products which offers the opportunity to increase margins, but the longer lead-times on internationally sourced products also generally require an increased investment in inventory. We are also investing in automated, high-capacity, pre-finish door lines and focusing sales resources for further penetration of the home improvement, repair and remodel market.

We focus on selling respected, brand name products. We believe that brand awareness is an important factor in building products purchasing decisions. We generally benefit from the quality, marketing initiatives and product support provided by manufacturers of branded products. We also benefit from the positive attributes that customers

typically equate with branded products. Additionally, we market and offer certain products under our private label brands, including Huttig-Grip. We believe that these products are attractive to our customers based on their quality and competitive pricing.

## **Competition**

We compete with many local and regional building product distributors and, in certain markets and product categories, with national building product distributors. We distribute products for some manufacturers that also engage in direct sales.

The principal factors on which we compete are pricing, product availability, service and delivery capabilities, ability to assist with problem solving, customer relationships, geographic coverage and breadth of product offerings.

Our size and geographic coverage are advantageous in obtaining and retaining distribution rights for brand name products. Our size also permits us to attract experienced sales and service personnel and gives us the resources to provide company-wide sales, product and service training programs. By working closely with our customers and suppliers and utilizing our single information technology platform, we believe our distribution centers are well positioned to maintain appropriate inventory levels and to deliver completed orders on time.

## **Seasonality, Market Conditions and Working Capital**

Various cyclical and seasonal factors, such as general economic conditions and weather, historically have caused our results of operations to fluctuate from period to period. Specifically, these factors include levels of new construction, home improvement and remodeling activity, weather, interest rates and other local, regional and national economic conditions. Our size, extensive nationwide operating model, and the geographic diversity of our distribution centers to some extent mitigate our exposure to these cyclical and seasonal factors.

Our results of operations are affected by new housing activity in the United States. In 2019, total housing starts increased approximately 3%, to 1.3 million, but were still below the Historical Average of approximately 1.4 million. Based on the current level of housing activity and industry forecasts, we expect new housing activity to continue its moderate increase in 2020, but we cannot be certain.

We anticipate that fluctuations from period to period will continue in the future. Our results in the first and fourth quarters are generally adversely affected by winter weather patterns in the Northeast, Midwest and Northwest regions of the United States, typically due to seasonal decreases in levels of construction activity in these areas. Because much of our overhead and expenses remain relatively fixed throughout the year, our operating profits also tend to be lower during the first and fourth quarters. In addition, weather patterns, such as hurricane season in the Southeast region of the United States during the third and fourth quarters, can have an adverse impact on our results in a particular period.

We depend on cash flow from operations and funds available under our revolving credit facility to finance seasonal working capital needs, capital expenditures, investments in our product lines, including Huttig-Grip, and any acquisitions we may undertake. Typically, our working capital requirements are greatest in the second and third quarters, due to the seasonal nature of our business. The second and third quarters also tend to be our strongest operating quarters, largely due to more favorable weather throughout many of our markets compared to the first and fourth quarters. We typically generate cash from working capital reductions in the fourth quarter of the year and build working capital during the first quarter in preparation for our second and third quarters. We also maintain significant inventories to meet the rapid delivery requirements of our customers and to enable us to obtain favorable pricing, delivery and service terms with our suppliers. In 2019, our working capital was impacted significantly as we continued to invest in inventory related to the growth of our Huttig-Grip product line. We source our private label product internationally and domestically. Sourcing Huttig-Grip products internationally requires longer lead-times and higher inventory levels to ensure available supply, but it also provides the opportunity for higher margins. Generally, internationally-sourced products are financed upon shipment from the port of origin, thus resulting in lower levels of accounts payable.

As a percentage of total current assets, inventories were 65% and 61% and accounts receivable were 28% and 32%, each respectively at December 31, 2019 and 2018. We also closely monitor operating expenses and inventory levels during seasonally affected periods and, to the extent possible, manage variable operating costs to minimize seasonal effects on our profitability.

### **Credit**

Huttig maintains an overall credit policy for sales to customers and delegates responsibility for most credit decisions to regional credit personnel. Our credit policies, together with careful monitoring of customer balances, have resulted in bad debt expense of less than 0.2% of revenue in each of 2019, 2018 and 2017. Approximately 99% of our sales in 2019 were to customers to whom we had provided credit for those sales.

### **Backlog**

Our customers generally order products on an as-needed basis. As a result, a substantial portion of product shipments in a given fiscal quarter result from orders received in that same quarter. Consequently, order backlog represents only a very small percentage of the product sales that we anticipate in a given quarter and is not necessarily indicative of actual sales for any future period.

### **Trade Names**

Historically, Huttig has operated under various trade names in the markets we serve, retaining the names of acquired businesses for a period of time to preserve local identification, including our acquisition of BenBilt Building Systems LP (“BenBilt”) in April 2016. To capitalize on our national presence, all of our distribution centers operate under the primary trade name “Huttig Building Products” with the exception of BenBilt. Huttig has no material patents, trademarks, licenses, franchises or concessions other than BenBilt®, Endocote Finishing System®, the Huttig Building Products® name and logo, Huttiguard®, Huttig-Guard®, Huttig-Guard Pro®, Huttig-Guard Premium®, Huttig-Guard Platinum®, No-Split®, Huttig-Grip®, and Huttig-Spin® which are registered trademarks.

### **Employees**

As of December 31, 2019, we employed approximately 1,364 people, of which approximately 13% were represented by one of eight unions. We have not experienced any significant strikes or other work interruptions in recent years and have maintained generally favorable relations with our employees.

### **Available Information**

We file with the U.S. Securities and Exchange Commission (“SEC”) quarterly and annual reports on Forms 10-Q and 10-K, respectively, current reports on Form 8-K and proxy statements pursuant to the Securities Exchange Act of 1934, as amended (the “1934 Act”), in addition to other information as required. We file this information with the SEC electronically, and the SEC maintains a website that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC at <http://www.sec.gov>.

Our website address is <http://www.huttig.com>. The contents of our website are not part of this Annual Report. We make available, free of charge on the “Investors” section of our website, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the 1934 Act. This information is available on our website as soon as reasonably practicable after we electronically file it with, or furnish it to, the SEC. Reports of beneficial ownership filed pursuant to Section 16(a) of the 1934 Act are also available through our website.

### **ITEM 1A—RISK FACTORS**

In addition to the other information contained in this Annual Report, the following risk factors should be considered carefully in evaluating our business. Our business, financial condition or results of operations could be

materially adversely affected by any of these risks. Please note that additional risks not presently known to us or that we currently deem immaterial may also impair our business and operations.

***We cannot assure the successful implementation of our growth initiatives.***

In connection with our growth initiatives, including the strategic initiatives described in Part I, Item 1 under the heading “Strategic Initiatives,” we have developed a long-term growth strategy with the objective of delivering sustainable, profitable growth and long-term value for our stockholders.

Our ability to successfully execute on our growth initiatives is subject to various risks and uncertainties. Although we believe that our growth strategy will lead to long-term growth in revenue and profitability, there can be no assurance regarding the timing of or extent to which we will realize the anticipated benefits, if at all. Further, the anticipated benefits from these efforts are based on several assumptions that may prove to be inaccurate. Our failure to realize the anticipated benefits, which may be due to our inability to execute on portions of our growth strategy or as a result of the impact of the other risks described herein, could have a material adverse effect on our business, financial condition, and results of operations.

In execution of our growth initiatives, we may experience higher-than-expected expenses without accompanying current revenues and, therefore, this strategy may be dilutive to our earnings in the short term or longer. Our growth initiatives also require a significant investment in working capital which could have a material adverse effect on our liquidity. There can be no assurance regarding the timing of or the extent to which we will realize the anticipated benefits of these investments in our Company and other costs, if at all.

Our growth initiatives require significant financial and other resources along with significant management attention, which could result in the diversion of these resources from our core business and other business issues and opportunities. Failure to manage growth effectively, or obtain necessary working capital to support our growth initiatives, could have a material adverse effect on our business, financial condition, and results of operations.

***Our growth initiatives require a significant investment in inventories, including new or expanded product lines which, if excessive, could negatively impact our results of operations and liquidity.***

Many of the products included in our growth initiatives are sourced internationally and represent newer or expanded product lines for the majority of our distribution centers. These initiatives are also designed to drive sales, including to new customers not historically serviced by us. If sales expectations are not met, or if the products we purchase do not readily sell, we may have excess or obsolete inventories, which could have a material adverse effect on our results of operations, financial position, and liquidity.

***Although the homebuilding industry has improved over recent years, any downturn from current construction levels could materially affect our business, liquidity and operating results.***

Our sales and results of operations depend heavily on the strength of national and local new residential construction and home improvement, repair and remodeling markets. The strength of these markets depends on new housing starts and residential remodeling projects, which are a function of many factors beyond our control. Some of these factors include general economic and political conditions, employment levels, job and household formation, interest rates, housing prices, housing inventory, tax policy, availability of mortgage financing, trade restrictions, sanctions and disputes, prices of commodity wood and steel products, government shutdowns, immigration patterns, regional demographics and consumer confidence.

New housing activity in the United States has shown modest improvement since 2009. However, 2019 activity of 1.3 million was still below the Historical Average of approximately 1.4 million starts. Based on the current level of housing activity and industry forecasts, we expect new housing activity to continue its moderate increase, but we cannot be certain. There can be no assurance that the U.S. housing market will grow and develop in a manner consistent with our expectations. A prolonged downturn in current construction levels or any significant downturn in the major markets we serve or in the economy in general could have a material adverse effect on our operating results, liquidity and financial condition, including but not limited to our ability to comply with the financial covenant under our credit facility and could cause an impairment due to the implied valuation of our goodwill. Reduced levels of construction activity may result in continued intense price competition among building materials suppliers, which may adversely affect our gross margins. Further, we extend credit to numerous customers

who are generally susceptible to the same economic business risks as we are. Adverse homebuilding market conditions could result in financial failures of one, or more, of our significant customers and we may not necessarily be aware of any deteriorations in our customers' position.

***The industry in which we compete is highly cyclical, and any cyclical market factors resulting in lower demand or increased supply could have a materially adverse impact on our financial results.***

The building products distribution industry is subject to cyclical market pressures caused by a number of factors that are beyond our control, such as general economic and political conditions, inventory levels of new and existing homes for sale, levels of new construction, home improvement and remodeling activity, interest rates and population growth. The supply of building products fluctuates based on available manufacturing capacity, and excess capacity in the industry can result in significant declines in market prices for those products. To the extent that cyclical market factors adversely impact overall demand for building products or the prices that we can charge for our products, our net sales and margins would likely decline in the same time frame as the cyclical downturn occurs. Because much of our overhead and expense is relatively fixed in nature, a decrease in sales and margin generally has a significant adverse impact on our business, financial condition, and results of operations. To the extent our customers experience downturns in their business, our ability to collect our receivables could be adversely affected. Finally, the unpredictable nature of the cyclical market factors that impact our industry make it difficult to forecast our operating results.

***If we are unable to meet the financial covenant under our credit facility, the lenders could elect to accelerate repayment of the outstanding balance and, in that event, we would be forced to seek alternative sources of financing.***

We fund our working capital by borrowing funds under a \$250.0 million asset-based senior secured revolving credit facility, which contains a minimum fixed charge coverage ratio ("FCCR") that is tested if our excess borrowing availability, as defined in the facility, reaches an amount in the range of less than \$17.5 million to \$31.3 million depending on our borrowing base at the time of testing. For 2019, the minimum FCCR was not required to be tested as excess borrowing availability was greater than the minimum threshold but, if we had been unable to maintain excess borrowing availability of more than the applicable amount in the range of \$17.5 million to \$31.3 million as required, we would not have met the minimum required FCCR at December 31, 2019. If in the future, we fail to meet the required FCCR and are unable to maintain excess borrowing availability of more than the applicable required amount, our lenders would have the right to terminate the loan commitments and accelerate the repayment of the entire amount outstanding under the credit facility. Our lenders also could foreclose on our assets that secure our credit facility. In that event, we would be forced to seek alternative sources of financing, which may not be available on terms acceptable to us or at all.

***Compliance with the restrictions and financial covenant under our credit agreement and changes in LIBOR may limit our borrowing availability and may limit management's discretion with respect to certain business matters.***

Borrowings under our credit agreement are collateralized by substantially all of our assets, including accounts receivable, inventory, real estate and equipment. We are also subject to certain operating limitations commonly applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends, stock repurchases and transactions with affiliates. A minimum FCCR must be tested on a pro forma basis prior to consummation of certain significant business transactions outside our ordinary course of business. These restrictions may limit management's ability to operate our business in accordance with management's discretion, which could limit our ability to pursue certain strategic objectives.

Borrowings under our credit agreement and other variable rate indebtedness may use the London Interbank Offering Rate ("LIBOR") as a benchmark for establishing the applicable interest rate. LIBOR is the subject of recent regulatory guidance and proposals for reform, which may cause LIBOR to cease to be used entirely or to perform differently than in the past. The consequences of these developments with respect to LIBOR cannot be entirely predicted but could result in an increase in the cost of our variable rate indebtedness causing a negative impact on

our financial position, liquidity and results of operations. See Part II, Item 7A—"Quantitative and Qualitative Disclosures about Market Risk" for additional information.

In addition, the growth in our business may cause us to seek additional financing or increase the size of the credit facility. If we are unable to obtain additional financing, our ability to grow may be limited which could negatively impact our overall operations.

***We use international sources for the production of certain of our products, which exposes us to certain additional risks.***

We use international vendors for the supply of certain products. Global sourcing and foreign trade involve numerous factors, uncertainties, and risks, some of which are beyond our control, including increased shipping costs, increased import duties, more restrictive quotas, loss of most favored nation trading status, currency fluctuation, work stoppages, transportation delays, port of entry issues, economic uncertainties such as inflation, foreign government regulations, political unrest, natural disasters, war, terrorism, trade restrictions, sanctions and disputes, political instability, the financial stability of vendors, merchandise quality issues, and tariffs and other import taxes. Additionally, products acquired from international sources are generally paid for before leaving the international port, and require longer lead times due to production scheduling and transit requirements, which can negatively impact our liquidity. Operating in the international marketplace requires us to comply with U.S. and foreign laws and regulations applicable to our foreign operations, such as the Foreign Corrupt Practices Act and its counterparts in other foreign jurisdictions in which we operate. Negative press or reports about internationally manufactured products, which have become increasingly prominent, may sway public opinion, and thus customer confidence, away from the products sold by us. These and other issues affecting our international operations and vendors could have a material adverse effect on our business, financial condition and results of operations.

The U.S. government frequently imposes new tariffs which have resulted in increased prices and could adversely affect our consolidated results of operations and financial position. Additionally, international sourcing of certain of our products may subject us to anti-dumping or countervailing duties imposed by the U.S. government in response to other countries dumping steel or aluminum products in the United States below fair market value. Anti-dumping or countervailing duties may increase the cost of our internationally sourced products imported into the United States, and in the case of retrospective application, we may become subject to additional costs for previously sourced products and unable to recoup the increased cost from international companies, all of which could have a material adverse impact on our financial condition or results of operations. The tariffs, along with any new or additional tariffs, trade restrictions or duties that are unpredictable but may be implemented by the United States or other countries, could result in increased prices and have an adverse effect on our results of operations.

***The impact of the coronavirus outbreak, or similar global health concerns, could negatively impact our ability to source certain products, impact product pricing, or have a negative impact on our business.***

Our use of international suppliers for production and shipping of certain products could be negatively impacted by the regional or global outbreak of illnesses, including the novel coronavirus. Any quarantines, labor shortages or other disruptions to our suppliers and their contract manufacturers or our customers would likely adversely impact our sales and operating results. In addition, a significant outbreak of epidemic, pandemic, or contagious diseases in the human population could result in a widespread health crisis that could adversely affect the economies and financial markets of many countries, resulting in an economic downturn that could affect the supply or demand for our products. Order lead times could be extended or delayed and pricing could increase. Some products or services may become unavailable if the regional or global spread were significant enough to prevent alternative sourcing. To date, the outbreak of coronavirus has not significantly impacted our operations, although we believe certain of our suppliers may have been negatively impacted. Accordingly, we are considering alternative product sourcing in the event that product supply becomes problematic. We are unable to predict the possible future effect on our Company if coronavirus or another such virus continues to expand globally.

***Product liability claims and other legal proceedings relating to the products we distribute may adversely affect our business and results of operations.***

As is the case with other companies in our industry, we face the risk of product liability and other claims of the type that are typical to our industry if use of products that we have distributed causes other damages. Product liability

claims in the future, regardless of their ultimate outcome and whether or not covered under our insurance policies or indemnified by our suppliers, which could be more difficult to enforce against our international suppliers, could result in costly litigation and have a material adverse effect on our business, financial condition, and results of operations.

***Fluctuation in prices of commodity wood and steel products that we buy and resell may have a significant impact on our results of operations.***

Changes in wood and steel commodity prices between the time we buy these products and the time we resell them have occurred in the past, and we expect fluctuations to occur again in the future. Such changes can adversely affect the gross margins we realize on the resale of the products. We may be unable to manage these fluctuations effectively or minimize any negative impact of these changes on our business, financial condition and results of operations. These prices may change as a result of, among other things, the risks described below with respect to our international sources of our products.

***The market price and liquidity of our securities are subject to volatility.***

The market price and liquidity of our common stock could be subject to wide fluctuations in response to numerous factors, many of which are beyond our control. These factors include, among other things, our limited trading volume, actual or anticipated variations in our operating results and cash flow, the nature and content of our earnings releases, announcements or events that impact our business and the general state of the securities market, as well as general economic, political and market conditions and other factors that may affect our future results. In 2019, the price of our common stock varied significantly. Stockholders may have incurred substantial losses with regard to any investment in our common stock, adversely affecting stockholder confidence.

***Stockholder activists could cause a disruption to our business.***

In recent years, stockholder activists have become involved in numerous public companies. Stockholder activists frequently propose to involve themselves in the governance, strategic initiatives and operations of public companies. Such proposals may disrupt our business and divert management and employee attention, and any perceived uncertainties as to our future direction resulting from such a situation could result in the loss of potential business opportunities, interfere with our ability to execute our growth initiatives, be exploited by our competitors, cause concern to our current or potential customers, and make it more difficult to attract and retain qualified personnel and business partners, all of which could adversely affect our operations. In addition, a proxy contest for the election of directors at our annual meeting could require us to incur significant legal fees and proxy solicitation expenses. Actions of activist stockholders may cause significant fluctuations in our stock prices based on temporary or speculative market perceptions or other factors that do not necessarily reflect the underlying fundamentals and prospects of our business.

***Current or future litigation and regulatory actions could have a material adverse impact on us.***

From time to time, we are subject to litigation and other legal and regulatory proceedings relating to our business. No assurance can be given that the results of these matters will be favorable to us. An adverse resolution of lawsuits, investigations or arbitrations could have a material adverse effect on our business, financial condition and results of operations. Defending ourselves in these matters may be time-consuming, expensive and disruptive to normal business operations and may result in significant expense and a diversion of management's time and attention from the operation of our business, which could impede our ability to achieve our business objectives and growth strategy.

Additionally, in the event of litigation, we may sustain significant damages or settlement expenses (regardless of merit), litigation expenses and significant harm to our reputation. Any amount that we may be required to pay to satisfy a judgment or settlement may not be covered by insurance. Filing claims under these policies may result in our inability to maintain adequate liability insurance at acceptable costs or on favorable terms. Under our charter and the indemnification agreements that we have entered into with our directors and officers and third parties, we are required to indemnify and advance expenses to them in connection with their participation in certain proceedings. There can be no assurance that any of these payments will not be material.

***We may be subject to information technology system failures, network disruptions, cybersecurity attacks and breaches in data security, which may materially adversely affect our financial condition, results of operations and business.***

We depend on information technology, including our own information technology system and third party telecommunications facilities, as an essential element to sustain our operations. Our system enables us to interface with our local distribution centers and customers, as well as to maintain and timely update financial and business records. Additionally, in 2019, we implemented an upgraded financial reporting and data analysis system to support the Company's strategic initiatives and improve efficiency of planning and analysis. Implementing reporting and data tools involves changes to business processes and extensive organizational training. The changes, which caused some temporary disruption to our business in 2019, may cause the Company to experience additional temporary business and information technology disruptions that could adversely affect the Company's business, financial condition and results of operations.

A failure of the information technology systems used by us or those of third parties with whom we interact could disrupt our operations by causing transaction errors, processing inefficiencies, delays or cancellation of customer orders, the loss of customers or impediments to the shipment of products, all of which could adversely affect our business, results of operations and financial condition. In particular, a cybersecurity breach, as a result of attack, human error or otherwise, could result in the loss or unauthorized disclosure of our intellectual property, proprietary information and personal information of our customers and employees. We cannot provide absolute assurance that our controls and procedures are sufficient to ensure that relevant information pertaining to cybersecurity risks and incidents is identified, collected, processed and timely reported to the appropriate parties to allow management to properly assess and analyze potential impacts and disclosure obligations. Further, despite our best efforts, employees may not be fully aware or understand our cybersecurity internal controls and may fail to recognize potentially relevant events.

An information technology failure, including as a result of human error or the failure of internal controls with respect to cybersecurity, could expose us to financial losses from necessary remedial actions, loss of business or potential liability, as well as reputational damage, any of which could have a material adverse effect on our financial condition, results of operations and business.

***The termination of key supplier relationships may have an immediate material adverse effect on our financial condition and results of operations.***

We distribute building products that we purchase from a number of major suppliers. As is customary in our industry, most of our relationships with these suppliers are terminable without cause on short notice. More than half of our purchases are concentrated with ten suppliers. Although we believe that relationships with our existing suppliers are strong and that in most cases we would have access to similar products from competing suppliers, the termination of key supplier relationships or any other disruption in our sources of supply, particularly of our most commonly sold items, could have a material adverse effect on our business, financial condition and results of operations. Supply shortages resulting from unanticipated demand or production difficulties could occur from time to time and could also have a material adverse effect on our business, financial condition and results of operations.

***Our failure to attract and retain key personnel could have a material adverse effect on our future success.***

Our future success depends, to a significant extent, upon the continued service of our executive officers and other key management and sales personnel and on our ability to continue to attract, retain and motivate qualified personnel. If the price of our common stock performs poorly, such performance may adversely affect our ability to retain or attract key personnel. If we are unable to continue to provide attractive equity compensation awards or other compensation incentives for any reason, we may be unable to retain and motivate existing personnel and recruit new personnel. The loss of the services of one or more key employees or our failure to attract, retain and motivate qualified personnel could have a material adverse effect on our business. In addition, the tight labor market and low unemployment levels may impact our ability to hire and retain qualified personnel at our distribution centers.

***Goodwill is tested for impairment at least annually, which could result in a material non-cash write-down.***

Goodwill is subject to impairment tests at least annually, and between annual tests in certain circumstances. We have incurred non-cash impairment charges in prior years. At December 31, 2019, we reported goodwill of \$9.5 million. We may be required to incur additional non-cash impairment charges in the future that could have a material adverse effect on our operating results.

***A significant portion of our sales are on credit to our customers. Material changes in their creditworthiness or our inability to forecast deterioration in their credit position could have a material adverse effect on our operating results, cash flow and liquidity.***

The majority of our sales are on account where we provide credit to our customers. In 2019, bad debt expense to total net sales was less than 0.2%. Our customers are generally susceptible to the same economic business risks as we are. Furthermore, we may not necessarily be aware of any deterioration in their financial position. If our customers' financial positions become impaired, it could have a significant adverse impact on our bad debt exposure and could have a material adverse effect on our operating results, cash flow and liquidity.

***A significant portion of our sales are concentrated with a relatively small number of customers. A loss of one or more of these customers could have a material adverse effect on our business, financial condition, and results of operations.***

In 2019, our top ten customers represented 44% of our sales, with one customer accounting for 15% of our sales. This customer is a buying group for multiple building material dealers. Although we believe that our relationships with our customers are strong, the loss of one or more of these customers could have a material adverse effect on our business, financial condition, and results of operations.

***We face risks of incurring significant costs to comply with environmental regulations.***

We are subject to federal, state and local environmental protection laws and regulations and may have to incur significant costs to comply with these laws and regulations in the future. Enactment of new environmental laws or regulations, or changes in existing laws or regulations, might require us to make significant expenditures or restrict operations. Some of our current and former distribution centers are located in areas where environmental contamination may have occurred, and for which we, among others, could be held responsible. As a result, we may incur material environmental liabilities in the future with respect to our current or former distribution center locations. In addition, we may also be held responsible for environmental liabilities associated with products that we distribute or have distributed in the past. For example, we are required to remediate a property formerly owned by us in Montana pursuant to a unilateral administrative order issued by the Montana Department of Environmental Quality ("DEQ"). Although we believe we have accurately estimated the cost of implementing the remediation work at the site based on the information we have currently, we cannot provide assurance of the total cost of implementing the final remediation work at the site due to the currently unknown variables relating to the actual levels of contaminants and additional sampling and testing to ensure the remediation will achieve the projected outcome required by the DEQ. Our total cost of implementing the final remediation work at the site may exceed the amounts we have accrued for the matter and thereby could negatively impact our business, financial condition and results of operations.

***The building materials distribution industry is competitive, and we may not be able to compete successfully with some of our existing competitors or new entrants in the markets we serve.***

The building materials distribution industry is competitive. Our competition varies by product line, customer classification and geographic market. The principal competitive factors in our industry are:

- pricing and availability of product;
- service and delivery capabilities;
- quality of value-added services;
- ability to assist with problem-solving;

- customer relationships;
- geographic coverage;
- financial stability and credit terms; and
- breadth of product offerings.

We compete with many local, regional and, in some markets and product categories, national building materials distributors and dealers. In addition, some product manufacturers sell and distribute their products directly to our customers, and the volume of such direct sales could increase in the future. Manufacturers of products distributed by us may also enter into exclusive supplier arrangements with our competition. Further, home center retailers, which have historically concentrated their sales efforts on retail consumers and small contractors, may intensify their marketing efforts to larger contractors and homebuilders. Some of our competitors have greater financial and other resources and may be able to withstand sales or price decreases better than we can. We also expect to continue to face competition from new market entrants. We may be unable to continue to compete effectively with these existing or new competitors, which could have a material adverse effect on our business, financial condition and results of operations.

***A number of our employees are unionized, and any work stoppages by our unionized employees may have a material adverse effect on our results of operations.***

Approximately 13% of our employees were members of labor unions as of December 31, 2019 and are represented by eight collective bargaining agreements. We may become subject to significant wage increases or additional work rules imposed by future agreements with labor unions representing our employees. Any such cost increases or new work rule implementation could materially increase our operating expenses. In addition, although we have not experienced any strikes or other significant work interruptions in recent years and have maintained generally favorable relations with our employees, no assurance can be given that there will not be any work stoppages or other labor disturbances in the future, which could have a material adverse effect on our business, financial condition, and results of operations.

***Our unionized employees generally participate in certain multi-employer pension plans and funding requirements for these plans, particularly underfunded plans, may have a material adverse effect on our results of operations.***

We participate in various multi-employer pension plans. Some of these multi-employer plans may be underfunded at any point in time. While the underfunded status may be cured in the normal course of plan management the creation of a significant obligation could have a material adverse effect on our operations or could materially add to the cost of closing or consolidating operating locations.

***We have retained accident and claims risk under our insurance programs. Significant claims, and/or our ability to accurately estimate the liability for these claims could have a material adverse effect on our operating results.***

We retain a portion of the accident and claims risk under vehicle liability, product liability, workers' compensation, medical and other insurance programs. We have multiple claims of various sizes and forecast the number of claims in determining the portion of accident risk we are willing to self-insure. We base loss accruals on our best estimate of the cost of resolution of these matters and adjust them periodically as circumstances change. Due to limitations inherent in the estimation process, our estimates may change. Changes in the actual number of large claims or changes in the estimates of these accruals may have a material adverse impact on our results of operations in any such period.

In addition, our insurance underwriters require collateral, generally in the form of letters of credit, which reduce our borrowing availability under our senior secured credit facility. As of December 31, 2019, we had \$3.2 million in letters of credit outstanding. Changes in the actual number of large claims could increase our collateral requirements and reduce our borrowing availability under our credit facility.

***We may acquire other businesses, and, if we do, we may be unable to integrate them with our business, which may impair our financial performance.***

If we find appropriate opportunities, we may acquire businesses that we believe provide strategic opportunities. If we acquire a business, the process of integration may produce unforeseen operating difficulties and expenditures and may demand significant attention of our management that would otherwise be available for the ongoing development and operation of our business. If we make future acquisitions, we may issue shares of stock that dilute the ownership interests of other stockholders, expend cash, incur debt, assume contingent liabilities or create additional expenses. Furthermore, the acquired business may not perform as expected, which would impact our financial performance.

***Exposure to successor liability and other liabilities may have a material adverse effect on our business, financial condition or results of operations.***

We may be exposed to successor liability and other liabilities relating to the historical operations of our predecessors or actions by an acquired business before the acquisition, including, but not limited to, anti-corruption, import-export, product-related and other health-based claims, environmental and other matters, which could also result in significant liabilities and/or civil or criminal penalties. We also may assume liabilities in connection with the acquisition of businesses, including liabilities that we fail, or are unable, to identify in the course of performing due diligence investigations of the acquired businesses, or that may be more material than we previously determined. In these circumstances, we may be subject to indemnification obligations or our rights to indemnification from our predecessors or the sellers of the acquired businesses to us may not be sufficient in amount, scope or duration, or be sufficiently collectible to fully offset the possible liabilities. Further, these liabilities could result in unexpected legal or regulatory exposure, unexpected increase in taxes or other adverse effects on our business. Any such liabilities, individually or in the aggregate, could have a material adverse effect on our business, financial condition or results of operations

***Our financial results reflect the seasonal nature of our operations.***

Our first and fourth quarter revenues are typically adversely affected by winter construction cycles and weather patterns in colder climates as the level of activity in new construction and home improvement markets decreases. Because much of our overhead and expense remains relatively fixed throughout the year, our operating profits also tend to be lower during the first and fourth quarters. In addition, other weather patterns, such as hurricane season in the Southeast region of the United States typically occurring during the third and fourth quarters, can have an adverse impact on our business, financial condition and results of operations.

***Federal and state transportation regulations, as well as increases in the cost of fuel, could impose substantial costs on us, which could adversely affect our results of operations.***

We use our own fleet of approximately 116 tractors, 10 trucks and 318 trailers to service customers throughout the United States. The U.S. Department of Transportation (“DOT”) regulates our operations, and we are subject to safety requirements prescribed by the DOT. Vehicle dimensions and driver hours of service are subject to both federal and state regulation. More restrictive limitations on vehicle weight and size, trailer length and configuration, or driver hours of service could increase our costs.

In addition, fuel costs are largely unpredictable and can have a significant impact on the Company’s results of operations since we rely on diesel fuel to operate our fleet. Changes in diesel fuel prices may increase our cost of operations and there is no guarantee that we can pass along a portion of increased fuel costs to our customers.

***Our deferred tax assets could be substantially limited if we experience an ownership change as defined in the Internal Revenue Code.***

We have significant deferred tax assets related to federal and state net operating loss carryforwards,(collectively, the “Deferred Tax Assets”). Under federal tax laws, we can carry forward and use our Deferred Tax Assets to reduce our future taxable income and tax liabilities until such Deferred Tax Assets expire in accordance with the Internal Revenue Code of 1986, as amended (the “Code”). Section 382 and Section 383 of the Code provide

an annual limitation on our ability to utilize our Deferred Tax Assets, as well as certain built-in losses, against future taxable income in the event of a change in ownership (as defined under the Code). While we have adopted a rights plan to protect stockholder value by attempting to diminish the risk to our ability to use our Deferred Tax Assets (see “Stockholder Rights Plan” under Part II, Item 7—“Management’s Discussion and Analysis of Financial Condition and Results of Operations” for additional information), we could experience a change in ownership in the future as a result of changes in our stock ownership that are beyond our control, and any such subsequent changes in ownership for purposes of the Code could further limit our ability to use our Deferred Tax Assets. Accordingly, any such occurrences could adversely impact our ability to offset future tax liabilities and, therefore, adversely affect our financial condition, results of operations and cash flow.

#### **ITEM 1B—UNRESOLVED STAFF COMMENTS**

None.

#### **ITEM 2—PROPERTIES**

Our corporate headquarters are located at 555 Maryville University Drive, Suite 400, St. Louis, Missouri 63141, in a leased facility. We own 14 of our 27 distribution centers and lease the remaining properties. The owned distribution centers secure our credit facility. Warehouse space at distribution centers aggregated to approximately 3.5 million square feet as of December 31, 2019. Distribution centers range in size from approximately 21,100 square feet to 450,000 square feet. The types of facilities at these centers vary by location, from traditional wholesale distribution warehouses to facilities with broad product offerings and capabilities for a range of value added services such as pre-hung door operations. We believe that our locations are well maintained and adequate for their use.

#### **ITEM 3—LEGAL PROCEEDINGS**

See Note 10—“Commitments and Contingencies” in the notes to our consolidated financial statements under Part II, Item 8—“Financial Statements and Supplementary Data” for a description of certain of our pending legal and environmental proceedings. We are also party to various other litigation matters, in most cases involving ordinary and routine claims incidental to our business. We cannot reasonably estimate the ultimate legal and financial liability with respect to all pending litigation matters. However, we believe, based on our examination of such matters, that the ultimate liability will not have a material adverse effect on our financial position, results of operation or cash flows.

#### **ITEM 4—MINE SAFETY DISCLOSURES**

Not Applicable.

## PART II

### ITEM 5—MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock trades on the NASDAQ exchange under the ticker symbol “HBP.” At February 18, 2020, there were approximately 1,400 holders of record of our common stock.

In order to make cash available for use in operations, debt reduction, stock repurchases and potential acquisitions, we have not declared, nor do we anticipate at this time declaring or paying, any cash dividends on our common stock. Provisions of our credit facility contain various restrictions, which, among other things, limit our ability to incur indebtedness, incur liens, make certain types of acquisitions, declare or pay dividends, repurchase shares or sell assets outside of the ordinary course of business. Accordingly, the payment of further dividends is at the discretion of the Board of Directors and is further limited by various restrictions contained in our credit facility. See “Liquidity and Capital Resources” under Part II, Item 7— “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

See “Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters” under Part III, Item 12—for information on securities authorized for issuance under equity compensation plans.

There were no unregistered sales of equity securities by the Company during the years ended December 31, 2019 or 2018.

**ITEM 6—SELECTED CONSOLIDATED FINANCIAL DATA**

The following table summarizes certain selected financial data of continuing operations of the Company as of year-end for each of the five years in the period ended December 31, 2019. The information contained in the following table may not necessarily be indicative of our future performance. Such historical data should be read in conjunction with Part II, Item 7—“Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our consolidated financial statements and notes thereto included elsewhere in this report.

|  | Year Ended December 31,              |          |          |          |          |
|--|--------------------------------------|----------|----------|----------|----------|
|  | 2019                                 | 2018     | 2017     | 2016     | 2015     |

(1) Amounts exclude operations classified as discontinued.

(2) Includes both current and long-term portions of debt and other obligations. See Note 7—“Debt” of the Notes to Consolidated Financial Statements in Part II, Item 8.

## ITEM 7—MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Overview

We are a distributor of building materials used principally in new residential construction and in home improvement, remodeling and repair work. We distribute our products through 27 distribution centers serving 41 states and sell primarily to building materials dealers, national buying groups, home centers and industrial users, including makers of manufactured homes. Our products fall into three categories: (i) millwork, which includes doors, windows, moulding, stair parts and columns, (ii) general building products, which includes connectors, fasteners, composite decking, housewrap, roofing products and insulation, and (iii) wood products, which includes engineered wood products, such as floor systems, as well as wood panels and lumber.

### Industry Conditions

Our sales depend heavily on the strength of local and national new residential construction, home improvement and remodeling markets. New housing activity has shown moderate improvement each year since 2009, the trough period of the downturn. In 2019, total housing starts increased approximately 3%, to 1.3 million, but were still below the historical average total housing starts from 1959 to 2019 of approximately 1.4 million starts based on statistics tracked by the U.S. Census Bureau. Based on the current level of housing activity and industry forecasts, we expect new housing activity, to continue its moderate increase in 2020, but we cannot be certain.

Various factors have historically caused our results of operations to fluctuate from period to period. These factors include levels of construction, home improvement and remodeling activity, weather, prices of commodity wood and steel products, interest rates, competitive pressures, availability of credit and other local, regional, national economic and political conditions. Many of these factors are cyclical or seasonal in nature. We anticipate that further fluctuations in operating results between reporting periods will continue in the future. Our first and fourth quarters are generally adversely affected by winter weather patterns in the Northwest, Midwest and Northeast regions of the United States, which typically cause seasonal decreases in construction activity in these areas. Because much of our overhead and expenses remain relatively fixed throughout the year, our operating profits tend to be lower during the first and fourth quarters.

We believe we have the product offerings, distribution channel, personnel, systems infrastructure, financial, and competitive resources necessary for continued operations. Our future revenues, costs and profitability, however, are all likely to be influenced by a number of risks and uncertainties, including those set forth in Part I, Item 1A—“Risk Factors.”

### Critical Accounting Policies

We prepare our consolidated financial statements in accordance with U.S. generally accepted accounting principles, which require management to make estimates and assumptions. Management bases these estimates and assumptions on historical results and known trends as well as management forecasts. Actual results could differ from these estimates and assumptions.

**Inventory**—Inventories are valued at the lower of cost or market. We utilize the last-in, first-out (“LIFO”) cost method to value the majority of our inventories. We review inventories on hand and record a provision for slow-moving and obsolete inventory based on historical and expected sales.

**Contingencies**—We accrue expenses when it is probable that an asset has been impaired or a liability has been incurred and we can reasonably estimate the expense. Contingencies for which we have made accruals include environmental and certain other legal matters. It is possible that future results of operations for any particular quarter or annual period and our financial condition could be materially affected by changes in assumptions or other circumstances related to these matters. We accrue an estimate of the cost of resolution of these matters and make adjustments to the amounts accrued as circumstances change. We expense legal costs as incurred.

**Income Taxes**— Deferred tax assets (“DTAs”) and liabilities are recognized for the future tax benefits or liabilities attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates would be recognized in income in the period that includes the enactment date. We regularly review our deferred tax assets for recoverability and establish a valuation allowance when we believe that such assets may not be recovered, taking into consideration historical operating results, expectations of future earnings, changes in operations, the expected timing of the reversal of existing temporary differences and available tax planning strategies. As of December 31, 2019, we carry a valuation allowance for substantially all of our deferred tax assets, net.

Currently, we have significant deferred tax assets related to federal and state net operating loss carry-forwards. Our DTAs include approximately \$44 million related to federal net operating loss carryforwards that can be used to offset taxable income in future periods and reduce our income taxes payable in those future periods. Most of the Company’s net deferred tax asset is comprised of federal tax loss carryforwards which will begin expiring in 2030. We recorded a charge of \$12.7 million in 2019 related to an increase in our deferred tax asset valuation allowance, representing a valuation allowance against the entire net deferred asset. The full year charge includes the impact of the \$11.8 million valuation allowance recorded in the second quarter of 2019. The increase in the valuation allowance was required as realization of the net deferred asset no longer met the more-likely-than-not criterion under US GAAP. The deferred tax valuation allowance is assessed each reporting period and the amount of net deferred tax assets considered realizable could be adjusted in future periods based on the Company’s financial performance. The net operating loss carryforwards remain available to offset future taxable income. Although we believe our estimates to be reasonable, differences in our future operating results from these projections could significantly change our estimates of and realization of these deferred tax assets in future periods.

We operate within multiple taxing jurisdictions and are subject to audit in these jurisdictions. These audits can involve complex issues, which may require an extended period of time to resolve. We regularly review our potential tax liabilities for tax years subject to audit. Changes in our tax liability may occur in the future as our assessment changes based on the progress of tax examinations in various jurisdictions and/or changes in tax regulations. In management’s opinion, adequate provisions for income taxes have been made for all years presented.

## **Results of Operations**

This section discusses our results of operations for the year ended December 31, 2019 as compared to the year ended December 31, 2018. For a discussion and analysis of the year ended December 31, 2018, compared to the same period in 2017 refer to Management's Discussion and Analysis of Financial Condition and Results of Operations included in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2018, filed with the SEC on March 5, 2019.

### Continuing Operations

Net sales from continuing operations were \$812.0 million in 2019, a decrease of \$27.6 million, or approximately 3.3%, compared to \$839.6 million in 2018. The decrease was primarily due to our de-emphasis of more commoditized, lower margin products, commodity pricing influence across our wood products category, lagging softness in new residential construction for much of the year, a competitive market environment, and temporary operational disruption from our enterprise resource planning upgrade which impacted sales in the second and third quarters.

Net sales in our major product categories changed as follows in 2019 from 2018: millwork sales decreased 4.0% to \$384.6 million, building product sales increased 0.3% to \$366.6 million, and wood products decreased 17.4% to \$60.8 million. Millwork was the product category most impacted by the temporary disruption from our enterprise resource system upgrade, which affected the second and third quarters of 2019. Building products sales increased primarily due to a modest increase in construction activity, offset by lower sales of commodity products. The proportionate increase in sales of building products was generally consistent with our strategic growth initiatives. Wood product sales were negatively impacted by underlying market segments softening in certain parts of the country, a competitive market and by commodity pricing.

Gross margin decreased \$4.5 million, or 2.7%, to \$162.0 million in 2019 as compared to \$166.5 million in 2018. The decrease in gross margin was due to lower overall sales volumes. Gross margin as a percentage of net sales increased to 20.0% in 2019 compared to 19.8% in 2018. The increase in gross margin percentage was consistent with our de-emphasis of commoditized products.

Operating expenses decreased \$1.9 million, or 1.1%, to \$165.6 million, or 20.4% of net sales, in 2019, compared to \$167.5 million, or 19.9% of net sales, in 2018. Personnel expenses decreased \$0.7 million as lower wages, variable compensation and contract labor costs were partially offset by a significant increase in medical claim costs, which were \$1.5 million higher than in 2018. Personnel costs in 2019 include a \$0.8 million severance charge related to cost reduction actions. Non-personnel expenses decreased \$1.2 million in 2019, primarily due to non-recurring litigation and settlement costs of approximately \$3.3 million in 2018, offset in part by increases in equipment and facility costs, higher insurance costs, and depreciation and amortization, including costs from our recent software upgrade. Excluding costs related to settled litigation in 2018, operating expenses would have been approximately 19.5% of sales in 2018.

Net interest expense was \$6.6 million in 2019 compared to \$6.5 million in 2018. Although average debt was lower in 2019, the increase was due to higher average borrowing rates in the first half of 2019 versus 2018.

An income tax expense from continuing operations of \$11.1 million was recognized for the year ended December 31, 2019 compared to an income tax benefit of \$1.4 million for the year ended December 31, 2018. See Note 13 — “Income Taxes” of the Notes to Consolidated Financial Statements in Part II, Item 8 for more information.

As a result of the foregoing factors, we reported a net loss from continuing operations of \$21.3 million in 2019 as compared to \$6.0 million in 2018.

#### Discontinued Operations

We recorded a \$0.4 million after-tax loss from discontinued operations in 2018, due to an increase in the estimated cost of our environmental liability. See Note 10 – “Commitments and Contingencies” of the Notes to Consolidated Financial Statements in Part II, Item 8 for more information regarding the environmental liability. See Note 17—“Discontinued Operations” of the Notes to the Consolidated Financial Statements in Part II, Item 8 for more information regarding discontinued operations.

#### **Stockholder Rights Plan**

On May 18, 2016, the Board of Directors (the “Board”) of the Company entered into a rights agreement (the “Rights Agreement”) with ComputerShare Trust Company, N.A. and declared a dividend of one preferred share purchase right (a “Right”) for each outstanding share of common stock, \$0.01 par value per share, of the Company. The dividend was paid at close of business on May 31, 2016 to the stockholders of record on that date. The Board adopted the Rights Agreement to protect stockholder value by protecting the Company’s ability to capture the value of its net operating losses used to reduce potential future federal income tax obligations. The Rights Agreement was approved by the Company’s stockholders at the 2017 annual meeting of stockholders. On May 6, 2019 the Board approved and we entered into a First Amendment to Rights Agreement between the Company and ComputerShare Trust Company, N.A., as rights agent. The Amendment, among other things, (i) extends the final expiration date (as defined in the Rights Agreement) from May 18, 2019 to May 18, 2022; (ii) changes the initial purchase price (as defined in the Rights Agreement) from \$13.86 to \$13.39; and (iii) increases the period pursuant to which the Board has to consider an exemption request (as defined in the Rights Agreement) from ten business days to 20 business days. The Rights Agreement will expire on the earliest of (i) May 18, 2022, (ii) the time at which the Rights are redeemed or exchanged, as provided for in the Rights Agreement, (iii) the repeal of Section 382 of the Internal Revenue Code of 1986, as amended, if the Board determines that the Rights Agreement is no longer necessary for the preservation of the Company’s NOLs, and (iv) the beginning of a taxable year of the Company to which the Board determines that no NOLs may be carried forward. We adopted the Rights Agreement to protect stockholder value by attempting to diminish the risk that our ability to use our NOLs to reduce potential future federal income tax obligations may become substantially limited.

See Note 16 – “Rights Agreement” of the Notes to Consolidated Financial Statements in Part II, Item 8 for more information regarding the Rights Agreement.

## Liquidity and Capital Resources

We depend on cash flow from operations and funds available under our revolving credit facility to finance seasonal working capital needs, capital expenditures, additional investment in our product lines, including Huttig-Grip, and any acquisitions that we may undertake. Typically, our working capital requirements are greatest in the second and third quarters, reflecting the seasonal nature of our business. The second and third quarters also tend to be our strongest operating quarters, largely due to more favorable weather throughout many of our markets compared to the first and fourth quarters. We typically generate cash from working capital reductions in the fourth quarter of the year and build working capital during the first quarter in preparation for our second and third quarters. We also maintain significant inventories to meet the rapid delivery requirements of our customers and to enable us to obtain favorable pricing, delivery and service terms with our suppliers. Our 2019 working capital was impacted by our continuing investments in inventory related to our Huttig-Grip product line. Sourcing Huttig-Grip products internationally requires longer lead-times and higher inventory levels to ensure available supply, but it also provides an opportunity for higher margins. Internationally sourced products are generally financed upon shipment from the port of origin, thus resulting in lower levels of accounts payable. As a percentage of total current assets, inventories were 65% and 61% and accounts receivable were 28% and 32%, each respectively at December 31, 2019 and 2018. We closely monitor operating expenses and inventory levels during seasonally affected periods and, to the extent possible, manage variable operating costs to minimize seasonal effects on our profitability.

**Operations**—Cash provided by operating activities was \$6.2 million in 2019 as compared to cash used in operations of \$27.0 million in 2018. Net loss was \$21.3 million and \$6.4 million in 2019 and 2018, respectively. Inventories increased \$5.4 million in 2019 compared to an increase of \$22.1 million in 2018, reflecting a sustained, slowing growth of investment in our Huttig-Grip product line. Cash used in discontinued operations related to the formerly owned property in Montana was \$0.4 million and \$0.6 million in 2019 and 2018, respectively. Funded litigation and related settlement cost was \$3.5 million in 2018.

**Investing**—Net cash used in investing activities was \$1.7 million in 2019, as compared to \$6.6 million in 2018. In 2019 we invested \$1.7 million in property and equipment at various locations. In 2018 we invested \$7.8 million in property and equipment at various locations and received \$1.2 million from the sale of capital assets.

**Financing**—Cash used in financing activities of \$3.1 million in 2019 reflected net repayments of \$1.0 million under our credit facility, net repayments of \$2.0 million for other debt obligations and \$0.1 million for the net settlement of withholding taxes on stock-based awards. In 2018, we recorded net borrowings of \$33.2 million under our credit facility, net borrowings of \$1.3 million for other debt obligations and \$0.4 million for the net settlement of withholding taxes on stock-based awards.

We believe cash generated from our operations and liquidity available under the credit facility will provide sufficient funds to meet our operating needs for at least the next twelve months. In 2019, the fixed charge coverage ratio (FCCR) was not required to be tested as excess borrowing availability was greater than the minimum threshold. However, if our availability would have fallen below that threshold, we would not have met the minimum FCCR. If we are unable to maintain excess borrowing availability of more than the applicable amount in the range of \$17.5 million to \$31.3 million and we do not meet the minimum FCCR, the lenders would have the right to terminate the loan commitments and accelerate repayment of the entire amount outstanding under the credit facility. The lenders could also foreclose on our assets securing the credit facility. If the credit facility is terminated, we would be forced to seek alternative sources of financing, which may not be available on terms acceptable to us, or at all.

**Credit Facility**—See Note 7 – “Debt” in the Notes to Consolidated Financial Statements in Part II, Item 8 for information on our credit facility.

## Goodwill Analysis

We review goodwill annually for impairment, or more frequently if Company or market conditions indicate reporting units may be at risk of impairment. Our last annual review was performed as of October 31, 2019 when our market capitalization was \$56.3 million, which was 9.0% above the carrying value of equity. As of December 31, 2019, our market capitalization was \$40.7 million, which was 5.3% below the carrying value of equity.

As of December 31, 2019, we concluded that it is more likely than not the implied fair values of goodwill in our reporting units remain in excess of their carrying value, which aggregate to \$9.5 million. Changes in our assumptions or forecasts, a reduction of economic activity in the markets in which we operate, or an erosion of our market capitalization may result in impairments in future periods. As of our annual analysis, there are four reporting units with goodwill totaling \$1.4 million where our qualitative analysis identified that the estimated level by which fair value likely exceeds the carrying value is less than 10%.

## Commitments and Contingencies

The table below summarizes our contractual obligations as of December 31, 2018 (in millions):

|   | Total    | Payments Due by Period |         |        |          |        |            |
|---|----------|------------------------|---------|--------|----------|--------|------------|
|   |          | 2019                   | 2020    | 2021   | 2022     | 2023   | Thereafter |
| Long-term debt, including current portion (1) | \$ 138.9 | \$ 1.8                 | \$ 1.5  | \$ 1.5 | \$ 133.4 | \$ 0.7 | \$ —       |
| Operating lease obligations (2)               | 43.4     | 11.1                   | 8.7     | 6.9    | 4.8      | 3.9    | 8.0        |
| Total   | \$ 182.3 | \$ 12.9                | \$ 10.2 | \$ 8.4 | \$ 138.2 | \$ 4.6 | \$ 8.0     |

(1) Amounts represent the expected cash payments of our long-term debt and do not include any fair value adjustments.

(2) Amounts are net of minimum sublease income of \$0.6 million.

## ITEM 7A—QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have exposure to market risk as it relates to effects of changes in interest rates. We had debt outstanding at December 31, 2019 under our credit facility of \$131.3 million.

All of our debt under our revolving credit facility accrues interest on a floating-rate basis. If market interest rates for LIBOR had been different by an average of 1% for the year ended December 31, 2019, our interest expense and income before taxes would have changed by \$1.4 million. These amounts are determined by considering the impact of the hypothetical interest rates on our borrowing cost throughout the year. This analysis does not consider the effects of any change in the overall economic activity that could exist in such an environment. Further, in the event of a change of such magnitude, management may take actions to further mitigate its exposure to the change. However, due to the uncertainty of the specific actions that would be taken and their possible effects, the sensitivity analysis assumes no changes in our financial structure.

We are subject to periodic fluctuations in the price of wood, steel commodities, petrochemical-based products and fuel. Profitability is influenced by these changes as prices change between the time we buy and sell the wood, steel or petrochemical-based products. Profitability is also influenced by changes in prices of fuel, changes in tariff costs and any anti-dumping or countervailing duties. In addition, to the extent changes in interest rates affect the housing and remodeling market, we would be affected by such changes.

**Report of Independent Registered Public Accounting Firm**

To the Shareholders and Board of Directors  
Huttig Building Products, Inc.:

*Opinions on the Consolidated Financial Statements and Internal Control Over Financial Reporting*

We have audited the accompanying consolidated balance sheets of Huttig Building Products, Inc. and subsidiary (the Company) as of December 31, 2019 and 2018, the related consolidated statements of operations, shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2019, and the related notes (collectively, the consolidated financial statements). We also have audited the Company's internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2019 and 2018, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2019, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019 based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

*Change in Accounting Principle*

As discussed in Note 2 to the consolidated financial statements, the Company has changed its method of accounting for leases as of January 1, 2019 due to the adoption of Financial Accounting Standards Board Accounting Standards Codification Topic 842, *Leases*.

*Basis for Opinions*

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Internal Control over Financial Reporting*. Our responsibility is to express an opinion on the Company's consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

*Definition and Limitations of Internal Control Over Financial Reporting*

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

HUTTIG BUILDING PRODUCTS, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
YEARS ENDED DECEMBER 31, 2019, 2018 AND 2017

(In Millions, Except Share and Per Share Data)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Organization**—Huttig Building Products, Inc. and its wholly owned subsidiary (the “Company” or “Huttig”) is a distributor of building materials used principally in new residential construction and in home improvement, remodeling and repair work. Huttig’s products are sold through 27 distribution centers serving 41 states and are sold primarily to building materials dealers, national buying groups, home centers and industrial users including makers of manufactured homes.

**Principles of Consolidation**—The Company’s consolidated financial statements include the accounts of Huttig Building Products, Inc. and its wholly owned subsidiary. All inter-company accounts and transactions have been eliminated in consolidation.

**Revenue Recognition**—The Company recognizes revenue when customer performance obligations are satisfied. A performance obligation, the unit of account for revenue recognition, is a promise to transfer a distinct good to the customer. The transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied. All of the Company’s contracts have a single performance obligation as the promise to transfer the individual good is not separately identifiable from other promises and is, therefore, not distinct. The Company’s performance obligations are satisfied at a point in time, and revenue is recognized when the customer accepts product delivery, taking possession of the product with rights and rewards of ownership.

**Use of Estimates**—The preparation of the Company’s consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Management makes estimates including, but not limited to, the following financial statement items: allowance for doubtful accounts, slow-moving and obsolete inventory, lower of cost or market provisions for inventory, long-lived asset and goodwill impairments, contingencies, including environmental liabilities, accrued expenses and self-insurance accruals, the discount rate for lease valuation, income tax expense and deferred taxes. Actual results may differ from these estimates.

**Cash and Equivalents**—The Company considers all highly liquid, interest-earning investments with an original maturity of three months or less at the date of purchase to be cash equivalents. The carrying value of cash and equivalents approximates their fair value.

**Accounts Receivable**—Trade accounts receivable consist of amounts owed for orders shipped to customers and are stated net of an allowance for doubtful accounts. Huttig’s corporate management establishes an overall credit policy for sales to customers. The allowance for doubtful accounts is determined based on a number of factors including when customer accounts exceed 90 days past due and specific customer account reviews.

**Inventory**—Inventories are valued at the lower of cost or market. The Company’s entire inventory is comprised of finished goods. The Company reviews inventories on hand and records a provision for slow-moving and obsolete inventory. The provision for slow-moving and obsolete inventory is based on historical and expected sales. Approximately 88% of inventories were determined by using the last-in, first-out (“LIFO”) method of inventory valuation as of both December 31, 2019 and 2018. The balance of all other inventories is determined by the average cost method. The first-in, first-out cost would be higher than the LIFO valuation by \$19.2 million at December 31, 2019 and \$18.4 million at December 31, 2018.

**Vendor Rebates**—The Company enters into agreements with certain vendors which provide volume-driven purchase rebates. The Company accrues a receivable based on purchase quantities and reduces the cost of inventory by the same amount.

**Property, Plant and Equipment**—Property, plant and equipment are stated at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the respective assets and is charged to operating expenses. Building and improvements lives range from 3 to 25 years. Machinery and equipment lives range from 3 to 10 years. The Company recorded depreciation expense of \$4.8 million, \$4.2 million and \$3.7 million in 2019, 2018 and 2017, respectively.

**Goodwill**—Goodwill for each reporting unit is reviewed for impairment annually, or more frequently if certain indicators arise. The Company assesses qualitative factors to determine whether a quantitative goodwill impairment test is required. The Company does not calculate the fair value of a reporting unit unless it determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. If the quantitative test is deemed necessary, the Company calculates the fair value using multiple assumptions of its future operations to determine future discounted cash flows including, but not limited to, sales levels, gross margin rates, capital requirements and discount rates. The carrying value of goodwill is considered impaired when a reporting unit's fair value is less than its carrying value. In that event, goodwill impairment is recognized to the extent the reporting unit's carrying value exceeds its fair value. Changes in management assumptions or forecasts in the future may result in goodwill impairments in future periods. See Note 5, "Goodwill and Other Intangible Assets" for additional information.

**Valuation of Long-Lived Assets**—The Company periodically evaluates the carrying value of its long-lived assets, including intangible and other tangible assets, when events and circumstances warrant such a review. The Company also reassesses useful lives of previously recognized intangible assets. The carrying value of long-lived assets is considered impaired when the anticipated undiscounted cash flows from such assets are less than the carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved.

**Shipping and Handling**—Costs associated with shipping and handling products to the Company's customers are charged to operating expense. Shipping and handling costs were \$39.5 million, \$38.4 million and \$34.0 million in each of 2019, 2018 and 2017, respectively.

**Stock-Based Compensation**—The Company has stock-based compensation plans covering the majority of its employee groups and a plan covering the Company's Board of Directors. The Company accounts for share-based compensation utilizing the fair value recognition provisions. The Company recognizes compensation cost for equity awards on a straight-line basis over the requisite service period for the entire award. See Note 12, "Stock Based Compensation" for additional information.

**Income Taxes**—Deferred income taxes reflect the impact of temporary differences between assets and liabilities recognized for financial reporting purposes and when such amounts are recognized for tax purposes using currently enacted tax rates. A valuation allowance would be established to reduce deferred income tax assets if it is more likely than not that a deferred tax asset will not be realized. See Note 13, "Income Taxes" for additional information.

**Net Income (Loss) Per Share**—Basic net income (loss) per share is computed by dividing income available to common stockholders by the weighted average shares outstanding. Diluted net income per share reflects the effect of all other potentially dilutive common shares using the treasury stock method. See Note 14, "Basic and Diluted Net Income (Loss) Per Share" for additional information.

**Concentration of Credit Risk**—The Company grants credit to customers, substantially all of whom are dependent upon the construction sector. The Company periodically evaluates its customers' financial condition but does not generally require collateral. Customers with high credit risk may be required to pay up front. A significant portion of our sales are concentrated with a relatively small number of our customers. Our top ten customers

represented 44% of our sales in 2019. The Company had a single customer representing approximately 15% of total sales in 2019, and 14% in each 2018 and 2017. This customer is a buying group for multiple building material dealers.

**Collective Bargaining Agreements**—As of December 31, 2019, approximately 13% of our employees were represented by one of eight collective bargaining agreements.

**Segments**—Operating segments are components of an enterprise for which separate financial information is available and evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. At December 31, 2019 and 2018, under the definition of a segment, each of our distribution centers is considered an operating segment of our business. Operating segments may be aggregated if the operating segments have similar economic characteristics and if the nature of the products, distribution methods, customers and regulatory environments are similar. The Company has aggregated its distribution centers into one reporting segment.

## 2. NEW ACCOUNTING STANDARDS

### Adoption of New Accounting Standards

On January 1, 2018, the Company adopted Accounting Standards Update (“ASU”) 2014-09, “Revenue from Contracts with Customers (Topic 606)” and all related amendments. The Company adopted the standard using the full retrospective method, which did not require a cumulative effect adjustment to retained earnings. As a result of this adoption, there was no material impact on revenue recognition practices, income from continuing operations after taxes, net income or earnings per share. See Note 3 - “Revenue” for further discussion, including additional required qualitative and quantitative disclosures of revenue recognition policies.

On October 1, 2018, the Company adopted ASU 2017-04, “Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment.” ASU 2017-04 eliminates the two-step process that required identification of potential impairment and a separate measure of the actual impairment. The annual assessment of goodwill impairment will now consist of a comparison of the fair value of a reporting unit with its carrying amount. Any impairment will now be determined by using the difference between the carrying amount and the fair value of the reporting unit, not to exceed the total goodwill allocated to that unit.

On January 1, 2019, the Company adopted ASU 2016-02, “Leases (Topic 842),” which requires lessees to recognize leases on-balance sheet and disclose key information about leasing arrangements. The new standard establishes a right-of-use (“ROU”) model that requires a lessee to recognize a ROU asset and a lease liability on the balance sheet for all leases with a term longer than 12 months. Leases will be classified as financing or operating, with classification affecting the pattern and classification of expense recognition in the income statement. The Company adopted the standard on its effective date using the modified retrospective approach and a package of practical expedients permitted by the transition guidance of the new standard. The practical expedients included an accounting policy election to forgo recognition of ROU asset and liability on leases with an initial term of 12 months or less, and to forgo separate recognition of lease and non-lease components for all leases.

On January 1, 2019, the Company adopted ASU 2018-07, “Improvements to Nonemployee Share-Based Payment Accounting.” ASU 2018-07 more closely aligns the accounting for employee and nonemployee share-based payments. There was no material impact to stock compensation, income from continuing operations after taxes, net income or earnings per share as a result of adoption.

The Company adopted the amendments to certain disclosure requirements in Securities Act of 1933, as amended, Release No. 33-10532, “Disclosure Update and Simplification” on November 5, 2018, the effective date of the release. Among the amendments is a requirement to present the changes in shareholders’ equity in the interim financial statements (either in a separate statement or footnote) in quarterly reports on Form 10-Q. See the Consolidated Statement of Shareholders’ Equity.

## Accounting Standards Issued But Not Yet Adopted

On January 1, 2020, the Company adopted ASU 2016-13, "Measurement of Credit Losses on Financial Instruments." ASU 2016-13 requires a financial asset (or a group of financial assets) measured at amortized cost basis to be assessed for impairment under the current expected credit loss model rather than an incurred loss model. The measurement of expected credit losses is based on relevant information about past events, including historical experience, current conditions and reasonable and supportable forecasts that affect the collectability of the reported amount. The primary financial asset of the Company in scope of ASU 2016-13 is trade receivables. The adoption of ASU 2016-13 is not expected to have a material impact to the Company's consolidated financial statements.

Recent accounting pronouncements pending adoption and not discussed above are either not applicable or will not have, or are not expected to have, a material impact on our consolidated financial condition, results of operations, or cash flows.

## 3. REVENUE

Revenue is measured as the amount of consideration the Company expects to receive in exchange for transferring goods. The Company reports sales revenue, including direct sales, on a net basis, which includes gross revenue adjustments for estimated returns, cash payment discounts based on the satisfaction of outstanding receivables, and volume purchase rebates. The Company's customer payment terms are typical for our industry; these terms vary by customer and location, as well as by the products purchased.

Regarding direct sales, the Company is the principal in the arrangement and is responsible for fulfilling the promise to provide specific goods to its customers, including product specifications, pricing and modifications prior to delivery. Direct sales as a percentage of net sales were 18%, 19%, and 17% in each of the years ended December 31, 2019, 2018 and 2017, respectively.

The following table disaggregates revenue by product classification (in millions):

|                   | 2019            | 2018            | 2017            |
|-------------------|-----------------|-----------------|-----------------|
| Millwork          | \$ 384.6        | \$ 400.6        | \$ 381.4        |
| Building Products | 366.6           | 365.4           | 299.0           |
| Wood Products     | 60.8            | 73.6            | 72.8            |
| Net Sales         | <u>\$ 812.0</u> | <u>\$ 839.6</u> | <u>\$ 753.2</u> |

## 4. LEASES

The Company has operating and financing leases for corporate offices, distribution centers, vehicles, and certain equipment. These leases have remaining lease terms of less than 1 year to 12 years and many of the leases have renewal options. Because the Company is not reasonably certain to exercise the renewal options, generally the options are not considered in determining the lease term, and associated potential option payments are excluded from lease payments and right-of-use calculations. Leases with an initial term of 12 months or less are excluded from right-of-use calculations, and we do not separately recognize the lease and non-lease components of lease agreements.

In addition to fixed payments, many of the Company's lease contracts contain variable payments. Vehicle lease variable payments typically include mileage, and real estate leases include variable charges for taxes and common area maintenance. Variable lease payments and payments for leases with an initial term of 12 months or less are recognized in the period incurred.

The following lease costs are included on the consolidated statements of operations (in millions):

|                                     | 2019 |      |
|-------------------------------------|------|------|
| Operating Lease Cost                | \$   | 12.4 |
| Finance Lease Cost:                 |      |      |
| Amortization of right-of-use assets | \$   | 1.8  |
| Interest on lease liabilities       |      | 0.2  |
| Total finance lease cost            | \$   | 2.0  |

At January 1, 2019, the Company's right-of-use assets were \$37.6 million and lease liabilities were \$38.0 million. The following lease assets and liabilities are included on the condensed consolidated balance sheet (in millions):

|   | 2019 |       |
|---|------|-------|
| Operating Leases:   |      |       |
| Operating lease right-of-use assets                               | \$   | 40.9  |
|   |      | 9.7   |
| Current maturities of operating lease right-of-use assets         |      | 31.6  |
| Operating lease right-of-use liabilities, less current maturities |      | 41.3  |
| Total operating lease liabilities                                 | \$   | 41.3  |
| Finance Leases:   |      |       |
| Gross property, plant and equipment                               | \$   | 10.6  |
| Accumulated depreciation  |      | (5.2) |
| Property, plant and equipment, net                                | \$   | 5.4   |
|   |      | 1.4   |
| Current maturities of long-term lease liabilities                 | \$   | 2.8   |
| Long-term lease liabilities, less current maturities              |      | 4.2   |
| Total finance lease liabilities                                   | \$   | 4.2   |

As of December 31, 2019, the weighted average remaining lease term for the Company's operating leases was 5.3 years and for its financing leases was 3.4 years. These leases have weighted average discount rates of 5.9% and 5.2% for operating leases and financing leases, respectively. The rate implicit in the lease is used to discount leases when known. While the implicit rate is often known for finance leases, the Company is generally unable to calculate the implicit rate in operating leases because it does not have access to the lessor's residual value estimates nor the amount of the lessor's deferred initial direct costs. When the implicit rate is not known, the Company uses the incremental borrowing rate for secured loans of similar term. The Company uses available data for unsecured loans to borrowers of similar credit to the Company and adjusts the rate to reflect the effect of providing collateral equivalent to the outstanding obligation balance.

The following cash flow items are included on the condensed consolidated statement of cash flows (in millions):

|  | 2019 |      |
|--|------|------|
| Operating cash used for operating leases | \$   | 12.4 |
| Operating cash used for finance leases   | \$   | 0.2  |
| Financing cash used for finance leases   | \$   | 1.7  |

Maturities of lease liabilities are as follows (in millions):

|                               | Finance<br>leases |       | Operating<br>leases |
|-------------------------------|-------------------|-------|---------------------|
| 2020                          | \$                | 1.7   | \$ 10.1             |
| 2021                          |                   | 1.4   | 8.9                 |
| 2022                          |                   | 1.0   | 7.0                 |
| 2023                          |                   | 0.6   | 6.1                 |
| 2024                          |                   | 0.1   | 3.8                 |
| Thereafter                    |                   | -     | 8.8                 |
| Total lease payments          | \$                | 4.8   | \$ 44.7             |
| Less: imputed interest        |                   | (0.6) | (3.4)               |
| Total future lease obligation | \$                | 4.2   | \$ 41.3             |

#### Disclosures Related to Periods Prior to Adoption of ASU 2016-02

Operating lease rent expense was \$16.6 million and \$14.8 million, and sublease income \$0.5 million and \$0.5 million, for the years ended December 31, 2018 and 2017, respectively. Future minimum lease payments under non-cancelable rental and lease agreements with initial or remaining terms in excess of one year were as follows at December 31, 2018 (in millions):

|                              | Operating<br>Leases |
|------------------------------|---------------------|
| 2019                         | \$ 11.5             |
| 2020                         | 8.8                 |
| 2021                         | 7.0                 |
| 2022                         | 4.8                 |
| 2023                         | 3.9                 |
| Thereafter                   | 8.0                 |
| Total minimum lease payments | \$ 44.0             |

Certain leases also include options to purchase the leased property. Assets recorded under capital leases as of December 31, 2018 and December 31, 2017 were \$8.5 million and \$6.6 million, respectively. These assets are recorded net of accumulated amortization of \$2.9 million and \$2.3 million as of December 31, 2018 and December 31, 2017, respectively.

#### 5. GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill and other intangible assets are reviewed for impairment annually, or more frequently if certain indicators arise. The Company assesses each reporting period whether events and circumstances warrant a revision to the previously established useful lives.

During the fourth quarter in each of 2019, 2018 and 2017, the Company performed the annual test for impairment of its reporting units, concluding there was no impairment of goodwill. The following table summarizes goodwill activity for the three years in the period ended December 31, 2019 (in millions):

|                              | Goodwill | Accumulated<br>Impairments | Goodwill,<br>Net |
|------------------------------|----------|----------------------------|------------------|
| Balance at January 1, 2017   | \$ 21.3  | \$ (11.8)                  | \$ 9.5           |
| No activity in 2017          | —        | —                          | —                |
| Balance at December 31, 2017 | 21.3     | (11.8)                     | 9.5              |
| No activity in 2018          | —        | —                          | —                |
| Balance at December 31, 2018 | 21.3     | (11.8)                     | 9.5              |
| No activity in 2019          | —        | —                          | —                |
| Balance at December 31, 2019 | \$ 21.3  | \$ (11.8)                  | \$ 9.5           |

Information regarding the Company's other amortizable intangible assets is as follows (in millions):

|   | Cost          |               | Accumulated Amortization |               |
|---|---------------|---------------|--------------------------|---------------|
|   | 2019          | 2018          | 2019                     | 2018          |
| Customer relationships                  | \$ 4.9        | \$ 4.9        | \$ 2.2                   | \$ 1.8        |
| Trademarks                              | 1.6           | 1.6           | 1.2                      | 0.9           |
| Other                                   | 1.6           | 1.6           | 1.6                      | 1.5           |
| Total amortizable intangible assets (1) | <u>\$ 8.1</u> | <u>\$ 8.1</u> | <u>\$ 5.0</u>            | <u>\$ 4.2</u> |

(1) Amortizable intangible assets are included in "Other Assets."

Customer relationships are amortized over 15 to 16 years. Trademarks are amortized over five years and other intangibles are amortized over three years. The Company recorded amortization expense of \$0.9 million, \$1.2 million and \$1.2 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Estimated intangible asset amortization expense, by year in the aggregate, consists of the following at December 31, 2019 (in millions):

|            | Amortization  |
|------------|---------------|
| 2020       | \$ 0.6        |
| 2021       | 0.3           |
| 2022       | 0.2           |
| 2023       | 0.2           |
| 2024       | 0.2           |
| Thereafter | 1.6           |
| Total      | <u>\$ 3.1</u> |

## 6. ALLOWANCE FOR DOUBTFUL ACCOUNTS

The allowance for doubtful accounts consisted of the following (in millions):

|                              | December 31,  |               |               |
|------------------------------|---------------|---------------|---------------|
|                              | 2019          | 2018          | 2017          |
| Balance at beginning of year | \$ 2.1        | \$ 0.9        | \$ 0.7        |
| Provision charged to expense | 1.1           | 1.2           | 0.2           |
| Write-offs, less recoveries  | (0.1)         | —             | —             |
| Balance at end of year       | <u>\$ 3.1</u> | <u>\$ 2.1</u> | <u>\$ 0.9</u> |

The Company recorded bad debt expense of less than 0.2% of net sales in each of 2019, 2018 and 2017.

## 7. DEBT

Debt consisted of the following (in millions):

|                           | December 31,    |                 |
|---------------------------|-----------------|-----------------|
|                           | 2019            | 2018            |
| Revolving credit facility | \$ 131.3        | \$ 132.3        |
| Other obligations         | 5.5             | 6.6             |
| Total debt                | <u>136.8</u>    | <u>138.9</u>    |
| Less current portion      | 1.7             | 1.8             |
| Long-term debt            | <u>\$ 135.1</u> | <u>\$ 137.1</u> |

**Credit Facility**— In July 2017, the Company amended and extended its asset-based senior secured revolving credit facility (“credit facility”) with Wells Fargo Capital Finance, Bank of America and JPMorgan Chase. The amendment, among other things, increased the borrowing capacity from \$160 million to \$250 million, reduced the interest rate, reduced the minimum fixed charge coverage ratio (“FCCR”) and extended the maturity to July 14, 2022. The amended facility may be increased to \$300 million, through an uncommitted \$50 million accordion feature, subject to certain conditions. Borrowing availability under the credit facility is based on eligible accounts receivable, inventory and real estate. The real estate component of the borrowing base amortizes monthly over 12.5 years on a straight-line basis. Borrowings under the credit facility are collateralized by substantially all of the Company’s assets, and the Company is subject to certain operating limitations applicable to a loan of this type, which, among other things, place limitations on indebtedness, liens, investments, mergers and acquisitions, dispositions of assets, cash dividends and transactions with affiliates.

At December 31, 2019, under the credit facility, the Company had revolving credit borrowings of \$131.3 million outstanding at a weighted average interest rate of 3.35% per annum, letters of credit outstanding totaling \$3.2 million, primarily for health and workers’ compensation insurance, and \$31.5 million of additional committed borrowing capacity based on existing collateral levels. The Company had \$4.2 million of financing leases and \$1.3 million of other obligations outstanding at December 31, 2019 at a weighted average borrowing rate of 5.42% and 6.11%, respectively.

At December 31, 2018, under the credit facility, the Company had revolving credit borrowings of \$132.3 million outstanding at a weighted average interest rate of 4.27% per annum, letters of credit outstanding totaling \$3.3 million, primarily for health and workers’ compensation insurance, and \$31.5 million of additional committed borrowing capacity. The Company pays a commitment fee for unused capacity of 0.25% per annum. In addition, the Company had \$4.9 million of financing leases and \$1.7 million of other obligations outstanding at December 31, 2018 at a weighted average rate of 5.01% and 6.11%.

The sole financial covenant in the credit facility is the minimum FCCR of 1.00:1.00, which and must be tested by the Company if the excess borrowing availability falls below an amount in the range of \$17.5 million to \$31.3 million, depending on our borrowing base. In 2019 the minimum FCCR was not required to be tested as excess borrowing availability was greater than the minimum threshold. However, if the Company’s availability would have fallen below that threshold, the Company would not have met the minimum FCCR. FCCR must also be tested on a pro forma basis prior to consummation of certain significant business transactions outside our ordinary course of business, as defined in the agreement.

**Maturities**—At December 31, 2019, the aggregate scheduled maturities of debt were as follows (in millions):

|       |    |              |
|-------|----|--------------|
| 2020  | \$ | 1.7          |
| 2021  |    | 1.5          |
| 2022  |    | 132.6        |
| 2023  |    | 0.9          |
| 2024  |    | 0.1          |
| Total | \$ | <u>136.8</u> |

The fair value of long-term debt, as calculated using the aggregate cash flows from principal and interest payments over the life of the debt, was approximately \$133.0 million and \$134.0 million at December 31, 2019 and 2018, respectively, based upon a discounted cash flow analysis using current market interest rates.

## 8. PREFERRED SHARES

The Company has authorized 5.0 million shares of \$0.01 par value preferred stock, of which 400,000 shares have been designated as Series A Junior Participating Preferred Stock. No such shares have been issued. See Note 16, “Rights Agreement” for information concerning a rights agreement pursuant to which shares of the Series A Junior Participating Preferred Stock may be issued.

## 9. OTHER ACCRUED LIABILITIES

The Company had other accrued liabilities at December 31, 2019 and 2018 of \$15.8 million and \$18.0 million, respectively. Liabilities for self-insurance accruals were \$3.7 million and \$3.5 million, amounts due for sales incentive programs were \$7.4 million and \$6.7 million, and short term environmental accruals were \$1.1 million and \$1.1 million at December 31, 2019 and 2018, respectively. The remaining other accruals were \$3.6 million and \$6.7 million at December 31, 2019 and 2018, respectively.

## 10. COMMITMENTS AND CONTINGENCIES

### *Legal and Environmental Matters*

The Company accrues expenses for contingencies when it is probable that an asset has been impaired or a liability has been incurred and management can reasonably estimate the expense. Contingencies for which the Company has made accruals include environmental and other legal matters. It is possible, however, that actual expenses could exceed our accrual by a material amount which could have a material adverse effect on the Company's future liquidity, financial condition or operating results in the period in which any such additional expenses are incurred or recognized.

### *Environmental Matters*

The Company was previously identified as a potentially responsible party in connection with the cleanup of contamination at a formerly owned property in Montana. On February 18, 2015, the Montana Department of Environmental Quality (the "DEQ") issued an amendment to the unilateral administrative order of the DEQ outlining the final remediation of the property in its Record of Decision (the "ROD"). In September 2015, the remedial action work plan ("RAWP") was approved.

The Company paid \$0.4 million, \$0.6 million and \$4.6 million in 2019, 2018 and 2017, respectively, for costs related to implementation of the RAWP. While the Company expects ongoing remediation expenditures to continue, it is unable to ascertain the timeline for completion given the uncertain nature of projects of this type. Following subsequent reviews of the remaining costs to complete the remediation, the Company recorded a charge of \$0.5 million in the fourth quarter of 2018 which was reflected in discontinued operations. The Company estimates the total remaining cost of implementing the RAWP to be \$2.9 million at December 31, 2019 and this amount is accrued in "other accrued liabilities" and "other non-current liabilities" on the condensed balance sheets. The Company believes the accrual represents a reasonable best estimate of the total remaining remediation costs, based on facts, circumstances, and information currently available. However, there are currently unknown variables relating to the actual levels of contaminants and amounts of soil that will ultimately require treatment or removal and as part of the remediation process, additional soil and groundwater sampling, and bench and pilot testing is required to ensure the remediation will achieve the outcome required by the DEQ. The ultimate final amount of remediation costs and expenditures are difficult to estimate with certainty and as a result, the amount of actual costs and expenses ultimately incurred by the Company with respect to this property could be lower than, or exceed the amount accrued as of December 31, 2019 by a material amount. If actual costs are materially higher, the incremental expenses over the amount currently accrued could have a material adverse effect on our liquidity, financial condition and operating results.

In addition, some of the Company's current and former distribution centers are located in areas where environmental contamination may have occurred, and for which the Company, among others, could be held responsible. The Company currently believes that there are no material environmental liabilities at any of its distribution center locations.

### *Legal Matters*

On June 29, 2018, the Company entered into a confidential agreement with PrimeSource Building Products, Inc. for settlement and release of all claims between the parties. The agreement does not limit or restrict the future business activities of any of the parties and did not have a material adverse effect on the Company's financial condition, results of operations, nor cash flows. The Company incurred approximately \$3.5 million and \$3.1 million

in expenses related to the Primesource litigation and settlement for the years ended December 31, 2018 and 2017, respectively.

The Company is also party to various other litigation matters, in most cases involving ordinary and routine claims incidental to its business. It cannot reasonably estimate the ultimate legal and financial liability with respect to all pending litigation matters. However, the Company believes, based on our examination of such matters, that the ultimate liability will not have a material adverse effect on its financial position, results of operation or cash flows.

## 11. EMPLOYEE BENEFIT PLANS

**Defined Contribution Plans**—The Company sponsors a qualified defined contribution plan covering substantially all its employees. The plan provides for Company matching contributions based upon a percentage of the employee’s voluntary contributions. The Company’s matching contributions were \$1.7 million, \$1.6 million and \$1.6 million for the years ended December 31, 2019, 2018 and 2017, respectively.

**Defined Benefit Plans**—The Company participates in several multi-employer pension plans that provide benefits to certain employees under collective bargaining agreements. The risks of participating in these multi-employer plans are different from single-employer plans in the following aspects: (1) assets contributed to the multi-employer plan by one employer may be used to provide benefits to employees of other participating employers, (2) if a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers, and (3) if the Company chooses to stop participating in some of its multi-employer plans, the Company may be required to pay those plans an amount based on the underfunded status of the plan, referred to as a withdrawal liability. The Company’s total contributions to these plans were \$0.9 million, \$0.9 million, and \$0.8 million in the years ended December 31, 2019, 2018 and 2017, respectively. A majority of the contributions were to the Western Conference of Teamsters Pension Plan. The Company does not contribute more than 5% percent of total contributions for any of these multi-employer pension plans. The Company’s participation in the multi-employer pension plans as of December 31, 2019 is outlined in the table below.

| Legal Name of Plan   | EIN - Plan Number | Pension Protection Act Zone Status | Financial Improvement Plan | Surcharge Imposed | Expiration Date of Collective-Bargaining Agreement | 12/31/2019 Company Participants |
|--|-------------------|------------------------------------|----------------------------|-------------------|--|---------------------------------|
| Western Conference of Teamsters Pension Plan               | 91-6145047 - 001  | Funded > 80%                       | No                         | No                | 12/1/2019 to 4/30/2021                             | 92                              |
| Southern California Lumber Industry Retirement Fund        | 95-6035266 - 001  | Funded > 80%                       | No                         | No                | 6/30/2020  | 25                              |
| Central States, Southeast and Southwest Areas Pension Plan | 36-6044243 - 001  | Funded < 65%                       | Implemented                | No                | 12/27/2020   | 4                               |

## 12. STOCK BASED COMPENSATION

### 2005 Executive Incentive Compensation Plan

Under the 2005 Executive Incentive Compensation Plan, as amended and restated (the “2005 Plan”), the Company may grant up to 8,125,000 shares of common stock to be used as incentive awards. The 2005 Plan allows the Company to grant awards to key employees, including restricted stock awards, stock options, other stock-based incentive awards and cash-based incentive awards subject primarily to the requirement of continued employment. Awards under the 2005 Plan are available for grant over a ten-year period unless terminated earlier by the Board of Directors. The Company granted 510,684, 406,743, and 404,793 shares of restricted stock to employees in 2019, 2018 and 2017, respectively. No monetary consideration is paid to the Company by employees who receive restricted stock. The restricted shares vest ratably over three to five years. Restricted stock can be granted with or without performance restrictions.

### 2005 Non-Employee Directors’ Restricted Stock Plan

Under the Company’s 2005 Non-Employee Directors’ Restricted Stock Plan, as amended and restated, incentive awards of up to 1,075,000 shares of common stock may be granted. Awards under this plan are available

for grant over a ten-year period expiring March 23, 2029, unless terminated earlier by the Board of Directors. The Company granted 90,000, 33,732, and 27,696 shares of restricted stock in 2019, 2018 and 2017, respectively.

### Summary of Stock-Based Compensation

The Company recognized approximately \$2.3 million, \$2.3 million, and \$2.2 million in non-cash stock compensation expense for restricted stock awards in 2019, 2018 and 2017, respectively.

The following summary presents information regarding restricted stock and restricted stock units for the three years in the period ended December 31, 2019:

|   | Shares<br>(000's) | Weighted<br>Average<br>Grant Date<br>Fair Value | Aggregate<br>Intrinsic<br>Value<br>(000's) | Average<br>Remaining<br>Vesting<br>Period<br>(months) | Unrecognized<br>Compensation<br>Expense<br>(000's) |
|---|-------------------|---|--|---|--|
| Balance at January 1, 2017                            | 1,349             | \$ 3.64   |  |   |  |
| Granted   | 432               | 6.77  |  |   |  |
| Restricted stock vested                               | (482)             | 3.62  |  |   |  |
| Forfeited   | (109)             | 3.94  |  |   |  |
| Outstanding at December 31, 2017                      | 1,190             | 4.75  |  |   |  |
| Granted   | 440               | 6.86  |  |   |  |
| Restricted stock vested                               | (393)             | 4.76  |  |   |  |
| Forfeited   | (225)             | 4.54  |  |   |  |
| Outstanding at December 31, 2018                      | 1,012             | 5.72  |  |   |  |
| Granted   | 600               | 2.36  |  |   |  |
| Restricted stock vested                               | (555)             | 5.33  |  |   |  |
| Forfeited   | (142)             | 5.07  |  |   |  |
| Outstanding at December 31, 2019                      | 915               | \$ 3.85   | \$ 1,409                                   | 18.9  | \$ 1,518   |
| Restricted stock units<br>vested at December 31, 2019 | 134               | \$ 2.56   | \$ 206                                     | N/A   | N/A  |

### 13. INCOME TAXES

The provision for income taxes, relating to continuing operations, is composed of the following as of December 31, 2019, 2018 and 2017 (in millions):

|                                    | 2019     | 2018     | 2017     |
|------------------------------------|----------|----------|----------|
| Current:                           |          |          |          |
| U.S. Federal expense (benefit)     | \$ (0.1) | \$ (0.3) | \$ (0.1) |
| State and local tax                | 0.1      | 0.1      | 0.4      |
| Total current                      | —        | (0.2)    | 0.3      |
| Deferred:                          |          |          |          |
| U.S. Federal tax                   | 9.7      | (1.6)    | 3.7      |
| State and local tax                | 1.4      | 0.4      | (0.8)    |
| Total deferred                     | 11.1     | (1.2)    | 2.9      |
| Total income tax expense (benefit) | \$ 11.1  | \$ (1.4) | \$ 3.2   |

A reconciliation of income taxes based on the application of the statutory federal income tax rate to income taxes as set forth in the consolidated statements of operations is as follows for the years ended December 31, 2019, 2018 and 2017:

|  | <u>2019</u>     | <u>2018</u>  | <u>2017</u>     |
|--|-----------------|--------------|-----------------|
| Federal statutory rate                       | 21.0%           | 21.0%        | 35.0%           |
| Increase (decrease) in taxes resulting from: |                 |              |                 |
| State and local taxes                        | (13.8)          | (7.8)        | 17.3            |
| Nondeductible items                          | (1.8)           | (2.9)        | (17.6)          |
| Tax Cuts and Jobs Act of 2017                | —               | —            | (147.7)         |
| Prior year true-up items                     | (4.5)           | 6.9          | 6.8             |
| Refundable tax credits                       | 0.8             | 1.5          | 3.6             |
| Other, net                                   | (0.8)           | (0.1)        | 0.1             |
| Change in valuation allowance                | (111.5)         | —            | (0.1)           |
| Effective income tax rate                    | <u>(110.6)%</u> | <u>18.6%</u> | <u>(102.6)%</u> |

At December 31, 2019, our valuation allowance on deferred tax assets (“DTAs”) was approximately \$20.0 million compared to \$7.3 million at December 31, 2018. In each reporting period, we examine the available positive and negative evidence in assessing whether it is more likely than not that our deferred tax assets are recoverable, including consideration as to whether sufficient future taxable income would be generated to utilize the existing deferred tax assets. Starting in the second quarter of 2019, our operations were in a position of cumulative losses for the most recent three-year period. The cumulative loss incurred by the Company over the three-year period ended December 31, 2019 constitutes a significant piece of objective negative evidence in assessing whether it is more likely than not that our deferred tax assets are recoverable. Such objective negative evidence limits the ability to consider other subjective evidence, such as our projections for future profitability and growth. Based on this evaluation, the company concluded it is more likely than not that a significant portion of our deferred tax assets will not be realized. Accordingly, the Company has recorded a full valuation allowance on its net deferred tax asset position, resulting in a \$12.7 million income tax expense in our provision for income taxes for the year ended December 31, 2019.

The income tax expense from continuing operations for 2019 was \$11.1 million on a loss before taxes of \$10.2 million. For 2018, an income tax benefit of \$1.4 million was recorded on a pretax loss of \$7.4 million. The income tax benefit from discontinued operations for 2018 was \$0.1 million on a net loss before taxes of \$0.5 million.

At December 31, 2019, the Company had gross deferred tax assets of \$35.4 million and a valuation allowance of \$20.0 million, netting to deferred tax assets of \$15.4 million. The Company had deferred tax liabilities of \$15.4 million at December 31, 2019. The Company had \$0.0 million and \$11.1 million net deferred tax assets at December 31, 2019 and 2018, respectively.

On December 22, 2017, the President of the United States signed into law the Tax Cuts and Jobs Act tax reform legislation. This legislation made significant changes in U.S. tax law including a reduction in the corporate tax rates, changes to net operating loss carryforwards and carrybacks, and a repeal of the corporate alternative minimum tax. The legislation reduced the U.S. corporate tax rate from 35% to 21%. As a result, the Company was required to revalue deferred tax assets and liability at the enacted rate. This revaluation resulted in \$4.5 million of income tax expense in continuing operations and a corresponding reduction in the deferred tax asset. The other provisions of the Tax Cuts and Jobs Act did not have a material impact on the 2017 consolidated financial statements.

Deferred income taxes at December 31, 2019 and 2018 are comprised of the following (in millions):

|   | 2019    |             | 2018    |             |
|---|---------|-------------|---------|-------------|
|   | Assets  | Liabilities | Assets  | Liabilities |
| Income tax loss carryforwards             | \$ 17.8 | \$ —        | \$ 17.8 | \$ —        |

| Total                                     | \$ 15.4 | \$ 15.4     | \$ 17.5 | \$ 6.4      |

The Company has both federal and state tax loss carryforwards reflected above. The Company's federal tax loss carryforwards of approximately \$44 million will begin to expire in 2030. As a result of the Tax Act, any federal tax losses incurred by the Company starting in 2018 will have an indefinite carryforward. The Company also has an interest limitation carryforward under IRC Section 163(j) of approximately \$9.0 million as of December 31, 2019. This limitation also has an indefinite carryforward period. The Company's remaining carryforwards have expiration dates from 2018 to 2036. The Company has no material uncertain tax positions at December 31, 2019.

We file U.S. and state tax returns in jurisdictions with varying statutes of limitations. The 2016 through 2019 tax years generally remain subject to examination by federal and state tax authorities.

#### 14. BASIC AND DILUTED NET LOSS PER SHARE

The Company calculates its basic loss per share by dividing net loss allocated to common shares outstanding by the weighted average number of common shares outstanding. Unvested shares of restricted stock participate in dividends on the same basis as common shares. As a result, these share-based awards meet the definition of participating securities and the Company applies the two-class method to compute earnings per share. The two-class method is an earnings allocation formula that treats participating securities as having rights to earnings that would otherwise have been available to common stockholders. In periods in which the Company has net losses, the losses are not allocated to participating securities because the participating security holders are not obligated to share in such losses. The following table presents the number of participating securities and earnings allocated to those securities for the years ended December 31, 2019, 2018 and 2017 (in millions):

|  | 2019 | 2018 | 2017 |
|--|------|------|------|
| Earnings allocated to participating shareholders | \$ — | \$ — | \$ - |
| Number of participating securities               | 0.8  | 0.9  | 1.1  |

The diluted earnings per share calculations include the effect of the assumed exercise using the treasury stock method for both stock options and unvested restricted stock units, except when the effect would be anti-dilutive. The following table presents the number of common shares used in the calculation of net loss per share from continuing operations for the years ended December 31, 2019, 2018 and 2017 (in millions):

|   | 2019 | 2018 | 2017 |
|---|------|------|------|
| Weighted-average number of common shares-basic    | 25.4 | 25.1 | 24.9 |
| Dilutive potential common shares                  | —    | —    | —    |
| Weighted-average number of common shares-dilutive | 25.4 | 25.1 | 24.9 |

The Company had no stock options outstanding at December 31, 2019, 2018 and 2017 and as such had no dilutive effect.

## 15. SELECTED QUARTERLY FINANCIAL DATA (UNAUDITED)

The following table provides selected consolidated financial information from continuing operations on a quarterly basis for each quarter of 2019 and 2018. The Company's business is seasonal and particularly sensitive to weather conditions. Interim amounts are therefore subject to significant fluctuations (in millions, except per share data).

|  | First<br>Quarter | Second<br>Quarter | Third<br>Quarter | Fourth<br>Quarter | Full<br>Year |
|--|------------------|-------------------|------------------|-------------------|--------------|
| <b>2019</b>                                    |                  |                   |                  |                   |              |
| Net sales                                      | \$ 197.4         | \$ 218.5          | \$ 215.7         | \$ 180.4          | \$ 812.0     |
| Gross margin                                   | 37.4             | 44.3              | 44.7             | 35.6              | 162.0        |

## 16. RIGHTS AGREEMENT

On May 18, 2016, the Board of Directors (the "Board") of the Company entered into a rights agreement (the "Rights Agreement") with Computershare Trust Company, N.A. and declared a dividend of one preferred share purchase right (a "Right") for each outstanding share of common stock, \$0.01 par value per share, of the Company. The dividend was paid at close of business on May 31, 2016 to the stockholders of record on that date. The Board adopted the Rights Agreement to protect stockholder value by protecting the Company's ability to capture the value of its net operating losses used to reduce potential future federal income tax obligations. The Rights Agreement was approved by the Company's stockholders at the 2017 annual meeting of stockholders. On May 6, 2019 the Board approved and we entered into a First Amendment to Rights Agreement between the Company and ComputerShare Trust Company, N.A., as rights agent. The Amendment, among other things, (i) extends the final expiration date (as defined in the Rights Agreement) from May 18, 2019 to May 18, 2022; (ii) changes the initial purchase price (as defined in the Rights Agreement) from \$13.86 to \$13.39; and (iii) increases the period pursuant to which the Board has to consider an exemption request (as defined in the Rights Agreement) from ten business days to 20 business days. The Rights Agreement will expire on the earliest of (i) May 18, 2022, (ii) the time at which the Rights are

redeemed or exchanged, as provided for in the Rights Agreement, (iii) the repeal of Section 382 of the Internal Revenue Code of 1986, as amended, if the Board determines that the Rights Agreement is no longer necessary for the preservation of the Company's NOLs, and (iv) the beginning of a taxable year of the Company to which the Board determines that no NOLs may be carried forward. We adopted the Rights Agreement to protect stockholder value by attempting to diminish the risk that our ability to use our NOLs to reduce potential future federal income tax obligations may become substantially limited.

Each Right entitles the registered holder to purchase from the Company one one-hundredth of a share of Series A Junior Participating Preferred Stock, par value \$0.01 per share ("Preferred Shares"), of the Company at a price of \$13.39 per one one-hundredth of a Preferred Share, subject to adjustment. As a result of the Rights Agreement, any person or group that acquires beneficial ownership of 4.99% or more of the Company's common stock without the approval of the Board would be subject to significant dilution in the ownership interest of that person or group.

In connection with entry into the Rights Agreement, on May 18, 2016, the Company filed with the Secretary of State of the State of Delaware an Amended and Restated Certificate of Designation of Series A Junior Participating Preferred Stock to create the Preferred Shares.

## **17. DISCONTINUED OPERATIONS**

The Company's discontinued operations did not have any sales in 2019, 2018 or 2017. In 2018 and 2017, loss from discontinued operations net of taxes of \$0.4 million and \$0.9 million, respectively, were primarily related to changes in estimates associated with remediation of formerly owned property in Montana.

## **18. SUBSEQUENT EVENT**

On February 19, 2020, Huttig filed suit, Huttig Building Products, Inc. and Huttig, Inc. v. United States, et al, Court No. 20-00045, at the Court of International Trade ("CIT") requesting relief from the recently imposed Section 232 derivative steel tariffs on the Company's customs entries on the basis that such tariffs are unconstitutional and not enacted in accordance with law. The U.S. has agreed to a stipulated injunction against the deposit of the 232 derivative steel duties on Huttig's entries subject to Huttig increasing its current customs bond to cover the estimated tariffs while the case is being heard. Other parties (including competitors) have filed similar complaints with the CIT and received similar injunctions.

## ITEM 9—CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

## ITEM 9A—CONTROLS AND PROCEDURES

**Evaluation of Disclosure Controls and Procedures**—The Company, under the supervision and with the participation of our Disclosure Committee and management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934, as amended (the “Exchange Act”). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective as of December 31, 2019 in all material respects in (a) causing information required to be disclosed by us in reports that we file or submit under the Exchange Act to be recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms and (b) causing such information to be accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

**Management’s Report on Internal Control Over Financial Reporting**—The Company’s management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management’s assessment included an evaluation of the design of the Company’s internal control over financial reporting and testing of the operational effectiveness of its internal control over financial reporting. Management reviewed the results of its assessment with the Audit Committee of our Board of Directors. Based on our evaluation under the framework in *Internal Control—Integrated Framework (2013)*, our management concluded that our internal control over financial reporting was effective as of December 31, 2019.

Because of inherent limitations, any system of internal control over financial reporting may not prevent or detect all misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of confidence with the policies and procedures may deteriorate.

There were no changes in the Company’s internal control over financial reporting during the Company’s fiscal fourth quarter ended December 31, 2019 that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

## ITEM 9B—OTHER INFORMATION

None

## PART III

### ITEM 10—DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information regarding executive officers and directors of the Company is set forth in the Company's definitive proxy statement for its 2020 Annual Meeting of Stockholders (the "2020 Proxy Statement") under the captions "Executive Officers" and "Election of Directors," respectively, and is incorporated herein by reference. Information regarding Section 16(a) beneficial ownership reporting compliance is set forth in the 2020 Proxy Statement under the caption "Delinquent Section 16(a) Reports," and is incorporated herein by reference.

The information regarding the Company's "audit committee financial expert" and identification of the members of the Audit Committee of the Company's Board of Directors is set forth in the 2020 Proxy Statement under the caption "Board Committees" and is incorporated herein by reference.

The Company adopted a Code of Business Conduct and Ethics applicable to all directors and employees, including the principal executive officer, principal financial officer and principal accounting officer. The Code of Business Conduct and Ethics is available on the Company's website at [www.huttig.com](http://www.huttig.com). The contents of the Company's website are not part of this Annual Report. Stockholders may request a free copy of the Code of Business Conduct and Ethics from:

Huttig Building Products, Inc.  
Attention: Corporate Secretary  
555 Maryville University Dr.  
Suite 400  
St. Louis, Missouri 63141  
(314) 216-2600

The Company intends to satisfy its disclosure requirement under Item 5.05 of the current report on Form 8-K regarding amendments to, or waivers from, its Code of Business Conduct and Ethics by posting such amendment or waiver on its website at [www.huttig.com](http://www.huttig.com).

### ITEM 11—EXECUTIVE COMPENSATION

The information required by Item 11 is set forth in the 2020 Proxy Statement under the captions "Board of Directors and Committees of the Board of Directors," "Executive Compensation" and "Compensation Committee Interlocks and Insider Participation" and is incorporated herein by reference.

### ITEM 12—SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Except as set forth below, the information required by Item 12 is set forth in the 2020 Proxy Statement under the captions "Beneficial Ownership of Common Stock by Directors and Management" and "Principal Stockholders of the Company," and is incorporated herein by reference.

## Equity Compensation Plan Information

The following table presents information, as of December 31, 2019, for equity compensation plans under which the Company's equity securities are authorized for issuance.

| <b>Plan Category</b>                                       | <b>Number of securities to be issued upon exercise of outstanding options, warrants and rights</b><br><b>(a)</b> | <b>Weighted-average exercise price of outstanding options, warrants and rights</b><br><b>(b)</b> | <b>Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))</b><br><b>(c)</b> |
|--|--|--|--|

**HUTTIG BUILDING PRODUCTS, INC.**  
**DESCRIPTION OF SECURITIES**  
**REGISTERED PURSUANT TO SECTION 12 OF THE**  
**SECURITIES EXCHANGE ACT OF 1934**

As of December 31, 2019, Huttig Building Products, Inc. (“Huttig” “we” or “our”) has two classes of securities, our common stock, par value \$0.01 per share (“Common Stock”), of which 80,000,000 are authorized, and our preferred stock, par value \$0.01 per share (“Preferred Stock”), of which 5,000,000 shares are authorized. In respect of our Preferred Stock, 400,000 shares have been designated as Series A Junior Participating Preferred Stock, although no such shares are outstanding.

The following description of our capital stock is a summary and is subject to, and is qualified in its entirety by reference to the provisions of our Second Amended and Restated Certificate of Incorporation (the “Charter”) and our by-laws, as amended and restated (the “Bylaws”), copies of which are incorporated by reference as Exhibits 3.1 and 3.2 to our Annual Report on Form 10-K for the year ended December 31, 2019 of which Exhibit 4.3 is a part.

**COMMON STOCK**

**Listing**

Our Common Stock is listed and principally traded on The NASDAQ Stock Market LLC under the symbol “HBP.”

**Dividend Rights**

Subject to any preferential dividend rights granted to the holders of any shares of our Preferred Stock that may at the time be outstanding and any restrictions contained in agreements to which we are a party, holders of our Common Stock are entitled to receive ratably any dividends as may be declared from time to time by our Board out of funds legally available therefor.

**Rights Upon Liquidation**

Subject to any preferential rights of outstanding shares of Preferred Stock that may at the time be outstanding, holders of our Common Stock are entitled to share ratably, upon any liquidation, dissolution, or winding up of Huttig, in all remaining assets legally available for distribution to stockholders.

**Other Rights and Preferences**

Our Common Stock has no sinking fund, redemption provisions, or preemptive, conversion, or exchange rights.

**Voting**

All holders of Common Stock are entitled to one vote per share on all matters to be voted on by our stockholders. Directors shall be elected by a plurality of the votes cast at an election. Stockholders do not have cumulative voting rights in election of directors. All other actions (unless required by law) shall be authorized by a majority of the votes cast by the holders of shares entitled to vote thereon, present in person or represented by proxy, and where a separate vote by class is required, by a majority of the votes cast by stockholders of such class, present in person or represented by proxy, except that (i) amendments to the Bylaws by the stockholders require a vote of two-thirds of the shares entitled to vote thereon, and (ii) removal of a director by the stockholders may only be for cause and requires a vote of two-thirds of the voting power of the shares entitled to vote at an election of directors.

**Certain Anti-Takeover Effects**

Certain provisions of Delaware law, our Charter and our Bylaws provide for the following, which may have the effect of deterring hostile takeovers or delaying changes in control or management:

- *Section 203.* We are generally subject to Section 203 of the Delaware General Corporation Law, which, subject to certain exceptions, prohibits a Delaware corporation from engaging in any business combination with any “interested stockholder” for a period of three years following the date that such stockholder became an interested stockholder. An interested stockholder is generally defined to mean any entity or person
-

beneficially owning 15% or more of the outstanding voting stock of the corporation, together with its affiliates.

- *Undesignated Preferred Stock.* Our Board has the ability to issue preferred stock with voting or other rights or preferences that could impede the success of any attempt to change control of us.
- *Stockholder Meetings.* Our Charter provides that our stockholders may not act by written consent, which may lengthen the amount of time required to take stockholder actions. As a result, a holder controlling a majority of our capital stock would not be able to amend our Bylaws or remove directors without holding a meeting of our stockholders called in accordance with our Bylaws. In addition, our Bylaws provide that special meetings of the stockholders may be called only by the Chairperson of the Board or our Board. Stockholders may not call a special meeting.
- *Board Classification.* Our Board is divided into three classes, one class of which is elected each year by our stockholders. The directors in each class will serve for a three-year term.
- *No Cumulative Voting.* Our Charter and Bylaws do not permit cumulative voting in the election of directors.
- *Blank check preferred stock.* As noted above, our Charter allows the Board to issue shares of Preferred Stock without the further approval of our stockholders. This is sometimes referred to as “blank check” preferred stock.
- *Amendment of Charter and Bylaws.* Certain provisions of our Charter may only be amended by holders of at least two-thirds of the voting power of our then outstanding voting stock. Our Bylaws may only be amended by holders of at least two-thirds of the voting power of our then outstanding voting stock or by our Board.

## **RIGHTS TO ACQUIRE SERIES A JUNIOR PARTICIPATING PREFERRED STOCK**

Huttig has entered into a Rights Agreement with Computershare Trust Company, N.A. (as amended from time to time, the “[Rights Agreement](#)”), and we declared a dividend distribution of one preferred share purchase right for each outstanding share of Common Stock that was payable to stockholders of record as of the close of business on May 31, 2016.

Subject to the terms, provisions and conditions of the Rights Agreement, if these rights become exercisable, each right would initially represent the right to purchase from us 1/100th of a share of our Series A Junior Participating Preferred Stock for a purchase price of \$13.39 (“[Purchase Price](#)”). If issued, each fractional share of preferred stock would generally give a stockholder approximately the same dividend, voting and liquidation rights as does one share of our Common Stock. However, prior to exercise, a right does not give its holder any rights as a stockholder, including without limitation any dividend, voting or liquidation rights. The rights will not be exercisable until the earlier of: (i) 10 calendar days after a public announcement, or the Board concluding, that a person or group has become an Acquiring Person (as defined under the Rights Agreement); and (ii) 10 business days after the commencement of a tender or exchange offer by a person or group if upon consummation of the offer the person or group would beneficially own 4.99% or more of our outstanding Common Stock. An “Acquiring Person” generally means a person that becomes a beneficial owner of 4.99% or more of our Common Stock, with certain limited exceptions.

The Board may, in its sole discretion, exempt any person or group who would otherwise be an Acquiring Person from being deemed as such for purposes of the Rights Agreement, if it determines at any time prior to the time at which the rights are no longer redeemable that the beneficial ownership of such person would not jeopardize, endanger or limit (in timing or amount) the availability of Huttig’s net operating losses and other tax benefits. Any such person or group is an “exempted person” under the rights plan. The Board, in its sole discretion, may subsequently make a contrary determination and such person would then become an acquiring person. The Rights Agreement will terminate at the close of business on May 18, 2022, if not earlier terminated in accordance with its terms

**Huttig Building Products, Inc. and Subsidiaries**  
**Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002**

I, Jon P. Vrabely, certify that:

1. I have reviewed this annual report on Form 10-K of Huttig Building Products, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiary, is made known to us by others within the entity, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
